Per P. and O. steamer, 4th Sept., from Southampton.—To Shanghai: Mr. Bartley. To Hong Kong: Mrs. Rice, Mr. Walker.—To Penang: Mr. J. Young.

Per P. and O. steamer, 20th Sept., from Southampton.—To Hong Kong: Mrs. Jack, Captain Thomsett, Mr. and Mrs. G. A. Roesing.—From Marseilles, 28th Sept. To Hong Kong: Mr. Remé, Mr. W. Lamond.—From Suez to Shanghai: Mr. and Mrs. Probst, Mr. and Mrs. Bobsted.—To Hong Kong: Mr. W. Wilson and Mrs. Wilson.

Per P. and O. steamer, Sept. 27, from Southampton.—To Shanghai, *via* Bombay: Mr. Isla Sitwell.

Per P. and O. steamer, Oct. 4th, from Southampton.—To Hong Kong: Mr. Duncanson Mr. Hancock, Mr. T. Rothwell.—To Penang: Mr. J. P Stewart.

Per P. and O. str., Oct. 20, from Southampton to Penang.—Mrs. Walter Gillespie, infant, and two children. From Marseilles, 28th Oct.—To Shanghai: Mr. A. K. McDonell, Mr. Crawford Kerr. To Hong Kong: Mr. Wadman. To Singapore: Mr. Callaghan. From Gibraltar. To Hong Kong: Mr. P. Toledo, Mr. H. Merry, of Colombo. From Suez —To Hong Kong: Sir Hercules and Lady Robinson.

Per P. and O. steamer, 4th November, from Southampton.—To Singapore: Mr. and Mrs. Shaw, Mr. and Mrs. C. W. Hatch. From Marseilles, 12th Nov.—To Hong Kong: Mr. Young.

PASSENGERS INWARD.

By this Mail, to Marseilles, per Massilia, arrived 26th August.—From Hong Kong: Messrs. F. Corus and J. Odell.—From Singapore: Messrs. Hartsen and Gray, Captain Sobral, Lieut. Dominiquez.—To Southampton, per Poonah, expected to arrive 1st Sept.—From Hong Kong: Mr. and Mrs. Harper, Assist.-Commy.-Gen. Ball and soldier servant, Messrs. G. Bouchard, H. Moller, J. H. Meyer, G. H. Godt, S. B. Hansen, H Pauleen, and W. H. Hammond, Lieut. James.—From Singapore: Lieut. Beauchamp, Mr. Gray, Mr. J. Waller.

To Suez, per Bengal, arrived 18th August.—From Hong Kong: Mr. M. Campbell.—To Alexandria.—From Hong Kong: Mr., Mrs., and Miss Jenkins, child, and native male servant, Mr. Wardell, Mr. Shearer, and native male servant, Mr. Cumming.

By last Bombay Mail, to Marseilles, per Valetta, arrived 17th August.—From Singapore: Mr. Hugo Fehr.—From Shanghai: Mr. T. M. Dryedale.

Summary of News from the Far East.

JAPAN.

Notwithstanding the agreement entered into by Japanese officials to pay the first instalment of the indemnity on June 18th, the day opened and passed without the payment or even so much as any apologetic or other message to Colonel Neale from the Japanese Ministers. Indeed, on the night of June 17th the Governor of Yokohama stated that he had received a letter from the Tycoon commanding him not to pay the money, because it was impossible for the Gorogio to communicate with officers of inferior rank. The Tycoon had every intention to pay the money, but if he did so he would lose his life. The Tycoon was the friend, and the Mikado the enemy, of the foreigners; the latter had forbidden the Tycoon to pay, and the latter had been compelled to obey, or lose his position. The news, too, he affirmed, had spread among the people, who stoutly opposed the payment. This open and flagrant breach of faith was not to be tolerated, and Her Majesty's Charge d'Affaires resolved thenceforth to have no transactions on the subject with the native envoys, and after duly notifying the foreign communities of Yokohama and Nagasaki of the circumstance, placed the settlement of the business in the hands of Admiral Kuper The Admiral thereupon notified his intention to commence hostilities in eight days, and advised those among the foreign residents who had wives and families to have them removed if they intended themselves to abide the issue of events. Admiral Jaurez proffered his co-operation, and undertook to defend the foreign settlement. Preparations began in earnest, and continued until the night of June 23rd and June 24th; when about midnight the Japanese officers, not having access to Colonel Neale, went to the French Minister's quarters and sought an interview. The French Minister thought best to accede to the request, and was requested to communicate the fact to Her Majesty's Chargé d'Affaires, which he did; but Colonel Neale sent as a reply that, as the Japanese had suffered matters to go so far, the whole sum must now be paid at once, in 440,000 Mexican dollars, to be delivered at seven the next morning. At that period, accordingly, payment began, and was being continued when the mail left. At the same time the Japanese Ministers informed the different representatives of foreign Powers that the Tycoon, then at Miako, had instructed them to obey the Mikado's orders to expel foreigners and close the ports; notwithstanding, the Tycoon's officers expressed themselves willing to enter into negotiations on the subject; but the foreign Ministers, for obvious reasons, declined to discuss the matter, and announced that they would refer it to their separate Governments. The Japanese officials thereupon requested that foreigners would hold their settlements by their own military forces, a proposal evidently intended to shut them up effectually within certain limits, and contract to the narrowest point their intercourse with Japan; the remaining portion of the reparation being left to Admiral Kuper to secure—namely, the trial and capital punishment of Mr. Richardson's murderers. The Admiral Kuper was accordingly about to proceed to some part of Prince Satsuma's

Digitized by Google

dominions, under the instructions of the British Minister, who found himself, by accepting the plea of the Tycoon's inability to compel the acquiescence of the Prince of Satsuma from obtaining satisfaction. The Prince's castle at Kagosima, near Cape Chikakoff, was open to attack, or the Loo-Choo Islands might be occupied, and their revenues, which belong to Prince Satsuma, might be attached. The Tycoon had been informed of the intention of the British Minister to undertake the task himself of bringing the Prince of Satsuma to terms, and the Tycoon had sent a letter of warning to the Prince, which is reported to have advised compliance. On June 20th a meeting of British residents was convened at the Consulate by Dr. Winchester, H.B.M. Consul, who desired to communicate to them the course of events; he stated that as far as the most solemn written obligations could afford any indication, the peaceful settlement of affairs might have been reasonably anticipated, but that it was then useless either to excite or depress their hopes of a peaceful issue. On that day the following despatch had been received by him from Her Majesty's Charge d'Affaires:—

"Yokohama, June 20.

"Sir,—I have to instruct you to adopt as early as possible such measures as may be most effectual to make known to the British community and to your colleagues the Consuls of foreign States the present situation of affairs in regard to the subject of the British demands upon the Japanese Government. The patience and moderation which I have exercised in my communications with the Tycoon's Government, in the earnest desire of bringing about a peaceful settlement of the avowedly just demands for reparation preferred by Her Majesty's Government, are well known and sufficiently manifest. At the most recent date (the 18th inst.) those objects which I had in view were on the very eve of being happily accomplished. The Japanese Government, through its envoys, had, after innumerable difficulties, solemnly and unreservedly entered into a written engagement with me to pay the pecuniary demands at short specified intervals, the payment to have been made on the date above referred to. That day has been reached and is passed, and the Japanese Ministers have flagrantly, unequivocally, and designedly broken their faith. In the most unjustifiable and audacious manner the Tycoon's Government now seeks to re-open negotiations previous to accomplishing their solemn assent to the settlement of the pecuniary portion of the demands, and openly declare their intention to withhold all payments, thus most effectually extinguishing all remaining faith in even their most solemn engagements. As Her Majesty's representative, I have now, therefore, to declare that the utmost limits of my patience (consistently exerted and directed to exact the reparation sought by peaceful means, and which I had good reason to hope had been successfully exercised) is now exhausted. Her Majesty's subjects and your colleagues the Consuls of foreign States have, during a period of ten weeks, been at intervals informed that the adoption of coercive measures was an impending contingency, though the probability or otherwise of their occurrence was alternately stronger or feebler as matters progressed. On my part, I have not failed urgently to advise through yourself British subjects and the foreign community generally to be prepared for the worst and most regretable emergency which could arise—namely, the necessity which might present itself (with a view to the security of their persons and property) of abandoning the open ports, while the Vice-Admiral Commanding-in-Chief has as often and as consistently declared his inability to hold militarily the settlement, if coercive measures were actually resorted to, effectually to enforce compliance with the demands. So long as a chance of honest though tardy action could be anticipated on the part of the Japanese Government, I have scrupulously deferred initiating hostilities by an appeal to force. But I now feel myself urgently called upon to leave the adoption of the only measures which the rulers of this country would appear to understand or appreciate—namely, those of coercion—to the Admiral into whose hands I will this day consign the solution of affairs. Thus, within a very short period the policy of expediency, invariably adopted by the Japanese Government, may possibly lead them to repair their broken faith by the actual payment of the indemnities, and a more peaceful aspect of affairs may again present itself, or, on the other hand, the Admiral may have deemed it advisable to profit by the circumstances to carry out some of the operations he may decide upon. Thus, also, Her Majesty's subjects and your colleagues will judge of the measures they may individually deem it practicable and expedient to adopt under all the circumstances here most unreservedly and explicitly set forth. I need hardly add that I shall not fail immediately to concert with Admiral Kuper and Admiral Jaurez (whose frank and cordially proffered co-operation I am assured of) respecting such temporary measures for the safeguard of the community in this emergency as may be practicable.—I have, &c.,

"Edward St. John Neale.

"To Charles A. Winchester, Esq."

Another meeting of the British residents was held at the residence of the British Consul on June 21st, when the following despatch from Admiral Kuper was read:—

"*Euryalus* at Yokohama, June 21, 1863.

Sir,—Her Majesty's *charge d'affaires* has placed in my hands the solution of the questions at issue between the Japanese Government and that of Her Majesty, in consequence of all peaceful and diplomatic negotiations having failed to bring the Government of the Tycoon to a due sense of its obligations. The instructions under which in this contingency it will now be my duty to act will necessarily involve coercive measures to be undertaken by the naval force under my command; and, as such measures will probably lead to action on the part of the Japanese, which would endanger the safety not only of British subjects, but also of all foreign residents in Japan, I have to request you will forthwith communicate this circumstance to all British subjects and to the Consuls of foreign Powers with a view to their immediately adopting such steps as they may think desirable for the security of their persons and property, the force at my disposal being inadequate for the efficient protection of Yokohama, while carrying out the instructions of Her Majesty's Government in other parts of Japan. In order that the community may have sufficient time to make arrangements for their personal security, I desire that you will inform them that unless called upon by any initiative act of hostility on the part of the Japanese to maintain the dignity of the British flag, I shall not take any hostile step until the expiration of eight days from this date, inclusive. I have also to acquaint you that all the precautionary measures adopted some weeks since for the speedy relief of the foreign community the event of any sudden attack or disturbance will be continued during the interval mentioned, and subsequently, if possible, with the same vigilance as hitherto, and such additional assistance rendered as will be consistent with the duty of preserving the efficiency of Her Majesty's ships. Under the existing state of affairs, and the great probability of approaching strife and turmoil, I think it necessary to recommend most strongly, that all those of the community who have wives and families at Yokohama should take the earliest opportunity of removing them, at any rate from the scene of danger, should they themselves determine upon awaiting the issue of events.—I have, &c.,

"Augustus L. Kuper, Vice-Admiral and Commander-in-Chief.

"To Charles A. Winchester, Esq., &c."

At Nagasaki the Japanese had thrown up batteries which command the port and the shipping, whether by the Tycoon's orders or those of Satsuma is not exactly known. An act of hostility had been perpetrated on the American steamer *Pembroke*, while she was lying at anchor in the inland seas. Some Japanese Government vessels fired upon her, and struck her in several places. The *Pembroke* escaped by getting up steam and moving off; her guns were lashed, and she made no attempt to use them, all hands being busy getting the steamer under weigh.

The traders were returning with their wives and families to Nagasaki; the soldiers of the Diamios and Government were leaving the place, and several of the foreign residents were living in their bungalows on the hills out of the settlement. The report that the steamer *Shantung* was totally wrecked about forty miles from Nagasaki proves to be correct. In addition to that disaster we learn that the small steamer *Nankin*, recently purchased by one of the native princes, has blown up, with fifty Japanese. The American steamer *Kumsing* has been sold to the Prince of Itco-chu-zen for $135,000.

The following passage from the original demands of the British Minister on the Tycoon's Government, relating as it does to the anticipated measures which the Japanese might adopt when the time came to comply with or refuse our ultimatum, is of special interest at this moment, looking to the decree that had been issued relative to the expulsion of foreigners:—

"It becomes, therefore, the imperative duty of the undersigned earnestly to warn the Japanese Ministers that the slightest molestation, injury, or violence attempted to be ordered by Japanese authorities, the adherents of Daimios, or others to the persons or property of British subjects at the ports open to foreigners, during the continuance of these preliminary measures, should they be rendered necessary, will alter the whole nature of the operations, and result in the immediate exercise of serious hostilities, the extent, duration, and consequences of which cannot be foreseen; but their whole weight and responsibility will rest with the Japanese Government and its advisers. The present demands of the British Government are sufficiently defined and explicit, as are also the first consequences of a refusal to accede to them."

No loss or ruin to Japan is involved by the preliminary measures which are at present contemplated to awaken the Japanese Government to a due sense of its responsibilities, should it refuse or evade to comply with the reparation now peremptorily demanded, but a persistence in such refusal must necessarily lead to a very different and disastrous situation of affairs. The reparation demanded for the murders and murderous assaults committed upon British subjects was affixed by Her Majesty's Government with a considerate regard for the difficult situation of the Japanese Government, and its political embarrassments. But the penalty imposed and the measure of compensation demanded for the sufferers and their families, now computed in thousands, will, if the Japanese Government continue to be advised, inevitably expand into millions to indemnify the cost of armaments which must be employed by Great Britain should all serious warnings fail to ensure the redress imperatively demanded for these unprovoked and flagrant outrages. Notwithstanding the evil designs of interested counsellors, the intelligent Ministers of the Tycoon are already aware that the sincere desire of Great Britain is to preserve peaceful relations of friendship and commerce with Japan; but it is of vital interest to Japan that the Tycoon's Government should be guided in its councils by the knowledge that Great Britain will not tolerate even a passive defiance of its power, or modified refusal of its just demands.

CHINA.

PEKING.

Dates are to the 24th June, but there is nothing in the shape of news recorded. The Government is believed by some residents in China to be in a most *effete* condition, and the immorality of the people has much increased of late.

An Embassy from the Netherlands proceeds to Peking immediately. The Ambassador is Mr. Vander Hoven, Mr. C. M. de Gries acting as interpreter.

TIEN-TSIN.

Dates are to the 26th June. Mr. Consul Gibson has gone on leave of absence, Mr. Davenport assuming charge in his absence.

SHANGHAI.

The operations of the Anglo-Chinese forces under Major Gordon are thus described in the *Friend of India*:—

"From Major Gordon's head-quarters at or near Quinsan we hear little of a reliable nature. There are other active rebel renegades at Quinsan, it seems, besides General Lee Adong, and more especially one Ching, whose men—not a part of the foreign trained disciplined corps, be it remembered—are spoken of as the finest body of Chinese ever ranged under the Manchou flag. Hardly one of them but stands five feet nine in height—good for a China man. Well, Ching's body, it is reported, grew envious of some laurels carried off by Major Lowden's Company of disciplined rifles, in an attack upon some stockades, and to show their feeling in the matter, planted gingalls, and gave their countrymen a salvo or two. Since that, at Major Gordon's instance, we conclude, Captain Gibbon, occasionally acting as Aide-de-Camp to the Commandant, has been appointed to Ching's staff, and will aid, no doubt, in keeping the spirit of the corps under better restraint in future."

"In the vicinity of Nangking there has been a rebuff to the Taiping arms, and unless Sherard Osborn makes haste he will have little land work to do with his squadron of liberty crushers, for there is some prospect of Nanking being evacuated. To comprehend the position, it is necessary to make a short review of events since the Taiping rebellion made head; and first we should premise of the Chinese as a people, that they are an eminently practical race. As aptly remarked by a writer in "Blackwood" recently—even Chinese Brigands do not live to rob,—they rob to live. Place the chance of their living in effecting robbery in any kind of doubt, and they cease to rob; they will starve rather than endeavour to solve the problem. And thus of the great body of Taiping rebels, or rebels of any denomination over the empire, if the Manchou mandarins, by their venal practices and blood-sucking propensities, had not driven millions to a state of food-lacking, and utter despair of obtaining literary honours and emoluments, we should have had no rebellion in China."

The *Pembroke*, which arrived on July 4th, reports as follows:—The *Pembroke* was at anchor for the night near the straits at the western end of the Inland Sea. She passed a Japanese barque, European built, about 2 p m. in the day. The barque was well armed, full of men, and with no ensign set. The *Pembroke* had her American ensign flying. After the *Pembroke* anchored, and at about 4 o'clock, the barque came down with a fair wind, with the Japanese man-of-war ensign flying. She passed the *Pembroke* and anchored between her and the straits, about a quarter of a mile off. When she was approaching, a gun was fired from a bluff about 4 miles off, and the signal was repeated all along the coast. Nothing occurred in the evening, but, apparently, after dark, the barque warped up and got springs on her cable, for when she opened fire, she was nearer and was broadside to the wind. She commenced firing on the *Pembroke* at a quarter before 1, A.M. It was dark, but she could be seen plainly by the flashes of lightning, which were frequent. After she had fired about a dozen shots, one of which cut away the topmast backstay, and all passed close to the vessel, a brig, recognised as the *Lanrick*, suddenly appeared, coming from windward, passed about forty yards from the *Pembroke*, and dropped anchor close to the barque. Both then fired as rapidly as they could load and discharge, but the *Pembroke*, by that time had got steam up and ran out of fire, escaping to sea through the Bango Channel, a pass seldom used by foreign vessels. The Japanese pilot tried to escape, but was restrained by force. During the attack, a great many lights were visible in motion on shore, and the noise of manning boats distinctly distinguished. When the *Lanrick* passed the *Pembroke*, a terrific yell was raised from both vessels, but they fortunately did not fire, probably not being ready. If they had the steamer would have been destroyed, as she was only 100 or 120 feet off. The *Pembroke's* guns were lashed, and no attempt was made to use them, every person on board being actively engaged in aiding in getting under weigh.

The French Concession has been the scene of some desperate work. Emery Passage, or the Bazaar, a street leading off from the Bund near the Imperial Hotel, contains some neat dwelling-houses, tenanted by the families of various parties connected with H.I.M.'s Customs and other respectable establishments. Into these houses three men of the names of Andrew Bowman, Andrew Johnson, and M'Culloch, otherwise Scottie, saw fit to enter, and take liberties which they had no right to take; the result being a fight in which the men named were stabbed most seriously in various parts of the body. M'Culloch has since

The following notification has been issued:—

"The Consul-General of France deems it his duty to make known to land holders, and all persons residing in the French Concession, that on the representation of the Administrative Municipal Council, and in consideration of the length of time during which the most audacious acts have been committed at night, and the many quarrels among Europeans—

"*The same shall be stopped!*

"1.—The hotels, coffee-houses, billiard-rooms, and other places of public resort, shall be closed at 11.30 P.M.: on no pretext shall there be admission. Punishment for the first infringement of this enactment shall be by a fine of $100 and a closing of the establishment.

"2.—Without a special permit no Chinese may be abroad after 10 o'clock.

"3. All strangers disturbing the peace, in any hotel, coffee-house, billiard-room, or other place of public resort, shall be arrested; and, according to the gravity of the offence, either conveyed to the police-station, or deported beyond the limits of the French concession.

"The Consul-General and Municipal Council hereby call on all the inhabitants of the French Concession to aid them, and to direct their assistants to aid in carrying out the measures determined on.

"(Signed) The Consul-General of France.

"V. MAUBOUSSIN.

"Shanghai, June 23, 1863."

On the land speculations in the settlement, the *Friend* says:—

"Why, it is a fact blazoned we are told by Mr. Chaloner Alabaster (late Interpreter in the British Consulate, and in charge of Land Registry) himself, that he goes home worth £4,000 sterling a year, raised purely and simply by an increase on the rent of land which has fallen into his hands by purchasing out the original native holders, and letting the houses on the land over their heads, to other natives. We do not blame Mr. Alabaster for having taken advantage of his position, and managed matters so judiciously; but we do blame Sir Frederick Bruce, and that most seriously. Directly his Excellency discovered Messrs. Lay and Medhurst's determination to initiate official land dealing, it was his duty to have come down here and see for himself how wise it were to let such things go on. And in how much better a position would Sir Frederick have been in to judge of other political matters in this quarter, had he left the precincts of Prince Kung's palace and endeavoured to trace effects, by actual observation on the spot, rather than trust to the narrow-minded views of those about him!"

The letter of Colonel Sykes to Earl Russell has been published.

In view of the long list of sudden deaths from cholera in the immediate neighbourhood of our office (*Friend of China*) (ten within the last three days) we feel something like putting the pen down and telling our readers to stop a week or two while we have a run to that pleasant spot, Pootoo, or Worshipping Island, for a recreation. Two decades and a quarter have passed since we visited Pootoo, but the remembrance of its beauteous scenery is as fresh as it was twenty years ago; and if ever there was a spot to which Shanghai rich men should devote some of their superfluous wealth, that land has claims, as a sanatarium which no other place in the Far East can show. It was only after our arrival in Shanghai last year that we heard of the frightening ravages of cholera in this quarter;—and only recently have we seen it plainly stated in print that no less than 1,800 Europeans succumbed last year to its baleful effect. It is true, we heard that there was an epidemic of some kind raging; but, how it was, we cannot say, no one would tell the whole truth about it. Even now, although these half a score of deaths in Hongque stare us in the face, we hear the "hacknied" remark,—"Oh, no! 't was not cholera he died of." Whatever the correct term may be, the diagnoses are alike, viz.:—Cramp in stomach, vomiting, purging, &c.,—sensible one hour, almost cheerful,—the next, a stiffened corpse!

The following is he[illegible]sts of deaths by cholera, &c., referred to above:—

"June 28th, off Nankin, murdered by Imperialists, seven European Lorcha men—names not reported.

"28th, of cholera, at Hongque, Mr. Taylor, successor to the late Mr. Downs, Chief Engineer of the clipper steamer *Lyemoon*.

"28th, from prostration, consequent on an attack of cholera on the 2nd, Mr William Stubbs, proprietor of the Waverley Hotel, Hongque.

"29th, of cholera, at the Crown and Anchor Tavern, British settlement, aged 35, William Curran, a native of Ireland.

"29th, of apoplexy, John Swinnels, a soldier of the 31st Regiment.

"29th, at Regan's Sailors' Home, Hongque, of cholera (one hour's duration), the Second Steward.

"29th, at the California House, in Woosung-road, Hongque, of cholera, the Barkeeper, Antonio Peters, a Spaniard, aged 35.

"30th, at the Express Hall, Hongque, of cholera, William Loverey, mariner, a native of Ilfracombe, Somersetshire.

"30th, two men of H.M.'s 31st Regiment.

"30th, one of the Commissariat Corps.

"30th, at the Hospital, after assassination by some foreigners on the 22nd ult., in French Town, Andrew Johnson, a native of Denmark.

"30th, of cholera, in the French Concession, by the Yanking-pang, Thomas Barton, mariner, of Dover, aged 35.

Digitized by Google

"30th, at the Liverpool Arms, Rue du Consulat, of cholera, two English seamen. One of the deceased was tried and acquitted at Hong Kong this year, on a charge of murder and piracy, in the matter of the *Aerolyte*.

"30th, of cholera, at Hongque, Mr. Stanton, for some years U. S. Marshal at this port."

The *North China Herald*, after remarking that a salubrious climate is one of the chief blessings of life, thus proceeds :—"Of all the climates on this sublunary sphere that tax the energies of man, that of China generally has been pronounced the most exhausting, and this of Shanghai in particular one of the most uncomfortable and unhealthy. On this important subject we refer our readers to an instructive and interesting article by Dr. Henderson of the Chinese hospital, from which we give copious extracts in this issue. By residents in Shanghai, much valuable information will be gleaned from these 'notes;' so as to modify or prevent the discomforts accruing from our locality; while climatologists at a distance will acquire fresh data for generalisation. On the general question we would submit, with all due deference, that among the many causes enumerated therein, which modify the climate of China, we do not see that of a vitiated atmosphere throughout the length and breadth of the land, by reason of its multitudinous population. Delabeche and other eminent authorities on sanitary subjects, clearly prove that the health of old towns was materially affected by densely-packed dwellings and mural burial grounds. What applies to a town may refer to an empire. Here in China are some four hundred million pairs of lungs consuming the oxygen, or life-giving principle of the atmosphere; the *rejectamenta* of so many human beings is spread over the surface of the land and poisoning the air; while the remains of a thousand generations occupy at least one-fifth of the habitable ground—adding to the malaria. Living, dying, and dead, man in this region is unceasingly exhausting the vitality of the climate, by extracting the elements of life from air and earth without furnishing their equivalents. China may thus be considered comparatively as a vast graveyard, where death and life march hand in hand over the land promiscuously; the cottages of the husbandman are built among the tombs, while the grain that forms his 'staff of life' is sown and reaped around the remains of his ancestors. Moreover, it may be considered a vast *cloaca*, rendering the air foul by its filthy odours, which aid in generating those plagues which scourge the northern hemisphere. Doubtless when China was a thinly-peopled country in its pristine ages, the climate was purer, the earth more odoriferous, and the heavens brighter, which may have given rise to the celestial ideas of the ancient Chinese, that their 'great flowery land' was a paradise upon earth. If so, these days have certainly passed away; for there is no land on 'the great globe itself' which may more truly be called 'of the earth earthy' than this of modern China. If our reasoning be scientifically correct, the climate is in this manner divested largely of its vitality by the immense population of the country; so that the atmosphere becomes impoverished in supporting the 'lamp of life,' while the nourishing atoms are replaced by gaseous exhalations of a deadly nature from decayed vegetable and animal matter. On the specific question involved, Shanghai and its suburbs present a striking example to the climatologist. From the nature of the soil on this delta of the Yang-tse, it is impossible to bury three feet below the surface of the ground in ordinary places, without flooding the grave with water. Hence the poor inhabitants leave the coffins of their dead above ground exposed to view, while the tombs of the more wealthy are built in little hammocks above ground. The deleterious effect of this mode of interment may be conceived under a scorching summer sun, especially if cholera, dysentery, small-pox, or other scourges are decimating the people, as they did last summer. Happily, this season has set in unusually cool and comparatively free from epidemic disease; and there is every prospect of it continuing so."

HANKOW.

Business is proceeding satisfactorily, and no disturbances by the rebels have taken place. The *Whiteadder* and *Celestial* are loading for London.

NANKING.

The account of the attack on this place by the Imperialists will be found in another column.

NINGPO.

An Englishman, charged with selling arms to the rebels, was tried by a court-martial, consisting of four British officers, presided over by a French colonel. The four officers, it is said, were in favour of his acquittal; but the French colonel held a different opinion, and having ordered the man to be sent to the head-quarters of the Franco-Chinese contingent, he was there taken out at night and shot.

SWATOW.

The *China Mail* says various endeavours to buy land on the new Keaout site, which is leased in perpetuity to the British Crown, have failed. It is to some extent disgraceful that our privileges in China should be waived whenever their enforcement is likely to excite opposition, but the disgrace is probably better than the trouble and ill-feeling that would arise from the use of coercive measures. Sir F. Bruce, at all events, takes this view, and is no longer in favour of settlements, preferring to allow merchants to build at the ports wherever they can get land. Serious consequences may yet arise from such a view of the case. We may draw attention to a letter from Swatow, which appears elsewhere, defending H.M.'s Consul from the imputation of having acted weakly in the matter of selecting, upon the South side of the river, a site for the Consulate, after having been insulted by a mandarin from Canton, who was deputed to arrange for giving him possession of the North or Kealut site.

"SWATOW, 6th July, 1863.

"SIR,—Your issue of the 25th ultimo contains a letter from me, concerning the Swatow land business, and an editorial article thereupon.

"I might recriticise your criticism, but it seems hardly worth while; my main reply to your remarks is, 'Read my former letter again.' I add, however, a few words, which I hope will be my last upon the subject.

"Your earlier informants, it would seem, left you in ignorance of the continued ill-success of the efforts that had been made to obtain Kea-lat. This may incline you not to trust, so implicitly as you appear to have done, in the completeness of their information and the correctness of their views.

"As for the story about Messrs. Bradley and Co.'s extensive territorial possessions at Kah-chio, I can only say that finding no evidence in its favour and strong evidence against it, I disbelieve it, and I recommend you to do so too. Anyhow, it appears that Messrs. B. and Co. have now had much difficulty in getting from the Chinese owners some land for their own new buildings.

"As for the alleged secrecy, you must be aware that it is common enough for official matters to be kept secret for a time, even from persons whom they may concern. For instance, your article of the 11th ultimo concerned Mr. Caine, but I believe you did not give him any previous notice of it. In the case of the site business, however, the secrecy was not so strict as you suppose.

"Sir F. Bruce, I may add, was distinct as to the inexpediency of creating a permanent grievance with the people by obtaining a site by force.

"You will hardly expect me to answer in detail the various questions which you have propounded.

"My former letter might show you that to do this is no part of my plan. There is no reason in the present case from departing from customary reserve. He who first gives a rash judgment, and then asks for information, may expect that his judgment will be refuted, but cannot claim that his questions shall at the same time be answered.—I am, your obedient servant, WM. GREGORY."

HONG KONG.

The mails from London of 26th May arrived on the 4th July. The following are the items of local news:—

A panic had arisen amongst the Chinese initiated by the operations for building the batteries noticed in our last. It appears that an American circulated reports that England and America "make war pidgin," and that Hong Kong would be blown to pieces.

The Hong Kong Choral Society gave a concert in St. Andrew's schoolrooms, in aid of the City Hall Fund; the attendance was good, and the gross proceeds will be handed over for the purpose referred to, the expenses incurred being defrayed from the Choral Society's own funds.

The managers of the Union Chapel have arranged to sell their present building, together with the site on which it stands, and have bought the St. Andrew's school property for $10,000. As double that sum is being received for the chapel and ground pertaining to it, a balance remains in the hands of the managers, which will go some way towards erecting a new building, $10,000 more being wanted in order to carry out designs for a chapel, which have been recently prepared; the structure proposed is a very pretty church with a gothic spire of the mediæval period.

Mr. J. J. Marshall, of Melbourne, writes to the *China Mail*:—

"You will be glad to learn that a Bill has just passed our Lower House of Assembly, abolishing all special restrictions on Chinese immigration, and putting it on the same footing as European. There is very little doubt that the Bill will shortly pass our Upper House, and it is highly probable that the New South Wales Government (Sydney) will follow suit ere long.—Yours faithfully, "J. J. MARSHALL."

On the Lay Osborn scheme the *China Mail* says:—

"The intelligence from England is satisfactory in so far as the affairs of China are concerned,—we mean that there is a prospect of the China question being re-heard. The impetuosity with which 'the Osborn fleet' was gone into, and the note of triumph which the foreign Customs

Digitized by Google

Service sounded in *Blackwood's Magazine* at the beginning of the present year, were both of a nature to arrest attention. The permission given to Captain Osborn to equip a fleet and enlist men for the service of the Chinese Emperor was an exception to the general rule in matters of that sort; and though meeting with no prompt opposition, its exceptional character alone caused it to become the subject of attention and inquiry. The article in *Blackwood* which trumpeted the prospective fame of the expedition and the enlightened and wealthy auspices under which its operations would be conducted, viz., the Chinese Customs, very probably did more harm than good to the Lay-and Osborn scheme. It aroused the suspicion which special pleading usually excites—that the matter had better be looked into. It was accordingly examined, when it readily enough appeared that Mr. Lay entertained the preposterous idea that the maintenance of good relations between China and the West were mainly dependent upon himself. Bruce, at Peking, was not made much of along with other Ministers native and foreign, and all the different interests would revolve smoothly round a central pivot. That pivot was the Chinese Maritime Customs Service. Mr. Lay then, as now, was the first foreign representative of that service, and he had little difficulty in getting its importance recognised. No man who goes to England with £250,000 to buy ships with has much trouble in proving that he is rather an influential personage, or that the service which can disburse such sums for expenditure on ships in England must be a good and respectable service, to which it is a credit to belong. These notions deceived and dazzled quiet people at home, and very little was said or thought about Captain Osborn and Mr. Lay; they seemed to be having it all their own way."

The splendid steamer, the *Fokkein*, has made the passage from Shanghai (Light-ship) to Hong Kong in 62 hours. She missed the Lye-moon entrance, owing to coming in during the night; went round the island, and entered the harbour by Green Island.

The 4th July passed off without the usual profusion of fireworks on the part of the Americans, who formerly celebrated here in a very demonstrative manner their national independence. The occurrence of the day had afforded the local papers an occasion for commenting on the American civil war, which has injuriously affected the trade of the United States with China.

The *Government Gazette* contains an ordinance for the better regulation of the collection of police and lighting rates, and an ordinance for passing the sum of $475,000 for the expenditure of 1864, which is estimated at follows:—

Civil Establishments:	
The Governor	$240.00
Colonial Secretary	6,180.00
Colonial Treasurer	4,616.00
Auditor General	6,722.00
Clerk of Councils	72.00
Surveyor-General	8,762.00
Postmaster-General	15,768.00
Registrar-General	1,290.00
Harbour Master and Emigration Officer ..	7,792.00
Judicial Establishment	6,310.00
Ecclesiastical Establishment	702.00
Educational Establishment	7.894.00
Medical Establishment	13,792.00
Police Magistrate	4,288.00
Police	126,879.00
Gaols	39,691.00
Charitable Allowances	480.00
Transport	1,500.00
Works and Buildings	107,140.90
Roads, Streets, and Bridges	102,950.00
Miscellaneous Services	250.00
Land and Houses Purchased	10,000.00
Special Expenses, &c.	1,500.00
Total	$474,819.00

MACAO.

The coolie trade between China and Peru excited attention. It is charged that the new Consul-General of Peru flying his flag at Macoo has done little but bag fees with another consul for selling coolie contracts. "There was no other trade for them to look after," says a China contemporary, "and the idea of making such appointments, after we know that the victims from the Society Islands were "unprotected" by consular surveillance, simply proves that Peruvian consulates in China are a delusion and a snare on the one hand, and the result of nepotism in the other. We have been told on good authority that the utmost irregularity still prevails with respect to Peruvian emigration at Macao. After the vessels are cleared, numbers of coolies are put on board surreptitiously outside. The vessels are so badly found, that on one occasion the entire number died on the passage except seven, who expired within a week after they were landed."

PHILIPPINES.

MANILA.

The following letter is dated 5th July:—

"People are gradually getting over the panic caused by the great earthquake on the 3rd of last month, and though, owing to the late heavy rain, further portions of the damaged edifices from time to time fall and occasion alarm, yet many families are seen to return to their patched up dwellings in the city. The loss of property is much more considerable than at first was estimated. The Government require thirteen millions of dollars to make good their losses alone, and those of private individuals in the aggregate will amount to about twenty-six millions, making altogether nearly forty millions of dollars! It appears incredible that such a tremendous destruction of property should have been accompanied by the loss of comparatively such a small number of lives as is stated.

"On the afternoon of the 20th one of the ropes with which they were pulling down the ruined towers of Saint Domingo gave way, and broke the leg of a poor Chinaman. On the night of the same day a furious tempest raged in the mountains of Guadaloupe, near Manila. One man and a buffalo were killed by the lightning, and another man was rendered temporarily senseless. On Sunday, the 14th, a great concourse of the faithful were hearing mass in the Church of Malabon, when suddenly some pieces of mortar fell with a great noise. It was immediately believed to be the effects of another earthquake, and all rushed to the doors. In the crush that followed many were severely injured, and one poor boy was trodden to death. I believe I told you before that the duties had been taken off sheet iron and zinc for roofing. This measure has now been extended to copper sheathing, but the latter so introduced can be appropriated to no other purpose but roofing. John Chinaman appears to have been seriously alarmed at the late convulsion, as hundreds of Celestials are soliciting passports to return to the Flowery Land. It was stated that the shock of the 3rd June was perceptible at Hong Kong; but as your paper says nothing about it, I presume it to be a false report. On the 14th ultimo, there was a dreadful storm at Larag (Ilocos Norte); a man and a buffalo were killed by the lightning. Another furious tempest had previously been experienced on the night on the 10th at San Isidoro, in Nueva Ecijah, when an eye-witness says that the atmosphere had the appearance of an immense bonfire, crossed in all directions by a multitude of exhalations. The lightning struck a small house and killed three men who were inside. D. Salvador Gonzales, lieutenant of infantry, has committed suicide at Zamboanga. He was suffering from nostalgia. On the 8th ult., a thunderbolt struck a house in Santa Anna, pulling up one of the wooden pillars; then passed to another house, and entered the room where the family were, to their great alarm, but it passed up a partition, and made its exit through the roof, part of which it carried away. On the 30th of May, ult., at 4.30 P.M, an earthquake was felt all over Mindanao, of such intense violence as the oldest inhabitant there never before experienced.

"Life pensions have been granted, by the Spanish Government, to the Datto Amiral and his son, the Sultan of Mindanao; $1,000 to the former, and $800 to the latter, conditionally, on their future good conduct."

JAVA.

The Governor-General had returned from his tour of inspection.

The expedition to Nias, which left Padang on the 23rd of May returned to that place on the 26th of June. The result is, that the fortified post Orabili was taken by assault and destroyed, which produced so much dismay in the natives, that they made no attempt to defend Leulowau, from which the small expedition was repulsed last year, but abandoned it, and it was also destroyed. The loss of the Dutch consisted of five killed and twenty-one wounded, amongst whom was Lieutenant Sonnenberg, wounded in the back of the head.

MALACCA STRAITS.

SINGAPORE.

The introduction of a system of registration as an index to the number and character of a migratory population was strongly advocated.

The Chinese war steamer *China*, Captain Osborn, from Cape of Good Hope, May 27th, arrived July 14th. The *Straits Times* says:—"The appearance of this vessel in our harbour may not unnaturally give rise to serious reflection on what is likely to be the future of our relations with China, and how the present course adopted by our Government may effect it."

The British steamer *Fokeim*, Captain Walker, from Glasgow, April 2, arrived July 20. Three murders had been committed and the perpetrators of them found guilty and sentenced to the extreme penalty of the law. A new yacht of about thirty-five tons had been launched from the building yard of G. Lyons and Co., at Sandy Point. She is intended to enable the Bishop of Sulman to cruise on the coasts of Borneo. There had been an unusual number of deaths amongst the European community, not attributable, however, to any epidemic. A number of American ships are offered for sale consequent on the state of affairs in America, and some had been purchased by Chinamen at the port.

H. I. M. steamer *European*, Captain Gisquere, from Saigon, having on board the Anamese Ambassadors to the Imperial Court of France, arrived on July 8.

The Siamese steamer *Chow Phya* arrived from Bankok July 17.

A Court of Inquiry was being held to investigate the loss of the barque *Lucy*, of Liverpool, at the Andaman Islands on her passage from Calcutta to Shanghai.

The much-discussed attack on Tringanu, which recently engaged attention in the House of Commons, is commented on by the *Straits Times*, which terms it a "most miserable affair." "It certainly must be a matter of regret," says the *Straits Times*, "with all that our demonstration should have been so unsuccesful while it proved fatal to some lives, and detrimental to a considerable amount of property. It would be hard to insist, however, that success is necessary to justify a public act of this sort. If the circumstances are as they have been reported by Government, and as they are related above, the attack upon Tringanu will be easily and satisfactorily explained; but if the circumstances should turn out materially to differ from what we have stated, then we must have been deceived and are not prepared to answer for the opinion which the Legislature at Home may pronounce. The important points for our Government to establish, are,—first, that foreign aid actually was being afforded by the Sultan of Linga, through Tringanu, to one of the combatants in Pahang; second, that, having referred the matter to Siam, the letters intercepted were sufficiently plain to indicate a want of good faith and to justify our direct interference; and, lastly, that the Sultan of Tringanu actually did threaten to oppose our forcible seizure of the ex-Sultan of Linga, when Colonel Macpherson proposed to do so, and thus assumed the responsibility of his detention. Should these be satisfactorily established, as we are told they can be, then we cannot see any ground for censuring these proceedings at Tringanu."

There is no doubt (says a correspondent of the *Straits Times*) that the return of the ex-Sultan of Linga to Tringanu caused a certain alarm in some quarters, though it has never been shown why he should assist Wan Ahmet against the person with whom he has been living for upwards of three years; but to make the apathetic, sickly, and banished chief into a "formidable and intriguing foe," he is accused of supplying Wan Ahmet with muskets and powder and men, whilst the Rajah of Tringanu and the King of Siam come in for no small share of abuse for affording their countenance, the latter especially, having sent the ex Sultan in a special steamer to Tringanu under H.M.'s auspices.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Bowman—On the 16th inst., at Walton-on-Thames, the wife of James Bowman, Esq., of a son, stillborn.

Connolly—On the 22nd inst., at Clunagh House, King's County, Ireland, the wife of Andrew Connolly, Esq., J P., late of China, prematurely, of a son, stillborn.

Cartwright—On the 26th inst., at The Field, Stroud, Gloucestershire, the wife of Henry D. Cartwright, Esq., late of China, of a son, stillborn.

Dawson—On the 14th inst., at Hatherton Hall, Staffordshire, the wife of Capt. R. Pudsey Dawson, of a son.

MacAndrew—On the 19th, at Midmills House, Inverness, Mrs. H. C. MacAndrew, of a daughter.

McNair—On the 15th July, at Singapore, the wife of Captain McNair, Royal Artillery, of a daughter.

Noble—On the 8th July, at Hong Kong, the wife of Henry Noble, Esq, Manager Agra and United Service Bank, of a daughter.

Robinson—On the 14th June, at Hong Kong, the wife of Assistant Commissary-General Henry Robinson, C.B., of a son.

Turner—On the 4th July, at Canton, the wife of the Rev. F. S. Turner, of the London Mission, of a daughter.

Wills—On the 6th June, at Shanghai, the wife of J. H. Wills, master of the ship Kingsan, of a son.

MARRIAGES.

Rogerson—Barrass.—On the 18th inst., at Long Benton, by the Rev. Dr. J. Besley, D.C.L., John Rogerson, Esq., merchant, Newcastle-on-Tyne, to Sarah, eldest daughter of Mathew Barrass, Esq., of Killingworth. No cards.

DEATHS.

Agar—On the 10th inst., at Georgiana House, Cheltenham, Margaret, the wife of Sir Felix Agar.

Arnold.—At Shanghai, on June 4th, Robert Arnold, of the Imperial Maritime Customs.

Bowman—On the 19th inst., Elizabeth Anne, the wife of James Bowman, Esq., of Orchard House, Walton-on-Thames.

Curran.—At Shanghai, on June 29th, William Curran, a native of Ireland.

Low.—On December 31st, 1862, on board the *Berwickshire*, on the passage from Whampoa to London, Alexander Low.

Martin.—At Sandy Point, Singapore, in July, Mr. Alexander Martin, ship carpenter, aged 35 years, after an illness of a few hours.

Peters.—At Shanghai, on June 29th, Antonio Peters, a Spaniard.

Schumann.—In the harbour of Singapore, on board the Hamb. barque *Philip the 1st*, Mr. Edward Schumann, aged 21 years.

Stubbs.—At Shanghai, on June 26th, William Stubbs, proprietor of the Waverley Hotel.

Smith.—At Shanghai, on June 18th, John B. Smith, of the Shanghai Pilot Company, a native of Aberdeen, aged 30.

Smith.—At Singapore, on July 17th, Mr. Henry Smith, jun., of Auburn Dale, U.S., Am., aged 25 years.

Thomson.—At Singapore, on July 7th, Anne Beck, wife of Mr. W. Thomson, watchmaker.

Taylor.—At Shanghai, on June 28th, John Taylor, late chief engineer of the steamer *Lye-ee-moon*.

Wrentmore.—At Shanghai, on June 24th, George Joseph Wrentmore, Deputy-Assistant Commissary-General.

Wilson.—At the Victoria Gaol, Hong Kong, on July 27th, Charles Wilson, prisoner.

COMMERCIAL REPORT.

CHINA EXPORTS.

Tea.—Macao.—Tyshans prepared in Kysow style, sales 1,100 half-chests Congou, and 1,000 boxes Souchong at 19.5 taels, leaving some 500 half-chests on the market. The stock of old Teas last reported, 1,500 half-chests, have been taken for Straits and India at 15 taels.

Canton.—Within the last ten days fifteen chops of New Congous have arrived—say 4 Oopacks, Chongsowkies, and four Lylings. It now appears tolerably certain that the quantity of the first crop Congous on the way to Canton this season will be much smaller than expected, and will exhibit a sensible falling off in supply. Congous of the second crop are looked for in the beginning of August. The quality of the new crop, judging from these fifteen chops which have arrived, is satisfactory. In appearance they are fully as good as last season's, and in the cup they are rather better. The demand of the teamen, influenced by the prices at which the market opened at Hankow, are several taels higher than the rates which were ruling last season. They report offers of from 34 taels for Lylings up to 43 taels for Oopacks. Freights are lower than they were last year, but exchange is much higher, which much more than counteracts the advantage. No settlements have yet occurred, but that the market will open very high there can hardly be a doubt. Tyshan Congous are rather lower. In Canton teas a moderate business has been done. Scented Capers are a little easier. Scented Orange Pekoes and Canton Gunpowders are unaltered. The transactions of the fortnight are reported as under:—Congous, country teas, none. Tyshans 1,000 boxes, good to fine at 26 to 30 taels, do. Canton packed 2,000 half-chests common at 14 to 16 taels. Scented Teas: 9,000 boxes Caper at 20 to 22 taels for fair, 13 to 27 taels for middling to good, and 29 to 31½ taels for fine to finest. 10,000 boxes Orange Pekoe at 23 to 24 taels fair, 26 to 28 taels for middling to good, 32 to 37 taels for fine to finest. Oolong: 8,000 half-chests old, common to middling at 15½ to 18 taels (for New York). Canton Gunpowder, 6,000 boxes at 15 to 17 taels for old common to fair, and 22 to 27 taels for new fair to good. Stocks are thus estimated: New Congous, 15 chops, as above. Old none. Tyshaans, 3,000 half-chests. Scented Orange Pekoe 15,000 boxes.

Shanghai.—Black: Arrivals during the whole of the fortnight have come forward freely both from Hankow and Kiu-kiang, but the demand on this market has continued small, and the bulk of teas offered falling to realise prices that would cover cost have been re-shipped on owner's account. Three chops of Ningchow have been taken at 35 to 38½ tls; the quality of the tea from this district is unusually fine, and prices are more reasonable than for Oopacks and Oonahms. One chop of Hohow has been settled at 33 tls. In leaf and liquor these teas are fully equal to last year's crop. The remainder of the settlements reported below are made up of Oonahms and Oopacks, at prices ranging from 37 to 41½ tls. The stock of fine tea is now very much reduced, and amongst the recent arrivals there have been some chops of very common and mixed teas. Prices have ruled unevenly, but no decline is quoted; the bulk of the settlements has been made on better terms than in Hankow, and at present this is the cheapest market. The settlements on the market for the fortnight are reported at 9,000 chests New Congou, the amount bought up the river and shipped forward during the same period being 30,500 ditto. There remain for sale upon the market 8,500 chests, the quantity awaiting reshipment being 6,000 chests. The quotations are as follows:—Oopacks, good to finest, 37 to 43½ taels; Oonahms, finest 35 to 41 taels; Ningchows, 35 to 39½ taels; Hohows, 33 taels. Green: Without further accessions to stocks, this market has continued very quiet. A good demand for country teas still exists at prices equal to last quotations. Advices from the Pingsuey district report great competition for the leaf, and prices were rapidly advancing, foreigners paying rates fully 30 per cent. over last year's; arrivals of the new crop are expected in about six weeks, the bulk of the teas will again be packed in Ningpo, and not in the country as formerly. The settlements and reshipments of the fortnight amount to 700 half-chests, Fychow, 500 do Pingsuey, and 1,100 half do Japan. The stock on the market is estimated at 3,000 half chests Fychow, and 3,000 do Japan (Shanghai packed). Quotations are as follows:—Young Hyson — Foochow and Moyune — Cargo, Tls., 20 to 27; Superior, Tls. 28 to 33; Fine, Tls, 34 to 41, finest nominal, taels 42 to 45 per picul. Pingsuey—Cargo, taels 23 to 28, superior, taels 29 to 34, fine, taels 35 to 40. Hyson—Fychow and Moyune—Cargo, taels 29 to 34, superior, taels 35 to 40, fine, taels 41 to 50, finest, none. Pingsuey—Cargo, taels 20 to 23, superior, taels 33 to 36, per picul. Twankay—Fychow and Moyune—Cargo, taels 15 to 19, superior, taels 20 to 22, fine, taels 23 to 24, finest, taels 25 to 27 per picul. Pingsuey—Cargo, taels 19 to 20, superior, taels 21 to 22, fine, taels 23 to 25 per picul. Gunpowders—Fychow and Moyune—Cargo, taels 29 to 23, superior, taels, 34 to 37, fine, taels 40 to 50 finest, taels 52 to 55. Pingsuey—Cargo, taels 30 to 34, superior, taels 35 to 38, fine, taels 39 to 46, finest, taels 47 to 50 per picul.

Foo-chow-Foo.—Large supplies of Congou of the medium kinds have arrived during the fortnight, and these have been eagerly picked up for shipment to Australia. Consequently, although the teamen are willing sellers, prices for all descriptions of Congou have remained steady. Souchongs and Oolongs have found buyers to a fair extent at rather easier rates. Flowery Pekoes are scarce, but are not inquired for. In Scented Tea a considerable business has been done at full rates. The settlements of the fortnight are reported as under:—Congou, 25,000 chests and 35,000 half-chests, siftings to good common at 7 to 17 taels, course and flavory kinds 18 to 26 taels. Medium and fine 27 to 36 taels. Souchong, 9,000 chests and 2,700 half-chests at twenty-six to forty-five taels. Flowery Pekoe, a hundred and seventy chests at 30 to 64 taels. Oolong, 6,500 half-chests, and 240 boxes at 16 to 25 taels. Scented Tea, 10,000 boxes at 25 to 27 taels for medium to good up to 37 taels for the finest. The stock on the market is estimated at 22,500 chests Congou, 13,000 chests Souchong, 25,000 half-chests Oolong, 600 chests Flowery Pekoe, and 3,600 boxes Scented Teas. The supplies this season amount to 228,000 chests Congous, and 42,000 hf. chests Oolongs, against 208,000 chests of the former, and 58,000 half-chests of the latter, same period last season.

Amoy.—Congou: The average quality of the crop has appeared better as further supplies have arrived, the middling flavory kinds being in much larger supply, and more free from spurious leaf than usual, though the finest parcels do not compare favourably with those of last year. Congous are now being prepared in a neighbouring district, from which before only Oolongs had been brought, and the production is likely to be much extended. Immediately after last report increased competition among buyers, and the eagerness of the latter

Digitized by Google

to secure parcels at once on arrival, advanced prices fully $4 to $6 on opening rates. The demand has been comparatively quiet during the past ten days; but as fresh supplies have come to hand in small quantities, the teamen have continued firm, and prices have not yet materially receded. The settlements during the month are reported about 14,000 half-chests at $21 to $32.50. The unsold stock is uncertain, but estimated at 1,500 to 2,000 half-chests. Plain Orange Pekoe: Supplies this season are very short, but at the same time of inferior quality. The description has attracted but little notice. Settlements, 700 half chests at $14 to $19, and 950 boxes at $19.25 to $21. Unsold stock, 2,400 half-chests. Plain Caper.—Only a small portion of a parcel has arrived, and it is reported scarcely any will be prepared this season. Oolong.—Only a few parcels are to hand from Ning Yong, arrivals to date being chiefly mixed Teas from the nearer districts. Not much can be said yet in regard to the general quality of the crop, which, however, is likely to be short and of inferior quality, the Teas to hand being much mixed with dust. Total arrivals are about 5,000 half-chests, of which 1,200 are under contract. Settlements are reported 2,100 half-chests fair to good cargo quality at $24 to $26, and a parcel of 270 boxes fine at $42, all taken for shipment to England. Unsold stock about 1,700 half-chests.

HANKOW.—No decline in prices can be quoted on the opening rates. The first crop is now nearly all to hand, and settlements to date amount to 160 chops including contracts; stock is estimated at 22 chops. The second crop will be down shortly, and promises to be very abundant. From Kewkiang advices reach to the 28th, the stock of Green tea is quoted exhausted. The new chop Black teas from Ningchow and Hohow are coming forward very slowly, and only two chops are reported as settled—a Hohow at Tls. 26, and an Oopack at Tls. 32.80.

KEWKIANG.—Black: 23 chops new Hohow and Ningchows had arrived to date, but as 16 chops were contract there remained but 7 chops on the market. Four of these latter had already been disposed of, at the following rates:—Ningchow (Pekoe flavour), 30.25 to 31.5 tls.; Kaisow, 25.5 tls.; small leaf Moning 37.5 tls. Green: The old stock having fallen to about 700 pkgs., and the new teas not being expected until the end of August, there was no business doing. The present crop is reported as smaller than last year's, and may be expected to be more uniform in its character. This will result from the old teas being well cleared out, so that but little has been left to mix with the incoming crop. The exports to date have been 14,200 chests black, and 5,000 half-chests green, against 7,600 chests of the former, and 8,200 half-chests green, corresponding period last season.

YOKOHAMA.—Supplies were as yet small; the crop seemed to be abundant, but the quality was reported inferior to the produce of last season. The quotations are:—Common, $8 to $15 per picul; medium, $16 to $20; fine, $24 to $27.

RAW SILK.—SHANGHAI.—For some time after the departure of last mail the dealers remained firm, but as there was little inclination to do business on the part of buyers, they had gradually to give way in their ideas, and the market was opened at taels 455, 435, and 415 per picul respectively for Nos. 1, 2, and 3, Tsatlee, and taels 390 and 370 for 1 and 2 Kalings. At these prices, however, only a few settlements took place, when the receipt of news from Japan of a most warlike nature created more firmness again; and though foreigners have not felt disposed to pay higher prices, fully taels 10 to 15 per picul advance is now asked, and in some instances been given. Later dates from Japan just announced reporting at the last moment a more favourable turn in matters will no doubt bring about a reaction. The second crop is reported to be progressing favourably, and the result is now expected to be better than it did at the departure of last mail, but still considerably short of the first estimates, and prices in the interior continue to rule very high. The settlements to date are estimated at 4,500 bales, of which 2,000 bales are Old Japans. Present quotations asked by silkmen are as follows:—Tsatlee No. 1, Tls. 445 to 470; No. 2, 435 to 450; No. 3, 415 to 430; No. 4, and inferior, 360 to 433. Taysaan No. 1 and 2, Tls. 370 to 390; No. 3, 335 to 350; No. 4, and inferior, 300 to 330.

MACAO.—The second crop of the season proved to be no better than the first, and the whole have been taken for India at about $360 for inferior Cumchoock and Kowkong; the third crop is expected down shortly, and pronounced to be better in quality and yield.

CANTON.—The yield of the third crop is coming to market, but no transactions are reported. The nominal quotations are—Loonking, No. 1, $410, No. 2, $395. Gowkong, No. 3, $365 to 375, Cumchook, rereeled, $460.

YOKOHAMA.—A few musters Hatchogoe in hanks had come to market, for which the extreme rate of $520 was demanded. The yield of the new crop was reported as deficient in fine silk as compared with last season's yield.

DRUGS, &c.—Macao.—Cassia Lignea: Sales, 3,000 piculs at $14.75 to $15, stock remaining 300 piculs held at $15. Cassia Buds: None offering. Cassia Oil: No sales, nominal $193, stock, 30 piculs. Aniseed Oil: Sales, 50 piculs at $133 to 135, stock, 90 piculs. Star Aniseed: Sales, 20 piculs at $24.80, stock, 20 piculs. Gallangal Root: Sales, 100 piculs at $3, stock, 250 piculs. Gall Nuts: None offering. Ginger Preserves: $3 for best. Vermilion: $36. Camphor.—Hong Kong.—Of the last heavy supplies from Formosa (nearly 3,000 piculs), 500 piculs are reported, sold at $22 per picul packed, and 500 piculs at $20 per picul packed. There remains on hand about 2,000 piculs for which lower rates will probably have to be accepted.

RAW COTTON.—CANTON.—There has been no change either in rates or in the tone of the market since last mail. There is a demand for Shanghai staple, and sales are reported of 1,500 bales at current rates. The quotations are—Bombay, 15 to 17 tls.; Madras, 16 to 17 tls.; Bengal, 14½ to 16 tls.; Shanghai and Ningpo, 15½ to 16½ tls. The stock is reduced to 3,500 bales Shanghai, and 300 ditto Bombay. HONG KONG.—There has been an active demand throughout the fortnight, the sales during that period amounting to 1,950 bales Shanghai, at $22½ to 23½; 2,350 bales Ningpo, at $23 to 24¾; and 440 bales Japan, at $25½ to 26. The closing quotations are—Bengal and Bombay (none at market), $19 to 24; Shanghai, $23½ to 24; Ningpo, $24½ to 25; and Japan, $26 to 26¼; the tendency being upwards and the stock small.

SHANGHAI.—The demand is good, but stocks are very small; in fact, are exhausted. During the fortnight about 3,500 pls. have been shipped to Liverpool, and about 4,000 pls. to Hong Kong. The few parcels that have changed have been taken eagerly at 13*t* for common up to 13½ *t* for pretty good. The next crop is expected at market in September; the yield will doubtless be partially adapted to the increased demand and to the enhanced value.

CHINA IMPORTS.

(The Overland Trade Report.)

TIEN-TSIN.—Holders of cotton goods hold out for higher prices, and as dealers refuse to come to terms a small business has resulted. Woollens in limited request, and not likely to improve until the winter. Business generally very dull, although this should be the busiest time of the year.

YOKOHAMA.—Camlets are in demand at $21 to $22 for blue and scarlett SS. In other piece goods no business is doing, and metals are neglected.

KEW-KIANG.—No demand for imports.

HANKOW.—For piece goods there has been considerable inquiry. Sales in grey shirtings have been made at advance of 6 caadareens per piece for 8¼ to 8½ lbs. American drills are dearer, as also grey T-Cloths. Fancy goods and woollens are dull. For camlets, an increase may be noted of 5 mace per piece.

CHEEFOO, 24th June.—The demand for cotton goods at the rates asked by holders is very slack. The only transaction reported is the sale of a small lot of grey shirtings at 2t 8m.

SHANGHAI.—The improvement noticed in last report has been maintained, and on some descriptions an advance of from half a mace to a mace has taken place. The dealers at current rates are unwilling buyers, and purchase only from hand to mouth. Still, stocks being low, and holders firm, the tendency is upwards. Grey shirtings are only in limited request. White shirtings are scarce, and wanted for shipment North. T-Cloths are in good demand. Dyed cottons are dull. Velvets, both black and blue, are in request. Chintzes and white spots are seldom inquired for. Woollens generally are duller than last represented, especially camlets.

FOO-CHOW-FOO.—A slight advance has been paid for T-Cloths which have been inquired for, but other descriptions are unchanged, and business done has been small. The following are the sales reported for the fortnight. 5,500 pieces T-Cloths 7lbs. at $2.85 to $3. 1,000 pieces do. 8lbs. 36-inch at $3.70, 500 pieces White Spots at $4.10. 660 pieces T. R. Cambries at $3.80. 6,000 piculs Shantung Peas at $3.35.

AMOY.—Cotton yarn: Sales are reported of 120 bales at $60 to $60.50. Stock 930 bales. Grey Shirtings: Sales of 1,800 pieces are reported, 6¼ catty at $3.75, and quotations are given, 6¼ catty $3.80, 7 catty, $4.25. Stock 3,400 pieces. T-Cloths: No sales reported, quotations nominal for 4¼ catty $2.25, for 5¼ catty $2.60, 6 catty $3.15; stock 5,330 pieces. White Shirting: No sales, and no stock on market. Quotations are nominal as follows:—54 reed, $3.90; 64 reed, $4.60; 70 reed, $5.40. Turkey Red Cloths: 300 pieces have been sold at $347, stock 2,150 pieces. American Drills: No sales; stock 400 pieces. Woollens: Long Ells, no sales, stock 100 pieces. Spanish Stripes: no sales; stock 270 pieces. Metals: Lead, small sales are reported at $7.70 to $7.75; stock about 1,340 pigs. Tin, Banca: None sold, and no stock in foreign hands. Quicksilver is quoted $72 nominal, no stock. Straits, China, and Japan Produce.—The market continues dull, further large arrivals having overstocked the market. Sandalwood, Old $9.00; New, $4.40. Sapanwood, Siam, $2.10 to $2.60; Manila, 55 to 75 cents. Pepper, White, $10.50; Black, $7. Rattans, $3.20 to $4. Beancake, $1.55 to $1.60. Oilcake, $1.59. Oil, Japan, $6; Pea, $7 to $7.20; Formosa, $7.40. Alum, $1.80 to $2.20. Peas—Green, $1.95 to $2; Yellow, $1.90 to $1.95. Rice, Formosa, $2.20 to $2.25; Manila, and Siam, $2.05 to $2.35 per picul.

CANTON.—There seems to be more disposition to purchase cotton manufactures, but the firmness of holders checks operations. Yarn is in good demand; low numbers have advanced $1, medium numbers $3, whilst high numbers are scarce and much wanted. Grey Shirtings: Heavy goons are in demand, light being neglected. White Shirtings are not inquired for. Fancy goods are slow of sale without alteration in rates. Long Ells are difficult to move, the sales reported being in barter. Lastings are dull, as are all woollens. Iron in fair request. Lead dull and difficult of sale.

HONG KONG.—Dealers seem disposed to buy sparingly of Cotton goods, but holders are indifferent about selling. Woollens are difficult of sale. Yarn: Transactions have been confined to low numbers, the medium numbers are wanted but held for an advance; the stock of high numbers is exhausted. Grey Shirtings—light goods scarce and held for an advance—the transactions reported occurred in medium and heavy White Shirtings in small stocks and firmly held. T-Cloths have been in good demand and have advanced. Fancy Goods in no inquiry. Woollen goods are dull of sale. Iron and Lead in large stock and limited request. Rattans and Black Pepper in fair request.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 5d. to 6s. 6½d.	Cs. 5½d. to Cs. 7d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None.

At SHANGHAI.—June 20, Osborne, from Cardiff, Golden Fleece, from London; 21, Keepsake, from Sunderland; 23, Jubilee, from London; 25, Thomas Dryden, from Shields; 26, Beemah, from London; 28, Solent, from London; 29, Jane Leech, from Cardiff, Fingal, from London; 30, Garrawalt, from London.

At HONG KONG.—June 28, Patna, from Liverpool, Queen of the Ocean, from Sunderland; 29, Fair Wind, from Shields; July 3, Canadian, from London.

At MANILA.—May 24, Nuevo Lanten, from London; 25, M. S. Vicenta, from Liverpool, Frederick and Java, from Cardiff; 29, Volta, from Havre; June 23, Pelicano, from Cardiff.

At BANKOK.—June 26, Swedish barque, Elida, from Liverpool.

At SAIGON.—Cristoph Colombe, Elvile, Sansonnet, from France.

At SINGAPORE.—July 7, John Land, from Sunderland; 10, Benares, from London, Boreas, from Cardiff, Celeritas, from Amsterdam; 11, Daylight, from Londo; 14, Steamer Tokien, from Glasgow, China steamer, from Cape of Good Hope; 15, Earl of Shaftesbury, from Liverpool.

DEPARTURES.

From JAPAN.—None.

From SHANGHAI.—June 22, Chan-sze, Glenaros, and Silver Eagle; 27, Guinevere, all for London; 29, West Derby and Empress of India, for Liverpool; 30, Raphael, for Falmouth, for orders; July 2, Seawfell, for London.

From FOO-CHOW.—June 20, City of Aberdeen; 24, Star of China; 28, Chanticleer, all for London.

From AMOY.—None.

From HONG KONG.—July 2, Jura, for Liverpool.

From CANTON.—June 25, Kelso, for London; 7, Banian, for London; 19, Valdivia, for London.

From MANILA.—For Liverpool: June 1, Flora; July 1, Maritana. For London. June 8, John Banks; 10, Governor-General; 12, Shrudvang; 16, Duiveland; 19, Carribean. For Falmouth: 18, Hermelin. For New York: June 2, Nabob.

From SAIGON.—For Mauritius: Cristoph Colombe.

From BANGKOK.—None.

From SINGAPORE.—For London: July 11, Dewa Gungadhur. For Falmouth: 10, Carl and Aguste; 13, Panic. For Bordeaux: 11, Chene. For Suez: French steamer Donnai.

LOADING.

At YOKOHAMA, JAPAN.—For London: Prudhoe and Medina.

At HANKOW.—For London: Celestial and White Adder.

At SHANGHAI.—For London: Alfred Hawley, Assyrian, Gabalva, George Avery, Kennington, Merchantman, Parliament, Sir W. F. Williams, Whinfell, Lorton, Carn Tual, Hanover, J. C. Munro, Ocean Mail, Procymatia, Spray of the Ocean, Aerolite, Kestrel, and Virgil. For Liverpool: Onangondy and Grenadier. For New York: Burgermeister, Duckwitz.

Vidal, from Hamburg for Hong Kong; Clarendon, from London to Shanghai. 2, Canton, from Cardiff for Shanghai; Gleaner, from Liverpool for Hong Kong. 3, Napoleon III., from Toulon for Saigon; Belle, from Sunderland for Shanghai; Siam, from Newcastle. 5, Regna de los Angelos, from Cadiz for Manila; Alida, from Hamburg for Shanghai; Scotland, from Hamburg for Singapore. 6, Alma, from Hamburg for Singapore; Spes, from Liverpool for Shanghai. 9, Bongainville, from Bordeaux for Batavia. From UNITED STATES for CHINA, &c.—June 30, Anita, from New York for Hong Kong; Magnet, from New York for Shanghai. 3, Canton, from New Bedford; E. F. Willets, from New York for Shanghai. From CHINA, &c., to ENGLAND and CONTINENT.—July 1, Tricolour, from Manila for Liverpool; Areta, from Manila for Liverpool. 2, Abeona, from Whampoa for Liverpool. 3, John Matthe, from Sourabaya for Rotterdam. From CHINA to UNITED STATES.—None.

FREIGHTS AND CHARTERS.

SHANGHAI.

The amount of tonnage in the harbour being large, and scarcely anything offering but Tea freights are somewhat low, varying from £3. 10s. to £4. 10s. for first class clipper vessels. The stock of cotton is nearly exhausted. For New York one small neutral vessel has left, and another taken up at $18 gold. To Hong Kong, the rates are 40 cents per picul; to Foochow, $4 per ton; and to Nagasaki, the same to Yokohama, $5; to Hankow, 6 taels per ton; and 5 mace per picul, to Tien tsin (Taku Forts) 6 cents 7 taels per ton.

HONG KONG.

Small vessels more readily find employment for coast, at improved rates, but for other ports there is no improvement, and the stock of cotton is barely sufficient to finish the loading of the vessels now on the berth. The rates at Whampoa for favourite clippers is £4, but other vessels would hardly obtain this figure. The following are some of the settlements:—Citadelle (Hamb. brig), 180, to Ningpo with original cargo, 25 c. extra; Chanticleer (British steamer) $9,500 per month for 5 months, steamer finding coals. Canton (Danish barque) 234 tons to Ningpo at 35 c. Claramont British ship (634 tons) to load at Manila for Sydney, £3. 10s. per ton. Carl and Johanna, Ham. brig (160 tons) to Ningpo at 45 cents per bag. Rice, Carrington, Am. ship (583 tons) to Shanghai at 32 cents per picul. Don Pedro, 11 Am. barque (250 tons) to Ningpo, 40 cents per picul, $4 per ton measurement. Frederick, Danish brig (226 tons) to Ningpo at 40 cents per picul, up to Shanghai, 45 cents Fruiterer, Am. barque (233 tons) to Shanghai $2,100, in full 25 lay days.

MANILA.

At Manila a decline in the rates has taken place especially for sugar, the rate being for unclayed £3. 7s. 6d.; one other vessel only has been laid on; for Liverpool several American vessels (chartered in Hong Kong) are loading for the United States.

SINGAPORE.

The following are the current rates:—Tin, £3. 5s. per 20 cwt.; sago in boxes, £4; sago flour, £4; gambier in bales, £3. 5s.; sugar, £4; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt. Measured goods, £4. 10s. per 50 cubic feet,

CASUALTIES.

SHANGHAI.

The barque Macao, from Manila to this port, with a cargo of rice, sugar and sapanwood, was wrecked within a mile of the Light ship on the 30th June. The ship and cargo were sold as they lay, and were knocked down by Messrs. Bryne and Co. for the nominal sum of one tael each.

H.M. gunboat Weazel, from Hong Kong, arrived safe at Woosung on the 20th June, after a passage of fifty days, disabled by the boilers being completely worn out, and short of provisions.

HONG KONG.

The Constance reports having left Macao bound to Amoy on the 26th June. Experienced a very heavy gale off the Nine Islands, and was within ten fathoms of them. Dropped anchor, but still the ship dragged, and parted the chain, the ship laying on her beam ends; lost the fore topmast in the gale, and cut away the main-mast to save the vessel from going on shore. The weather moderating, stood for Hong Kong.

BATAVIA.

In the Macassar newspaper of the 29th May we find the following account of the loss of the British barque Frankfort Old, of Liverpool, Captain Hicks. This vessel left Cardiff on the 29th October last for Shanghai, with a cargo of coals, and was totally lost on the 19th Feb. near Kalatua and Bonerate (S.E. from Salayer).

COMMERCIAL POSTSCRIPT.

CITY, FRIDAY AFTERNOON.

SILK.—There has been more business during the past fortnight. Importers have shown some disposition to meet the market. Japan silk has attracted most attention, the prices now ruling being comparatively very moderate. In China silk some of the first arrivals of new silk have been sold. Tsatlees have realised 1s. 6d. below the opening prices of last year, while Taysaams, on the contrary, have fetched even higher rates than last season. Deliveries, 1st and 25th inclusive—China, 2,890; Japan, 1,406: total, 4,296.

The circular of Sam. Mendel quotes Grey Shirtings 39-inch, weight, 7 lbs., Count, 14 by 12, 15s. 6d.; 8 lbs, Count, 17 by 17, 19s. 6d.; 9 lbs., Count, 17 by 17, 20s. Cotton Yarn, 16 by 24, 2s. 3½d.; best 2s. 5½d.

ARRIVALS NOT INCLUDED IN THE TABLE.—August 22, at Brouwershaven, Banjoewangie, Burgemeister Hoffman; 25, at Falmouth, from Akyab, Carl-Sjofroken; 20, at Cronstadt from Foo-Chow-Foo, Kamtschatka; 26, at Falmouth from Rangoon, Toivo, at Rotterdam from Batavia, Eva Johanna; 25, at Queenstown from Rangoon, Mary Hammond; 27, at Falmouth from Manila Voladora from Akyab Equator.

DEPARTURES.—August 21, from Newport for Shanghai, Idas; 20, from Cardiff for Singapore, Alardus; 21, for Shanghai, Theodore and Lulu; for Hong Kong, Fidelio; for Singapore, Florence Adelaide; 24, from Cardiff for Shanghai, President Harbitz; 27, from London for Cardiff and Hong Kong, A. H. Wille; 28, from Liverpool for Manila, J. A. U., from Glasgow for Singapore and Penang, Scotland, for Hong Kong and Canton, Lotus. Laid on at Liverpool for Singapore, Chanaral, at Glasgow for Batavia and Singapore, Princess of Wales.

SPOKEN.—Jacobus Martinus, Sunderland to Singapore, July 14, 11 N., 25 W.; Peking, Newcastle to Java, July 18, 16 N., 26 W.; Primere (?), Brem. barq., Singapore to Falmouth, May 25, 33 S., 32 E.; Samuel Russell, New York to Hong Kong, July 5, 54 N., 20 W.; Rifleman, London to Hong Kong, July 17, 14 N., 25 W.; Bildeydyk, Dutch ship, Rotterdam to Batavia, July 8, 30 N., 22 W.; A barque, No 9026, London to Singapore, August 11, 39 N., 15 W.; John L. Dimmock, ship, Sunderland to Shanghai, July 2, 33 N., 22 W.; Taffarette, French ship, Havre to Foo-chow-Foo, July 17; Cercs, Danish, Foo-chow-Foo to New York, June 12, 27 S., 44 E.; Trio, barque, China to Falmouth, June 26, 33 S., 21 E.; Albuera, Foo-chow-Foo to London, June 28; Iskendershah, Manila to Falmouth, June 12; Louis Knippler, Hamburg to Japan, June 3, 36 N. 18 W.; Bistham (?) Sunderland to Shanghai, June 13, 30 N, 22 W.; Grootmester Nationaal, Dutch barque, Batavia to Rotterdam, June 26; Reyerwaard, Batavia to Rotterdam.

At ST. HELENA, July 11, Cathay Gibbon, from Singapore, and sailep for Falmouth; Eva Johanna, Bochove, from Batavia, and sailed for Rotterdam; Rotterdam, Pool, from Banjoewangie, and sailed 13th for Rotterdam; 12, Truro Duggan, from Shanghai, and sailed 13th for Liverpool; Voladora Villabaso, from Manilla, and sailed 13th for Falmouth; 14, Australia Jochems, from Batavia, and sailed 14th for Amsterdam; 20, Indiaman Webb, from Manila, and sailed 21st for Liverpool; Anna and Sophia Bekering, from Batavia, and sailed 21st for Amsterdam; 23, Oscar Hueff, from Singapore, and sailed 25th for London; 25, Salatiga, Kettler, from Tjilatjap, and sailed for Rotterdam; Vision, Westendorf, from Batavia, Diligence, Smit, from Batavia, and sailed 27 for Amsterdam; Cornelia, Mathilda Kortland, from Batavia, and sailed 27 for Schiedam; St. Jan, Lommerse, from Batavia, and sailed for Rotterdam; 28, Bernard and Agnes, Ordman, from Batavia, and sailed for Amsterdam; Benledi, Houston, from Singapore; 30, Wandrahm, Meyer, from Penang.

At Simon's Bay.—July 19, Tien-Tsin, str., Nicolas, sailed for China.

At Algoa Bay.—July 5, Stad Assen, Haverbult sailed for Batavia.

DEATH OF THE MAHARANEE IN LONDON.—We noticed in our last the death of this lady, and the trouble made about her burial. Colonel Oliphant, who had the official care of these Indian nabobs, of course told them that burning the body would not be allowed by our authorities. The late attendants on the Maharanee then addressed a letter to the Colonel, of which the following is an extract:—"It is not competent for a Christian minister to afford the rites of burial to her Highness; and it is hard we should be prevented from discharging the last sad duty to our mistress which it is the right of all, and which it is not in the power of his Highness the Maharajah or any other Christian to pay. The Colonel tells us that 'there was a scrupulous care on the part of the Maharajah to avoid offending the prejudices of his countrymen,' and that 'the remains of the late Maharanee were removed from Abingdon-house to be deposited temporarily in a vault at Kensal-green.' The best proof of his Highness's consideration for his countrymen is in the fact that, immediately on her Highness's demise, her native attendants, male and female, were shut ou of her room, and had not even the consolation of dressing her for the grave. This office of love was performed by hirelings and strangers, and at this moment an unseemly dispute is going on between Mr. Thornton, the comptroller of her Highness's household, and the women who attended to her Highness, about the price to be paid for their work; and, we understand, the case has been referred to his Highness. Besides, his Highness knew that her Highness could not tolerate the touch of a foreigner. Knowing the circumstance, he could not have outraged the feelings of her Highness's people more than by making her body over to the undertaker's assistants and his English servants. Her Highness was so sensitive about the contact of persons of a different faith to herself, that it was an effort on her part to bear the presence of her son. His Highness, professing a more liberal and enlightened creed, seems to have desired to revenge himself on an unresisting corpse by handing it over to aliens for pollution and disgrace. Regarding the temporary deposit of her Highness's remains at Kensal-green, if the Colonel means fair, why does he not tell us the ultimate destination of the body? When we protested personally against the intended desecration, his Highness and Sir John Login told us the country would not permit the body of her Highness being burnt in England. Public opinion has now spoken out. And as there can be no object in keeping the remains virtually undisposed of, the proper obsequies should be performed at once, if on no other grounds than for the sake of decency."

THE FRENCH, INDIA, AND CHINA LINE OF STEAMERS.—(To the Editor of the *Daily News*):—"Sir,—To-day's journals announce the arrival at Marseilles of the Messageries Impériales India and China mail steamer, with 69 passengers, 1,054 packages of sundries, and 980 bales of silk, and of the Peninsular and Oriental Company's India and China mail steamer *Delta*, at Southampton, with 85 passengers, 92 packages of sundries, and 314 bales of silk. The latter company are beginning to be alarmed at the competition of the French steamers; and well they may. They at first pooh-poohed it, said they rather desired it, because it would not seriously injure them, and would stop off English competition. As far as French competition not injuring the Peninsular and Oriental Company, the latter have been egregiously deceived. Before the French steamers ran, the Peninsular and Oriental steamers brought home 1,000 and 1,500 bales of silk at one time, now these bales are diminished to 314, while the French packet has 980 bales, with 1,054 packages of sundries to the English company's 95 packages. My object in writing is to draw the attention of my brother shareholders to the serious injury with which their property is threatened, and to urge them to attend to their affairs themselves, without trusting too much to managing directors. Let us urge on the directors the utmost economy in management, and that every attention be paid to the public accommodation, so as to prevent the French from vitally affecting our interests. Costly pleasure excursion trips and ship-building experiments must be curtailed. I hear that the steamer *Mooltan* is a failure, and that she will have to come home from India. It is no secret that the Indian public, for some reason or other, are intensely prejudiced against the Peninsular and Oriental Company, and will do all in their power to further the French scheme. The French company have an enormous mail subsidy, and have been enabled by it to send into the eastern seas a splendidly-appointed fleet of steamers, which have met with most extraordinary success.—I am, &c., A P. and O. SHAREHOLDER OF LONG STANDING." As an appendix to this, we may add the following from a Bombay paper:—"A company, it is reported, has been formed to run a monthly line of steamers of large size, fitted up with the best accommodation for all classes of passengers, and constructed for speed, between this port and Aden and Suez, and also between Bombay and China. The Suez line will be worked in connection with the 'Messageries Impériales,' part of the mails and passengers proceeding *via* Marseilles and the heavy portion of the mails being conveyed by steamer to Liverpool."

LAUNCH OF THE P. AND O. STEAMSHIP "SYRIA."—A very fine new paddle-wheel steamer named the *Syria*, built for the Peninsular and Oriental Company by Messrs. Day and Co., of the Northam Ironworks, Southampton, was launched on Saturday, the 15th inst., in the presence of a large concourse of spectators. She is built of iron, and is perhaps one of the strongest vessels ever sent to sea, as upwards of 1,300 tons of iron have been used in her construction. The following are her principal dimensions:—Length between perpendiculars, 312 ft.; length over all, 340 ft. 6 in.; breadth, 36 ft. 2 in.; depth from base line, 29 ft.; tonnage, builders' measurement, 2,000. The *Syria* was designed by Mr. M'Cormack, the naval architect, for Messrs. Day and Co., and is a very beautiful vessel, possessing more cabin accommodation than any other of the Peninsular and Oriental Company's fleet, viz.:—First-class passenger berths, 161; second-class ditto, 34; servants, 20; officers and crew, 130: total, 345. She is brig-rigged, with figure-head, neat elliptical stern, and quarter-galleries, has iron lower masts, and will be fitted up with every comfort and convenience, including ample ventilation for the cabins, large icehouses, gas apparatus for lighting the cabins, &c. The *Syria* will be propelled by a pair of oscillating paddle-engines of 450-horse power nominal, which will be fitted with surface condensers, steam jackets, and Lamb and Sumners' patent boilers and superheating apparatus. Besides large stowage accommodation for mails, passengers' baggage and stores, she will have room to stow away 470 tons of coal and 500 tons of cargo. The *Syria* will be commanded by Captain E. Cooper, the senior officer of the Peninsular and Oriental Company's fleet, and will be placed on the Marseilles, Malta, and Alexandria station. After the launch a large party of ladies and gentlemen sat down to a sumptuous *dejeuner*, under the presidency of Captain Day, R.N., brother of Mr. Charles Day, the head of the firm, who was absent through illness.

NOVEL SCENE OF SHIP LAUNCHING.—A novel scene, such as never was probably observed on a commercial river before, was witnessed by a large concourse of people on the Tyne on the 15th inst. At four o'clock Messrs. Palmer Brothers launched from their building yards at Jarrow and Howden four large iron steam-ships at the same instant of time. Upon the discharge of a cannon, all being ready, they glided into the river simultaneously, and without the least accident occurring. The vessels thus launched are the *Latona*, a large steamship, to trade between London and Italy; the *John M'Intyre*, a screw collier of large tonnage, for Messrs. Cory, of London; the *No. 1*, a steamship, for a Rotterdam firm; and the *Europa*, for an Italian company, to carry passengers between Genoa and Sardinia. Their aggregate tonnage is 4,300; and besides these Messrs. Palmer have 16,000 tons of iron shipping on the stocks.

THE FOULING OF SHIPS' BOTTOMS.—Recent experiments with a new method for coating the iron plates of vessels, to preserve them from oxidation and fouling, have been found so satisfactory that the Admiralty have ordered the whole of the armour plates of the cupola ship *Royal Sovereign* to be thus covered. The material, which has been introduced by Messrs. H. J. Hall and Co., is termed "Brown's vitreous sheathing," and consists of a surface of glass fused upon small plates of iron, sufficiently thin to be to a certain extent flexible, which are applied to the ship by a new adhesive process, and which have been ascertained to be capable of resisting all ordinary contingencies from pressure or abrasion. The Peninsular and Oriental Company have tested the invention, and a trial of it has been ordered by the French Emperor at Cherbourg.

"THE JAPAN HERALD."—By the last mail we hear that this useful journal (which, by the way, assumed a title which we possessed in 1858) which had been suspended for a short time consequent upon the necessity of closing up partnership matters, would be resumed in July by its originator and proprietor, Mr. A. W. Hansard.

THE RACE-HORSE BUCKSTONE.—Mr. Merry's celebrated horse Buckstone, which we have already announced as having been sold for £4,500 for China, has been shipped for its destination, by the present mail, together with two other race-horses, named Millionaire and Investment. The latter, we regret to hear, died the day after embarking at Southampton on board the *Pera*. It is stated that she was purchased by Mr. Dent for £3,000.

SUPPLIES FOR THE LIVINGSTONE EXPEDITION.—Supplies had been sent from Capetown for the members of the Livingstone expedition. The commander of the *Pekin* having announced his intention of proceeding to China by way of the Mozambique Channel, Admiral Sir Baldwin Walker immediately made application for leave to forward supplies to the expedition, to which the captain most readily consented. The *Pekin* also took supplied for Bishop Tozer and the members of the universities' mission.

THE TREATY WITH JAPAN.

("STANDARD"—CONSERVATIVE).

The Japanese have chosen to exclude themselves from the rest of the world. They have carried on some sort of commerce with the continents of Asia and Europe, but it has been suffered under jealous precautions, which exclude the trader while they admit his goods. A nation of 45,000,000 is sufficient for itself. If the Japanese wish to marry, there are women enough in Japan, and handsome ones; if they have a thirst for knowledge, there are the books of the Japanese fathers, written on silk; if they desire to travel, there are the three great islands, and all variety of mountain, plain, and coast scenery. What has the Japanese to wish for that he cannot find in Japan? Like the Abyssinian princes of the Happy Valley, when he reaches its confines, he has cause to regret his foolhardiness. Those poor exotics who lately came on a visit to Europe, and who astonished us so much by their intelligence and the quaintness of their manners and costumes, were glad enough to get back after being a few months away. The Japanese Ambassadors, whom last year we was at the Derby and the opera, walking along the nave at Kensington, or inspecting the factory of Armstrong guns at Woolwich, returned to Japan more convinced than ever of the wisdom of the policy of isolation. What had Japan to do with these restless Europeans? She had very much to fear from them—nothing to gain. They might boast of their arts and sciences, their power, their political institutions. It was all a matter of taste. To the mind of Soochoo-no-Kami, Abana and Pharpar were still better than the waters of Israel. Japan wishes to be alone. She is happy enough as she is. Why, then, not leave her alone? Why disturb her from her long sleep, and break in upon her dreams with the rude realities of Europe? The Indians of North America were a happy race of men before we introduced them to the small-pox and firewater. The natives of the South Pacific, beautiful almost as angels, and glorious in their nakedness as our first parents in Eden, have withered under the blighting influence of European clothing and European luxuries. Where the white man gains a footing in Africa, the negro dies. The blacks of Australia, the grand Maories of New Zealand, will be alluded to by the next generation as beings of the past. These nations are all limited in number. There are races in Asia whose numbers are as the sand of the sea. Where the climate is inimical to the white man the aborigines cannot well be thrust out by him. It is fortunate for the Hindoos that their conquerors are but birds of passage, who can never settle permanently in India. But the dwellers in the more temperate climates of China and Japan can claim no such immunity. The white man has already set his foot among the 300 millions of Chinamen, and is busily helping them in their work of depopulating the soil.†

THE SUEZ CANAL.

(THE TIMES.)

Why should we have quarrelled with this project? "The English policy," declared M. de Lesseps to his shareholders, "is so well aware of the profits in store for you that, not having the power of stopping the works, it has conceived the idea of throwing trouble and disorganisation in your ranks, with the hope of effecting a redemption of our society, and the substitution of another, formed, as is natural, with English capital." That is to say, the wish of England is to damage the concern irretrievably, buy it up at a discount, and then carry it out for her own profit. We can assure our French friends that no such desire prevails in this country. It is, we fear, only too "natural" that societies should be "formed with English capital," but as the Suez Company actually piques itself upon its "universality," and its shares are like other shares, it would surely be simpler for us, if we had any such ambition, to become proprietors in the ordinary way. Moreover, on this hypothesis, we should certainly not have seen diplomacy brought to bear on the question. There was a political element in the case, as M. de Lesseps well understands, but, though he discusses it to our detriment through many a paragraph, he omits to state that his own countrymen first sounded the alarm. France it was who assured us that the Suez Canal would be the ruin of England.

Continental Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, August 22.

In my last letter I stated that the East India Budget for 1862 had been finally made up and sent to the Second Chamber of the States General for their approbation and confirmation. I am now enabled to give your readers some of the leading figures of the Budget.

The revenue, as derived from the undermentioned sources, is estimated as follows:—

Rents and leases	Fl. 14,786,505
Taxes and receipts from various sources ..	12,648,084
Land revenue and cultures	11,370,261
Sale of produce and goods	63,678,731
Sundries	1,695,812
War Department	264,220
Naval Department	278,550
Value of materials to be sold from the stocks on hand belonging to the civil, military, and naval departments for the benefit of the general Government	1,983,611
Total	Fl. 106,705,674

† If this policy had been pursued, we would ask if England would be as wealthy prosperous, and important as she now is.

EXPENDITURE.

Salary of the Governor-General and expenses of his establishment	Fl. 240,667
The High Colleges and Secretary-General ..	643,408
Department of Justice	1,008,273
Provincial Government and police	5,325,520
Department of religion, arts, and sciences ..	1,341,165
Civil department of public works	5,580,326
General Government	13,510,313
Agriculture, land revenue and cultures ..	31,047,740
Purchase and transport charges of various goods and produce	7,726,475
Military department	20,664,816
Naval department	6,919,557
Pensions and pay to officers on half pay, expectancy and leave of absence	2,656,000
Sundry expenses	3,726,676
Total	Fl. 100,390,936

RECAPITULATION.

Revenue	Fl. 106,705,674
Expenditure	100,390,936
Surplus	Fl. 6,314,738

The surplus in the revenue arises chiefly from the rents and leases (about 2,000,000 fl. more than in the previous year), taxes (685,000 fl.), and sale of produce and goods 3,369,693 fl.)

The increase in the expenditure is incurred as follows:—328,823 fl. for the Provincial Government and police; 120,165 fl. for religion, arts, and sciences; 2,391,014 fl. for civil public works; 179,560 fl. for the general government; 1,681,077 fl. for agriculture, &c.; 482,164 fl. for purchase and transport of produce; 1,970,940 fl. for the war department; 1,588,893 fl. for the navy, and 268,400 fl. for pensions and half pay to officers on the non-active list and on furlough.

In comparing the budget of 1851 with that for 1862, and deducting from both the interest paid to the mother country and the Dutch Trading Company, in each case about 10,000,000 fl., it appears that the whole expense of the Indian Government for 1851 amounted to 56,307,053 fl., whilst 90,390,936 fl. were required for the service in 1862, showing an increase of about thirty-four millions of florins in the space of eleven years. In 1851 the territorial revenue was barely sufficient to cover the expenses, whilst in 1862 no less than nineteen millions of florins have to be deducted from the profits of the sales of produce to square the general expenses of the administration.

From the special statements annexed to the budget, it appears that the territorial revenue for 1862 is estimated as follows:—49,482,850 fl. in India and 707,794 fl. at home; together, 50,190,644 florins. On the other hand, the expenditure in India is put down at 51,240,599 fl., and 17,760,204 fl. in Holland; together, 69,000,803 fl, or about nineteen million florins more than the receipts, which must be covered out of the surplus on the cultures and sale of produce, showing the following result:—

Revenue—In India ..	Fl. 11,644,334	
In Holland ..	46,850,000	
		Fl. 58,494,334
Expenditure—In India ..	Fl. 32,778,337	
In Holland ..	591,100	
		Fl. 33,369,437
Estimated surplus		Fl. 25,124,897

Which in reality was considerably more, for it appears from the papers accompanying the bill for the repayment of the East India public debt, that instead of 46,850,000 fl. put down in the budget as the amount of produce sold in Holland in 1862, the sum actually realised was 63,100,000 fl., or seventeen millions of florins more than the estimates.

The Netherlands Trading Company have chartered the following first-class vessels under the usual conditions, to convey cargoes of produce from Java to this country:—

Ship.	Captain.	Port of Discharge.
Pegasus ..	G. Manourry ..	Amsterdam.
Sirius ..	W. Van Rees ..	Do.
Joan Melchior Kemper	J. Salm ..	Do.
Maria Catharina	H. Kluit ..	Do.
Zeemeeuw ..	H. Kayser ..	Do.
Ouderkerk an der Amstel	K. Zwaart ..	Do.
Macassar ..	J. Rip ..	Rotterdam.
Twee Gezusters ..	J. Bergman ..	Do.

The abovenamed company give notice that from and after the 25th of September next they will be prepared to pay the dividends of the Bank of Java for the thirty-fifth book year at the rate of 62 fl. 33 cents Dutch currency for the dividend of 62 fl. 50 cents Indian currency on each share of the nominal value of 500 fl.

Digitized by Google

The same company invites tenders for 145,000 kilogr. of salt meat, 15,570 kilogr. of fine sifted wheat flour, and 20,160 litres of pure wine vinegar for the colonial department, to be shipped to Java.

A statistical department is to be immediately organised in Netherlands India, according to a plan, the particulars of which have been settled between the Governor-General and the home Government. Two experienced civilians are to go out to make the needful arrangements for the proper organisation of this new branch of the service. The gentlemen are already appointed; they are Mr. W. T. D. Yssel de Schepper, clerk in the Provisional Government of Gelderland, statistical department, and Mr. H. J. Bool, clerk in the home department.

Shipbuilding for the East India trade appears to be reviving. In several of my late letters I have mentioned the launch of new vessels, and have to-day to report two more. The first is that of the Dutch barque *Marie*, of 800 tons, built by Mr. J. Smit, at Alblasserdam, for the house of Messrs. van Charante and Co., of Rotterdam; and the other is the barque *Nereus*, of 700 tons, constructed by Visser Brothers, at their building-yard in the Zalmhaven, at Rotterdam, for account of the ship-owning firm of Messrs. Mees and Moens, of Rotterdam. The former will be commanded by Capt. H. G. Biesthorst, and the latter by Capt. H. T. Planten, both favourably known in the East India trade.

Mr. de Bordes has been appointed chief engineer for the construction of the railways in Java, and will, according to the present arrangements, leave this country early in November by the overland route, so as to be able to enter on his duties before the close of the year.

Letters from Manila give dreadful accounts of the losses occasioned by the late earthquake. As many of the houses were destroyed in consequence of their heavy roofing, the Government have determined very wisely to facilitate the employment of lighter materials than the heavy tiles hitherto used in the reconstruction of the city. The official *Gaceta de Manila* of the 9th June therefore contains a decree permitting the importation of zinc plates, galvanised iron and tin plates, roofing-felt, and zoolithic pasteboard, as well as all other light materials for the roofs of houses, by either Spanish or foreign vessels, free of all duty till counter-ordered. This measure is to be considered exceptional and provisional, and to last till the houses are rebuilt, when due notice will be given at least eight months before the date fixed for its discontinuance.

According to an official report from the Dutch Consul in China, dated 12th June, the Imperial Commissioner for Foreign Commercial Affairs in the Southern ports of China has issued a regulation concerning the measurement of British and foreign vessels, which was much needed. All Dutch bottoms that are unable to produce a British measurement will be rated at $1\frac{3}{4}$ English tons per Dutch register last. It is further enacted that in cases of re-shipment of foreign goods from one port of China to another, instead of the exemption certificate hitherto granted, a drawback will be given, which will be received in payment of Customs duties on other goods imported from abroad. At Hong Kong two common articles of Dutch origin are very scarce, and command high prices, viz., washing blue, $45 per picul, and stockfish, $12 per picul.

A private letter from Padang of the 27th of May states that on the 21st of that month the expedition destined for Nias had arrived at Siboga, and immediately proceeded. A delay had been caused by the boilers of the Government steamer *Duke of Saxe-Weimar* becoming foul off the Bay of Tapanoli, so that H.N.M. steam-corvette *Reinier Claassens* was obliged to take in tow first the *Adrianna Petronella*, troop-ship, and then the broken down steamer. Five days were spent before the boiler was reported ready for service. The letter adds that the troops were animated with zeal, and longing to chastise the piratical enemy.

The *Zeenymph*, Capt. J. F. Graadt von Roggen, lately arrived at Nieuwe Deep from Batavia, has brought over a Java tiger, two bears, a wild cat, three crocodiles, a porcupine, a Java owl, and two ourang-outangs, which were all safely landed in excellent condition, and forwarded to the Zoological Gardens of the "Natura Artis Magistra" in this city.

On the 23rd of May last a person calling himself Silvester Silver arrived at Macassar in a forlorn condition. He stated himself to have been boatswain of the British ship *Frankfort Old*, of Liverpool, Hiram Deze master, with a cargo of coals from Cardiff to Shanghai, and that the vessel had struck on a rock off Kalatoea, on the island of Bonerete, on the evening of the 19th February, and immediately filled and went down. After knocking about for four days, floating on a piece of wood from the wreck, he was picked up by Tripang fishermen, and eventually landed at Macassar. Of the fate of his companions he is unable to give any account. The Dutch Governor treated him kindly, and has taken the needful measures to send him to a British colony.

PASSENGERS ARRIVED.

Per *Zeenymph*, Capt. von Roggen, at Amsterdam, from Batavia:—Mr. and Mrs. Hollander and two children, Mr. and Mrs. Guise and two children, Mr. and Mrs. Prevost and child, Messrs. Breukelman, G. Senn van Basel, G. Buis, and G. Beer.

Per *Hendrika*, Capt. van Aalborg, at Rotterdam, from Java:—Mr. and Mrs. L. Ganter and child, Messrs. A. S. Wagenaar, and F. van Gelderen.

Per *Billiton*, Capt. Ganswyk, from Padang:—Mr. F. A. Nieuwenhuizen, E. I. Civil Service.

Per *Elizabeth Jacoba*, Capt. Lucas, at Amsterdam, from Macassar:—Mrs. A. Schmidt and child, Mr. R. Bakkers.

Per *Christina*, Capt. Reemeus, at Amsterdam, from Sourabaya:—Mr. E. J. Scharenberg.

PASSENGERS OUTWARDS.

Per *Argo*, Capt. Ankringa, to Batavia:—Mr. and Mrs. d'Abo, Mr. Heus, Mrs. vander Broek and daughter, Miss Leuvius, Mr. Lawick, Mr. van Pabst and Mr. Leuvius.

COMMERCIAL.

COFFEE.—The company's autumn sale is advertised to take place at Rotterdam, on the 9th of September, when the following parcels will be offered for public competition:—

151,200 bags of Java ..	In warehouse ..	at Rotterdam.
188,400 „ do. ..	„ ..	Amsterdam.
16,700 „ Padang ..	„ ..	do.
17,600 „ Java ..	„ ..	Middelburg.
26,500 „ do. ..	„ ..	Dordrecht.
12,900 „ do. ..	„ ..	Schiedam.

Together 396,000 bags of Java and 16,700 bags of Padang; total quantity, 413,300 bags, against 500,486 bags last year. The comparatively small amount of Coffee at this sale has tended to strengthen the market; and as it is now ascertained (the samples being on show for the last few days) that there is a predominating quantity of greenish and green, with a very moderate assortment of yellow and bright yellow, which are a favourite colour for certain markets, these latter descriptions are in great request, and parcels out of former sales still on hand (such as Nos. 9, 23, and 24) are eagerly bought up at 46½ cents. The Brazil crop will not exceed 1,800,000 bags, with a stock of under 100,000 bags in the country, and this fact has given an impetus to Coffee generally, whilst at Hamburg the article is continually rising. Everywhere great confidence is felt, and, notwithstanding the present high prices, speculative purchases continue to be made.

TEA calm, and prices well supported. A public sale of 616 quarter-chests of China and 53 packages of Japan is announced for the 26th inst. The Japan Tea (marked Philippine, No. 14) is valued by the brokers at 130 cents, being rather loose, but a fine sort of Oolong.

SUGAR.—A further decline in the raw article has given rise to more activity, and during the last few days above 10,000 kranjangs of Java have changed hands, among which are 1,800 kr. No. 17¾, fine steam made, at 35¾fl.; 1,346 kr. No. 13 and 17, ex *Diana*, at secret prices; and 1,351 kr. of Sourabaya, No. 11 soft, ex *Macassar*, at 27fl., to be received on board. Refined goods quiet, and no alteration in values.

SPICES.—Java Cinamon, No. 3, had run up to 106 cents, but a reaction has taken place in the last week, and it might now be had at 102 cents. In other articles nothing done, in anticipation of the company's sale, which went off as follows:—Nutmegs, No. 1, 60 to 63 cents; No. 2, 48 to 50; No. 3, 25 to 26. Cloves, D, 57 to 60 cents; E, 53 to 56; Amboyna Cloves, No. 2, 24 to 25 cents. Java Cinnamon, No. 3, 89 to 106 cents; No. 4, 81 to 84. Black Pepper, 21½ to 22½ cents in bond.

TIN.—Owing to the fall of £4 in the London market, the article is in a depressed state, and sales have been made here at 73½fl.

RATTANS are in good request, several parcels being bought at full prices, among others, 285 bundles ex *Electra*, 3,000 do. ex *Harald*, 1,800 do. ex *Estafette*, and 737 do. ex *Drie Gebroeders*.

INDIGO.—Java firm. Some parcels, ex *Hendrica*, have been taken.

COCHENILLE commands more attention, and better prices are paid for Java, as the stock is much reduced.

TOBACCO maintains its position. 883 bales of Kawi and 644 bales D were offered for sale by tender, but not sold, as the offers made did not come up to the importers' mark. Stock of Java, 8,201 bales.

HIDES have a fair sale. Several parcels have come to hand, and the market is firm.

At a private trade sale held here on the 18th inst., 397 eighth-chests of China Congou sold at 120 to 121 cents, and 198 do., do. realised 125 to 127 cents.

SPAIN.

Several German banking-houses have offered Spain a loan of 500,000,000 reals, at 6 per cent., to repair the disaster which has taken place at Manilla.

The *Madrid Gazette* has the following:—"It appears from a report signed by Raphæl Echague, and dated Manilla, the 22nd of June, that, according to the returns sent in to the Captain-General of the Philippine Islands, the number of victims who have been taken out from the ruins, without counting those which have not been yet withdrawn, amounts to 350, and that of the wounded to about 450. Of the public buildings forty-six have been destroyed and twenty-eight very seriously damaged; 570 private houses have fallen down and 528 are in a very tottering condition. Scarcely a house remains that can be securely inhabited, even after they have undergone repair, so great was the violence of the earthquake. The national subscription for the sufferers by this catastrophe amounts to 69,030 reals."

LONDON, FRIDAY, AUGUST 28, 1863.

OUR DEMANDS ON JAPAN.

The news received by the present mail from Japan confirms all we stated in our last issue as to the utter uselessness, nay, the positive evil, of pursuing a vacillating policy with the highly-polished Japanese barbarians. What could be expected if the Japanese, in the negotiation of our claim for indemnity, found anything on the part of our diplomatic representative, which they could interpret into credulity and weakness, but that they would, to use the language of Colonel Neale, "flagrantly, unequivocably," and designedly break their faith. The value the Japanese put on a solemn engagement would appear to be the wide range it offers to their cunning propensities to evade its requirements. Colonel Neale speaks of "innumerable difficulties" interposed in the way of payment of the money. Doubtless one of these was poverty, although two of the provinces of the empire yield a larger yearly revenue than France. There is so much of the Jew in all this, that it would not be wonderful if the ten lost tribes should yet turn up in Japan. The patience and moderation for which Colonel Neale takes credit in his letter of June the 20th to Her Majesty's Consul at Yokohama, are virtues unknown to the Japanese, and therefore unappreciable. No sooner are they virtually compelled to pay, than the pleaded impossibilities disappear, and 440,000 Mexican dollars fall into our coffers in a continued stream. This is not all. What the Tycoon's Government "cannot do" we will do for ourselves. Before this time a wooden Russian vessel, of small tonnage and guns of small calibre, has captured Japanese forts, dispersed their defenders, and as the result of these successes been freighted with treasure. The expedition of Admiral Kuper to the Loo-Choo Islands is one sure to be successful and sure to pay. The stormy seas, strong currents and rocks, so long the protection of this insular principality against early Portuguese expeditions, are of no more account to us than its forts. We can turn its revenues to good account in the adoption of measures to countervail those restrictions on trade which the Japanese Government, in its vindictiveness, would now ostensibly put an end to. We say ostensibly, for this is merely one of the cards sought to be played for a temporary purpose at a critical time.

We are not surprised to find, in the deliberations of the Japanese Court on the subject of our demand, that the spiritual Emperor—the Pope of the Japanese Emperor's dominions—should have appeared on the scene. We can only view him as a subordinate, though nominally superior to the temporal Sovereign, accustomed as he is to play into the hands of the temporal power. Doubtless he, too, was one of the "difficulties;" for whereas the Tycoon who received the ultimatum at Yedo on the 6th of April ordered the Government to pay the money, the Tycoon subsequently pleaded that he "had received "a communication from his spiritual superior which had made "him reflect." This "spiritual superior" could know no more than the Tycoon; no spiritual element in the Japanese sense was involved in the question; and, even if it was, it is notorious that the religious bond in Japan is so slight that there is no country where the Jesuits made their converts more rapidly. It is not by the spiritual Emperor and his religious rights, or even by exclusive tenets, that the population is held together under one nominal Government. The spiritual rule is, nevertheless, the curse of the country and inimical to its advancement; and, if we ever get a chance, it will be our business to dig at its roots.

The decree to expel foreigners from the country and close the ports has, at the present critical period, a peculiar significance. Seeing that the terms of our ultimatum have not been fully complied with, it is not only an act of hostility but of war; and for the losses sustained by the withdrawment of our merchants and others from those positions which we cannot immediately occupy and defend, as well as from loss by trade—to the continuation of which we were as clearly entitled under the treaty as to settlements at the open ports—it must be our business to demand, not simple indemnity, but such a sufficient security as will prevent the Japanese rulers, spiritual and temporal, from trifling with our interests. Our policy must now be demonstrative and coercive, unimpeded by that dilatoriness on which the Japanese set an almost fabulous value. It is satisfactory to know that foreign residents in Yokohama—as seen in the letter of the 21st of June of Admiral Kuper to the Consul, and which will be found elsewhere in our columns—had received ample warning to provide for personal safety. Whatever the present sacrifices they may be called upon to make, their lives at least will not be endangered. That the absence of anything like a military force should have proved the occasion to invite the unscrupulous Japanese to this aggression is matter for deep regret, and throws a heavy responsibility on Her Majesty's Ministers. We shall wait with interest for the *denouement*.

Our contemporary the *Observer*, on the telegram alluded to above, says:—"A telegram has arrived from Japan *via* Shanghai, of the 4th July, which is not a little mysterious. On the one hand, the Japanese have paid the indemnity demanded, on the other, the 'Mikado had issued orders to expel the foreigners, and to close the ports.' We presume the explanation is that the Tycoon and the advanced party have finally quarrelled with the Mikado and the Conservatives, and that civil war will commence in Japan. The natural course of events under those circumstances is that the Mikado should win at first, that the Tycoon should call in the British, and that the aliens should fix themselves firmly upon the necks of both. The mere approach of the men of the West seems to shatter these Eastern civilisations as an iron bar shatters fine porcelain by merely rolling upon it."

STEAMERS AND CLIPPERS FOR CHINA.

We have to notice the launch of the screw steamer on the Clyde, noticed in a late number as building by Messrs. A. Stephen and Sons, for the direct trade to China. This vessel has been named the *Sea King*, and is to be commanded by Captain Pinel, late of the *Tiptree*. She is classed A1 at Lloyds for thirteen years, and registers 1,200 tons, with engines of 150-horse power. She will load out from London, through Messrs. Robertson and Co., for Shanghai, to the address of Messrs. Chapman, King, and Co., who are part owners, following the *Bahama*, screw steamer, now loading for that port, at 75s. per ton of 40 feet.

Mr. Laing, of Sunderland, has launched a screw of 500 tons, named the *Wokee*, for Messrs. George Duncan and Co., London, which is to be despatched for China shortly. This is the house who despatched the *City of Hankow*.

The two paddle-wheel boats, building for the China and Japan Company, will be ready for launching in a few months. The two steamers building under the care of Captain Blow are progressing on the Clyde.

The large paddlewheel boat, building by Messrs. Denny and Co., on the Clyde, for Messrs. Gibb, Livingston, and Co., will be ready for launching in about two months time. Her register tonnage is 1,460 tons, and her engines of 375-horse power; length, 245 feet; beam, 35 feet; depth, 22½ feet. She is intended for the coast navigation, and will draw, loaded, 11 feet 6 inches.

The paddlewheel building by Messrs. Denny and Co., for Messrs. Jardine, Matheson, and Co., will be ready to launch in a few months. Her tonnage is about 2,000 tons, and engines of 450-H.P.

The iron double screw building at Dudgeon's, on the Thames, will be ready to launch early in October, and is, we understand, to be

Digitized by Google

called the *Far East*, a most suitable name for her intended trade. Her register tonnage is 1,200 tons; length, 225 feet; beam, 35; engines 150-H.P., working up to 600, There are several new ideas introduced in her build which are looked upon with suspicion by some practical men, while highly approved by others. Shipbuilders, owners, and captains differ quite as much as doctors. However, if the ideas turn out successful, Captain Jones, who is superintending her construction, may be justly proud of his ingenuity and pluck in making the experiments. The consumption of coal will be only eight tons in twenty-four hours, and it is intended to make the voyage between London to Shanghai without calling in for coals. She will draw sixteen feet, with a cargo of 1,200 tons tea.

Messrs. Fletcher and Co. are building a paddle in New York called the *Moyune*, commanded by Captain Briggs. Length, 250 feet; beam, 38 feet; depth, 13 feet; horse-power, 300.

The paddlewheel for Messrs. Geo. Barnet and Co., of Shanghai, building at Samudas' yard on the Thames, is making progress, and will be ready to launch early next spring. She will be constructed with large passenger accommodation, and is intended for the Yang-tse trade.

The new clipper for Messrs. Turner and Co. has been launched at Aberdeen, and called the *Black Prince*. She is 1,000 tons, and built with an iron frame and teak wood planking. She is commanded by Capt. Inglis, late of the *Gauntlet*, and will shortly load out for Hong Kong. The clipper building at Aberdeen, under the superintendence of Captain Killick, of the firm of Killick, Martin and Co., ship brokers, London, will be ready to launch about the end of September, as also the clipper building on the Clyde for Messrs. Charles Shaw and Co. The clipper for James Findlay, Esq., of Greenock, has been launched, and is called the *Serica*. She is about 700 tons, and is a very beautiful model.

A fine screw, named the *Comorin*, was launched on the 15th inst., at the yard of Messrs. Wm. Simons and Co., with all her machinery on board. The *Comorin* forms one of the fleet of the British India (late Burmah) Steam Navigation Company trading between Bombay, Calcutta, Rangoon, Singapore, &c.

THE P. AND O. CO.'S STEAMER "BARODA."—The Milwall Iron Ship-building Company will launch the P. and O. Company's steamship *Baroda* on Saturday (to-morrow), at about one P.M. The *Golconda* for the same company, will also be launched, about 1 p.m., from the yard of the Thames Iron Ship Building Company. It is probable that the e two vessels will be despatched for service on the Indian lines.

COCHIN-CHINA.

Late French advices from Saigon say that the departure of the Annamite Ambassadors for France had been deferred for some weeks. This delay is explained as arising simply from the desire of the King to give all possible *éclat* to the new embassy, and to furnish the Ambassador with presents worthy the acceptance of the EMPEROR, the EMPRESS, the PRINCE IMPERIAL and other important personages. As soon as the French had given up Wienh-Long to PHAN-TANG GIANG, its former Governor, who again took possession of it in the name of the KING, his master, that officer departed for Hué in order to make his arrangements and take his final instructions for the voyage. Thus six or seven weeks passed, nothing being done hurriedly in the East. At last the newly-appointed Ambassador arrived at Saigon direct from Hué, being taken up by the steam-corvette *Echo*, which Admiral LA GRANDIERE had despatched to fetch him. The transport *Européen* had been fitted for the reception of the Ambassadors and their suite, and every one, we are told, is well satisfied with the arrangements. The *Européen*, which brings also a number of invalids and men whose time has expired, is expected at the end of the present month.*

The embassy consists of the following persons:—PHAN-TANG-GIANG, already named, first Ambassador, a man of sixty-five or sixty-six years of age, and one of the highest dignitaries in the Annamite Empire, besides being Governor of Wienh-Long, he had been preceptor to the KING in his minority, and is said to enjoy his entire confidence. He is reported to be one of the most learned men in the kingdom, and an able diplomatist. Personally, he is described as small and thin, with scanty white moustache and beard, nose straight but somewhat flattened out, and generally, as not remarkable for good looks; but, we are told, his eyes exhibit great vivacity, his movements and smile show great kindliness and grace, and he seems delighted with the prospect of visiting Europe. Two Ambassadors of second rank accompany PHAN-TANG-GIANG; one of these has been a Minister, and the other was chief clerk in a Ministry, and was selected by the first Ambassador on account of his erudition. Two captains, who fought against the French, and who begged to be permitted to visit Europe in order to study the military system in force there, two historiographers, two doctors, and three mandarins of inferior rank, complete the embassy, which is accompanied by a large number of interpreters, soldiers, and servants, the whole number amounting to seventy persons.

Among the persons attached to the Embassy, the principal interpreter, TROUONG-VINH-KY, and whose officials title is TAM-TINH-TAY-NAM-THONG-NGAN-HOC CHANH, is deserving of a special notice. The Europeans call him PETRUS, for he is a Christian, and was baptised by that name. He war born of poor parents, in the province of Vinh-Luong. His father was a soldier, and fell in the expedition against Cambodia. His mother was left with two children to support, but she nevertheless sent him to the Annamite school, where he learnt to read. A French priest subsequently took an interest in the lad, and sent him to Cambodia to learn the Latin language. The missionaries there, perceiving his great talents, procured his admission into the College of Poulo-Pinang, where he studied with great success. He obtained the chief prizes for mathematics and philosophy, and also composed an able thesis in Latin on the Divinity of JESUS CHRIST. The Governor of Poulo-Pinang was so charmed with this production that he sent a copy of it to the University of Oxford, and made its young author a present of 150 rupees. On leaving College PETRUS returned to the Bishop of ISAUROPOLIS, and continued his studies for two years longer. After mature reflection, he concluded that he had no especial vocation for the priesthood, and requested to leave the mission. He was at first engaged as Government interpreter under the orders of Vice-Admiral RIGAULT DE GENOUILLY; he next became secretary to the Prefecture of Saigon, then interpreter attached to the Staff of Vice-Admiral BONARD, and was ultimately appointed Director of the College of Interpreters. M. PETRUS has not yet completed his twenty-fifth year. Besides the Annamite, his native tongue, he writes and speaks correctly Latin, French, Spanish, English, Chinese, Malayan, Cambodian, and Siamese. He is not only an accomplished scholar, but also a man of the world and well acquainted with European usages. The Government was happily inspired in making him chief interpreter of the embassy, and the future will prove the excellence of the choice.

The Ambassadors bring with them no less than eightp cases filled with presents, consisting of the most beautiful specimens of stuffs, composed of silk and gold, arms, lacquer, inlaid ware, jewellery, and nic-nacs. Amongst the presents intended for the EMPRESS, we are told of fans of exquisite beauty, and of rings and bracelets set with jewels of enormous value and exhibiting very rare and curious workmanship; while for the PRINCE IMPERIAL there is a palanquin copied from that which the KING uses on gala days, four parasols to match, and a large collection of curiosities. The country is declared to be as tranquil as could possibly be expected under the circumstances; but order is far from complete. The presence of foreigners has disarranged the habits of the natives, and excited their prejudices; predatory bands roam about the country committing serious depredations, and the waters are not yet cleared of similar mischief-makers, but the heads of the villages or Tongs are said to be friendly to the French, and to look to them for justice and protection. Admiral LA GRANDIERE is described as occupied with the establishment of public works for the improvement of the condition of the people, and for enriching the most miserable parts of the country; but his efforts have been seriously impeded by the excessive heat which has made itself felt there, as in Europe, this year.

* Since announced as having arrived at Suez.

THE TELEGRAPH TO INDIA.

We noticed some months since the charter by Government of vessels for the conveyance of the sub-marine cable which is to be laid in the Persian Gulf to connect Kurrachee with the Turkish line to Bagdad. London is already in communication with Bagdad, and there our Indian land lines will commence; one running due south, through a wild Arab country, for about

Digitized by Google

300 miles, to the head of the Gulf; a second proceeding through Ispahan and Shiraz to Bushire, each joining the submarine cable in the Persian Gulf. From Bushire the wires will catch at Cape Mussendom, in Arabia, and thence at Gwadel, a bold headland on the Beloochistan coast. From Gwadel to Kurrachee, in Scinde, a telegraph is already made. Of course, from Kurrachee the whole empire can be reached in a few minutes, and the extension of the line from Rangoon to Singapore will be taken in hand next year.

The first of these vessels, the *Marian Moore*, was despatched on the 15th inst. This vessel conveys 175 miles of cable, the whole length being 1,250 miles. The *Assaye*, lately purchased from the East Indian Government by E. M. de Bussche, Esq., of Shanghai, is now taking in cable at the wharf of the manufacturer, Mr. Henley, at Woolwich, as also the *Kirkham*. These vessels will be shortly despatched, and are be followed by the *Tweed*, late *Punjaub*, owned by John Willis, Esq. (which was also purchased out of the Indian navy), the *Cospatrick*, and the steamer *Charente*, which is intended to tow these vessels at a steady pace while laying the cable, and remain in the gulf to repair any damages. She will be commanded by Lieut. Stiff, of the late Indian navy It is expected that they will all reach their destination by the end of the year, and with fair success the immersion will be completed in February.

During the whole time the cable is at Mr. Henley's the current is kept always through it, so that the slightest possible defect in the wire can be detected. In addition to this the very able electrical staff test every portion regularly twice a day for insulation and resistance of conductor. When everything has been done which the most jealous care and the most fastidious scientific skill can suggest, it is passed out on the river side of Mr. Henley's factory and coiled away in tanks filled with water; and even here perpetually watched and tested. There are upwards of 900 nautical miles of it thus manufactured lying at Mr. Henley's works—huge coils of thick black-looking rope, nearly 1¼ in. in diameter, weighing nearly four tons to the mile, and 2½ tons in water, and costing as nearly as possible £200 per mile—the cheapest, strongest, and, electrically speaking, the most perfect cable that has ever yet been made. 350 miles more of the same kind have yet to be manufactured, making 1,250.

The Indian Board have placed the general superintendence and control of the line under Lieutenant-Colonel Patrick Stewart, R.E., an officer as well known for his gallantry during the Indian mutiny as for the great services he rendered the Government by the construction and maintenance of the telegraph lines through the wildest districts of Central and East India. For the immediate electrical and engineering superintendence of the line, and of submerging it, the Indian Government have selected Sir Charles Bright and Mr. Latimer Clarke. Whatever may be its ultimate fate, it is quite certain that there never yet has been a cable manufactured with such care, or one which, in point of "conductivity" and insulation, comes so nearly up to the standard of absolute electrical perfection. The design and construction of the cable differ very materially from any line hitherto laid. Every operation in submarine telegraphy—even the great Atlantic line, has contributed its quota of valuable experience; for, though successfully laid by Sir Charles Bright and his assistant engineers, in spite of its imperfect construction, it was destroyed by the injudicious electrical treatment it received after submersion. This fact is now so well established that the cause of the failure of the Atlantic cable may be considered as set at rest for ever. The insulation of that line was not very perfect, as may be imagined from the infancy of the science at that time, but yet the electrical power used was such as would infallibly break down even the most perfect cables manufactured at the present day. Of this our readers may judge when it is stated that the large induction coils first used in signalling between England and America were probably equal in electrical power to 2,000 battery cells, while now it is found inexpedient to use more than two or three cells in working the longest submarine lines in existence. Some of this great power was no doubt used in the vain hope of forcing signals through the line at a greater speed than the very slow and unremunerative rate at which it has alone been found possible to communicate through an unbroken length of 3,000 miles. The result was disastrous, but the experience, though dearly bought, has proved of great value. It has taught electricians the value of moderating the power used in working lines, and above all has pointed out the imperative necessity of having no single section of a submarine line of more than 600 miles in length. To lay long submarine cables in a continuous length without intermediate stations has been found to answer no other purpose than that of greatly diminishing the speed of working and multiplying every imaginable risk, both of manufacture and submersion. The Indian Government, acting under the counsel of their scientific advisers, have determined to divide the Persian Gulf cable into three sections, though its total length will not exceed 1,500 statute miles.

Literature.

The reading world is so scattered at this present moment that publishers hardly know where to find their readers; and are holding back some good things to a later day. Mr. John Murray is issuing new editions of a valuable series of classical school books. Amidst these are *A Grammar of the Latin Language*, by William Smith, LL.D., the syntax by Theophilus D. Hall, M.A., and an abridged grammar, with the corresponding paragraphs marked. The work embodies in practical form the results of linguistic discoveries, and has a most simple and clear arrangement, the stems and inflexions of Latin words being present in such a way as both to impress the memory and furnish the scholar with a ready key to construction.—*Tropical Fibres*, by E. G. Squires, formerly United States Minister to Nicaragua, is issued by Mr. R. Madden, of Leadenhall street. It is beautifully illustrated by engravings of stems and leaves of plants, the fibres of which may be turned to account, with an explanation of Central American modes of extracting the fibres, and of an improved process suggested by American ingenuity.—*The Improvement of Time: An Essay, with other Literary Remains*, John Foster, the celebrated essayist, appears from the press of Messrs. Jackson, Walford, and Hodder. The volume will well repay perusal for its terse, vigorous, and, in many respects, original presentation of thoughts and sentiments on a subject which concerns every one. Let time be viewed not as abstraction but as the present condition of things momentarily changing, and its value is apparent.—Mr. Alfred W. Bennett's *Bijou Photographic Album*, with its twenty-four illustrations of the Scenery of the Lady of the Lake, photographed by Thomas Ogle, Esq., is one of the gems of a publishing season by no means prolific, and as representing—

"Scenes of dark glens and shaggy wood,
Land of the mountain and the flood,"

is well fitted to adorn the drawing-room table at home and abroad. —An important contribution to Indian history, geography, and finance, appears from the press of Messrs. Sampson Low, Son and Co., entitled *The Progress and Present State of British India*; a Manual for general use based upon Official Documents furnished under the authority of Her Majesty's Secretary of State for India, by Montgomery Martin, Esq. After a succinct sketch of successive invasions of India, and portraying the great Indian dynasties, this work admirably details the progress, in peace and strife, of the East India Company, accompanied by a graphic account of the successive administrations, and of the leading incidents connected with the great mutiny. It is, however, the large amount of practical and reliable information, on population, production, resources, trade, on the industrial enterprises that are being carried out and their prospective results, that will give this work its chief value, and place it in the counting-house of the merchant as well as in the library of the soldier and the scholar. To those who desire to study the real innate sentiments of the people of India at this critical period, the means are here provided, whilst entertaining instruction is afforded as to customs and religious institutions. The direction in which capital may be advantageously extended, and the means by which existing traffic is to be increased or its routes diverted, is made apparent. A very clear financial statement is given of government expenditure and the public debt and of the force and relative positions of European and native troops.—*Famous Stories of the British Navy*, by W. H. Davenport Adams, Esq., is published by James Hogg and Sons. The work is handsomely got up, and handsomely illustrated, and is replete with the stories of enterprise and daring that stud our naval annals, and illustrate racily and effectively the courage and skill of "hearts of oak." The stories introduce not only of famous ships, but famous men, and furnishes striking history of the rise and progress of our navy. It contains an appendix on iron-clad ships. Messrs. Tinsley, Brothers, publish, in very handsome form, *The Public Life of Lord Macaulay*, by the Rev. Frederick Arnold, of Christ Church, Oxford. It is a brilliant rehearsal of political events through a period singularly diversified by changes, with Macaulay in the foreground. Indeed, the number

Digitized by Google

of public occurrences with which this great English historian was involved is remarkable; his views, as here rendered, throw on all these a brilliant stream of light, and a host of political personages come into view. This work is a classic one, and every public man and scholar will find advantage in its perusal. Mr. Arnold would appear to combine that same comprehensiveness of grasp and power of analysis for which Macaulay was so distinguished. *The Life of Our Lord upon Earth, in its Historical, Chronological, and Geographical Relations*, by the Rev. SAMUEL J. ANDREWS, is issued from the press of Messrs. Alexander Strahan, and Co. Without wasting space on various readings, except where affecting an historical statement, this volume gives the latest results of modern criticism and much topographical information. This very efficient arrangement of the successive events in our Lord's life affords the best of opportunities for marking its characteristics and the purposes of our Lord's acts; and this opportunity is ably taken advantage of.—Messrs. Smith and Elder have issued "A Mining Journey Across the Great Andes; with Explorations in the Silver-Mining Districts of the Provinces of San Juan Mendoza, and a Journey across the Pampas to Buenos Ayres," by Major F. RICKARD, with two maps.

DEATH OF FIELD-MARSHAL LORD CLYDE, G.C.B.

After a lingering illness Lord Clyde expired on the 14th inst., at the house of his friend, General Eyre, at Chatham. For more than half a century he had served his country in every quarter of the globe. But his honours came perhaps too late, for he was near 70 when he received them, and three or four years was too brief a period to enjoy the repo e which he had so nobly earned.

Born on the 20th of October, 1792, of humble parents—for his father was a cabinet-maker in Glasgow—he entered the army in 1808, and became a lieutenant in the following year. How great must have been the perseverance, the courage, and the discretion of such a friendless and penniless boy to have raised himself to a peerage and to the Colonelcy of the Coldstream Guards can be known only to those who understand the aristocratic traditions of the British army. It is needless here to recount in detail his numerous services. But it may be interesting to recal the account which Lord Clyde once gave a Committee of the House of Commons of his own life when he appeared to give evidence against the purchase system. "I am now," he said, "in my 63rd year; I entered the army at 15. I was present at the battles of Vimiera and Corunna, and in the expedition to Walcheren; and I came home before I was 16. I served in America in 1814 and 1815. I passed seven years in the West Indies, where I was constantly ill of fever, but I stayed there seven years, thinking it would be considered a merit by sticking to my regiment. In the West Indies I was brigade major part of the time, but sharing in the duties of captain of my regiment. I was afterwards upwards of thirteen years in China and India, and the greater part of the time in command of considerable bodies of troops in the field. I was borne on the rolls of my regiment, the 98th, from 1835 to 1853. I was in actual command of the regiment for nearly ten years, and present with it; but it was only after 25 years that I obtained my lieutenant-colonelcy, even by purchase, and the money for that purpose was only obtained with the greatest difficulty. Whilst still on the rolls of my regiment I served as a Brigadier in China, and subsequently as Brigadier commanding in the garrison of Lahore, before the overthrow of the Sikh Government. Subsequently I commanded a division in the Punjaub campaign, and afterwards a field force on the Peshawur frontier, where we were constantly engaged in war with the tribes inhabiting the mountains which intervene between the valley of the Indus and the open country of Affghanistan." Such were the services of Colin Campbell before the Crimean war, and yet in that war—having been some five-and-forty years in the British army—he was appointed only a brigadier, being still a colonel, and had the honour of serving under those who had but half his years and no service to recommend them. Though he had contributed much to the victory of the Alma—though he had watched day and night the lines of Balaklava—though he had met the onset of the Russian horse with the famous "thin red line," disdaining to throw his men into square—though he had proved himself the ablest officer who was left with the British army after the death of Lord Raglan, he was destined to be passed over by two men, who, however excellent as men of business, or as copious letter writers, were immeasurably his inferiors. Fortunately Sebastopol was taken, and the British army returned to England; and it was not long before the services of Sir Colin Campbell were urgently required.

In 1857 the great Indian mutiny broke out, and the Peninsula was in a conflagration. The system of appointing worn-out officers and men about town who had once been ensigns to command the great armies in India had broken down. A man was required to save India, and within twenty-four hours after receiving his appointment Sir Colin Campbell was on his way to the East; nor did he go alone. He took with him as his chief of the staff that able and accomplished officer Sir William Mansfield, to mature his plans and to issue the orders by which those plans were to be executed. These events are too recent to need recapitulation. Suffice it to say that his plan of operations was completely successful, and he left the rebels subdued and India pacified. Honours were showered upon him. On the 18th of August, 1858, the Scotch cabinet-maker's son was made Lord Clyde; in 1859 he received the thanks of both Houses of Parliament, with a pension of £2,000; in 1860 he was made colonel of the Coldstream Guards; and in 1861 he was nominated a Knight of the Star of India. But it was too late; a life of labour and anxiety had exhausted his strength. The death of Sir James Outram and of Lord Herbert of Lea grievously affected him, and it was evident to those who saw him that his strength was waning. In the spring of the present year he was seized with an alarming attack, from which he never completely recovered. Some weeks ago he suffered a relapse whilst at Chatham, and after a lingering struggle, he has at length succumbed.

As a military officer it cannot be said that Lord Clyde was a great strategist. The operations which he undertook were not such as entitle him to be placed in the same category with Napoleon or Wellington. It may even be doubted whether his military genius would bear comparison with the best officers now engaged in America. But he was thoroughly efficient in every situation in which he was tried. Others might be more daring and ingenious in devising combinations and in planning a campaign. But in the face of the enemy Lord Clyde was in his element. His coolness, prudence, and fertility of resource seemed to be quickened by the presence of the enemy. That roughness of deportment which characterised him on ordinary occasions disappeared with the sound of the first gun; his irritable temperament was soothed, and he became abnormally polite. Amidst the smoke and din of battle his senses acquired a supernatural acuteness—he could interpret the changing signs of the battle and anticipate the movements of the enemy with a faultless precision which was almost miraculous. This strong and cool judgment exercised in the most trying circumstances amounted almost to genius. Such was Colin, Lord Clyde. He is gone; but his name will rank with the great soldiers who fought under Marlborough and Wellington All that now remains is to lay his shattered body side by side with those who repose beneath the shadow of Westminster Abbey or St. Paul's.

THE FUNERAL IN WESTMINSTER ABBEY.

It was intended to bury Lord Clyde in Kensal-green, but this was very properly overruled. The funeral took place on Saturday, the 22nd inst., from the house in Berkeley-square which Lord Clyde had occupied for a short time before his death. His body had been carried there some days before from Government-house at Chatham, and General Eyre had charged himself with the execution of the last sad duties to his beloved friend. The coffin lay in the room which would, had he lived, have been the scene of many a gathering of "war-worn" soldiers and of the few old world kith and kin of war time had left.

Down Piccadilly, St. James's-street, Pall-mall, past Whitehall, down Parliament-street, to the entrance to the Cloisters, the streets were so thronged that the police perforce arrested the stream of public and private vehicles till the procession passed. Many shops half closed doors and shutters in sign of mourning, and the blinds were drawn at the Athenæum, of which Lord Clyde was a member—not at the United Service, of which he was a member also—at the Horse Guards, and at the various mansions along the route. The sentries posted at the public offices of their own accord came to "attention." Groups of soldiers formed at the prominent places; old pensioners, with many clasps, and the brown young soldier, proud of the red and white Indian ribband. In the procession nothing was more marked than the decorous conduct of the people; but the Queen herself from afar had shown she was present in spirit with her subjects, for conspicuous amid the marks of respect was that which was evidenced by the appearance of her Majesty's carriage in deep mourning. The carriages of the Prince of Wales, of the Duke of Cambridge, (both absent from London), of the Duchess of Cambridge, of the Duke of Wellington, and of some of the nobility, were also sent as marks of respect, but the period of the year which brought about the absence of the ministers and of the members of both Houses prevented a vast number of the most distinguished persons in the land paying the last tribute to the memory of the late Field Marshal.

In the first carriage the mourners were—Major-General Eyre, Colonel M'Murdo, Colonel Alison, and the Duke of Wellington.

Second Carriage.—The Rev. Mr. Inglis, Mr. Coningham, Mr. Gledstanes, and Mr. Kerr, his Lordship's executors.

Third Carriage.—Earl de Grey and Ripon, General Forster, the Earl of Longford, and the Marquis of Donegall.

Fourth Carriage.—Lord Gough, General Arbuthnot, Sir Richard Airey, and Lord G. Paulet.

Fifth Carriage.—Lord Rokeby, Sir Alfred Horsford, Earl St. Maur, &c.

Sixth Carriage.—Colonel Shadwell, Sir E. Lugard, Sir R. Walpole, and Major Alison.

Seventh Carriage.—Major-General Coke, Major Dormer, Viscount Dangan, and Major Mansfield.

Eighth Carriage.—Sir R. Hamilton, Colonel Street, Colonel Nepean, Colonel Whimper, and Major Stevenson.

Ninth Carriage.—Colonel Ward, Major Sutherland, and Colonel Balfour.

Tenth Carriage.—Mr. Crawford, Mr. Romaine, Mr. Campbell, and Mr. Russell.

Eleventh Carriage.—Dr. Clutterbuck, the Rev. Mr. Clutterbuck, Dr. Jacobson, and Mr. William Gladstone, jun.

Twelfth Carriage.—The Rev. J. W. Reeve, Mr. J. T. Delane, Mr. Leese, and Mr. Reid.

Thirteenth Carriage.—The Rev. Mr. Carpenter, Dr. Dick, Colonel Taylor, and Colonel Gordon.

Fourteenth Carriage.—Mr. Arbuthnot and other gentlemen

Among these there was, we believe, only one relative, the Rev. Mr. Inglis, but there were many old friends and comrades—the venerable soldier head of Gough, now eighty-four years old, and yet erect, bright, and martial, who more than twenty years ago did justice to the qualities of Colin Campbell in the field; his military secretary, Alison, who lost an arm on his staff at Lucknow; two of his aides, Alison and Dormer; Pakenham, the adjutant-general of Queen's troops at his Indian headquarters: M'Murdo, testifying to Napier's old affection and his own regard, and many another who had seen him in the heat of battle. The road was full of faces which had once looked to his for inspiration or for orders, and in the Abbey the soldiers stood thick, from General George Bell down to the private of the Coldstreams who came in to see the last of his famous colonel. And what tender young eyes, and eyes for once renewing the freshness of the young heart, let fall their tears as the coffin was borne within the sacred walls, and the dark veil which shrouded all that was left of a friend from their gaze passed in all its gloom before them towards the yawning grave which gaped in the midst of all that mournful life. The sobs of women broke through the strains of the music. How many must have loved him! At the entrance to the Abbey Lord Ellenborough, Major-general Beresford, and other gentlemen joined the proces-

Digitized by Google

sion from the Jerusalem Chamber, and the pall-bearers, who were nominated only a few moments before the hearse moved from the house, took their places as follows:—The Duke of Wellington, Major-General Eyre, Earl de Grey and Ripon, General Forster, Sir Richard Airey, Lord Longford, Lord G. Paulet, and Sir Richard Hamilton. The mourners ame after, two and two, and then the body was borne to the screen before the chancel, while the ministers and mourners entered inside, and listened to the service, which was read by Lord John Thynne, the sub-dean; and then the coffin was raised from the trestles, and was borne to the grave in the nave, close to the spot where Outram's body lies. The music of the Church, the best inspiration which was given to Purcell, Croft, and Handel, to clothe in song the thoughts of the soul's immortality, the decay of the body, the glories of Heaven, the weakness of the flesh, floated with surpassing beauty through the aisles and vaulted roof, swelling into the ears even of those who peered down from the high clerestories, and then ashes were given to ashes, dust to dust, and down from the sight of man was lowered the coffin on which glittered the simple words, "Field Marshal Lord Clyde, died 14th of August, 1863, aged 70 years." Need we speak of the tears which flowed afresh over the grave of one of the best and sternest of England's soldiers, who was also the kindest and best of friends.

THE PEACE SOCIETY AND OUR RELATIONS WITH JAPAN.

The following memorial has been transmitted by the Peace Society to Earl Russell, in reference to our relations with Japan. We may, however, console our readers with the assurance that this remonstrance will not have any weight in the Councils of Government.

"My Lord,—We ask permission, as the committee of the Peace Society, respectfully to express to your lordship the deep regret and apprehension with which we have learnt the present menacing state of relations existing between this country and the kingdom of Japan. We cannot but regard it as a most painful and deplorable fact, that the first appearance of our countrymen among remote and heathen nations, instead of being the harbinger of peace and a higher civilisation, is so frequently the prelude to a course of aggression, violence, and blood. It seems clear, on the testimony of those most conversant with the fact, that the treaty of intercourse and commerce on which we ground our right of intervention in Japan, was, in the first instance obtained from the authorities of that country under the coercion of fear, in opposition to the traditional policy of the Government and the strong prejudices of the people. It is too evident, also, that we have failed in observing honourably on our part the stipulations of that treaty. From the first, our countrymen who, for purposes of commerce, entered into Japan in the wake of our diplomatists, have availed themselves of the advantages they thus acquired in a spirit which could not fail to prove both offensive and injurious to the Government and people, thereby confirming the prejudices against foreigners already existing, and most seriously aggravating the difficulties of the Japanese authorities in their attempts to enforce on their own countrymen a fair observance of the conditions of the treaty. It is obvious, moreover, hat our official representatives in that country are quite powerless to restrain the irregularities of such lawless and unscrupulous characters as unhappily too often pioneer and represent British commerce and civilisation in the Eastern seas. If the facts be as above stated, it can hardly be a matter of surprise that an intercourse thrust upon the Japanese against their will, and commenced under such circumstances as we have described, should have led to an early and serious collision. Nor can we hope that a persistent attempt to force our acquaintance upon them at the mouth of the cannon can conduce to their advantage or to our honour as a professedly Christian and civilised nation. On the contrary, all the facts and appearances of the case, as well as our former experience in the East, but too clearly indicate that any further progress in the path of coercion cannot fail to lead to grave and dangerous complications, ending in all probability in a succession of ignoble and costly wars, and the introduction of an era of revolution and anarchy among a people who, previous to our intrusion among them, had enjoyed, according to the testimony of competent witnesses, a large measure of internal order, peace, and prosperity. We earnestly hope, therefore, that your lordship will send such instructions to our representatives in that country as shall save England and Japan from the calamity of such a course; and if intercourse between us and them cannot be conducted in a friendly spirit we venture respectfully to submit whether it would not be better for us to withdraw altogether from their country. It is not likely that commerce can be successfully prosecuted with a reluctant and angry people; and even if it could it would be more honourable for a Christian nation to make some sacrifice of commercial advantage rather than inaugurate among another people what may prove to be a long course of disorder and blood.

"Joseph Pease, President.
"Henry Richard, Secretary."

The Times on this protest says:—"It is probably quite true that our treaty of commerce and intercourse with Japan 'was, in the first instance, obtained from the authorities of that country under the coercion of fear, in opposition to the traditional policy of the Government, and the strong prejudices of the people.' But that is the fault of the Japanese and not of the English. If a nation, or an individual, exists in total disregard of the first rights of his fellow-men, and cannot be brought to act justly by reason, he must be brought to reason by force. Human society exists by the mutual observance of mutual obligations. In the same way a nation like the Chinese or Japanese have no right to shut themselves up from the intercourse of human kind and live in selfish exclusion. It is an act of gross barbarism and inhumanity, and the other members of the human family have a right, and even a duty, to enforce mutual intercourse. No doubt, letting in the light will produce at first all sorts of confusion. A rotten body breaks up at once when exposed to the influences of the sun and atmosphere. But that is the consequence of its rottenness, and not of any defect in the light and air. It is the business of these elements to light up dark places, to draw out the foul corruptions which fester in close corners of the earth. They cannot help it. Do as we will, our commerce, our civilization, and our religion will find their way into countries like Japan and China; and, where they go, we must defend them. Something of this sort could hardly be denied by the most bigoted adherent of the Peace Society. They at least, we presume, would not wish that our merchants and missionaries should immediately desist from all endeavours to introduce our commerce or our civilisation into barbarous countries, and they cannot seriously maintain that our Government should refuse to demand for them the ordinary rights of humanity wherever they go. But if so much is admitted this memorial can only mean that we ought to recoil at the first rebuff, to withdraw at the least symptom of serious opposition, and to give up our rights whenever it seems likely that we hall have any difficulty in maintaining them. We are quite certain such advice will never have any influence with Englishmen. Having, after good advice, and with reasonable cause, determined to maintain the right of intercourse with Japan, we shall certainly carry out our resolution.

Legal.

SEA WAGES.—THE "LEICHARDT."

Captain Thomas Clark, master of the *Leichardt*, appeared before Mr. Woolrych, at the Thames Police Court, to a summons taken out by John Liversedge, who claimed a balance of £35. 2s. 7d. for services as chief mate on a voyage from Liverpool to Japan, China, and back to London.—Mr. Young appeared for the complainant, Mr. Stoddart for the defendant.—The complainant was mate of the vessel, and it was alleged that, through his negligence, the owners had been put to an expense of £9. 10s., which it was sought to deduct from his wages. It appeared that a cargo of planks and timber had been put on board the *Leichardt* at Yokuhama, Japan, and the complainant signed a receipt for 1,980 planks, three in dispute, in reality 1,977, whereas he had only received 1,500. On the mate's receipt the captain gave a bill of lading for 1,977 planks. The goods were consigned to Schmidt and Co., at Shanghai, and only 1,500 planks were delivered. There was an expense of 42 taels incurred at Shanghai for "boatage and coolies," in attending the ship in expectation that the 477 planks deficient would be delivered. They were not in the vessel, and the papers produced only showed that 1,500 had been received. The consignees submitted to a loss of 12 taels, and 30 taels, equal to £9. 10s. English, was charged to the complainant. It was admitted that the mate signed receipts for 1,977 planks before all the cargo came on board at Yokuhama, and that he did so to expedite the sailing of the ship.—Mr. Stoddart said the complainant signed for 1,980, three in dispute respecting that number would be put on board, and he ought to pay for his want of caution and foresight. Mates of ships ought not to sign receipts for what they had not received. The complainant took it for granted 1,980 planks would come on board, and before he received them signed the receipts. He then put in the following documents:—"Commander of ship *Leichardt*.—Please deliver to bearer 1,500 planks, 480 timber. Shanghai, January 30th, 1863." "Charles Lemaire.—Please deliver to Holliday, Wise, and Co., pro Henry Girdlestone."—Mr. Woolrych: That is an order to deliver the goods to the consignees at Shanghai.—Mr. Stoddart: Yes, sir. The next document read as follows:—"Received, ship *Leichardt*, Yokuhama, 150 planks, of these 45 split; 984 small planks; 489, 3 split right up, 12 split 3 feet and more, 25 split 2 feet; 150, 2 much split, 10 split 3 feet, 5 split 2 feet; 204, 8 split three feet, 12 split 2 feet, 3 in dispute; 1,977.—John Liversedge, chief officer."—The complainant said he had to tally in cargo and superintend the loading in the hold as well.—Mr. Young argued that the complainant had not been guilty of any neglect or carelessness.—Mr. Woolrych said the complainant ought to have ascertained the quantity of planks and timber on board previous to his signing, and not have acknowledged the receipt of 1,977 pieces of timber and planks, when there were only 1,500 on board. He must decide in favour of the defendant. The complainant was to blame in acting so rashly as he had done, and must pay the sum charged. The balance claimed must be paid, minus £9. 10s., and without costs.

Naval and Military.

The Odin, 16 gun paddle frigate, Commodore Lord John Hay, C.B., arrived at Spithead on the 21st inst. from India and the Cape of Good Hope, and last from Teneriffe. She brought home a number of invalids and supernumeraries from India and the Cape, who were transferred to the Victory flagship by the Pigmy steam tender. The Odin was commissioned at Portsmouth by Lord John Hay on the 20th of September, 1859, and has been on the China station.

Her Majesty's screw steam-corvette Clio, 22 guns, 1,472 tons, 400-horse power, Capt. Thomas Miller, arrived at Sheerness from the Pacific on the 17th inst., and was inspected by Vice-Admiral Sir George R. Lambert, K.C.B., Commander-in-Chief at Sheerness, and staff. She will be paid out of commission in a few days. The Clio was fitted out at Sheerness in July, 1859, by Capt. Miller, and since that time has been employed on the Pacific station, most of the officers who went out with her still remaining in the ship.

The Lords of the Admiralty have accepted the resignation of Mr. Oliver W. Lang, the master shipbuilder at this dockyard, but have requested him to continue at his post until the completion and launch of the iron frigate Achilles, 1,250-horse power, which will be undocked in about two months from the present time. It is stated that the reason for this sudden step on the part of Mr. Lang is his dissatisfaction at being superseded by the appointment of Mr. J. W. Reed as chief constructor of the navy. Mr. Lang has been in the service a considerable number of years, during which he has superintended the construction of several of the finest ships in the navy.

The Act passed at the close of the late Session for the appointment of navy prize agents will take effect on the 1st of October next. Each of Her Majesty's ships and vessels of war is at all times, after the commence-

Digitized by Google

ment of the Act, to have an agent, who is to have a place of business within five miles of the London General Post office, and is to represent the ship, officers, and crew. Such agent is to be nominated by the captain, but no person holding office under the Crown to be appointed to act as agent. The appointment is to be registered in the Court of Admiralty, and the agent is empowered to take all proceedings on the part of the ship and the crew. The agent is to be paid on a prize bounty 2½ per cent. When the distribution of prize money is delayed, the same is to be invested in the funds. The new Act is not to extend to seizures made by officers of the Customs.

Captain Tatham, of Her Majesty's ship Phaeton, is on his way to England, and is to be succeeded in command of this fine frigate by Captain George Le Geyt Bowyear, lately of Her Majesty's ship Sans Pareil.

The pension for distinguished or meritorious service, vacant by the appointment of Lord William Paulet to the colonelcy of the 87th Fusiliers, will be bestowed on Colonel Thomas Williams, C.B., of the 4th Regiment. Colonel Williams has been just forty-one years on full pay, a great portion of which was on colonial service, and he commanded the 4th Regiment in the Crimea.

Monetary and Commercial.

CITY, THURSDAY, AUG. 27.

The directors of the Agra and United Service Bank (Limited) have declared the usual interim dividend of £2. 10s. per share for the half-year ended the 30th of June.

The biddings for 30,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were —to Calcutta, 16,80,000 rupees; to Bombay, 12,00,000 rupees; to Madras, 2,00,000 rupees. The declared minimum price was, as before, viz., 1s. 11½d. per rupee on Calcutta, and 1s. 11⅞d. on Bombay and Madras. The applications within the limits amounted to 254 lacs. Tenders on Calcutta above the minimum will receive in full; to those at the minimum there will be no allotment; on Bombay at minimum, about 16 per cent., and on Madras about 80 per cent. will be allotted.

The half-yearly report of the Southampton Dock Company, presented at the meeting of the 26th inst., shows an available total of 9,373, out of which it is recommended that a dividend be declared of 2 per cent. for the half year, amounting to £7,207, leaving £2,166 to be carried forward.

The French Government shows a great desire to extend commerce in the East, having caused a circular to be issued to the different Chambers of Commerce pointing out the field that exists in China for increased trading operations.

It appears that the statutes of the proposed *Societe Generale*, which is to embrace most of the leading financial interests in France not connected with the Crédit Mobilier, have been finally approved by the Council of State, and that the formal ratification will take place when the Council meet in October, after the vacation. The *Societe Generale* is to be in alliance with the General Credit Company of London, with a capital of £5,000,000, in 250,000 shares of £20, of which £8 per share, or £2,000,000, is to be paid up at once; and applications are said to have been already received for 800,000 shares, although no prospectus has been published.

A return has been published of all alterations made by foreign Governments in their tariffs during the past year. From this it appears that Russia has made a reduction in her rates upon agricultural implements and certain cotton manufactures; Sweden has made a reduction in the duty on brandies; Hamburg has removed the duties on slates and cement; Holland has made extensive changes in her entire system, nearly the whole of which consist of important reductions. Some classes of iron goods and of textile manufactures, including woollen and hosiery, constitute exceptions, the rates on these having been augmented. Belgium also has lowered many of her rates, but raised them on various articles of clothing and woollen manufactures. France has advanced her rates on sugars, and removed those on raw silk, bones, and parchment, and lowered those on some kinds of fish, various chemicals, and other minor articles. Portugal has made reductions of some kinds of glass, earthenware, arms, paper, candles, and cottons. Greece has made a reduction of 25 per cent. on a numerous list of articles. Turkey has made a large reduction in her export duties, but the new rate of 8 per cent. *ad valorem* on imports is in general an increase on the previous rates. The United States figure on the retrograde side, an enormous augmentation of duty being shown on almost every article of importance. Venezuela has removed her import duty on machinery for the cultivation of cotton, and reduced her export duty on cotton. New Granada has made several changes, mostly reductions.

JOINT-STOCK BANKS.

The following is a statement of the various joint-stock banks which have been registered during the past six months. Those marked * have not commenced, and are not likely to commence, business. No. 2,656, the Imperial Bank of China, is still in progress of formation, and it is expected will be shortly announced to the public.—

Registration Number	Bank	Nominal Capital.
2,338	London and Paris Bank*	£2,000
2,339	Midland Counties Union Bank*	2,000
2,343	English and Irish Bank	2,000,000
2,350	London and Midland Counties Banking Company*	2,000
2,352	British and American Exchange Banking Corporation	1,000,000
2,353	London, Birmingham, and South Staffordshire Bank	1,000,000
2,356	Continental Bank*	2,000
2,365	Midland Banking Company	1,000,000
2,372	Bank of Westminster	1,000,000

ARTICLES OF EXPORT.

TEA.—The tea market continues very dull, though the arrival of the *Bahama* with new Congous has somewhat enlivened it. Samples were put on the market on the 20th inst., and about 2,000 packages were sold, the first day at prices ranging from 2s. 6d. to 3s. per lb., the latter price being obtained for 500 boxes; since then about 1,000 packages have bee sold at from 2s. upwards. The dealers being very reluctant buyers at th

Digitized by Google

opening rates considerably lower prices may be expected for future arrivals. Low and dusty kinds of Congou are without demand, and former quotations are scarcely supported. Good Common without change. Fair to good Sinchune Kai and fair Kaisows are in limited demand and prices supported. For the fair qualities of blackish leaf teas there is no demand, and prices are rather in favour of the buyer. Finer sorts are without alteration; some considerable parcels were sold at public sale, without reserve, and realised previous quotations. The export from London for the week ending the 13th was nearly 500,000 lbs., of which about a half was for Russia. Tayshans are without change. For Oobongs and Flowery Pekoes there is no demand. Fair to good Scented Capers are saleable in limited quantities at previous prices; fine qualities without demand. Scented Orange Pekoes are neglected, and prices scarcely supported. Uncoloured Japan is in limited demand for export at previous quotations. Green teas are without material change. For the Moyune kinds there is some demand, but for the Fychow and Ping Sucy kinds there is no inquiry. Canton kinds without change. The public sales comprised 23,889 packages, of which 14,487 packages were sold, 14,439 packages being without reserve.

Silk.—A notice will be found in our latest.

Sugar.—The demand from the home trade has been more general since our last advice, and united with some inquiry for export, the market has had a rather active appearance, operations of good amount having taken place on the spot, at prices now mostly showing an advance of 6d. per cwt. Foreign descriptions landed have also been more in request, and holders keeping the market but barely supplied, business has been done at a similar improvement to that established for colonial sorts; 10,500 bags Clayed Manila at 31s. to 32s., a few common, 30s. 6d., 800 casks; also 25,000 bags Clayed Manila at 32s. 6d. Our quotation for Siam and China, white, is 22s. 6d. to 26s.; brown and yellow, is 14s. 6d. to 22s.; Manila, Clayed, brown and yellow, is 18s. to 19s. 6d.; Muscovade, is 15s. 6d. to 16s.

Coffee.—The colonial market has been freely supplied with Ceylon out of the late arrivals, and importers showing a disposition to realise, a further decline of 6d. to 1s. per cwt. has mostly been accepted, at which, however, the greater part on offer has been freely taken. Ceylon: Extensive public sales of Plantation have been held, amounting to 1,550 casks, 1,060 barrels and bags, which were chiefly disposed of at the reduction above noted, viz., fine ordinary to low middling 79s. to 83s., middling to good middling 84s. to 88s. 94 casks, 2,945 bags Native were also brought to auction, for which relatively stiff rates were required, but the chief portion was sold, small 69s. to 69s. 6d., good ordinary 79s. to 71s., superior 72s. to 73s. 6d. Some business has also been done privately in Ceylon on proportionate terms to those current at public sale. Mocha and East India: Scarcely anything has been offered by auction, and no sales of moment are reported by private contract.

Rice.—Little inclination to purchase is shown, though previous rates.—Privately, about 12,000 bags have been sold; common Ballam, 8s. 3d. to 8s. 6d.; fair, 9s.; and Moonghy, 9s. 3d.; also a floating cargo of 1,560 tons Rangoon, at 9s. 9d., open charter. The parcels offered by auction have been more numerous—viz., 6,069 bags Ballam, of which about half has been taken at and since—common, 8s. 3d. to 8s. 6d.; of 7,480 bags new Nakrenzie, only a small part was sold, fair quality at 10s. 3d.; 4,050 bags old were bought in; as were also 3,300 bags ordinary Bassein, a few selling afterwards at 7s. 10d.

Spices.—Pepper: At public sale, 868 bags fair black Singapore were taken off at 3¾d.; damaged, 3½d. to 3¾d.; but 1,613 bags Penang being held for some advance, were withdrawn. Privately, about 500 bags of the latter description have realised 3⅞d. cash. White: About 400 bags have been sold this week, principally Singapore, at 5¾d. Pimento: Nothing has been brought to auction, and few sales have occurred by private contract. Coves: 14 cases good Penang were sold at a little below 1s. 4d. per lb. Mace: Has been inquired for, and small quantities have been taken privately at firm prices. Cassia Lignea: Is less freely offered, and for 100 boxes fair quality, 90s. has been paid.

Cotton.—The demand has again been active, and large sales have been effected at an advance of ⅛d. to ¼d. per lb., viz., 670 bales Surat, middling fair Compta to fair Oomrawatty 16⅜d. to 18⅛d., fully fair Dhollera and fully fair Henghenghat 18¾d. to 19⅛d.; 3,580 bales middling to good fair Tinnevelli Madras at 16¼d. to 18d., 960 bales ordinary to fully fair Western 17¼d. to 18⅜d.; 1,070 bales fully fair to good fair Salem 17¼d. to 18d.; 700 bales middling to good fair Bengal 12d. to 14d., and 130 bales Kurrachee 12¼d. to 13d. For arrival, 8,600 bales have been sold on corresponding terms.

Hemp.—In Manila, the market has again been active, large business done, and prices more than maintained: latterly it has become more quiet. Of 3,045 bales at auction about half sold at £27 to £29. 10s. per ton for fair roping to good Sorsogon; Sunn is firm: 145 bales Calcutta Sunn at auction, sold at £30 to £30. 5s. per ton, 122 bales Kurrachee at £29. 5s., and 180 bales Bombay all retired.

Tin.—Rates have continued to give way since our last, and show a decline in Straits of £3 to £4 per ton at the close; business on the spot and for arrival very moderate. Our quotation is for Banca, £123 to £124 per ton; for Straits, £117 to £119 per ton

Sago.—A fair business has been done at full prices; small Pearl, 21s. 6d. to 22s., large, 19s.

Sago Flour.—About 600 bags have been sold at 14s. to 14s. 6d., being full rates.

Japan Wax.—Rather cheaper. At auction, 680 boxes part sold as follows:—Good block, 61s. to 61s. 6d. per cwt.

Miscellaneous.—Rum: More quietness has latterly been apparent; transactions limited. Aloes: Socotrine and Hapetic, £3 to £15 per cwt. Cardamoms, flat; 2s. to 4s. 6d. per lb. Castor Oil, firm; and 879 cases at auction mostly sold at 4½d. to 5¾d. per lb. for straw to fine second quality. Galls: we quote Japan and China 42s. to 65s. per cwt.; 37 cases of the latter at auction retired at 65s. Elephant's Teeth: 70 lbs. and upwards, £33 to £39 per cwt.; 40 to 60 lbs., £31 to £38; 20 to 40 lbs., £27 to £34; Scrivelloes, £12 to £33; Ball Scrivelloes, cut, £43 to £54; ditto uncut, £28 to £43; hollows, £13 to £30; points and tips, £14 to £34. Sea Horse: 4 lbs. and upwards 7s. to 13s. per lb.; 3 lbs., 4s. to 7s.; 1 to 2 lbs., 1s. to 3

Tortoise Shell: Nothing doing; 6s. to 20s. per lb. Cowries: No improvement. Nux Vomica: Firm at 10s. to 14s. per cwt., but no business. Safflower: 2s. 6d. to 5s. per cwt. dearer, and 178 bales sold at auction at £3. 10s. to £5. 10s. per cwt. for ordinary to middling. Camphor: This drug has been in more request, and about 300 chests China sold at £6. 10s. to £6. 15s. per cwt. Cassia Lignea: Has brought fully former terms; 277 cases at auction sold at 80s. to 87s. per cwt. for low third to good second pile, and rather more money obtained in private treaty. Cubebs: £5. 5s. to £5. 15s. per cwt. Gum Benjamin: Quiet at previous quotations. Gutta Percha: 1s. 4d. to 2s. 6d. per lb. Good and fine qualities continue very scarce, and in much request, and inquiry is in fact very general for all descriptions. India Rubber: Held firmly at 1s. 3d. to 1s. 6½d. Dragons' Blood, in reeds, £10 to £14 per cwt.; in lumps, £4 to £11 per cwt.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

	Gold.	Silver
Shanghai	—	£167,031

Hong Kong	—	92,785
Amoy	—	—
Singapore	—	52,850
Penang	—	2,000
Ceylon	—	—

FROM MARSEILLES.

(By the P. and O. Company's Steamers.)

	Gold.	Silver
Shanghai	—	£64,478
Hong Kong	—	26,000
Singapore	—	—
Penang	—	—
Foo-Chow-Foo	—	—
Ceylon	£1,500	—

PER FRENCH MAIL STEAMERS SINCE 30th JUNE.

	Gold.	Silver.
To Singapore	—	£44,950
To Saigon	—	3,410
To Hong Kong	—	103,020
To Shanghai	—	30,276

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9
Spanish Doubloons	3 16 3 to 3 17 0
United States Gold Coin	3 16 2½
Silver in Bars	0 5 1⅛
Mexican Dollars	0 5 3½

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.: nail rod, £7. 5s. to £7. 10s.; hoops, £8. 5s. to £8. 15s.; sheets, single, £9. 5s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 15s. to £6s.

Steel.—Swedish keg, £16 to £16. 5s.

Copper.—Sheet and Sheathing, £102 per ton; yellow metal, 8½d. to 9d. per lb.

Tin.—118s. for block; 116s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to £29s. 6d. per box.

Lead, &c.—English pig, £20. 2s. 6d. to £20. 10s.; shot, patent, £23. 10s., sheet, £21; spelter, £18. 2s. 6d. to £18. 5s.; zinc, English sheet £23; quicksilver, £7 per bottle.

The following is from the circular of Messrs. French and Smith:—

Iron.—Since our last circular of 4th inst. Iron has maintained its price for all descriptions of manufactured. Scotch Pig is also steady.

Copper.—Is quiet; the last Swansea sale of ores, the 11th inst., was about 1 per cent lower than the preceding one, 28th ult. Foreign Copper is dull. Burra, £98 and £99. Kapunda, £100, nominally. Spanish, £90.

Tin.—The demand for English was good until the smelters reduced the price, 10th inst., since which the trade has been dull. Foreign, which was improving the latter part of last week, has suffered by the fall in English, and is 3s. per cwt. cheaper. The advices from the Straits report a renewed demand for China and Japan.

Tin Plates.—Are active, especially Coke.

Lead.—Without alteration.

Spelter.—Quiet.

MANCHESTER MARKETS.

The aggregate business in both yarn and cloth has been very large. The caution and timidity of merchants for upwards of twelve months, under conditions of trade quite new to them, seems to have allowed stocks gradually to dwindle down in all parts of the world till a reaction is at last forced upon the market. In India, Egypt, Turkey, Brazil, and other cotton-growing countries, the war in America has stimulated cultivators to extra exertion, not only by extra demand, but by an advance in prices nearly three-fold. It is but natural that when millions sterling are going out to purchase cotton, in excess of what has been spent before, a considerable portion of it should come back. The largest supply of cotton at present is from India, and the consequence is that India just now is the best foreign market for Manchester goods. A large portion of the business now doing is for India; but this week there is an increase for all countries, and especially to all cotton-producing countries. A good harvest and good trade (cotton manufacturing excepted) is also producing a fair home demand. The result is that yarns have advanced ½d. per lb. during the week (in some cases 1d. per lb.), and India 40-inch shirtings 3d., and wider goods 6d. per piece. Other goods have also advanced in nearly the same proportions. For the time there is an insufficiency of goods to supply the demand, which will lead to the starting of mills now idle. The demand of the moment is, perhaps, almost equal to that when trade was at full swing, but it is regarded as likely to be only of temporary duration.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safes and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

HOLLOWAY'S PILLS.—When formidable fevers and other contagious complaints are prevalent Holloway's purifying Pills are the best correctives of the system, and the surest cleansers of the blood. No one should permit any disordered action to continue when it can be so easily rectified by these Pills; even one day's delay may bring bitter cause to rue that slight neglect. There can arise no danger from taking Holloway's medicine, and no difficulty can occur in administering it to the young and delicate; clear and definite instructions envelope each box. To feel that the body is out of order is sufficient warranty for taking these Pills, which will prevent or arrest disease, even where doubtful, obscure, or complicated.

H. PEAT,

SADDLER AND HARNESS MAKER, 14, Old Bond-street. Removed from 167, Piccadilly, London.

TUPPER AND COMPANY

MANUFACTURERS OF PATENT GALVANISED IRON, in Sheets, Tiles, Iron Roofs Sheds, Cisterns, Pails, Gutters, Wire for Fencing, &c.

JEAN MARIA FARINA Cologne; London 2, Salters'-hall-court, and 16, St. Swithin's-lane E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond—Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. Sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

IMPORTANT
TO PERSONS RESIDING IN HOT CLIMATES.

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER

is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corrode or get out of order, and can be worked by the most ignorant servant. The Freezing Salts employed are indigenous to the Indian Empire, easily and cheaply obtained. A *bonâ fide* Receipt for procuring them given with each Machine. It is not too much to say that the "Piston" Freezing Machine will rapidly become indispensable to all European residents in India.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers):

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wine Coolers can be fitted with BLOCK ICE MOULDS, at 30s. for each Mould so fitted.

CORSAIR'S BRIDE, A 1, 13 years, and continued now in London A 1, 4 years; loading in the West India Export Docks.

ECLIPSE, A 1, 13 years; loading in the St. Katharine's Docks.

For freight or passage apply to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street.

With quick Despatch.—Having a large portion of her Cargo engaged.

FOR SHANGHAI, the well known China clipper MERSE, A 1 thirteen years (belonging to Messrs. John Willis and Son), 628 tons register, F. M. MOORE, Commander, loading in the East India Docks. This ship has excellent accommodation for passengers.

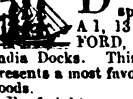
ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

With quick despatch—Having a large portion of her cargo engaged.

FOR HONG HONG and WHAMPOA, the well-known clipper ship JOHN BANFIELD, A 1 thirteen years; 528 tons register; GEORGE SHERRIS, Commander; loading in the London Docks. This ship has excellent accommodation for passengers.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

With immediate despatch.



DIRECT FOR SHANGHAI, the splendid China Clipper, UNRIVALLED, A 1, 13 years, 812 tons register, W. CRAWFORD, Commander, Loading in the East India Docks. This magnificent Vessel, built in 1860, presents a most favourable opportunity for shippers of fine goods.

For freight or passage, apply to RAYDEN and REID, 12, King William-street; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

To follow the CORSAIR'S BRIDE. With despatch.

FOR COLOMBO Direct, the regular trader ECLIPSE, A 1 twelve years, 404 tons per register, JOSIAH HARRIS, Commander, loading in the St. Katharine's Docks. This fast-sailing clipper-barque is admirably adapted for the Colombo trade, in which she is well known. Has excellent accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; or ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

Last Shipping Day—31st August.

FOR SHANGHAI Direct, the well-known river-built clipper ship LAUDERDALE, A 1 thirteen years; belonging to Messrs. John Willis and Son, 851 tons register: C. W. H. HUTCHINS, Commander, West India Docks. This ship has very superior accommodation for passengers.

For Freight or Passage, apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

With quick dispatch.—Having a large portion of her Cargo engaged.

FOR SINGAPORE Direct, the fine clipper barque AVONDALE, A 1 nine years, 308 tons register, J. WYLIE, Commander, West India Docks. This ship has good accommodation for passengers.

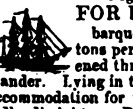
For Freight or Passage apply to G. G. RUSSELL, 27, Leadenhall-street; or to KILLICK, MARTIN and Co., 29, Nicholas-lane; Lombard-street, E.C.

Regular line of packet ship.

FOR HONG KONG AND WHAMPOA, the fast-sailing British ship, ISABELLA, A 1, 10 years. 733 tons register. newly metalled, R. K. MARTIN, Commander, to load in the West India Docks. Has superior accommodation for passengers.

For Freight or passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular line of Packets.



FOR BATAVIA, the fine fast-sailing barque WEST, A 1, thirteen years, 409 tons per register, coppered and copper fastened throughout, W. H. HAWKINS, commander. Lying in the St. Katharine Dock; has superior accommodation for passengers.

For Freight or Passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGEL, WOOLLETT and Co., 1, Lime-street-square.

To follow the LAUDERDALE.

FOR SHANGHAI, direct. The well-known China clipper ship ALBUERA, A 1 thirteen years. Belonging to Messrs. John Willis and Son, 774 tons register, J. LEVACK, Commander, West India Docks. This ship has very superior accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

With immediate despatch.—To follow the Gwalior.

FOR SINGAPORE and AKYAB, the splendid Havre clipper ship CONSTANTIN, 3-3rds, A 1, and coppered; 519 tons register; JENS AMUNDSEN, Commander; loading in the West India Docks. Has superior accommodation for passengers.

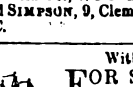
For Freight or Passage apply to DOUGLAS and MILLS, 23, Billiter-street, E.C.; or to ANDREW WRIGHT and Co., 19, St. Helen's place, Bishopsgate street, E.C.

To follow the "Eclipse," with despatch.

FOR COLOMBO Direct, the regular trader AVERY, A 1 twelve years; 380 tons, newly coppered, JOHN GRACE, Commander; loading in the St. Katherine's Docks. This fast-sailing clipper barque is admirably adapted for the Colombo trade, in which she is well known. Has excellent accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

With quick despatch.



FOR SINGAPORE DIRECT, the splendid clipper ELEANOR A 1, thirteen years, 433 tons register, J. SILK, Commander, West India Docks. This well-known and favourite high-class vessel is strongly recommended to shippers requiring despatch.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to STUART and SIMPSON, 9, Clement's lane; or to ROBERTSON and Co., 5, Newman's court, Cornhil, E.C., London.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Per P. and O. steamer, 4th November, from Southampton.—To Singapore: Mr. and Mrs. Shaw, Mr. and Mrs. C. W. Hatch.—From Marseilles, 12th Nov.—To Hong Kong: Mr. Young, Mr. A. Campbell.

Per P. and O. steamer, 28th Nov., from Marseilles.—To Singapore: Messrs. C. R. Rigg and J. Fraser.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Latest advices are to July 13. The *Japan Herald* of the 4th and a slip of the 11th July have reached us. The *Commercial News* will, we presume, come on *via* Southampton as usual. There is no decisive news as to the aspect of future relations. The Micado persists in his injunctions to the Tycoon's government to drive all foreigners out of Japan, the impression sought to be conveyed being that no security short of foreign retirement can be given against the frequent recurrence of outrages similar to those for which the indemnity was demanded. The ample and full apology—an important part of the reparation required by the British Government from that of the Tycoon, for permitting the attack upon the Tokaido—had led to the proposal of two different forms of apology, neither of which was satisfactory to H.B.M.'s Charge d'Affaires; one of a more sufficient character was tendered, and considered by him as acceptable.

Two British steamers, the *Elgin* and *Rajah*, had been chartered by the Japanese Government for the purpose of conveying some members of the Gorogio, or, as another story has it, a large number of troops to Osaka, for the purpose of making a demonstration, to the end of persuading the permitted return of the Tycoon to Yedo, some supposing that he is held in durance vile. We find it difficult to reconcile this latter idea to a fact of which our inquiries have assured us, namely that the Tycoon, accompanied by E. Takura Suoo no Kami and Midzono Idzumi no Kami, two of the Gorogio, has lately been enjoying sundry trips in the Inland sea in his new steamer the *Jinkee*. If there be any restraint upon him by the Mikado's Government, therefore, it can only be one of parole, which such demonstration could scarcely effect, unless, indeed, there should be any little arrangement for an appearance of coercion. But even this is unlikely, for though much on the surface indicates continued internal troubles, it does not seem to us that they have so nearly approached a crisis as to warrant the belief that such an extreme measure, if necessary for their ends, would be as yet ventured upon. The great probability appeared to be that the Japanese Government meant to show the steamers there and pretend to have purchased them, thereby accounting for the indemnity money; should this be true, it is really a pitiful plight to have brought the nobles to, and one that should make us direct our influence, moral and physical, to opening the eyes of the Mikado and the anti-foreign party to the true state of matters.

We have no direct evidence that the Mikado has been made aware of the various events which have recently transpired, and of the true causes which led to them. It is worthy of note, however, that the Mikado's authority has not been in any way alluded to on our part in the late negotiations; it is only upon the Tycoon's Government that we have made demands, and though that official makes frequent reference to the Mikado, we have had nothing to say concerning the latter. Business

Digitized by Google

and the wonted amount of comfort and sense of security were rapidly springing up, and but for the fleet still in the harbour and an additional sprinkling of naval and military uniforms in the streets, there was but little to indicate that so momentous a cloud was but just passing over Japan. Japanese officials had endeavoured to convey the impression to foreign residents, as rendering the sense of their position more insecure, that a civil war had broken out, and that the Tycoon was hemmed in by the troops of the Mikado at Osaka.

Although the most important part of the reparation had yet to be accomplished, it was undeniable that the most important step had been attained towards that result. This "peculiar people," shrewd and observant as they are, have learnt that our Envoy will not in the end be trifled with, but will with the utmost firmness and resolution carry out the instructions he has received to obtain reparation for the murders and assaults upon British subjects. Colonel Neale has already made known to the Tycoon's Government that there is an important difference between open hostilities, or. in other words, war, as declared between nations, and the adoption of such enforced measures of coercion as are necessary to insure acquiescence to moderate demands, should they be refused or attempted to be evaded.

The public places in Yedo, bridge, gate-stations, &c., are constantly found posted over with addresses, canards, &c., of the most inflammatory character. The number of Government guards or watch is nearly trebled, but all is inefficient for the maintenance of the accustomed order, the swords of the disaffected and turbulent men, principally Ronins, being in constant exercise.

An impression to some extent existed, that in consequence of the representations of our Envoy, and the proceedings attendant on the enforcement of our demands, the new Port of Osaka would be opened in about three months.

In respect to trade, which was necessarily unsettled, much evidently depended on the vigorous enforcement of our claims, not only for the execution of the murderers of Mr. Richardson, and for the destruction of the Legation buildings at the Gotenyama near Yedo, which have yet to be atoned for, but for the carrying out of the full terms of our last treaty; and cancelling the agreement for delay in respect to further commercial facilities.

NAGASAKI.

The foreign residents have been kept in a state of excitement, but no really hostile demonstration on the part of the Japanese had taken place.

Mr. Morrison, H. B. M. Consul at Nagasaki, has gone to Yokohama to personally request Col. Neale to give him a guard; as a conspiracy for his assassination had been detected.

H.N.M. *Medusa* had been fired on while passing through the inland sea, near Simonasaki, in the territory of the Prince of Chosew, by the same forts which assailed the French vessel *Kienchung*; that she had engaged and silenced them, and sunk a Japanese brig supposed to be the *Laurick*. Such, at least, was the report that had been received in an authentic form, but was universally current among the native population, and believed by the foreign community to be reliable. It was not known whether the Prince of Chosew, who commands the forts, acted on his own responsibility, or under orders from the Mikado.

H. I. F. M. steam despatch vessel *Kienchung*, when anchored near Simonosaki (at, or about, the same place where the American steamer *Pembroke* was attacked) fire was opened upon her from a brig, a barque, and the forts on the northern shore. A boat was being lowered to inquire the cause of the attack, but was smashed before it could be launched. The steamer then slipped her anchor and made the best of her way through the strait. She has received considerable damage in her hull, and although the shot were described as crossing her in great numbers, and even shells being used, fortunately no lives were lost. The forts on the southern side did not participate in the attack, or the vessel must inevitably have been sunk.

CHINA.

PEKING.

Dates from the capital are to the 11th July, when everything was quiet. The periodical rains had set in rather late, but no epidemic prevailed.

TIEN-TSIN.

During the latter part of June, and beginning of July, scarcely any business was done in manufactures, owing to the want of any demand whatsoever. The country round is perfectly quiet, and no apprehension is felt as to any further attack by the rebellious tribes of Shan-shi. A good deal of rain has fallen lately which has greatly improved the crops of millet and maize, and we may look for an abundant harvest.

The Danish Minister, Col. Raasloff, is expected at Tien-tsin in a few days to proceed to Europe. It is said Mr. Secretary Wade also proceeds to England on leave of absence.

The foreign merchants continue building godowns and dwelling houses in the British Settlement, preparing the place for furniture, residence, and business. It will yet be some time before the offices are removed from the suburb to the settlement, which is at least two and a-half miles from where the Chinese dealers reside and have their places of business.

NEWCHWANG.

From Yang-tse (Newchwang) the latest advices give the vessels in port:—*Moldavian*, Br. bk.; *Argus*, Ham. bg.; *Emilie*, Dan. bk.; *Johanna*, Ham. bg.; *Confucius*, Brem. bg.; *Chin-Chin*, Ham. sch.; *Emma*, Old. sch.

Quotations were:—Grey Shirtings, 6½ catties, taels 3.2; Drills, taels 5; Iron, 1.7; Opium, 5.85; Bean Cake, per 10 pieces, 2.8.7; Rice, 8 per shih.; Peas, 2.7 per shih.; Oil, 3.5.

SHANGHAI.

The London mails of the 26th May arrived here on July 11.

The British clipper *Weymouth* made the passage from London in ninety-nine days.

The following is from the *Friend of China* on the death of Mr. Henry Tudor Davies:—"The news of Mr. Tudor Davies's death, when it reaches literary and legal ranks in England, will be generally lamented; a work of his, on the Practice of County Courts, having brought him under notice at Downing-street, and procured him the appointment of Chief Magistrate of Police, with a seat in the Legislative Council at Hong Kong. He was known among journalists also, as for some time on the *Daily News*. Disgusted alike with the ways of his chief, Sir John Bowring—and the notorious corruption of his next superior, Bridges, Mr. Davies resigned his office, and accepted an appointment in the Shanghai Customs; and, as we remarked at the time, never was an apprentice to a business he knew nothing of so well paid. Taken all in all, the Customs service of China has never had a more faithful servant than the gentleman whose loss we now deplore. Mr. Davies's death, it is feared, was produced by over anxiety on account of Mrs. Davies, whose accouchement took place but an hour or two before he was a corpse."

The following is in reference to the cholera raging at Shanghai:—"Last night we were awoke by a party from Woosung-road to ask if we had any cholera mixture in the house, for our neighbour, Dr. Boone, was out. We had none, but were able to give a few drops of Dr. J. Collis Browne's Chlorodyne, labelled as an infallible remedy in consumption, asthma, bronchitis, croup, fever, neuralgia, diarrhœa, cholera, &c. Dose.—Ten to thirty drops in a little water, repeated every three or four hours, till relief. On inquiry this morning we find that the party to whom the doses were administered is better—he felt instant relief!"

YANG-TSZE REGULATIONS.

The *North China Herald* publishes the despatch from H.I.H. the Prince of Kung, to H. E. Anson Burlinghame, U. S. A. Minister to China. We have in it a proof that the Chinese are compelled to follow in the march of improvement, and gradually rescind those obstructive regulations which have hitherto hampered our commercial relations. The time allowed (three months) for re-exportation was altogether too limited to admit of full advantage being taken of the markets. Now, however, that merchandise can be re-entered at another port after any lapse of time, not exceeding one year from the date of first shipment, the merchant will have no cause for complaint. These concessions, whether wrung from the Chinese authorities or obtained voluntarily, indicate a tendency to advance, which speaks well for the future prospects of the country.

His Imperial Highness Prince Kung, Chief Secretary of the Chinese Government for Foreign Affairs, herewith replies:—

"I have the honour to acknowledge a communication from your Excellency, in which you show that the drawback certificates for half duty on goods stored for re-export should be limited to three months,—a period much too short—but ought to be extended to a full year.

"It appears that the merchants who bring native produce down the Yang-tsze-kiang to Shanghai, pay full tariff export duty when it leaves its original port, and half duty when it is re-exported to another port. Such produce being duly reported to the customs, when the merchant wishes to send it out of port, he pays the half duty; and if it is within three months, he can re-enter it at another port on presentation of the drawback certificate, which is received as valid for the duty.

"Now, since that in the despatch under reply, your Excellency observes that the time of three months allowed in the drawback certificates during

Digitized by Google

which this produce must be re-exported, must be regarded as much too short; I have extended the limit to a year. Therefore after this date, whenever produce brought down the Yang-tse to Shanghai has been reported to the customs for re-exportation at any time within a year, they shall, on ascertaining that the goods are in their original packages, neither broken open nor abstracted from, and their number and weight correct, and all particulars tally with the original report, grant a drawback certificate for half duty to be substituted for the former certificate, and delivered to the holder of the goods as evidence of the duty having been paid.

"I shall inform the superintendent of commerce respecting this regulation, and instruct him to send orders to the Customs' officers for them to act accordingly; and I now likewise send this reply to your Excellency, requesting that you will inform yourself upon the whole subject.

"To his Excellency Anson Burlinghame, &c., &c., &c."

By notifications issued by the English and Russian Consuls, it appears that the same extension has been granted to English and Russian merchants. There is little doubt but that all the Treaty Powers will eventually participate in the privilege.

A meeting of the Chamber of Commerce was held on the 15th July. Edward Webb, Esq., in the chair, who said, in reference to the charges made against merchants by Mr. Lay in the Blue-book:—"I cannot leave without referring to a most extraordinary document which appeared in the late Blue-books, viz. a Memorandum by Mr. Lay, Chinese Inspector of Customs, on the complaints of the Shanghai and Hong Kong Chamber of Commerce. This Memorandum would be of no importance did it not acquire it from the fact that, as above stated, our own authorities will not interfere with the action of the Chinese Customs except diplomatically, and we learn from this what justice to expect from an establishment ruled by one who can thus write. Not confining himself to facts and arguments, he exhibits the most virulent animosity to those who presume to doubt the absolute perfection of the Chinese Customs, and to support his own views in opposition to those of the Memorialists, he does not hesitate to distort occurrences and statements with an equal disregard of truth and courtesy; for example, in the 'instances of smuggling' which he quotes, he brings forward several cases of dispute between the foreign Customs and the merchants as to the powers of the former, which occurred on its first establishment; most of which were not acts of smuggling at all in the ordinary acceptation of the term, but disputes openly carried on. He omits to say that some of these cases were decided by Consular Court against the Customs,* but drags them all forward in order to blacken the reputation of the foreign merchants. Again, to meet the protest of the Hong Kong Chamber against employing 'lawless foreigners' in the Customs, which epithet, as is manifest from the context, applies to the men in the armed cruisers in the Canton river, Mr. Lay gives a list of the commissioners at each port, and professes to believe that they were referred to. The allegation that in 1854, a leading British and a leading American firm were in partnership with the Chinese superintendent of Customs, had no better foundation than Mr. Lay's fancy. However, this document was not addressed to this Chamber, and it is needless for me to go through the tissue of inaccuracies contained in it. I have only referred to one or two points to show its *animus*, and this is so transparent that it should hardly have much weight with those for whom it was written; but we may do well to remember that we are subject to the despotism of the Chinese Customs, having only for redress to rely on what prove to be practically the most inefficient safeguards, and that it is conducted by one who seems to think that the end justifies any means in advancing his own views."

In order to facilitate the delivery and despatch of correspondence, the Municipal Council have established a local post-office.

A general meeting of the Shanghai volunteer corps took place on July 11th at the Main Guard. There was a numerous attendance. R. C. Antrobus, Esq., commanding officer, in the chair.

The following circular anticipates the progress of the settlement:—

"Shanghai Horse Bazaar, Bubbling Well-road.

"This establishment will be ready to receive horses on livery on the 1st of August next. The stables, to accommodate upwards of one hundred horses, are roomy, well-ventilated, and well drained, and every attention which a long experience in horse management in England, the colonies, and the East can suggest will be paid to the well-being of horses sent to the bazaar. Periodical sales by auction will be held of horses and other live stock, carriages, harness, saddlery, &c., &c. Part of the establishment has been reserved as a show room for the exhibition of carriages, saddlery, &c., sent for sale either by public auction or private sale. Horses bought and sold on commission. Horses carefully broken to saddle and harness. For terms and particulars apply to O. R. KEELE, Manager."

The following is on the present position of the Anglo-Chinese force:—

"At Quinsan strenuous measures have been adopted to prevent foreigners from effecting communication with the rebels in Soochow; indeed all Europeans travelling in the interior, towards the districts recently retaken from the rebels as well as elsewhere, will, in future, have to provide themselves with a pass from Major Gordon, unless they wish to run the risk of arrest by the Imperialists. Reports have lately reached the Mandarins of the intention of several Europeans to join the rebels at Soochow, and they have consequently intimated to Major Gordon their intention of arresting foreigners travelling in that direction, who may not be provided with a pass from him. Officers of the Soonkiong force, as well as private individuals, must take the same precaution; as, from fear of being imposed on, the Imperialists may not be disposed to take their word as to their identity. The heat of the weather, and the absence of the *Hyson* at Shanghai, have secured the rebels a short respite of late. But we understand that active operations are shortly to be renewed, though the point elected for attack has not yet been made public. The health of the troops is generally good; but there have been several deaths among the officers, principally from sunstroke. Many of the English officers who had joined the force on leave of absence from their respective regiments have returned to Shanghai, in consequence of a peremptory order that they should at once go on half-pay if they intended to remain in the Chinese service. It is with the deepest regret that we record the death from cholera of D. A. C. G. Cookesley, which took place at Quinsan on the 16th instant, after only eleven hours' illness."

The American boundaries on Hong-que have been agreed and published by the Consul.

Mr. Samuel Mossman has retired from the editorial chair of the *North China Herald*.

HANKOW.

A letter from this place mentions that 23,000 taels are asked for the erection of a church without the parsonage, which would, at least, cost 10,000 more; rather a high price for a small community.

Captain Glover committed suicide at Chin-kiang. He was for many years an old coast officer. Captain Adams, also a coast officer, destroyed himself by jumping overboard.

The *Fire Cracker* tows down a schooner built here, intended for lighterage between Takoo and Tient-sin. She is owned by Messrs. Lindsay and Co.

The settlement is progressing rapidly; next season I trust we shall all be located there.

A couple of foreigners were attacked by braves the other day; the *melee* was in a boat. One of the foreigners was knocked overboard, cut on the head, and very likely would have been murdered, had it not been for the other, who drew his revolver, when the braves vamoosed.

KUI-KIANG.

Mr. Elliott, the head of Dent's-hong, died on the morning of the 16th of Asiatic cholera, after only a few hours' illness. I suppose the Braves brought it with them; they have been passing through the city at the rate of 1,000 a day for several days; 7,000 have already arrived. We all turned out the other evening armed to the teeth to rescue two foreigners reported to have been taken prisoners by them, but the report proved to be but false.

Samuel Stoddart, British barque, Jenkins, Jarvic, Thorburn and Co.; *Pons Ælii*, British barque, Beaglehole; *Waterwitch*, British barque, Smith, Dent and Co.; *Mahé*, British ship, Merrilees, Little and Co.; *Snipe*, British brig, Hay; *Clemens*, American ship, Smith, Russell and Co.; *Swallow*, Customs Hulk.

The following is a letter to the *Shanghai Market Report*:—

"Eight thousand Braves are expected, on their way to Hookow, near which place you will remember that the rebels showed themselves a few weeks ago. The Mandarins do not seem delighted at their visit, which is quite unnecessary; and the foreigners are sure to have a row with them, as they have a propensity for entering compounds and even dwelling-houses to have a look at the red haired devils. In the day time we keep guard over our houses, much the wisest plan, as if we were to venture out we should certainly be insulted. The inhabitants seem to fear their coming more than that of the rebels.

"Now for another growl at the Customs. Some time ago, a Chinaman shipped a quantity of tea to Shanghai, but unfortunately lost the receipt, so on its arrival at Shanghai the Customs authorities there made him pay a second whole and half duty, which the Chinaman, I suppose, did under protest. He had recourse to a foreign Hong there to recover this money, and they wrote to a firm here asking the latter to procure either a duplicate, or something to show the Taoutai at Shanghai that the duty had been properly paid here. The Deputy Commissioner most obligingly did all he could, but could get nothing out of the Taoutai except a note affirming that the duty had been collected, which was next to useless, as, if it had not been paid, the teas would never have been allowed on board vessel. The firm enclosed this to their Shanghai correspondents, and on the latter handing it to the Customs at Shanghai, they were told it was of no value; so, as usual, the customs has the best of it. Why do they refuse to give duplicates, and why did the Customs at Shanghai (contrary to regulations, I think) allow the steamer to dis-

* The steamer *Unicorn*, for instance, which Mr. Lay reports as fined for smuggling.

Digitized by Google

charge any of her cargo, when they found their memo. from here did not tally with the manifest? The system of paying whole and half duty at the river ports is a simple swindle. It is only a dodge to let the bankers here have the use of a large sum of money without paying interest, and thus robs the merchants of it; it also gives the bankers, or rather the Taoutai at Shanghai a chance of squeezing, as the teas generally weigh less at Shanghai than here, perhpaps owing to the difference of scales; and then, naturally, the half duty returned on shipment to England is less than it ought to be. A difference of 5 taels in every invoice amounts to something serious at the end of the year; and there is risk besides of never getting your half-duty certificates (which are only payable at the export port) through the carelessness of a Customs' employé writing by mistake Hankow or Chin-kiang, instead of Kiu-Kiang; while, owing to the system of Customs' books, it is next to impossible to trace anything. The other day a firm got a half-duty certificate payable here, on teas not shipped from hence, and of course sent it up to Hankow to inquire whether it belonged there. I verily believe it was shipped from that place, but the Customs would not pay it there, so they were obliged to pay it here."

AMOY, FOO-CHOW, AND SWATOW.

There is no news beyond the trade circulars from these ports.

HONG KONG.

The London Mail of the 10th June, arrived by the P. and O. steamer *Columbian* on the 19th July. The French Mail of the 17th June, arrived on 28th July.

We (*China Mail*) hear that Mr. Lay, the present Foreign Inspector-General of Maritime Customs in China, has just dismissed ten of the foreign employés at three months warning or pay. The gentlemen who have received warning are of the class whose salaries were about £600 per annum, and it is understood that their places will be supplied by new men from England. This is rather hard for the cashiered officials, although the tender of a quarter's salary will enable them to pay their passages home, or keep them afloat here until they can find employment. We may suppose that Mr. Lay's object has been to furnish the service with individuals who have had a regular training in the collection of maritime revenue in England, and if so he has done well. It must have been a source of great annoyance to merchants to find, in official positions in the Customs, men who had received no training in Customs business, and, in some cases, no training in any kind of mercantile business whatever. For an institution to be free from grievances in such circumstances would have been incredible.

A piratical attack had occurred on board the American barque *Bertha* while at anchor off Stone Cutter's Island in the harbour of Hong Kong. It appears that a few Chinese got on board quietly, and, joined with two of the Chinese crew, attacked the captain, mate, and crew, more or less injuring them. An alarm being given by a vessel anchored near, the rascals made off.

On the morning of the 13th July the house of the signal-man at Victoria Peak was attacked by a gang of Chinamen, McClelland, the signal-man was in one room, and Mr. Coffin, of H.M. Naval Yard, in another; both were aroused by two blows, the first of which broke some panes of glass, while the second drove in the window. Both inmates reached the spot at the same time, when a stink-pot was thrown in; McClelland was very badly injured, and Mr. Coffin sustained some damage in one of his feet.

The following notification has been issued in reference to the Danish treaty:—

"HONG KONG, 27th July, 1863.

"Having this day received from His Excellency Colonel Raasloff, his Danish Majesty's Envoy Extraordinary to China the following circular, I hereby notify the same for the information of Danish subjects.

"GEORGE J. HELLAND, *H. D. M.'s Act.-Consul.*"

"SHANGHAI, 20th July, 1863.

"SIR,—I have the honour to inform you that a treaty of amity, commerce, and navigation between Denmark and China, was signed at Tientsin on the 13th inst.

"Among the rights secured by that treaty to Danish subjects, is that of participating in the trade on the Yang-tze, under the provisional regulations now in force which I have accepted as binding for Danish subjects. The treaty, however, will not be in force and that right will consequently not belong to Danish subjects until it shall have been ratified by the two sovereigns respectively and the ratifications exchanged.

"It gives me great pleasure, therefore, under these circumstances to be able to inform you that the Chinese Government has, at my request, and in a most friendly manner, consented to admit at once, Danish two and three-masted vessels (schooners, brigs, barques, and ships), as well as steamers, to trade on the Yang-tze under the Provisional Regulations as aforesaid, while lorchas, lorcha-bottoms converted by change of rigging into vessels resembling schooners, brigs, &c., Ningpo, boats, &c., Chinese fashioned craft generally, and one-masted small craft will for the present be excluded although flying the Danish flag. These special restrictions will, of course, cease to apply as soon as the treaty shall be in force, when the Danish flag will be in every respect treated like the flags of the other treaty Powers.

"Be pleased to bring the above information to the knowledge of captains of Danish ships and of Danish subjects in general.—I have the honour to be, &c., &c., "W. RASSLOFF.

"To George J. Helland, Esq., H.D.M.'s Act.-Consul, Hong Kong."

The following items are from the *Evening Mail*:—"An article on the subject of how best to train interpreters, pointed out that Sir H. Robinson had been long ago advised to place his student interpreters in Canton, where quarters and teachers could be found for them in the city. This plan has been pursued successfully by the Dutch. The Governor is said to have rejected the advice on the score of expense—a most absurd excuse, as the expense would be less, compared with the progress.—A certain Mr. William Arnot wrote a letter, complaining of the greasy state of the five dollar notes issued by the Oriental Bank.—The appeal Case of Dadabhoy v. Hae Chun was dismissed with costs.—Discussion has been rife with regard to the present and future of the convict hulk *Anglo Saxon*. The convicts break loose in twos or threes occasionally, and guns are fired for assistance from the shore. The firing of these guns is recognised here, and all sorts of alarming ideas take hold of the people's minds. A cursory report of the hulk and its inmates appeared a few days ago; its tone was not very encouraging."

"We are sorry to record a sad accident which occurred on the 23rd July, at Stonecutter's Island, by which thirty-eight convicts lost their lives. At the usual time of embarkation, the sky seemed somewhat clouded, and there was a general anxiety to get on board. The men get into the barge by fifties in ordinary circumstances, but on this occasiou eighty men crowded on board. No harm would have ensued, however, had they remained steady and got on board the hulk quietly; but it happened that, just as they were alongside, the weather looked unusually threatening, and a general move was made by the convicts to get on board. This had the immediate effect of upsetting the barge, which resulted in the death of about forty men."

Our list of deaths is longer than ever, owing to the prevalence of cholera at Shanghai.

CANTON.

It is stated that Laou, formerly Governor-General of th Two Kwang, had been appointed Governor-General of Yunnae and Kwei-chow. He is said to be the most liberal and enlightened mandarin in China. His successor at Canton, at present only acting, but likely soon to be confirmed, is named Yen; he was formerly a rabid anti-foreign politician, but is now inclined to be on the most friendly terms with the representatives of foreign Powers at Canton.

THE PHILIPPINES.

MANILA.

The following letter to the *China Mail* is dated 22nd July:—

"Very little has taken place since last mail, but we still get news now and then of shocks of earthquake in the province. On the 2nd and 3rd instant several shocks were felt at Batangas, the strongest on the 3rd at 9.30 A.M. The volcano of Taal continues to vomit forth smoke.

"According to the Government statistics there are upwards of 3,800 rum manufactories or distilleries in the island of Luzon alone: who after that will deny that this is not a rum country?"

"The *Diario* has published a new feminine Decalogue, which runs as follows:—'The commandments of women are ten: 1st, to love man above all women; 2nd, not to swear love to him in vain; 3rd, to make holidays for him (that is, to be always affectionate towards him); 4th, to love him as your father and your mother; 5th, not to forget him; 6th, not to deceive him; 7th, not to be jealous of him; 8th, not to jilt or feign; 9th, not to desire more than one neighbour; 10th, not to covet the sweethearts of others.' We hope the Manila ladies' hearts will be inclined to keep this law!

"One of the gaps opened by the earthquake in Bulacan, and from which gushed a large quantity of water and black sand, is nearly a league in length, and in some places more than a yard in width. The mountains of Angut have been remarkably affected by the convulsion, some prominent peaks being either higher or lower than before, and one large rock having changed its position. On Monday and Tuesday five bodies were extricated from the ruins of the cathedral—one that of the exemplary Father Dandan, and the other four those of choristers. It is remarkable that they were scarcely disfigured, and exhaled no disagreeable odour, being dried up like mummies. Letters from Albany state that the volcano called Mayor is emitting fire, though but slightly.

"The old bridge cannot be used for carriages, and the having to cross and recross the Suspension-bridge incurs a heavy pecuniary tax. A bridge of boats is talked of.

"A heavy earthquake was felt some days ago at Benguet, and a new volcano has made its appearance in some part of Cagayan. It is also said that on the 13th inst., in Ilocos, there was a stronger earthquake than that of the 3rd June at Manila. Details have not yet been received."

BORNEO.

LABUAN.

By way of Hong Kong we have news from Labuan to the 4th. H.M.S. *Scout*, which left this on the 12th, reached

Digitized by Google

Labuan on the following day. She proceeded to the mines, where she took in 250 tons of coals in less than 24 hours. On the 14th a report was brought in that several piratical craft had been seen outside, and both the *Scout* and the *Leven* got ready and left the same evening; no pirates were seen, and the *Scout* proceeded direct to Hong Kong which she reached on the 26th.

The mines of Labuan are progressing favourably, and developing very rich coal.

MALACCA STRAITS.

SINGAPORE.

It was reported that the Supreme Government, on the ground that the transfer of the Straits Settlement to the Colonial-office had been for the present abandoned, had announced its intention of extending the Indian Penal Code to the Settlement without further delay. The *Singapore Free Press* remarks upon this:—"As our readers know, the transfer has not been abandoned, and from the measures being taken there is every prospect of its being carried through at an early date. The Government of India does not seem to be well posted up in what is going on in the India-office at home, and it is apparently acting on what occurred many months ago, when the Treasury put its veto upon the scheme. Since that time, however, the financial difficulties have disappeared, and there is little doubt that the measure will be carried through early next year."

Only two of the Anglo-Chinese fleet had so far arrived. These were the *China*, 10 guns, announced in previous advices and which had since sailed for Shanghai, and the *Amoy*, 3 guns, which arrived July 31st, replacing some of her spars that had been carried away. The *Thule* and the *Ballarat* had passed on direct. The rest of the squadron, the *Peking*, *Keang-soo*, *Tientsin*, and *Kwan-ghim* are daily expected. Captain Sherard Osborn was still at Singapore, it being his object to see the greater part of the fleet safely despatched from thence before he proceeds on; besides the heat of September in China would prevent operations being carried out immediately on arrival there. If the *Peking*, however, did not arrive by the 14th, Captain Osborn purposed taking his departure.

The municipal commissioners had determined to act in accordance with the general wish of the community, and the idea of a permanent suspension bridge for foot passengers across the river at Bonham-street had been abandoned. A temporary passenger bridge was to be erected at once, and a good strong iron pile bridge for general traffic would be ordered from home.

The ceremony of driving the silver bolt in the keel of the screw steamer *Heartsease*, building by Messrs. Buyers and Robb for Sir James Brooke, the Rajah of Sarawak, had taken place. The bolt was driven by the Rajah in person, the coins of the realm having been first slipped into the scarf. The dimensions of this vessel were:—Length over all, 120 feet; breadth, 18 feet 6 inches; depth, 9 feet; tonnage, about 300 tons. She is intended for a ram, and was extremely creditable to her builders.

The Messageries Imperiales have reduced the passage money for wives, widows, and servants of Dutch officials thirty per cent.

There was a report that the King of Acheen—not approving of chiefs on the East Coast of Sumatra, whom he considers as his vassals, hoisting the Dutch flag—intends to try to bring them back to their allegiance by force, should softer means fail, and the Dutch Government is, of course, prepared to assist those who have shown themselves so willing to come under its sway. If there is really any truth in this, we are afraid the Achinese monarch is only precipitating his own destruction, and giving the opportunity so eagerly longed for by the astute Dutch, of bringing the whole island of Sumatra under their exclusive dominion.

The correspondence going on between the British and Netherlands Governments, respecting the recent proceedings of the Dutch on the East Coast of Sumatra had excited much interest. In answer to the request of our Government for explanations, that of the Netherlands states that they have done nothing in the matter contrary to conventions or treaties, and that their measures are for the civilisation of barbarians!

A reference having been made to the Government of India regarding the clauses in the Straits Excise Act 14 of 1851 relating to the sale of spirituous liquors, Mr. Graham, the officiating Advocate-General, had given it as his opinion that although there is some obscurity in these sections of the act, yet on the whole the general intent that the spirit farmer should have a monopoly in regard to the retail of spirits in quantities under 160 gallons is apparent from the universality of the terms used in sections 2 and 24. He considers that section 28, which is merely intended to restrain the general right of selling spirits in taverns to spirits to be consumed on the premises, in no way affords a ground for exemption of spirits so consumed from the payment of the farmer's dues. Whether the tavern keeper, therefore, buys a larger or smaller stock, the retailing or selling by him in less than 160 gallons is the act upon which the farmer's due accrues, and in default of payment or tender the penalty arises. A tavern keeper may buy his stock where he pleases, but cannot retail spirits in his possession without paying the farmer his dues, and purchasing spirits in quantities of more than 160 gallons, does not exempt him from payment. The tavern keeper, therefore, before he can supply his customers with spirits, must tender and pay to the spirit farmer his dues in accordance with section 24, otherwise he lays himself open to the penalty therein provided.

The Sarawak steamer *Rainbow*, Captain Hewatt, sailed for Sarawak on July 31st having on board Rajah Sir James Brooke, K.C.B.

PENANG.

Tremendous rains had set in. Every particle of sand had been washed off the roads, and the macadamised places were as rough as the bed of a river, and dangerous to ride over. Innumerable land slips had taken place, and the hill roads were all but impassable. The province was like a lake. Bridges had been carried away in every direction, and damage done to property such as was never before experienced. The crop was an unusually heavy one. The *Gazette* asserts that "the scent of the fruit pervades the town, and indeed the length and breadth of the island." The Governor was about to commence his tour of inspection through Penang and Province Wellesley. The telegraphic line to Singapore had not been commenced.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DAVIES—On the 12th July, at Shanghai (only twelve hours before her husband's death), the wife of Henry Tudor Davies, Esq., Commissioner of Chinese Customs, of a daughter.

FARR—On the 15th July, at Spring-gardens, Hong Kong, the wife of Capt. Somes Farr, of a daughter.

GARDINER—On the 6th July, at Canton, the wife of John E. Gardiner, of a son.

MORICE—On the 27th July, at Beancegard, the wife of John Warden Morice, Esq., of a daughter.

LANE—On the 5th inst., at Grove-end House, St. John's-wood, the wife of T. A. Lane, Esq., of Hong Kong, of a daughter.

PIXLEY—On the 31st ult., at 30, Leinster-gardens, Hyde-park, the wife of Stewart Pixley, Esq., of a son.

PUTTFARCKEN—On the 24th July, at Monks-hill, Singapore, the wife of Otto Puttfarcken, of a son.

WILSON—At Hankow, China, the wife of Frank H. Wilson, Esq., of a son.

MARRIAGES.

DENT—MACLEAN.—On the 5th inst., at St. George's, Hanover-square, by the Rev. G. B. Macilwain, William Dent., jun., only son of William Dent, Esq., of Cowper's-hill, Windsor, to Jane Amelia, youngest surviving daughter of the late Lieut.-General Sir Colin Campbell, K.C.B., and widow of the late Colonel George Maclean, Royal Artillery. No cards.

HAWKE—LEGGE.—On the 15th July, at the Union Chapel, Hong Kong, by the father of the bride, Richard Frean Hawke, of H.M.'s Dockyard, to Mary Isabella, second daughter of the Rev. James Legge, D.D. No cards.

MARTIN—LISTER.—On the 1st inst., at West Derby, by the Rev. J. Herbert Jones, Alexander Maughan Martin, Esq., of Singapore, to Jane, eldest surviving daughter of the late Charles Lister, Esq., surgeon, Liverpool. No cards.

DEATHS

ASHBEY—On the 12th July, at Shanghai, Lucy, the wife of Capt. Roswell F. Ashbey, of the American barque Lucy E. Ashbey.

BLAVER—On the 11th July, at Singapore, Marc. A. Blaver, of Marseilles, aged 39 years.

BELL—On the 4th July, at Shanghai, John X. Bell, of Shelbourne, Nova Scotia.

BOULANGER—At Shanghai, on July 18th, E. Boulanger.

CORCORAN—On the 17th May, at Nagasaki, James Corcoran, son of Lieut.-Colonel A. Corcoran, aged 21 years and one month.

COOKESLEY—On the 16th July, at Quinsan, of cholera, D. A. C. G. Cookesley. Entered the service in 1834, and served through all the Crimean war.

COCHRANE—On the 5th July, at Shanghai, Mr. John G. Cochrane, aged 26 years, late Engineer of the steamer Willamette.

COOK—At the Civil Hospital, Hong Kong, on the 10th inst., George Cook, a native of Bristol, aged 36 years.

DAVIES—On the 13th July, at Shanghai, of cholera, Henry Tudor Davies, Esq., Commissioner of Chinese Customs at that port.

DUCAT—On the 23rd July, at Hong Kong, on board the ship Tchernaya, P. F. Ducat late commander.

D'AQUINO—On the 26th July, at Hong Hong, Ethelvina Roza, the third daughter of Mr M. D Aquino, aged 21 years.

ELLIOTT—At Kiu-kiang, of cholera, on the 14th inst., J. T. Elliott, of the firm of Messrs. Dent and Co.

FENWICK—Drowned on the 19th July, whilst bathing, in Canton River, George Fenwick.

FENWICK—On the 19th July, at Canton, drowned while bathing, George, the dearly-loved son of Mrs. Fenwick, of Whitechapel-road, London.

FYFE—On the 3rd July, at Shanghai, of cholera, Mr. Alexander Fyfe, engineer of the steamer Cycee.

GUTTERREZ—At Macoa, on the 11th July, Capt. Bento Agostinho Gutterrez, late of the Portuguese ship Pamella, aged 54.

GLEN—At Astor House Hotel, Shanghai, on the 7th July, William Glen, Esq., aged 48.

HORROCKS—On the 6th July, at Shanghai, of Asiatic cholera, Corporal James Horrocks, R.E., aged 25 years. A native of Salford, Lancashire.

JONES—On the 6th July, at Shanghai, Captain Theodore Jones, formerly of Boston, Mass., aged 32 years.

JORDAN—At Hong Kong, on July 8th, on board the ship Fanny Fern, Jennet C. Jordan, infant daughter of Captain Jordan, aged 3 years.

JAMESON—At Hong Kong, on July 11th, on board the ship Fanny Fern, George O. Jameson, 2nd officer, aged 25 years.

KAYLL—On the 8th July, at Shanghai, Henry Robert Kayll, native of Douglas, Isle of Man, and late commander of the ship Isabella Hamilton, aged 35 years.

Digitized by Google

MCLEOD—July 12, at Whampoa, Mr. John Mcleod, Superintendent Engineer, J. C. Cooper and Co.
MILLER—At Headquarters-house, Hong Kong, on July 11th, Elizabeth, wife of Major Miller, 67th Regiment, aged 26.
PURRIER—On the 15th July, at Shanghai, of cholera, after a few hours' illness, Vaughan Thomas Macneil Purrier, midshipman on board the ship Hanover, the beloved son of Thomas Purrier, Esq., of The Mall, Chiswick, aged 18.
PETERS—On the 4th July, at Shanghai, of choleraic fever of four days' duration, Mr. Henry Peters, of Holstein, aged 25 years.
SHARP—At the Gaol Hong Kong, on July 8th, Robert Sharp, late warden.
TOOMER—On the 5th inst., at 68, Marland-place, Southampton, Joseph, the second son of the late Edward Toomer, Esq.
TAVARES—At Shanghai, on the 3rd July, Francisca, the wife of P. Tavares.
WATSON—On the 10th July, at Hankow, John Watson, tidewaiter.
WRENTMORE—In June last, at Shanghai, China, suddenly, of Cholera, George Wrentmore, Esq., of the Commissariat, late of Sydney, and son of the late Isaac Wrentmore, Esq., of Great Cheyne-row, Chelsea.
WILLIAMS—At Hong Kong, on July 6th, on board the American ship Contest, Watkins Williams, aged 19.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: At the despatch of the last mail, this market for new Congous was nominally opened by the settlement of a chop of the finest Chong-sow-kyes at 40½ taels (cost laid down in London 2s. 5½d.) but the purchase was deemed an exceptional case, and no further business has been done. The teamen have reduced their demands to 45 taels for the finest Oopacks, 40 to 42 taels for Chong-sow-kyes, and 36 to 38 taels for Lylings; these rates are about 2 taels above the offers which are reported to have been made. The arrivals during the fortnight have amounted to 11 chops of Oonahms, Lylings, and Chong-sow-kyes, which will nearly complete the season's supply of first crop tea. In Canton made teas a moderate business has been done—medium Capers at 5 mace to a tael cheaper—in other kinds there is no alteration.

SHANGHAI.—Black: This market has been well supplied with Hankow teas during the whole of the fortnight. As both Freights and Exchange have declined, buyers have been better able to operate within their limits, and considerable settlements have been made at a fall of about one tael on medium teas, and at full rates for finest; the stock of the latter class is now nearly exhausted, and as they show a better prospect of paying than the lower kinds they are more inquired for. Three chops of best Oopack have been taken at taels 40½ to 42, which lay down about 2s. 5d., whilst their value by last circulars on the home market is 2s. 6d. to 2s. 7d.; the remainder of the settlements consist of Ningchows, Oonahms, and second class Oopacks, at prices ranging from taels 33 to 38½, which show no margin on present home rates. Settlements on the market, 13,798 chests Oopacks, Oonahms, Ningchows, and Hohows. Re-shipped on owners' account, 18,944 chests Oopacks; total, 32,742 chests, making a total to date of 95,218 chests. Stock, 24,566 chests. Quotations are, good to finest Oopack, tls. 36 to 42; good to finest Oonahms, 32 to 38; good to finest Ningchows, 33 to 38; finest Hohows, 29 to 30. Green.—Without any fresh arrivals from Kiukiang very little has been doing, and there will be nothing fresh to report until the arrival of new crop teas which are expected about the middle of next month. Prices will most probably open high, as the cost of the leaf in all the producing districts is considerably over last year's rates. Re-shipments and settlements, 1,514 ½-chests, making total to date 13,006 ½ chests. Stock of green tea is estimated at 8,300 ½-chests.

FOO-CHOW-FOO.—Buyers of Congous for England holding off, the market became very quiet soon after the departure of last mail. The Teamen then yielded and the market fell about 2 taels for good Kysows and 1 tael for medium and common. Good common free from dust are scarce and wanted for Australia—coarse with broken leaf have been selling at 17 to 18 taels. Souchongs being in full supply have declined a little, especially the lower kinds. In other kinds the business has been trifling and without change in price. The total supply of Congou this season to date, amounts to 238,500 chests, against 243,000 chests, corresponding period last season.

AMOY.—The settlements reported as under:—Congou, 11,500 half-chests at $20 to 27 for common to flavoury; Oolong, 12,000 half-chests, at 18½ to 27 for common to good cargo; Orange Pekoe, 3,800 half-chests at 13 to 18 for low ordinary to fair.

HANKOW.—During the past fortnight there has been no good demand for Congous. The market has been well supplied with second crop Teas, of which Oopacks have been good, and bought at previous rates. Oonahams have declined about 1 tael per picul. Short supplies of third crop are anticipated in consequence of the long drought, and the prevalence of the locusts. Good medium to best, 2nd crop Oopacks, taels 32.00 to 34.50 per picul; Good 2nd crop, to best, taels 30.00 to 31.50 per picul. Good medium Oonams, taels 28.00 to 31.00 per picul; fair 2nd crop Oonahams, 25.50 to 27.00 tls. per picul. Sales, 50 chops. The supplies of the season so far, amount to 263 chops, against 192 do. same period last season; the settlements amounting to 227 chops (42 being contract), against 152 last season (59 being contract).

KEWKIANG.—There have been no transactions in Greens, for the reason that there is no stock. The new crop is expected about the end of August. The settlements of Black amount to 1 chop Hohow at 26 taels, and 2 chops Ningchow at 30 to 32 taels. The stock on the market is stated at 2 chops Ningchow.

KANAGAWA.—Transactions during the past month have been on a rather limited scale, owing principally to the absence of stock, and the high rates demanded by the teamen; at the present time there are but few buyers in the market, and settlements, which are estimated at 2,700 piculs, are chiefly for America. Stocks and quotations are as follows:—Ordinary, $1 to $3, stocks 300 piculs; good ordinary, $4 to 6, stocks; common, $8 to 12, stocks 200 piculs; good common, $14 to 16, stocks 200 piculs; medium, $18 to 22, stocks 300 piculs; fine, $23 to 26, stocks 100 piculs; finest, no quotation, and stocks none.

RAW SILK.—SHANGHAI.—Since last report there have been few purchases in this market, barely amounting to 600 bales, but about 1,500 bales brought down from the interior under contract have been shipped, which, added to the arrivals from Japan of about 400 bales, make the transactions of the fortnight 2,500 bales. The very high prices paid by the Chinese upcountry causes them to continue firm, for the opening states notwithstanding an accumulating stock and a high rate of interest. Few buyers, however, have been disposed to operate, and generally with a reduction of taels 20 per picul. The purchases have been chiefly confined to medium and inferior Tsatlees, at about taels 5 per picul lower than last mail, but a few Taysaams have also been settled at very full prices. The second crop is reported to have yielded satisfactorily, with some improvement in the colour, but the silk is rather coarser and like the first gathering, wanting in quality. The sales of the fortnight are reported at 2,500 bales against 5,500 bales corresponding fortnight of last year and 4,000 bales the corresponding fortnight season before. The unsold stock on the market is 15,000 bales, against same quantity last season and 9,000 bales the season before. The present steamer has about 1,200 bales—the Aerolite for London has about 200 bales—no other ship loading has any. The following are the current quotations:—Tsatlees, No. 1, Tls. 455 to 465 per picul; No. 2, 435 to 445; No. 3, 415 to 425; Market, No. 3, 400 to 410; No. 4, 380 to 400; No. 5 and com., 355 to 375; Taysaams, No. 1, chops, 380 to 390; No. 2, 360 to 370; No. 3, 335 to 345; No. 4, 5, and com, 300 to 330; Yuenfa,—No. 1, chops, 420 to 430; No. 2, 400 to 420: No. 3, 385 to 390; No. 4, and com, 360 to 375; Hainings, 360 to 420; Hangchow Tsatlees, 385.

CANTON.—The silk of 3rd crop is now coming forward in bulk, over 200 bales having recently been received, of which 100 bales are Loong-Kongs held by two or three of the principal silk Hongs or shops, for rather higher prices than those quoted in the last report. Owing to the very unfavourable advices from England received by the 10th of June mail regarding the state and prospects of the silk market, most of the orders for silk prior to this news have been withdrawn.

KANAGAWA.—The new season's produce commenced to arrive about a fortnight ago, and was at first but indifferent in quality and size, but within the last few days the quality of the Mybash has much improved and can fairly be compared with that of last year. Owing mainly to an active demand having sprung up in consequence of reported failure of first China crop, this market has been very active, and a fair business has been done at gradually advancing rates. At present dealers are very firm, but as silk arrives in larger quantities, it may be expected that prices will slightly give way. As regards the prospects of this season's supply the native dealers report a failure in the Mybash, Sinchu, and Hatchogee districts, but for all this year's export will probably equal, if not exceed, that of season 1862-63. The total estimated settlements of new silks are from 600 to 700 bales, consisting chiefly of Mybash. Quotations are—Mybash and Sinchu, best parcels $540 to $565; medium, $520 to $530; inferior, $500 to $510; Coshio, medium, $460 to $480; Hatchogee, medium, $385 to $395.

DRUGS.—CANTON.—Cassia Lignea, 500 pls. have been taken at $15.50. The remaining stock is about 1,500 pls. for which $15.75 is demanded. Cassia Oil, no stock—nominally worth $220 per picul. Cassia Buds, no sales, 25 pls. are still upon the market. Star Aniseed, and Aniseed Oil, none on offer. Rhubarb, 100 pls. are on the market, for which $60 to $70 is asked. China Root stock 250 pls. no settlements, quotation $4 to $4.25. Galangal, stock 200 pls., no settlements, quotation $4 to $4.25. Galls, no settlements, stock 100 pls. Musk, 90 catties are on the market at $80 to $100.

CAMPHOR.—HONG KONG.—Sales of 3,200 pls. China at $20 to $20.50 per picul unpacked, and 1,000 pls. Japan at $19.50 per picul, which leaves the market bare, no further supplies having arrived.

CHINA IMPORTS.

HONG KONG.

COTTON YARN has again advanced in value materially during the fortnight which has elapsed since the date of last report, while the business transacted has likewise been upon a fair scale (estimated at 584 bales) of which some 200 have been purchased by foreigners. In Canton, where the value of this article also shows a satisfactory improvement, the settlements of the fortnight are computed at 120 bales.

GREY SHIRTINGS.—A fair amount of business has been transacted in these goods also, and rates show an advance of about 70 cents. per piece upon previous quotations. The total sales of the fortnight are put at 40,950 pieces, of which some 12,000 have been taken by foreigners. The advance in Canton is also in almost a similar ratio, but the business done has been confined to 2,000 pieces at the annexed quotations.

WHITE SHIRTINGS remain without material change to notice in value, and with a moderate amount of business doing in this colony, where the settlements of the past fortnight are estimated 3,600 pieces. From Canton there are not any sales to report.

T-CLOTHS show a moderate improvement in value, with sales effected to the extent of 12,650 pieces in Hong Kong. In Canton, where an advance in price is likewise noticeable, the settlements are limited to 1,800 pieces of these goods.

AMERICAN DRILLS.—There is not any sales of these fabrics to be reported from Hong Kong, where their value remains as previously quoted, but sales of 1,800 pieces are reported in Canton.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The business transacted in these fabrics, during the past fortnight, is limited to 600 pieces of the last-mentioned goods, upon which, and White Brocades, an advance of about 10 cents per piece has been established, Spotted Shirtings remaining as before quoted. In Canton, the value of Dyed Spotted Shirtings shows an improvement of about 70 cents per piece, and at this 1,000 pieces have changed hands.

CHINTZES AND HANDKERCHIEFS.—Neither here nor from Canton are any sales or material change in the value of Chintzes reported; but in this colony purchases have been made of about 4,000 dozen of Handkerchiefs, at the annexed quotations:—

RAW COTTON has again advanced to the extent of from 50 cents to $1 per picul, and the amount of business done in this colony has been upon a moderate scale, amounting to about 3,500 bales of Shanghai and Ningpo staple, on Chinese account, and about 640 bales reported as purchased by foreigners. In Canton, the business of the fortnight has been confined to the exportation to Hong Kong of 3,000 bales of cotton of Chinese growth, and 129 bales of Bombay staple.

WOOLLENS.—Spanish stripes and medium cloths, ladies and habit cloths, are dull of sale, both here and in Canton, and there is but little

Digitized by Google

change to notice in their value. The transactions in Spanish stripes in Hong Kong have been confined to assorted colours of continental manufacture, of which about 1,500 pieces have been purchased. Of medium cloths, 240 pieces have also found buyers. In Canton, the sales are put at 280 pieces of Spanish stripes.

LONG ELLS.—There are not any sales to report of these goods from this colony. In Canton, where their value has declined 10 to 15 cents, the settlements are put at 200 pieces.

CAMLETS, which in Hong Kong remain at about the quotations given in last report, have in Canton advanced one dollar per piece, but without transactions. In this colony the sales are put at 140 pieces of English, and 120 pieces of Dutch manufacture.

LASTINGS remain much as before quoted, with a moderate inquiry both here and in Canton, the sales of the fortnight being estimated at 100 and 480 pieces for each port respectively.

METALS.—Iron, flat., &c., maintain their value in Hong Kong, but are not much inquired for, the sales of the fortnight being estimated at 1,000 piculs of nail rod and 555 of iron wire. In Canton, the business transacted since the departure of last mail has been extremely small, limited to 700 piculs of nail rod. Lead still shows symptoms of reaching lower prices than have ruled for a long time back, and both in Hong Kong and Canton its value has declined during the past fortnight, while the sales are put at 480 piculs for this colony, and at 1,800 piculs for Canton. Tin: 1,800 slabs sold in Hong Kong; in Canton nothing doing. Tin Plates: 300 boxes have been purchased in Hong Kong and 200 in Canton. Steel: Nothing doing.

EXCHANGES ON LONDON.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN: None.

At SHANGHAI: July 5, Weymouth, from London; 6, Lizzie, from Cardiff; 8, Gauntlet, from London; 10, Havelock, from London; 12, Rock City, from Liverpool; 17, Camilla, from Liverpool.

At FOO-CHOW: None.

At HONG KONG: July 12, Agincourt, from Sunderland; 12, Georges, from New York; 14, Wild Pigeon, from New York; 18, H.M.S. Osprey, from England; Kate Howe, from New York; 12, A. E. Vidal, from Hamburg; 22, Gleaner, from Liverpool; 22, Alida, from Hamburg.

At MANILA: None.

At SINGAPORE: July 25, Paul Riquet, from Bordeaux; 30, Prince Alfred, from London; August 1, Tycoon, from Sunderland, 2, Hildesheim, from Hamburg.

DEPARTURES.

From JAPAN.—None.

From HANKOW.—21, Celestial and White Adder, for London.

From SHANGAAI.—July 6, Vigil, for London; 8, Kennington, for London; 9, Procymatia, for London; 18, Caroline Coventry, for London; 14, Kestrel, for London.

From FOO-CHOW.—July 10, Rosella, for London; 14, Philomela, for London; 17, Veronica, for Liverpool.

From HONG KONG.—July 15, Chrysolite, for London; 23, Eliza Stewart, for Liverpool.

From MANILA.—Kitty Simpson, for New York; Frederic, for Falmouth; Sooloo, for Boston.

From SINGAPORE.—July 21, Sparkler, for Liverpool.

LOADING.

At JAPAN.—For London: Kent, Cambridge, and Isabella Kiale.

At SHANGHAI.—For London: Alfred Hawley, Assyrian, Gabalva, George Avery, Parliament, Sir W. F. Williams, Cambalu, Lorton, Hanover, Ocean Mail, Glenadier, Southern Balbe, Reindeer, Garawat, Artemeria, Tubilu, Naomi, Veler Solent. For Liverpool: Onangondy, Cambula, Marrington.

At FOO-CHOW.—For London: Empress Eugene, Friar Tuck, Whinfell, Corea, Gananogur, Spray of the Ocean, Harkaway, Carisbrork, Yaratilda, Maha Ranee, Lord Clyde.

At AMOY.—For London: Eastern Chief.

At HONG KONG.—For London: Parana, Queen of the Ocean, Warwickshire. For New York: Panama.

At CANTON.—For London: Queen of the Age, Queen of the North, Northfleet, Tamana, Westminster, Canadian, John Lidgett. For Liverpool: Iron Crown, Verbena.

At MANILA.—For Liverpool: Alaric. For Falmouth: Amtmand, Thesen, Java. For Havre: Volta. For New York: Antonia Terry, Competitor, Hamlet, Horatio, Sumatra, Wanderer.

At SINGAPORE.—For London: Ann Reddin, Ariel, Richardson, Prince Alfred, Sawley, Cludow. For Liverpool: Bogota, Tigros, Thomas Mitchell.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.:—July 11th, Lambere, Glasgow to Singapore; J. H. Ranson, London to Shanghai; 12th, Indus, Cardiff to Shanghai; 13th, Fairlight, London to Shanghai; 14th, Star Queen, Cardiff to Shanghai; Constance, Sunderland to Shanghai; Niphon, Liverpool for Shanghai; Spirit of the Sea, Cardiff to Shanghai; Mimosa, Liverpool to Shanghai; Banda, Liverpool to Kong Kong, Cleopatra, Dundee to Shanghai; 16th, Balbrat, London to Shanghai; Charles Henri, Falmouth to Manila; Marion, Sunderland to Shanghai; Ida Elizabeth, Rotterdam to Batavia; 21st, Osprey, London to Shanhai; Freya, Cardiff to Shanghai; 23, Albrecht Oswald, Liverpool to Shanghai; Mirage, London to Shanghai; 24th, Frans and Elize, Amsterdam to Batavia; 25th, Bosworth, Sunderland to Shanghai; 31st, Vier Gezusters, Rotterdam to Batavia; Delft, Rotterdam to Batavia. From China, &c., to United States: 12th, Europa, Whampoa to New York; 17th, Cleveland, Shanghai to New York; Nabob, Manila to New York.

FREIGHTS AND CHARTERS.

JAPAN.

Tea, £5; silk, £6. 10s.

SHANGHAI.

Rates for silk are £4. 10s., and £3. 10s for tea. Tonnage in the harbour is large and coast rates are but nominal. The following are some of the charters:—Orinoco (Hamb. barque) 496 tons, Taku and back, with 12 lay days, $1,300 per month; Voltigeur (Prussian brig), 200 tons, $850 per month; Lady Elizabeth (Brit. barque), 576 tons, Hakodadi and back, $1.500 per month; Keepsake, Foo-chow to Melbourne, £3. 15s. per ton, 25 lay days; Southern Belle (Brit. barque), 541 tons, London with tea, £3. 10s.; Merrington (Brit. ship), 642 tons, Liverpool, with cotton, £2. 17s. 6d.

HONG KONG.

Arrivals have been large, which, together with little employment offering, gives rates a downward tendency. The Northfleet is loading at Whampoa, at £4 per ton. This, however, is the nominal rate; vessels on the berth would be glad to take much less rates for quick despatch. The Iron Crown is loading cotton for Liverpool at £3. 10s.

Forfarshire (British ship 614 tons), to Liverpool, £4. Parana on berth for London at £3. 10s. Rates to Ningpo are 35 cents, to Shanghai, 40 cents.

MANILA.

Rates for sugar are still lower, the Alarac having engaged the remainder of her cargo at £2. 12s. 6d. for unclayed, and £2. 12s. 6d. for clayed; to Shanghai, one vessel has been taken up to load at 40 cents per picul.

SINGAPORE.

Rates are as follows:—Tin, £3. 5s. per 20 cwt.; sago in boxes, £4; sago flour, £4; gambier in bales, £3. 5s.; sugar, £4; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt.; measurement goods, £4. 10s. per 50 cubic feet.

PENANG.

Freights to London, £3. 10s., for dead weight, £4 for light freight.

Digitized by Google

CASUALTIES.

SHANGHAI.

The Macduff is badly on shore on the Middle Ground, and will have to discharge a great portion of her cargo before she can be got off.

HONG KONG.

The Dutch barque Borneo arrived in harbour yesterday afternoon in tow of the steamer Cadiz, Capt. Gillson. The Borneo is from Singapore bound to this port; she encountered a typhoon.

The Hong-lion?, an old vessel under the Dutch flag belonging to Singapore, was from the last named port bound to Amoy, having on board upwards of 250 Chinese passengers—all of whom have been lost. This is an event which occurs certainly once a-year with the Singapore vessels either going down from Swatow and Amoy with the N.E. monsoon or returning (as in the present instance) with the S.W. monsoon. A larger number of passengers are crowded on board than there is room for.

The British barque *Anita*, Captain Williams from New York bound to Shanghai with coals, has put into port having sustained much damage aloft and having her crew all laid up from illness in consequence of the weather lately experienced in the China Sea.

SINGAPORE.

In the report of the accident to the steamer *Experiment*, it was mentioned that the boat which was sent ashore at Tanjong Appi to obtain provisions and water, had not turned up at the date of our last advices. By the Dutch mail we learn that this boat has found its way to Batavia. Great sufferings have been endured by the crew, one of whom has died; the crew have been sent up to this by the Dutch authorities.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

SILK.—As importers have continued to be current sellers we have had another fortnight of fair activity in the silk market, China silk taking, perhaps, the most prominent position in the amount of business done. For Japan silk there has been a good demand, but the arrivals have been rather small. Deliveries 31st August to 9th September, inclusive.—China, 1,317 bales; Japan, 706; total, 2,023.

Arrivals not included in the Table.—September 8, at Falmouth, from Akyab, Pieter; 8, at Texel, from Batavia, Sourabaya Packet; 11, at Falmouth, from Rangoon, Sophia Adelaide, Kalkmann; off Falmouth, from Akyab, Solide, Andersen; 10, at Queenstown, from Akyab, Cambridge; 11, at Falmouth, from Akyab, H.S. Soule, Osgood (schr.); 13, at Deal, from Singapore, Oscar, Wulff.

DEPARTURES.—Sept. 8, from Sunderland for Shanghai, Seaton, Luzon; 12, from London for Shanghai, Unrivalled.

SPOKEN.—Walvisch, Sunderland to Singapore, August 2, 14 N., 26 W. County of Ayr, Clyde to Batavia, August 7, 14 N., 25 W.; St. Paul, New York to Shanghai, 29 days out; Salatiga, Vretler, Tjilatjap to Rotterdam, July 28, 10 S., 12 W.; Ida Wilhelmine, Rotterdam to Batavia, Aug. 6, 2 N., 24 W.; Nova Zembla, Amsterdam to Batavia, July 11, 25 S., 30 W.; Constance, Amsterdam to Batavia, Aug. 2, 12 N., 24 W.; Rudolph, Meinsma, Rotterdam to Batavia, July 31, 14 N., 26 W.; Quartet, Mulder, Amsterdam to Batavia, Aug. 1, 14 N., 26 W.

MERCHANT STEAMERS IN THE SHANGHAI TRADE.

(From the *Friend of China*.)

Kennedy, Russell and Co., left.

TIENTSIN LINE.—Island Queen, Br. Stocks, F. R. Gamwell; Nanzing, Br. Morrison, Harkort and Co., left; Swatow, Br. Laen, E. A. Reynolds, left.

JAPAN LINE.—City of Nantes, Br. Gibson, left; Elgin, Br. Beal, Adamson and Co.; Hellespont, Am. Mooney, Howard and Co., left; Jeddo, Br. Wright, Dallas, Pearson and Co., left; Pembroke, Am. Dohin, 1 s., Russell and Co., left; Rajah, Br. Catto, Hogg Brothers, left; Reiver, Bolton, Jardine, Matheson and Co.; St. Theodosius, Russian, Stenroos, left.

HONG KONG LINE.—Carthage, James, Jardine Matheson and Co., left; Chusan, Br. Shaw, left; Chanticleer, Br., Turner and Co, left; Fokien, Am. Str., Russell and Co., left; Hydaspes, French, Nom de dieu, Russell and Co.; Meteor, Br. 6 p., Mc. Caslin; Shun-Lee, Milbank, Harkort and Co., left; Tynemouth, Br. 6 p., Hellyer, Russell and Co., left; Viola, Br. Thomson, Jardine, Matheson and Co., left.

NO PARTICULAR LINE.—Novelty, Br. 4 p.; Scotland, Pruss., Russell and Co., left for San Francisco; Union Star, Br. 7 s.; Waratah, Br. Harris; Volunteer, Br., left for Foochow.

TOW BOATS.—Bunker Hill, Banney, A. Heard and Co., laid up; Emperor, Br. 6 p. Tod, Jarvie, Thorburne and Co., laidup; Louisa, Am. 5 s., G. N. Weed, Engineer, P. T. Osborn and Co.; Martin White, Parkes, T. Hunt and Co., laid up; Titan, Wood, Jarvie, Thorburne and Co.; Tsatlee, Br. Jones, Russell and Co., laid up; Ta-Yung, Br., 95 h. p., Smith, Shaw, Brothers and Co., left; Washington, Atwill, A. Heard and Co. (for sale).

CHINESE TRANSPORT SERVICE.—Antelope, a Chinese, P. Conklin; Confucius, P. Conklin; Hyson, Quinsan, Wheelock and Co.; Illawarrah, Br. Torckler, A. Ellisen and Co.; Pluto, Sanger; Willamette, Frand, P. Conklin; Zingara, Ludlum, Wheelock and Co.

RECEIVING SHIPS IN SHANGHAI.—Ariel, Des Landes, P. F. Cama and Co., 3 s.; Anne Welsh, Endicot, 4 s., A. Heard and Co.; Berwick Walls, Floating Hospital, Capt. Ayres, 5 p.; Emily Jane, 4 s., Dent and Co.; Georgiana (Coal Hulk), 8 s., Harkort and Co.; Lady Hayes, Patridge, Jardine Matheson and Co., 5 s.; Macao, 9 p.; Melbourne, Miller, 9 p., Shaw Brothers; Ngaphui, Harbour Master, o. l; Rosa (Coal Hulk), Gamwell, 7 s.; Samuel Stoddart, Mackie, 9 s.; Sea Horse, Cambridge, Groves and Co., 2 s.; Wellington, Bennett, Sassoon and Co., 3 s.

MEN OF WAR IN CHINA AND JAPAN WATER.

SHANGHAI STATION.—Acorn, brig., depot 5 s.; Centaur, 540 H.P., Bosanquet Commander, 8 guns; Starling, 60 H.P., 3 guns, 5 s.; Vulcan, Transport, Strode; Weazel, 60 H.P., Hale, Lt. Commanding, 3 guns.

CHINKEANG.—Hardy, 60 H.P., Campbell, Lt. Commanding, 3 guns.

NANKING.—Slaney, 80 H.P., Lee, Lt. Commanding, 3 guns.

NINGPO.—Flamer, 60 H.P., Bosanquet, 3 guns.

TIEN-TSIN AND CHEEFO.—Insolent, 60 H.P., Nicholas, Lt. Commanding, 3 guns; Manila, 70 H.P., Burnett, Master Commanding.

FOO-CHOW-FOO.—Staunch, 60 H.P., Denham, Lieut. Commanding, 3 guns.

SWATOW.—Cockchafer, 60 H.P., Dayrell, Lieutenant Commanding, 3 guns.

HONG KONG.—Banterer, 60 H.P., 3 guns, laid up; Bustard, 60 H.P., Tucker, Lieutenant Commanding, 3 guns; Clown, 40 H.P., Tonkin, Lieutenant Commanding, 3 guns; Dove, 60 H.P., 3 guns; Drake, 40 H.P., 3 guns; Firm, 60 H.P., 3 guns; Forester, 60 H.P., 3 guns; Grasshopper, 60 H.P., Bennett, Lieutenant Commanding, 3 guns; Haughty, 60 H.P., Wells, Lieutenant Commanding, 3 guns; Hercules, hospital ship; Melville, Dr. Mackay, hospital; Opossum, 60 H.P., 3 guns; Princess Charlotte, Captain Nolloth, guard ship; Snap, 60 H.P., 3 guns; Watchful, 40 H.P., 3 guns, laid up; Woodcock, 40 H.P., 3 guns.

HANKOW.—Algerine, 90 H.P., Blane, Lieutenant Commanding, 3 guns.

KANAGAWA (JAPAN).—Bouncer, 60 H.P., Creasy, Lieut. Commanding, 3 guns; Coromandel, 150 H.P., Denison, Lieut. Commanding, 6 guns; Coquette, Com. Alexander, 200 H.P., 4 guns; Cormorant, Buckle, Lieut. Commanding, Despatch; Encounter, 360 H.P., Dew, Captain, 14 guns; Euryalus, 400 H.P., Joslyn, Captain, 35 guns; Havoc, 60 H.P., Poole, Lieut. Commanding, 3 guns; Hesper, 120 H.P., Boxer, Mr., Commanding, Store ship; Kestrel, 40 H.P., Dunlop, Lieut. Commanding, 3 guns; Perseus, 400 H.P., 201 guns; Pearl, 400 H.P., Borlaise, Captain, 21 guns; Race Horse, 4 c., Boxer; Swallow, (Surveying).

NAGASAKI.—Leopard, St. Fr., 18 guns, Capt. Leche; Ringdove, 200 H.P., Brown Commanding, 4 guns; Rattler, Howard.

HAKODADI.—Argus, Moore.

NARROW ESCAPE OF THE "TWEED" (INDIAN TELEGRAPH EXPEDITION) SHIP.—The fine ship *Tweed*, nearly 2,000 tons, formerly the *Punjaub*, 21-gun frigate, in the Indian service, and which has recently been chartered by Government, for the conveyance of the great Indian telegraphic cable, to be laid down between Suez, the Red Sea, to Bombay, narrowly escaped destruction by fire on the 28th August. She is lying in the junction basin of the West India Dock, where her owners, Messrs. Willis and Son, of Leadenhall-street, are fitting her out for the expedition. Three large iron-plated circular tanks have been built in her hold for the reception of the cable, and which are also to be filled with water for the preservation of the composition with which the cable is coated. At six o'clock two shipkeepers, who have charge of the ship, gave the alarm to the dock officers of the vessel being on fire. They stated they had discovered it on taking off the hatches for the workpeople. The steam tug of the dock company, which is fitted with fire-engine pumps, was at once put alongside the basin and got to work down the forehold, where the fire appeared to rage, though, on account of the dense smoke that issued forth, it was impossible to trace out its exact locality for some time. The dock-masters and superintendents of the police were soon on the spot, with other engines belonging to the company, and every available force. After working a lengthened period, it was ascertained that it was the port side of the vessel abaft the forehold that was on fire, where, fortunately, it was subsequently stopped from extending—though not without some difficulty, owing to the tank being built up close to it. Several of her timbers are reported to be burnt, and portions of her tank will have to be taken down, if it is found necessary by the surveyor to remove them. As regards the fire, there is every reason to suspect that it arose from the neglect of some of the workmen employed in the construction of the tanks, by dropping a hot rivet, or some live cinders, from a portable furnace, among some rubbish or shavings in the hold, between the tank and the side of the ship. The dock officials are of opinion that, but for the early discovery, the ship would have been, in all probability, destroyed. She is fully insured.

THE P. AND O. CO. AND EDUCATION AT SOUTHAMPTON.—Mr. Arthur Anderson (Chairman of the Board of Directors), who takes a lively interest in the welfare of the children of the men in the employ of the company, after having most successfully establishde what may be termed a Low School in the parish of St. Mary's, for the education of girls and boys, is now, we are exceedingly pleased to learn, engaged in a laudable endeavour to get up a High School, for the sons of the officers The company is now in treaty for the purchase of Bannister's house and estate for this purpose.

MR. WILLIAM HARRIS SAUNDERS, who has been for several years in the Royal Mail Steam Packet Company's London Office, has been appointed a manager of the Shanghai Tea Company. This company has been formed with the object of supplying teas, pure as imported, at wholesale prices, not only in chests and half-chests, but in smaller packages.

THE LOST TRADE OF THE BRAZILS.—The continued suspension of diplomatic relations between this country and Brazil can, in view of the extent and importance of the commerce between the two nations, be regarded only as an event to be seriously deplored. From the hastiness with which the Foreign Office acted, on grounds which have been pronounced insufficient by the King of the Belgians, to whose arbitration the dispute was referred, it might have been supposed, by persons unacquainted with the magnitude of the interests involved in the trade between England and Brazil, that the latter was a country whose custom was of no consequence to our manufacturers, and whose productions we could very well dispense with. It could scarcely have been supposed that, next to France, Italy, Holland, the Hanse Towns, and the United States, the value of the British manufactures exported to Brazil in 1861 was greater than to any foreign country with which we trade. "In examining the import tables," says Mr. Elliot, our late secretary of legation at Rio, in his report to the Foreign Office at the close of the year, "we can hardly fail to be struck with the importance of the commercial relations between England and Brazil. For the year 1860-61 the total value is estimated at 119,000,000 milreis, and one-half of that amount is of British origin, being an increase of 4,000,000 over the preceding year." The total value of the exports to Brazil rose, in 1861, to £4,690,875 from £4,571,308 in the preceding year, and nearly one-half of this amount was represented by cotton goods, the other principal articles being linen and woollen goods and iron. Except Turkey and China, no foreign country imported so large an amount of British cotton manufactures as Brazil; and her imports of our linens were exceeded only by those of Germany, Cuba, and the United States. Our imports from Brazil rose in the same years from £2,269,180 to £2,631,480, the principal articles being sugar, coffee, cocoa, hides, and caoutchouc. We import more coffee from Brazil than any other part of the world, except Ceylon; and our imports of raw hides from that country are exceeded only by those from India and the River Plate. Of the other principal items of the import trade it may be observed that Brazil supplies us with a large portion of the sugar, cocoa, and tapioca consumed in this country, and with more than half the caoutchouc and nearly all the rosewood we use. Nor ought it to be forgotten that we import from Brazil, in the present circumstances of the trade, more cotton than from any other country, except India and Egypt. There is no doubt, moreover, that the growth of cotton in Brazil will be greatly increased, consequent upon the enhanced price and the losses sustained of late years by coffee-growers through the ravages of a disease analogous to the oidium. "On the whole," says Mr. Elliot, "it may be confidently asserted that a review of the general state of the Brazilian empire and its future prospects is encouraging." It should be borne in mind that the development of our trade with Brazil, considerable as are its present proportions, has been hindered by obstacles which are now in course of removal; so that, should the relations between the two countries continue to be those of peace and amity, a great and rapid increase of both imports and exports may confidently be expected. The coffee crop is so exhaustive of the soil that, in the absence of a proper system of manuring, irrigation, &c., the proprietors are obliged to plant new trees every few years, generally further from, and consequently in less easy communication with the market. This entails the necessity of large estates, considerable portions of which lie unproductive. Improved means of intercommunication are obviously the great want of the coffee-growers, and these the Government are actively and energetically endeavouring to supply. In 1861 a ministry of agriculture and public works was created, whose attention is to be directed to providing and forwarding roads, railways, and canals, and improving riverine navigation. "It is only necessary," said Mr. Baillie, then secretary of legation at Rio, in a report made to the Foreign Office at the commencement of last year, "to take a glance at the map to perceive that Brazil abounds in magnificent rivers forming a network which pervades the whole empire. These rivers are all more or less navigable, and drain a vast extent of soil said to be most fertile, and capable of producing all the various products annually exported to foreign countries. The best means for rendering such important natural advantages subservient to the development of agriculture and commerce is an object well worthy the attention of the Government, and of all persons interested in the future progress and prosperity or this empire." The principal schemes now or lately under consideration are, the utilisation of the extensive network of navigable rivers which run into the Amazon, a railway into the coffee producing districts of Minas, the union of the centres of production in the interior with the points where stations are to be made on the Don Pedro II. and San Paulo Railways, and the connection of the different channels of communication now existing with the extensive and important upper navigation of the river San Francisco. The completion of the communication between the great coffee-producing districts and the maritime ports will tend largely to augment the export of the staple product of the country, and with it the means of the Brazilians to consume more of our manufactures. The import of cotton from Brazil may also be expected to be greatly advanced in future years. There is, therefore, every reason to anticipate a great and rapid increase in our commerce with Brazil if nothing occurs to interrupt it, and to impede the Imperial Government in their measures for opening up the interior of the country to foreign trade. Confidence in the continuation of peace is essential to the progress of all such undertakings, and equally so to the development of agriculture and commerce. Nothing would tend so much to promote such confidence as the restoration of diplomatic relations between England and Brazil, which both countries have the right to expect as the natural consequence of the decision of the King of the Belgians in the case of the officers of the Porte. The aggressive measures of Admiral Warren were taken as much on account of that affair as on that of the alleged plundering of the Prince of Wales, and there ought, therefore, to be no difficulty, at least on our side, in terminating the present unsatisfactory state of international relations.

THE P. AND O. COMPANY.—A letter from an officer in Shanghai appears in the *Army and Navy Gazette*. The writer, after stating that many of the passengers with whom he travelled from England would have been better placed as second class passengers, recommends the company to establish a third class for servants "pure and simple," so that the second class might be available for clerks, &c. No Englishman (says the writer) of any education will voluntarily sit at table with menials, be they ship's stewards or land servants; but make it possible for all to live with their equals, and you save the gentleman or lady of position much annoyance, and the over-humble young adventurer much unnecessary temptation. The season for the anomaly to which I have just alluded may be that, as a dollar here counts for a shilling at home—I mean in the usage of expenditure—and as the passages of *employes* are often paid by their engagers, people here are half ashamed to bring out young men second class. But the sooner such folly ceases the better for all parties. Allied to this is another source of small annoyance to well-bred passengers—the pursers mess in the first-class saloon. Though sometimes the contrary, they are generally clean, tidy young men, reminding one, in the best instance I have seen, of a smart cavalry corporal, minus drill and sufficiently frequent visits to the tonsorial artist. All of them seemed uneducated, and they often, I am told, thwart the captain of the ship in an underhand way. This brings me to the engineers; and when I have said that it is not *quite* an outrage to put such men at the same table with gentlemen and ladies, I have gone to the verge of veracity. Coals and water they know about; in the use of them, however, I am told they often act counter to the commander and true sailors of the ship (and the "P. and O." Company have many such gentlemen sailors). But they (the engineers) such as I have seen, are wholly innocent of all the conventionalisms of refined and educated humanity. Sometimes they are intemperate Scotchmen. Men of this and the desk clerk class do not perform their duties the better for being over-fed, over-liquored (as the Yankees would say), and underworked. Then the stewards are a very uppish class of men, and the quantity of things one may—as I did—lose on board these ships is intolerable. As a fair sample of presumption, yesterday, at the first hotel in Shanghai, a vulgar swell sat at the bottom of a table at dinner, many officers and gentlemen being in the room. The gentleman next me told me this man was the saloon steward of the "P. and O." ship he came out in. I think few will deny that the company should prevent their servants being nuisances to their passengers in this manner. The old question is one of "Who will bell the cat?" I have done it so far. *Verbum sapienti.*

THE PRIZES OF CONFEDERATE CRUISERS.—A QUESTION OF INTERNATIONAL LAW.—An application was made to the President of the Civil Tribunal, sitting in Chambers, for a judge's order under the following circumstances:—MM. Marcuard and Co., bankers in Paris, recently advanced a sum of 225,000f. on the probable proceeds of 74 bars of silver from the mines of Mexico, which they immediately sent to be essayed by MM. d'Hennin, Lunel, and Co., of the Rue Rambuteau. Some days after they learned that an attachment had been laid on the bars at the instance of Messrs. Frederick Huth and Co., of London, and they now applied for an order to authorise the sale of the silver, notwithstanding the said attachment. Their counsel stated that the 74 bars had been consigned by Messrs. Fraser, Trenholme, and Co., of Liverpool, to his clients, who received them on the 22nd inst.; but Messrs. Huth and Co. claimed the silver as their property, since it had been regularly consigned to them from Mexico, and shipped at Mazatlan, on board the ship *B. F Hoxie*, an American merchant vessel belonging to the Federal States, which was burnt at sea in May last by the Confederate steamer *Florida*, after being stripped of her cargo. The captain of the *Florida* sent these bars as lawful prize to the agents of the Confederate States at Liverpool, Messrs. Fraser, Trenholme, and Co., who forwarded them to MM. Marcuard for sale. The learned counsel concluded with demanding an order authorising their sale, without awaiting the issue of the actions as to the right of ownership now pending before the English and French tribunals. The counsel for Messrs. Huth and Co. stated that the value of the silver was 525,000f., and that his clients did not oppose the immediate sale provided the proceeds were impounded till the right of ownership should be decided. The president accordingly issued an order for the sale of the silver, and directed that the proceeds should be invested in Treasury Bonds at six months till the question of ownership should be duly decided.

THE SMALLEST CRAFT THAT EVER CROSSED THE ATLANTIC.—In a letter to a contemporary Mr. Butterfield, the son of the Admiral of that name, writes:—"In reference to a paragraph that appeared yesterday, I beg to inform you that in the year 1828 I sailed from Portsmouth in his Majesty's cutter *Scrub*, 20 tons measurement, commanded by Mr. Hill, mate R.N. The late Captain Gore Lowe, R.N., then a midshipman, and myself were passengers. We arrived at St. John's, Newfoundland, in perfect safety, after a long passage, with only three days' fair wind. We left Plymouth in company of his Majesty's brig *Clinker*, of which we lost sight in a few days, and which arrived at St. John's twenty hours before us only. The *Scrub* took out sixteen men for the flag-ship, and had three months' provision and water on board."

M. DE LESSEPS AT CHAMBERY.—The Scientific Congress of Chambery (Savoy) held a sitting a few ago, at which Ferdinand de Lesseps, who was on his way to Egypt, *via* Turin and Trieste, was present by invitation. His entrance into the hall was the signal for a loud burst of applause. At the request of M. Roux, the President, M. de Lesseps addressed the meeting, and gave an account of the manner in which the works of the Suez Canal were going on, and the development which they had already acquired. He particularly alluded to the energetic support which the French Government had given to the undertaking, and to the attempts which, he affirms, were made by England to induce Turkey to oppose it. The President afterwards presented M. de Lesseps with a gold medal offered to him by the Provincial Institute as one of the men who had merited well of humanity for carrying on such a useful work.

CHINESE AND JAPANESE REPOSITORY.—The third number of the *Chinese and Japanese Repository*, under the efficient editorship of the Rev. J. Summers, has made its appearance. It furnishes a first instalment of the promised Chinese romance—*The Elfin Foxes*, in which supernatural ideas strangely intermix with Mundane occurrences. The philosophic and theological visions of *Hung-Siu-tshuen*, which illustrate the religious element in the Kwangsi insurrection are admirably rendered by the Rev. Theodore Hamburg; these give an insight into Chinese customs, as well as Chinese religious belief. An article which will excite wide attention is that on the *Application of the Roman Alphabet to the Languages and Dialects of China and Japan*, by the editor. Specimens are given showing its feasibility and practicability. The editor also gives us a capital Chinese ballad in English verse.

Continental Intelligence.

HOLLAND.

AMSTERDAM, SEPT. 6.

Some important financial papers have been printed and distributed by the Government to the members of the Second Chamber, amongst which the revenue and expenditure of the country for the year 1858, as finally made up and closed by the court of accounts. From this document it appears that the general receipts were as follows:—

Taxes	56,466,264 Fl.	69½ Cents.
Domains..	1,191,853 „	40½ „
Post-office and Telegraph ..	1,978,229 „	65½ „
State Lottery	409,768 „	50 „
Sundries	1,758,372 „	04½ „
Contribution from the funds from sale of domains	1,000,000 „	—
Do. from disposable surplus of the financial year 1857 ..	12,000,000 „	—
Do. from the Colonial surplus..	30,555,637 „	28½ „
Total	105,361,625 Fl.	58½ Cents.

The expenditure may be lumped as follows:—

Interest on the National Debt ..	31,413,862 Fl.	87 Cents.
Amortisation of do. ..	14,433,423 „	41 „
Extraordinary expenses paid by virtue of special laws ..	496,889 „	20 „
Ordinary expenditure	38,374,009 „	02½ „
	84,718,184 Fl.	50½ Cents.

Showing an actual surplus of 20,643,441 fl. 08 cents, which has been disposed of as follows:—For the purchase and amortisation of National Debt, by virtue of the laws of 30th April, and 13th December, 1859, and 7th June, 1860, 12,951,387 fl. 30 cents; contribution towards cancelling Treasury Bills, 70,092 fl. 72 cents; additional expenditure for extra charges for the navy, 2,255,000 fl.; and extra expenses for the army, 5,356,961 fl. 06 cents.

By Royal decree of August 10, 1863, No. 91, the following is ordained:—"With reference to Art. 2, of Royal Decree of the 19th March, 1863, No. 71, stating that 'emigrants from India, China, the United States of America, the Azores, Madeira, the Canaries, and Cape Verde Islands, and other countries and places that may be hereafter named, that may be shipped by the Dutch Government to our colony of Surinam;' on the report of our minister for the colonies, dated 7th August, 1863, letter B, No. 26, we have approved the following ports of China as coming within the meaning of our said Royal Decree, viz., Canton, Foochow, Amoy, and Shanghai.

A detachment of colonial troops, under the command of Capt. H. Rietveld, of the East India engineers, returning to duty from leave of absence to this country, and accompanied by the second lieutenants of the E.I. infantry, F. Mugge, J. van den Broek, and C. H. Kobus, have left the depôt at Harderwyk to embark at Rotterdam on board the hired transport *Jacob*, Capt. J. Mulder Drenth for the East Indies, touching at St. George d'Elmina on the West Coast of Africa, to embark about a hundred negro recruits, engaged for service in Netherlands India, and to land fourteen Africans whose term of service has expired. Two officers go out in the same vessel to relieve two others at the head of the recruiting service on the coast of Africa.

H.N.M. screw corvette *Vesuvius*, of ten guns, recently returned from colonial service, has been refitted with great promptitude and despatched to the coast of Africa, where, according to accounts from the Governor of the Dutch settlement, Mr. Elias, some unpleasant difficulties have occurred between him and the neighbouring Governor of the British settlements on that coast, which require the presence of a ship of war to maintain the interests of the Dutch.

During the month of August the number of vessels that arrived in this country from the Far East was 32 (against 20 in July, and 40 in June). Of these 21 arrived at Amsterdam, and 11 at Rotterdam. Eleven brought cargoes for the Netherlands Trading Company, seventeen for the private trade, and four for both mixed. Twelve came from Batavia, eight from Sourabaya, seven from Banjoewangie, three from Padang, and two from Macassar. Among other produce these vessels landed 80,938 bags of coffee, and 41,819 kranjangs of sugar.

From the novel manner in which the Netherlands Trading Company have worded their promise not to offer any more East India coffee for sale before the month of February next, it is generally supposed that an alteration in the system of their coffee sales is about to take place. Great complaints have been repeatedly made by the merchants of the very defective system now in operation, and especially of the inconvenience of having only two sales in the year, as well as the great disadvantages arising from the combination of the purchasing brokers, who well-nigh hold a monopoly, and regulate the prices of the sales to the detriment of the merchants. If an alteration is to be introduced at all, it is hoped that the number of sales will be increased, and instead of a spring and autumn sale, with an enormous quantity in each, that there will be one of lesser quantity every two months, as is the case with the company's sugar sales.

According to the *Arnheim Courant*, a well-informed journal, a fresh expedition to Boni is about to be organised, but to a different port from that to which the two last expeditions were sent.

The number of officers of the East India Army now in this country on leave of absence is fifty-seven, among whom are eleven medical officers of the third class.

Telegraphic intelligence has been received here from Batavia that two tenders have been made for the steamboat service in Netherlands India—one by the house of Dummler and Co., in the name of Messrs. Paul van Vlissingen and Dudok van Heel, of Amsterdam, and the other by Mr. Robinson, for an English company. Both competitors made the lowest offers alternately for the different services. For all the lines together Mr. Robinson required a subsidy of 6 fl. 97 cents per mile, against 6 fl. 98 cents, the demand of Messrs. Dummler and Co. The present contractor, Mr. W. Cores de Vries, does not appear to have sent in a tender.

It is mentioned as an unusual occurrence that, amongst a batch of soldiers arrived at Harderwyk from Java to receive their discharge, is a non-commissioned officer of the name of Verwoert, decorated with the cross of the third class of the Military Order of Willem, which he had received for signal courage displayed on various occasions during his service of seventeen years in the East.

At a meeting of the elective body of shareholders of the Netherlands Trading Company, Mr. F. van der Audermeulen, whose period of service as commissioner has expired, was re-elected, and the two vacancies of substitute commissioners were filled up by the election of Mr. Jozua van Elk and Mr. J. B. Beuker.

Captain G. Fabius, commanding H.N.M. steam frigate *Zeeland*, is relieved of his command and placed on half-pay, the ship being paid off. It is stated in naval circles that this officer will shortly go out as commander-in-chief of the naval forces in Netherlands India to relieve Vice-Admiral May in the command of that station.

Lieut. W. C. de Jongh, of the Home Artillery, provisionally attached to the same branch in Netherlands India, is definitely transferred to the latter service, retaining his rank and seniority.

A letter from Nieuwe Deep states that H.N.M. steam corvette *Princess Amalia*, of nineteen guns, will be brought down there from the navy yard in this city to be fitted out for service in Netherlands India. She will be commissioned on the 1st of October, but it is not yet settled what officer will be appointed to the command.

PERSONAL.—Rear-Admiral A. A. de Vries has been relieved of his duties as Director of the Navy Yard and Commandant of the Guardship at Helvoetsluys, and is succeeded by Captain P. A. Matthysen, R.N.

Mr. D. de Graeff van Poelsbroek, hitherto Dutch Consul at Yokohama, is promoted to be Consul-General and Political Agent of the Netherlands in Japan.

Messrs. W. J. Osterhoff, D. ten Bosch, W. F. Berghuis van Woortman, J. Adriana, A. de Graag, F. J. Cornelissen, F. S. de Clercq, K. J. van der Veen, J. B. Heesen, H. van den Broeck, A. F. Heyl, and G. Sinia, have been appointed medical officers for the third class of the army in India.

Dr. C. A. Bergsma, of the E. I. Civil Service, attached to the Geographical Department in India, and Mr. H. D. Levysshon Norman, Referendary of the Supreme Government in N. India, have been elected foreign members of the Utrecht Provincial Society of Arts and Sciences.

Mr. J. M. Jacobson, of Samarang, has been recognised as Consul of the King of Wurtemberg for Java, Sumatra, and Macassar.

The Assistant-Resident of Siak, Mr. J. A. Arnold, has received the Royal permission to retire from the service with claim to a pension.

Mr. S. Locker de Bruyne, of the E.I. Civil Service, is appointed Assistant-Resident of Siak, *vice* Arnold resigned.

Mr. A. H. Swaving has been appointed Assistant-Resident of the Eastern District of Sandjai in Celebes.

Lieut. Timmerman Thyssen, of the East India Artillery, and Lieut. W. F. Schenck, of the same service, have received orders to repair to Java, and go out this month by the French mail steamer.

COMMERCIAL.

COFFEE.—Since last mail the market continues in a favourable position, and there is an increased demand for yellow and bright yellow descriptions in some instances at a slight advance in the prices. Among the sales are 2,200 bags of Padang per *Hjalmar* and 1,870 bags of Macassar ex *Elisabeth Jacoba*, as well as 1,000 bags of yellow Padang at from 48½ to 53 cents, and 7,075 bags of bright do. at 46½ to 48 cents. The market closes firm, and prices looking up.

TEA.—The sale mentioned in last report went off with spirit, all being sold as follows:—616 quarter chests of Congou, that marked Blohn fetched 85 to 98 cents, JM 70 to 71, TS 122 to 125, and WP 81 cents; the 53 packages of Japan realised 125, being rather less than the valuations of the brokers.

The Netherlands Trading Company have announced the following teas for the sale on the 1st of October:—15,566 packages in warehouse in this city and 5,725 do. at Rotterdam; together 21.291 packages of Java tea The announcement has had no influence on the market, which continues firm.

SUGAR.—For the raw article there was a poor demand, and the few sales effected realised 1¼fl. below last sale's prices. At this figure 708 Kranjangs of Probolingo No. 10 to 11, ex *Eva Johanna* were disposed of. The company have advertised 31,000 Kranj. of Java for public sale on the 17th inst. In Refined no alteration in values.

RICE.—Two cargoes of Arracan and Rangoon uncleaned found purchasers at secret prices. Clean grain calm in the absence of orders to buy.

SPICES.—Some sales of Nutmegs No. 2 and Cloves have been effected at an advance of 2 to 3 cents on the company's late sale prices. Cinnamon in demand and 10 cents higher, No. 3 fetching 103 cents.

TOBACCO.—The dealings have been limited in the face of two sales advertised, one for the 8th inst. in this city, and the other for the 10th at Rotterdam. The former will contain 5,276 bales of Java, and the latter 5,232 do., by which the stocks will be pretty well cleared off, as the total is only 10,887 bales.

HIDES meet an easy sale; 3,326 Java Ox and 993 Buffalo were sold by tender.

TIN.—The opinion for this article is rather better than by last mail, and Banca is not to be had under 74fl., though at that figure no sales are reported.

CAMPHOR is in great favour, especially Japan.

RATTANS rule firm with an easy sale. 2,121 bundles ex *Hjalmar* and 3,400 do. ex *Harald* were disposed of at full prices.

DRUGS.—At a public sale held here on the 1st inst. 166 bags (95 piculs) of E. I. India Rubber were sold at 89½ to 92fl., and 86 bags (44 piculs) of cubebs (part damaged) 40½ to 41 cents.

SALES OF SHIPS IN HOLLAND.

At Amsterdam,	schooner brig Livorno Packet, 150 tons ..	9,000 fl.

FRANCE.

THE POSITION IN JAPAN.

The *Moniteur* publishes a letter from Yedo, dated July 5, which states that notwithstanding the decree of expulsion against the foreigners, their position in Japan was relatively better than formerly. Admiral Juarez had divided the defence of Yokohama with Admiral Kuper, and it had been arranged that if it became necessary to fortify the place, the French and English artillery should co-operate with that object. On the 1st July an envoy from the Tycoon waited upon the French minister, and requested that some ships of war might be placed at the service of the Japanese Government for the transport of troops to Kioto. This request could not be complied with, and it was arranged that merchant vessels should be employed. On the following day the envoy had another interview, and the representatives of France and England proposed that the Tycoon should open the port of Hiago and the town of Osacca as evidence of the goodwill by which he declared himself to be animated, and as the only means of mitigating the serious consequences which the expulsion decree would occasion in Europe. The reply of the envoy was evasive. The correspondent of the *Moniteur* says that the position of affairs was tranquil, and that foreigners had no intention of leaving their establishments. He states, in conclusion, that Admiral Juarez had been reinforced by two French vessels, and that Colonel Neale had written to China for reinforcements.

A pamphlet, entitled "France, Mexico, and the Confederate States,' and supposed to be from an official source, has made a great sensation. It shows the advantages to France of a recognition of the South.

The privateer *Florida*, sailing under the Confederate flag, has entered Brest to repair damages. Her commander will not be allowed to make purchases tending to recruit her armament of war.

The *Pays* believes that the acceptance of the Mexican throne by the Archduke Maximilian no longer admits of doubt.

The Scientific Congress, at its sitting at Chamberry, presented a medal of honour to M. Lesseps, of Suez celebrity.

The conditions brought by Nubar Pacha from Constantinople relative to the Suez Canal are said to be almost unacceptable. We believe ourselves able to state that M. Drouyn de Lhuys demands the strict execution of the programme agreed upon between the late Viceroy of Egypt and the Suez Canal Company.

During the last week the French nobility has lost four ladies of the highest rank, and whose families belong to the oldest of the great aristocracy—1. La Marquise de Mortemarte, *nee* Anne de Montmorency; 2. La Comtesse de Bethune, *nee* Flaminie Doria; 3. La Comtesse de Moray; and 4. La Marquise de Grammont (*non* Gramont), daughter of the Duc de Crillon, the last of the French descendants of the noble friend of Henri IV. It must be borne in mind that the Grammonts are altogether a different family from the Gramonts to which the Duc de Guiche and the Duc de Caderousse belong, although they are often indiscriminately written, pronounced, and generally confounded. It is generally believed that the Montmorencies descended from the first Christian baron are extinct; but there are two ladies who still represent the elder branch—La Comtesse de la Chatre and La Marquise de Biencourt. The branch of Montmorency Luxembourg still exists in the person of the duchess who bears the latter title.

HAMBURG.

From the official tables just published by the Board of Commercial Statistics of the trade of the city last year, the imports direct from China are described as follows:—

Article.	Quantity.		Value in marks Banco.
Tea .	.. 10,090 chests, 28 packages	6,627 centners	742,510
Cassia Lignea	18,130 „ 740 bales	11,139 „	629.610
Oil of Star Anis.	700 „ chests	405 „	169,940
Camphor, raw	158 casks 900 chests	1,071 „	150,250
Sugar	.. 24,133 bags	7,772 „	112,670
Oil of Cassia	116 chests	66 „	41.410
Natural curiosities	80 chests, 50 packages		29,520
Passengers' effects	138 „ 6 „		27,220
Cassia flores	128 „	146 „	22,860
Galls ..	.. 464	537 „	21,660
Requisites for matches	2,040 chests, 175 pkgs.		16,150
Porcelaine	179 chests		10,360
Silk manufactures	24 chests, 4 bales		10,280
Star-annis.	100 chests	116 „	7,500
Canes for walking sticks,	96,000 pieces		7,410
Mats	314 packages		6,900
Preserved Ginger	341 chests, 7 packages	107 „	6,280
Rhubarb	18 chests	21 „	4,250
Tobacco	68 packages	05 „	2,310
Vermilion	20 chests	11 „	2,160
Paper	16 chests		1,390
Cigars	17 chests	25,000	1,120
Grass-linen	2 packages		440
Other articles			28,950
Total value—marks Banco	.. ..		2,053,150

The value of the imports from the different ports of the East is thus given:—

From China.	Marks Banco	2,053,150
„ the Philippine Islands	„ „	322,150
„ the Sandwich Islands	„ „	167.190
„ the Navigator's Islands	„ „	34,240
„ British India	„ „	2,051,770
„ Singapore	„ „	452.240
„ Netherlands India	„ „	872,890
„ Siam	„ „	123,700

The vessels that sailed from Hamburg to the Far East in 1862, were as follows:—

To China	30 ships.	..	9,582 tons.
„ Philippine Islands ..	2 „	..	789 „
„ Netherlands India ..	3 „	..	903 „
„ Siam	2 „	..	891 „
„ British India	12 „	..	5,130 „
„ Sandwich Islands ..	1 „	..	372 „
„ Navigator's Islands ..	2 „	..	276 „
„ Russian Asia ..	1 „	..	339 „

DENMARK.

The Danish merchant service, which has considerably increased within the last few years, consisted in 1860 of 5,653 vessels, gauging 246,340 tons. Of those 716, or 13 per cent., were of 100 tons and above; 1,290, or 23 per cent., of from 30 to 100 tons: and 3,647, or 64 per cent., of 30 tons and under; 336 vessels—together measuring 41,482 tons—belonging to Copenhagen, and of these 176, or 52 per cent. were of 100 tons and upwards; 91, or 27 per cent., of from 30 to 100 tons; and 69, or 21 per cent., of 30 tons and under. The steamers were 56 in number, measuring 3.172 tons, with engines of 3,737-horse power. Of the total service, the shipping of the Duchy of Holstein measured only 45,822 tons, whilst more than 200,578 tons belonged to the kingdom, properly speaking, and to Schleswig, the latter possessing 61,524 tons. The entry to the port of Elsinore having been proved to be impracticable for large steam-vessels, a meeting of the consular body, under the presidency of the Consul of France, lately took place, to obtain a remedy for that hindrance to commerce. The proceedings were favourably received, and the Danish Minister of the Interior has taken measures which give reason to hope that the port will be rendered accessible to any vessels in all weathers.

A telegraphic despatch from Copenhagen states that England has protested against the blockade of the Hanse Towns in the event of the Germanic Diet proceeding to "Federal execution" in Holstein.

The note from Denmark to the Diet declares that the Copenhagen Cabinet is ready to take into consideration the proposals of the Confederation with respect to Schleswig, and to comply with them so far as they do not trench upon the sovereign rights of the King. But it will go no further, and a Federal execution, which is threatened, will be held to be not an act within the Confederation, but one to be dealt with under the provisions of international law—an act of war, in short.

The London & China Telegraph.

LONDON, MONDAY, SEPT. 14, 1863.

THE POSITION IN JAPAN.

THE enforcement of our claims on the Japanese Government is bringing more and more into relief the complex political autonomy of that strange and isolated empire. The Spiritual and Temporal EMPERORS continue to play different parts, and at the very time our demands are being acceded to, suffer, if they do not actually direct, the flags of three foreign nations to be insulted. The centre of power is for all practical purposes a point continually shifting; however, it is to the TYCOON we went, and from the TYCOON we have obtained a certain measure of redress, including an agreement as to the form of an apology to be tendered, the grace of which is abundantly qualified by the arbitrary decree emanating from the MIKADO or the TYCOON, or both, for the expulsion of foreigners. As to the money indemnity, it is to be regretted that we should have allowed the Japanese so far to play their own game as to allow native officers to charter steamers to proceed to Osaka, the great commercial emporium of the empire, where they will not fail to represent these steamers as having been purchased with the indemnity money. Misrepresentation in deeds and words is the very element in which Japanese officials live and move and have their being. The firing on an American steamer, a French despatch vessel, and a Dutch war steamer was evidently designed, not simply for a short demonstration, but to impress us and other foreigners with the belief that, notwithstanding our demands had been acceded to by the TYCOON'S Government, that Government is powerless to control the inherent hostility of Princes and people; that whatever the redress obtained directly from the TYCOON, and however ample the terms of his apology, there is no security to foreign residents against the recurrence of outrages similar to that for which we presented our ultimatum. It is satisfactory that the foreign residents of Yokohama will be able to hold their ground. Although a position at Yedo and Kanagawa is untenable, this holding one spot of *terra firma*, despite a decree of expulsion, will not fail to have its due effect on Japanese officials, who are likely to have the opportunity of learning the stubbornness and tenacity with which Englishmen hold their own. In addition to the punishment of the murderers of Mr. RICHARDSON, we have yet to get satisfaction for the high-handed act of destroying the Legation building at Goten-yama, in the vicinity of the capital, and at the very moment when the satellites of the TYCOON are representing to the Japanese people how finely they have out-manœuvred foreigners, they are destined to hear destructive salutes from the cannon's mouth of at least one American man-of-war, the commander of which is not likely to wait instructions from Government before enforcing satisfaction. No Yankee will put up with Japanese diplomacy; and any number of the two pillared Mexican dollars is little likely to allay the wrath of the Federal commander. Notwithstanding all the intrigue, official insolence, prevarication, and lying we have had to face, it is evident we are in a fair way to make good the present occasion to secure the long-deferred opening of the port of Osaka. The Japanese people themselves are far from being averse to trade; the oppressive municipal regulations which have interfered with the intercourse of the common orders to the port already opened, were prompted and enforced by officials whom it is their business to dread and obey. When our merchant vessels ride in view of the vast population inhabiting that gigantic village, an effectual answer will be given to the representations by which the people have been bamboozled into the belief that our stay was temporary, and that Japan was to be left to supply her wants from her own resources. The execution of the full terms of the last treaty should never have deen delayed. With all the local disadvantages of Yokohama—a low beach, surrounded by a swamp, our trade has rapidly increased, the liberal policy and dealings of our merchants having obtained for them a preference over the Dutch, whose trade in Japanese waters appears to be far from flourishing. The geographical position that has heretofore favoured Japanese isolation will, when present barriers to commerce are removed, lead to a rapid development of our trade in those waters.

THE SCOURGE OF THE FLOWERY LAND.

THE early history of all our Eastern settlements has been marked with virulent epidemics, for which experience has ultimately suggested remedial agencies, sufficient at least to keep their visitations within ordinary bounds. Our Chinese settlements have proved no exception; the epidemics that sweep over the densely-populated northern regions touch from time to time, as with expanded wings, close upon our own communities, and but for the confidence that medical skill and individual care will yet be able to avert these epidemics, the prospects of foreign residents would be far from hopeful. In our last issue we gave an extract from the *North China Herald*, adverting to the unhealthy character of the climate, an article occasioned by a pamphlet on the means of preserving health in China generally, and Shanghai particularly, by Dr. HENDERSON, of the Chinese hospital. It is evident, from the remarks on the work made by the *Friend of China*, that it has been welcomed as a contribution to the science of hygeine. The doctor recommends what doctors recommend everywhere—exercise, baths, and careful regard to diet. Let the frame be once weakened, and the insidious enemy will be sure to find ready entrance. For all this, the work, coming as it does as a monition to foreign residents, and embodying the result of local observation and long experience, cannot fail to prove valuable. The art of prevention is apparently so obvious that its very simplicity would seem to encourage disregard to its requirements. The *Friend of China*, in its *critique*, remarks:—

"Dr. Henderson does not dwell sufficiently, we think, on the necessity for regularity and plentifulness of sleep. Dietary, drink, clothing, bathing, all are as nought in comparison with the influence of repose. In a note at page 74, Dr. Henderson refers to the great mortality among the troops at Hong Kong in the years 1842-43, the deaths being after the rate of from 199 to 220 per thousand. Many were the theories propounded at the time to account for that mortality; but the great cause of all was almost altogether overlooked. Connected with the department of public works at the time, we made many inquiries of the soldiers themselves as to what they thought was the cause of their ailment. The general answer was this—'Those barrack-rooms are too close to sleep in. We toss about, rise, bathed in perspiration, fling ourselves on the cold tiles of the verandah, sleep, and awake in the early morn chilled; we complain to the doctor; he gives us quinine, but stops our rum, and there is no medical comfort in its place.' And so it was that, with fever, induced by the desire to get sleep, the medical men, instead of increasing, abridged the allowance of customary stimulant; upon that the men sickened, and died like rotten sheep!"

The comments made by FLORENCE NIGHTINGALE on the army sanitary reports, submitted to her by the Government previous to their publication, and which are now published as an appendix to those reports, fully confirm this view. If more than an English allowance of rest and repose be necessary in the China climate, residents there should at once seek to curb that too feverish anxiety which the urgent pursuit of wealth, aided by the heat and general insalubrity of the climate, is apt to engender. As to the theory that the atmosphere of China has been vitiated—that the air has permanently lost a portion of its vitality from the dense population with which China is thronged—we give little weight to it. Although China is indeed of the "earth, earthy," a vast graveyard over which 400,000,000 pairs of lungs are incessantly at work, with "densely-packed dwellings" superadded, the atmosphere has doubtless its own means of recovering the oxygen thus absorbed, and those long-standing conditions of the atmosphere in which the thermometer ranges from 85 to 95, as at Shanghai from the 1st to the 14th of July last, must only be regarded as a periodic visitation of a wholly exceptional character so that the recurring visitations of such symptoms as cholera and dysentery, especially prevalent at a season when the atmosphere is unduly charged with electricity, may be anticipated and duly provided against. We need not go further than the fact that in Shanghai and its suburbs, owing to the liability of the soil to flooding, the graves are liable to be opened, and the dead exposed, without any miraculous intervention. The Oxford Mission party has found that putrefaction from animal and vegetable remains will engender an epidemic even on the cool table lands of Africa; and under present conditions the occurrence of cholera, with its awfully sudden deaths, in the foreign settlements of Shanghai, is certainly no wonder. Amidst British residents, we have to deplore the loss of Mr. HENRY TUDOR DAVIES and Mr. ARNOLD, both Commissioners of Chinese

Digitized by Google

Customs. It remains with the municipality of the English settlement at Shanghai to concert with the Chinese officials measures for enforcing those sanitary measures which it is now discovered will have the effect of averting the proximate causes of these visitations. In our opinion, the great influx of Chinese into the settlement has also had its influence on this result—far more, indeed, than landlords would be willing to admit.

ARRIVAL OF THE ANNAMITE AMBASSADORS IN FRANCE.

IN our issue of the 28th ult. we announced the arrival of the long-heralded Annamite Ambassadors at Suez, *en route* for France. By telegram we now learn of their subsequent arrival at Toulon, and of their disembarkation and official reception by the authorities of that port. It is hardly to be supposed that the Embassy comprehends anything of its special mission beyond the business of delivering presents as a means of propitiating the favour of a powerful Emperor. The whole ceremony of presentation, with all the barbaric pomp with which it will be spiced, will prove in reality a hollow mockery—a vain and inglorious show—the extortion of forms of respect from those who cannot feel it, the acceptance of presents prepared in the hope of mitigating a wrath that was feigned, and awaiting plans of further territorial conquest which are only for the moment in abeyance. The treaty concluded by the EMPEROR with the Annamite Sovereign was but the embodiment of his own Imperial behest. For the Far East he acts with all the absoluteness of an Asiatic prince, in that arbitrary style which a semi-barbaric race can so well appreciate, and as an Asiatic prince he will be treated. The poor fools who have travelled sea and land to perform their obeisances are not to be laughed at; the visit is designed to strike everyone as a splendid diplomatic achievement, seeing that the cannon's mouth alone has secured to France a position in the China seas; it will serve, moreover, to tinge with Oriental romance more than one page of the history of France—a history already embalming so many splendid myths. For the rest, these Annamites cannot fail to be largely entertaining at a court that has always delighted in theatrical scenes. Self-glorification is dear to Frenchmen, and here is the provided material to fan it into a flame.

THE TELEGRAPH TO INDIA.

THE *Kirkham* has left with an instalment of about 187 miles of cable for the Persian Gulf line. The *Tweed*, *Assaye*, *Cospatrick*, and steamer *Charente* will shortly follow.

THE TRANSFER OF THE STRAITS SETTLEMENTS.

WE are happy to announce that the negotiations for the transfer of the Straits Settlements have nearly terminated. The last stumbling-block is the amount expended on the fortifications at Singapore, ordered by the Indian Government. The sum is, we believe, £20,000, and it is expected that this will be allowed by Sir CHARLES WOOD.

REINFORCEMENTS FOR CHINA AND JAPAN.

WE understand that orders have been sent to India to send on to China the 2nd Battalion of the 20th or 21st Regiment, which left this country lately for India.

It is rumoured that Rear-Admiral Sir JAMES HOPE, late Commander-in-Chief of the China station, will be appointed to the West India command.

LAUNCH OF TWO P. AND O. STEAMERS, &c.

ON the 29th inst. the Thames Iron Ship-building Company launched the screw-steamer *Golconda*, of 2,000 tons, and 400-horse power. The ceremony of christening was performed by Miss Allan, daughter of one of the managing directors. On the same day the *Baroda*, of similar size, was launched from the yard of Messrs. Mare and Co.

In addition to the vessels mentioned in our last, as specially intended for the China trade, we have to record the launch of the *Young Lochinvar*, from the yard of Messrs. Steele and Co., on the Clyde. This vessel is owned by Messrs. M'Diarmid and Greenshields, of Liverpool. The following are the dimensions and tonnage:—length of keel and fore-rake, 183 feet; breadth of beam, 31 feet; depth of hold, 19 feet 9 inches; tonnage (builders' measurement), 824. Her lower and topmasts and lower and topsail-yards are of steel. The latter are fitted with Cunningham's patent reefing apparatus, and the ship is provided with every other modern improvement adapted to the trade between England and China. She will be commanded by Captain Robert Glass, jun., son of Robert Glass, Esq., of Liverpool.

ALLIANCE WITH RUSSIA.

(*New York Herald*)

According to the rumours afloat in Washington, and which do not lack an air of great probability, a sort of convention has been agreed upon between Clay and Gortschakoff, to the effect that in the event of the Western Powers declaring war against Russia, the United States would lose no time in declaring war against France and England—against the former for its invasion of Mexico, against the latter for its piratical alliance with the Confederate States.

We assume that, so far as Russia is concerned, such a proposition could not fail to meet with the highest favour. This is the second time within the reign of the present Czar that he has found England and France arrayed in hostility to his empire, and an alliance that will enable him to make front against these hostile Powers cannot but be acceptable. France is now, as she was in 1854, the head of the European coalition formed against Russia. England now, as then, is forced to follow in the wake of France, through a well-grounded fear of her great rival and neighbour. To humiliate them, instead of submitting to humiliation from them, is the most natural desire of the Czar's heart; and what more promising mode of gratifying it than by entering into a treaty offensive and defensive with the United States? Such a treaty would apply neither to the Polish struggle against Russia, nor to the rebel movement here, but would simply be an alliance between Russia and the United States as against France and England.

MR. SEWARD TO THE CONSULS IN EUROPE.

Mr. Seward has addressed a circular, dated Washington, Aug. 12, addressed to the United States consuls in Europe, on the progress of the late campaigns and the present position of the opposing armies. He refers back to his circular of 14th April, 1862, written to correct the prejudice then existing, as it does now, in England and France, that the efforts to preserve the Union could not be successful. This prejudice, he says, has caused the premature decrees of England and France recognising the insurgents as belligerents, and still constitutes the basis of all that is designedly or undesignedly injurious to his country in the policy of foreign nations:—

"The insurgents have been enabled to protract their resistance by means of the sympathy and aid they have received from abroad, and the expectation of further and more effective foreign assistance is now their chief resource. A new effort, therefore, to correct that prejudice is demanded, equally by a prudent concern for our foreign relations, and by the paramount interests of peace and humanity at home."

Mr. Seward admits that in August, 1862, the Union armies in Virginia sustained severe and appalling reverses, but they resulted in the re-union with that army of the army from the peninsula below Richmond. The invasion of Maryland was accordingly checked by the battle of Sharpsburg, which was well sustained on both sides—the numbers being nearly equal:—

"The arrogant assumption of superior valour and heroism which the insurgents had brought into the contest, and had cherished throughout its early stages, perished on that sanguinary field. The insurgent army, shattered in the conflict, abandoned the invasion of Maryland, and sought refuge and opportunity to recover its wasted strength in Virginia behind its accustomed barrier, the Potomac."

While this was going on in Maryland, Bragg was menacing Louisville and Cincinnati, but had to retreat with severe losses after the obstinate and bloody battle of Perryville. Van Dorn and Price, in Mississippi and Alabama, intending to invade Western Tennessee and Kentucky, were defeated before even reaching these places by Rosecrans, at Corinth:—

"General Rosecrans, called to succeed General Buell in command of the army of the Cumberland, then entered Nashville, which the insurgents had before invested in carrying out their general scheme of invasion. He raised the siege and prepared for offensive action. In the last days of the year he issued from Nashville, and delivered a sanguinary battle at Stone River, which gave him possession of Murfreesborough; Bragg retreated to Shelbyville and Tullahoma, and there again rested and entrenched. A long period of needed rest was now employed by the respective parties in increasing the strength and efficiency of their armies; but this repose was broken by frequent skirmishes and by cavalry expeditions, which penetrated hostile regions sometimes hundreds of miles, and effected breaches of military connections and a destruction of military stores upon an extensive scale, while they kept up the spirit of the troops, and hardened them for more general and severe conflicts."

Mr. Seward next describes the campaign which ended in the capture of Vicksburg, which capture, he says, was as remarkable as the famous one made by Napoleon at Ulm.

Mr. Seward then describes the campaign in Virginia, from the battle of Sharpsburg to Lee's last retreat across the Potomac. Of the battle of Fredericksburg he says, "General Burnside's assault upon Lee's well-fortified position failed. He skillfully recrossed the river without loss." Of the battle of Chancellorsville—

"General Hooker crossed the Rappahannock, and accepted a battle, which proved equally sanguinary to both parties, and unsuccessful to the army of the Potomac. The heights of Fredericksburg were captured by General Sedgewick's corps, but the whole army was compelled to return o the north bank of the river."

Digitized by Google

Of the battle of Gettysburg and Lee's subsequent retreat :—

"The two armies met at Gettysburg, in Pennsylvania, and after a fierce contest of three days' duration, and terrible slaughter on both sides, the insurgents recoiled from the position held by General Meade, who had then been only four days in command of the army of the Potomac. On the 4th of July, the day of the surrender of Vicksburg, Lee retreated, passing through Chambersburg and Hagerstown to Williamsport, where the proper disposition to attack him was made by General Meade. Deceived concerning the state of the river, supposed to be unfordable, General Meade, hourly expecting reinforcements, delayed the attack a day too long, and the insurgents, partly by fording and partly by floating bridges, succeeded in withdrawing across the river by night, with their artillery and a great part of their baggage. Much of this baggage, as well as of the plunder which Lee had collected, was destroyed by cavalry, or thrown out of the waggons to make room for the wounded whom Lee carried off from the battle-field. He had buried most of his dead of the first day's conflict at Gettysburg. The remainder, together with those who fell on the second and third days of the battle, in all 4,500, were buried by the victorious army. Many thousand insurgents, wounded and captives, fell into the hands of General Meade. It is not doubted that this second unsuccessful invasion cost the insurgents 40,000 men. Our own loss was severe, for the strife was obstinate and deadly. General Meade crossed the Potomac. Lee retired again to Gordonsville, where he is now understood to be in front of our forces."

Mr. Seward then refers to Rosecranz's advance towards Chattanoga, and the cavalry expeditions of General Stoneman and Colonel Grierson, concluding his review of the campaign by an account of the capture of Morgan. He then sums up as follows :—

"This review of the campaign shows that no great progress has been made by our arms in the East. The opposing forces there have been too equally matched to allow great advantages to accrue to either party; while the necessity of covering the national capital in all contingencies has constantly restrained our generals, and forbidden such bold and dangerous movements as usually conduct to brilliant military success. In the West, however, the results have been more gratifying. 50,000 square miles have been reclaimed from the possession of the insurgents. On referring to the annexed map it will be seen that since the breaking out of the insurrection the Government has extended its former sway over and through a region of 200,000 square miles, an area as large as Austria or France, or the peninsula of Spain and Portugal. The insurgents lost in the various field and siege operations of the month of July which I have described one-third of their whole forces.

"Jefferson Davis, the leader of the sedition, has since proclaimed a levy of all the able-bodied men within his military lines. This, if carried into effect, will exhaust the whole material of which soldiers can be made. The insurgents estimate the total number of conscripts thus to be gained at from 70,000 to 95,000. Our armies now confront the insurgents at all points with superior numbers. A draft for 30,000 more is in progress to replace those whose term of service have expired, and to fill up the wasted ranks of our veteran regiments; and the people, just so fast as the evidence of the necessity for that measure is received and digested, submit with cheerfulness to the ascertained demands. Our armies everywhere are well equipped, abundantly fed, and supplied with all the means of transportation. The soldiers of two years' service bear themselves as veterans, and show great steadiness in every conflict. The men, accustomed to the camp, and hardened by exercise and experience, make marches which would have been impossible in the beginning of the contest. The nation is becoming familiar with arms, and easily takes on the habits of war. Large voluntary enlistments continually augment our military force. All supplies are abundantly and cheaply purchased within our lines. The country shows no sign of exhaustion of money, material, or men. A requisition for 6,200 remount horses was filled, and the animals despatched from Washington, all in four days. Our loan is purchased at par by our own citizens, at the average rate of 1,200,000 dols. daily. Gold sells in our market at 123 to 128, while in the insurrectionary region it commands 1,200 per cent. premium.

"Every insurgent port is either blockaded, besieged, or occupied by the national forces. The field of the projected Confederacy is divided by the Mississippi. All the fortifications on its banks are in our hands, and its flood is patrolled by the Federal fleet.

"Missouri, Kentucky, Delaware, Maryland—all slave States—support the Federal Government. Missouri has already in convention ordained the gradual abolition of slavery, to take effect at the expiration of seven years. Four-fifths of Tennessee, two-thirds of Virginia, the coasts and sounds of North Carolina, half of Mississippi, and half of Louisiana, with all their large cities, part of Alabama, and the whole sea coast of Georgia and South Carolina, and no inconsiderable part of the coast of Florida are held by the United States. The insurgents, with the slaves, whom they yet hold in defiance of the President's proclamation, are now crowded into the central and southern portions of Virginia, North Carolina, South Carolina, Georgia, and Alabama, while the pioneer slave-holding insurgents beyond the Mississippi are cut off from the main force. On the other hand, although it is less than six months since the laws or customs of the United States would allow a man of African descent to bear arms in defence of his country, there are now in the field 22,000 regularly enlisted, armed, and equipped soldiers of that class, while fifty regiments of 1,000 each are in process of organisation, and 62,800 persons of the same class are employed as teamsters, labourers and camp followers. These facts show that, as the insurrection continues, the unfortunate servile population, which was at the beginning an element of its strength, is being transferred to the support of the Union."

In conclusion the consuls are directed to "use the facts presented in this paper in such a way as may be most effective to convince those who seek a renewal of commercial prosperity through the restoration of peace in America, that the quickest and shortest way to gain that desired end is to withdraw support and favour from the insurgents, and to leave the adjustment of our domestic controversies exclusively with the people of the United States."

THE AMERICAN FOREIGN ENLISTMENT ACT.

The Supreme Court of the United States was called upon in 1822 to consider the application of the Act of Congress of 1794 to the case of a vessel, which had been fitted out and armed by some merchants of the port of Baltimore in 1817, and sent by them to Buenos Ayres for sale, where she had been purchased by the *de facto* Government of Buenos Ayres, at the time engaged in war against Spain.

"It is apparent," said Mr. Justice Story, in delivering the judgment of the Supreme Court—

"That although equipped as a vessel of war, she was sent to Buenos Ayres on a commercial adventure, contraband indeed, but in no shape violating our laws or our national neutrality. If captured by a Spanish ship of war during the voyage, she would have been justly condemned as a good prize for being engaged in a traffic punishable by the law of nations. But there is nothing in our laws, or in the law of nations, which forbids our citizens from sendiing armed vessels, as well as munitions of war, to foreign ports for sale."—7 Wheaton Reports, p. 283.

A later judgment of the same Supreme Court in 1832 in the case of a vessel called the *Bolivar*, otherwise *Las Damas Argentinas*, is still more conclusive. That vessel had been fitted out and equipped at Baltimore by the defendant, John D. Quincy, and sailed from that port to the island of St. Thomas, in the West Indies, the owner and equipper, as he averred, intending when he left Baltimore to go in search of funds, with which to arm her and prepare her for a cruise as a privateer. Mr. Justice Thomson, in delivering the opinion of the Supreme Court, to the effect that the jury ought to be instructed that the defendant was not guilty, if it should be of opinion that this averment was proved, said :—

"The offence consists principally in the intention with which the preparations are made. These preparations, according to the very terms of the Act, must be made within the limits of the United States; and it is equally necessary that the intention with respect to the employment of the vessel should be formed before she leaves the United States. And this must be a fixed intention, not conditional or contingent, depending upon some future arrangements. This intention is a question belonging exclusively to the jury to decide. It is the material point of which the legality or criminality of the act must turn; and decides whether the adventure is of a commercial or warlike character. The law does not prohibit armed vessels belonging to citizens of the United States from sailing out of our ports; it only requires the owners to give security (as was done in the present case) that such vessels shall not be employed by them to commit hostilities against foreign Powers at peace with the United States. The collectors are not authorised to detain vessels, although manifestly built for warlike purposes, and about to depart from the United States, unless circumstances shall render it probable that such vessels are intended to be employed by the owners to commit hostilities against some forein Power at peace with the United States.

"All the latitude therefore necessary for commercial purposes is given to our citizens, and they are restrained only from such acts as are calculated to involve the country in war."

The Times on this subject says :—

"Even the Foreign Enlistment Act of the Americans themselves was not designed to forbid the sale of vessels of war by American citizens to a belligerent State. The old principle of the international law on the question pervades and characterises the municipal law of the present time. The citizens of a neutral State may deal in war ships precisely as they may deal in munitions of war—that is to say, in the way of pure and genuine commercial adventure. So long as the transaction is one of bargain and sale only, involving no participation in the war on the part of the vendor, and no preference to one belligerent over the other, the trade is lawful. A shipbuilder might send a vessel of war actually 'equipped' to a belligerent port for sale, and the adventure would only be contraband, and not unlawful. A vessel manifestly built for warlike purposes might be taken out to sea by Americans from an American port without any violation of American law, provided only that there was no design on the part of the owners themselves to engage in hostilities. They must not fight the vessel, but they may sell it to those who will. In short, to make a practical application of the doctrine thus laid down, the Americans might have built for the Russians during the Crimean War as many line-of-battle ships as they pleased, on condition only that they built them simply for sale as articles of trade, and did not refuse to execute orders of the same description from us."

THE CONFEDERATE CRUISERS.

This subject has had considerable discussion, and, owing to the closed doors of Parliament, the interest in the question has been very general; indeed, more earnest than in the Frankfort Congress, the Polish question, or the Mexican sovereignty. The first stir was given by the *Florida* taking and burning an American vessel, only about thirty miles off the Irish coast. The vessel was the *Anglo-Saxon*, from Liverpool to New York. Shortly after this the Emancipation Society addressed a protest to Lord John Russell on the subject of two vessels building at

Digitized by Google

Laird's yard on the Mersey, to which the following reply was given :—

"Foreign Office, August 31, 1863.

"Gentlemen,—I have received your letter calling my attention to a subject of very grave and pressing importance—namely, the fitting out and equipping of two powerful iron-plated steam-rams, which you are informed are intended to commit hostilities against the Government and people of the United States of America. My attention has long been directed to this subject. Both the Treasury and the Home Department have, at my request, made the most anxious inquiries upon the subject of these steam-rams.

"You are aware that, by the Foreign Enlistment Act, a ship is liable to be detained, and its owners are subject to penalties, when the ship is armed or equipped for purposes of war, and its owners intend to use it against some State or community in friendship with her Majesty. It is necessary to prove both the equipment and the intention. But in order to prove the equipment and the intention, it is necessary for conviction in a British court of justice, to have the evidence of credible witnesses. I was in hopes, when I began to read your memorial, that you would propose to furnish me with evidence to prove that the steam-rams in question were intended to carry on hostilities against the Government and people of the United States of America. But you make no proposal of the sort, and only tell me that you 'are informed' so and so, and 'it is believed' so and so.

"You must be aware, however, that according to British law, prosecutions cannot be set on foot, upon the ground of the violation of the Foreign Enlistment Act, without affidavits of credible witnesses, as in other cases of important misdemeanors and crimes. Such likewise, is the law in the United States of America.—I have the honour to be, gentlemen, your most obedient humble servant, "Russell."

After cruising about our coast the *Florida* went over to the French coast, and requiring some repairs put into Brest, where she was allowed to land the crew of the *Anglo-Saxon* and go into dock. This will cause a furious yell from the length and breadth of the Northern States, and indeed, it seems intended that it should. This, coupled with the conduct of France in Mexico, will lead to a declaration of war, and we shall have the seat of war transferred to Mexico with the Federals arrayed against the French occupants. Of course their invasion of Mexico would be opposed by the South on the one hand, and aided by the anti-French Mexicans on the other. France will take advantage of this, and proceed to recognise the Southern States, sweeping off the blockade and supplying herself with cotton, to the great satisfaction of her operatives. In this programme we shall not join, but we shall avail ourselves of the supply of cotton by purchasing it through the French. The British flag will not in this case be available for the carriage, and we shall have, to submit to this as also the payment of higher prices in order to avoid a breach of neutrality. But that we shall get cotton at lower rates than at present there is no doubt.

The *Siècle* says :—

"Since the destruction by its captain of the *Tacony* and the capture of the *Archer*, the Confederate privateers, the identity of which is well established, are five in number, the steamers *Alabama* and *Florida*, and the three-masted *Lapwing*, which cruises in the Atlantic Ocean; the steamer *Georgia*, which has selected for its arena the Sea of the Antilles; and the three-masted *Robert Lee*, which watches the waters of the Bermudas. There is a sixth, which keeps about Capehorn, and to which several ships have fallen a prey, but her game is not known. With the exception of the *Sumter*, it was some time before the names of any of those vessels reached us, and it is to be observed that we do not even yet know them all, and that many other anonymous ships furrow the waters of the two oceans in search of the merchantmen of the North. It is the struggle of the weak against the strong. The amount of damage inflicted on Federal commerce by the Confederate cruisers is considerable (by the *Alabama* and the *Florida* alone it exceeds fifty millions), and the incessant stings of these audacious skimmers of the seas have excited to fury the anger of the North, which finds it impossible to tear from its flank this well-barbed dart. In vain does it equip whole fleets, in vain despatch its swiftest steamers. Some privateers have certainly been captured and destroyed, but the most famous and dangerous, those which the Federal cruisers are so anxious to take, have hitherto escaped scot free. Captain Semmes, the South American Surcouf, has hoisted his flag on board the *Alabama*. This daring sailor is commander in the Confederate navy; he is the terror of the merchant navy of the North and the torment of the Federal cruisers, through whose hands he slips like an eel. The Washington Government has sent a whole fleet on the track of the privateers. The gunboat *United States*, steamers *Ericson*, *Honduras*, *Governor Buckingham*, and *Star of the South*, have long been traversing the ocean in every direction. From Boston have just sailed the steamers *Howqua*, *Iron Age*, *Admiral Dupont*, *Expounder*, *Daniel Webster*, the school-ship *Massachusetts*, the revenue cutter *Morris*, and the schooner *Thomas Woodward*; from Newport the sloop of war *John Adams*; from Princetown the steamer *Shattuck*; and finally, from Philadelphia, the steamer *Young America*. All these efforts are particularly directed against the *Alabama* and the *Florida*. To escape this accumulation of enemies, Captains Semmes and Maffit will have to redouble their energy, audacity, and skill. They are not caught yet. Like the famous "Red Rover" of Fenimore Cooper, they seem to have a talisman that protects them, and enables them to set both man and the elements at defiance."

The *Journal des Debats* has the following :—

"A Confederate corsair, named the *Florida*, some days ago entered the roadstead of Brest, and disembarked the crew of a vessel which it had burnt near the English coast. The *Phare de la Loire* has on this subject urged complaints which we consider well founded. It would, in fact, be well were it possible to interdict from access to our ports veritable sea rovers, for the *Florida* is nothing else. Now we believe that is possible. The rights of belligerents have without doubt been conceded to the Southern States; but it is evidently on the condition that they conform to the regulations of international law. If it be possible to show conclusively that the Southern States have the right to arm corsairs, since they have not acceded to the treaty of Paris, it is not possible to admit that the corsairs armed by the South, and assimilated by a too generous toleration—it is now clearly seen—to vessels of war, may substitute themselves substantially for maritime tribunals, and make themselves judges of the validity of their captures. They have not the right, as they assume, to stop vessels which they meet on the sea, to take possession of the cargo, whether it belong to Northern Americans or to neutrals, and to burn the vessels, although a captain of the State navy, wearing the uniform of his country, and presenting many other guarantees for honesty and impartiality, would be obliged to take his prize before a court of justice. That is evidently intolerable. It is in vain that Southern people allege that, their ports being blockaded, they have no maritime tribunals. That is their affair, and not ours. Let them attack the Americans ships of war, and compel them to raise the blockade, as they have a right to do; but taking possession of the goods of others without a legal judgment is in all languages called robbery."

BUILDING CONFEDERATE CRUISERS IN ENGLAND.

It will be seen by the following article and correspondence that *The Times* has altered its views on this question. It now thinks it a breach of neutrality :—

The question of the Confederate steamers is becoming both serious and urgent; we wish we could add that it is also becoming more clear. Unfortunately, it is full of the gravest doubts, and though probably not one Englishman in ten would be under any uncertainty as to what he would wish to see done, it is by no means certain that the power of action exists. Common belief, as well as current report, assigns to the service of the Confederate Government two powerful iron-clad vessels now approaching completion in a well-known yard on the Mersey. That these ships are war-ships, and of the most formidable kind, cannot be disputed. They are plated with 4½-inch armour, they have turrets for mounting heavy guns, and their stems are so constructed that they may be used as rams. On this point, therefore, no question can be raised. But our builders are constantly constructing ships of war for foreign Governments, and it is only on the presumption that these particular vessels are intended for a belligerent Power that the lawfulness of their destination can be questioned at all. Such a presumption, however, undoubtedly prevails. The ships themselves, as stated in our intelligence yesterday, not only bear French or Algerian names, but are distinctly alleged to be built on French account, and one of them actually carries the French flag. Nevertheless, people persist in believing that, sooner or later, and in fact very soon indeed, they will hoist Confederate colours, and that, whatever pretext may be employed to disguise their destination, they have been designed from the beginning to join the *Florida* and the *Alabama*, and prey upon the commerce of the Federals as those ships have done. The consequence is that the Federals and their friends are naturally enraged, and we are assured that if the suspected vessels are allowed to escape, peace between America and England can no longer be maintained.

To the correspondence on the subject which we published yesterday we now add another communication containing an exposition of the existing law on this critical question. According to the views which, not without authority, are there laid down, a ship of war is so far contraband that if it is sold by a neutral to a belligerent, the other belligerent would be entitled to make prize of it, exactly as prize would be made of arms or munitions. But it is only on the high seas, or in the passage of the vessel from the neutral to the belligerent port, that the seizure can be effected. An English shipbuilder may sell a ship of war impartially to either a Confederate or a Federal purchaser, and deliver it without any breach of law; but the vessel is liable to capture and confiscation if she is overtaken at sea and her destination can be proved. "There is nothing in our laws, or in the law of nations, that forbids our citizens from sending armed vessels as well as munitions of war to foreign ports for sale. It is a commercial adventure which no nation is bound to prohibit, and which only exposes the person engaged in it to the penalty of confiscation." That is the doctrine laid down, not by the British Court of Admiralty, but by the Supreme Court of the United States. It is American, not English law, and no law can be clearer. The *laches*, in fact, is with the Federals themselves. They are foregoing their own rights in order to carry out more effectually a certain paramount object. Their cruisers should be where the *Florida* is, and the Confederate steam rams, if such they are, ought, instead of meeting a consort, to fall into the hands of a captor; but such is the overwhelming anxiety of the Federals to press the blockade of the Southern ports that they can spare no squadrons for the police of the seas.

However, after stating the facts as far as they can be ascertained, and the law as we find it laid down, we are ready to admit that there is much more to be added. There is a comparatively recent statute called the Foreign Enlistment Act, which was certainly designed to control the proceedings of neutrals in dealing with belligerents, and there is an instinctive feeling on the part of the public that the construction and sale of such vessels as the *Alabama* for such uses as those to which the *Alabama* is turned ought not, whether actually lawful or otherwise, to be allowed by law. After making all abatements due to the exceptional character of the war between Federals and Confederates, we must needs admit that the case of war-ships is not like the case of munitions of war. There is not so much direct intervention or provocation in one as there is in the other. Rifles and gunpowder are soon lost sight of, but a ship of war is an active engine, endowed, as it were, with life and personality, and traceable in her achievements from day to day. Indeed, if we suppose that not only the hull, but the guns, the stores, and the men are furnished more or less circuitously from the neutral State, it is

Digitized by Google

hard to see how the supply differs from that of a regiment of soldiers. We have only to ask ourselves what our feelings would have been if, while we were blockading the Russian ports during the Crimean war, some neutral State had furnished the Russian Government with cruisers enough to close the sea against our commerce. Of course, we should never have allowed them such a range as the *Alabama* has enjoyed, but some day or other even we, with our enormous navy, may find our hands too full. It is not our interest to allow such a precedent to be established for the first time, if it does not exist already, nor to connive at its extension, if it has any existence. Of all the doubts which the question contains we ought to give ourselves the benefit, and our interests, as it happens, coincide on this occasion with the desires of the Federal States.

Still, the Americans, whether of the North or of the South, must be perfectly aware that we can make no concession to menace, and that the laws of England, whatever they may be, are not to be changed at the dictation of a foreign State. We believe that if our Government could feel itself justified in stopping any suspected vessel, the public would be glad to see the power exercised. We do not think it morally right that ships like the *Alabama* should leave our ports for such service as that on which they are engaged. We do not wish to see any more of them sail on the like errand, though the Federals have themselves mainly to thank for the mischief which these cruisers have been permitted to work. We are even disposed to think that if the Foreign Enlistment Act is not comprehensive enough to prevent such dealings, it might be advantageously made so, but our authorities can only administer the law as it stands. The alleged destination of the vessels in question is apparently denied, and, even if it were admitted, the absence of any "equipment" might render the bargain lawful. The Federals, too, should be reasonable enough to remember that our impartiality in respect of this kind of trade has been abundantly proved. Whatever may have been the sympathies of the country, there has been no favour shown in the matter of commerce. The Northerners have had, without stint or molestation, cannon, rifles, powder, and every other description of warlike material to their heart's content. They best know what they have had besides, and what other items might be added to the list of their imports from England. But without entering into these questions we can truly say that the Federals have found a free and fair market in this country for all their wants, and have never had an impediment thrown in their way. Our neutrality, therefore, has not been vitiated by anything like preference, and so little, even in the present case, are we influenced by sympathies that if these steam rams are really destined for the Confederate Government we sincerely hope the law may be strong enough to stop them.

(To the Editor of *The Times*.)

"Sir,—I read to-day with great pleasure your remarks on the vessels now building, or rather built, in British yards for the use of the Confederates. You have argued with force and with truth that to let them go forth to prey on Federal commerce will be an offence against international law, and also against the spirit, and probably against the words, when correctly interpreted, of our municipal law. You have shown that it is our duty and interest to prevent this offence from being committed, and not to let it take place and lament over it when it has become irremediable.

"For if these vessels once get out—nay, even if only one of them gets out, and receives the Confederate commission, we shall then have no right to arrest her, and the Federals, as we know from experience, will have no power.

"And this is a matter not of months, perhaps not of days, not even of hours. I am not informed what is the state of preparation of the ship in the Clyde, but I am told that those in the Mersey are ready. An acquaintance of mine passed last week the *Florida* hovering in the Irish Channel for the purpose of joining and arming them.

"It appears to me, however, that you have omitted one, and that a very important, motive for the immediate interference of our Government, and that is the effect which its torpidity will produce on the feelings and conduct of the Federals.

"I have conversed during the last month with Americans of both parties. On one subject only are they unanimous, and that is that the escape of these vessels will produce the evil which we have exercised so much forbearance and endured such sufferings to prevent—a war with the North.

"They all believe that, whatever be the wish of the Northern Government, the indignation and rage of the Northern people will force it to declare war. This is the expectation of my Federal friends, who look on a war against us with horror, and of my Confederate friends, who exult in its approach. This is the object for which, in their utmost penury, they are spending hundreds of thousands on these ships. The ravages of the *Alabama* and the *Florida* do not seriously injure the military force of the Federals, but they enrage them. The Confederates have always looked to foreign support. They long hoped that want of cotton would lead the English Government to attack the Federals. They now bribe English shipbuilders to do so. A few months ago I had a conversation on this subject with a distinguished Federal statesman (Mr. Dayton, the Federal minister in Paris), a man of great talents, knowledge, and calmness. I thought it so important that I made a note of it. That note I append to this letter. I should, of course, have asked Mr. Dayton's permission to do so if the matter were less urgent. But he may be absent from Paris. Four or five days might pass before I could obtain that permission, and four or five days hence all may be over.

"I throw myself, therefore, on his mercy, and hope that he will allow my wish to contribute to the aversion of so tremendous a misfortune as a war between England and the United States to be a sufficient apology for the publication of a private conversation.—I have the honour to be, Sir, your obedient servant, "NASSAU W. SENIOR.

"Kensington, May 28."

"Paris, May 2, 1863.

"I called on Mr. Dayton, the Federal minister. I said to him that during the last five weeks I had conversed with many persons of political eminence on American affairs; that I found fears that the conduct towards us of the Federal Government would lead to war universal, and an opinion that it was intended to produce war prevalent; and that I thought it desirable that he should know the opinions as to that conduct of persons of political eminence not merely impartial, but favourable to the cause of the Federals. He answered that he should be grateful for the information. I then related to him the substance of several conversations with persons belonging to different political parties.

"'I recognise,' he answered, 'in all that you have told me, *The Times*. I believe that it is useless for a Northern American to state any facts, to contradict any falsehoods, or to use any arguments in England or in France. You, all of you, French as well as English, take all your opinions, all your premises, and all your conclusions blindly from *The Times*. I have known men treat *The Times* sometimes with contempt, sometimes with indignation, describe it as the unscrupulous organ of the English aristocracy, and laugh at those under its influence, and immediately afterwards talk to me pure *Times*. The Government of the United States would be frantic if it did not do everything and submit to everything in order to avoid a war with you.'

"'That,' I answered, 'is precisely what they say, and the inference which they draw from your conduct is that you are frantic. If, they say, the President and his advisers wish for a war with England, they are mad. If they do not wish for it, and yet do all that they can to bring it on, then also they are mad. Take the appointment of Captain Wilkes.'

"'I do not know,' he answered, 'what are the rules of our service. Captain Wilkes is the most popular man in our navy. He may have had claims which could not be refused.'

"'Captain Wilkes's popularity,' I answered, 'for having done all that he could to bring on a war with us, is a proof of the madness of the people. An English officer who had so acted would have disgusted everybody. What, then, do you think of Mr. Cassius Clay, and of the motives which led his government first to publish his despatches, and afterwards to employ him?'

"'You gave us,' he answered, 'great provocation, by assisting the rebels. The *Alabama* is manned by English sailors.'

"'And is not your blockading fleet,' I answered, 'manned by English sailors? Can you tell me how to prevent a sailor from taking service where he likes?'

"'You ought to have exerted,' he replied, 'greater vigilance to prevent her sailing. You ought not to have thrown on Mr. Adams the onus of proving her destination. When you complained during the Crimean war that we were building vessels for the Emperor of Russia, we did not throw on your minister the burden of proof. We examined ourselves, and ascertained that it was so, and stopped the ships.'

"'I admit,' he continued, 'that it is difficult to prevent the people who are the greatest manufacturers of military supplies in the world from supplying belligerents with arms. But, if you cannot, as you say that you cannot, prevent Nassau from being a base of operations to the Confederate armies, you should use the utmost toleration of our efforts to prevent this. If your sympathies are with those who are endeavouring to ruin us, you should not parade them. If you think that you will gain in the rupture of the Union you are mistaken. Do you suppose that the Confederates sympathise with you, except so far as they believe that you hate us?'

"'No,' I said, 'I have no doubt that the Confederates hate us as much as you do. An honest neutral is always hated by both the belligerents, but they have the merit of keeping their secret better. If we knew all that they think and feel, we probably should feel towards them as you seem to be trying to make us feel toward you.'

"'Well,' he said, 'I do not believe, with your French friends, that our public men are mad. I do not believe, therefore, that they wish for war. Nor do I believe that yours do so. But each party is excited; each party is—whether voluntarily or not—doing great mischief to the other. I see no remedy but patience, and an earnest attempt to repress the evil passions of the educated mobs in your country and of the uneducated mobs in mine. Of one thing I am certain—that if you think that any interference on your part will stop the war you are wrong. Not England, and France, and Russia—not all Europe could influence us.'

"'Not,' I answered, 'by persuasion?'

"'Not,' he replied, 'by force. What the South wants is food, and that you cannot give her. She has arms enough; but she is starving, and will be starved out.'

"'My expectations of peace between you and us,' he continued, 'depends much on the manner in which you deal with the ironsides which the Confederates are now building in England and Scotland. You excuse yourselves for not having stopped the *Alabama* on the ground that she was not obviously a ship of war. These ships are so. No merchant vessel is plated. We maintain they are intended for the Confederates—intended to prey upon the commerce of the Federals, your friends. How can we prove it except by the facts which are already as obvious as they can be made? For what other purpose can they be intended? The builders alone have the documents by which the innocent destination of the ships can be shown. You should call on the builders to produce them. If they refuse you may safely assume that they are intended to attack us. I do not ask you to confiscate them, or even to stop their progress, but merely to detain them until the builders prove, which they can do in a day, the innocence of their destination. In the Crimean war we did much more. We actually stopped the progress of the *Alexandra* on the suspicion that she was intended for the Russians. Not an axe or a hammer was allowed to be lifted in her. We found our laws, as you have found yours, insufficient. We amended them. You merely fold your arms and allow proceedings opposed to your own municipal laws and to international law, to good feeling and to good faith, to go on because your municipal law has not sufficient detective power. Then give it that power. You are not, as we are, bound by a constitution. Your Parliament is omnipotent. If it is not skilful enough to invent a law which shall enable such atrocities to be detected and prevented, let it copy the law which we passed for that purpose, and which was sufficient. If you refuse to do this, and, in consequence of your negligence, or of your self-inflicted impotence, these ironsides escape and plunder us, the American people, irritated enough already, will be ungovernable. You have seen enough of them to know that their resentment is not under the control of their interests. They will really become as mad as your French friends call them. They will be quite ready to ruin themselves in order to ruin you.'"

Naval and Military.

COURTS-MARSHAL IN JAPAN, &c.

The following has been published in the *Standard* and other papers:—"On Tuesday, the 23rd of June, a court-martial assembled on board her Majesty's ship Encounter to try the under-mentioned men belonging to the despatch vessel Ringdove, Commander Brown, for mutiny—viz., George Jay, A.B., Samuel Carsons, A.B., John Davis, A.B, Charles Russell, O.S., James Fitzmaurice, second-class O.S., Henry Davis, O.S, James Dunbar, second-class O.S., John Mohar, second-class O.S., James Scott Lamb, O.S., John H. L. Churchill, second-class O.S., David Small, second-class O.S., Thomas Foreman, boy first-class, W. Wright, ditto, and Michael O'Donovon, ditto. The court consisted of Captain Roderick Dew, C.B. (president), Captain Josling, Commander C. M. Buckle, Commander A. J. Kingston, and Commander Edward Wilmot. Mr. M'Carthy, paymaster of her Majesty's ship Encounter, officiated as judge-advocate; Commander R. A. O. Brown, of the Ringdove, prosecuted. The first charge was that on the afternoon of the 6th of June, whilst the Ringdove was on her passage from Nagasaki to Yokohama, the prisoners refused to come on deck when the hands were turned up, and did also unship the foreladders to prevent others from coming on deck. The second charge was that they did, on the afternoon of June 6, refuse to come on deck when the hands were piped to muster; and, thirdly, that they did, on the same day, go below and refuse to come on deck to work after being warned, that if they did not go on deck to work they would be placed in the second class for conduct. The inquiry continued for two days. The Court were of opinion that the first charge was proved, inasmuch as the prisoners did refuse to come on deck when the hands were turned up, but as to their unshipping the foreladder to prevent others from coming up, there was not sufficient proof. The Court also found the second and third charges proved against the prisoners, and sentenced George Jay, Samuel Carsons, and John Davis to seven years' penal servitude. Charles Russell, James Fitzmaurice, Henry Davis, James Dunbar, John Mohar, James Scott Lamb, John Henry Churchill, David Small, Thomas Foreman, William Wright, and Michael O'Donovon were, on account of their youth and inexperience, only adjudged to receive forty-eight lashes on board of such ship as the Commander-in-Chief may think fit."

On the 27th of June a court-martial assembled on board the Pearl to try William Thier, private Royal Marines belonging to the Coromandel, for insubordination and behaving in an insolent manner towards Commander C. M. Buckle. Prisoner expressed his contrition, and called Commander Buckle to speak of his previous conduct. The Commander gave him a good character previous to his offence, and the Court "only sentenced him to receive forty eight lashes and to be imprisoned for twelve months." A court-martial also assembled to try William Nash, ordinary seaman of the Hadock, and George Potter, supernumerary second-class ordinary seaman on board the same vessel, for indecent behaviour. Prisoners were found guilty, and sentenced each to be reduced to the second class for conduct, to receive forty-eight lashes, to be confined in one of her Majesty's gaols for twelve months, and finally to be dismissed her Majesty's service with disgrace.

The following gallant action is reported, Commander Wilmot being the hero:—On the night of June 25 one of the marines on the port gangway of the Eurydalus fell overboard with his accoutrements on, and he could not swim. A man named Turner leaped overboard after the marine, and would have been speedily carried down by the weight of the marine, had not Commander Wilmot jumped overboard, diving under both, and bringing them in safety on board the ship.

The deaths of the following officers have been officially reported at the War-office since the 1st August:—Field-Marshal Colin Lord Clyde G.C.B., K.S.I., Colonel of the Coldstream Guards; Generals J. Oldfield, K.H., Colonial Commandant of the Royal Engineers, and Lord Downes, G.C.B., Colonel of the 29th Regiment; Major-Gen. W. Dunn, Royal Artillery; Lieut.-Col. J. H. Burke, 3rd Buffs; Majors J. Fraser, 60th Rifles, and R. Shepherd, 76th Regiment; Captains W. Edgeworth, 3rd Prince of Wales's Dragoon Guards; A. D. Gordon, 102nd Royal Madras Fusileers; W. R. Mulliner, 3rd West India Regiment; H. T. Fox, Royal Marines; N. Furnace, 60th Rifles; T. H. Trafford, Royal Artillery; J. Thomson, Gold Coast Artillery Corps; W. Smith, 6th Regiment; J. Hilder, 15th Regiment; J. Busteed, 16th Regiment; W. Von Lubeck, Brunswick Cavalry; and J. N. Stober, Chasseurs Britanniques; Ensign W. S.P. Keene, 2nd West India Regiment; Quartermaster W. Mansfield, 22nd Regiment, and F. de Bothemer, Brunswick Cavalry; Inspector-Gen. of Hospitals A. Stewart, M.D.; Surgeons, F. O. Barker, M.D., 90th Light Infantry, and J. F. Nivison; Assist.-Surgeons T. F. Langstaff, and G. Rutherford, M.D.; Vererinary Surg. M. Poett.

The Pioneer, screw despatch vessel, Commander Robinson (acting), lately serving on China and Australian stations, having been officially inspected at Spithead, entered Portsmouth harbour to dismantle and pay out of commission.

Monetary and Commercial.

CITY, SATURDAY, SEPT. 12.

The biddings for 40,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, 22,70,000 rupees; to Bombay, 16,00,000; to Madras, 1,30,000. The declared *minimum* price was as before, viz, 1s. 11½d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras. The applications within the limits amounted to 295 lacs. Tenders on Calcutta at 1s. 11½d. will receive about 41 per cent.; on Bombay at 1s. 11¾d. about 85 per cent.; all above these prices, and all tenders on Madras, will receive in full.

The Manchester Cotton Company states that its receipts from its commencement in February, 1861, to March, 1863, amounted to £54,968, while the total payments have been £49,404, leaving a balance of £5,564. The cost of establishing the company has been during the same period—home account, £5,517; India account, £3,896, together making £9,413.

The new Minister of Finance in Spain is said to be preparing—what is very much wanted—a statement on the financial position of the country, and hopes are entertained that he seriously contemplates an arrangement of the different classes of the national indebtedness. It is understood that plans for the consolidation of both the home and foreign debts is before the minister.

The *Malta Times* describes as follows the re-establishment of communication between Malta and Alexandria. The flaw was

Digitized by Google

discovered at a distance of sixty-four miles from Alexandria, at a spot where a stouter cable had been spliced on to the deep-sea cable when the line was laid, owing to the rocky nature of that part of the coast. The faulty part having been cut out, the final splice was made on the morning of the 18th ult., and at 3.30 P.M. the communication between Benghazi and Alexandria was restored. As we have already announced, the line throughout between Malta and Alexandria is now reopened to the public.

A writer on the value of gold says:—

"It is obvious that, however many tons of gold may yet be raised in California or Australia, or any other new gold-fields that may yet be discovered, not an ounce can reach us except through the medium of commerce—it must come to us in exchange for something which we must produce or buy for the purpose. Again, let us consider this. The quantity of the precious metals which quadrupled or quintupled in England the wages of a million labourers at most earning 4d. or 6d. a day, would have a very slight effect on the wages of six millions earning from 12s. to 30s. a week. I think it more than probable that we shall see in India changes as great as those which occurred in England, and in a much shorter space of time, owing to the great operations of English commerce there, and the railroads and other communications, which are nearly completed, and which, when completed, will bring the remotest provinces of India into almost immediate communication with the great marts of Calcutta and Bombay. Wages of unskilled labour have already risen from 2d. or 3d. to 6d. a day in the Valley of the Ganges. In a few years they will, in all probability, be 1s., and the income of ryots and zemindars will be increased in the same proportion. When the gold discoveries of recent times began, England was undoubtedly the country in which prices were highest, *i.e.*, in which gold was cheapest. Has not the force of the great influx hitherto been to raise the level of prices in other countries towards the English level, and does not that account for our having hitherto felt the effects of it so little? I am satisfied that that is the true explanation, and that the power of that modifying principle is yet very far from being exhausted. No doubt an increase of a fourth in the stock of gold ought to be followed by a decrease of a fourth in its exchangeable value; but not in England necessarily or probably, because that decrease is an average decrease, and it could not be decreased a fourth in England without being decreased at least 50 per cent. on the Danube and the shores of the Baltic and the Black Sea, and to a very much greater extent in India and perhaps China. And where is the stock of precious metals to come from, and in how many years, which would supply the currency of the world, if money prices of goods and wages of labour were to become the same or nearly the same all over the world as they are in England at the present day?"

The following companies have been formed since our last issue:—

Martin's Patent Anchor Company (Limited). A company with a capital of £50,000 for manufacturing an anchor which is said to have greater holding power than any other anchor, to take hold instantly in whatever position it falls, and to be easily tripped, called and fished.

The Buxton Hotel Company, capital £50,000 in £10 shares, for erecting a first-class hotel in Buxton, Derbyshire, in the neighbourhood of celebrated baths and mineral waters.

The prospectus is in circulation of the Tobacco, Cigar, and Snuff Company (Limited). The capital is £100,000, in 20,000 shares, of £5 each.

The following are the Board of Trade Returns for the month ending 31st July, so far as relates to the exports to the Far East:—

To CHINA.—Cotton Yarn: No export in July; total export for the seven months ended July 31st was 716,472 lbs., of the value of £70,893, against 240,450 lbs. of the value of £165 609 in the corresponding period of 1862, and 40,000 lbs. of the value of £240,042 in the first seven months of 1861. Cotton Goods: 3,371,697 yards of the value of £79,141, against 6,813 786 yards of the value of £101,601 in July, 1862, and 11,485,537 yards of the value of £146,386 in July, 1861. The total export for the first seven months of this year was 24,306,051 yards of the value of £585,045. Woollen and Worsted Manufactures: 141,145 yards of the value of £30,341, against 138,344 yards of the value of £17.293 in July, 1862, and 94,880 yards of the value of £11,860 in July, 1861. The total export for the first seven months of this year amounted to 1,104.952 yards of the value of £197.851. Worsted Stuffs: 708,262 yards of the value of £50,495, against 335,148 yards of the value of £16,594 in July, 1862, and 230,356 yards of the value of £15,924 in July, 1861. The total export for the first seven months of this year reached 4,564,259 yards of the value of £327,654. Lead: 1,274 tons of the value of £26,807, against 816 tons of the value of £17.885 in July, 1862, and 334 tons of the value of £7,615 in July 1861. The export for the first seven months of this year reached 9,818 tons of the value of £210,644.

To PHILIPPINE ISLANDS.—Cotton Goods: 1,188,218 yards worth £28,609, against 13,000 yards worth £300 in July, 1862, and 3,628,124 yards of the value of £59,360 in July, 1861. The total export for the first seven month of this year reached 6,301,227 yards, worth £151,655.

To JAVA.—Cotton Goods: 1,911,423 yards of the value of £45,381, against 2,701,493 yards worth £49,428 in July, 1862, and 2,951,929 yards worth £35,300 in July, 1861. The total export for the first seven months of this year reached 6,301,227 yards of the value of £151,655.

The exports, as per Sam Mendel's circular, are from London, Liverpool, and the Clyde, from August 17th to September 1st, as follows:—

To HONG KONG.—Plain cottons, 1,217,700 yards; coloured cottons, 217,944 yards; printed cottons, 228,100 yards; twist, 158,254 lbs.

To SHANGHAI.—Plain cottons, 241,625 yards; coloured cottons, 44,150 yards; printed cottons, 81,500 yards.

To SINGAPORE.—Plain cottons, 408,140 yards; coloured cottons, 44,150 yards; printed cottons, 14,400 yards; twist, 80,800 lbs.

To BATAVIA.—Plain cottons, 746,505 yards; coloured cottons, 204.469 yards; printed cottons, 477,565 yards; twist, 38,800 lbs.

To MANILA.—Plain cottons, 443,360 yards; coloured cottons, 1,033,525 yards; printed cottons, 115,275 yards.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 4th inst. was—In gold: To Alexandria, £4,000; to Madras, £526; to Calcutta, £2,000; to Singapore, £965. In silver: To Penang, £16,320; to Singapore, £18,165; to Hong Kong, £66,820. 16s. 8d.; to Shanghai, £19,730. Total in gold, £7,491; in silver, £121,035. 16s. 8d.

ARTICLES OF IMPORT.

TEA.—We are as yet without any improvement to notice in the tone of our market, notwithstanding there has been some revival of export. The trade have supplied their current wants chiefly at the public sales, a large proportion of the quantity brought forward at each auction continuing to be realised without reserve. Prices have ruled rather irregularly, but on the whole must again be quoted rather in favour of the buyers. The chief feature of interest during the month has been the arrival of the *Bahama*, with the new season's Kaisows, which were placed on the market on the 20th ultimo. The quality of the bulk showed no improvement on those of last season, whilst the trade generally were averse to purchase them. The first day or two about 3.000 packages found buyers from 2s. to 2s. 4d. for fair, 2s. 6d. to 2s. 11d. for good to finest, and 3s. per lb. for some fine boxes. Importers not being able to make further progress at near these rates decided upon offering a considerable quantity at public auction without reserve, in all about 3,000 packages, and which realised from 2s. 0½d. to 2s. 4d. per lb., which were considered fair prices under the circumstances, but showing a decline of 3d. to 4d. per lb. on the opening rates, at which a further portion of the cargo has since been realised. To day the *Fiery Cross* is reported in the St. Katharine Docks. Low and dusty kinds of Congou have sold to a limited extent at rather lower prices. For those with leaf, as also for good common, there has been a fair demand for export at about previous prices. Fair to good Sinchune Kai kinds, also fair Kaisow kinds, show no material alteration. Fair to good Ho Hows and Ning Chows have been difficult of sale, and prices are ½d. to 1d. per lb. lower. For second class Honams, Monings, and Wopoks there has been some demand at the low rates now current. For fine Kaisow and black-leaf kinds prices remain much as before, further parcels having been realised at public sale from 1s. 8d. to 2s. per lb. Tayshans show no alteration, the demand being limited. Oolongs have been very difficult of sale, even at the low rates current. Fair to good Souchongs remain much as last month. Further parcels of fine have been sold at public auction at the decline last quoted. Flowery Pekoes show no improvement, the demand being very light. Scented Capers, of common to fair Canton make, have been sold at public auction at a decline of 1d. to 2d. per lb.; good to fine have been wanted. Foo-chow kinds remain difficult of sale. Fair to good Canton make Orange Pekoes have sold about 1d. per lb. lower; fine have been better supported. Foo-chow kinds, of fair to good description, are much depressed, and prices 1d. per lb. lower. Uncoloured Japans have sold to a fair extent for export at from 1s. 5d. to 1s. 5½d. per lb. Indian teas continue to sell readily at full prices by public auction. In green teas there has been a fair amount of business, without much change in prices. Coloured Japans have been taken to some extent for export at about previous prices. Fair to good Taiping and Fychow kinds of Young Hyson have sold steadily at fully previous prices. Moyune kinds have also commanded full rates, being wanted for export. Hysons have only been in limited demand, and prices for good qualities have ruled rather lower. Moyune kind of Gunpowders, also good Fychow sorts, have sold at about former prices, but Ping Sueys have not sold so readily, and prices have been in favour of buyers. Canton-made Gunpowders, except the finer kinds, continue neglected, also Young Hysons, prices for these ruling very low. The public sales have comprised 62,618 packages, of which 35,606 packages were sold, including 30,212 packages offered without reserve, and 3,822 packages of Indian teas.

Digitized by Google

SILK.—Still nothing favourable to report as regards silk. The daily business doing is not inconsiderable, and importers generally are not wanting in disposition to meet buyers; the deliveries, too, show no further reduction, indeed, for the week just closed mark rather an improvement. Still there is no life in the trade, no present prospect of real improvement, nothing to induce manufacturers to apply themselves with spirit, except only the comparatively moderate range which prices have reached. In this they seem to have reasonable ground for hope of escaping material loss, if not making a profitable result—but there is nothing at present to show that they are prepared to extend their operations. Japan silk continues to be the leading article—some few parcels of the new China silk have been sold, but nothing of moment. In Bengal silk we have nothing new; probably rather less disinclination to use this class, but nothing to warrant hope of any decided increase in the consumption.

COFFEE.—Mocha: Of 750 bales and half-bales at auction the bulk sold, but at 1s. to 2s. per cwt. reduction; good clean yellowish short berry at 94s. to 95s. 6d.; middling greenish, 90 to 93s. Ceylon: Operations have been very large in both Plantation and common, especially Plantation; but the demand ultimately proved equal to the large quantity brought forward, and prices are fully as high as at the date of our last.

RICE.—Madras: Dull; rates lower. 3,244 bags pinky Madras at auction, all retired, and subsequently sold at 10s. 9d. per cwt. Calcutta; 9s. to 14s. 6d. per cwt.

SPICES.—Mace: At all pale is much wanted, and considerably dearer. 22 cases Penang, 3 cases Singapore, and 18 casks Dutch sold at auction at 1s. 8d. per lb. for middling palish, and 9d. to 1s. 4d. low to good reddish. Musk: Auctions confined to grain, which is dearer: 7 tins sold at 32s. to 51s. per oz. for ordinary to good. Nutmegs: Are 1d. per lb. dearer on the average; and 97 cases Penang, 49 cases Singapore, and 26 casks Dutch at auction mostly sold at 2s. 7d. to 3s. 8d. for middling to good bold, and 10d. to 1s. 8d. per lb. low small to very good medium. Pepper: Black is steady for both Singapore and Penang: of 3,973 bags of the former at auction, three-fourths sold at 3⅞d. to 3⅞d. per lb.; of 2,074 bags Penang, two-thirds sold at 3½d. to 3¾d.; of 877 bags Tillicherry, a few sold at 3⅞d.; and 107 bags Batavia all retired. Private trade limited. White: Is the turn cheaper, and 141 bags Singapore sold at auction at 5⅜d. to 5½d. per lb.; 601 bags Penang sold at 5d. to 5¼d; and of 605 bags Tillicherry, about half sold at 11d. to 1s. 3½d. for good to fine, and 6d. to 6½d. Coriander kind. Cinnamon: We quote first sort 1s. 2d. to 2s. 3d. per lb.; second sort, 1s. 1d. to 1s. 9d.; third sort, 11d. to 1s. 5d.; fourth sort and jungle, 9d. to 1s. 1d.; with fair business. Ginger: Calecut and Cochin, £3. 5s. to £7. per cwt. Offering abundantly, and selling irregularly. 2 219 cases at auction nearly all sold at 114s. to 120s. per cwt. for very good bold, and 62s. to 97s. ordinary to good.

COTTON.—Surat: Market very animated, but very little comparatively is offering, at fully 1d. per lb. dearer, and Kurrachee and Bengal nearly as much. Our quotation is 1s. 2¾d. to 1s. 9d. per lb. Madras: Market firm and active; transactions large; further advance of 1d. per lb; quotation, 1s. 4d. to 1s. 7¼d.

HEMP.—Manila: This market has been steady, with good business privately, chiefly at £27 to £29 per ton for fair roping to Sorsogon. 1,013 bales at auction. Sunn: Firm, but little here, and business unimportant; quotation, £18 to £33.

TIN.—This market has been uninterruptedly dull: prices of Straits have further given way £2 to £3 per ton, and business very limited. Banca continues quite nominal at £123 to £124 per ton. Current quotations for Straits, £115 to £116.

SAGO has further risen in value 1s. to 2s. per cwt., but the market closes quiet: of 2,257 boxes at auction half sold at 21s. to 24s. for middling to good small, and 19s. 6d. to 20s. middling to fair large. Sago Flour: Firm, and 750 bags sold at auction at 14s. to 14s. 6d. per cwt.

JAPAN WAX.—Of 377 boxes at auction, two-thirds sold at 50s. to 60s. 6d. per cwt. for low mealy to fair block: upwards of 2,000 boxes sold privately at 62s. for good block.

MISCELLANEOUS.—Aloes have brought better prices, and 203 packages at auction sold at £5. 10s. to £14 per cwt. for ordinary to fine but softish Socootrine. Galls: We quote Japan and China 42s. to 65s. per cwt. Market firm but without trade. Gums: Of Gum Animi the good and fine qualities have realised high relative prices, in other sorts no improvement. Castor Oil: Better kinds scarce; advance of ¼d. to ½d. per lb.; quotation, 4½d. to 6½d. Cowries: No improvement; fresh, 25s. to 35s. per cwt. Camphor: The movement in this drug has continued, and small sales have been effected at gradually advancing prices, from £7. to £7. 12s. 6d. per cwt. for China, and at £7. 15s. per cwt. for Japan. Little now offering upon such terms. Cassia Lignea is better; but of 715 cases at auction only a few sold at 86s. to 91s. per cwt. for 3rd to 1st pile; similar rates obtained privately in limited transactions. Buds: Dearer, and 20 cases sold at auction at £14 to £14. 5s. per cwt. Shellac: Sales at auction of Orange at £8. 5s. to £9; Garnet, £7 to £7. 5s.; Ruby, £7 to £7. 2s. 6d.; Native, £6. 10s. to £7. 17s. 6d.; Button, £6. 10s. to £8. 12s. 6d.; and block, £6 to £6. 15s. per cwt. Cocoa-nut Oil: Market depressed; at a reduction of 10s. per ton prices are very nominal; demand extremely sluggish. 577 casks Cochin at auction, at £45 to £47. 10s. per ton. Cubebs: Firm, 84 bags at auction sold at 110s. per cwt. Dragons Blood: Quiet; £10 to £14 in reeds; £4 to £11 in lumps. Galangal Root: Flat. Gutta Percha: Firm; good and fine qualities continue scarce, and in request. Of twenty tons at auction about half sold at 1s. 10d. to 2s. 3d. per lb. for fair to good natural, and 9d. to 9½d. ordinary reboiled. India Rubber: Held firmly, but quiet upon present terms. 153 baskets Singapore at auction retired at 1s. 7d. per lb.; of 32 cases Assam one-fourth sold at 11½d. Rattans: Very firm, and much inquired for: auctions confined to 1,406 bundles Singapore, sold at 3s. 9d. to 6s. 9d. per 100. Rhubarb: Good inquiry for low priced. Shells, Mother o'Pearl: Singapore, 125s. to 150s. per cwt.; Manilla, 75s. to 90s. Flat. Teeth, Elephants, 70 lbs. and upwards, £40 to £42 per cwt.; 40 to 60 lbs. £37 to £39; 20 to 40 lbs. £30 to £34; Scrivelloes, £18 to £33; Ball, £28 to £43. Turmeric: China remains scarce, and is wanted; Java better; good business done at improving prices, and 300 bags sold at auction at 18s. 6d. to 19s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 10s.; nail rod, £8; hoops, £9; sheets, single, £10; Staffordshire bars, £8. 5s.; rails, £6. 5s. to £6. 10s.

STEEL.—Swedish keg, £16 to £16. 5s.

MANCHESTER MARKETS.

We have had a large business transacted in yarns, both single and double. The demand has embraced all descriptions, for all markets, and many yarns have been sold at an advance of 1d. per lb. The cloth-market has shared in the excitement which prevails in that for yarns, and which is, to a great extent, the result of the state of things prevailing in the Liverpool cotton-market.

The circular of Sam. Mendel quotes Grey Shirtings 39-inch, weight, 7 lbs.; count, 14 by 12, 15s. 6d. to 15s. 9d.; 8 lbs., count, 17 by 17, 20s.; 9 lbs., count, 17 by 17, 21s. Cotton Yarn, 16 by 24, 2s. 3½d. to 2s. 4d.; best, 2s. 5½d. to 2s. 6d.

FREIGHTS AND CHARTERS.

With the exception of ports in China for which fair rates are readily obtainable, outward freights continue without animation, both for general cargoes and coals. Homeward freights are active at 85s. from the rice ports, and 75s. to 80s. from Manila.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 30s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £44 and £2. 2s. 6d. For Shanghai: £54 and £2. 10s. 0d. to £2. 12s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2, nominal. For Singapore: £28 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of about 300 tons of Government naval stores to Hong Kong, also for a few tons to Shanghai, both from the river Thames.

CASUALTIES.

The Sarah Scott, from Sunderland for Shanghai, which was abandoned on June 5, in lat. 37 S., lon. 53 E., had encountered a succession of gales and hurricanes for more than twenty days previously.

The Silome, barque, Davidson, of and from Sunderland for Hong Kong, put into Yamouth Sept. 1, with damage to starboard side, jibboom, &c., carried away figurehead, &c., started, and channels ripped up, having been in collision. She has since been reported as having been ashore on Longsand on the morning of Sept. 6, but was assisted off and towed to London, where she has arrived leaky.

The Diligence, Smit, from Batavia for Amsterdam, which arrived at St. Helena July 25, had sprung a leak off the Cape of Good Hope, making two to three inches water per hour, but sailed again July 27 for her destination.

The Ceres, Timm, which arrived at New York Aug. 24, from Foo-chow-Foo, had experienced a violent hurricane on Aug. 20, during which she lost foretopgallant mast, stove bulwarks, lost and split sails, &c.

At ST. HELENA, July 11, Cathay Gibbon, from Singapore, and sailed for Falmouth; Eva Johanna, Bochove, from Batavia, and sailed for Rotterdam; Rotterdam, Pool, from Banjoewangie, and sailed 13th for Rotterdam; 12, Truro Duggan, from Shanghai, and sailed 13th for Liverpool; Voladora Villabaso, from Manilla, and sailed 13th for Falmouth; 14, Australia Jochems, from Batavia, and sailed 14th for Amsterdam; 20, Indiaman Webb, from Manila, and sailed 21st for Liverpool; Anna and Sophia Bekering, from Batavia, and sailed 21st for Amsterdam; 23, Oscar Hueff, from Singapore, and sailed 25th for London; 25, Salatiga, Kettler, from Tjilatjap, and sailed for Rotterdam; Vision, Westendorf, from Batavia, Diligence, Smit, from Batavia, and sailed 27 for Amsterdam; Cornelia, Mathilda Kortland, from Batavia, and sailed 27 for Schiedam; St. Jan, Lommerse, from Batavia, and sailed for Rotterdam; 28, Bernard and Agnes, Ordman, from Batavia, and sailed for Amsterdam; Benledi, Houston, from Singapore; 30, Wandrahm, Meyer, from Penang.

At Simon's Bay.—July 19, Tien-Tsin, str., Nicolas, sailed for China.

At Algoa Bay.—July 5, Stad Assen, Haverbult sailed for Batavia.

At Mauritius.—July 7, Conquest, Howes, from Padang. Sailed, July, 6, for Singapore, Catherine, Foster, and Castlehow, Trumble; 30, for Batavia, Chaptal, Mocaer.

JOYCE'S AMMUNITION — 1862. Established 1820.

The following articles, of the best quality, manufactured by

FREDERICK JOYCE

OF LONDON

may be had of most Gunmakers and dealers in Gunpowder.

MILITARY RIFLE PERCUSSION CAPS.
PATENT PYROXYLINE SPORTING DITTO
ORIGINAL (1824) ANTI-CORROSIVE DITTO
TREBLE WATERPROOF CENTRAL FIRE DITTO

Chemically-prepared Cloth, Felt, and Paper Waddings, Cartridge-Cases for Breech-loading Guns, Wire and Universal Shot Cartridges, &c., &c., Contractor to Her Majesty's War Department.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 33, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

HOLLOWAY'S OINTMENT and PILLS.—The proofs of cures of the most virulent maladies and chronic ulcers speak louder than words to the merits of these incomparable remedies. A grateful patient writes from Kingstown under date June 21, 1863:—"I am happy to bear testimony to the wonderful powers of your Ointment and Pills in curing me of the most distressing piles and lumbago after every other means had failed." Can any statement be more to the point? Any language more striking or convincing, or any result more gratifying? What a load of suffering and anxiety was in this case rolled away by the proper application of these noble curatives. Swelled ancles readily succumb to Holloway's medicaments.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

H. PEAT,

SADDLER AND HARNESS MAKER, 14, Old Bond-street. Removed from 167, Piccadilly. London.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS 15, Albemarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

G. W. WILEATLEY and Co. (late Waghorn), 150, Leadenhall-street, E.C.; CHAPLAIN S, Regent-circus, W., and 23, Regent-street, S.W.

INDIA and CHINA.—New Overland Steam Communication.—French Mail Steam Ships.—Services Maritimes des Messageries Impériales.—On the 19th of every month, a RENCH MAIL STEAMER will be despatched from Marseilles, at 2 P.M, for ALEXANDRIA, corresponding with another steamer from Suez to India and China. Passengers will be booked and cargo received for conveyance to the following ports:—Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Saigon, and Hong Kong. In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bucalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.

FOR COLOMBO, Ceylon, Direct, SKIMMER OF THE WAVES, A 1, 11 years; loading in the London Docks. Last shipping day 16th July.

CORSAIR'S BRIDE, A 1, 13 years, and continued now in London A 1, 4 years; loading in the West India Export Docks.

ECLIPSE, A 1, 12 years; loading in the St. Katharine's Docks.

For freight or passage apply to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street.

With quick Despatch.—Having a large portion of her Cargo engaged.

FOR SHANGHAI, the well known China clipper MERSE, A 1 thirteen years (belonging to Messrs. John Willis and Son), 628 tons register, F. M. MOORE, Commander, loading in the East India Docks. This ship has excellent accommodation for passengers.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

To follow the "Eclipse," with despatch.

FOR COLOMBO Direct, the regular trader AVERY, A 1 twelve years; 380 tons, newly coppered, JOHN GRACE, Commander; loading in the St. Katherine's Docks. This fast-sailing clipper barque is admirably adapted for the Colombo trade, in which she is well known. Has excellent accommodation for cabin passengers.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR SHANGHAI Direct, the well-known clipper FIERY CROSS, A 1, 13 years, 689 tons register, RICHARD ROBINSON, Commander, lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

With quick dispatch.—Having a large portion of her Cargo engaged.

FOR SINGAPORE Direct, the fine clipper barque AVONDALE, A 1 nine years, 308 tons register, J. WYLIE, Commander, West India Docks. This ship has good accommodation for passengers.

For Freight or Passage apply to G. G. RUSSELL, 27, Leadenhall-street; or to KILLICK, MARTIN and Co., 29, Nicholas-lane; Lombard-street, E.C.

To follow the LAUDERDALE.

FOR SHANGHAI, direct. The well-known China clipper ship ALBUERA, A 1 thirteen years. Belonging to Messrs. John Willis and Son, 774 tons register, J. LEVACK, Commander, West India Docks. This ship has very superior accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

Regular line of packet ship.

FOR HONG KONG AND WHAMPOA, the fast-sailing British ship, ISABELLA, A 1, 10 years. 733 tons register, newly metalled, R. K. MARTIN, Commander, to load in the West India Docks. Has superior accommodation for passengers.

For Freight or passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

To sail punctually on September 28, having a large portion of her cargo engaged.

FOR SHANGHAI, the celebrated Danish clipper JAVA, 3 T. French Lloyd's, 338 tons register, C. HOHLMANN, Commander, lying in the London Docks. This beautiful vessel has just delivered a cargo of teas in the finest order, having made the shortest passage of any ship now on the berth.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular line of Packets.

FOR BATAVIA, the fine fast-sailing barque WEST, A 1, thirteen years, 409 tons per register, coppered and copper fastened throughout, W. H. HAWKINS, commander. Lying in the St. Katharine Dock; has superior accommodation for passengers.

For Freight or Passage apply to the owners, Messrs. THORNTON and WESTS Old Swan Wharf; or to RANGEL, WOOLLETT and Co., 1, Lime-street-square.

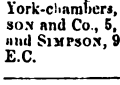
HONG HONG and WHAMPOA (now loading, and will be immediately despatched), the splendid fast-sailing clipper ship CHANDERNAGORE, A 1 ten years, 564 tons register, J. LYNAS, Commander; loading in the London Docks. Has excellent accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, E.C.

To follow the AVERY. With despatch.

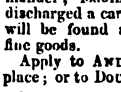
FOR COLOMBO Direct, the fast-sailing clipper barque ALGERNON, A 1 eight years, 448 tons register, W. RICHARDSON, Commander; loading in the London Docks. This excellent clipper was built under special survey, and is strongly recommended to shippers as a fast and safe conveyance.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.



FOR SINGAPORE and PENANG (to follow the Constantin), the well-known clipper ship FEROZEPORE, A 1, 12 years, 558 tons register, J. RANKIN, Commander; loading in the West India Docks. Has just discharged a cargo of tea from China in perfect order, and will be found an excellent opportunity for shippers of fine goods.

Apply to ANDREW WRIGHT and Co., 19, St. Helen's place; or to DOUGLAS and MILLS, 23, Billiter-street, E.C.



ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Bahama (ss)	W.I.D.	Sept. 15.
Hong Kong	Black Prince	W.I.D.	Sept. 20.
Manila	Trafa'gar ...	W.I.D.	With des.
Rangoon & Maulmain	Edond.&Julie	W.I.D.	With des.
Bombay	Egeria... ...	E.I.D.	With des.
Singapore	Eleanor ...	W.I.D.	With des.
Penang	Devondale ...	W.I.D.	With des.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.

With immediate despatch.

DIRECT for BOMBAY, the splend'd clipper ship SALAMANCA, A 1 13 years: 861 tons register; G. N. LIVESAY, Commander; loading in the East India Docks. This magnificent ship, so well known in the Bombay trade for her rapid passages and sound delivery of cargo, is confidently recommended to shippers of fine goods. Has splendid cabin accommodation.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

MAURITIUS Direct.—The following beautiful clippers are now loading, and will have quick despatch:—

FRANCES MILLY, A 1 13 years; West India Docks; last shipping day Saturday, September 19.

SALVADOR PACKET, A 1 12 years; loading in the London Docks.

For Freight or Passage apply to STUART and SIMPSON, 9, Clement's-lane, Lombard-street.

NOTICE.

THE partnership hitherto existing between WALTER SCOTT LORRAIN, GEORGE MACFARLANE SANDILANDS, and JOHN BUTTERY at this place and Singapore, under the style of LORRAIN, SANDILANDS, and Co., at both places, is this day dissolved by effluxion of time.

The Liquidation of the Affairs of the Firm will be conducted here by Mr. GEORGE M SANDILANDS, and at Singapore by Mr. ALEXANDER ALLAN.

Penang, 12th February, 1863.

THE undersigned beg to intimate that they have this day established themselves as General Commission Agents at this place, under the style of SANDILANDS, BUTTERY, and Co.

GEORGE M. SANDILANDS.
JOHN BUTTERY.
JOHN ALLAN.

Penang, 13th February, 1863.

SHANGHAI TEA COMPANY.

Temporary Offices and Warehouses:
17, BILLITER STREET LONDON, E.C.
(One minute's walk from Fenchurch-street Railway Station.)

TEAS (IN PARCELS) AT WHOLESALE PRICES.

The SHANGHAI TEA COMPANY beg to announce that, in order to accommodate Families, they have arranged to sell their genuine Teas in chests, half-chests, and even in smaller packages, at wholesale prices, from 1s. 6d. to 4s. 4d. per lb.

Orders by post promptly attended to.

THE LONDON AND CHINA TELEGRAPH.

THE FOURTH Volume of this JOURNAL was completed on the 14th Nov. 1862 The Subscription is 18s. per annum, or 5s. per quarter, not including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Massilia, arrived Sept. 24.—From Shanghai: Mr. Wade, Mrs. Davies, two children, and servant.—From Hong Kong: Don B. Montego, Mr. Whittall and servant, Mr. Neilson. To Southampton, per Ripon, expected to arrive Sept. 30.—From Hong Kong: Mrs. Arnould, infant, and native servant, Dr. Robinson, Lieut. Coxon, Messrs. Butner, Pinder, and Fabricius. From Singapore: Mr. Pearce, Capt. Henderson. From Penang: Mr. and Mrs. Smith and infant.

PASSENGERS OUTWARD.

By last mail, per Poonah, from Southampton 20th inst.—To Hong Kong: Mrs. Jack, Paymaster Jno. Hill, R.N., Captain Thomsett, Mr. and Mrs. G. A. Roesing, W. Prestage, M. Galbraith, M. Mulford, W. Digby and wife, T. Ives. To Shanghai: R. Trannack. To Singapore: J. Marshall, R. Allen, Mr. d'Almeida's Chinese boy. To Calcutta: Mr. and Miss Watkins, Captain J. R. Currie, Mrs. Wells, infant, and nurse, Mr. Mrs. and Miss Thompson, Mrs. Gordon Robb and infant, Mr. L. J. Jennings, Major and Mrs. James, Miss Hutin, Miss Doran, Mr. R. Wilson, Mr. R. Robertson and friend, Mr. J. D. Campbell, Miss Murdock, Mr. and Mrs. E. Drummond and European servant, Mr. H. C. Cutliffe, Mr. F. Birch, Sergeant-Major J. Naismith, Captain and Mrs. Foster, and two infants, Mr. R. C. Noble, Mrs. Thompson, Assistant-surgeon Collison, Mr. C. F. Inskipp, Mr. W. Beddingfield, Mr. M. H. Mrs. and Miss Foster, Mr. Boys, Mr. Warren, Mr. W. T. Church, Mr. J. A. K. Martin, Mr. F. W. Baker, Mrs. Keen and daughter and three sons, Mr. Crosthwaite, Captain Fow'er's man servant, T. Brown, G. J. Sprent, T. Tods, Mr. C. G. Turner, Mr. G. Fitzgerald, J. Richards, J. Lucas, W. Carr and brother, Mr. Whiffin, W. Watt, Mr. Weighall, Mr. J. P. Ward. To Madras: Mr. and Mrs. Burton and child, Mr. F. W. Dituras, Major and Mrs. Barber, Mr. C. J. Crosthwaite, Lieut. Iago, Mr. Brooks' servant. To Ceylon: Mr. and Mrs. B. L. Ronald and Mr. H. Kindersley. To Alexandria: W. H. Ewens, Mrs. Hamid Bay and daughter, Mrs. Pratt and child. To Suez: H. Gybon, G. Fletcher, A Wells, A. Hutton.

From Marseilles, per Euxine, to leave 28th inst.—To Hong Kong: Mr. Remé, Mr. W. Lamond.—To Calcutta: Mr. F. O. Mayne, Mr. and Mrs. B. Sapte, Mr. and Mrs. F. Woodhouse, infant, and servant, Mr. and Mrs. J. Ward, Major Sibley, Capt. Wm. Wemyss, Capt. H. Oldfield, Major C. W. Miles, Mr. Shearin, Mr. G. W. Kellner, Dr. Tucker, Miss Sandeman, Mr. F. G. Haselden, two Misses Jeffrey and governess.—From Suez.—To Shanghai: Mr. and Mrs. Probst, Mr. and Mrs. Bohsted.—To Hong Kong: Mr. and Mrs. Wilson.—To Calcutta: Mr. A. Breul, Mr. and Mrs. Caridia, Col. Holt, Mr. H. Toby Prinsep.—To Madras: Mr. Kelsall, Mr. and Mrs. Brooks.

Per P. and O. steamer Ellora, Sept. 27, from Southampton.—To Hong Kong *via* Bombay: Mr. Atwell Coxon, Mr. H. Rubery.

Per P. and O. steamer, Oct. 4, from Southampton.—To Hong Kong: Mr. Duncanson, Mr. Hancock, Mr. T. Rothwell.—To Shanghai: Mr. A. Frater, Mr. J. Troupe.—To Singapore: Mr. H. G. Kennedy.

Per P. and O. steamer, Oct. 5, from Marseilles *via* Bombay.—To Shanghai: Mr. J. K. Davis.—To Singapore: Mr. Webster.

Per P. and O. steamer, Oct. 13, from Marseilles to Singapore: Mr. and Mrs. Bik, two infants, female servant.

Per P. and O. steamer, Oct. 19, from Southampton.—To Hong Kong *via* Bombay: Mr. Hubbard.—To Shanghai: Mr. J. Sitwell, Mr. Anderson.—To Penang: Mr. Rodyk.

Per P and O. steamer, Oct. 20, from Marseilles.—To Hong Kong *via* Bombay: Mr. R. Swinhoe.

Per P. and O. steamer, Oct. 20, from Southampton.—To Singapore: Mr. Bruce, Mrs. Walter Gillespie, infant, and two children. From Marseilles, Oct. 28.—To Shanghai: Mr. A. K. McDonell, Mr. Crawford Kerr.—To Hong Kong: Mr. Wadman, Mr. Bryans.—To Singapore: Mr. Callaghan.—From Gibraltar. To Hong Kong: Mr. P. Toledo, Mr. H. Merry, T. Colom.—From Suez.—To Hong Kong: Sir Hercules and Lady Robinson, Mr. A. Robinson.

Per P. and O. steamer, Oct. 27, from Southampton.—To Hong Kong via Bombay: Mr. W. Lang.

Per P. and O. steamer, 5th Nov., from Marseilles.—To Hong Kong *via* Bombay: Mr. and Mrs. Robert Jarvie, Mr. Barton.—To Singapore: Mr. J. M. Webster.

Per P. and O. steamer, 4th November, from Southampton.—To Singapore: Mr. and Mrs. Shaw, Mr. and Mrs. C. W. Hatch.—From Marseilles, 12th Nov.—To Hong Kong: Mr. Young, Mr. A. Campbell.

Per P. and O. steamer, Nov. 20, from Southampton.—To Hong Kong: Mr. Forrester, Mr. Harvey.—To Penang: Mr. J. P. Stewart.

Per P. and O. steamer, 28th Nov., from Marseilles.—To Singapore: Messrs. C. R. Rigg and J. Fraser, Mr. J. Guthrie.

Per French mail steamer Peluse, from Marseilles, on the 19th inst.—For Singapore: Mr. and Mrs. Dufresne, Miss Crawford, Mr. and Miss Velge.—For Hong Kong: Miss Bonnatt and Mr. Johnson.—For Shanghai: Messrs. Bryne and Hume.

Summary of News from the Far East.

JAPAN.

The Dutch man-of-war *Medusa* left Nagasaki July 9th, bound for Yokohama, the route chosen being by the inland sea. Near the entrance to the Bay of Nagasaki the French ship *Keinchang*, on mail service under the command of Captain Lafont, came on board the *Medusa* with Dutch despatches, giving also his report for the admiral commanding the naval division in China. He informed the commander of the *Medusa* that the batteries in the Straits of Simonoseki and two European-built ships, having the Japanese flag, had the audacity to open fire against his steamer upon which was hoisted the French flag. The commander of the *Medusa*, before leaving, had taken a Japanese pilot from the Governor of Nagasaki, and he started immediately with all sails and steam in the direction of the Straits, where she arrived on July 11th at seven o'clock in the morning. On the *Medusa* coming in sight two cannot shot were fired from a battery, and afterwards eight others from a brig-of-war. As these balls did no damage, the Dutch commandant was inclined to believe they merely signalised the arrival of a foreign ship. Still, the decks were cleared for action, and the batteries on both sides were charged and manned, the men being in readiness to fire at the first undoubted hostile demonstration. It was not believed on board that the Japanese would have the audacity to commit the least hostilities, when suddenly a battery of eight guns (32) and those of two ships anchored before the town, having a flag blue and white (that of the Prince of Nangato) at her fore-royal-mast head, but no flag at the peak, opened fire of shell and ball, of which the direction was fortunately a little too high, or we should have had a perfect rain of iron. At this time we had arrived into the cross-fire of all the land batteries. All our pieces on the port side answered immediately, and owing to the short distance (only two or three cables at most), all the balls and shells (of 20 c.) carried admirably on the great land battery, and two of our balls made considerable damage on the battery of one of the ships. The order was given to advance as gently as possible, in order to give time to work the pieces well on the port side. The *Medusa* could not approach the ships sufficiently near to sink them, there being a bank of sand between and the water being shallow. Exposed to so sharp a cross-fire from four batteries,

Digitized by Google

the *Medusa* was hulled by their twenty-four shots and received two shells (16 c.), which burst after having passed by the first board. Three men fell horribly mutilated by the same shot. The balls ignited the bulwarks and the engine-room, and many men were called off to extinguish the flames. The fire of the enemy presently slackened, but four men had already fallen in the affray. It was now seen that the balls from the *Medusa* had seriously damaged the Japanese cannon and gun-carriages. The *Medusa* now advanced slowly on her course through the Strait, firing shells and ball. On her course, she was exposed successively to five other batteries of pieces of large calibre, the correct firing of which caused the commandant to apprehend damage to the boilers, machinery, and rudder, in which case the corvette must have been sunk in a passage so narrow and difficult. Passing the ninth battery, which like the other was concealed behind the trees or protected by the rocks, the *Medusa* came into the Inland Sea, one hour and a half having elapsed in passing the Straits where she had to support a continual fire of balls and of shells of 20 centim. In addition to the four men killed, five were wounded in the head by pieces of shell. Of 31 shots which struck the *Medusa*, 17 were balls of 24 and shells of 16 c. passed by the one board; of these projectiles three had exploded, one in the battery, another in the engineers' room, a third on the deck; whilst the others passed through the long boat, the cutter, the funnel, and many other places on deck where his Majesty's Consul-general, Mr. E. S. Benson, was nearly killed by the same ball that killed a chief gunner, and at the same time the commandant and a midshipman were slightly wounded by splinters. All the officers in the batteries and on the deck of the *Medusa*, at their respective places, directed the fire with perfect calmness, and considering that for the most part the seamen were for the first time called upon to vindicate the honour of their flag, the briskness with which their fire was maintained, together with its accuracy, notwithstanding the constant shifting of the guns, reflect creditably on the discipline of the vessel.

The following is the information received relative to the attack of the United States steamer *Wyoming* on the forts of the Prince of Choseu, in the Straits of Simonoseki, in revenge for the attack on the American steamer *Pembroke* by the steamer *Lancefield* and the brig *Lanrick*, purchased last year by the Prince, and which had taken up a position on the northern shore of the province of Nagato. The *Wyoming* got under weigh at Yokuhama on July 13th, and at once proceeded to the scene of the outrage, entering the Bungo Channel on July 15, and anchored at the island of Hine Sima. On July 16 the vessel proceeded towards the Straits of Simonoseki, the western entrance of the Inland Sea.

On nearing the Straits a signal gun was fired from a masked battery on the northern shore, which was repeated by two others to the westward towards Simonoseki. Rounding the point on the southern side of the entrance, a barque, brig, and steamer were discovered lying at anchor close to the north shore; the steamer and the brig were immediately made out to be the *Lancefield* and *Lanrick*, the barque's name was unknown. All the vessels were flying the Japanese flag at the peak, and the private colours of the Prince of Nagato at the main. The *Wyoming* now steered directly for the vessels, when a battery of three guns on the northern shore, about fifty feet above the level of the sea, opened fire, cutting up the rigging between the main and the mizen mast. The commandant then had the American flag run up, and the *Wyoming*, still steaming on, was fired on by a battery of four guns to which it replied with a broadside. The *Wyoming* was now rapidly approaching the vessels; the barque was close in shore; about fifty yards outside of her, and one length ahead, lay the brig; another length ahead, and fifty yards outside the brig, was the steamer. The main channel was outside of all these vessels. Captain McDougal gave orders to run the *Wyoming* betwen the steamer and the brig. As the *Wyoming* got abreast of the barque, she opened a broadside fire from three guns; in less than two minutes she was abreast of the brig, and received her fire from four brass 32-pounders. The Japanese steamer was on the port side, her guns, like the others, being trained on the channel, she fired a few swivels and small arms only. In passing, the *Wyoming* fired all the guns on both sides, hulling both the brig and steamer. Keeping close round the bows of the steamer, the *Wyoming* stood over toward the southern shore, receiving a constant fire from six batteries, the steamer, brig, and barque. The *Wyoming* got aground, but backed off without much difficulty. The steamer *Lancefield* having steam up, slipped her cable, keeping close along the northern shore, either with the intention of escaping, or running on shore to examine the danger caused by our first shots. The *Wyoming* was now manœuvred into position and eleven inch shell was planted in the steamer direct amidships, about one foot above the water line. In an instant, volumes of steam and smoke issued out of her fore and aft; her boiler had exploded. After dropping two more shells into her hull, the order was given to cease firing on the steamer, and to direct shots upon the different batteries, the barque and the brig, all of which were loading and firing as rapidly as possible. Quite a number of shell exploded in the batteries, and considerable damage was done to the town. In passing out of the Straits the *Wyoming* delivered a few very effective shots into the brig, and the last seen of her she was fast settling by the stern; the fire from the batteries was kept up throughout, but somewhat slackened on our return.

By that time we had four men killed outright and seven wounded (one since died). The armament of the *Wyoming* being only four 32-pounders and two pivot guns, opposed to six shore batteries of an average of three guns each, the barque six, the brig eight, and the steamer two, making in all thirty-four guns, mostly 32-pounders, Captain McDougal very wisely concluded to withdraw from so unequal a contest and proceed to Yokohama for more force. The captain, all his officers, and crew, behaved with the utmost coolness and bravery. The *Wyoming* was run into the midst of the enemy's vessels, receiving and returning broadsides at pistol range, at the same time sustaining a hot and continuous fire from shore batteries. When the successful shot struck the steamer, our crew gave three hearty cheers. The action lasted one hour and ten minutes; we were hulled eleven times and received twenty or thirty shots in the masts, rigging and smoke stack. One 32-pound shell came through immediately below the tackles of the forward broadside gun, and exploding, killed one man and wounded five others.

From the details of the attack on the French despatch steamer *Keinshang*, referred to in our last issue, and which took place July 8, show that she received the fire of all the forts commanding the narrower portion of the Straits of Simonoseki, and only escaped being sunk by being taken through an hitherto untried passage. A boat lowered from the *Keinshang* was sunk.

The retaliation of Admiral Jaures, Commander-in-Chief of the French forces in China and Japan, for the attack on the French despatch boat above detailed, was as effective as it was exemplary. With the war steamers *Semiramis* and *Tancrede*, the former carrying his flag, he left Yokohoma, July 16th, and on the 20th ran under slow steam into the entrance of the Simonoseki Channel, looking out for the batteries. When about two miles from the Nangato side of the channel two guns were fired from the midst of the trees, and soon after Cho-hoff, the Castle of Saki-noski, a member of Matz-daira Dnizen no Daiboo's family, was seen. The first gun fired by the French vessel sent earthwork and stones, turf and sandbags flying around in all directions. The bombardment was continued for several hours; still, no answer was returned by the Japanese. The admiral decided upon the destruction of this battery, but not the castle. A party was sent ashore to make explanations to the people, and were received well by the officials. Meanwhile, the *Tancrede* was sent into the narrowest part of the channel, and was fired upon by a battery, which, in company with the *Semiramis*, it destroyed. A landing of armed marines was then ordered, who proceeded to the battery; it was found deserted. The guns were at once spiked and the powder thrown into the sea. While this was going on in the battery Mr. Layrle, Chief d'Etat, Major Admiral Jaures advanced by the right of the battery (keeping up a continual fire with Japanese hid in the bushes) to a village called Aidaga-mome, which was abandoned. A temple having been fired by the French, blew up with tremendous noise just as the force was re-embarking. The French had three men wounded. Two thousand men regular in array, some on horseback, made up the force discovered ashore. Japanese casualties unknown. The admiral having accomplished his object returned to Yokohama.

With the issues of the *Japan Herald*, on July 18th and 25th were published a serviceable series of charts of the Inland Sea, denoting the relative positions of the principalities bordering upon it, and the scenes of the late attacks on foreign vessels, and subsequent naval engagements.

CHINA.

PEKING.

The *China Mail* says:—"The weather had been very hot (from 95 deg. to 97 deg. in the shade), and the house-flies and sand-flies very troublesome. The success of the Danish envoy in obtaining a treaty, as stated in our last, is considered a triumph. China has now entered into treaty relations with eight nations, viz. Russia, United States, Great Britain, France, Prussia, Belgium, Portugal and Denmark, whose treaties were signed in the order of their enumeration; a treaty was negotiated with Sweden in 1845, but the Swedes have not appeared to claim the recent concession to other Powers. Much praise is due to the Danish envoy for his success in these negotiations, for the Chinese authorities were not inclined to make any more compacts of the sort; and he fully deserves the reward we doubt not will be conferred upon him at Copenhagen.

SHANGHAI.

At the special request of Lord Elgin, Dr. Rennie, who served with the army at the attack and capture of Peking, and was subsequently appointed senior medical officer in Shanghai, has left for Calcutta, to join the medical staff in Bengal. His eminent ability will, no doubt, be largely beneficial in the improvement of the general condition of the soldiers' health in India, about which there is at present some discussion.

The first of Sherard Osborn's fleet has arrived. The *Thule*, which now lies in the river, is a practical proof that the much-lauded scheme for exterminating Taipings, and crushing Taipingdom, is about to come into active operation. It appears, however, to us that both the English and Chinese Governments have been all along acting under extraordinary misconceptions.

We take the following items from the *Friend of China*:—"H.M. Gunboat *Flamer* having gone to Hangchow Bay to look after Messrs. Dent and Company's missing lorcha, the *Rosina*, was fired into by some pirates in that quarter, and compelled to beat a hasty retreat with one man killed, and Lieutenant Bosanquet wounded in the leg. The *Flamer* got back to Ningpo on the 29th ult.; and sent for the *Weasel Staunch*, and *Cormorant*; so we suppose next week we shall hear of a second Aboukir, or the battle of Van-da-quan, that being the name of the place where some shore batteries manned by Cantonese opened the game. The Chinese owned steamer *Paoushun*, too, was fired into coming through one of the passes near Ningpo, both from shore batteries and a fleet of West coast boats—showers of grape shot riddling the boats, and killing the captain, an Englishman of the name of Barton."

"We have to report a clever feat in detective police here. Captain Keys, of the British ship *Golden Fleece*, missed one of his seamen, a coloured American, shipped in London; and on examining the cargo found that he had taken with him a chest of opium. No time was lost in reporting the case at the police office, and within twenty hours the seaman was caught, and the opium recovered. The rascal had been aided by a fellow residing in the French concession, by whom a boat must have been brought alongside while the thief had the watch on deck, a hatch being then forced noiselessly. On landing the drug it was planted here in Hong-que, and a couple of balls taken to a China house by Woosung Road, as deposit for proposed lodging. There they were to have slept that night. They went, but, cruel police would not let them stay, and lugged them off to Shanghai gaol."

"During the last fortnight the French soldiers, heretofore quartered in Shanghai, have nearly all been moved; and if earnest prayer on our part would avail, we should never see a French soldier or marine in Shanghai again. We see no possible good by their presence. Some 200 were taken over to Yokohama to infuse a little spirit, if need be, into the Yakonins, and with them, no doubt a dose or two of French lead might prove beneficial. Another fifty went to Cochin China; fifty being left to do duty as guards hereabout. Last Saturday the muster-roll was called, and of these fifty seventeen only remained, the rest had all gone off with cholera during the preceding week! We have this information from a respectable hotelkeeper in the French concession, who came to our office to order some cards, and we have no doubt whatever of his veracity. This week there is less sickness; but only a few nights ago, he says, a French sous officer took from his establishment some bottles of champagne, with a promise that if he came to his quarters the following morning he should be paid. He went, but, though only a few hours had elapsed, the champagne purchaser was in the dead-house! Over night in costume for a *bal danse*, in the morning bedizened with the cerements of the grave. And the British Belooches are going off equally as last."

The weather has been much cooler since the departure of the ast mail, and sickness has decreased. There have been a few cases of cholera among the Belooches, but generally it has subsided.

A fire, which speedily showed itself to be uncontrollable, sprang up amongst some buildings in the immediate vicinity of the South Gate of the Chinese city. The fire took its rise in some temporary huts made of matting, but quickly spread, involving in the ruin a number of Chinese built houses, used by the American missionaries. One or two Chinamen are missing, but fortunately no foreigners were injured.

THE ANGLO-CHINESE FORCES.—On Saturday the 1st August, H.I.M. steamer *Kiao-chiao*, left Shanghai for Sun-kiong, having on board Dr. Macartney, late 99th Regiment, now in command at the latter city. The Fumiangs Chang, and Li (brother of the Viceroy of the Chiang-su province) were towed up to the mouth of the Sunkiong creek, where they were left, while the *Kiao-chiao* proceeded to Sunkiong to take troops on board. The steamer arrived under the walls about daylight on Sunday morning, and was made fast below a bridge which spans the creek between the south and west gates of the city. The bridge is much nearer to the south gate than to the west, but in consequence of the south gate having been closed to propitiate the god of rain, Dr. Macartney had to proceed to the west gate in order to enter the city. He had got about half-way, when one of the European officers who had been left on board, came up breathless to say that the steamer had been seized. Now the barracks are within the city in the immediate vicinity of the south gate, consequently before soldiers could be brought down, a distance equivalent to nearly the entire circuit of the city had to be traversed. For some time back it has been generally known that Burgevine has been enlisting all the European rowdies in Shanghai, under the pretext of getting up a force to be employed in the north. The real destination of this force is now placed beyond a doubt, and grave results may be expected to follow from the organisation of a European contingent in connection with the rebel army. Burgevine has real or imaginary wrongs to avenge, and will therefore leave no stone unturned to overthrow the Imperial power. On the other hand, the men who have banded themselves together under him know well their fate if they fall into Imperial hands. We may therefore expect to hear of atrocities on both sides, to which all previous crimes will be as a drop in the ocean. It is worth noticing that the Imperial army will soon be reinforced by a purely English force under Captain Sherard Osborn. The successes of the Burgevine contingent will, therefore, we imagine, be rather shortlived, now that it will be opposed by Englishmen led by English officers. At any rate, the formation of this contingent has added another to the many existing complications, and the successful result of its first active operation will tend to re-animate the rebels.

HANKOW.

The municipal policeman Carroll, who is charged with the manslaughter of another municipal policeman named Sullivan, has been committed by H.B.M.'s Consul to take his trial before the Supreme Court of Hong Kong. He has been sent to Shanghai in the ship *White Adder*, together with a witness named Charles McKenzie, formerly boatswain of the same ship. Some deaths have occured here, which may be partially set down to the intense heat. In the Chinese town the people are said to be dying in great numbers; of fever it is believed. Houses and godowns are fast springing up on the British concession, but no signs of a Consulate are yet apparent. The two portions of the Government lot, which were sold by auction on the 14th of July, are considered to have fetched rather a high price. A cargo boat not long since, when proceeding from a steamer to the consignee's godowns, came into collision with a ship, and a large amount of copper cash went to the bottom. Chinamen have commenced dragging for the bags; it is hoped that they may succeed in recovering a portion at least of the cash, which is said to be of considerable value. It is surprising that merchants do not use more manageable boats in such a dangerous river as the Yang-tsze, where accidents are of daily occurrence. Owing to the tremendous strength of the current, many Chinese boats have been upset lately, and unfortunately these accidents have been attended with much loss of life. All alarm about an attack by the banditti and rebels has entirely subsided; for some time nothing has been

Digitized by Google

heard of their movements in this neighbourhood. A great deal of tea has come in, but prices rule high.

KIUKIANG.

Our intelligence from this port is very meagre. Another death from cholera has occured there, and several persons have left the port for Hankow, from fear of the disease spreading.

NINGPO.

A serious encounter has takenplacein Hang-chow bay, between H.B.M. gunboat *Flamer*, the Chinese steamer *Paoushan* and a number of piratical junks. A vessel named the *Rosina* belonging to Messrs. Dent and Company was captured by pirates during her voyage from Ningpo to Shanghai, and carried off by them into the recess of the bay. For some time it was not known whither she had been taken, and her whereabouts was only discovered at last through information given by one of her native passengers, who escaped to Ningpo. The *Flamer* and *Paoushan* at once proceeded to the spot, but found the *Rosina* sunk and the cargo abstracted. They were themselves vigorously attacked by the pirates and had considerable difficulty in beating them off. One of the crew of the former vessel was killed during the action, and the commander, Bosanquet, severely but not dangerously wounded in the thigh. Captain Barton of the *Paoushan* was also killed. The two vessels withdrew to Ningpo, but will immediately return in company with two other gunboats to endeavour to destroy the piratical fleet. The pirates have obtained a splendid prize, as the *Rosina* is stated to have had specie to the amount of 20,000 taels on board, besides a full cargo of tea.

HONG KONG.

The London mail of the 26th of June arrived on the 5th of August.

Mr. T. F. Wade, the Chinese secretary, and interpreter to the legation at Peking, leaves for England by the present mail.

An important mereantile point has been decided by a jury. It is, that a delivery-order for opium, though sold and paid for, does not free the vendor from risk should mishap occur to the drug after the order has been given away. The case was given against the Commercial Bank in favour of Cama and Co.

The following items are from the *Evening Mail*:—"The opening of Takao and Keelung, in Formosa, is finally notified; the regulations have undergone alteration, in compliance, probably, with the desire of the Chamber of Commerce committee, but the alteration has not been advertised, we are, therefore, not in a position to speak further on the matter."

"An article appeared in which the subject of horticulture in Hong Kong was treated; it seems that gardening is making some progress in the island, and it is to be hoped that the public gardens now advancing towards completion will furnish a model for the arboriculturist and a repository for the best specimens of Chinese plants."

"The volunteer corps is still a subject of interest to the public, and there is a wish to know whether an instrumental band is to enhance the effectiveness of the corps and afford the town some musical recreation. It was suggested that the community should give a dinner to the volunteers in return for a similar entertainment given some months ago; it would answer very well to have the affair just before the force goes into drill for the winter."

"An article appeared pointing out the grievance of discontinuing the collection of taxes by visits from house to house; in future all imposts must be paid at the Government offices."

"A case of contempt of court was brought on before Judge Ball, on the 3rd, the Attorney-General moving for the committal of Mr. Pollard; the latter gentleman explained his course of action so completely that the motion was withdrawn."

"A letter appeared on what is probably an important subject, the establishment of telegraphic communication between Queen's Road and Victoria Peak; it was urged, that by this means consignees and others would have notice of a vessel's approach, instead of, as at present, only knowing of its arrival by the masters' walking into their offices.' '

THE PHILIPPINES.

MANILA.

A correspondent of the *China Mail*, under date August 5, writes:—"The British ship *Gipsy Bride*, that left this port July 12th, was lost on the 17th, at 7.30 p.m., on Scarborough Reef. After strenuous but unsuccessful efforts, during four days, to get her off, they finally took to the boats (six), and made for Manila. The mate and most of the crew had arrived here, but two boats (in one of which were Captain Murphy and his wife and child) are still unaccouuted for. It is hoped that they have been picked up by some of the vessels that lately left Manila. The *Merchantman*, from Shanghai to Hong Kong (!), has put in for medical advice.

"We still hear of earthquake shocks and deaths from lightning. On the 15th and 17th of last month some slight tremblements were felt in Batongas. On the 9th ult., between 7 and 8 P.M., the volcano of Albay commenced, and continued till morning, vomiting flames and lava in quantities not witnessed for many years. On the night of the 23rd, about nine o'clock, the bulwarks of the nave of Recoletos church fell in. Fortunately it did not happen in the day-time, or many poor workmen would have been killed. On the 16th ult., in the district of the Infanta, seventy-two individuals embarked in a coaster, to go from Birangonan to Polillo, to be present at a religious feast; but when about half-way, the heavy weather from S.W. caused the vessel to upset. A fisherman gave notice to the Governor of the district, who happened to be at Polillo, and he immediately manned a felucca, and, accompanied by the curate, proceeded in search of the wreck, in spite of the bad weather, strong gale, and heavy sea, and were able to save twenty-seven men and ten women, the only survivors, and who, clinging to pieces of the wreck, were all but exhausted. All praise be to the brave Governor, curate, and crew of the felucca, who thus risked their own lives to save those of their fellow-creatures.

On the night of the 28th, an Indian servant in Manila took it into his head to run a-muck, and killed a fellow servant, and severely wounded his master. He is in custody, and will, of course, suffer the penalty that man has imposed on the shedder of blood.

SIAM.

BANKOK.

M. Lanole, the French Consul, died of apoplexy in July, and the duties have since been conducted by M. St. Cyr Jullien, of the firm of Messrs. Remi, Schmidt, and Co.

The following letter from the King of Siam upon the death of the late French Consul to Siam has been handed to us by Mr. Beurel. It appears that the King would desire the letter published, as a sort of tribute to the memory of his friend M. Zanole. The letter is in the King's handwriting, and we have allowed the diction to remain unaltered.

No. 148.

Royal Residence, Grand Palace, Bangkok, 27th June, 1863.

To REVEREND J. M. BUEREL, the Pro. Vicar Apostolic for Malay Peninsula, Superior of Roman Catholic Church of Singapore, &c.

VENERATED SIR,—I regret very much to state great sorrow occurred to us (myself and principal members of our government) in losing of most satisfactory French Consul Monsieur Zanole—the said intelligence of the death of whom you will have received more particularly than I would state now.

Several days ago before his death on the 24th instant, we have learnt that Monsieur Zanole, the French Consul, was so very sick, that he could not permit any one to visit him in person, but he allowed to send him only visiting cards—it was said that he was sick of dysentery accompanied with fever and, afterwards we learnt that he was desirous of changing in climate, and wished to go and live at Bejugury (city of Siam on the Western shore of the Gulf of Siam) about 70 miles distance from hence—under our kind assistance. We are already to convey him, and let him have a brick house for his residence there. On the morning of the 24th instant, at 8 o'clock A.M., he had invited Doctor James Campbell, the English consular surgeon, to survey his body, whether he can go. The doctor seeing him capable of raising himself and speaking well, informed him that he could go without fear, but, alas! lo! after two hours from that hour 10 o'clock A.M., of that day, the French Consul Zanole became attacked with a most vehement apoplexy and died suddenly at 11 a.m. His funeral service took place to-day at the Roman Catholic Church, under the honourary assistance from us in a similar manner as the funeral service to late Right Reverend Bishop Pallegoix on last year.

"We are indeed sorry for his loss, as we perceived that he was the best French Consul than any of his predecessors here for his honesty, righteousness in justice, and being loyal and dutiful in fulfilment of provision of the Treaty, local and international laws, &c., though a certain party of Catholic people or mission here might have clandestinely displeasure on him in anything contrary to their pleasure and vulgar desire, yet none of our Government and Consuls of other nations here displease him in anything. We are very sorry for his loss though he has been here only four months and eight days.

"We are eagerly wishing to have another personage like him in the aforesaid character, to be his successor in future, for maintaining the true friendship between the French and Siamese nations in a peaceful manner like what Monsieur Zanole has done on his residing here only four months.—I beg to remain, your good friend,

"S. P. P. M. MONGKUT, S. L.
"On 4427th day of reign.

"P.S.—Can you publish my words above in newspaper? I shall be glad if you would please to do so.—S. P. P. M. MONGKUT, S. L.
"On 4427th day of reign."

JAVA.

BATAVIA.

The correspondent of the *Straits Times* writes :—

"I have to advise that Mr. H. G. Robinson who tendered for the steam communication contract here, has obtained the same for ten years, with an annual subsidy from Government of nearly 300,000f. ; shares are offered at 1,000f. each, payable in instalments.

"It is a fact not unworthy of notice, that notwithstanding it was well known that the competition was open to the whole world (Hottentots not excepted) some Dutch parties here, doing justice to their antediluvian notions, petitioned the Government that the case might be sent to the Home Government for decision, whether the contract should be given to a foreigner, and several letters appeared in the papers endeavouring to persuade the Government that it would be detrimental to the State, and other such childish nonsense, to give the contract to the English tender. But our Governor-General, with his usual liberal ideas, it seems, took little if any notice of the petition, and accorded to Mr. Robinson the contract for which he tendered at one cent per mile below the other competitor. Mr. Cores de Vries did not compete. I believe most of the shares will be reserved for Holland.

"The Railway Bill having passed the Chambers in Holland, our neighbours at Samarang are feasting in all their glory, and by the mail just arrived this afternoon, we hear the Bill has passed the Upper House."

MALACCA STRAITS.

SINGAPORE.

In an obscure corner of the *Government Gazette* there is a notification of very great importance to our mercantile community—namely, the introduction here of sixteen sections of Act XXXI of 1860—relating to the sale of arms and ammunition. Unfortunately, the bulk of our European intelligence prevents our entering into the discussion of this measure to-day ; we propose, however, to do so at an early date, but may, in the meantime, express our curiosity as to the motives which induced it.

The fire which lately occurred is, with one exception, the largest yet seen in Singapore; it commenced at about three o'clock in the afternoon, and lasted till nearly seven in the evening, and has burned down, or otherwise seriously injured, no fewer than fifty-seven houses. It originated, we believe, in a bakery on Circular-road, making rapid progress down to the junction of that road with South Bridge road. All the fire engines were brought to the spot with most praiseworthy despatch, and were handled steadily and effectively. The resident councillor, the commissioner of police, Captain Macnair, and most of our authorities, together with a large portion of the mercantile community, were on the spot, and rendered active services. All the available men of the European Artillery were despatched to the scene at half-past three o'clock, under Lieut. Weston, and we also noticed a detachment of the 34th M.L.I. By very great exertions on all sides, the fire was got under at about seven o'clock in the evening. It was very fortunate that the day was calm, for had it been breezy the fire must have spread in a fearful manner. The loss is estimated at about $50,000.

The Anglo-Chinese vessel *Pekin* arrived on August 9 from England.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DE COSTELLA—On the 20th July, at Shanghai, the wife of Henry de Costella, master of the British steamer Express, of a son.

HENDERSON—On the 14th July, at Shanghai, the wife of Dr. James Henderson, of a son.

NEALE—On the 10th inst., at the Consulate, Piræus of Athens, the lady of W. B. Neale, Esq., Her Majesty's Consul for Continental Greece, of a son.

REMEDIOS—On the 1st August, at Hong Kong, the wife of Mr. G. Dos Remedios, of a son.

WILSONE—On the 9th August, at Sreemenanti, the wife of C. H. H. Wilsone, Esq., of a daughter.

MARRIAGES.

BONDE—MARRYAT.—On the 19th inst., at St. George's Church, Hanover-square, by the Rev. Henry Lindsay, rector of Kettering, and cousin of the bride, and afterwards at the Swedish Legation, by the Rev. F. Grafstrom, Chaplain to the Swedish Legation, and Almoner to His Majesty the King of Sweden and Norway, Gustaf Frederic, Count Bonde, of Biorno, to Ida Horatia Charlotte, only daughter of Horace Marryat, Esq., and granddaughter of the late General the Right Hon. Lord Edwd. Somerset, G.C.B.

DEATHS.

ALLEN—On the 21st July, at Shanghai, Herbert L. Allen, master of the Pilot Association's schooner Garland, a native of Somersetshire.

BROWN—On the 28th July, at Canton, Maria Brown.

CARAPIET—On the 31st July, at Hong Kong, Samuel Michael Carapiet.

DUNDAS—On the 11th inst., at Craig Royston, near Edinburgh, Vice-Admiral Henry Dundas, second son of the late Right Hon. Robert Dundas, of Arniston, Lord Chief Baron of the Court of Exchequer in Scotland.

FREEMAN—At sea, on the voyage from Vancouver's Island, — Freeman, master of the British barque Julia.

HARRIS—On the 28th July, at Shanghai, — Harris, late of the American barque Pacific.

HOLTON—On the 15th July, at the head-quarters of the 67th Regiment, Shanghai, Emma Lydia, third daughter of W. N. Holton, of Westberry House, Roscommon, Ireland.

HOLLAND On the — July, at Hong Kong, — Holland, late master of the British ship Catharine Glen.

JACKSON—On board the ship Cuina Family, at Hong Kong, G. Jackson, late master of the said vessel, of dysentery.

LEE—On the 14th inst., at his residence, Frogmore House, Guernsey, George Lee, Esq., late of the Ceylon Civil Service, aged 61.

MILTON—On the 31st July, at Hong Kong, on board the Hospital ship Melville, James Milton, of H.M. ship Fulcan.

MCKENZIE—On the 14th July, at Kiu-kiang, — McKenzie, Customs officer.

NORTH—On the 25th July, at Shanghai, J. A. North, a native of Boston, U.S.A.

PEARSON—On the 22nd July, at Hankow, R. C. Pearson.

ROBERTSON—On the 24th July, at Shanghai, Captain Arthur F. Robertson, of the 67th Regiment.

SHAFTO—On the 14th inst., at Brancepeth Rectory, Arthur Duncombe Shafto, Midshipman, late of H.M.S. Narcissus, aged 18 years, second son of the Rev. A. Duncomb Shafto.

TOURNIERE—On the 23rd July, at Shanghai, Auguste Tourniere, Counsellor-at-law.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton : The teamen, finding that there was no probability of obtaining the extreme demands mentioned in last report, or even any material advance on the offers already made, at length yielded, and the result was that the market for New Congous was re-opened on the 29th ultimo, on much more favourable terms than for the previous exceptional purchase ; still, prices on the average exhibit a loss on latest London quotations, the anxiety to despatch one or two of the numerous vessels on the berth, having doubtless exercised an influence in some of the operations. Supplies of new Congous come forward very slowly, the total arrival to date amounting to 29 chops only. Canton Congous have been but moderately dealt in. Scented Capers show a further decline of one tael. In other descriptions there is no alteration to notice. The settlements of the fortnight are reported as under :—New Congous : 11 chops, say ; Lylings, 4 chops at 35½ to 36¾ taels. Chongsowkyes, 3 chops at 38¼ to 39 taels. Woopacks, 4 chops at 40 to 43 taels. Congous, Tyshaan : 600 chests at 24½ taels. 700 half do., and 1,000 boxes at 23 to 32 taels. Souchongs, 350 half chests at 30 to 30½ taels. Scented teas, 3,000 boxes Caper at 18 to 20 taels for common to fair ; and 22 to 26 taels for middling to good. 6,000 boxes Orange Pekoe at 19 to 24 taels for common to fair ; 26 to 28 taels for middling to good ; and 30 to 31½ for fine. Greens, 2,000 boxes Gunpowder, fair to good at 23 to 26 taels. 550 boxes imperial, fair to good at 20 to 24 taels. The stock on the market is stated as follows : New Congous 17 chops. Tyshaan Congous 1,500 half chests. Oolongs 850 half chests. Scented Caper 30,000 boxes. Scented Orange Pekoe 15,000 boxes. Canton Greens, uncertain.

SHANGHAI.—Black : Since the date of last report, the market has remained unchanged, and a steady business has been transacted throughout the whole fortnight ; no alteration in prices can be quoted with the exception of fine teas, which are now very scarce, and can be placed at one tael over last fortnight's rates. The market continues well supplied, and considerable shipments have been made from Hankow on native account, which will all be offered here. The quality of the tea is now very rapidly depreciating, and amongst recent arrivals there have been some very common and coarse Oonahms which did not come forward till a month later last season. The bulk of the settlements during the fortnight have been composed of Oonahms at taels 30 to 34, and Oopacks at taels 35 to 39 ; only two chops of Hohow have been taken, one at taels 28 and the other at taels 31. Settlements on the market, 16,600 Oopacks, Oonahms, Ningchows, and Hohows. Reshipped on owner's account, 17,999 chests Oopacks. Total, 34,599 chests, making total to date 129,817 chests. Stock.—Waiting shipment, 25,200 chests. For re-sale, 25,200 chests. Quotations : Good to fine Oopacks, taels 34 to 39. Good to fine Oonhams, 30 to 37 taels. Good to fine Hohows, 28 to 31 taels. Green : No settlements have been reported during the fortnight, and it is hardly likely that anything will be done before the arrival of the new crop. Musters of the new Pinsueys have been shown, but the bulk has not at present come forward ; judging from the appearance of the leaf, the preparation has been too hurried, and the make is decidedly inferior to that of former years. Reshipments and settlements 2,924 half chests, making total to date 15,030 half-chests. Stock of Green tea is estimated at 3,740 half-chests.

FOOCHOW.—The settlements of Congou during the fortnight have been large, prices of medium grades having been fully maintained, although no doubt any cessation of demand would be followed by a decline, as the teamen are anxious to realise. Better kinds have given way and are half a tael to a tael lower. Common kinds have advanced 1 to 2 taels. Good common Congou, may be quoted at 18 taels. The settlements of the fortnight are reported as under :—Congou, 15,100 chests, 2,900 half do. and 2,900 boxes, at 7 to 17 tls. for ordinary and broken leaf ; 17 to 22 taels for good common to flavoury ; 22 to 28 tls. for Souchong kind to medium Kysow ; and 29 to 32 tls. for fine. Souchong, 2,400 chests at 24½ to 32 tls. for common to good. Flowery Pekoe, 500 chests at 27 to 31½ tls. for fair. Oolongs, 4,300 half-chests at 20 to 28 tls. for fine cargo to superior. Green Tea, 500 half-chests at 9½ to 27 taels for Skin and Young Hyson. Scented Tea, 1,100 boxes at 16 to 33 taels for com. to fine. The supplies of the new Season's Congous to date amount to 285,400 chests (including 31,600 chests contract) against 285,000 chests same period last season. The stock now for sale upon the market comprises the following :—Cougou, 57,500 chests (say 15,000 chests ordinary, 27,000 good common to flavoury, and 15,500 good flavoury to fine) Souchong, 8,700 chests Flowery Pekoe, 500 do. Oolong, 54,400 half chests. Green Tea, 100 half-chests. Scented Tea, 5,400 boxes.

AMOY.—The market has been active. The following is the report of the month :—Congous : All the remaining first crop teas were taken at very full rates, but prices then declined about $1, as there was but little inquiry for the common flavoury kinds comprising the unsold stock. They have again recovered, and are now about on a par with last quotations. Settlements are 12,366½ chests, at $18½ to 21 for good ordinary to best middling, and $23 to 27 for flavoury kinds. Oolongs : Shortly after last report buyers for America began to operate, and prices have since been

Digitized by Google

firmly maintained. The teamen are not generally desirous to realise their produce at present, as they expect higher prices by-and-bye in consequence of the shortness of the crop. Settlements are 18 059 half-chests, and 300 boxes chiefly fair to good cargo Ningyongs, although latterly the commoner grades have commanded more attention. Present quotations are $18 to 20½ for common to good common; $21 to 23 for fair; and $23 to 26 for good cargo. Ankois: Only 160 half-chests of fairly clean tea have been taken at $16. Flowery Orange Pekoes: Settlements are 2,628 half-chests, and 500 boxes at $13 to 18 for low ordinary to fair tea. Plain Capers: No transactions.

HANKOW.—The market in the early part of the fortnight gave way 1 to 2 taels for the common and medium sorts; this induced large shipments on native account to Shanghai, owing to which the market closed firm with an upward tendency.

KEWKIANG.—The export of tea this season amounted to 32,500 chests black and 6,300 chests green, against 26,000 chests of the former, and 30,500 half-chests of the latter, corresponding period last season.

NAGASAKI has continued to arrive in considerable quantity, and has at once been sold on the market in barter against imports and for cash at fully 20 per cent. under last year, prices. At present there is no stock on hand, but daily supplies arrived. Prices were influenced by the views political matters take and had increased within the last few days fully $4 per picul for all kinds. The last news being of a warlike nature, merchants look for cheaper rates. Settlements 4,000 piculs from date of last report.

YOKOHAMA.—Since our last weekly report, prices for medium and fine classes have again slightly advanced, and the teamen were inclined to give way in their demands. Settlements amount to about 620 piculs. Stocks, ordinary to good, 200 piculs; common, 200 piculs; good to common, 259 piculs; medium, 400 piculs; fine, 50 piculs; finest, none. Quotations are as follows:—Ordinary, $1 to 3; good to ordinary, $4 to 6; common, $8 to 12; good to common, $14 to 18; fair to good, $19 to 20; fine, $25 to 28; finest, none.

RAW SILK.—SHANGHAI: During the fortnight about 2,000 bales have been sold, notwithstanding that prices continue considerably above last London quotations. The purchases have been almost confined to common Tsatlees, of which the stock is chiefly composed, but a few bales of the better classes have also found buyers at following quotations. Tayshams are decidedly scarce and have in consequences rather advanced in value. Cheap money has enabled the Chinese to show great firmness, and although foreigners have not been anxious buyers, they have in most cases had to pay the prices asked by the dealers. The large settlements of Japan silk advised by *Yangtsze*, and the probable ample supply from that country, ought to have the effect of weakening the confidence of dealers, and induce them to accept lower rates. The settlements of the fortnight are reported at 2,000 bales against 8,000 bales corresponding fortnight last season, and 4,000 the season before. The stock on the market is reported at 14,000 bales, against 17,000 bales same period last season, and 13,500 the season before. The following are the current quotations:—Tsatlees, No. 1, 455 taels per picul; 2, 335; 3, 410 to 415. Market: No. 3, 395 to 405; 4, 375 to 395; 5, and com., 355 to 370. Taysams: No. 1, chops, 385 to 395; 2, 370 to 375; 3, 345 to 360; 4, 5, and com., 315 to 340. Yuenfa: No. 1, 410 to 420.

CANTON.—The cocoons of the third crop are now nearly all wound off; of Loong-kong silk alone the quantity produced is said to be over 40 piculs. Silk of the fourth crop will be ready for market in about ten days from this date. Nothing beyond a few bales of Tsatlee, and imitation Japan reels, have been purchased by Europeans for the London market, the prices which have ruled from the commencement of the season preventing operations.

CHINA IMPORTS.

HONG KONG.

COTTON YARN has not been in any request, and there are not any sales reported in the article, the quotations for which show a decline upon previous rates of from $1.50 to $2 per picul.

GREY SHIRTINGS also have been uninquired for during the fortnight, and the only sale reported is that of 2,300 pieces damaged goods sold by public auction. Prices of these goods also show a slight decline.

WHITE SHIRTINGS.—2,300 pieces of those fabrics sold in Hong Kong constitute the business done during the fortnight.

T-CLOTHS.—There is not much alteration noticeable in the value of these goods, except for the heavier descriptions, which have participated in the decline experienced by Long Cloths, and the sales of the fortnight are estimated at 2,750 pieces.

AMERICAN DRILLS.—A small sale of 465 pieces 40 yards, and 200 pieces 30 yards goods, at the annexed quotations, is reported.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—The only sale of these fabrics to be reported from this colony consists of 500 pieces of Coloured Brocades, and the value of all, with the exception of White Spotted Shirtings (quoted about 10 cents per piece lower) remains as before.

DAMASKS are quoted as annexed, but without sales.

CHINTZES AND HANDKERCHIEFS.—700 pieces of Chintzes have found purchasers at the annexed quotations. In Handkerchiefs nothing has been done.

RAW COTTON shows a slight decline upon the rates previously given, with a very small amount of business transacted, the sales of the fortnight (which are almost entirely upon foreign account) being limited to 800 bales.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—The sales of the above fabrics in this colony are reported at 310 pieces of Spanish Stripes, at about the same rates as were previously current. Of Medium Cloths, some 96 pieces are reported sold. There have not been any sales of these goods in Canton, and the nominal quotation remains as before given. Long Ells—The sales of these goods reported in this colony are estimated at 1,000 pieces for the fortnight, and the value of H Long Ells has advanced some 10 to 15 cents per piece, other kinds remaining as before. In Canton, where the price of H Assorted kinds show a rise of about 75 cents per piece, there have not been any settlements. Camlets have been placed in Hong Kong to the extent of 240 pieces of English and 120 of Dutch, at the annexed quotations. In Canton, 240 pieces have been sold. Lastings do not show any change in price, and the sales of the fortnight are limited to 440 pieces in Hong Kong.

METALS.—Iron, Flat, &c.—There is not much alteration in price to notice with regard to these—the sales of which in Hong Kong are estimated at 2,000 piculs of Nail Rod (exclusive of some 700 piculs damaged, and sold by auction), and 2,500 piculs of Square and Flat. In Canton the settlements of the fortnight are put at 250 piculs of Square and 760 of Hoop, which latter has given way in value about 10 cents per picul. Lead must again be quoted rather lower, both in this market and in Canton, where the sales of the fortnight are estimated at 1,300 piculs and 2,500 piculs respectively. Tin.—423 slabs have found buyers in Hong Kong. Tin Plates have found purchasers in this colony at the annexed quotations to the extent of 200 boxes, and in Canton 500 boxes have been sold. A parcel of about 400 boxes damaged has also been moved off by public sale in Hong Kong. Steel.—100 tubs sold in Canton.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 3½d. to 6s. 4d.	6s. 4d. to 6s. 5d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—None

At SHANGHAI.—From London: July 20, Reindeer; 28, Woodville; 31, Clarendon. From Liverpool: 17, Camilla; 20, Childe Harold. From Sunderland: 24, Balmaearra; 28, Belle, James Vinnicombe., From Cardiff: 30, Canton; 31, Sextant. From Southampton: 28. H.I.C.M.S. Thule. From New York: 26, General Putnam; 30, E F. Willets; 31, Magnet.

At FOO-CHOW.—None.

At HONG KONG.—None.

At MANILA.—None.

At SINGAPORE.—From Liverpool: Aug. 7, Chili; 9, Louis Cezard. From Sunderland: 7, Java. From Cardiff: 19. John Christoph. From Hamburg: 10, Ceres. From New York: 20, Oriental; 19, Rocket.

From ROTTERDAM.—G. Houtman

DEPARTURES.

From JAPAN.—For London, July 22, Maravi and Kent.

From HANKOW.—None.

Digitized by Google

From SHANGHAI.—For London: July 18, Aerolite; 20, Jas. Paton; 21, Pegasus; 27, Naomi; 30. Assyrian; 31, George Avery, Ocean Mail; August 3, Southern Belle. For Liverpool: July 31, Onangondy. For Falmouth: July 22, Alfred Hawley. For New York: July 29, Burg Duckwitz.

From FOO-CHOW.—For London: Empress Eugenie, Friar Tuck.

From AMOY.—For London: July 4, Eastern Chief; August 5, Mexicana.

From HONG KONG.—For Liverpool: July 25, Eliza Stewart; Aug. 2, Verbena. For New York: July 31, Panama.

From MANILA.—For Falmouth: Java, Amtmand. For New York: Wanderer, Horatio, Hamlet, Competitor, Antonia Terry.

From SINGAPORE.—For London: Harry Puddomsey. For Liverpool: 20, Bagota.

LOADING.

At JAPAN.—For London: Broadwater, Cambridge, Isabella Rayley, and Medina.

At HANKOW.—None.

At SHANGHAI.—For London: Gabalva, Parliament, Sir W. F. Williams, Cambalu, Finzel, Edinburgh, Humphrey Nelson, India, Strathmore, Hanover, Grenadier, Garawalt, Artemesia, Juvilee, Velos, Solent. For Liverpool: Allendale, Merrington.

At FOO-CHOW.—For London: Gananogue, Spray of the Ocean, Harkaway, Carisbrook, Yaratilda, Maha Ranee, Lord Clyde, Mary Mildred, Thames.

At AMOY.—For London: Melrose. For New York: India.

At CANTON.—For London: Queen of the Age, Queen of the North, Warwickshire, Northfleet, Tamana, Westminster, Canadian, and John Lidget. For Liverpool: Iron Crown, Avalanche, Forfarshire, Patna.

At MANILA.—For London: Minden. For Liverpool: Alaric. For New York: Horatio, Sumatra.

At SINGAPORE.—For London: Maid of the Tyne, Sawley Chludow, Prince Alfred. For Liverpool: Tigris, Thomas Mitchell.

At NEW YORK.—None.

At BATAVIA.—For England: Helena. For France: Alphonse, N. Cezard. For Rotterdam: Record, Johanes Lodewyk, Jason, Australia, Loopnit. For Amsterdam: Sliednecht, Hedda Frederika, Mathilde, Amalia Augusta. For Sweden: L. A. Bang.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.—July 24, Bentink, from Liverpool to Shanghai; 29, Spirit of the Deep, Liverpool to Shanghai; 30, Maggie Atkinson, Shields to Hong Kong; Queen of Nations, London to Shanghai; Star of North, Sunderland to Shanghai; Chalmers, Sunderland to Shanghai; August 1, Middleburg, Newcastle to Batavia; Palmerston, Shields to Shanghai; 2, Maria Catharina, Amsterdam to Japan; 6, Yuh Shing, Glasgow to Shanghai; 7, Sea Witch, London to Japan; 9, William Simpson, London to Batavia. From United States to China, &c.—July 29, Nonpareil. From New York to Shanghai; 30, Oriental, New York; Magenta, New York to Shanghai. From China, &c., to England and Continent.—July 27, Copernicus, from Japan to London; 28, Inca, Hong Kong to Liverpool; 28, Kelso, Whampoa to London; Valdivia, Canton to London; August 1, Panic, Singapore to Falmouth; 6, Hermelin, Manila for London. From China, &c., to United States.—None.

FREIGHTS AND CHARTERS.

JAPAN.

To England: Silk, £6. 10s.; tea, £5; cotton, £4. 10s. To Shanghai: $5 4 c. per ton of 40 cubic feet. To Hong Kong: 6$.

SHANGHAI.

Very little employment is offering, especially for large vessels; £3 is the rate per ton for tea, and £2. 17s. 6d. to £3 for cotton, for England. Better rates are expected when the new cotton is ready for shipment. The following are some of the settlements:—Cambula, 499 tons, to load cotton for London, £3; Hanover, 1,112 tons, London, with cotton, £3; Humphrey Nelson, 258 tons, London, with tea; India, 491 tons, London, with cotton, £2. 15s.

FOO-CHOW.

For tea to London, £3 per ton.

HONG KONG.

Freights continue to decline in consequence of the scarcity of employment offering. The charters are as follows:—Agincourt, 280 tons, to New York, £3. 15s. per ton; Black Match, 490 tons, on the berth for London at £3. 10s., calling at Cape of Good Hope, China, 411 tons, Java to Rotterdam, at £4 per ton; John Nicholson, on the berth for Liverpool, at £3. 10. Rates to Shanghai, 32 to 40 cents per picul; Manila to Shanghai, 55 c. per picul.

MANILA.

Rates for England are £2. 10s for clayed sugar, £2. 15s. for unclayed; hemp £4. 10s., at which quotation two vessels have been chartered; the Minden for London and Alaric for Liverpool.

SINGAPORE.

The demand for tonnage has lessened; the rates are, for tin, £3. 5s. per 20 cwt.; sago in boxes, £4; sago flour, £4; gambier in bales, £3. 5s.; sugar, £4; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt.; measurement goods, £4. 10s. per 50 cubic feet.

BATAVIA.

A succession of rainy weather keeps produce backward, and though freights are firm, there is not, as yet, a very active demand for ships. The bulk of our produce has, however, yet to come in, and a large quantity of tonnage will yet be required for it.

CASUALTIES.

SHANGHAI.

TOTAL LOSS OF THE CLIPPER-SHIP "OCEAN MAIL."—This fine clipper-ship is another added to the list of wrecks only too frequent in the Yang-tsze. The Ocean Mail left here with a full cargo of tea for London, but night coming on she anchored outside the Bar, and attempted to drop down the river on the following morning in charge of a branch pilot and an apprentice. When nearly abreast of the position where the Sovereign of India grounded, the Ocean Mail touched with her heel on an old wreck, and turning round struck on the North Bank, where she became a total wreck in fifteen minutes. One portion of the crew were saved in the boats, the remainder were taken off by the American steamer Pembroke. She is lying completely on her beam ends, with her yardarms on the ground. An apprentice pilot and an apprentice belonging to the ship were washed off the vessel's side and drowned—a heavy sea was running at the time with a strong breeze. The cargo is highly valued, but is insured.

HONG KONG.

The Kennington reported having on board the crew of the Hamburg barque George Sands, which vessel had become a total wreck on the Pratas; the George Sands was from San Francisco, bound to this port, having on board a large number of dead Chinese and some flour. This vessel had been spoken by the Black Watch close to Hong Kong.

COMMERCIAL POSTSCRIPT.

CITY, SATURDAY AFTERNOON.

SILK.—The circular of Messrs. Waithman mentions:—"We have had large business in China silk since last mail, and prices have experienced a considerable recovery, the advance being more palpable on ordinary and common Tsatlees than on the better descriptions. Japan silk has also been in brisk demand, and prices are fully 1s. per lb. dearer than they were a fortnight since. The cause of this 'spurt' in the market it is difficult to trace; business commenced with the attraction of moderate prices, and the upward tendency must be owing to the warlike nature of the recent advices from Japan, as there is certainly nothing in the state of trade, either here or on the Continent, to warrant higher rates for silk. Deliveries, 1st to 25th of September, inclusive: China, 3,403 bales; Japan, 1,777, total, 5,180 bales."

In addition to the *Constitution*, the *Snow Squall*, from China to New York, was fired into by the Confederate *Tuscaloosa* off the Cape, but escaped.

The directors of the Chartered Mercantile Bank of India, London, and China have determined to call up £250,000 additional capital, by the issue of 10,000 shares of £25, at a premium of £10, the £100,000 thus raised being added to the reserve fund.

MANCHESTER, September 25.—The yarn market has been very quiet to-day, and the business done has been small. There has been a little buying for Calcutta and the Mediterranean, but nothing of any moment. The cloth market is affected in the same way. Manufacturers are generally firm, but buyers are cautious, and the transactions have been few and to a limited amount only.

ARRIVALS NOT INCLUDED IN THE TABLES.—Sept. 23, at Brouwershaven.—From Padang: Geertruida Maria. From Tjilatjap: Salatiga.

DEPARTURES.—Sept. 23, from Deal.—For Singapore: Ava.

SPOKEN.—Jacob Roggeveen, Batavia to Amsterdam, Sept. 13, 46 N., 17 W.; Tweelingen, Batavia to Holland, July 10 (?), 31 N., 32 W.; Cornelia Mathilda, Batavia to Schiedam, Sept. 6, 41 N., 37 W.; Reyerwaard, Batavia to Amsterdam, Aug. 2 off Ascension; Reinhard, Batavia to Amsterdam, Sept. 2, 38 N., 40 W.

CASUALTIES.—Havre, Sept. 23.—A letter from Mauritius dated Aug. 6 states that the Pomone, French ship, Giraud, from Bankok to Cherbourg, had put in there with vessel and cargo very much damaged, having experienced very bad weather since leaving the Straits of Sunda on July 18, and she would probably be condemned.

The Admiralty have ordered the screw-steamer *Edward Percy* to be surveyed for the conveyance of Government stores to Hong Kong.

OUR ACTION IN JAPAN.

The following article, from the *Morning Herald* of the 18th inst., commenting on our position in Japan, regards English authorities there as in a dilemma becoming hourly more complicated. We would merely remark that our contemporary has evidently drawn his inferences as to the internal condition of the Japanese Empire from a French telegram, to the effect that civil war had broken out, a telegram not confirmed by advices received subsequently, *via* San Francisco and New York; and further, that our contemporary appears to have taken the Japanese version of the relative position of the Spiritual and Temporal Emperors; for although the Mikado holds a nominal supremacy, and is consulted on important occasions—ranking above the Tycoon, as a priest ranks above a prince—he exercises no known executive functions, for which indeed his complete retirement peculiarly unfits him. It serves the Japanese, at the present moment, to make him "all in all"—a nice game, to which Colonel Neale is fortunately well up. Of course, the Mikado is the impersonation of bigotry, and is allied closely to every form of official intolerance; but from the people, who are divided up in various religions and creeds, he gets little more than pious respect. The Japanese have presumed on our ignorance of the respective spheres of these two potentates. No doubt the Tycoon and the Mikado are hand-in-hand whilst acting apparently such diverse parts:—

"While Admiral Kuper is waiting for instructions from home and expecting reinforcements from China to arrive in the roads of Kanagawa, the attitude of the Japanese Government becomes daily more threatening towards foreigners. We should, perhaps, say the attitude of one of the Japanese Governments. The whole mind of Japan has been thrown into a ferment, and the political system of this people of thirty millions has been shaken to its foundations by the [illegible] of foreigners and the introduction

Digitized by Google

of European ideas. The latest lesson from abroad by which they have profited is the art of revolution. There is civil war in the island, and a declared antagonism between the Governments of the spiritual and temporal Emperors, the Mikado and Tycoon. For ages the Japanese have gone on quietly with their strange method of an *imperium in imperio*. The supremacy of the hereditary ruler has not been disputed by the powerful commander-in-chief, who has been accustomed to administer most of the affairs of the country. The truth has now dawned upon the benighted minds of Mikado and Tycoon. It has become apparent to them that they represent opposite principles, and that they have no choice but to fight it out, each backed by his supporters, in the approved fashion of that outer world to which the Japanese and their rulers have so long been strangers. The quarrel is a very pretty one, and unless one side or the other is disposed to give in, we do not see how it is to be settled in any other way. The Japanese, we suppose, must set to work to cut each other's throats till every one of their fertile valleys and breezy plains has a right to an honourable comparison with the corpse strewn battle-fields of that pre-eminently civilised country where, because there are also two parties among them which cannot agree precisely as to certain details of this civilising work, the nation has set its heart on two years of fratricide. It is lamentable to think that to the dreary details of American and Chinese butcheries we shall now have to record with each mail the progress that another race is making in self-extermination. The Japanese islands are fertile and productive to a wondrous extent; their products are varied; their wealth is prodigious; they cover an area of a quarter of a million square miles. Unfortunately for the Europeans, whose cupidity is excited by contact with them, there are thirty millions of troublesome natives on them. But we may spare ourselves all anxiety. We need not go to war with them and shoot them down with Armstrong guns and Enfield rifles. We need not settle among them and wear them out of the world, as we have fretted away the native races of America, New Zealand, and Australia. These poor Japanese seems conscious that they are in the way, and seem bent upon saving us all trouble in their behalf. By this time one-half of the nation is arrayed in arms against the other half. The wars of such people are endless. Before they have half finished, we may expect a considerable reduction in the population of Japan.

"The Tycoon, or military Emperor, represents the 'party of progress' in Japan. Compared to his antagonist, he is a mere plebeian, without descent or claim to high rank. The middle class and the merchants are with him, with all those who wish to profit by commercial intercourse with Europe. He can only make Daimios of those followers whom he delights to honour. These are a kind of knights, an inferior order of nobility. The Daimios, or great nobles, are created by and owe feudal allegiance to the Mikado, who has his court at Miako, while that of the Tycoon is at Yedo. The spiritual Emperor and his followers represent the old respectability, the aristocracy of Japan. The Daimios are great landowners, each more or less independent in his princely domain. The landed interest in Japan and elsewhere is on the side of the Crown and of conservative institutions. The aristocratic party have their prejudices. They are all for the old policy of exclusiveness. They hold in abhorrence the treaty concluded with Lord Elgin. They retired in a body from Yedo some time since, as a protest against the radical innovations of the Tycoon, against the party of the freinds of foreigners, and against the European Ministers, whose entrance into the capital was regarded as an infamous intrusion. Nor have the nobles confined themselves to this moral demonstration. It has been by their armed retainers that the various outrages upon Europeans have been committed. It was they who attacked the British embassy and nearly murdered Mr. Oliphant. It was the Prince of Satsuma by whose orders Mr. Richardson was butchered. It was in the territories of the Prince of Kewsew that English and American ships were fired upon some weeks since, an outrage promptly avenged by the destruction of the fort. In the strait of Simonasaka, a narrow sea which separates Nipon, the great island, from the westernmost island of Kewsew, a Dutch man-of-war has been since fired upon, by the orders of the same Prince, who thinks himself strong enough to set all Europe at defiance. Nagasaki, the most important open port in Japan, is on the island of Kewsew.

"What are the English Government to do in this complicated dilemma? The Tycoon does not seem to be at fault, and we cannot get at the Mikado. The Tycoon has paid the indemnity money for poor Richardson's murder. There came along with it a peremptory order from the Mikado that all foreigners should at once leave, which order, of course, has not been complied with. The Dutch have had a special notice given to them. This is rather hard upon them, after they had been admitted to exclusive trade for some 200 years – a privilege which their traders in old times procured by submitting to unheard-of humiliations, such as being made to knock their heads against the ground and trampling on the cross, and being shut up in a pestilential island, and only approached at arm's length with a pair of tongs. The Dutch Government has responded to this notice to quit by sending four vessels of war to arrange matters. And now the Japanese, or the Mikado, or the Tycoon, or all of them, may consider themselves at war with all Europe, and America to boot. If the Tycoon is really our friend, and the Mikado our enemy, and if we can depend on late news as to their whereabouts, we may at once have an opportunity of obliging the one at the expense of the other. The large port of Osaka, on the southern coast of Nipon, is to be soon opened to our trade by the orders of the Tycoon. This gentleman is said to be in great straits just now at this very place. He is hemmed in there by the troops of the Mikado, whose Imperial city of Miako is only twenty miles from Osaka. Troops are being sent, it is said, in an English vessel to Osaka to the assistance of the Tycoon. If so, we are already in the thick of the Japanese civil war."

OPENING OF WESTERN CHINA.

Since our last notice of the more and more important subject of commercially opening the West of China overland from Rangoon, the following further memorials in its favour have been sent up to the Prime Minister, and are, we hear, being supported by others from various commercial bodies of the United Kingdom :—

"*To the Right Honourable*
Viscount Palmerston, K.G., G.C.B., M.P.,
First Lord of Her Majesty's Treasury.

"The Memorial of the Board of Directors of the Manchester Chamber of Commerce, by their Chairman, respectfully showeth :—

"That your Memorialists had the honour to address your Lordship in July, 1860, on the subject of opening up the commerce of the Western portion of the Chinese empire across the British possession of Pegu; on which occasion your Memorialists pointed out the importance of cultivating friendly relations with the King of Burmah.

"That your Memorialists then further suggested that a representative of Her Majesty should proceed to the Court of that King and enter into negotiations with him for the encouragement of such a commerce with the Chinese empire, across his dominions.

"That your Memorialists most gratefully acknowledge the prompt action taken by Her Majesty's Government in this matter, and would point with satisfaction to the friendly disposition displayed by the King of Burmah towards Great Britain, as evidenced by the terms of the treaty he recently concluded with Her Majesty.

"That it appears to your Memorialists that a most favourable opportunity is presented by the treaty in question for obtaining that access to the Western portion of the Chinese empire which has been so long desired, and the great advantage of which it is impossible to exaggerate.

"That according to information which your Memorialists have received, it is essential to the effective realisation of this important object, that a trade route should be established between the port of Rangoon and the south-western frontier of the Chinese empire, across the north-east frontier of Pegu and the south east corner of the Burmese territory.

"That as a preliminary to this it is most necessary that a reliable survey should be made of the line of country between Rangoon and Kiang-Hung, on the Cambodia river, a distance of about 500 miles; one-half of which is on British territory, and the remainder on that of the King of Burmah.

"Your Memorialists would, therefore, respectfully request your lordship to instruct the Viceroy of India to take steps to effect such survey; the expenses attending which will, in the opinion of your Memorialists, be far outweighed by the commercial advantages which must arise therefrom, both to this country and to India. And, further, that His Excellency may be instructed to use his influence with the King of Burmah, either to cause the portion of the route lying within his dominions to be similarly surveyed, or to grant facilities to the British authorities in Pegu to carry out that object.

"And your Memorialists will ever pray, &c.

(Signed) "HENRY ASHWORTH,
"Chamber of Commerce, "Chairman.
"Manchester, 2nd July, 1863."

"*To the Right Honourable*
Viscount Palmerston, K.G., G.C.B., M.P.,
First Lord of Her Majesty's Treasury.

"The Memorial of the Cotton Supply Association respectfully showeth :—

"That your Memorialists have heard with much satisfaction that treaty relations have again been entered into between Her Majesty and the King of Burmah.

"That your Memorialists observe, from a copy of the treaty as published in India, that one of its provisions is :—'That British merchants shall settle and hold lands for the erection of houses of business, in any parts of the Burmese territory.' And that another article provides :—'That people, from whatever country or nation, who may wish to proceed to the British territory, shall be allowed by the Burmese ruler to pass without hindrance.'

"That your Memorialists are informed that between British Pegu and the south-west of China proper, are the three Burmese Shan provinces of Moni, Kiang-Tung, and Kiang-Hung, which were severally more than once visited – in 1836-37 and other years, before the annexation of Pegu—by Dr. Richardson and Captain M'Leod (now Major-General M'Leod, commanding the troops in British Burmah), under the direction of the Supreme Government of India, to ascertain their commercial capabilities, and to open, if possible, a trade with them from Moelmyen.

"That those officers found the country they traversed producing much cotton, all of which was being collected by Chinese caravans and carried into China to be manufactured; some of the Chinese so seen by Dr. Richardson being within twenty miles of the north-east frontier of what has since become British Pegu.

"That your Memorialists consider that if a commercial way were opened from the port of Rangoon across Eastern Pegu by the most direct practicable line to the above-named Burmese Shan provinces, the cotton there grown, reported to be of a superior quality, would find its way to Rangoon for shipment to England.

"That your Memorialists are advised that there are upwards of forty millions of acres of waste land in the British provinces of Pegu, Martaban, &c., very much of which can be made highly productive with the necessary labour; and that the suggested road from Rangoon to Kiang-Hung would induce Chinese to come down from the south-west of China to settle on such waste land; which, under their cultivation, would furnish large supplies of cotton.

"Your Memorialists, therefore, respectfully request your Lordship to take the subject into your serious consideration, and to direct the Viceroy and Governor-General of India to open up a commercial way between the port of Rangoon, and the north-east frontier of British Pegu, on or near to the Salween river; and further, to move the King of Burmah for a continuation of such commercial way from that point of British Pegu, through Kiang-Tung, to Kiang-Hung on the right bank of the Upper Cambojia river.

"And your Memorialists will ever pray, &c.

"For and on behalf of the Cotton Supply Association,

(Signed) "JOHN CHEETHAM,
"Cotton Supply Association, "President.
"Manchester, 2nd July, 1863."

"*To the Right Honourable Viscount Palmerston, K.G., G.C.B., M.P., "First Lord of Her Majesty's Treasury.*

"My Lord,—The Committee of the East India and China Association of Liverpool have again the honour to memorialise your Lordship, on the subject of overland communication with China, by way of British Pegu and Burmah.

"Your memorialists are of opinion, my lord, that the Treaty recently concluded with the Burmese government, affords a most favourable opportunity for extending British commerce to the South-western and Western provinces of the Chinese empire; and they believe that the establishment of a trade route between the port of Rangoon and the upper Cambosjia river on the South-western border of the province of Yunnan, would greatly facilitate this desirable object.

"Your memorialists, therefore, very respectfully suggest that, as a preliminary measure, the Viceroy and Governor-General of India be instructed to order a survey of the country between Rangoon and the Upper Cambojia River. Or, if this be deemed undesirable, that the opinion of the Chief Commissioner of British Burmah be obtained as to the feasibility of the project.—I have the honour to be, my lord, on behalf of the committee, your lordship's most obedient humble servant,

(Signed) "J. B. COOPER.

"West India and China Association, Liverpool, 28th August, 1863."

THE TREATMENT OF REBEL PRISONERS IN CHINA.

FOREIGN OFFICE, SEPT. 22.

A despatch, of which the following is an extract, from Major-General Brown, commanding the British troops in China, has been communicated to Lord Russell by the Secretary of State for War:—

Various statements having appeared in the several journals published at Shanghai, concerning the treatment of rebel prisoners, and alleged torture of some few taken at the capture of Taitsan, I have the honour to state that a report was made to me by Captain Murray, R.A., commanding a field force in support of the attack on Taitsan, soon after his return to head quarters, of the Imperialists' cruel treatment to their prisoners. I took the report to Her Britannic Majesty's consul (Harvey) without delay, and expressed my desire that the Foutai should be informed of the same, and to urge upon him to send out an order at once to all his Mandarins in command, forbidding any cruelty to be exercised upon captured prisoners, and further, if any report was again made to me of a similar nature, I would cease to act with his troops. Lieut. R. Cane, R.A., who has been six years in China, and has some knowledge of the Chinese language and customs, was the first who reported the circumstance to Captain Murray, and the letter of the former officer, called for by me for report, is here annexed, and details, I think, everything most clearly. I have no reason to believe otherwise than that the Foutai is equally anxious to be as humane as possible to his prisoners; some hundreds were lately captured at Quang-san, and, so far from being cruelly or severely dealt with, have actually, to a great extent, been incorporated by Major Gordon into his own regiment; and I have also asked for some to be sent down to me from Quang-san to be drilled with, and attached to, the batteries of Chinese artillery gun Lascars, which are under the command of the officer commanding Royal Artillery, who reports them most useful and efficient. Major Gordon was also lent by me some fifty of these drilled Lascars for his attack on Quang-san, and speaks most highly of them. I have now only to draw attention to "eye-witness's" statement, who would actually allow the public to believe that men, undergoing extreme torture, such as he describes, with various wounds, from whence issued copious streams of blood, could not only exist from eleven a.m. till sunset, but then be able to be led out for execution, leaving one to suppose that he was present the whole time; whereas the editor, in his remarks on the bishop's letter, to remove any apprehension as to the non-influence of British officers who were on the spot, states that the treatment the prisoners were undergoing was only discovered ten minutes before their execution. This alone, I submit, stamps the whole statement as highly coloured and greatly exaggerated.

(Enclosure.)

Shanghai, June 11, 1863.

Sir,—In reply to the inquiry of the Major-General Commanding, I have the honour to inform you that, on the 3rd May, 1863, I was present at Waikongsum, as Acting Field-Adjutant to a force under the command of Captain A. Murray, Royal Artillery. In the afternoon of that day I was taking a walk for exercise, with several other officers, along the main road towards Ko-lung-sung, and in passing between two Imperialist stockades, our attention was attracted by a number of men, I think seven or eight, naked and tied to posts. On approaching I found they were Changman prisoners, all with very long hair (showing that they were rebels of long standing), and with the very peculiar complexion and physiognomy which have been frequently noticed as acquired by men who have spent much time among the Taipings.

These men had evidently been sentenced to the punishment of the "Ling-che," or "slow and ignomious death," what we call "cutting into a thousand pieces," and it was also evident that they had been spared as much as possible, and little more than the form of this horrible punishment carried out. Each man had a piece of skin, not flesh, about four inches by two, partly stripped from one arm and hanging down, and one or two arrows had been pushed (apparently not shot) through the skin in different places. There was very little blood about the ground, and the men did not appear to be in pain; one was crying out very loudly that he was a Shanghai coolie, and ought not to be put to death as a rebel. He had, however, very long hair. I asked a low Chinese officer present what they were. He told me they were old and well-known rebels, two of them officers, and that they were about to be beheaded. He said they had been exposed from midday. (It was about half-past four or five P.M. when I saw them.) At the same time I saw an official approaching to superintend the execution, and, not being anxious to witness the spectacle, which I had often seen before, I withdrew. From what other officers who remained informed me, I gathered that decapitation was performed at once in the usual mann r, except that the sword employed was blunt, and the executioner inexpert. I saw no other signs of torture whatever, and considered that these men were, taking into account Chinese laws and customs, rather mercifully dealt with. A dead Changman lay some distance off, who had been treated in a similar manner to the others; in addition a slight incision had been made from his breast to his groin, but, from the absence of blood, I think this was done after death. On my return to Waikong I reported what I had seen to Captain Murray, commanding, who desired me to visit the camp next morning, and to take notice of the occurrence, which I did by mentioning it to a fourth rank military field officer, the senior in the camp. I told him we English did not like such punishments; that if a man deserved death, we executed him at once, and did not expose or mutilate him. I expressed general disapproval of what had been done, and said the English commanding officer was much displeased at it, and if anything of the sort was attempted again, would march up and put a stop to it; and that I hoped it would not again occur during our stay. He replied that he did not himself approve of it, but that I must recollect that a large number of the rebel prisoners taken at Taitsan had been pardoned by the High Imperial officers, permitted to shave their heads, and employed as soldiers or labourers; and that it was not possible to restrain the Imperial soldiers from taking some vengeance for the treatment which the rebels had inflicted on 300 or more of their comrades, who had been trapped into Taitsan on a false promise of a surrender of the place. These men, he said, were almost all put to death, and very many of them had their "bodies wounded, and cotton put over their wounds and set on fire," and were otherwise badly tortured. (This, I understand, was really the case.) He added that the Chinese General Officer then in command at Waikongsum-kwoh Ta jin was mercifully inclined, and anxious not to be severe with the rebel soldiers, many of whom had been carried away forcibly, and compelled to serve in the ranks of the Taipings.—I have, &c.,

(Signed)

ROBERT EMMET CAVE, Lieut. Royal Artillery.

The Deputy-Assistant Adjutant-General, Shanghai.

N.B.—1,100 men were sent up to take possession of Taitsan by the Foutai. They were entrapped, and out of the above number only some 300 were rescued by Major Gordon on the fall of Taitsan. 350 are known to have been beheaded a few days before the capture, and the remainder are still unaccounted for.

AMERICAN AND ENGLISH GUNS.

(TO THE EDITOR OF "THE TIMES.")

SIR,—Assuming the accounts of what has been and is to be done in America with guns of large calibre and long range to be strictly accurate, let us compare them with what can be and has been done with our English artillery.

Fort Sumter, attacked in reverse, not in front, has been battered to destruction from a distance of 2⅝ miles (4,620 yards). Only last week, at Shoeburyness, 14 110 lb. shot were fired at a point 4,600 yards from the gun. The two first, being trial shots, fell, the first short of, the second beyond the mark; 13th turned over in its flight and fell short; the other 11 shot all fell within a space 76 yards long by 13 yards wide—that is, within the limits of a very small fort, even within the space occupied by the hull of a ship lying, as it would have been in the then state of the wind, end on to the battery from which the shot were fired.

The American guns have penetrated nine inches of iron plates, backed by two feet of oak. Our 110-pounder Armstrong has sent its shot through twelve inches thick of plates built together in the American manner of armour-plating, and through six feet of solid oak timber without iron-plating. An oak backing behind these ineffective built-up plates has not been tried in England.

The Americans have shelled Charleston at five miles' distance, and promise to throw shot and shell seven miles. The smaller description of Armstrong guns, with an elevation of 39 deg., have ranged 10,000 yards and consequently we know certainly that the larger guns will do as much, and somewhat more.

Once let it be decided to use guns liable to burst, and shot of any size may be thrown to almost incredible distances.

We have thrown a shell three feet in diameter, weighing 2,400 lb., and with capacity for a bursting charge of 450 lb. of powder; but the mortar gave way after firing a few rounds.

The effect of shot upon armour plates depends upon the hardness of the projectile, its weight, and velocity of striking. A slow, heavy shot is proved to be not so effective as a lighter one with higher velocity, and, *cæteris paribus*, the effect is proportional to the charge of powder effectively used. The 68-pounder, with its charge of 14 lb., is more effective at short ranges than the 110-pouuder with its charge of 12 lb. The 300-pounder, with its 45 lb. charge, produces quite three times the destructive effect of the 68-pounder, and so on. We do possess several effective 300-pounder guns; we have one 600-pounder under experiment, and it is believed that a 1,000-pounder is in course of construction.

The Americans have shown in actual war that large shot can be thrown with accuracy to great distances by heavy charges of powder, from guns which vary the amusement by bursting. We have proved the same facts on our practice grounds, with guns which do not burst explosively, but do in some instances of the larger sizes give way, and become unserviceable until repaired.

We are at least up with the Americans in artillery progress.

ONCE A GUNNER.

N.B.—The Chinese have used cast-iron guns with an inner tube of wrought iron for centuries. Such guns were used against us in the first Chinese war, and we found it impracticable to burst them when captured.

SAIGON AND THE ANNAMITE EMBASSY.

(FROM OUR PARIS CORRESPONDENT.)

IT is announced in the Imperialist journal *La France* that the French possessions in Annam are not to remain in that condition, but are to be converted into a regular colony. Admiral de la Grandière, the Governor, has lately returned from

Digitized by Google

a tour in the interior of the country, and is said to express himself well satisfied with what he has seen and heard there. He is to start again soon on a voyage of exploration into Cambogia, and to go up the river to Ponomping. Furthermore, we are informed that the system in operation in Paris is to be applied to Saigon, that is, the place is to be rebuilt on a grand plan, and all is to be made monumental and beautiful. The cathedral has been consecrated, and a splendid ceremony was observed on the occasion when Monsigneur Lefevre, the Bishop of Isauropolis, and all the French clergy and laity appeared in their gorgeous clerical and imperial costumes, and produced, we are assured, a magnificent effect. It is added that the natives are being rapidly converted to Christianity, and that the fact must produce an immense change in the condition of the population. *La France* adds that, "in a few years Saigon will be one of the most important maritime towns in Asia." We English have some experience of the time it takes to effect any important change in the habits of Eastern nations, and we know also in what brilliant colours French perspectives are generally painted, and we do not feel alarmed that Saigon will surpass Calcutta, Madras, Bombay, Singapore, or even Hong Kong during the present century; but we wish the French all success in their undertaking, and trust that civilisation and commerce will benefit largely by what is going on at Saigon.

The Annamite Ambassadors have arrived in Paris and taken possession of their hotel, situated between the Champs Elysées and the Lord Byron, the same that was occupied by the Siamese Embassy. The Ambassadors arrived duly at Toulon, and were conveyed to Marseilles in the *Labrador*. They were received with all the ceremonies observed on such occasions, guns were fired in their honour, and the streets of Marseilles were lined with troops from the port of landing to the Grand Hotel, where the visitors were lodged, and before the door of which the General of Brigade and the Commandant were stationed on horseback. The Ambassadors were received on landing by M. Mure de Pelane, Consul-General and Representative of the Minister of Foreign Affairs, Captain Aubaret, Aide-de-Camp to Vice-Admiral Bonard, and other officials. On reaching the hotel the drums sounded, the soldiers presented arms, and the bands opened their harmonious fire. The balconies and windows of all the houses on the line were crowded with ladies, and the flags of France, of the city of Marseilles, and of the Kingdom of Annam, yellow, with a broad green border, floated over all. The whole of the civil and military authorities of the place paid visits of ceremony to the Ambassadors, and in the evening the latter went to hear an opera and witness European dancing at the theatre. The first of these entertainments was witnessed and listened to by the Annamites with grave interest, but the second interested them amazingly, and they took no care to conceal their pleasure —not unmingled probably with astonishment—for the ballet, in the presence of a crowd of fashionable women, must have been to them a new sensation.

In due course the Embassy reached Paris and took possession of the house, or rather two houses, prepared for it. In the afternoon the Ambassadors and their suite took a drive in the Bois de Boulogne, and the Parisians had the first glimpse of the Annamites, who were, of course, criticised with considerable acuteness, and whose plain blue dresses did not obtain much admiration, while their persons were not set down as handsome or even striking, which was partly owing to the fact that whereas at Marseilles they appeared in dresses magnificently ornamented with embroidered suns and moons, in Paris they wore what the gamins here called dark blue blouses. It is true that the absence of the Emperor and the Court ought to account for the *negligé* adopted, but then Eastern folks are expected to be fine, and I fear the good people of Paris felt much the same disappointment when they saw the blue blouses as the countryman when he saw George IV. in undress, only they had more tact than to exclaim with the countryman in question—"Why I seed a chap at Bartlemy "fair much more like a king (or ambassador, no matter which) "than that chap there." One thing amused the idlers most amazingly. The Ambassadors occupied several carriages, and were escorted by two squadrons of cavalry, but on the front seat of the carriage in which the Ambassadors rode was an enormous red and gilt box, which some gamins declared contained the best clothes of the illustrious visitors, but which probably held some paraphernalia which the custom of their country would not allow them to dispense with. Perhaps they put it there to get rid of the unpleasantness of having travelling companions staring them constantly in the face, and thus, by the introduction of the box, converted the carriage into a chariot; if so, I think the plan did them infinite credit. By the way, I must not forgot to mention that the consideration of the police of Marseilles was put to the proof and came out of it honourably by a terrible breach of decorum committed by the Ambassadors, who smoked cigarettes during the whole time they were at the theatre. The only bad point about it was that it must have been a sore trial for the Marseillais to witness and not aid in the narcotic enjoyment.

The Ambassadors have been duly received at the Foreign-office. The *Moniteur* gives the following account of the reception:—

"The Envoys and their suite wore on the occasion the costume used for grand ceremonies, which is precisely the same as was worn in the time of the old Chinese dynasty of the Mings. Phan-Than-Gian, the first Ambassador, in spite of his profound emotion, addressed the Minister in very suitable language, and the reply, together with the cordial reception of which he was the object, soon set him at his ease. Phan-Than-Gian told M. Drouyn de Lhuys that on the occasion of the exchange of the ratifications of the treaty entered into between France and the Empire of Annam, the Emperor Napoleon having sent a mission to Hue, the Emperor Tu-Duc, on his side, had desired to send an embassy to compliment the Emperor of the French, and that he was happy at having been chosen by his Sovereign to fulfil that mission, and at being thus able to present his homages to the Minister. M. Drouyn de Lhuys replied that the Emperor regretted that he could not at present receive the Annamite mission, but that his Majesty had charged him to give them the most cordial welcome; the Ambassadors might rest assured that they would find in France the most sincere marks of sympathy and friendship. The Ambassador expressed his gratification at the attention which the mission had met with on their voyage, and particularly since their arrival on the French territory. Thanks to Captain Auberet, who acted as interpreter, the conversation was kept up without difficulty, and turned successively on the visit to the arsenal at Toulon, the arrival at Marseilles, &c. After taking tea which was served to them, the Ambassadors and their suite took leave of the Minister, and returned to their hotel much pleased with the reception they had met with."

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, SEPT. 22.

The States-General were opened on the 21st inst. by the King of Holland in person. In his speech His Majesty said that the foreign relations of Holland continued to be friendly, while the good understanding with Belgium had been strengthened by the treaties recently made between the two States. He congratulated the country on its prosperity and the good state of its military forces, and informed the States that projects of law for a new criminal and civil code, for the extension of railways, for a reform of the system of taxation, and for the improvement of the Dutch colonies, would be presented to them in the course of the session.

In my last letter I sent you the heads of the actual revenue and expenditure of this kingdom for the year 1858 as finally settled and closed by the Court of Accounts, from papers presented to the States-General by the Dutch Government. From the same source I am enabled to-day to give your readers a similar *exposé* for the year 1859, which also has not been published before. From this document it appears that the receipts were as follows:—

Taxes	Fl. 54,658,675	39½	cents.
Domains	1,219,613	34½	„
Post-office and Telegraph ..	2,146,664	75½	„
State Lottery	401,542		
Sundries	2,045,328	99½	„
Contribution from the surplus fund of previous years ..	29,271,961	06	„
Do. from the colonial surplus	13,600,000		
Total	Fl. 103,343,785	55	cents.

The expenditure may be lumped as follows:—

Interest on the National Debt	Fl. 30,569,191	92½	cents.
Amortisation of do. ..	19,231,192	27½	„
Extraordinary expenses paid by virtue of special laws ..	8,480,841	13½	„
Ordinary expenditure.. ..	39,505,695	02	„
Total	Fl. 97,786,920	35½	cents.
Showing a surplus of ..	5,556,865	19½	„

Which has been disposed of as follows:—For the purchase and amortisation of the National Debt, 1,544,597 fl. 89 cents; for repayment of treasury bills, 4,000,000 fl.; and to cover the deficiency in the account for 1858 of the fund for prisoners' work, 12,267 fl. 30½ cents.

The Colonial Minister has sent to the Standing Committee of the Second Chamber the Bill for regulating the responsi-

Digitized by Google

bility and disposal of the colonial surplus, so that the subject may be brought forward for discussion as soon as the new session is opened.

A commencement has been made with the printing of the new Budget for distribution to the members of the Second Chamber, to enable the sections to examine its contents and report to the House at an early period of the session.

The Notarial Act of Incorporation of the Association for carrying into execution the concession granted by the Royal Decrees of March 10 and July 16 of this year, Nos. 1 and 38, for the railroad between Samarang and the Regencies in Java, has been executed by Mr. Amija Esser, Notary Public of this city. Of the total capital of fourteen millions of florins, the first series of ten millions in shares of a thousand florins each, was immediately taken. The Netherlands Indian Railway Company may well be proud of having the name of His Majesty the King at the head of their shareholders. The following gentlemen are appointed commissioners:—Dr. H. Van Beeck-Voleenhoven, A. W. Van Eeghen, A. Fraser, Younker D. A. Junius Van Hemert, A. Mendel, and K. F. Schill. The directors are Messrs. W. Poolman, C. Van Heukelom, and E. H.'s Jacob. The seat of the company is established at the Hague.

According to letters received here by the overland mail the appearance of the sugar plantations in the Eastern part of Java is anything but favourable. In many places the quantity will be 25 per cent. less than last year. In the central and Western districts of Java, Samarang, Japara, Tagal, and Cheribon there is every probability of an abundant sugar crop, so that on the whole the result will be a middling average crop. On the other hand the growing coffee gives rise to the most hopeful expectations, and its expected to be of considerably larger quantity than in any previous year.

The Royal assent has been given for the formation of a company with limited liability at Amsterdam to be called "the "Dutch Colonial Bank."

It is understood that the collection of Japanese products and manufactures, made by the indefatigable Colonel von Siebold, and which was lately exhibited to the public in this city, will shortly be transferred to the new Maximilian Polytechnic School at Wurtzburg, in Bavaria, of which place Colonel von. S. is a native. It is stated that he offered the collection to the Museum at Leyden, but that it was declined.

A letter from Manila of the 21st July, says a small quantity of cigars were advertised by Government for public sale on the 13th of that month, but that it was postponed *sine die* in consequence of despatches received in the meantime from Madrid with orders to raise the price of cigars 20 per cent.

According to the census just published the population of the kingdom is 3,293,577 persons, of which 1,616,357 are males and 1,677,220 females.

The Netherlands Trading Company have chartered the following vessels to convey cargoes of produce from Java as subjoined:—*Josephine Bernhardina*, Capt. Bos, for Amsterdam; *Wilhelmina*, Capt. Koster, for Amsterdam; *Pollux*, Capt. Cruys, for Amsterdam; *Galilei*, Capt. May, for Amsterdam; *Quatre-Bras*, Capt. Nieuwenhuys, for Amsterdam; *Christina*, Capt. Remeeus, for Amsterdam; *Catharina Jacoba*, Capt. Toujes, for Rotterdam; *Noord Brabant*, Capt. Loos, for Rotterdam; *Edward and Marie*, Capt. Kolff, for Rotterdam; *Concurrent*, Capt. Van der Florst, Schiedam.

The company advertised for tenders for the delivery of 41,000 kilogrammes of salt meat for the use of the navy in Netherlands India.

In the manufacturing iron establishment at Fyenoord, near Rotterdam, which has of late undergone an extensive enlargement, a number of agricultural implements are being made for Japan, and fresh orders have arrived for a larger quantity.

The newspapers of this city reproduce without note or comment an article in the *Batavian Handelsblad*, signed "Bartjes," in which the writer denounces in strong language the unpatriotic conduct of the Governor-General if he accepts Mr. Robinson's tender for the East India steamboat service for ten years merely because it was the lowest bid. He argues that as the difference was only 421 florins annually between the English company and their (only other) Dutch competitors, it should not prevent Government from giving the contract to their fellow-countrymen, as if given to foreigners, with whom Holland might be at war long before the expiration of the contract, the steamers would be of course withdrawn, and the regular service interrupted.

Mr. J. A. Phillipse, hitherto President of the First Chamber of the States-General, has been re-appointed by the King to the same office for the new sessional year of 1863-64.

COMMERCIAL.

COFFEE.—The company's sale of 413,307 bags of Java and Sumatra went off with spirit, and fetched higher prices than were expected. At foot is the specification of the result. Since then favourite qualities have experienced an active demand, and higher rates are paid for yellow and bright. The continued demand and the large deliveries give incontestable proof that the stocks in retailers' hands must be nearly exhausted, and Java really required for consumption.

TEA maintains a firm attitude. The 100 chests of China Pekoe, advertised for public sale, have been withdrawn and sold by private contract at secret prices, but part of the same is re-offered for sale at 230 cents. Another sale is advertised, consisting of 300 quarter-chests of superfine Congou, per *Albuera*, from Foo-chow-Foo.

SUGAR.—The company's sale of 30,962 kranjangs shows rather an improvement in the value of the raw article, the prices obtained being about 1fl. above the valuation of the brokers, and only 1¼fl. beneath the rates obtained at the July sale, whereas a fortnight ago they were 2½fl. below them. The result of the sale was as follows:—

No. 11	940 kr.	29¼ fl.		No. 16	5,675 kr.	34¼ fl.	
12	1,299 „	30¼ „		17	4,878 „	35 „	
13	2,552 „	30¾ „		18	2,290 „	35½ „	
14	2,621 „	31¾ „		19	963 „	36 „	
15	2,914 „	33¼ „		20	358 „	36½ „	

RICE.—No prices in Java, and prices nominal.

SPICES.—A few parcels of Nutmegs, No. 1, found purchasers at company's sale prices. No. 2 commands an advance of 1 cent on the same, and No. 3 even 2 cents. Mace has also been placed at 2 cents above sale prices. There is rather more demand for Cinnamon, No. 3, for which 98 cents is willingly paid.

BANCA TIN continues with a downward tendency, and some sales have been made at 72½fl.

INDIGO fully maintains its position, but with limited dealings.

COCHENILLE has had a lively sale at full prices, and stocks are much reduced.

HIDES.—Several parcels of East India have been sold by tender at secret prices, among which are 731 ox per *Quartett*, 762 do. per *Ludwig*, 1,418 do. per same ship, 964 do. per *Kosmopoliet*, 900 do. per *Maid of the Tyne*, 825 do. per *Diana*, 1,990 do. per same vessel, 393 do. per *Triton*, 2,000 Buffalo per *Hebe*, 1,902 do. per *Kosmopolie*, and 195 do. per *Triton*. By these transactions the stock is nearly exhausted.

TOBACCO.—There have been several sales by auction both here and at Rotterdam, which went off well, the whole of the Java being sold at full prices. The following are among the parcels thus disposed of:—1,474 bales DMVO, average 40¾ cents; 1,664 bales Soekowono, average 51 cents; 731 bales FVDP, average 41¾ cents; 355 bales VDZ, average 38¼ cents; 697 bales CHDP, average 26¼ cents; 481 bales STAL, average 37 cents; 517 bales EB, average 52 cents; 492 bales MTT, average 50 cents; 548 bales Djarit RN, average 56¼ cents; 454 bales Malang and Kandine, average 25 cents; 775 bales Tempeh, average 38 cents. The present stock of Java is 10,372 bales.

SUNDRIES.—At public sale in this city on the 16th inst., the following goods were all sold:—3 chests of tortoiseshell, at 6 to 10¼ fl; 15,040 mother-o'-pearl shells, at 50 to 72 cents; 790 bags (23,300 kilogr.) india-rubber, 95¼ to 100 cents; 455 chests (27,000 kilogr.) gum damar, 23¼ fl.; 61 bags (1,800 kilogr.) cubebs, 55¼ to 55¾ cents.

RESULT OF THE COMPANY'S COFFEE SALE.

Standard Sample.	Bags.	Description.	Sale Prices.
No. 1	1,267	Brown	61½ cents.
2	1,366	Light-brown	61 „
3	1,856	High yellow preanger	54½ „
4	3,536	Good yellow preanger	52 „
5	6,095	Good bright, large berries	49½ „
6	23,459	Bright, slightly damaged	47 „
7	6,871	Bright yellowish	47½ to 48 „
8	2,562 / 273	Blue, with white berries / Do. (separate sample)	51 „
9	12,077	Do., rather dull	50½ „
10	2,020 / 365	Dull blue, rather white / Do. (separate sample)	49½ „
11	1,728 / 331	Porlorico sort / Do. (separate sample)	53½ „
12	14,200	Green streaked	47½ „
13	6,580	Good greenish Kadoe sort	47½ to 48 „
14	3,852 / 694	Pale green, Demerara-like / Do. (separate sample)	49 „
15	1,537	Grey, Demerara-like	48½ to 49 „
16	18,622	Green, West India-like	47½ „
17	16,619	Do. do. rather reddish	46¾ „
18	25,006	Good green	46½ „
19	2,749	Variegated yellow	47½ „

LONDON, SATURDAY, SEPTEMBER 26, 1863.

JAPANESE HOSTILITIES.

THE Japanese artillery practice in the Simonoseki Straits, whilst serving as a striking illustration of the presumptuous folly of a Japanese Daimio, and of the blindness, no less than the weakness, of isolation, assumes a yet higher significance as indicating the importance in a naval, military, and political view of a position commanding these inland waters, which form a convenient route for vessels sailing between Shanghai and Yokohama. Although the Japanese yet keep to copper cannon and Dutch guns of small calibre, and follow old European designs in the construction of their batteries, the advantange of position told on the attack made both on the *Kienchang*, the *Medusa*, and the *Wyoming*. Should France deem the destruction of a hostile fort insufficient atonement, it is in her power to erect a strong fortification on the western entrance, where the strait is but three quarters of a mile wide. For this purpose she need take but a piece of land from Nagato on the north and a portion of the island of Tschusima on the south. The series of forts erected by the Japanese, who estimate power by number, shows a keen perception of the importance of the passage, and the ease with which it might be disputed. The new passage by which the *Medusa* made her escape, on the opposite side of the island, is commanded by the Japanese forts of Kokura, Diiri, and Noja. The long neck of land stretching out at the entrance of the Bungo channel, temptingly invites occupation. No false conscientious qualms should prevent the British Government from taking measures to occupy these positions, which would give to the foreign Power possessing them a controlling influence over Japanese policy.

The island of Awauji, at the opposite extremity of these straits, offers similar advantages. To justify such an occupation, we have but to take the TYCOON at his word. If powerless to control his Princes, they must be put permanently in check, and we know no means so effective as our obtaining the command of these straits. The money spent by the Japanese in getting up a navy, five of which were war vessels, was intended mainly to secure the command of this inland sea. These straits are the great artery even of Japanese trade, which is carried on as much by water as land.

Under the peculiar political organisation of Japan, with its 200 principalities, each ruler being an absolute potentate in all affairs that concern its internal administration, the TYCOON, whatever the extent to which he may have encouraged the demonstrations—and it would appear that he was lately visiting these very straits—will not be held a party to the outrages committed, without proofs of complicity which, if existing, he will do his best to conceal, and which no party will probably be disposed to look up. We have had enough of Japanese diplomacy; other nations have taken warning from those long and tedious efforts to obtain satisfaction to which the British Envoy allowed himself to be committed, and the natural results of which we only ourselves escape by the most summary action, including an undertaking to settle matters directly with the Prince of SATSUMA.

It is to be hoped that nothing less will be demanded by England and other Powers, than the throwing open the entire country to foreign trade. Submission to restrictions such as the Japanese imposed on the Loo-Choo islanders when these were first brought into contact with commercial nations, will never do. Experience has shown that the people are in favour of an extension of foreign connection, and that a great gulf, bridged over by polite and servile forms, lies between them and those Japanese Princes and officials, whose rapacity has made them both hated and feared.

THE PROPOSED ITALIAN MISSION TO CHINA, &c.

WE noticed, some time since, the intention of the Italian Government to despatch a diplomatic mission to China and Japan. Affairs having been consolidated at home, the Italian Government naturally seeks to secure that *prestige* in the Far East to which its flag is entitled, and the advantages to its commerce already secured to other nations at the open ports of the Eastern seas. The importance attached to this mission is sufficiently indicated by the appointment to the Embassy of a Milanese nobleman of great wealth and high position—the Marquis ARCONATI VISCONTI—together with the young Italian MINISTER for FOREIGN AFFAIRS, a good linguist, and skilful in conducting negotiations demanding discrimination and skill. Italy cannot well spare a war vessel from its fleet—a fleet still insufficient for any great national emergency—but with a keen appreciation of the requirements of semi-barbarians, to whom seeing is believing, the Chinese and Japanese are to be granted this amount of evidence of warlike civilisation. The Peking Court, despite its isolation, can hardly be unacquainted with the rising fortunes of Italy, or the importance of its future trade. As to Japan, the Italian war vessel conveying the Embassy, whether arriving during active hostilities or when belligerent Princes and bigoted priests have been brought to reason by knock-down arguments not to be found in their sacred books, its appearance can scarcely fail to be opportune. It is to be hoped that the Italian flag will soon be more familiar in Eastern waters. If Prussia could find its account in sending an Embassy to Siam and Japan, the motive must be far stronger with such a people as the Italians, who are essentially maritime, and the varied resources of whose country fully justify them in looking in an Eastern direction for an enlargement of their foreign trade.

ELEVEN DAYS LATER FROM JAPAN.

(*From the London and China Express.*)

THREE days after the arrival of the regular mail with advices from Japan to July 13th, elevendays later news arrived by telegram *via* San Francisco and New York. This news strikingly confirmed the following prediction made in our issue of the *London and China Telegraph* of the 14th inst., as to the prompt retribution to be expected from the Federal commander onthe station for the insult to his flag in the shot fired on an American vessel from forts in the territory of the Prince of Chosew :—

"At the very moment when the satellites of the Tycoon are representing to the Japanese people how finely they have out-manœuvred foreigners, they are destined to hear destructive salutes from the cannon's mouth of at least one American man-of-war, the commander of which is not likely to wait instructions from Government before enforcing satisfaction. No Yankee will put with Japanese diplomacy; and any number of Mexican dollars is little likely to allay the wrath of the Federal commander."

A subsequent telegram from San Francisco, affecting to give further details, involves them in so many verbal and contradictory errors, that we hesitate to place it before our readers. However, it may pass for what it is worth; we briefly note, in the way of correction, that the *Semiramis* is a French not an English vessel; that there is no British steamer in the Japanese waters named *Tancredi;* that the *Medusa* is no more English than French, but a Dutch war vessel. It wrongly appears, from these details, that an insult on our national flag had been avenged by Admiral Kuper, acting under the instructions of Colonel Neale, in the American style, and even more effectively. The *New York Herald*, in the subjoined article, indulges in some glorification at the American commander having been the first to open fire it, represents, however, the *Wyoming* had to leave its work unfinished, and that it was left to British troops to destroy the hostile forts, seize the batteries, spike the guns, and destroy their ammunition. The *New York Herald* professes to see the end of the fray, and anticipates as the result of the joint operation of all the great naval Powers in withstanding the ignorant and bigoted action of the Japanese Government, the removal of all remaining restrictions to foreign trade in the Japanese waters—the throwing open the whole country to foreign intercourse. The same journal very confidently refers the hostility of the Japanese to their knowledge of European and American power and

Digitized by Google

wealth, derived through their late embassies, and suspects a tragic finish to the members of those delegations. The following is the uncorrected telegram as it appeared in the New York papers :—

"San Francisco, Sept. 6, 1863.

"Advices from Japan to the 24th of July are received. The English ship *Medusa*, bound from Nagasaki to Kanagawa, by the passage, was, on the 15th of July, attacked by some forts and vessels that had previously fired on the American ship *Pembroke*. The *Medusa* received twenty-four shots, and was much injured. She had four men killed and six wounded. On the 20th of July the American steamer *Wyoming* arrived at Kanagawa from a trip to punish the Danio, whose vessels and forts fired on the *Pembroke*. The *Wyoming* reported that she had done her work well, having blown up the Japanese steamer *Sarsfield*, silenced nearly all the neighbouring forts, and left the Japanese steamer *Laneck* in a sinking condition. The *Wyoming* received twenty shots, and had five men killed and six wounded, when she deemed it prudent to proceed to Kanagawa. On the 24th of July Admiral Jurez, in the British steamer *Semiramis*, returned to Kanagawa, and reported having arrived with the *Semiramis*, on the previous Monday, in Semionseki Straits. The British steamer *Tancredi* received the fire from the Japanese batteries, which, with the forts, were bombarded for about three hours. One hundred and fifty-three British troops then landed, who destroyed the forts and batteries, spiked the guns, blew up the powder magazine and burnt the village. But little fight was shown by the Japanese after being shelled out of the forts; and what they did do was from behind trees and jutting points of rocks. Two thousand Japanese troops were reported to be descending towards the British vessels: but it was not thought that they would attempt to pass within the range of their guns. At last accounts nothing could be seen of the Japanese steamers *Laneck* and *Sarsfeld*; but the topmast of one of the sunken vessels was thought to be seen. The casualties of the British in the last attack were three killed."

(*New York Herald* Sept. 9th)

"By way of the telegraph from San Francisco we have some very extraordinary news from Japan. To punish an outrageous attack on one of our merchant ships in the Japanese waters, the United States gunboat *Wyoming* had blown up one Japanese war steamer, had sunk another, and had silenced nearly all the surrounding forts. For a similar offence against one of their trading vessels the British had sent up the same inlet as we understand it, an expedition, consisting of at least two war steamers, from which, after a heavy bombardment, a detachment of troops was landed, 'who destroyed the forts, batteries, and the town, spiked the guns, blew up the powder magazine, and burned the village,' thus finishing up the job which, only for the want of a second gunboat, was not completely finished by 'the Yankees.'

"From these events it would appear that the late imposing delegation of high and mighty ambassadors from Japan to this country has been productive of very little good towards cementing the bonds of peace between the two nations. We suspect, indeed, that those aforesaid ambassadors, on returning home, told such stories of the extent, the wealth, power, and material development and resources of the United States as to excite at once, with the incredulity, the distrust, and hatred of the ruling powers of Japan. We apprehend that very few of that delegation of seventy odd men, including 'Tommy,' are now in the land of the living; that they saw in the United States too much for their own good; that the *hari-kari* has disposed of them, and that the reports of their travels and observations here had the effect of closing against Americans the doors of Japan, instead of opening them to the admission of those 'powerful barbarians beyond the seas.' The same influences have doubtless operated to the prejudice of the English and the French among the Japanese, and hence, we conclude, all these late feuds and diplomatic difficulties and bloody collisions between the natives and the outside barbarians, culminating at last in open war.

"John Bull, in his terrible battle some five or six years ago with the Chinese on the Peiho, would have suffered much worse than he did suffer had not 'the Yankees' come to the rescue. That affair was a spontaneous act of co-operation on the part of the Americans, which the English have forgotten; but they cannot ignore these later transactions, in which American and English gunpowder was employed in the same work in Japan. There is little reason to doubt that the United States gunboat *Wyoming* has opened a game of war in that empire which will vastly enlarge the commerce and political power of England along the eastern side of Asia; and in this view the subject can hardly escape a European discussion, although the work of the *Wyoming* was simply an act of punishment for an outrage upon a peaceful American trader. But there is still what Sam Weller would call such a 'wery remarkable coincidence' between the proceedings of 'the Yankees' and the British in this Japanese business that it will tax even the unscrupulous malignity of the London *Times* to torture the facts to the advantage of Jefferson Davis, although he is known in certain English rebel ship-building establishments as the Emperor of China, or the Emperor of Japan, as the occasion may require.

"The Mikado, or Spiritual Emperor of Japan (whose temporal power over the different islands of his empire may be compared to that of the Pope of Rome over the nations of Europe 500 years ago), has, it appears, resolved to 'wipe out the seven nations' or provinces under his supreme control, and to 'expel all outside barbarians.' He has commenced this comprehensive game. He has thrown down the gauntlet to the Americans and the English, and they have taken it up, and have 'moved upon the enemy's works,' the Americans leading the way. One of the inevitable results will be the opening of all the Japanese islands to foreign trade and social intercourse; and we rely upon our Government to see to it, that in these matters its interests are not neglected."

LAUNCH OF THE P. AND O. STEAMER "DELHI," &c.

We noticed in our last the launch of the *Golconda* and *Baroda*, and we have now to notice the launch of the *Delhi*, from the yard of Messrs. Wigram and Co., Blackwall, on the 16th inst. The *Delhi* is of 2,090 tons, and 400-horse power; length 295 feet; beam, 38; depth, 27. The launch attracted a large concourse of spectators, and the ships in the dock and river were gaily dressed out with flags. The ceremony of christening the *Delhi* was performed by Miss Hall, daughter of Admiral Hall, one of the directors of the company, in the usual manner. The blocks that held the steamer to the slip were then knocked away, and the ship glided off into the river amidst the cheering of the spectators and the firing of cannon. After the *Delhi* had floated up the river a short distance, she was taken in tow, and hauled into the East India Dock to be fitted out.

The *Brockham* was also launched on the same day, from the yard of Mr. Charles Lungley, of Deptford. This is the vessel which we have already noticed as building for Messrs. Phillips, Shaw, and Lowther, and Captain Maxton. The *Brockham* is 224 feet length, 200 beam, and 32 depth, and registers 984 tons.

Mr. Davison, shipbuilder, of the Tyne, has launched a barque of 460 tons, named the *Cleughs*, for the China trade.

Literature.

A Lady's Visit to Manila and Japan (Illustrated). By ANNA D'A. London: Hurst and Blackett.

In a book on the Far East from the pen of a lady, we naturally look for personal impressions rather than exact descriptions—for far more sentiment than reality. The authoress has done her best, though not always successfully, to convey her ideas of scenes and people; but her work is necessarily of a superficial character, altogether phenomenal, the husk of what she could not understand, and does not attempt to interpret. Still, the reading is entertaining where the reader, from personal knowledge of the spots visited, can supply the want. People of different nations are brought in, but those to whom alone a life-like look is given are the 10,000 Chinamen of Manila, of whom she really seems to know something. The visit to the inland sea of Japan will be read with interest; but the evident omission of the social element leaves the reader little to gratify beyond a first curiosity; this style of writing, graphic though it be at times, being completely out of date.

A second edition of an important and valuable work, *Travels In Ladak, Tartary, and Kashmir*, by Lieutenant-Colonel Torrens, 23rd Welsh Fusiliers, appears from the press of Saunders, Otley, and Co. Colonel Torrens and his companions traced the course of the Hindustan and Thibet Road from Kalka, in the plains, to Shipkee, on the borders of China. Whilst the work, for the most part, is written in sportive vein, with an unflagging zest for adventure and for novelty, the commercial and political advantages of a connection between Hindustan and China are never lost sight of. "A road," says Colonel Torrens, "that should connect them without passing through a foreign country is an immense desideratum." Still, this practical aim simply underlies the rich and amusing depictures of characters and scenes, and cannot interfere with the enjoyment of the reader. It is one of the most entertaining book of travels ever published, and is superbly illustrated with coloured scenes, which bring in an extensive reach of country.—*Andrew Deverel: the History of an Adventurer in New Guinea and on the Spanish Main*, published by Richard Bentley, is a thrilling and exciting novel in the garb of adventure and travel, duly spiced with scenes of crime and blood. A marvellous story of love, such as could be only true of the impassioned female *amoratas* of the tropics, intertwines, like a fiery serpent, with the "moving incidents."—The first volume of the *History of England*, by John George Phillimore, Q.C., LL.D., has been issued by Messrs. Virtue Brothers and Co. This work, which is commenced in a bold, manly, and independent style, and challenges attention by its philosophic spirit and freedom from those conventional ideas in which the history of this country has been too much enwrapped, is evidently destined to produce its influence on the age.—*Border and Bastile*, by the celebrated author of *Guy Livingstone*, whose philosophic satire and dramatic power of arranging incident and developing a plot of growing interest, has rendered him an immense favourite with the reading public, has been published by Messrs. Tinsley Brothers, and is the crack book of the season.—Of juvenile publications admirably suited for families abroad, and calculated to benefit by the lessons they convey as well as to afford unalloyed enjoyment, we may men-

Digitized by Google

tion the series published by Messrs. Johnstone, Hunter, and Co., of Edinburgh. The materials of these pleasing illustrated works are derived from German as well as English sources, and promise to make an unrivalled library for permanent and lasting interest. They are beautifully got up with illuminated covers. Mr. Kingslake's *Invasion of the Crimea*, the fourth edition of which has just appeared, has already spread over the Continent. Tauchnitz, at Leipzig, has not only published a German translation of the work, but likewise a cheap English Continental edition in four small volumes. A French translation, which will most likely be read more than any other one on the other side of the Channel, will, it is stated, be brought out in Brussels in the course of the next month. But what is still more remarkable, the Englishman's keen strictures on the Russian war have also been rendered into modern Greek.—Mr. A. W. Bennett, famous for rendering the art of photography subordinate to literary purposes, has issued a work which, for style and splendour, can scarcely be equalled, entitled *The Ruined Abbeys and Castles of Great Britain*, by William and Mary Howett; the photographic illustrations by Bedford, Sedgfield, Wilson, Fenton, and others. These are all strikingly beautiful, whilst the letter-press leaves no chord of interest untouched; under the skilful hands of the author and authoress, the clang of arms startles the silence of these holds of power, beauty holds high revel with gay cavaliers in banquet hall, abbeys and priories resume their pristine magnificence, and we listen with the very scenes in view to the legends and stories with which history has invested them.

The success attending the publication of *Will Adams, the First Englishman in Japan*, has encouraged Mr. Bennett to issue another edition of this romantic biography. —Mr. H. G. Bohn has published, in his usual elegant style, that most charming of Miss Mary Russell Mitford's works, *Our Village*, abounding in charming sketches of character, and a series of incidents which rivet the attention and engage the interest of the reader.—A third and enlarged edition of the Astronomer Royal's Introduction to Astronomy has appeared from the press of H. G. Bohn. Messrs. Jarrold and Sons publish *The History of France*, for the use of scholastic establishments, by the Rev. Dr. Brewer, of Trinity College. The clear demarcation of different periods in this history, the lucid style of narration, and the philosophic view taken of events as they transpire, which are viewed with reference to their immediate causes and traced to their effects, promise to give this work a foremost place in historic productions. We can recommend it without hesitation; it is compact, correct, and brought down to the present time. Persian, Turkish, Jewish, and Chinese stories will be contained in a forthcoming Spanish work, called *Los Mil y un Dias*.—Of juvenile school histories, those of Miss Corner, published by Messrs. Dean and Son, continue to maintain precedence. The clear and lively character of the narrations seizes attention, and impresses the occurrences on the memory. This lady's *History of England* will prove a great attraction in colonial schools. The coloured vignette plate presents at a glance a genealogical view of races and dynasties. The appended questions must prove extremely serviceable to teachers.—A valuable *Guide to Typography*, giving all the instruction required in this branch for practical printers, and those connected in any way with the press, is published by Mr. F. Bowering, 211, Blackfriars-road.—The *Universal Text Book of Photography*, published by Messrs. Harvey, Reynolds, and Fowler, of 10, Briggate, Leeds, is the cheapest and most practical guide to photographic processes that has yet appeared. It abounds with formulæ and useful information relative to the art and its practice, and may be confidently ordered by the amateurs and professors of the art in our colonies. This house supplies another colonial desideratum in the "Tourist's Telescope by Land and Sea," which, in convenient compass, shows great power, exhibiting an object as clearly at fifteen miles as to the naked eye at one mile, and serviceable both on sea and land.—Messrs. Barnard and Son, of Oxford-street, have issued very admirable *Alphabets and Designs of Different Periods* for the use of illuminators and decorative artists; and *Hints on Illuminating*, containing an essay on the art of ornamenting in gold or silver, by following which the brilliant productions of the middle ages in this line may be very successfully imitated.

PRESIDENT LINCOLN ON THE WAR POLICY.

The letter of Abe Lincoln, written from the White-house, at Washington, to the Union Committee of Illinois, who are trying so to manage matters as to secure to the Republican party the next President, has excited world-wide comment as shadowing forth the war policy of the administration. The *New York World* regards it as indicating that the President regards the war as interminable. "If," says Uncle Abe, "you are not for force, nor yet for dissolution, there only remains some imaginable compromise. I do not believe that any compromise embracing the maintenance of the Union is now possible. All that I learn leads to a directly opposite belief. The strength of the rebellion is its military—its army. That army dominates all the country and all the people within its range." This is the same sort of reasoning which Mr. Seward has indulged in, trying to palm off the insurrection of the South as undertaken and carried on by a few men, compelling the Southern population, against its will, to resort to arms. The false premises make the reasoning. Even Lincoln admits "that no word or intimation from the rebel army, or from any of the men controlling it, in relation to any peace compromise, has ever come to my knowledge or belief. All charges and intimations to the contrary are deceptive and groundless." Only a few days after writing this letter he refused a proposal from a leading politician of New York to test the feeling of the South with regard to a compromise by calling a general Convention of Northern and Southern States. But to proceed with the letter. As to the difficulty of slavery, he reminds his party that he suggested "compensated emancipation," but that they refused to be taxed for this purpose. Then what remains but "unconditional emancipation?" "You dislike," he says, "the emancipation proclamation, and perhaps would have it retracted. You say it is unconstitutional; I think differently; I think that the constitution invests its commander-in-chief with the law of war in time of war. The most that can be said, if so much, is that slaves are property. Is there, or has there ever been, any question that by the law of war, property, both of enemies and friends, may be taken when needed? And is it not needed whenever taking it helps us or hurts the enemy?" This paragraph, it appears led the committee to adopt his emancipation decree, as one of the "planks" of the Republican platform. As Abe proceeds he becomes prophetically poetical, and for the sake of the sentiment sacrifices the truth, for it is well known the Mississippi is not yet open. "The signs look better. The Father of Waters again goes unvexed to the sea. Thanks to the great north-west for it. Nor yet wholly to them. Three hundred miles up they met New England, Empire, Keystone, and Jersey, strewing their way right and left. The sunny South, too, in more colours than one, also lent a hand. On the spot their part of the history was jotted down in black and white. The job was a great national one, and let none be barred who bore an honourable part in it." Evidently the rail-splitter has not forgotten his vocation. The business, bloody as it was, was still only a *job*. That the negro is still hated, here is the evidence. "Whenever you shall have conquered all resistance to the Union, if I shall urge you to still continue fighting, it will be an apt time then for you to declare that you will not fight to free negroes." As that precious Boston parson said, the negroes are to be valued as keeping off the bullets from white men. The letter towards the close indulges in this precious bit of bunkum:—"It is hard to say that anything has been more bravely or better done than at Antietam, Murfreesboro', Gettysburg, and on many fields of less note. Nor must *Uncle Sam's web feet* be forgotten. At all the waters' margins they have been present—not only on the deep sea, the broad bay, and the rapid river, but also up the narrow muddy bayou; and wherever the ground was a little damp they have been and *made their tracks*."

THE FEDERAL DEBT.

A correspondent from New York writes:—

"Mr. Chase having to provide $60,000,000 to pay the arrears due to the army and navy has come into the market as a borrower of $50,000,000. He proposes to raise the money by the issue of that amount of promises to pay in sums of $10 and upwards, bearing interest at 5 per cent. per annum. The banks of New York have agreed to take $35,000,000 and those of Boston $15,000,000 of the amount. These promises to pay partake of the double character of an Exchequer-bill and of a banknote. In the first capacity they bear interest, and in the second they are declared to be legal tender for all debts, public and private. As these issues must of necessity be followed in quick succession by others of like or a greater amount, if the army and the navy are to be paid, the contractors settled with, and the war pushed forward, a feeling of distrust has communicated itself to the speculative public. The non-success of the operations before Charleston, the growing doubt whether Admiral Dahlgren and General Gilmore will not fail as egregiously to capture the city as General Hunter and Admiral Dupont did before them; the calculation, based on unmistakable *data*, that these futile attempts to wreak vengeance upon South Carolina have already cost the Federal Government in round numbers the handsome sum of $500,000,000, which any professional accountant, surveyor, or assessor would certainly declare to be 300 per cent. in excess of the value of the fee simple of all the land in the city, and of every house, church, bank, office, or other building within its bounds, and all the movable property therein contained; and a similar calculation that the little treasure acquired in Vicksburg was not purchased at a smaller cost, from first to last, than $400,000,000, have contributed each in their degree to excite the fears of the many bankers, brokers, and merchants, who see no way out of the corner into which the Government is driven except by further issues of baseless paper, and who know that such issues inevitably lead to financial collapse and national bankruptcy.

"To these sources of disquiet have to be added, first, the possibility—and, as many think, the extreme probability—that General Lee will take advantage of the depletion of the Army of the Potomac, many thousands of whose veterans are doing unnecessary duty in the *quasi*-hostile occupation of the city of New York, to flank General Meade and march upon Washington; and, secondly, the letter of Mr. Lincoln to the Springfield Convention, which puts the extinguisher upon all the hopes of peace which have recently taken possession of the public mind, by showing that as long as he is President he will listen to no terms from the South except unconditional surrender, to be coupled with immediate emancipation. Nor is this, formidable as the list may be, the whole catalogue of causes that have come into simultaneous operation to disturb the money market, and shake the card castle of Mr. Chase's finance. The European har-

Digitized by Google

vest is known to be so abundant as to make it certain that Great Britain and France will not this year be very large purchasers of American breadstuffs; that, consequently, the importations of dry goods and other articles from Europe, which the necessities or the luxuries of the Americans may require, will have to be balanced not with corn and flour, as in other times, but with gold. How much or how little these several causes of anxiety or alarm may have affected the sensitive barometer that marks i s fair and its foul in the prices of stocks and the premium on gold it is ntot easy for the most patient student to predicate with accuracy. Possibly the main motor of the panic that has taken possession of Wall-street for the last three days was Mr. Chase's appearance as a borrower. However that may be, the card castle has had a rough shaking. Shares in the 'fancy' railways—manipulated by the leviathans of speculation—have come tumbling down, and gold has gone clambering up.

"A few men have made large fortunes, for Mr. Chase does not keep his secrets so effectually as not to let his relatives, his personal friends, and some Western politicians and financiers, on whose services he relies to get a large Western vote for the Presidency, know a few days, or even a few weeks beforehand, that he is going to issue fresh greenbacks, contract a loan, or otherwise operate on the sharemarket and the price of gold. But while these favoured few and the 'ring' or clique that surrounds them, have either kept clear of mischief, or made money, ruin has seized upon hundreds of the smaller and less privileged class of speculators, who have learnt, to their cost, the old but ever recurring lesson that gambling is no certain road to wealth, and that industry and the legitimate pursuits of commerce, though they may not always lead to fortune, and never to sudden riches, are the only safe avenues on which the wise man will travel who expects to make a sure provision for his old age, and leave a competency to those who are to follow him. While gold has advanced nearly 11 per cent since Saturday last the decline on railway stocks has varied between 2¼ and 31 per cent.; New York Central has fallen 9⅜; Erie, 15; Illinois Central, 11½; Fort Wayne, 16½; Harlem, 28; Harlem preferred, 31; Michigan Southern, 22½; Chicago and Alton, 14; and Cleveland and Pittsburg, 11. Government stocks have also felt a downward tendency, and have declined from ¼ to ½ per cent.

"The President's letter, which has done so much to produce the mischief and to disabuse the public of the idea of a speedy peace, is a characteristic and, in some respects, an important document. Ardently desiring peace and a restoration of the Union, he sees and knows of no method securing these objects but by the vigorous prosecution of the war. Compromise he believes to be impossible, for the all-sufficient reason that the Southern leaders and armies will listen to no terms short of absolute independence, an independence to which he, as President, cannot consent, and which he must continue to combat by every means in his power. He furthermore admits, though not in express terms, that the recent successes of the Federal armies have in reality done nothing to convince the South of the hopelessness of its cause, or induce it to make offers of submission. All this is undoubtedly true, though its public confession by the President is calculated to cool the boiling enthusiasm of that large and impulsive portion of the Northern people who were until yesterday of opinion that Gettysburg, Vicksburg, and Port Hudson were three blows so nearly fatal to the South as to require but one more to complete its subjugation, and which, according to the programme, was to fall with crushing weight at at Charleston, and make an end once and for ever of Southern independence."

FORCE OF THE ATTACKING FLEET AT CHARLESTON.

As the number and character of the vessels engaged in the present attack on Charleston differ materially from those of Dupont's fleet, of which we printed an analysis, we subjoin a statement of the force of the present fleet, its officers, men, and guns:—

Iron-clads.	Officers and Men.	Tons.	Guns.
Ironsides	500	844	2
Passaic	100	844	2
Kaatskill	100	844	2
Montauk	100	844	2
Nanant	100	844	2
Weehawken	100	844	2
Patapsco	100	834	2
Wooden Vessels.			
Steam corvette Canandaigua	253	1,395	10
Side-wheel steamer Mahaska	140	832	6
Double-ender Cimmarone ...	150	860	9
Steam gun boat Ottawa ...	120	507	5
Steam gun boat Wissahickon	120	507	4
Steam gun boat Dal Chang	100	507	5
Steam gun boat Lodona ...	200	869	7
	2,180	11,376	60

It will be observed that three of the *Ericsson* iron-clads, the *Singamon*, the *Lehigh*, and the *Nantucket*, do not participate in the present attack. As statements have been going the rounds of the papers about the armour of the *New Ironsides* at the expense of the New York iron-clads, it is only proper to say that outside the bow and stern of that vessel sand-bags are piled as thick as possible, just as they were piled in Dupont's attack. And it has been proved by experiments with the ship that a 10-pound shot would sink her, either fore or aft, without those sand-bags. No such thing could be said of the New York iron-clads.

MONUMENT TO LIEUT. ANDERSON, MURDERED NEAR PEKING.—A monument has recently been completed in the crypt of Glasgow Cathedral to the memory of the late Lieutenant R. B. Anderson, who fell in the last war with China. The sad fate of this brave and gallant young officer and of his unfortunate companions, De Normann, Bowlby, Brabazon, and Phipps, excited at the time a deep and poignant feeling of sorrow and indignation throughout the country. It will be recollected that Lieutenant Anderson, who also held the appointment of Adjutant of Fane's Irregular Cavalry, commanded the escort which accompanied Sir Harry Parkes to Tung-chow, when he went in advance of the army to meet the Chinese commissioners, and that the whole party were illegally and treacherously captured by the Chinese when under the protection of a flag of truce. The way in which they met their death is well known. The monument to which we now draw attention is a bronze military trophy, sculptured in relief, and placed in front of a memorial painted window. The trophy consists of the shield, helmet, sword, mantle, gauntlet, spurs, and the wreath of Victory, heraldically enriched and engraved with the national emblems and the family arms and motto—the whole group being so artistically designed and executed as to form a first-class work of art, and to reflect the very highest credit upon the artist, Mr. Robert Jackson, of 16, Maida-hill. The trophy rests on a large slab of black marble, placed in the cill of the window, and the window itself is filled in with painted glass of a memorial character, appropriately designed by Messrs. Hughes and Ward, of Soho. In front of the trophy is placed a brass scroll, which bears the following inscription:—"In memory of Robert Bruce Anderson, Lieutenant 1st Bombay Fusiliers, Brigade-Major Hodson's Horse, Adjutant Fane's Horse. Born in Glasgow, 14th October, 1833; died in China, 27th September, 1860. A soldier who fell in the war with China, in the service of his Queen and country, at the post of duty; loved in life and lamented in death. His schoolfellows thus record their sorrow and esteem." The whole monument is conceived and carried out in such a manner as to be alike an ornament to the venerable cathedral in which it is placed, and honourable to the feelings and taste of those who have erected it.

CAPTAIN MCNEIL, OF THE "CARNATIC."—On the 17th June, 1863, a Naval Court was held at Shanghai to inquire into the cause of the British ship *Carnatic*, which was lost on the east side of the East Saddle Island on the 2nd of June, 1863. The Court, after having duly considered all the evidence, decided "that the loss of the ship *Carnatic* was to be attributed to want of judgment on the part of the master (Captain Richard M'Neil), from the fact of his navigating her, in a dense fog at night, with very light wind, he being uncertain of his position, and having neither local knowledge nor any book of directions for his guidance on board." The Court suspended the certificate of Captain M'Neil for the period of twelve months.

JAPANESE PHEASANTS.—Mr. Dering, of Clifford, suggests that friends on board the men-of-war in Japan will have an excellent opportunity of bringing back to England some of the Japanese green pheasants, which are common there. The bronze pheasant, also a native of Japan, has, I believe, never been imported. These pheasants are worth large sums in England, and are especially valuable for crossing with our own, as the so-called Indian pheasants are not true pheasants, and only produce a final cross, whereas the Japanese birds will breed with ours and the Chinese ringnecks (*torquatus*) *ad infinitum*, and the cross is very beautiful.

APPOINTMENTS, &c.—Mr. K. E. Schmid has been appointed a supernumery interpreter, Japan. War Office: The Queen has been graciously pleased to appoint the Hon. Henry George Elliot to be Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Italy. The Queen has been pleased to appoint Sir Henry Barkly, K.C.B., to be Governor and Commander-in-Chief in and over the island of the Mauritius and its dependencies.

AMATEUR TRIP TO FAR EAST, &c.—The Austrian journals state that a company of that country has just organised a pleasure excursion round the world. The screw steamer *Marco Polo*, which is specially engaged, is to leave Trieste on the 5th of next March, and successively visit Algiers, Gibraltar, Madeira, Saint Helena, the Cape of Good Hope, Madagascar, Ceylon, Nicobar, Singapore, Hong Kong, Shanghai, the Sandwich Islands, Mexico, Panama, Lima, Monte Video, Rio Janeiro, and lastly Naples and Corfu. The trip is to last eight months, and cost 5,000 fl. (12,350 f.)

PRESENT TO THE QUEEN.—Her Majesty has been pleased to accept from Mr. John T. Topham, British Vice-Consul at Lanzarote, a fine specimen of the Cactus cochinellifer, with living cochineal. The plant, which reached London in the steamer *Amazon*, Captain Pounds, was on Friday week placed in the Horticultural Gardens.

THE NIGHTINGALE FUND.—At a recent meeting of the council of the Nightingale Fund, the report showed that of the probationers who had completed their training as hospital nurses at St. Thomas's Hospital, and been placed on the register as certified nurses, 20 were employed in various hospitals and infirmaries, principally in the provinces, and that the accounts received of them were most satisfactory. In consequence of the closing of the hospital during the removal to the Surrey Gardens, only a small number had completed their training during the past year. 12 probationers are now under training there. The plan for training midwifery nurses at King's College Hospital to be employed among the poor was making progress. The probationers who have been sent out as trained nurses were employed in country parishes, and were giving satisfaction. The committee state that, although the number of probationers who had completed their training in both hospitals had from various causes fallen short of what might have been expected, they were satisfied with the general results obtained. Decided progress had been made in the number of applications for trained nurses on the part of the public, and there had been latterly some improvement both in the number and in the character of the candidates who applied for the vacancies. The accounts of the receipts and expenditure for the year were ordered to be advertised. The vacancy in the council occasioned by the death of the late Sir Joshua Jebb was filled up by the appointment of Mr. Edward Marjoribanks, jun. Applications respecting hospital nurses should be made to the matron at St. Thomas's Hospital, S.; applications respecting midwifery nurses to the lady superintendent, King's College Hospital, W.C. The regulations as to both may be obtained from the secretary, 11, Lombard street, E.C.

WE have just received a pamphlet of note on Formosa, by Robert S. Swinhoe, Esq., which will be noticed in our next.

OUR GUNBOATS AND MORTAR VESSELS.

Created to meet a sudden emergency in the war waged by England and France against Russia, the last vessel of our gun and mortar boat fleets might, in the due course of time, have passed away with and into those convenient "waters of oblivion" into which individuals and peoples are ever so ready to consign their failures, their defeats, and their disappointments, had their history hitherto been "written in sand." It could not be so, however, under the circumstances of their history subsequent to their creation. The pæan sung over the inauguration of this

Digitized by Google

miniature fleet of hornets cannot readily be forgotten. This flotilla of gun and mortar craft was termed "the best legacy of the Russian war, the only solid advantage that remained to us after all our experiments. We had not only learnt that a maritime Power requires other vessels besides line-of-battle ships, but we had actually got a strong fleet of these vessels ready built for any future emergency. There they are all hauled up safe and sound, all paid for, and fit to be launched at an hour's notice in strength sufficient to sweep the Channel of an enemy." But this precious flotilla,—this real naval reserve—this squadron on which so much money has been spent, was found rotten and good for nothing, and the boats were only fit to break up or crumble to dust where they lay. They were not broken up, and they were delayed at an immense expense in falling literally to pieces. Two certainly, the *Caroline* and the *Mackarel*, were eventually condemned and taken to pieces, but even now fragments of their poor rotten skeletons may be met with in obscure corners of the Haslar Yard, each fragment forming part of a tale of fraudulent copper bolt fastenings and sappy timbers. Others of the gunboats had as much as £1,000 and £1,500 each spent upon them; some, it is said, still more, and others less; but the one professed object aimed at was to render this rotten and useless fleet available for some purpose. The exposure of our folly had made us to a certain extent ashamed of ourselves, and we were glad to hide the cause from sight as quickly as possible. All "visible" defects were made good, and each vessel the partial repairs of which only were thus "made good" at an enormous expense, had her planking carefully caulked, her bottom payed over with an honest coat of tar, and with an "air stroke" of planking left out (too near the top sides to be of any service). The gunboat squadron stood under their sheds at Haslar, looking, to all outward sign, bright, sound, and fit for anything. At this time the fact was the boats were only partially repaired; English elm had been introduced alongside partially decayed plank and framing, and the whole closed in, air-tight from keel to "air stroke," and now all again are rotten.

The recent annual inspection of the naval establishments at Portsmouth is, however, likely to cause the curtain to descend upon the last act of the gun and mortar-boat comedy. In anticipation of their lordships' annual visit to the yard at Haslar, a report of the condition of the boats stored under the sheds was prepared, which led to further investigations being made, and the result is that this too famous yard at Haslar is to be degraded from its hitherto maintained position, and to descend from its high-sounding title of "gunboat yard and slipway," to "a yard for building and repairing ships' boats and repairing gunboats;" the latter, we should presume, means so long as wooden gunboats are still supposed to be of use.

The gunboats now on the blocks under Haslar sheds are forty-seven in number (exclusive of six building), and their destiny in the immediate future has been assigned as follows:—

Condemned to be broken up.—The Tiny, 20-horse power; the Midge, 20; the Flirt, 20; the Ready, 40; the Pincher, 60; the Swinger, 60; the Thrush, 40; the Badger, 60; the Beaver, 60; the Beacon, 60; the Traveller, 60; the Savage, 60; the Porpoise, 60; the Pert, 20; the Grinder, 60; the Brazen, 60; the Bullfinch, 60.

To be surveyed further, for sale or breaking up:—The Wolf, 60 horse-power; the Crocus, 60; the Camel 60; the Garland, 20; the Garnet, 40; the Primrose, 60; the Prompt, 60; the Pickle, 60; the Gnat, 20; the Redbreast, 60; the Parthian, 60; the Blossom, 20; the Confounder, 60; the Gadfly, 20; the Rocket, 60.

For repairs, to be added to, or rather, to form the reserve:—The Brave, 60-horse power; the Peacock, 60; the Cherokee, 60; the Wave, 60; the Swan, 60; the Whiting, 60; the Fenella, 40; the Hunter, 40; the Skylark, 60.

To be fitted for coal depôts:—The Pet, 20-horse power; the Snapper, 60.

This list only includes the Haslar gunboats, but in addition to these there are some 110 others of the same class of vessels afloat in our home ports and on foreign stations, all of which must be looked upon by the lights of our present experience as possessing a still more unfavourable average of condition than even those quoted above as in the "Haslar" list.

With regard to the original construction of these vessels, while it is admitted that the contractors were compelled to turn them out of hand in a very hurried manner, owing to the nation's requirements at the time, and to build portions of them with unseasoned timber, owing to the impossibility of obtaining seasoned wood, there is at the present moment a vessel under repair in Haslar Yard which, from having been originally constructed with seasoned timber, affords a remarkable contrast in her condition to the exotic gunboats which have cost the nation such immense sums of money, but the days of which we may now reasonably hope are numbered. The vessel alluded to is simply an open dockyard lighter daily employed in doing all kinds of rough work. She was launched sixty-nine years ago, and her original timbers, which now form her frame below the water line, are as sound and hard as on the day of her launching.

So much for the Haslar gunboats, their rotten and fungus-covered hulls, their short copper bolts, their partial repairs, their subsequent rot on the blocks high and dry under the sheds, their last survey and condemnation in the present year of 1863, and the necessarily proposed significant transformation of the designation of Haslar establishment from "gunboat yard, sheds, and shipway," to the more modest one of "boat building and repairing yard."

The mortar vessels at Haslar have not attracted the same amount of public attention from the fact of their being fewer in number, and, therefore, more unimportant than the gunboats, and also from their having been left in a comparatively undisturbed state. There are 19 mortar craft now on the blocks at Haslar, nine of iron and ten of wooden construction. The iron ones are being converted as they are wanted into open lighters for dockyard use, and the larger-bodied wooden craft are being handed over to the Coastguard as they require vessels for stations in the different rivers and creeks around the coasts—the very best purpose to which both classes of vessels can now be applied, although both would have done good service doubtless beyond what they effected at Sweaborg, had the war with Russia fortunately, or unfortunately, lasted a twelvemonth longer.

The Haslar gunboat history will also, like every other part of our naval administration, illustrate in the most forcible manner our present system of dockyard "departments." The head of the "wood" department is perfectly aware that the hulls of the useless craft which he is patching up and passing off as sound vessels "to order" are rotten to the core, and are but a horrible sham. The head of the "metal" department, ont the other hand, can know nothing (officially, and therefore he mus be ignorant) of a wooden vessel's hull being hopelessly rotten, and therefore displays an unwonted degree of activity in "bringing forward" her engines, not giving, as would be the case in any private establishment, any thought or care about the expense, but showing how smart his department can be in producing what will never be wanted, for, as with the poor gunboats, by the time the metalwork is completed the woodwork is condemned, the hull is broken up, and the metalwork goes no one cares to inquire where. As to the future, there is hope, for it is impossible to believe but that with such indefatigable workers as the present First Lord, the Controller of the Navy, and the newly-appointed Chief Constructor, a new era must be inaugurated, and the ruinous system which has prevailed for such a length of time in our national dockyards be superseded at length by one befitting the large interests at stake and the dignity of the nation.

Naval and Military.

—o—

We understand that orders have been sent to India to send on to China the 2nd Battalion of the 20th or 21st Regiment, which left this country lately for India.

It is rumoured that Rear-Admiral Sir James Hope, late Commander-in-Chief of the China station, will be appointed to the West India command.

Her Majesty's screw steam corvette Scylla, 21 guns, 400-horse power, has been commissioned for service on the East India and China stations, at Sheerness, the pennant being hoisted by Master John Jones, for Capt. S. G. Cresswell. In consequence of ill health, Capt. Cresswell has been superseded by Capt. Richard W. Courtenay. The vessel's fitments are being completed with the greatest rapidity, and she will proceed to sea.

It is rumoured that the Pelorus will shortly be commissioned and follow the Scylla to China. There is no truth in the statement that a regiment would be sent direct to China from England. Reinforcements are proceeding to New Zealand and India.

Capt. George H. Richards has been appointed by the Board of Admiralty to be the new Hydrographer of the Admiralty, vice Rear-Admiral John Washington, F.R.S., deceased. Capt. Richards entered the navy in November, 1832, passed his examination in March, 1840, and, after serving as mate of the Caledonia, 120, flag-ship at Plymouth, was promoted to lieut. July 12, 1842. As lieut. he served from the date of his promotion until the close of 1845 in the Philomel, 6, Commander B. J. Sullivan, employed in surveying service in the Brazils. He was promoted to commander November 18, 1845, and was employed as Second Captain of the Acheron, steam surveying vessel, Capt J. L. Stokes, in the East Indies and New Zealand from October, 1847, until the close of 1851. He was appointed Second Capt. of the Assistance discovery ship, Capt. Sir Edward Belcher, C.B., February 10, 1852, and was employed in the Arctic searching expedition until the close of 1854. He obtained post rank October 21, 1854, and has commanded the Plumper, 12, and the Hecate, 6, employed in surveying service in the Pacific since December, 1856. The Hecate was at Sydney, New South Wales, by the latest advices, where she arrived on the 26th of June, and was under orders to sail for England on the 23rd of July, *via* Batavia and Cape of Good Hope. She may be expected to arrive in England about January.

The *Gazette* contains a notice to the effect that the distribution of the portion due to the officers and crew of Her Majesty's ship Bustard of the proceeds arising from the sale of certain junks captured at Chusan on the 22nd of May, 1860, commenced on Tuesday, the 22nd inst., in the Prize Branch of the department of the Accountant-General of the Navy.

The Pioneer, 6, screw despatch vessel, Commander F. C. Robinson (acting), has arrived at Spithead from the Australian station, after a long passage, having sailed for England from Sydney on the 12th of April last. Mr. Phillips, late Paymaster of Her Majesty's ship Eclipse, a few naval nvalids, and two naval invalids from the Tien-tsin, Commander Nicolas, received on board at the Cape of Good Hope, came to England in the Pioneer as passengers. The Pioneer was commissioned at Portsmouth in May, 1859, by Commander May, and proceeded to China. While on that station, Commander May received his promotion to post rank, and was succeeded by Commander O'Reilly, who remained in the ship until after her arrival on the Australian station, to which she had been detached from the China squadron. Having lost his life by an accident while on horseback ashore at Brisbane, Commander O Reilly was succeeded by first Lieut. Robinson, who brought the vessel home to England. The acting rank of this officer will doubtless be confirmed by the Admiralty on paying the ship out of commission.

A court-martial was held on board the Victory, stationed at Portsmouth, for the purpose of trying Mr. James Fetley Syme, assistant paymaster on board Her Majesty's ship Pioneer, on the charge of being fraudulently deficient in the public money entrusted to his care to the amount of £42. 12s., and further, with having altered his cash accounts so as to represent a balance of £314. 8s. as only £276. 15s. 11d. The court found the prisoner guilty, and adjudged him to be dismissed the service with disgrace.

It is announced that a considerable reduction will shortly be made at Chatham dockyard by the discharge of several hundred boys and men. The reduction will affect the hands belonging to all the departments, and will, in the first instance, include a large number of the hired men who have been taken on during the last few years. The policy of discharging any number of mechanics employed on the iron frigate Achilles is questionable, seeing that the iron frigate Bellerophon and the iron-cased ship Lord Warden have been delayed in consequence of there being no hands who can be spared from the other ships in progress. The whole of the dockyard mechanics engaged on the Archilles were formerly shipwrights employed on the wooden ships, and since trained at the cost of considerable time and labour to become workers in iron.

Monetary and Commercial.

CITY, FRIDAY, Sept. 25.

An upward movement has also taken place in joint-stock banks; Chartered Mercantile of India, London and China, £25 shares have risen to £70, while a few months since they were at £35. It is reported that this rise is owing to an intended issue of new shares on favourable terms to the present holders India, Australia, and China £20 shares are at £38, notwithstanding that no dividend was paid last year, owing to the celebrated opium losses of their Hong Kong branch, this bank not having, like the Oriental, Mercantile, Agra, and others, a substantial reserved fund. The conjecture for such an unwarrantable rise is that a combined influence has been brought to bear on the Stock Exchange. Oriental £25 shares are steady at £60. Hindostan, China, and Japan, having all their £25 shares paid up, have emerged from below par to 4 prem. A manager for the Shanghai branch has been advertised for, and advices are shortly expected of the opening of the Hong Kong branch.

Money has been tighter and rates of discount have been quite up to the Bank rate of 4 per cent. The rates of discount now current in the chief continental cities (in the open market) are as follows, viz.:—Paris, Berlin, and Brussels, 3½ per cent.; Vienna, 5; Amsterdam, 3; Hamburg and Frankfort, 2½; Turin, 4½; and St. Petersburg, 6 per cent.

The following financial and other undertakings have been announced since our last issue:—

The Star and Garter Hotel Company (Limited). The prospectus has been issued of this undertaking, capital £120.0 0, in £10 shares, for the purchase and improvement of the famous hotel at Richmond.

The Imperial Royal Privileged Union Bank of Austria, under a concession of ninety years, with a capital of £2,000,000 sterling, in £100 shares, for the purpose of applying the principles of English banking in the management of the import and export trade of Austria.

The English and Russian Bank for carrying on banking business in any part of Russia, has received a full and final confirmation from the Emperor of Russia.

The shareholders in the English, Belgian, and Netherlands Bank have passed a resolution in favour of amalgamating that institution with the Union Bank of England and France.

A general meeting of the shareholders of the Oriental Bank Corporation is called for the 22nd October, when an interim dividend will be declared for the half-year ended June last. It is intended to declare an interim dividend of not less than £1. 15s. per share.

The capital necessary for carrying out the Atlantic Telegraph enterprise in the best manner has now been provided. Tenders and specimens from eight contractors were received in reply to the company's advertisement, and were all submitted to the scientific committee appointed by the directors, consisting of Captain Galton, R.E., Professor Wheatstone, Professor Thompson, Mr. Wm. Fairbairn, and Mr. Joseph Whitworth. This committee has sent in its report, unanimously recommending the board to accept the tender of Messrs. Glass, Elliot, and Co. The directors have adopted the recommendation, and entered into a contract with that firm whereby the latter are bound to manufacture a cable of the best description, to be approved by the scientific committee and the board. They also undertake to lay the cable across the Atlantic in the summer of 1864. The manufacture of the cable has already commenced.

An official notice has been given of the intended distribution of the final assets of the South Sea Company, which will be conducted for one month, commencing on the 13th of October next, at the Banking-house of Messrs. Bosanquet, Franks, and Co. The amount available is a little over £30,000, and it will be fully applied in paying to the proprietors 1⅝ per cent. upon their capital.

The India Council have given notice that holders of India Four per Cent. Debentures who have assented to their conversion into "India Four per Cent. Stock" are required to surrender their debentures at the Bank on or before the 1st of October next, and to state at the same time the names of the parties for whom the stock is to be registered. Persons wishing to change their stock for certificates to bearer with Coupons attached may do so on or after the 8th of October next. Debentures which are to be paid off on the 8th of October must be left at the Bank for examination three days previous to payment being made.

The *Kirkham* has left with an instalment of about 187 miles of cable for the Persian Gulf Line. The *Assaye* will leave in a day or two with a further instalment, to be followed shortly by the *Tweed*, *Cospatrick*, and steamer *Charente*.

A meeting of the Red Sea aljas Telegraph to India Company, who are still proprietors of the lines through Egypt, was held on the 18th inst. The chairman stated that all outstanding engagements had now been liquidated, and the directors were still engaged in negotiating for the remaining property and assets of the company. They recommended a dividend at the rate of 5 per cent. per annum, free of income-tax, for the half-year ending the 30th of June, which would absorb £1,135, leaving a balance of £115. The directors had received the concession for the construction of the El Arish line, and a new company had been registered, under the title of the Syrian Telegraph Company, by which it could be carried out whenever it was advisable to do so.

The *Sea Queen* steamer, belonging to Messrs. Pile, Spence, and Co., has arrived at Liverpool from Matamoras with a full cargo of cotton. This is the third vessel of their line of steamers. The second was the *Peterhoff*, which Judge Betts, of New York, recently condemned, on the grounds of her papers being simulated and destination pretended. The *Gipsy Queen* was the first vessel, and the *Sea Queen* the third, and it appears both have made the voyage out and home.

The biddings for £300,000 in bills on India took place at the Bank. The proportions allotted were—to Calcutta, £163,500; to Bombay, £120,000; and to Madras, £16,500. The minimum price was declared to be 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay, being a reduction of ¼d. in the case of Madras. The applications within the limits amounted to £2,230,000 Tenders on Calcutta at 1s. 11⅝d. will receive about 6 per cent., and on Bombay at 2s. about 87 per cent. All above these prices and all their tenders on Madras will receive in full.

Owing to the progress toward a restoration of order in Mexico, a considerable increase in the supply of dollars is expected by each future monthly packet from that country.

A call has been made of £5 per share on the shares of the British and American Exchange Banking Corporation, of which Mr. Sam Gray, late of the Oriental Bank is secretary.

The steamer *Bahama* sailed again with a general cargo for Shanghai to be followed next month by the *Sea King*.

The Messageries Impériales steamer *Peluse* left Marseilles on the 19th inst. with 86 passengers, 323 packages of merchandise, and £280,000 in specie for India and China, and 78 passengers, 711 packages of merchandise, and £78,000 in specie for Alexandria.

Intelligence has been received of the loss of the *Ocean Mail* outside Woosung. Also of the destruction of the American ship *Constitution*, from New York to Shanghai with coals.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 20th inst. was—In gold: To Malta, £1,800; to Alexandria, £62,000; to Mauritius, £45,000; to Ceylon, £3,200; to Madras, £695 10s.; to Calcutta, £6,500. In silver: To Madras, £2. 6s. 0d.; to Singapore, £6,900; to Hong Kong, £8,412. 10s. 0d.: to Foo-chow-Foo, £1,250; to Shanghai, 21,460. Total in gold, £119,195. 10s. 0d.; in silver, £38,024. 16s. 0d.

ARTICLES OF IMPORT.

TEA.—There is not much alteration to notice in our market during the past fortnight, the arrival of the Fiery Cross and the very large public sales without reserve which commenced on the 15th inst. have chiefly occupied the attention of the trade. The Kaisows, ex Fiery Cross, proved to be much of the same quality as those ex Bahama. A few of the extra fine in half-chests and boxes found buyers from 2s. 9d. to 3s.—some really fine chests at 2s. 7d., but the bulk of the cargo met with but little attention from the trade or exporters, and a large portion remains unsold. The quantity offered without reserve comprised nearly 20,000 packages, and considering the large quantity, prices, although in many instances quoted lower, were fairly maintained, whilst since the auctions have closed there has been some demand at the low rates now current. Low and dusty kinds of Congou have been fairly maintained, as also the fair to good common kinds of Congou with leaf. Fair to good Sinchune-kai kinds, and fair Kaisows of old import have been taken to some extent, but prices have ruled ½d. to 1d. per lb. lower. Fair to good Ho-Hows and Ningchows have sold from 1s. to 1s. 3d. per lb., being again rather lower prices. Second-class Honams, Monings, and Wopaks have been saleable from 1s. 4d. to 1s. 8d. per lb., being about former value; small parcels of superior grade continue to be taken for export at 2s. to 2s. 4d Fine Kaisows of old import remain much as before:—In the new seasons the sales, ex Bahama and Fiery Cross, show a further decline of fully 1d. per lb. Tayshans remain as before. Oolongs have sold at public sale at very low rates, say 11d. to 1s. 1d. for fair to good. Fine are rather more inquired for. Souchongs and Flowery Pekoes show no improvement. The Scented Teas business has been difficult. Both Canton and Foo-Chow make of Capers and Orange Pekoes, except of any parcels of really fine quality, have sold at a further reduction of 1d. per lb.; fine have commanded former prices. Uncoloured Japans have sold to some extent at irregular prices, but on the whole ½d. per lb. lower. There have been no further sales of Indian Teas. In Green Teas there has been a good business done, chiefly for export in Young Hysons, whilst the home trade have been buyers of Gunpowders. Prices for all kinds have been fully maintained, except for Japan Young Hysons, large sales of which have been made, showing a decline of fully 1d. per lb. Fine Canton made Gunpowders have been saleable, but the common to good kinds have been neglected, and prices have ruled in favour of buyers. Young Hysons are without inquiry; a few superior have been offered at 1s. per lb., but without finding buyers. The public sales comprised 36,0.8 packages, of which 20,113 packages were sold, 19,701 packages being without reserve.

SILK.—The notice of this market will be found in our latest.

COFFEE.—Market quiet, and abundantly supplied: of 1,200 bales and half-bales at auction, about one-third sold at 93s. 6d. to 97s. per cwt. for good to very good, and 89s. 6d. to 92s. 6d. low middling to middling. We quote Ceylon, plantation, 75s. to 110s.; common, 68s. to 74s.

RICE.—This market was flat and inactive until recently, when an improved demand sprung up, particularly for the lower kinds, leading to extensive transactions. In Java no business; quotation, 9s. 6d. to 19s.

SAGO.—Firm; but of 658 boxes at auction only a small proportion sold at 22s. to 23s. 6d. per cwt. for middling to fair small. Sago Flour: Considerable business has been done at gradually advancing prices up to 15s. 6d. per cwt.; and of 3,459 bags at auction about two-thirds were placed after the sale at that figure.

SPICES.—Cloves: Zanzibar have brought former terms, but of 1,035 bags at auction only one-third sold at 3¼d to 3⅝d. per lb. for ordinary to good. No change in other descriptions. Ginger: Calicut and Cochin has again sold irregularly; the better descriptions being in some instances materially cheaper; of 2,512 packages at auction two-thirds sold at 100s. to 111s. per cwt. for good bold, and 60s. to 75s. low small to fair. Cinnamon: We quote 1st sort 1s. 2d. to 2s. 3d. per lb.; 2nd sort, 1s. 1d. to 1s. 9d.; 3rd sort, 11d. to 1s. 5d.; 4th sort and jungle, 9d. to 1s. 1d.; moderate trade at full prices.

COTTON.—Prices of this staple show a further and extraordinary advance; demand has been excessively eager for all descriptions, and for arrival as well as on the spot, and business only restricted at all by the extreme firmness of holders. We quote Surat at 1s. 5¼d. to 1s. 11½d. per lb.

HEMP.—Manila: Firm and active, at an advance of fully £1 per ton; large business done at £27 15s. to £30 for middling roping to Sorsogon. 2,755 bales at auction, mostly sold. Sunn: Auctions have included 517 bales Kurrachee, about two-thirds sold at £25. 5s. to £34. 10s. per ton for ordinary to fine; and 56 bales Bombay sold at £25. 10s. to £26.

JAPAN WAX.—Saucers firm; and 330 boxes sold at auction at 66s. to 66s. 6d. per cwt. for fair; block in few hands, and inquired for at 2s. advance. Current quotation, 58s. to 70s. per cwt.

TIN.—This market has improved; Straits have gradually risen £3 per ton. A good deal of business has been done, and the metal remains firm. We quote Banca £123 to £124 per ton; Straits, £118 to £120.

MISCELLANEOUS.—Camphor: China, £7. 6s. to £7. 17s. 6d.; business very limited, and almost confined to Japan at £7, 12s. 6d. per cwt. down to £7. 7s. 6d., at which lower figure it is still offering. Cassia Lignea: Firm at 84s. to 92s. per cwt., but quiet; Buds, 270s. to 290s.; Cocoa-nut Oil. Only 40 casks Cochin sold. We quote China and Japan, 42s. and 65s per cwt.; market firm, but without trade. Gums: These continue to command full prices. Couries: Firm; sales realised 4½d. to 5¼d. per lb.; for straw to middling second quality. Turmeric: Prices after rallying to 33s. to 34s., have subsided to 30s., is now less firm; of 676 barrels at auction, half sold at 17s. 6d. to 25s. 6d. per cwt. for fair to good lump, and 9s. to 10s. dust. Dragon's Blood: Of 39 cases at auction, a few only sold at £7. 10s. to £7. 12s. 6d. per cwt. for fair lump, being dearer. India rubber: Fair business at 1s. 3d. to 1s. 6½d. per lb. Rattans: Have realised high prices. Sapan Wood: Siam firm; 34 tons sold at £8. 15s. to £9. 17s. 6d.; 48 tons Manila retired. Shells, Mother o' Pearl: Offers at auction retired; Manila, 75s. to 90s. Sticlac: Siam, flat. Elephant's Teeth: 70 lbs. and upwards; £40 to £42; 40 to 60 lbs., £37 to £39, Siam ivory in demand and very scarce. Turmeric: China scarce, and wanted; quotation, 16s. to 35s.; Java retired. Vermillion: Late sales brought as high as 2s. 2d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 10s.; nail rod, £8 to £8. 10s.; hoops, £9 to £9. 15s.; sheets, single, £10 to £10. 10s.; Staffordshire bars, £8. 5s to £8. 15s.; rails, £6. 15s.

STEEL.—Swedish keg, £16 to £16. 10s.

COPPER.—Sheet and Sheathing, £102 per ton; yellow metal, 8½d. to 8¾d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. per box.

LEAD, &c.—English pig, £20 to £20. 10s.; shot, patent, £23. 10s.; sheet, £21; spelter, £18. 12s 6d.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The following comments on the market are from Messrs. French and Smith's circular:—Iron of all descriptions is advanced. Scotch Pig are in demand, and the exports are very large. Welsh manufacturers are all well employed. Staffordshire makers are very careful in taking orders, some having sent out notices that they can only book subject to next quarter day's prices. Tin: English is but moderately inquired for. Straits has been in active demand for cash, both for shipment and home consumption, and the price is improved, remaining firm at 118s. cash, 120s. three months' prompt, for fine quality. Banca is quite neglected, the quotations unaltered. Tin Plates: Makers continue well employed. For Charcoal a moderate demand. For Coke there is very active inquiry; and as Coke Bars will probably be dearer, Coke Plates are quoted 6d. per box higher. Lead looks a shade firmer, but no alteration in prices. Spelter is easier.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

In outward berth freights there is no alteration to report. Coal freights to China are firmer, the last advices respecting homeward freights being unfavourable, and a large amount of tonnage being in the China seas.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 30s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £44 and £2. For Shanghai: £53 and £2. 10s. 0d. to £2. 12s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2, nominal. For Singapore: £28 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

DEAL, SEPT. 20.—The Western Continent, from Sunderland to Shanghai, has borne up from Dungeness with loss of fore sail.

The American ship Constitution, from New York to Shanghai, has been burnt by the Alabama.

At ST. HELENA, July 30.—Wandrahm, Meyer, from Penang, and sailed 30th for New York. Aug. 2, Hound, Nash, from Foo-chow-Foo, and sailed for New York; Gertrude Maria, from Padang; 7, Marchioness of Londonderry, Kenney, from Shanghai, and sailed 8th for London; Kandanghauer, Feelt, from Batavia.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,
METALLIC PEN MAKER TO THE QUEEN.

BEGS to inform the Commercial World, Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York, and at 37, Gracechurch-street London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

HOLLOWAY'S OINTMENT and PILLS.—BE ADVISED.—Sufferers from disease would act wisely in trying these noble remedies before they abandon further efforts for recovering their lost or fading health. The momentous question of enjoying health or enduring illness should determine all invalids to use Holloway's healing Ointment and purifying Pills before yielding themselves up to despair. The Ointment not only cures all skin diseases, bad legs, outward sores, and superficial inflammations, but restrains deep-seated ailments of the throat, chest, and bowels, when it is well rubbed externally over those parts. From this Ointment's known power to quell irritation, it was supposed it would be eminently useful in checking diphtheria, diarrhœa, and dysentery, a prediction which time, experience, and reflection have verified.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa, &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queen-road, Hong Kong.

SCINDE RAILWAY (INDUS STEAM FLOTILLA PUNJAUB AND DELHI RAILWAYS) COMPANY.

At the Fifteenth Half-yearly General Meeting of the above Company, held at the London Tavern, Bishopsgate-street, in the City of London, on Friday, the 25th Sept., 1863 (W. P. Andrew, Esq., Chairman of the Company, presiding), the following Resolutions were carried unanimously:—

1. That this Meeting receive and adopt the Report of the Directors.

2. Resolved,—That the Declaration of Forfeiture made by the Directors of the Scinde Railway Company on the 26th August, 1863, of the Share in the Scinde Railway numbered 24,905, be hereby confirmed, and that the Share be sold in such manner or otherwise disposed of as the Directors think most advantageous to the Company.

3. Resolved,—That the Declaration of Forfeiture made by the Directors of the Scinde Railway Company on the 26th August, 1863, of the Five Shares in the Indus Steam Flotilla, numbered 7,382 to 7,386, be hereby confirmed, and that the said Shares be sold in such manner or otherwise disposed of as the Directors think most advantageous to the Company.

4. Resolved,—That the Declaration of Forfeiture made by the Directors of the Scinde Railway Company on the 26th August, 1863, of the Shares in the Punjaub Railway, numbered as follows, viz.:—

Shares.			Nos.
99	..	...	22,867 to 22,926 68,746 to 68,775
30	...	..	23,500 to 23,529
90	...	...	52,624 to 52,713
360	...	...	57,535 to 57,894
12	...	...	61,564 to 61,575
465	...	...	53,707 to 54 171
30	...	...	17,224 to 17,253
60	...	...	53 407 to 53,466
30	...	...	68,776 to 68,805
30	...	...	64,705 to 64,734

be hereby confirmed, and that the said shares be sold in such manner, or otherwise disposed of as the Directors think most advantageous to the Company.

5. Resolved,—That Edward Thornton, Esq., C.B., be appointed an auditor of the Company in place of Philip Anstruther, Esq., deceased.

6. That the best thanks of this meeting be tendered to the Chairman and Directors for their continued attention to the interests of the Company.

7. That the cordial thanks of this meeting are due to W. P. Andrew, Esq., for his courteous conduct in the chair this day.

W. P. ANDREW, Chairman.
S. H. R. PARRY, Acting Secretary.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

Summary of News from the Far East.

JAPAN.

KANAGAWA.

Dates are to the 7th August. On the 6th the British Admiral Kuper left in the *Euryalus*, with the *Pearl*, *Argus*, *Perseus*, *Coquette*, *Racehorse*, and *Havoc* accompanying the *Euryalus*. The object of the expedition was supposed to be the enforcement of the claims made by the British Government on the Prince of Satsuma. Colonel Neale and his staff accompanied the expedition.

Although the news received via San Francisco from Japan is later than the present mail advices, the information to hand suffices to qualify the American telegraphic announcement that British men-of-war which left Yokohama to punish the Damios, had been repulsed, and returned with considerable loss. Half of the British fleet had sailed for Kagosima, which is in Kiusiu, the most southern of the four islands which constitute the Japanese empire. It is at Kagosima, near Cape Chikakoff, that Prince Satsuma has a castle, and this it is proposed to attack. It will be recollected that we pointed out this place some months ago as likely to be attacked and destroyed by our ships-of-war, as a measure of vengeance upon Satsuma. The expedition sent against it consist of seven vessels, while other seven remain in harbour at Yokohama. Previous to this expedition, the following were the men-of-war in the harbour of Yokohama on August 1st:—Her Britannic Majesty's vessels *Euryalus*, *Pearl*, *Perseus*, *Encounter*, *Havoc*, *Kestrel*, *Bouncer*, *Hesper*, *Coromandel*, *Argus*, *Racehorse*, *Centaur*, and *Coquette*. His Imperial Majesty's vessels:—*Semiramis*, *Dupliex*, and *Monge*. The United States vessels:—*Wyoming* and *Jamestown*; and His Netherlands Majesty's ship, *Medusa*.

The *Japan Herald* says:—"The *Coquette* had returned from her cruise through the Inland Sea. All the sensation about her has come to nought. She entered the Inland Sea by the Bungo Channel, passed up and anchored in front of Cho-fhou for some hours; did not go through the Straits; cruised along the shores of Suwo, Aki, Bingo, Bitjou, Bizen, and Arima; anchored off Hiogo, and returned through the Kino Channel, without having encountered the slightest adventure.

The Tycoon had returned to Yedo by sea on July 31st in the *Jinkee*, attended by three other steamers, thus dispelling a rumour that had gained ground with foreign residents that he was detained in durance vile by the Mikado at Miako. His visit to the spiritual Emperor is of course calculated to produce the impression amidst the natives that the decree for the exclusion of foreigners is the issue of their joint deliberations. Changes had been made in the Government at Yedo, by which the party least hostile to foreigners retires from office. Some time after the first attack on foreign vessels at Shimonoaski, a member of the Second Council of State called upon Colonel Neale. On being asked whether he had any communication to make, he replied in the negative. Colonel Neale then told him that, if he had no communication to make, he, at least, had one to receive, which was to the effect that if the Japanese made such a bad use of the steamers we had sold them as to fire on merchant vessels, we should have to take them all back. It is feared that this statement will check the demand for English steamers which has lately been springing up in Japan.

A most unprovoked assault had been committed upon a party of gentlemen at Kanagawa by an armed Japanese, and they had been compelled in self defence to use their pistols. The particulars of this affair are, we believe, simply these. A party of several residents and visitors were down at Kanagawa, and having enjoyed a lounge at the rest-house on the top of the hill, they were preparing to return homeward, some of the party in a boat, three on horseback. These three were already mounted and had started homewards, when they thought to give some of the heaviest of their habilaments into the charge of the others who were proceeding in the boat. For this purpose they turned into an open jetty, and were returning into the main road, when they were accosted in an insulting and threatening manner by an armed Japanese. One of the party asked him "what was the matter?" when he drew his sword and rushed at him. They endeavoured to pass on to avoid any disturbance, but the jetty being narrow and blocked up by stumps of old trees, the fellow continued to endeavour to get nearer them, slashing at them with his sword. The one whom he was most immediately assaulting then fired at him, but his pistol missed fire. The man repeated his mad onslaught upon one of the others. They being brothers, and the eldest seeing the life of his brother in jeopardy, fired his pistol, at the some moment the other fired also, and the man's course appearing to be arrested, they were able to pass onward.

Her Majesty's Consul had advised British residents to abstain from these excursions. In his circular on the subject, he states—"It is a matter of deep regret that visits to localities within the treaty limits should no longer be safe and pleasurable as they ought to be, still this state of things ought not to exist in a country convulsed by internal dissensions, where the very presence of foreigners is made the stalking-horse of the most envenomed political feuds. The position of a place within the treaty limit does not justify private individuals in incurring unnecessary peril in resorting to it, or of exposing, for their personal gratification (however innocent under ordinary circumstances), the political and commercial relations of their own government, and the communities they belong to, to grave and difficult complications."

The British Cemetery was being put in order. As far back as the commencement of January last, at a meeting of British residents on Church matters, the very disgraceful condition in which the burial ground then was, was brought under consideration by Mr. J. C. Fraser. The then Consul, Captain Vyse, said he had long had the matter under consideration, and had caused plans to be prepared, &c., and had communicated with the Governor, "but nothing had been done." Nor was anything likely to be done so long as we relied on the ever procrastinated promises of the Japanese authorities. Mr. Von Brandt, the newly arrived Prussian Consul, happily went the right way to work, and eschewing all idea of reliance upon the hope to induce the Japanese to perform their consideration, for which we pay them some enormous rental, he sent round amongst the residents subscription and donation lists, which were liberally responded to, the donations amounting to $355, and the annual subscription list to $301. The immediate objects are the repair of the outside fence, the erection of a stone gate-way and a porter's house, the clearing the ground, the formation of proper paths, and the repair of the tombs; the planting of flowers and shrubs will be postponed till next spring. The sum collected appears sufficient for all these purposes, and Messrs. Brandt and Van der Voo, the working committee, have already effected a vast improvement in the ground.

Several changes had taken place in the various Consulates. Captain F. H. Vyse had been removed to Hakodadi, and Dr. C. A. Winchester, on the 1st of April, took his post as Consul at Kanagawa. Colonel Neale, having regard to the increased and increasing business of the Consulate, had appointed M. O. Flowers, Esq., Acting Vice-Consul, pending the approval of the Foreign-office. Mr. Morrison had returned to his post at Nagasaki. Mr. Von Brandt, who was formerly attached to the Prussian Embassy which concluded in 1860-1862 treaties with China, Japan, and Siam, took charge of the Prussian interests, as Consul, on Jan. 1. There already, we believe, are seventeen Prussian subjects registered. D. de Graeff von Polesbrook, Esq., long resident at Yokohama as Consul, has taken charge of Netherlands Acting Consul-General.

The following is a translation of the proclamation issued by Admiral Jaurez referred to in the account published in our last:—

"The French Admiral makes it known to the inhabitants of Nangato that their Prince Matsdaira Daizen no Daibo, having shot at a vessel under the French flag the other day without any reason, he, the Admiral, considering this a grave insult done to his country, comes to day to punish this Prince for his insolence. However, the Admiral, not having the intention of hurting the peaceable inhabitants of Nangato, neither them nor their families, nor to cause them any damage so long as they do not offer him any resistance, invites the said inhabitants not to have any fear. So far from having anything to fear from us, on the contrary, those who will come on board the French ships will be received with kindness, as always has been the case with the Japanese, particularly since a treaty of friendship has been concluded between the two empires. Those who bring provisions will be properly remunerated. This notification is presented with kind intentions. French date: 7th month, 19th day, 1863. Japanese date: 6th month, 4th day, 3rd year of Boenkiou.—Signed, C. Jaurez."

Exchange had fluctuated a good deal. An important and beneficial change in the medium of the business with Shanghai had, by the perseverance of some few of the houses, been brought about. Bills of Exchange in Shanghai Taels, upon that place, are now the rule, instead of being nearly unknown, and quite the exception, as they were during the season 1861-62. In that year Bills of Exchange were drawn on Shanghai in Mexican Dollars, at a discount on the draft. This question had been agitated since the commencement of the preceding March, and the practicability of doing so was pretty generally acknowledged by the commencement of July. During this month but small business was done. In August and September there was an increased demand to money, and good business done at steady rates. In October a good business was done at higher rates, and slightly more fluctuating. In November the rates were more steady and a good business was done. In December a large amount of transactions were closed. In January the business declined, and in February and March only a very moderate amount was effected, and rates were exceeding fluctuating. In the succeeding month of April a fair business, partly attributable to the establishment of the banks (to which we shall refer more at length hereunder), and partly to the political state of affairs, was done. In May there was a fair business, principally in taels and sterling. In June only a very moderate amount of business was done, owing to the extent to which the political atmosphere was overcast during the earlier part of the month.

The church, which should have been finished months ago, is still far from ready for occupation. The edifice, when completed, will have convenient sittings for 180 persons. There was originally a mal-construction in the roof, by which the safety of the whole building was imminently imperilled; the ill-results of this are said to be almost, if not entirely, obviated by long iron rods introduced into the roof, and now tying the walls together. Six large Ktaki wood pillars have been recently added to prevent further lateral pressure and give full support to the heavy roof. Steps are being taken for placing in the church a memorial window to the ill-fated C. L. Richardson.

Municipal affairs at Yokohama were at a dead lock. "Happily," says the *Japan Herald*, "the settlement is founded on a gravelly soil which somewhat absorbs the deleterious fluids which are fermenting in the drains around. Unfortunately the community is like the gravel, and the different composing bodies take a long time to fit into one another."

A general gloom had been cast over this settlement by the sudden and unexpected death of Edward Rigby, Esq., a partner in the house of Ross, Barber, and Co. The deceased gentleman had been somewhat unusually exposed to the heat and the sun, which induced an indisposition, at first treated as but of little

Digitized by Google

consequence, indeed, on the following day, he was able to be with his friends at the club; it however terminated fatally in three days.

NAGASAKI.

From this port we have dates to the 12th August. The Governor of Nagasaki having resigned on account of the restrictions placed upon foreigners, the appointment was offered in turn to two of the highest Princes, but refused by both. Two Diamios were then sent down as commissioners, but after visiting the men-of-war in harbour, and taking a general survey of affairs in the place, they also refused to assume charge. The old Governor returned on the 8th, and, it would appear, received peremptory orders to require the instant departure of all foreigners from the port. He immediately communicated with the Consuls and commanders of the men-of-war in harbour, and after a consultation with them decided on awaiting further orders from the Mikado.

Nothing is being done. Trade has come to a stand still, exports not being obtainable. On the 5th a very heavy gale was blowing, and there was every indication of a typhoon to the eastward in the vicinity of Kanagawa.

There had been four fatal cases of cholera on board the Russian gun-boat *America*. There had not, however, been any trace of the disease on shore. The native merchants still hesitate to bring their goods into market, but, despite the apprehension felt by the Japanese, the foreign residents continue to live on shore. It is, however, probable that they will have to betake themselves to the shipping in port. There were three men-of-war in harbour: viz., the *Rattler*, *Leopold*, and *America*, 20 merchant vessels and one foreign steamer.

On the 9th August an order was received from Miaco to the effect that in future no Princes or Daimios are, upon any pretext whatsoever, to purchase any foreign craft, whether merchant vessels or men-of-war.

CHINA.

PEKING.

From Peking we hear that Maou-hung-ping has been gazetted Governor-General of the provinces of Kwangtung and Kwangsi. He is said to be a young man of much ability, and is probably one of the Tseng Kwofan's *protoges*, so many of whom have proved good officers. Since the Danish treaty was signed nothing of consequence has transpired in the capital.

SHANGHAI.

The London Mail of June 26th arrived on August 11th. The dates from Shanghai are down to the 20th.

The *Friend of China* says:—

"There is hardly an engineering establishment in town, we believe, but holds the Imperial Government heavily in debt for repairs to steamers. Applications for payment are met week after week with stop a little—stop! Great was the disgust, therefore, the other day when it became known that Messrs. Turner and Co.'s hypothecation, on the newly-arrived steam Taiping hunter *Thule* (or *Tool*, for shortness), to the extent of 42,000 taels, was liquidated by Mr. Lay's orders, at the Haiquan Bank in hard coin."

The following from the *North China Herald* details Major Gordon's movements since we last wrote:—"After the taking of Wokong, in which city we remained only eight or nine hours, we set out on our return to Quinsan, leaving the city in charge of mandarin troops. On our way back, finding that there were not sufficient men to hold the Kahpoo stockades, Gordon determined to remain there himself, with 100 of the Ningpo battalion and a good supply of ammunition, until the mandarins sent more of their men. He returned himself the next day to Quinsan, and the troops followed three days afterwards. Gordon went on at once to Shanghai, but, receiving news of Burgevine having joined the rebels, rode back the same night, and, taking 150 men, went to the stockades I have already mentioned to watch the enemy. The first night after his arrival he was attacked by a force accompanied by a good number of Europeans, but Gordon's men beat them off in good style. The following day we sent him a reinforcement of 200 men, and soon after their arrival the rebels again attacked him, led, it is believed, by Burgevine. At any rate, they had a 12-pound howitzer, which the latter had brought with him, and which belongs rightly to the Imperial Government. They had two ponies harnessed to it, and moved it about capitally, but they could gain no advantage. The day following, Gordon marched out in the face of some of 10,000 rebels, took and destroyed two strong stockades, and broke down several of their bridges. There need be no apprehension as to our holding Quinsan. If the rebels attack us, they will get a lesson which will effectually deter them from any further attacks. Two Europeans were arrested, and brought into Quinsan by the mandarins. They were on their way to join Burgevine, but walked into some stockades held by Ching, by mistake, and are to be sent to Shanghai. One of them, lately in this service, is a discharged soldier."

The utmost support seems to be afforded to the gallant major by the British general, in the way of marching troops over the country within the 30-mile radius. We are glad to have heard no further hints as to Gordon's proposed resignation. It is certain that if unfair treatment compels him to resign his command, few British officers would be found willing to succeed him, and a great portion of our support would be drawn from the Imperial cause. The rebels might then repeat their encroachments until they menaced Shanghai, when the whole programme of the last two years would have to be repeated.

We regret to notice the death of Mr. Cunningham, Superintendent of the Shanghai (American) Steam Company.

One of the steamers of the company, the *Che-kiang* has had her trial trip at Hong Kong. The following is a list of the company's steamers:—

Foh-Kien, 1,947 tons, W. O. Johnson commander, running between Hong Kong and Shanghai, *via* Coast Ports.

Hu-Quang, 1,325 tons, J. P. Roberts commander, plying between Shanghai and Hankow.

Che-kiang, 1,264 tons, E. D. Wadsworth commander, will ply on the Yang-tsze River after arrival at Shanghai.

Kiangsi, 1,100 tons, C. E. Simmons commander, plying between Shanghai and Hankow.

The above are paddle steamers, the four following are screw-propelling:—

Shansi, 1,006 tons, J. A. Perkins commander, plying between Shanghai and Hankow.

Sze-chuen, 1,006 tons, McCouch commander, plying between Shanghai and Hankow.

Pembroke, 241 tons, Cooper commander, plying between the coast ports, Japan, Tientsin, &c.

Tsat-lee, tug boat.

The company had another steamer called the *Surprise* (paddle), which was run into and sunk by the *Hu-Quong* on her way down the Yangtze, just after getting afloat.

The *Hu-Quong* ran ashore near Hankow, in October last, and was got off in May.

The tug steamer *Fame* was announced ready for towing purposes. A court of inquiry had been held on the loss of the *Ocean Mail*, which resulted as follows:—The court, after some deliberation, gave the following judgment:—That the loss of the *Ocean Mail* was to be attributed to want of sufficient caution on the part of the pilot in keeping her too close to the North Bank, and not having kept his lead going. The court severely censured him for this carelessness. The master was also to blame for not seeing the lead properly hove, when suspicious that she was too close to the bank. But the court considered that he did his best to save the wreck and the lives of those on board after the ship struck.

We extract from the *Friend of China*, the following items:—

"The Chinese authorities have printed placards in English, offering a reward of 3,000 taels for Burgevine dead or alive, and promise free pardon to any Judases of his force who will deliver him into their hands. Burgevine must feel highly flattered. Thirty pieces of silver was all that the Jews offered for the betrayal of a better man than he.

"PROCLAMATION.

"The undersigned being informed that a number of persons have been led away under false pretences by the American named Burgevine to join the rebels at Soochow, this is to give notice to all foreigners that the undersigned will, on delivery of the said Burgevine, whether alive or dead, into his custody, or that of his officers, immediately pay over to the persons so doing, the sum of 3,000 taels; and he further guarantees them against any further proceedings on account of their previous connection with the rebels.

LE-HUNG-CHANG,
"Futai and Imperial Commissioner.

"Shanghai, 12th August, 1863."

HANKOW.

From Hankow we have nothing special to record. A general gloom has been cast over the European community by the death of W. Raymond Gingell, Esq., H.B.M.'s Consul. Mr. Gingell was about immediately to leave China for home.

A letter to the *Friend of China* of 12th August, writes as follows:—

"The month of August has, up to date, been cool and pleasant; and at night we can enjoy a refreshing sleep, which is a great blessing after such trying weather as the latter parts of June and July were.

"I regret much to inform you that two of our community

Digitized by Google

have gone to that bourne from whence no traveller returns. The first was Mr. Hay, of the house of Fletcher & Co., who died after a short illness of three days; and yesterday Mr. Gingell, our respected British Consul, breathed his last at the Consular residence. Both these gentlemen were attended by Dr. Faulkner, who exerted all his skill to save; but, alas! of no avail. Mr. Gingell was buried this morning in the new cemetery, and the greater part of the community attended his funeral. The flags of all nations are at half-mast.

"We were visited by a heavy squall, accompanied with thunder and much lightning, the day before yesterday. Much damage was caused amidst the junks and small craft; but it was not of long duration, and we have again fine, clear weather, pleasantly cool,—thermometer ranging about an average of 88.

"A large subscription has been made for Madame Pearson. Her husband was much involved, and I fear the creditors will not get 50 cents on the dollar.

"The lugger *May* is detained by the Commissioner of Customs. I believe she is owned by one of your Shanghai large houses, and you may depend on it she is justly detained, otherwise we would have some 'hoggish' growls."

KUI-KIANG.

A proclamation has been issued by Tsang-kwo-fan, Governor-General of the two provinces of Kiang-se and Keang-soo, relative to the tea duties levied in those provinces. It has been the practice apparently to give mandarin buttons to large contributors, but these seem to be at a discount among the tea merchants at the riverine ports, who have adopted a plan of selling their duty receipts at the rate of 16 per cent. to more aspiring individuals. The consequence has been that the receipts, instead of being held to a large amount by a few wealthy merchants, have passed into the hands of a considerable number of individuals, who on the strength of possessing them, besiege the Government with applications for buttons. Pending the receipt of instructions from Peking, Tsang-kwo-fan has taken the wise and proper step of forbidding all applications for buttons in reward of contributions; which, as he wisely observes, will insure a proper respect for honourable distinctions. Mandarin rank cannot be expected to be held in high estimation, when it is conferred on a man for the simple reason that he happens to be a heavy tax-payer, and by the abuse even of this system, is purchasable by the moneyed aspirant for rank. We do not clearly understand whether the "local duty" which it is intended to levy in future is to be in addition to the war tax, on account of the existence of which the Governor states he has hitherto held it suspended; or is an increase to that tax levied under a different name. But, as the amount proposed is considerably less than the "local duty" authorised by the Board of Revenue, we presume it is to be levied in addition to the existing war tax, and is a punishment to the merchants for having made light of the Imperial decorations.

NINGPO.

From Ningpo we hear that the piratical fleet which had, as reported in our last issue, attacked and plundered a trading vessel belonging to an English firm, has been destroyed by four of our vessels of war in Hangchow Bay, after some resistance. No lives were lost, with the exception of a man who fell into the water, and was carried away by the current.

AMOY.

A letter from this place says:—

"We find it very hot in summer. The present one has been unusually so, and the consequence is cholera has made its appearance among the inhabitants, more especially the native portion. Several Europeans have died from it, and one died the day before yesterday of sunstroke. More of us I think would die were it not that we were blessed with a lovely healthy little island to live on, which is right opposite the town of Amoy. Some poor fellows have to live on the Amoy side, as the houses to which they belong have no residence on the island.

"Business has been rather slack lately, and the only thing which keeps it on the alert is the purchasing of tea. There have been despatched the *Eastern Chief* and *Mexicana* for London. The *Melrose* will leave for the same destination in five days hence, and the *Julia* for New York, about the same time, all with teas.

"The *Carthaye* when leaving this on the 1st inst. for Foochow and Shanghai, struck a 'whale' with her fan, and broke her shaft. She put back, and is now on the beach waiting for a new one from Hong Kong, which is expected in a few days. After completing her repairs, she proceeds at once on her voyage up the coast. It is supposed she struck a rock which was below water, and I think it likely such is the case. Only fancy their saying it was a whale! Yes, it looks very like one!"

KONG KONG.

The mail of July 10 arrived on the 17th August (38 days); and the French mail steamer, with London dates to July 17, arrived on the 26th August (40 days). The vessels of both the P. and O. Company and French Company are working with great regularity and despatch.

The following account of the Clock Tower is from the *China Mail*:—"The Hong Kong Clock Tower will form a very good subject for sober discussion on a wet Sunday afternoon. The question of 'Who is to blame?' might be languidly put, and anybody could yawn out an insipid reply to it. In case anyone who cares to know anything about the facts of the case be still in ignorance, we will give the solitary individual the benefit of our information, while we deliberately bore our five thousand three hundred and twelve other readers. The subject is so slow that we almost hope that we may make some mistake which an excellent correspondent will correct in a lively communication. We are not certain but that, to give the matter animation, we may wilfully tread on some people's toes. It seems that, years ago, that potent organisation called a public meeting was got together, and the result of the confluence was a general understanding that Hong Kong should possess a public clock duly elevated in a tower. The idea was good, as we who enjoy the fruits of that convention are well aware. The English houses backed up the plan with money, and were followed by others. The banks did not subscribe, as the agents have not authority to apply the shareholders' money to the building of clock towers. The managers themselves, being merely on salaries, did not see their way to a personal mulct, especially as their employers had not given a cent. The fact, we think, reflects upon the banking houses here, and, indeed, is not a pleasant one to the respective agents—at least, we cannot suppose it to be so. A sum having been raised sufficient to go on with, plans were advertised for, and the successful drawing was handed round to assist the canvass for subscriptions. The matter dragged along for various reasons, among which was the want of a site. The present site was at length decided upon, and the tower built, and opened with a small display of fireworks, which would have been larger had not the Postmaster-General had a heavy English mail awaiting despatch on the following day. Captains Quin and Jarman accordingly appeared on the scene, accompanied by a justice of the peace, who had shortly before been sworn in, and was that night considerably sworn at. Nevertheless the interference was so far successful as to prevent four chains of crackers from being let down from the four corners of the structure and then let off. Some display, however, was achieved, the police not being able to get into the tower. The principal actors on both sides finally saw eye to eye, and wound up, we have heard, in the Phœnix Club, with a sandwich and a glass of ginger brandy and tonic water. So opened the clock-tower on the 31st of December, 1862, at 12 o'clock midnight. If there was difficulty in opening the tower, it has been nothing to the difficulty that yet stands in the way of closing the accounts. The contractor is short 2,956 dollars; the architect has 'cumshawed' his services, and the clock, worth $2,000 more, has been given over as a free gift. Who is to keep faith with the contractor? He is actually at this moment out of pocket with the precious clock-tower. The potent public meeting which appointed a treasurer and gave orders to proceed with the work, was composed of men now in England or America. Messrs. J. Dent, Lyall, Beckwith, and Brodersen are the absentees; Messrs. Cleverly and D. Lapraik are left blooming alone, to shake hands with each other in a spirit of mutual congratulation. Will anybody solve the difficulty? A subscription list is being sent round, but we do not yet know with what success. Money, of course, will put everything to rights, and we hope, for the respectability of the town generally, that the spectacle of an unpaid Chinese contractor may be removed from our gaze. So far as we were able to perceive on glancing over the list of subscribers, one-half of the community is scarcely represented; this should be seen to, as no section of society can have much influence that keeps in the background when money is being raised for a public object. We are in hopes that the sum required may be in a

Digitized by Google

fair way of being made up before this article appears, because we know a man who is ready to say that he intended to have given something, but that, after that article in the *Evening Mail*, he will not give a cent, not liking the idea of being driven to subscribe. If we advised people not to give a penny, he would probably applaud our discernment; but we respectfully submit that such a course is not open; that the debt is in some measure a public disgrace; and that many people have talked about the tower with considerable authority who have not come forward with a subscription."

A letter about the clock-tower has appeared in our columns with the signature "A" appended. So far as we can understand the writer, he wishes to know whether the clock-tower committee have not mismanaged the matter. "A." does not say whether he has already subscribed, nor does he say whether he is ready to subscribe, if satisfied that there has been no mismanagement. However, we are promised a copy of the accounts, which will be published, and will be happy to go over with "A.," item by item.

Since we last wrote, we have heard that the manager of the Chartered Mercantile Bank has behaved rather liberally in the matter, and those who know him will not be surprised to hear it. He has, in fact, taken steps to place the banks in a better states than they now occupy in this matter.

As we promised to place the clock tower accounts before the public, we now redeem our pledge. We shall be happy to hear from "A," and to explain any point about which he may have doubts:—

The libel case of Assis de Fernandez against Murrow, the editor of the *Daily Press*, has resulted in an apology as usual. It is to be hoped that this is the last libel absurdity for at least a year. We take the following from the *China Mail*:—

"The case of Fernandez *v.* Murrow came on before a special jury. After counsel had been heard for the plaintiff, the Acting Chief Justice suggested that probably an amicable arrangement could be made; and the interval for lunch was accordingly extended, in order to let parties come to a friendly understanding out of Court. On the Court resuming its sitting, the counsel for the defendant said he was then in a position to relieve the jury from further trouble in the matter. The Attorney-General said he had it in instructions from his client to offer to the defendant an apology; and in doing so, he would say that, from documents which had just been submitted to him, he was satisfied that the plaintiff should not have had any imputations cast upon his character. His client and himself had put a different construction upon what had been written, but he would not then say what that construction was. From the very first he had instructions to speak respectfully of the plaintiff, and he was now prepared to say that his client did not any longer believe in the truth of the statements which had appeared in his paper regarding Mr. Fernandez. If he had had access to the documents which had that day been produced, his client would not have brought the matter into Court.—Mr. Pollard, on behalf of Mr. Fernandez, expressed himself satisfied with the statement of the defendant, and begged that the same publicity should be given to the retraction as had been given to the libel.—The Attorney-General said that his client would fail most grossly in his duty as a public journalist, if he omitted to report a case in which he himself was concerned. Mr. Pollard requested that the name of the writer of the libel might be given up. This was evidently the most difficult pill to swallow, but the defendant made a "bolt of it," saying that there were circumstances in which it would be wrong for a journalist to give up a writer's name, while there were other circumstances where it would be wrong to withhold it. The present, of course, belonged to the latter class, and the world was accordingly informed that Pio Marques was the perpetrator of the alleged libel. We condole with our contemporary on being so far reduced as to give up the names of his correspondents. It was too bad to crucify Mr. Marques in open court.

COCHIN CHINA.

Advices from Saigon to the 18th of August furnish the following information:—

"Admiral La Grandiere, who is at the head of the French administration in Cochin China, visited the King of Cambodia, the declared enemy of the Emperor Tu-Duc and the result of his visit has been most satisfactory. The French are now by treaty in possession of the rights of commerce with that vast country; they are authorised to work all the immense forests gratuitously, if for the service of the French Government, and on payment of a small royalty for private commerce. A French resident agent is to be established at Hondon, and that post has been confided to a surgeon in the navy, well acquainted with the habits of the country, and who will exercise a twofold influence—by his diplomatic relations, and by the practice of his surgical skill. Cambodia is the only country of the extreme East in which Christianity has been always tolerated, and M. Michel, the Bishop of that vast diocess, says that he has never had any reason to complain of the mandarins. The King received the Admiral several times, and conversed with him in a manner which testified more sincerity than has been met with on the part of Tu-Duc. The Admiral visited in detail the copper mines of Ancorre, which in extent are far beyond anything of the kind to be met with in Europe. In consequence of a scarcity of rice, caused by the insurrection of last year, having thrown a large portion of land out of cultivation, the Government has provisionally prohibited the exportation of that article."

JAVA.

BATAVIA.

The *Handelsblad* of Aug. 27, says:—"In the usual course of nature we ought at present to find ourselves in the middle of the dry monsoon with an almost cloudless sky and very unfrequent showers. We may, however, say with Sganarelle:—"Nous avons changé tout cela!" At Batavia the rains are incessant; from all parts of Java the intelligence is the same—rain. In some districts the rivers have risen beyond their banks, and in Madura, bridges, dams, and other waterworks have been swept away, and great injury done to the native houses and plantations.

The *Java Courant* publishes a "review of the trade and shipping on Java and Madura in 1862:"—

Imports in 1862		Fs.64,805,341
do 1861		76,644,140
Decrease in 1862		11,838,799
Exports in 1862		110,516,899
do 1861		109,079,352
Increase in 1862		1,437,547

2,819 vessels of a total burthen of 393,241 tons arrived in 1862, being considerably more than in 1861, and 2,954 vessels of an aggregate tonnage of 410,954 departed in 1862, being less than in the previous year.

Private accounts from the West coast of Borneo state that great discontent exist amongst the garrisons in that part, in consequence of the withdrawal of the allowances for batta and the introduction of a new tariff of food, and which here and there has given rise to acts of mutiny.

MALACCA STRAITS.

SINGAPORE.

The London mail of July 27th arrived on 28th August.

On the transfer question the *Singapore Free Press* says:—"From communications received by last mail we are enabled to mention that the negotiations between the India and Colonial Offices, for the transfer to the latter of the management of the

Digitized by Google

Straits settlement, were so far advanced that only some arrangements of detail required to be adjusted. The Council of the Secretary of State for India had given its sanction to the measure, and the Chancellor of the Exchequer, on its being shown to him that the future revenue would be sufficient to cover the expenditure of the settlement, had declared that he would interpose no obstacle to the transfer, his sole business being to see that it did not put the English Government to an expense that would oblige him to go to the House of Commons for a vote of money. As far as regards the details of the transfer, the whole might be carried through in a month or two, but as it will be necessary to pass a bill through Parliament to legalise the measure, some months must elapse before it can be accomplished, as it is too late in the session to do anything previous to the adjournment this month. It is only in February next, when Parliament again meets, that the final arrangements can be made and the transfer actually effected. The Chancellor of the Exchequer concurred in the opinion formerly expressed by the Duke of Newcastle, that the expense of the Indian convicts ought not to be thrown upon the Straits revenue. There is not much chance of any change of ministry, that may take place before February, endangering the transfer, although it might be delayed somewhat. Lord Stanley, who would probably succeed Sir Charles Wood, is well disposed to the arrangement, and even should the Straits remain under his charge for a time, he would be found much more disposed to listen to our representations, and to comply with any reasonable requests we might make to him, than we have found to be the case with Sir Charles Wood. Indeed, were it not for the much greater share of self-government which the transfer to the Colonial-office will confer, we should probably experience very little more benefit from the change than we might look for from remaining as at present connected with the Indian government, were Indian affairs to be always under the charge of a person like Lord Stanley."

The receipts and disbursements for 1862-63 have been published. The following figures have been taken from the *Free Press*:—

The Receipts during 1862-63 were as follows:—

Land		Rs. 93.674
Excise		1,230,758
Taxes		1,636
Stamps		79.651
Law and Justice		106.905
Marine		35,858
Rent of Public Markets, &c,		96,976
Miscellaneous		67,847
	Rs.	1,713,305

Besides the above, the sum of Rs. 152,950 was received from the sale of postage stamps, from postage collected, from the sale of convict jail manufactures, and from estates of deceased convicts, all of which are credited to the General Government of India, making the total collection of public monies by the Straits Government during the year Rs. 1,866,255.

The Disbursements were made as follows:—

Revenue Department.		
Land	Rs.	39,333
Customs		8,532
Stamps		7,908
Payments under Treaties, &c.		60.713
Public Works		338,093
Salaries.		
General		158,917
Ecclesiastical		26,143
Medical		26 520
Miscellaneous		9,323
Law and Justice		215 062
Police		39.996
Education, &c.		18,511
Superannuation and retired allowances, &c.		51,371
Marine		51,147
Miscellaneous.		
Suppression of Piracy		64,385
General		26.198
Public Debt		154,638
Total Local Charges		1,296,790
Government of India.		
Postal		19.940
Convicts		211,781
Military		530,963
		762,684
Imperial Government.		
Miscellaneous		11,769

The total expenditure in the Straits, on all accounts, amounted to Rs. 2,071,243, thus leaving a deficiency, compared with the amount received, of Rs. 204,988.

This deficit, however, is more than covered when we deduct the charge for convicts, which falls to be debited to the different presidencies and colonies from which convicts have been received, and the payment on account of the Imperial Government, these two items amounting to Rs 223,550.

Births, Marriages, and Deaths.

BIRTHS.

BROWN—On the 22nd Aug., at Whampoa, the wife of W. G. I Brown, of a son.

GELLATLY—On the 6th Oct., at Loughton, Essex, the wife of Peter Gellatly, Esq., of a son.

HARPER—On the 28th Sept., at Kenwood-house, Upper Norwood, the wife of George Harper, of a daughter.

PATRIDGE—On the 10th Aug., at Shanghai, on board the receiving ship **Lady Hayes**, Mrs. Daniel Patridge, of twins, a son and daughter.

RYRIE—On the 27th Sept, at Southernhay, Exeter, the wife of P. Ryrie, Esq., of a, daughter.

SIDNEY—On the 29th Sept., at Bowes Manor, Southgate, the wife of Thomas Sidney Esq., M.P., Alderman, of a son.

SIMONS—On the 1st Sept., at Pyersall-house, Singapore, the wife of **H. M. Simons**, Esq., of a son.

WOOD—On the 11th Aug., at Shanghai, the wife of **J. W. Wood, Esq., of a son.**

MARRIAGES.

DAVIDSON—MILLINGTON.—On the 1st Oct., at St. Barnabas Church, Kensington, by the Rev. Dr. Francis Hessey, William Marshall Davidson, Esq., Manager of the Central Bank of India, Hong Kong, to Annie Dames, youngest daughter of the late Robert Millington, Esq.

FRIEDERICHS—TIETKENS.—On the 24th Sept., at St. Pancras Church, London, Ferdinand Heinrich Friederichs, Esq., of Hamburg and Penang, to Bertha, only daughter of John Hulbert Tietkens, Esq, of Oakley-terrace, Regent's-park. No cards.

STANFORD—HANDS.—On the 6th Oct., at St. John's Church, Lowestoft, by the Rev. C. Hubert, vicar, George Stanford, Esq., of Shanghai, to Martha, fourth daughter of W. R. Hands, Esq., of Ely-place, London. No cards.

STOPFORD STOPFORD.—On the 7th Oct., at Old Charlton, by the Rev. F. M. Stopford, rector of Fitchmarsh, assisted by the Rev. F. Cameron, Captain Walter J. Stopford, late 52nd Lt. Infantry, to Annette Jane, third daughter of Vice-Admiral the Hon. Sir Montagu Stopford, K.C.B.

VALENTINE—COSTIN.—On the 29th Sept., at the parish church of Clophill, Bedfordshire, by the Rev. C. B. Lockwood, M.A., the Rev. Jarvis Downman Valentine C.M.S., Missionary to Ningpo, China, to Ellen, youngest daughter of the late Henry Costin, of Clophill.

WRIGHT—BLACK.—On the 24th Sept., at Edinburgh, by the Rev. A. K. H. Boyd, M.A., George Pudsey Wright, Commander, Peninsular and Oriental S. N. Co.'s Service, and Lieut. Royal Naval Reserve, to Annie Wemyss, third daughter of James Black, Esq., of Save Courge-place, and Ivy Lodge, Fifeshire. No cards.

YOUNG—HENDERSON.—On the 30th Sept., at the parish church, **Bebington, by the Rev. George Fielden, rector, Jasper Young, Esq., of Singapore, to Margaret, daughter of William Henderson, Esq., Rock-park, Birkenhead, and Church-street, Liverpool.**

DEATHS.

ALLEN—On the 20th July, at Shanghai, Herbert Lockyer Allen, fourth son of the late Rev. John Allen, of Cross House, Ilminster.

BRADSTREET—On the 10th Aug., at the Civil Hospital, Hong Kong, P. Bradstreet, late of the Royal Hotel, Macao.

BATES—On the 6th Aug., at Quinsan, of dysentery, Capt. Bates, formerly surgeon to Ward's forces.

BEAUVAIS—On the 14th July, on board the steamship Governor-General, of Shanghai, Oliver Ellis, only son of Mrs. Beauvais, in his 18th year, of dysentery.

BONHAM—On the 8th inst., at Paddington, Sir Samuel George Bonham, Bart, K.C.B., late Governor of Hong Kong, and Her Majesty's Plenipotentiary in China, aged 60.

COLT—On the 27th Sept, at Inveresk House, near Edinburgh, John Hamilton Colt, Lieutenant R.N., late of H.M.S. Euryalus, third son of the late John Hamilton Colt, Esq., of Gartsherrie.

CUNNINGHAM—On the 12th Aug., at Shanghai, of cholera, C. L. Cunningham, Superintendent of the Shanghai Steam Navigation Company

DA SILVEIRA—On the 18th Aug., at Shanghai, Francisca Carlotta, the beloved wife of Albino da Silveira, aged 34 years.

DECKER—On the 14th Aug., at Hong Kong, Jean Decker, of Hamburg, aged 38 years.

GINGELL—On the 9th August, at Hankow, of cholera, W. Raymond Gingell, H.B.M. Consul

HAY—On the 8th Aug., at Hankow, in China, of sunstroke, Thomas L. Hay, Esq., son of the late William Hay, Esq., Lerwick.

HUNT—On the 28th Aug., at Singapore, on his way home from China, William Henry Hunt, aged 27.

HANBURY—On the 29th Sept., at Frohsdorf, Eastbourne, Herbert, fourthson of Robert Hanbury, Esq., M.P., aged 6 years and 1 month.

HANBURY—On the 4th Oct., at Frohsdorf, Eastbourne, the wife of Robert Hanbury, Esq., M.P., aged 36.

HUTTON.—Drowned at Tien-tsin, on the 2nd Aug., —Hutton.

JACKSON—On the 7th Aug., drowned at Shanghai, —. Jackson, late chief engineer steamer Noah Crewna.

LEGGE—On the 2nd Oct., at Bramdean, in the 89th year of her age, Honora, widow of the late Hon. and Rev. Augustus George Legge.

NEWMAN—At Hong Kong, on board the P. & O. S. N. Co.'s steamship Pekin, George Newman, Quartermaster.

MARMONT—At Shoushing, on the 1st of August, of cholera, Major Marmont, of the Franco Chino Contingent, a native of Jersey.

MILTON—On the 15th Aug., at Ningpo, Captain J. Milton, of the steamer Whampoa, of violent cholera, after five hours' illness.

RIGBY—On the 31st July, at Yokohama, Japan, in his 31st year, Edward, eldest son of Edward Rigby, Esq., late of Swinton, near Manchester.

ROBERTSON—On the 7th Oct., at 108, Adelaide-road, in the 64th year of his age, John Robertson, Esq., of the firm of Messrs. Robertson and Co., Newman's-court, Cornhill.

SIMPSON—On the 20th July, at the Pagoda Anchorage, Foo-chow-Foo, very suddenly, Dr. Simpson, until recently residing at Whampoa.

SMITH—At Hongque, of chronic dysentery, on the 16th August, Capt. Thos. H. Smith, late of the British barque Cobang, a native of Holmes' Hole, Mass., U.S.A.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—Second crop Congous are coming in, but very slowly, seven chops only having been received during the last fortnight. The gap between the asking rates of the teamen and the values in the home markets at date of last advices, naturally deters exporters from operating, and consequently the settlements of Congou for the fortnight have been very limited, as will be seen below. Rates tend down, but the assortment is restricted. A fair business has been done in Canton descriptions, scented teas and gunpowder being about one tael cheaper. The following are the settlements reported for the fortnight:—Congous: 2 chops Lylings at 35½ to 36½ taels; 1 chop Chong-sow-kyes at 39½ taels; 400 half-chests Tyshan, country make, at 26 to 27 taels. Scented Teas: 8.500 boxes Caper at 17½ to 19 taels for common to fair, 20 to 25 taels for middling to good, 26 to 28 taels for fine to finest. 7,500 boxes Or. Pekoe, at 19 to 23 taels for common to fair, 25 to 27 taels for

Digitized by Google

middling to good, 32 to 35 taels for fine to finest. Canton Greens: 5,500 boxes gunpowder at 19 to 27 taels for common to fair. The stock remaining on the market is thus estimated:—Congou: 21 chops country tea and 1,000 half-chests Tyshan. Oolong: 850 half-chests. Scented Capers: 30,000 boxes. Scented Or. Pekoe: 10,000 do. Canton Greens: Gunpowder only, and that uncertain.

Foo-chow-Foo.—For England the settlements have continued on a fair scale. Purchases of Oolongs for shipment to the United States have been made to a considerable extent, at an advance on opening rates. The shipments to Australia have been considerable. Of Congous the settlements of dust and broken leaf kinds effected during the fortnight, were chiefly made simultaneously by one firm at an advance of a tael. The best middling to middling flavoury kinds are slightly easier, whilst the better grades of Kaisows have advanced somewhat. The market is firm for all congous above 20 taels. Of Souchongs the settlements exhibit no alteration in price, good and fine having become rather scarce. Of Oolongs most of the settlements have occurred on private terms. Since the beginning of the fortnight the rate has advanced fully 2 taels, and still tends up. The remaining stock consists of inferior quality, and supplies come forward very sparingly.

Shanghai.—Black: Business recommenced with considerable animation immediately after departure of last mail, and as teas possessing Pekoe flavour were the most inquired for, prices for these classes advanced fully one tael, while Common Oonahms and Hohows being in good supply remained unchanged. On the arrival of the mail of June 26, reporting a further decline on the home market, business was suspended, and it was not until holders met buyers by reducing their demands from one to two taels that operations began again. A fair demand still exists at these reduced rates, and unless the news by next mail is again unsatisfactory, lower rates can hardly be looked for. The bulk of the settlements have been composed of good strong second crop Oopacks and Ningchows, lit on Pekoe flavour at prices from taels 33 to 36, whilst Common Oonahms have been settled as low as taels 28, and Hohows at taels 26. Settlements on the market, 52 chops, 29,591 chests Oopacks, Oonahms, Ningchows, and Hohows. Re-shipped on owners' account 44 chops 27,660 chests, Oopacks 57,251 chests; making total to date 187,068 chests. Stock waiting shipment, 450 chests, for resale 17,333 chests. Quotations are, second crop Oopacks and Ningchows Tls. 33 to 37; second crop Oonahms Tls. 28 to 34; first and second crop Hohows Tls. 26 to 31. Green: A few chops of new Pingsuey have arrived during the fortnight, but at present only one has been offered on this market, and the leaf and appearance are far inferior to previous years. The bulk of the crop will be packed in Ningpo, but a few chops have been prepared in the country. The price asked is Taels 42, but it is expected that market will open considerably under that figure. No settlements of country or Shanghai packed Teas have been reported. Re-shipments and settlements, 760½ chests Fychows, &c.; 3,002 chests Pingsuey, and 873½ chests Japan, 4,635½, making to date 20,565½ chests. Stock of Green Tea is estimated at 500½ chests Fychow, &c.; 4,700¼ chests Shanghai packed Japan, and 2,578 chests Pingsuey; total, 7,778¼ chests.

Amoy.—The settlements of Congou for the fortnight amount to 4,400 half-chests at $21 to 26½ for middling to rare flowery teas. Very little had been done in Oolongs.

Hankow.—The settlements for the fortnight, inclusive of twelve chops contract teas, amount to 69 chops, leaving an unsold stock on the market of 28 chops. The total settlements of the season to date amount to 360 chops, against 225 chops corresponding period last season. Oopacks are firmer, and show an advance of 1 to 1½ tael, whilst Oonams of the lower grade have slightly declined. The quotations are—second crop—Oopacks, 28½ to 31 taels. Do. Oopack 21 to 27 taels. The shipments during the fortnight have been principally on Chinese account, foreigners holding off for a reduction.

Kewkiang.—In consequence of the imposition of an additional tax of 1.4 tael per picul under the name of "local duty," a slight dulness has affected the market. Black: Since last mail there have been three chops at 23 to 23.75 taels for Hohow, 29.50 taels for Ningchow.

Nagasaki.—With the exception of 5,600 bales of good to middling, and two or three small parcels of low-class leaf, this market has been quite cleared of first arrivals. Fresh supplies are, however, looked for. Prices firm, but likely to give way as stocks increase. Settlement for July, 3,689 piculs.

Kanagawa.—The supply has slightly increased since issue of last report, but prices are firm and apparently no chance of an early reduction in rates. The quotations are:—Fine $25, medium $19 to $24, common $8 to $18, ordinary $1 to $7 per picul.

Raw Silk.—Shanghai.—The reports of large settlements of Silk in Japan, referred to last mail, have not had the effect on this market which was expected. Notwithstanding further unfavourable advices from Europe received by 26th June mail, and the continued firmness of the dealers, the transactions of the fortnight have amounted to fully 2,300 bales at prices little different from those last quoted. The receipts from the interior have rather increased (the reduced value of the Carolus Dollars laying the silk down at a lower cost), and are estimated at about 4,000 bales. From Japan the arrivals have exceeded 2,000 bales, and future supplies are expected to come forward freely. The settlements of the fortnight are reported at 4,000 bales, against 6,600 bales corresponding fortnight of last season, and 3,000 bales the season before. The total settlements to date amount to 10,500 bales present season, against 25,700 bales same period last season, and 12,500 bales the season before. The stocks stand at those dates respectively 15,000 bales, and 16,500 bales. The following are the current quotations:—Tsatlees, No. 1, 455 taels per picul; No. 2, 435; No. 3, 410 to 415; market, No. 3, 395 to 405; No. 4, 375 to 395; No. 5 and common, 355 to 370. Tayshans: No. 1, chops, 385 to 395; No. 2, 370 to 375; No. 3, 345 to 360; No. 4, 5, and common, 315 to 340.

Canton.—Within the past week silk of the 4th crop has been brought to market pretty freely. The crop is reported to be very abundant, and the quality and colour of the silk superior to anything that has been received since the beginning of the season. Beyond a few bales of Tsatlee and imitation Japan reels, there have been no settlements during the fortnight for Europe. The Indian houses are still buying both for Bombay and London, at prices which make them the only purchasers. P[illegible] Loong Kongs and Kow Kongs, are a little easier, and may be quo[illegible]:— Loong Kong, No. 1, $405 to 410; No. 2, $385 to 395. Kow[illegible], No. 1, $365 to 370. Canton Tsatlee, $460 to 465. Imitation[illegible], $430 to 435.

Kanagawa.—The demand for this article has continued to[illegible]ly brisk, and prices are without variation, but on the whole a shade fi[illegible]r. The arrivals from the interior continue freely; there are still ru[illegible]rs afloat about the 50 bales a day mentioned in our last issue, but we c[illegible]t trace them to any very authentic source. Some of the Japanese merc[illegible]s assert that it will shortly be carried into execution; we think it may eventually turn out to be some fresh dodge of theirs. The quota[illegible]s are.—Mybash and Sinchus, best, $510 to $520; medium, $480 to [illegible]; inferior, $470 to $480. Coshios, best, $430 to $440; medium, $4[illegible]0 to $425; inferior, $390 to $405. Oshios, best, None; medium, N[illegible]; inferior, $400 to $415. Hatchogee, $380 to 385. Mashtah, [illegible]90 to [illegible]0 per picul.

Drugs.—Canton.—Cassia Lignea has advanced; 1,000 pls. [illegible] been taken at $15.80. The stock on the market is 2,000 pls. and he[illegible]t from $15.75 to $16.25. Cassia Oil, no supplies have come for[illegible]. Cassia Buds, nominal rate, $48 to $50, no stock. Star Ani-seed, $2[illegible]0 stock. Aniseed Oil, $150, no stock. Rhubarb, 120 pls. are o[illegible]e market in small lots, held at from $60 to $70. Gamboge, no su[illegible]. China Root, no sales, stock, 250 pls. Galangal is quoted $4 to $4[illegible]5, stock, 300 to 400 pls. China Galls, scarce, 100 pls. on the market a[illegible]7 to $17.50. Camphor.—Hong Kong.—No further supplies to hand, w[illegible]'t is owing to fresh difficulties in Formosa about the export of the articl[illegible].

CHINA IMPORTS.

HONG KONG.

Cotton Yarn.—The sales of Cotton Yarn, during the fortnight, [illegible]ave been limited to 70 bales, consisting almost entirely of the higher num[illegible]s, for which advanced prices are now obtainable. Nothing has been do[illegible] in Canton, and the value of all qualities shows a decline.

Grey Shirtings.—The sales of these fabrics amount to only a[illegible]t 500 pieces at lower rates. Some 3,000 pieces of damaged goods [illegible]ve also been moved off at auction, 8.4 lb. quality fetching $4 to $4.10.

White Shirtings.—1,000 pieces of these goods have found b[illegible]rs in Hong-Kong, at about the same quotations as those given in last circ[illegible]r.

T-Cloths remain much as before quoted, with sales during the [illegible]t-night in this colony amounting to 5,500 pieces. The Canton marke[illegible] has been entirely without transactions in all the foregoing description of go[illegible]s.

American Drills are without sales to notice, both here and in Canton.

White Spotted Shirtings, Dyed do., Brocades, White and Coloured.—The sales of these fabrics effected during the fortnight are confined to 250 pieces of the first-mentioned goods. In Canton nothing has been done, and prices remain without change.

Chintzes and Handkerchiefs.—The former have met with purchasers to the extent of 850 pieces, at about previous quotations. Handkerchiefs have not been in any demand.

Raw Cotton remains without change to notice in value since the date of last circular. A moderate amount of business, amounting to about 3,700 bales, has been transacted during the fortnight. In Canton [illegible]00 bales have changed hands, prices remaining as before.

Woollens.—Spanish Stripes, Medium Cloths, Ladies' and H[illegible]it Cloths, have been in good request in this market during the fortnight, and the first-mentioned goods have found buyers to the extent of 925 pie[illegible]s, but prices have undergone a material decline from the quotations g[illegible]n under the date of 11th inst. In Canton, where the value of Spa[illegible]h Stripes remain unaltered, some 240 pieces have changed hands. Me[illegible]n and Ladies' Cloths have also met with a little inquiry, and have been [illegible]d here to the extent of 300 pieces, while in Canton 180 pieces have fo[illegible]d buyers. Long Ells.—A further decline in the value of these goo[illegible]s is again noticeable, but the business transacted has been on a fair s[illegible]e during the past fortnight, and the sales effected amount to [illegible]00 pieces. There is nothing to report from Canton, in regard to these goods. Camlets have also been in fair demand during the fortnight at about the prices previously quoted, and the business done has resulted in the sale of 845 pieces of English and some 20 pieces of Dutch, taken at the annexed quotations. Lastings likewise remain at the value given in last report, with a fair business, amounting to 730 pieces, settled in Hong Kong. Blankets: The demand noticed in last circular has been to some extent maintained, resulting in sales effected during the fortnight to the extent of about 650 pairs. No inquiry has been shown in Canton for any of the above manufactures.

Metals.—Iron, Flat, &c.: The only sale of iron reported in this colony is that of 270 piculs of iron wire, at the quotations annexed. For most other kinds the value has receded slightly; while from Canton there is not a single sale of any description to report, although small round rod and wire are quoted at higher figures. Lead has not greatly altered in value since the early part of the month, and the business transacted during the fortnight has been upon a fair scale, amounting to some 2,600 piculs, purchased at the annexed quotations. Purchasers on foreign account, to the extent of about 1,100 piculs, are also reported. In Canton there have not been any transactions. Tin remains nearly the same as formerly quoted in this colony, where the amount of business transacted has been moderate in extent, amounting to 946 slabs. Tin plates have found purchasers at the annexed quotations to the extent of 185 boxes. Steel has not met with any inquiry, either here or in Canton.

PENANG.

The following is from the circular of Messrs. Sandilands, Buttery, and Co., of the 8th of September:—"Since date of our last report the *Daylight* has arrived from London, bringing only a very small supply of goods for this market. The *Teesdale* from London direct, and the *Nipisiquit* from Clyde, *via* Singapore, are both due; the latter vessel bringing fair supplies of Manchester staples. Within the last two or three weeks our piece goods market has improved considerably, and demand for most staples is now active; as stocks in first hands are light, importers generally continue to insist on high prices, which tends to limit transactions."

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Japan.—From London: July 27, Esperanza.

At Penang.—From London: July 26, Avalanche; 31, Isabella.

At Shanghai.—From London: Aug. 13, Fairlight; 15, Hanover, 19, Ballarat. From Liverpool: Spec; 11, Niphon; 13, Mimosa. From Cardiff: 8, Spirit of the Sea; 13, Star Queen. From Sunderland: 10, Constance; 13, Marion. From New York: 3, Sarah.

At Foo-Chow.—None.

At Amoy.—None.

At Swatow.—None.

At Hong Kong.—From London: Aug. 12, Mary Ann Wilson; 13, Glenclune. From Liverpool: 12, Jessie Beazley. From Cardiff: 13, Nicoline; 15, Ellen; 18, Langdale. From Shields: 15, Maggie Atkinson. From Hamburg: 15, Buenos Ayres; 18, Cyane.

At Manila.—From Cardiff: Aug. 14, Amanda.

At Singapore.—From Cardiff: Aug. 28, Philotaxe; 30, Andromeda, Adde Winter. From Sunderland: Sept. 1, Vampire. From Shields: Zes Gezusters.

DEPARTURES.

From Hankow.—None.

From Japan.—None.

From Shanghai.—For London: Aug. 4, Gubalva; 17, Grenadier; 19, Humphrey Nelson. For Liverpool: Aug. 5, Merrington. For New York: None.

From Foo-chow.—For London: July 23, Friar Tuck, Empress Eugenie; 26, Whinfell; Aug. 2, Corea; 10, Lord Clyde; 14, Harkaway; For New York: None.

From Hong Kong.—For London: Aug. 15, Warwickshire; 18, Kennington. For Liverpool: Aug. 14, Iron Crown; 18, Forfarshire. For New York: None.

From Manila.—For Liverpool: Aug. 18, Alaric. For Falmouth: July 29, Java; 30, Amtmand Thesen. For Yew York: July 9, Kitty Simpson; 22, Wanderer, Horatio; 24, Hamlet; 25, Competitor; Aug. 4, Antonia Terry, Sumatra.

From Singapore.—For London: Aug. 26, Lawley Cluden. For Liverpool: Sept. 1, Tigris. For Shields: Sept. 2, Zes Gezusters.

LOADING.

At Japan.—For England: Broadwater, Cambridge, Isabella Ridley, and Medina.

At Hankow.—None.

At Shanghai.—For London: Gauntlet, Moneta, Runnymede, Sovereign of India, Sir W. F. Williams, Cambalu, Tinzel, Edinburgh, Strathmore, Reindeer, Garrawalt, Jubilee, Solent. For Liverpool: Allendale, Lorton, Childe Harold, Cordova, Jane Leech.

At Foo-Chow.—For London: Gaunanogne, Vesta, Spray of the Ocean, Carisbrook, Yaralilda, Maha Ranee, Mary Mildred, Thames.

At Hong Kong.—For London: Queen of the Age, Agincourt, Queen of the North, Ocean Bride, Tamona, and John Lidgett. For Liverpool: John Nicholson, Beautiful Star, and Prince Alfred.

At Manila.—For London: Mindar, Pelicana. For Havre: Volta. For New York: None.

At Penang.—J. Masterman, Daylight. For Falmouth: John Land.

FREIGHTS AND CHARTERS.

JAPAN.

To England, from Yokohama: Tea, £5 per ton of 50 cubic feet; silk, £6. 10s. per ton of 50 cubic feet. To Shanghai, per steamer: Measurement, $7 per ton of 40 cubic feet. To Hong Kong: $6 per ton of 40 cubic feet. Nagasaki to England, £4. 10s.

HANKOW.

To England, £5 per ton; to Shanghai, for steamers, 2½ to 3 tls. per ton measurement.

SHANGHAI.

The rate for tea continues at £3, with but little offering, and for cotton £2. 12s. 6d. to £3. A good coast business is being done, and should it continue better rates are expected. For New York nothing is doing. The Jane Leech, of 916 tons, has been settled to load cotton for Liverpool at £3; The Childe Harold, 1,036 tons, £3; the Gordova, 521 tons, £2. 12s. 6d.; the Lorton, 17s. 6d. per bale. To Hong Kong, 33 cents per picul.

FOO-CHOW.

To London: The rate remains at £3 per ton.

HONG KONG.

Freights continue low, but a better demand for tonnage has taken place. The following are some of the settlements:—Beautiful Star, 546 tons, to load cotton for Liverpool, on the berth at £3. 10s.; Layard, 174 tons, Whampoa to Melbourne, tea, £3. 10s.; Kusrove, 400 tons, to Ningpo, 30 c. per picul; Roska Dan, brig, 245 tons, $1,000 per month for six months; San Francisco, 447 tons, for San Francisco, $7 per ton.

MANILA.

The only settlement for London is the Pelican, at £2. 10s. for Unclayed Sugar.

SINGAPORE.

A demand for tonnage still continues. The rates are as follows:—Tin, £3. 5s. per 20 cwt.; sago in boxes, £3. 15s.; sago flour, £4; gambier in bales, £3. 5s.; sugar, £3. 15s.; black pepper, £4 per 16 cwt.; coffee, £4 per 18 cwt.; hides and horns, £4 per 16 cwt.; gutta percha, £4 per 20 cwt.; measurement goods, £3. 15s. for 50 cubic feet.

PENANG.

For England: £3. 5s. for dead weight, and £4 for light freight.

COMMERCIAL POSTSCRIPT.

City, Thursday Afternoon.

According to a circular of Messrs. Arles-Dufour and Co., of Lyons, regarding the silk-markets of that city, the transactions both in goods and raw material have been sufficiently active during the past month to sustain prices, although the autumn business has been generally delayed by the weather being fine. At the same time, it is thought there is no probability of any important change taking place in quotations for some time, since on the one hand the news from America removes the hope of any early settlement that will restore the consumption of silk to its nominal importance, while on the other there is a gradual increase in the European demand. "This state of things leaves few chances to speculators, but favours the course of regular transactions."

The activity in the silk market has been checked during the past fortnight by the extreme pretensions of importers; still we have had a fair amount of business, and the recent advance in prices of both China and Japan silks has been fully maintained. Deliveries, 30th September to 8th October inclusive—China, 1,032 bales; Japan, 552 bales; total, 1,587 bales.

Arrivals not Included in the Table.—Oct. 7, off Portland, from Batavia, Kandanghaner; 1, at Gibraltar, from Maulmain, G. W. Duncan; 8, at Falmouth, from Rangoon, Lorenzo; 9, off Portland. from Nagasaki, Dunmore; Sept. 29, at Cadiz, from Manila, Luisita; Oct. 11, at Liverpool, from Akyab, Nazarene; 12, at Deal, from Singapore, Lady Agnes Duff; 10, at Browershaven, from Batavia, Henrietta, Gerardiva, Susanna; 13, at Liverpool, from Ningpo, Thames; Sept. 23, at St. Thomas's, from Nagasaki, Glenisla, and sailed 24 for New York.

Departures.—Oct. 6, from Deal for Singapore, Christine; 10, from Liverpool for Hong Kong and Shanghai, Achilles; 8, from off Hastings for Batavia, Francina Wilhemine; from off Yarmouth for Batavia, Java Packet; 12, from off Portsmouth for Batavia, Zeenymph; from Deal for Shanghai, Wokee, str.; from Newport for Hong Kong, A. H. Wille; 14, from London for Cape, Singapore, and China, Leila; for Cardiff and Hong Kong, Constance; 3, from Gibraltar for Sumatra, Rattler; 15, from Glasgow for Batavia and Singapore, Princess of Wales; for Manila and Iloils, Chase.

Laid On.—At London for Shanghai: Brockham (new iron ship). Coal freights are quiet, except for Hong Kong, for which port there are several orders in the market. At Liverpool for Manila, Jose y Maria; at Glasgow for Batavia and Singapore, Majestic.

The new double screw steamer *Far East*, noticed in a previous issue will be launched from Mr. Dudgeon's yard on the 29th inst.

A portion of the material for the Shanghai gas works have been shipped by the steamer *Bahama*.

Obituary.

Sir George Bonham.—We noticed, about two months since, the illness of Sir George, and we have now to record the fatal termination on the 8th inst. at the age of 60. Sir Samuel George Bonham served for some time as Governor of the Straits, and subsequently of Hong Kong, together with the office of Plenipotentiary in China. Sir George was more noticeable as a *bon* companion than a diplomatist, and in this way he was a most acceptable successor to the dry and studious habits of his predecessor Sir John Davis.

Captain Robertson.—We regret to announce the decease of Captain Robertson, on the 7th inst., at his residence in Hampstead, at the age of 63. Captain Robertson was long and popularly known in the China trade as commander of the *John o'Gaunt*, *Stornaway*, and *Cairngorm*. The rapid passages accomplished by him in this trade, more especially when in command of the *Stornaway*, pitted as he was against Yankee ships of double the tonnage, are too fresh in the memory of our readers to need recapitulation. His loss will be widely felt. He combined great firmness and energy of will with great kindness and affability of disposition, careful always of giving offence. He was gifted with an excellent judgment, and great practical tact. His business qualities were sterling, and many will lose in him a sincere and estimable friend. During his residence in London, after retiring from the sea, he has been the senior partner in the ship-brokering firm which bears his name—his partners being Captain Wade and Captain McMinnies.

Munificence of Parsee London Merchants.—Messrs. Cama and Co., the eminent Parsee merchants in the City of London, have presented £2,000 to the Royal National Lifeboat Institution, through its Chairman, Thomas Baring, Esq., M.P., to enable it to form a lifeboat establishment on the English coast, and permanently to keep it up. Their firm is now under dissolution, and in order to show their gratitude to the people of the great metropolis, from whom they have received for many years every courtesy, they have presented this munificent amount to one of England's greatest and noblest benevolent institutions, whose lifeboats know of no distinction of race or religion when their services are required during the storm to save the drowning shipwrecked sailor. Between 500 and 600 lives are thus saved every year by its lifeboats, and by the crews of shore-boats to whom it grants rewards for their gallant exertions. As the eminent philosopher, Sir David Brewster, has just written in a popular magazine: —"In order to enable the Lifeboat Institution to maintain its existing life-fleet of 125 boats in a state of efficiency, and to place a lifeboat on every dangerous shore, the public must add liberally to its funds. There is not a family in the land that has not a relative or friend exposed to the dangers of the sea; and hence there is not a family or an individual that can escape from the obligation of contributing to the grandest and holiest of our societies—the National Lifeboat Institution. If it is a high privilege, and a still higher duty, to feed the hungry, to clothe the naked, to heal the sick, and to teach the ignorant, it is surely a higher privilege, and a higher duty still, to save from sudden death lives that have long to live, and that are to live for ever."

Mineralogical Discoveries in Siberia.—The subjoined account of the mineralogical discoveries made in Siberia by M. Alibert, a Frenchman, is published by the *Illustration*:—"One day as he was traversing a gorge in the Saian mountains which separate the Russian Empire from China, he observed some unusual substance lying in the crevices of a gigantic rock; he examined it more closely, and before long the men of his escort, who were at the same time guides, miners, and Cossacks, were on foot, and had exchanged their lances for pickaxes and hammers. After some days of continued labour M. Alibert acquired the conviction that he was on the traces of an incomparable mine of graphite. But what is graphite? Everyone is not bound to be a mineralogist. Graphite is the precious substance with which blacklead pencils, which were not known to the ancients, are made. The discovery of graphite only dates from the middle of the 16th century. Good graphite is very rare; more so than gold, silver, or any other production of the mineral kingdom. The best yet found was derived from the Borrowdale mine in the county o Cumberland, England. That source is, however, now exhausted, and only small fragments, overlooked by the first workers of the mine, are to be found. The discovery of graphite in the mountains mentioned above has been followed by that of nephrite or jade. Until now this mineral had only been found at a few places in the Chinese empire, and from its high price and great rarity the official sceptre of the Sovereigns of the Celestial Empire was made of it. It will be remembered that one of the most remarkable curiosities derived from the plunder in the Summer Palace at Peking was a jade sceptre. A block of this rare mineral, weighing 1,200 lb., and of exceptional purity, has just been obtained. The Kensington Museum at London also possesses a valuable block of this mineral.

Paper on Routes from India to China.—Captain Henderson read a paper at the British Association meeting on the overland and river routes between British India and Western China for emigration and trade. These routes are to be opened out by the general system of tug and tow boats of the native type, to be established in Eastern Bengal and British Burmah, and have for their object to open the coal-fields of Assam and Silhet in connection with the Eastern Bengal Railway, and to extend the traffic of the Calcutta and South Eastern Railway to Burmah and China, *via* the river Irawaddy and its tributaries at Bamu, under the recent treaty with the King of Burmah. The author stated that the large consumption and continual exhaustion of coal in England and America had induced him to bring before them the coal supply of India, which at the present juncture was a question of vital importance as to the financial position of our railways there—Sir Charles Wood having recently guaranteed the East Indian Auxiliary Railway for the provision of cheap coal from the Kurhurballee fields south of the Ganges, while the working of the Assam coal-fields is a matter of greater moment, as it would facilitate the project of overland communication between Western China and British India.

Appointments Notified.—Lieut.-Colonel R. Macpherson, resident councillor of Singapore, has been appointed to officiate as resident councillor of Prince of Wales's Island. Captain J. Burn, resident councillor at Malacca, has been appointed to officiate as resident councillor at Singapore. Captain F. L. Playfair, assistant resident councillor, has been appointed to officiate as resident councillor, Malacca. Mr. W. Palmer, assistant-accountant, 1st class, Public Works Department, N. W. Provinces, has been transferred temporarily to do duty in the office of the Secretary to the Government of India in the Public Works Department. Cape of Good Hope.—The office of deputy surveyor general has become vacant by the death of Mr. George Montagu.

The lifeboat presented by the communities of Hong Kong and Shanghai has been launched, and named the *China*. She is to be stationed at Teignmouth.

TO CHINA IN FIVE DAYS!

Happy is the Frenchman who conceives for himself a "destiny." The destiny of Monsieur Nadar, of Paris, is to float through the air to China! On our last trip to Paris, Monsieur was a photographer intent on trapping the "negatives" of courtly beauty; now his *studio* is deserted; he dreams of riding on the wings of the wind, steering with a patent aerial screw for the western shores of Asia, with important Government despatches in his pocket, and accompanied by any number of passengers at 1,000f. per head, tempted by the novelty of the thing, or in some very particular hurry. In fact, if a strata of wind flowing eastward will only hold out, and not diverge like the gulf stream, M. Nadar will undertake to deliver the *London and China Express* to China subscribers within a week from date. Like a business man, he is out with his prospectus. The main object now is to ensure comfort on the route. Every man is not a Glaisher or a Cox; perhaps not one in a thousand is willing to be frozen even in the interests of science. Human nature will submit to any sacrifice but the loss of creature comforts. Down with the *dust* then, and you shall be caged in a wicker house, with a surprising number of conveniences, including an ample commissariat, for the air will be as good as ice to preserve venison, fowls, and frogs. Between meals you may look out of the windows above, below, around, and be welcome to what you see, or vary the treat by musing on M. Nadar's destiny, which will become more apparent as you proceed. Only one caution—and this upon your honour as a gentleman—no smoking! Disobey the captain in this particular, and he threatens to drop you, we mean, land you on the first patch of *terra firma* over which he swoops, leaving you a miserable object—the unpitied victim of your own reckless indiscretion, whilst the happy *voyageurs* pursue their way, fading gently in the distance. M. Nadar has laid hold of enough of "truth that is and truth that seems" to make a *furore*. To begin with, he has a gigantic experimental balloon which all Paris is crowding to see; and that distinct stratas of the atmosphere are encountered as we ascend, with currents running in the most diverse directions, is matter of common observation. Any æronaut may have a choice of currents; the course of the trade winds, together with the prevalence of westerly on the Atlantic, favour the conception of reaching a point where a permanent current, unaffected by the configuration of continents, might be found trending westward, and so be made available for an aerial voyage. M. Nadar is, in fact, reviving an old theory which has never been disproved, and we wish him joy in trying to put it to account. Evidently he is the *beau ideal* of a Frenchman—a man of great ideas, both of himself and the enterprise. The flight is to be worthy of the inauguration of an æronautic age. The conception is *magnifique!—Eh bien! c'est superbe.*

THE HOSTILITIES IN JAPAN.

MORNING POST.

Whilst "outer barbarians," as Japanese doubtless consider them, have been exercising patience, temporising, diplomatising, doing all they could consistently with honour do in order to avoid entering upon a career of hostilities the results of which could admit of no doubt, a certain Prince of Nagota, rejoicing in several long names that we cannot afford space to reproduce, has been opening the ball on his own responsibility. This valiant proprietor of eight or nine forts situated on the mainland of a narrow strait forming the exit from the inland sea, and also of certain newly acquired steamers that he caused to be equipped and armed as vessels of war, led away, seemingly, by over-excited feelings to run what the Malays call "amok," adopted the very summary and novel course of attacking all comers, without reference to nationality. The first subject of experiment was the American steamer *Pembroke*; a vessel so small, and, as it would appear, deficient in armament, that her commander had to steam away with all despatch and communicate the in elligence of insult to others more capable than himself of redressing it. The first work of retribution fell to the lot of the American steamer *Wyoming*; and though the armament of that vessel cannot be regarded as otherwise than weak by comparison with the force of the enemy, nevertheless, the *Wyoming* helped to impress on the Priuce of Nagato a lesson that he will hardly fail to remember. On her way to the forts, the *Wyoming* had endeavoured to board a brig and a steamer, but these being full of troops, the American captain felt that his energy could be expended with greater advantage upon the forts. The latter, accordingly, he engaged for three hours, and also a Japanese steamer; the latter was ultimately blown up by a large pivot-gun shell dexterously planted amidships. Gallantly did the little Yankee craft do her work, but the strife was too unequal. After having been several times hulled, and having lost sixteen men, she sheered off to procure assistance. Another nationality now comes upon the scene. The Dutch corvette *Medusa*, happening to pass the strait, came in for a similar treatment. Having been warned of what he had to expect, the Dutchman entered the straits prepared for action. Being fired upon, he returned the fire, giving the assailants all they gave, and something more. But his Highness of Nagato had not even now exhausted his martial ardour. His gunners, still bent on mischief, must needs attack a small French ship of war, and so effectually did the Japanese ply their artillery upon that her she reached Nagasaki in a sinking condition. This being somewhat past endurance, the French steamers *Semiramis* and *Tancredi* started on chastisement bent. The *Tancredi* having passed some way down the straits was obliged to haul off with wounded topmasts; hulled, moreover, in several places. As for the frigate, she was unfortunately over large to run through the straits; but attacking the fort which guarded their entrance, she destroyed it by cannonading; then, having landed two hundred men, she

Digitized by Google

spiked the guns, blew up the magazine, set fire to some barracks, and finally retired with twelve of her crew wounded. Up to the events narrated no English vessel seems to have been attacked, but at the period of last despatches the *Coquette* was hourly expected to pass the inimical straits. Should she also be attacked, then the work of demolishing the Japanese batteries will probably be carried one stage further.

In this series of molestations by the Japanese two points are especially noticeable; one political, the other technical. Politically considered, this affair makes good the belief frequently expressed as to the weakness of central government amongst these extraordinary people. It had been assumed that the rule of both Tycoon and Mikado were practically nominal; that the real depositaries of political will and centres of political action were the great Princes, or rather "Barons," of this Britain of the East. It seems that the Tycoon has really been dealing honestly by us after all; and that in the event of war, if inevitable, he may see his interest in assisting us to control his rebellious feudal chieftains; or, at least, such of them as, like the Prince of Nagato, may make themselves obnoxious. The technical point brought into prominence by the late Japanese attack is the condition of the artillery practice and the resources of that people. They evidently use artillery well. The artillery they actually possess seem to be none of the largest—probably none heavier than 32-pounders—these having been the guns they recently used; but the Japanese handled their 32-pounders well, and, what is especially to the point, proved they had learned the art of firing 32-pound shells horizontally with effect. Anybody who may have examined the mechanical treasures collected in the Japanese museum at the Hague cannot fail to have been struck with the high degree of mechanical skill to which those people have arrived.

LIVERPOOL ALBION.

We are induced to refer to a state of things which has now existed for some time by the indications lately afforded of a similar policy to that in China with regard to Japan. A British subject is murdered by the armed retainers of one of the great nobles, and the Government of the Tycoon is obliged to confess its inability to execute the laws of the empire against a criminal of such rank and power. The implicated noble would, in fact, in any European State, be regarded as an outlaw and a rebel. Unable to obtain satisfaction from the Government, we proceed to make war upon the cut-throat nobles; in other words, to support the authority of the Tycoon by an armed force, as we are doing that of the Emperor of China at Shanghai and elsewhere. It is not expected that we shall be able to seize the offender, and hand him over to the Japanese authorities, and the bombardment of his castle can only be paralleled by a policeman destroying the furniture of a criminal whom he cannot arrest. The danger is that, in the revolution which has long been imminent in Japan, we shall by this step be drawn into taking a part, as we are doing in China. It is well known that a large and powerful section of the Japanese aristocracy are opposed to intercourse with the West, and, while trade is not sufficiently developed to engage the middle classes in its interests, there is danger of the ignorant masses being converted by the exclusive party into a lever to overturn the Government, and again close the country against Europeans. If we endeavoured to sustain the Government, as we are doing in China, we might place ourselves in a position as difficult as that which we brought upon ourselves by intermeddling in Affghanistan, and only escape from it after a disaster which might be even more serious than that of the Khyber Pass. But if not required for the protection of British interests, what is the end which these interventions in the internal affairs of China and Japan, so contrary to our foreign policy elsewhere, are designed to serve? Lord Palmerston alone can answer this question, and his lordship would, of course, declare that they had no other object than the protection of trade. Putting aside their design, therefore, what end are they actually serving? No one will pretend that it is desirable to acquire territory in either China or Japan, and to repeat there the costly game of our acquisitions in India, or that such is the object with which British and French forces are acting as the allies of the Emperor of China. But we know that Russia has been active in Eastern Asia for years past, and that she availed herself of China's occupation in the war with England and France to take possession of an immense tract in the northern part of the empire, where the town of Alexandropol has been founded at the mouth of the Amoor, and Nicholaieff, seventy-five miles above it. The more China is exhausted by wars with England and France, the less able she becomes to resist the aggression of Russia. The complicity of France in the designs of Russia upon Turkey indicates a like community of views in the extreme East. We see both Powers pursuing the game of territorial accumulation in those far off regions and seas, while England weakens the Oriental Powers, and thus diminishes their ability to resist. While Russia takes possession of thousands of square miles of Chinese territory, France plants her foot in Annam, and acquires Saigon. Then we hear that Russia has taken possession of an island belonging to Japan, and next that English and French forces have been engaged together in bombarding the stronghold of a Japanese noble, and destroying his property. It is always England and France who do the work, the Emperor of the French taking care that his legions should play first fiddle on all occasions; and France and Russia, who profit by the losses inflicted on the Asiatic Powers, to wrest territory from them. The French will no more abandon the positions they hold in China, and will soon acquire in Japan, than they will Saigon, or Tahiti, or Madaga-car, or Mexico; and it is England that has introduced them there, as she has also been the pioneer of Russian encroachments in the same region.

(SPECTATOR.)

Clive having commenced his work in China, Bussy has, of course, turned up Two English officers, Major Gordon and Major Cooke, in the employ of the Imperial Government, were clearing the Grand Canal and the province of Ningpo very successfully, when an American named Burgevine, who had been ill-treated by the mandarins, went over to the Taipings. He received a command, and was immediately joined by three discontented officers, and a number of deserters, "rowdies" and broken men, making up altogether a force of 300 Europeans. With this assistance, the Taipings rapidly turned the tide, compelled Major Gordon to fall back from the canal, cut out a steamer employed by Dr. Macartney, another Anglo-Chinese, and excited some apprehension within Shanghai itself. The Taipings, it is feared, will regain all they have lost, and the Government will be compelled either to demand the formal aid of Great Britain or to suffer Captain Osborn to levy a large force of Europeans. In either case Great Britain advances another step towards her inevitable position as the paramount power in China, a position which she will acquire, apparently, without Parliament so much as expressing an opinion upon the matter.

THE CIVIL WAR IN CHINA.

Our neutrality has got us into a pretty mess now. It never does answer for British diplomatists to look on and give moral support to a parcel of Asiatics, much less for British officers to command these miserable hordes. It is a wonder that poor Major Gordon did not commit suicide when he found that Burgevine had turned Rebel, and taken all his officers from him. So great was the disaster that Major Gordon, it appears—from a letter published by Colonel Sykes—induced the commander of our forces to rescind, there and then, the order in Council which provides that English officers accepting service in the Chinese army should be placed on half-pay. The following correspondence has been published on the subject:—

THE TARTARS AND TAIPINGS.

TO THE EDITOR OF THE "DAILY NEWS."

Sir,—The following is an extract from a letter dated Shanghai, August 4, 1863, received by me to-day. The British public will now learn with equal surprise and I hope indignation that the result of the disobedience of Earl Russell's repeated injunctions to maintain neutrality between the Tartar Government and the Taipings in their conflicts will be to place Englishmen in hostile array against each other, by General Burgevine organising a European force in the service of the Taipings.—I am, &c.,

47, Albion street, Hyde-park, Sept. 25. W. H. Sykes.

(Extract.)

Shanghai, August 4, 1863.

Great news came in to day. Dr. Macartney took the imperialist steamer *Kiachao* to Sung-keang last Saturday. Burgevine at night started hence with sixty men, boarded her, and took her on to Soo-chow (the rebel head-quarters), where he now has 183 drilled white men and 20,000 Chinese,* who intend to give—Gordon, I was going to say, but he has resigned—whoever brings on the forces to attack them a dressing.

TO THE EDITOR OF THE "DAILY NEWS."

Sir,—On my return to London this evening, I found a letter from China at my house from a British officer, dated the 11th August, 1863, and marked "Private," but which contains information of so novel and startling a character, that I take upon myself the responsibility of transmitting to you an extract for publication in the *Daily News*.

I am, &c., W. H. Sykes.

47, Albion-street, Hyde-park, Sept. 29.

"I hasten to inform you that the general commanding-in-chief (in China) has offered to guarantee any officer who will volunteer for Major Gordon's force full pay and allowances, and to count his service, which you will perceive is in direct violation of the proclamation in Council. As the following particulars of news may not have come to your knowledge I write them, as I quite agree with your view of our policy in China. All Major Gordon's Queen's officers left him on being told that they must go on half-pay if they continued in the Imperial service. Many of Burgevine's old force are said to have left Gordon also to join Burgevine. Gordon has thus no European officers at all. Burgevine is said to have 300 white men, 150 of them discharged British soldiers. In the steamer he (Burgevine) took was a brass 24-pounder howitzer of ours going up to Major Gordon. Gordon is anxious to resign, as he has no officers, and cannot get pay from the Chinese. Gordon left Shanghai for Quinsan immediately on the receipt of the news of the steamer being captured. He and his depot are supposed to be in imminent danger. If Quinsan is taken by Burgevine he will have more munitions of war than the English have in Shanghai. The *Scout* goes up immediately with general and staff, and some artillerymen. A schooner has been taken up to take large quantities of ammunition north."

THE TAIPING COMMANDER-IN-CHIEF.

TO THE EDITOR OF THE "DAILY NEWS."

Sir,—I received the accompanying remarkable document by the last mail from Shanghai. It is evidently intended as a manifesto of the Commanders-in-Chief of the Taiping armies of Loo-chow and Nanking, and addressed to European nations, and particularly to the British authorities in China, through the columns of the *Friend of China*. The questions are argued with a logical force and truth which might well bring a blush upon the cheeks of our diplomatists in China, for their violation of international rights the subterfuges had recourse to in justification of breaches of neutrality, and the withholding information from Blue Books, which would have enabled the British public to estimate the policy pursued in China at its true value.—I am, &c., W. H. Sykes.

Oct. 7.

(Here follows extract from the *Friend of China* of July 22.)

A correspondent of *The Times*, dating Shanghai, 4th August, writes:—

"There are two distinct bodies of disciplined Chinese in the Ningpo provinces, one Franco-Chinese, of 1,500 men, under the command of M. d'Aigabelle, formerly an officer in his Imperial Majesty's navy, which garrisons Shaoshing and the country thence to the Hangchow Bay; the other Anglo-Chinese, consisting of 1,000 men, commanded by Colonel Cooke, formerly one of Ward's officers, which garrisons Ningpo, and likewise keeps an eye on Yuyaow, Fungwha, and Tzechee. The former, to use a Chinese expression, stinks in the nostrils of both mandarins and inhabitants; the subordinate officers are lawless and unscrupulous, and the men are only too willing to emulate the looting propensities of their su-

*This body will of course consist of several nationalities, but there will be many British subjects in it.—W. H. S.

Digitized by Google

periors. The Taotai is very anxious that they should go to Chapoo, capture it and garrison it, by which means they would be removed to one corner of the province, out of his way; but they demur, and the Futai objects to their having the opportunity of acting. The Anglo-Chinese are in much better odour, are better officered, and kept well in hand; the Taotai would be delighted to get rid of the French, and increase the strength of this contingency if he could accomplish that object.

"For some time rumours have been afloat in Shanghai that an expedition was preparing in aid of the rebels, that Europeans were being enlisted, and arms collected under the auspices of General Burgevine; but every one desired to think them untrue, loth to believe that a man who had earned so much respect as Burgevine undoubtedly has, should have allowed himself to be drawn into a condemned cause. Unfortunately there is no longer room for doubt; Burgevine himself is believed to be in Soochow at the present moment, together with many of his old officers, who have left on one ground and another since his secession from the command. Hayes, Gibbs, and Rohde, all formerly in command of regiments of disciplined Chinese, are said to be his right-hand men, and he has, besides, about 300 Europeans of all sorts, some as officers, some as fighting men. The question now is, will the rebels give him and his officers sufficient power? If they do, there is nothing to prevent a force equal to Gordon's in quality, and far superior in numbers, from being raised within the next three months, and all the latter's generalship will not enable him to maintain himself against greatly superior numbers of equally good troops. Hitherto the rebels have not given any command to such Europeans as have joined them, employing them merely as counsellors to their chiefs, and profiting by their knowledge of gunnery. But it is unlikely that Burgevine would have joined them unless the position he was to occupy was clearly defined, and was such as would enable him to discipline and direct men without interference. In the meantime, until he has succeeded in instilling a certain amount of organisation into a sufficient number, Soochow is safe; the disciplined Chinese would never take a breach defended by 300 Europeans, even if Gordon were to risk an attack; and the latter's hope of frightening them out by scouring the country in their rear must be at at end, for Burgevine will dispel their fears. Latterly, until the present moment, the rebel cause has been declining, but it is not unlikely that the accession of so much strength and military knowledge may enable them to recover all their lost ground. The present is, perhaps, one of the most critical crises of the rebellion, and if the British authorities do not act with energy may eventuate in the return of the rebels to the gates of Shanghai, and the loss of all the country that after so hard fighting has been wrested from their hands. Burgevine commenced his new career by a very dashing act. Dr. Macartney, late his military secretary, now a military mandarin in the service of the Futai, and in command of Sooukiong, went up hence to that city in a small steamer called the *Kiachao* on the 1st inst. He left her about a hundred yards from the walls and rode towards the west gate, but had hardly passed over half the distance when one of the Europeans who had been left on board ran up breathless to say that Burgevine, with about thirty Europeans, had seized the steamer. Dr. Macartney hastened into the city to turn out the troops, and then galloped back to the entrance of the creek, where he had left a large barge as he passed up, hoping to be able to sink her across the entrance before the steamer could reach it; but she had left, the *Kiachao* passed safely out, and is now, doubtless, under the walls of Soochow.

"In the meantime Gordon is in straits from want of proper supplies of ammunition, which General Brown declines to give him, because the Chinese Government have not yet paid for previous supplies lent them. Anxiety to secure payment for whatever munitions of war he may disburse is doubtless, in the abstract, commendable; but it may be carried to an extreme, and become the reverse of economy in such a case as the present. The disciplined Chinese are the security on the strength of which it was judged possible to withdraw a regiment of English and a regiment of native troops and a battery of artillery from Shanghai, without endangering the safety of the settlement; and, it is, therefore, of the greatest moment that the force should be kept on a thoroughly efficient footing. Great part of its strength is moral, arising from the *prestige* it has acquired, and one of the principal qualities which has contributed to the maintenance of this power is the energy of its movements, and the force and rapidity with which its blows were delivered. To refuse Gordon shot and shell is, then, to deprive him of the means of action, by so doing to lower his *prestige*, and, consequently, to weaken the protective force of Shanghai. Risking the non-payment of a few thousand pounds' worth of shot and shell is certainly preferable to risking the reflux of the rebels to the gates of Shanghai, and the necessity for the maintenance of another English regiment to protect the English settlement from their inroads. The removal of the force from Soonkiong to Quinsan entailed the loss of a number of its oldest members, men who had accumulated money while in the service from loot, had opened shops, had families, &c., and did not care to desert all for a new city. The place of these has been to a great extent supplied by recruits from among the rebel prisoners. It is a hazardous experiment to place men yet warm from the enemy's ranks in possession of the arms and discipline which alone give superior strength to his own followers, but Gordon says he can rely on them. If the rebels now gain any successes, however, their fidelity will be sorely tried. Dislike to removal from Soonkiong, however, is not the only reason for their leaving this contingent, as many have found their way to Ningpo and enlisted there, especially men from the Rifles, which Cooke commanded previous to taking command at Ningpo. Chinamen are incomprehensible beings."

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

An extraordinary general meeting of the shareholders of this company was held at the London Tavern, on the 7th inst., for the purpose of declaring an interim dividend for the half-year ending on the 30th day of June last. Mr. Mitchel, the chairman presided.

The CHAIRMAN said he thought they might congratulate themselves on the general prosperity of the institution. He did not refer so much to the value of their shares on the Stock Exchange, as to the fact that every half-year the proprietary were making a wider basis by the admission of small holders, who were looking to the bank as an investment, a class which he considered a very valuable one, and also to the increase which took place every half-year in their deposits. As they were aware, credit was the main source of prosperity to every bank, and the directors had always laid great stress upon that which was the best safeguard of credit, an ample reserved fund. Circumstances had not admitted, hitherto, of their making up the reserve fund to anything like the amount which it ought to be at. As they were aware, they had in the last year an unhappy loss of £50,000, which they had to clear off altogether, and they considered that a sufficient call on the shareholders, without stopping their dividends further to add to the reserve fund. Things were now in a very different position. This was not the time for them to submit a proposition to make an addition to the reserve fund. They left that back for the annual meeting in April. Still the directors considered it indispensable that, in submitting to the shareholders any dividend for the half-year, they should keep back such a sum as would go far towards making, at the close of the year, a large addition to the reserve fund, thereby confirming the credit which the bank had hitherto enjoyed.

He could now state, in round figures, the result of the profit and loss account. They never gave them exactly at this meeting, but he could state them within a few hundred pounds. In point of fact, the books were balanced every half-year, and the auditors had examined them. They carried forward £4,368 undivided profits from the previous half-year. To those undivided profits they had to add the earnings in the half-year ending 30th June, £51,559, being at the rate of 16 per cent. per annum. That made in round figures a total sum for distribution of £56,000. In proposing a dividend out of that sum he must candidly add that the directors had borne in mind that during the previous year, in consequence of the unfortunate loss to which he had adverted, the shareholders received only one dividend of 2½ per cent. They therefore thought that, with every consideration for the reserve fund, they ought to stretch the point a little, and that the dividend this half-year should be at the rate of 10 per cent. per annum, free of income-tax. That would absorb £32,200 and would leave £23,800 to be carried forward to the next half-year, and to be ultimately absorbed in a reserve fund.

Banks in the East were not under such perfect control as those at home, but all they could say was that at the present moment the bank was in a very good condition. Since their last meeting their branches at Rangoon and Kurrachee had been in operation, and they had determined on opening a branch at Batavia. There was nothing in the law of Holland to prevent them, and they learned that there was an ample field there. They had come to this determination on the advice of their manager at Singapore, and they had a gentleman now on his way out who had had great experience in Holland, and who understood the language. They meant to pursue the same course, leaving the occupied fields to others, and from time to time looking to new places for business where there was a margin open for a fresh bank. In conclusion, he moved, "That an interim dividend of 5 per cent., free of income-tax, be now declared for the half-year ended on the 30th June last, payable on and after the 14th inst."

Mr. PETER BELL seconded.

Mr. HUGGINS said the capital account was, as they all knew, £1,000,000, out of which £644,000 had been called up, leaving £356,000 still to be called. It would be agreeable to the shareholders to know whether the directors intended to call this up. It seemed to him the time had arrived when, with great advantage to the shareholders, the whole of the capital might be called up, by means of which they would be in possession of a large reserved fund, and be in the enjoyment of the dividends. (Hear, hear.)

The CHAIRMAN said they might, according to the charter, extend the capital to three millions, with the consent of the Treasury, but the directors had power, without reference to the Treasury, to raise the capital to one million. That was under the consideration of the directors—(hear, hear)—and they could make that increase of capital without calling a meeting of the shareholders.

The motion was then put and unanimously agreed to, and a vote of thanks having been given to the chairman and directors, the meeting separated.

Naval and Military.

The screw corvette Scylla, noticed in our last, finally sailed from Plymouth to China on the 7th inst. The Pelorous, it is still rumoured, will follow shortly.

The following letter has been published from an officer in the Japan fleet:—"Amidst these war alarms, we have had time to join in a good action to assist the Orpheus Fund. The subscription from the squadron is large in the aggregate, the flagship Euryalus contributed £100. In addition there have been private theatricals by the officers with the greatest success, £150 being thereby added to the fund. The loan of a big store on shore was obtained, and a capital theatre and stage it made. The tickets were $5 (£1. 5s. 5d.) to "milord" of the coin; officers of the squadron, $1. The gross proceeds reached $744, which, after the payment of the expenses, left the sum above named to be added to the fund. The programme (on silk, *a la mode* for the mesdames) was a good one, and was carried out most successfully. The acting was good, and in some cases would have done credit to professionals. The pieces chosen were the laughable farce of *A Regular Fix*, followed by a comic song, after which *Box and Cox*, *Married and Settled*, then a hornpipe, concluding with the screaming farce *Bowled Out*. The officers taking parts were —Mr. Secretary Shanks, Mr. Haly, Lieutenant Hunter, Mr. Jones, Mr. Tipping, Mr. Richards, Lieutenant Jephson, and Mr. Kuper. The female parts were ably sustained by Messrs. Moore, Williams, Atkinson, Boyes, Stirling, Edwards (Lieutenant)."

The following gunboats have been removed from the official *Navy List*, the whole of them having been ordered to be broken up—viz., the Carnation, the Dwarf, the Fidget, the Manly, the Pelter, the Spey, the Thistle, the Mastiff, and the Tickler, each of two guns and 250 tons burden. The above were attached to the Chatham steam reserve, and a recent inspection of the gunboats belonging to the Portsmouth steam reserve has resulted in the discovery that several of that class are unfitted for further service.

LONDON, THURSDAY, OCT. 15, 1863.

BRITISH RIGHTS IN JAPAN.

The foundation of all the treaties entered into by foreign nations with Japan is the right of residence. No repudiation of such a right on the part of a faction can be recognised. For the murder of our subjects, outrages on our residents, insults to our flag, and an attack on our vessels, we are bound to obtain compensation or redress; but for exclusion from the soil, no compensation, reclamation, or redress is possible; and, accordingly, it is our first business to hold the settlements at all hazards. We recognise in the fiat of the spiritual Emperor the indications of a political disorganisation which necessitates either withdrawment of the people from foreign contact or the sacrifice of empty pretensions appealing to their abject veneration. The Tycoon has hitherto only visited him once in seven years; but the present condition of affairs is sufficiently ominous to have induced another personal interviewt So long as the decree of expulsion is extant, the haughty pride of Japanese officials is soothed; and although the position of the spiritual Emperor is only nominally superior to that of the Tycoon, there is no doubt that the course of the temporal Emperor, in his dealings with foreigners, is watched with jealous surveillance, and that this potentate finds it more difficult every hour to play the double game of a conciliatory disposition to the maritime powers in his waters and of a formal upholding and pretended carrying out of a decree impossible to execute. The Japanese Court is endowed with too little dignity to see the ridiculousness of its own position Under the influence of an extreme fanaticism that would tempt them, should opportunity offer, to go any length, the Japanese so miscalculate the application of means to ends, and have so underestimated the force foreign nations can bring to bear against them, that they have defeated even the temporary success of their scheme, and unintentionally afforded a timely warning. The edict is consequently null; a record of blind rage and folly. Whilst Admiral Kuper assigns a powerful fleet to operate against the Prince of Satsuma, he is enabled to leave an equal number in the port of Yokohama to defend effectively the settlement in co-operation with French, Dutch, and American vessels. Every day this settlement is held the *prestige* of the spiritual Emperor declines, and it becomes more apparent to the people that the real power lies with the Tycoon, who, to the extent that he is strengthened in opposition to the western princes, will probably be disposed to carry out the policy which the maritime powers, so long insulted and bullied, will not fail to dictate. The result of a naval attack on any of the sea forts of the Prince of Satsuma cannot be doubtful; but the ultimate effect of this demonstration, so far as concerns the delivery of the murderers, cannot at present be foreseen. Apart from the fact that we had no other means of obtaining redress. than by a show of power, but by a demonstration of readiness to withstand any hostile and retrogressive policy, to meet any attack, naval or military, with a like return, and of our ability to strengthen the central authority provided the Tycoon can be brought to act in a liberal spirit, independently of the dictation of certain Western Daimios, there is no question that, with the growing and unruly power of the latter, a civil and destructive war would soon have broken out. It is to be remembered, also, that we do not force our trade upon the Japanese, but leave them to their own individual freedom; and that the British Government has had recourse to present measures not only as an indemnity for past wrongs, but to secure "protection to person and property;" the unmolested enjoyment of guaranteed treaty rights.

STEAMERS, &c., FOR CHINA.

The movements under this head since our last comprise the following:—

The China and Japan Company have had one of the vessels noticed at their last meeting, launched from the yard of Messrs. Robert Duncan and Co., Port Glasgow. This vessel is named *Teen-Chung*. Her length is 130 feet, beam 22, depth 10½, register tonnage 300. She will be fitted with paddle-wheel engines of 100-horse power, and is expected to be ready for despatch in about six weeks.

A small screw, called the *Fo-ki-Lin*, has been despatched from Newcastle to Shanghai by Messrs. Holmes, Knevitt, and Holmes. She is commanded by Capt. Skene, and her register tonnage is only 41 tons, while her engines are of 40-horse power, length 69 feet, beam 16, depth 8½. She is consigned to Capt. Patridge, and we trust she will brave all the stormy seas between this and Shanghai in safety.

The iron-framed and wood-planked clipper for Messrs. Charles Shaw and Co., has been launched by Messrs. A. Stephen and Son, on Clyde, and is called the *Eliza Shaw*. Her register tonnage is about 700 tons, and she will shortly be despatched from Liverpool to Shanghai.

Another craft for the China trade, called the *Yang-tsze*, has has also been launched by Messrs. Hall and Co., Aberdeen, of similar build and tonnage, for Messrs. Killick, Martin, and Co., and others. She will be commanded by Capt. Billing, for several years in the China trade, and will load for Hong Kong and Foo-Chow.

CHINA INDEMNITY.

The following is a statement of the sums received on account of the China indemnity, under the treaty of Peking, of the 24th day of October, 1860, made up to the latest date to which accounts have been received from China, and of the balance which then remained unpaid:—Payable by the Chinese Government under the treaty of Peking, dated 24th October, 1860, viz.:—

1. Indemnity for the prisoners who were unfairly captured by the Chinese on Sept. 18th, 1860, 300,000 taels.

2. Indemnity for Canton losses, 2,000,000 taels; indemnity for war expenses, 6,000,000 taels; total, 8,300,000 taels.

The sums actually received under the treaty are:—Indemnity for prisoners—received at Peking on 25th October, 1860, 297,577½ taels. The amount stipulated for was 300,000 taels, but on weighing the sycee at Hong Kong there was found to be a deficiency of 2,422½ taels. Amount realised from sale of the above by public tender at Hong Kong, £92,733. 11s. 6d.; deduct expenses, £1,293. 10s.; balance, £91,440. 1s. 6d.

On account of the indemnity of 8,000,000 taels for Canton losses and war expenses:—Total amount received, in taels, 3,450,457; balance remaining unpaid on 31st December, 1862, 4,549,543 taels. The sum payable at Canton was subject to a deduction on account of the sum advanced by the authorities at that place towards the completion of the foreign factories (Shameen site).

OVERLAND COMMUNICATION BETWEEN RANGOON AND WESTERN CHINA.

Well-merited success is at last dawning on the life-long effort, of Captain Sprye to awaken the attention of the mercantile public and of the Home and Indian Governments, to the splendid field for enterprise presented by his project of an overland route from Rangoon to the farthest West Chinese inland province of Yunan. Coupled as the project is with the extension of telegraphic communication from Shooé-Gyen (the present eastern terminus of the Indian wires) to our great Asiatic emporium Hong-Kong, it seems difficult to realise the bigoted shortsightedness that has so long resolutely closed the official eye to a project involving such enormous advantages, alike to our home trade and manufactures, our Indian possessions, and that singular empire beyond, which, at a bound, has sprung into the position of one of our best customers. Its advantages have been so often dwelt upon, that it seems a work of supererogation to recapitulate them: but just as cold iron becomes hot under the process of hammering, so we may expect that a constant iteration of the proposals of the projector, and a continued reminder of how little co-operation is really sought from Government, may ultimately rouse even the dormant official mind and induce it to enter, however tardily, upon this peaceful path of true progress.

Digitized by Google

We are the more anxious that this great and sound project should be kept before the eye of the public because, if our Foreign Office is permitted longer to exercise secret hostility to it, even the present general movement in its favour may be for yet awhile paralysed. It would be a great boon to our Eastern possessions, in their relations with foreign Governments and in their commercial intercourse with the home country, if all necessary diplomatic correspondence were transacted by the Colonial rather than by the Foreign Office. Our interest in the matter is purely colonial, and almost invariably commercial; and as such lies more in the line of the Colonial Secretary of State, or of the President of the Board of Trade (under whom our Consuls the world over—who are rightly but officers to watch over and protect the interests of our *trade* where they are stationed—should unquestionably be placed) than of their more formally reserved and irresponsible diplomatic colleague of the Foreign Office. Why should not the latter confine his attention to European and American diplomacy; be content with the patronage of ambassadors, ministers, and their innumerable aids; and leave the momentous trading interests of our possessions in the Far East, and our Consular establishments generally, to be watched over by the Colonial Office or Board of Trade? Had such an arrangement existed, we feel sure that long ere this instructions would have been sent out to give practical effect to the principle of our treaty with Burmah, by availing ourselves to the utmost of that singularly liberal article which provides for the free transit and unmolested residence of Englishmen in any part of the Burmese dominions. From this point it is but a step to obtain permission from the enlightened monarch who granted us these facilities, to survey the route beyond our own frontier-line to the city of Kiang-Hung, on the Upper Cambodia, near the point where that great water highway issues from the Chinese territory and enters the Burmese South-Eastern Shan Provinces (22 deg. N., 101 deg. 15 min. E.). From the north-eastern limit of Pegu to this point is only about 250 miles; but no survey, of course, can be with propriety entered upon without a preliminary communication with the Burmese Sovereign through the ordinary official channel. Thus further advance of the project by him who has brought it to its present strong vitality may be still awhile impeded; though, as we mentioned at the commencement of this article, there are good grounds for hoping that the crust of ministerial apathy and secret official obstructiveness is at last about to be pierced.

Since we last noticed this project,* the good seed has been fructifying in our various Chambers of Commerce, which are now literally besieging the PRIME MINISTER with memorials, calling for a detailed survey from Rangoon by properly qualified surveyors, and for official representations to the King of BURMAH of the importance of carrying such a survey beyond our boundary across his two Shan States of Kiang-tung and Kiang-hung. The Liverpool, Manchester, Leeds, and other commercial Chambers, including our principal mercantile and manufacturing centres of industry, and last, not least, the Cotton Supply Association, have been knocking at the Treasury doors, in session and out of session, in favour of this project; and, even as we write, "the cry is still they come!" It is not surprising it should be so. As regards the last-named association, its members doubtless do not forget that it was from the Valley of Irrawaddy, and from the coast of Mergui and Tenasserim that the two leading staples of the modern cotton fabric were first derived: the former producing, at next to nothing of cost for labour, the exquisite "woven-wind" fabrics which, so lately as 1720, were three times the value of silk; while from the latter were propagated the various Sea-Island and other high-class cottons, which it only requires renewed facility for cultivation on their indigenous soil to restore to their old supremacy in the market.

As to the general trader, what visions of splendid argosies must enchant his mental vision, as he pictures half an empire, containing 200,000,000 of peaceful and industrious inhabitants brought, by 500 miles of tramway, within easy and constant reach of a British port in the Bay of Bengal, and in contact with European facilities and civilisation; instead of being shut in, as hitherto, from all interchange of produce and of ideas with outer nations! What little of the produce of those marvellous Chinese provinces of Yunnan and Sze-chuen has hitherto reached our market, had been carried a detour of thousands of miles: first by tedious winding river routes to the Eastern coast of China, and thence through the intricate navigation of the China seas and Malacca Straits, exposed to typhoons, to pirates, to sunken shoals, and all the hundred-and-one chances of Eastern navigation; for which even an ordinary marine policy expressly disclaims liability! By Captain SPRYE'S route this mine of wealth is brought within 500 miles of one of the best ports in British India, across a corner of the territory of an enlightened Sovereign and friendly people, without breaking bulk, and in a couple of days instead of many weeks. We look forward to the time when the high-class teas of the provinces of Western China, their silk, musk, precious metals, and raw produce, given in exchange for British and Indian products, will keep up a constant stream of active commerce over the projected tramroad. A visitor to the less known regions of the route, so far back as 1836, described the native commerce as being something hardly credible in such a remote and hitherto little-known region of interior Asia, and we look upon it as much more than a fortunate coincidence, that the officer to whom we are indebted for very valuable information respecting this unexplored region, collected upwards of a quarter of a century ago, is now the general officer commanding H.M.'s troops in Pegu. Major-General MACLEOD is as zealous an advocate now of this splendid enterprise as he was when, in company with Mr. KENNEDY, he examined the upper waters of the Cambodia in 1836. And it is no secret that, consequent on Captain SPRYE'S agitation of the subject, leading authorities in the East now advocate its immediate realisation.

It must not be supposed, however, that the phalanx of ignorant and interested objectors, though defeated, has been utterly driven from the field. It has already been satisfactorily ascertained that it was, to say the least, a rash assertion which, when Captain SPRYE first opened his project in 1860 to the Royal Geographical Society, represented all the country eastward of the Valley of Irrawaddy as rugged, sterile, inhospitable, and mountainous. But even granting that this were the case, it does not affect the fact, with which we believe the Captain originally started, viz., that it matters not how barren difficult and unprofitable may be the intermediate portion of any great commercial highway, provided the *termini* will provide sufficient permanent traffic. All analogy proves this fact in economics. Many a road, many a canal, many a tramway—nay, many a railroad even, has been constructed between two distant *termini* having little or no traffic along the line; which, nevertheless, has not only paid well, but has actually developed a local traffic, "making the wilderness to sing, and the barren land to rejoice." Or, take the strongest example of all—the ocean itself. What local traffic is not there upon it? Hence, by every mode of reasoning that can be advanced, we always find the same result—viz., that, provided the trade between the *termini* of a commercial route is sufficient, the want of mere wayside traffic need not be considered, except as a probable increment to the revenue in the certain event of its being, if non-existent, created—or, if already in existence, enormously developed—by the route itself. What the prospects are of the trade between the two points indicated, with the manufactures and commercial enterprise of England at one end, and the natural wealth and industrial products and population of Western China at the other, we have already demonstrated, and we leave these facts and arguments to speak for themselves with the sensible portion of the public; merely reminding them, in concluding our consideration of this, the commercial view of the enterprise, that they themselves would, by the extension of the electric telegraph, reap all those benefits of early information which are at present monopolised by a few great houses in the China trade, whose capital enables them with clipper opium steamers to forestall advices by the ordinary mail.

It must not be lost sight of, however, that there is another not less pressing consideration involved in the immediate adoption of this project of an overland route to China from Pegu. This route as we have seen, extends to the great river Cambodia, 1,200 miles from its mouth, where it still is navigable for vessels drawing more than twelve feet water. Following the river downwards, we pass the Siamese Shan States and the rich countries of Laos and Cambogia, and come to the new French colony of Saigon; and thence, tracing the Cochin coast northwards, we find the port of Hué, not 600 miles from the key of our overland route, the city of Kiang-hung. Readers of Eastern news during the last few years need not to be informed of the chronic warfare that has been carried on by the French at those two points, so widely distant from each other. What can be the

* *Vide London and China Telegraph*, 13th Feb., 1863.

Digitized by Google

object in selecting points of attack so far apart? There is but one answer. Obviously France is feeling her way to *command the whole course of the Cambodia*, so as to overawe at once Rangoon, Moulmain, Bangkok, and the Kraw Isthmus. It is proverbially difficult to indoctrinate *our* Foreign Office with the principles of geography, whether physical or political: but there are certain positions which at first sight impress the most casual and ignorant with their strength and commanding importance. Unless we are beforehand with her, and take advantage of her misunderstandings with the natives lower down, France will inevitably hold Annam on the same terms as she now holds Algeria. It is all very well to say that France is not a colonising country. The remark may be perfectly true—and as perfectly irrelevant. If permitted to push her outposts up the valley of the Cambodia, before our arrangements are perfected for opening up in our own interest the trade of Western China, *viâ* Kiang-hung, we shall strive in vain to recover the ground we have lost. It is true, we shall only be so far worse off that we have, through our dogged official apathy, let slip through our fingers a great opportunity. We shall be none the poorer actually; but we shall have the painful reflection that our own supineness, our own incapacity to comprehend the magnitude of the prize at stake, our own unwillingness to trust the future even without imperilling the present, have sacrificed the most splendid opening that has presented itself to our national spirit of enterprise, since the trade of the East passed into our hands 170 years since. Next to our own manufacturers and merchants, the real losers will be those very Western provinces of China; the people of which, between the jealousies of two European powers conterminous in the Far East, will find that they are permanently left to the old circuitous route down the Yang-tse, ere their products can be got within reach of the extreme outskirts even of European civilisation and enterprise.

It is incumbent, then, to strike while the iron is hot, to force upon the attention of Government the inestimable advantages to be derived from the prosecution of this peaceful enterprise, projected by a gentleman who has shown himself to possess what CARLYLE emphatically calls the true test of genius, "enormous capacity for labour." Under disheartening clouds of ignorance and prejudice, through good report and evil report, Captain SPRYE has held the even tenor of his way; and, undeterred by distance, or by the privations and dangers in which such exploring journies must involve them, the CAPTAIN and his SON, before Lord ELGIN proceeded on his second mission to China, officially proposed to the Foreign Office that they should accompany him, having only their expenses paid, expressly to assist in arranging with the Chinese Government when finally brought to terms, for the setting up of telegraph wires from Kiang-hung to Hong Kong; and thence, by the open ports, to Peking; in addition to which good service to their country they further proposed that after those arrangements should be satisfactorily effected, they should together travel from Canton up the Pearl or West river valley to Kiang-hung; and that there separating, the one should proceed south down the Cambogia river to Saigon, and the other travel westward through Kiang-tung to the north-east frontier of British Pegu.

We imagine there is not a Government in the world save our own, having a tithe of the vast commercial interests we have in that quarter of the world, but would have gladly accepted such a proposal from such men, and have cordially co-operated with them in the execution of their sound and well-considered plans. Alas, however, for the interests of our manufacturers and merchants, and of those depending for support on their prosperity, the foreign trade of the country, and all matters official bearing on it, are universally under the control of the commercially and geographically worst-informed of our State Departments—the Foreign Office. No wonder, then, that the only notice taken of the liberal offer of Messrs. SPRYE was a curt few lines from a subordinate official declining it. They were not, we imagine, sufficiently closely allied to any one of the Whig families who consider themselves to exist expressly to govern the country and dispense its patronage among their kith and kin. The project, too, was one not likely to involve the nation in a costly transmarine war productive of commands and appointments, or to increase ambassadorial or consular berths. Therefore, neither one nor the other was worth being for a moment considered by the thorough Whig Minister who then presided over our Foreign Office, and still holds sway there. Let it not be said, however, as in the case of ill-used WAUGHORN, that another of our great commercial pioneers has had only posthumous honours paid him for having inaugurated for his country's permanent benefit one of the grand enterprises of the age. Rather let us send up, not memorials only, but deputations to the PREMIER besiege, Parliament with petitions, and thunder with remonstrances at Ministerial offices—the Board of Trade in particular—till the sleepy gods within are roused into wakefulness and wholesome activity. Then we shall have done our duty by a public benefactor, while advancing some of the best interests of our country and of India, as well as of humanity at home and in distant heathen lands.

TRADE WITH THE WEST OF CHINA.

The following are among the further memorials which have been sent up since the three given in our last issue, by the principal commercial associations of the kingdom to the Prime Minister, calling his attention to the too long neglected proposition of Captain and Mr. Sprye for the establishment of an active and regular trade with the West of China Proper, overland, from Rangoon to the Upper Cambogia River:—

MEMORIAL 14.

This is the second from the Liverpool Shipowners' Association to Her Majesty's Ministers on the subject:—

"*To the Right Honourable*
"*Viscount Palmerston, K.G., G.C.B., M.P.,*
"*First Lord of Her Majesty's Treasury.*

"The Memorial of the Liverpool Shipowners' Association respectfully showeth:—

"1st. That having had much under their consideration the great importance to the manufacturing, mercantile, and shipping interests of the United Kingdom, of opening up a direct commerce with the West of China, overland from the Port of Rangoon, your Lordship's memorialists had the honour, in the month of October last year, to address a memorial to Her Majesty's Secretary of State for India, praying his favourable consideration to the negotiation of a treaty with the King of Burmah, fixing the transit duties across his territory, and to the survey of the line of country from Rangoon to Kiang-hung, for a railway, tramway, or such other road as will suffice for the extension of the commerce which may be confidently expected to pass over it.

"2nd. That your memorialists have, therefore, learned with extreme satisfaction that since then such a treaty has been entered into between the King of Burmah and Her Majesty's Viceroy and Governor-General of India in Her Majesty's behalf; the provisions of which treaty, if rightfully availed of, are very favourable to the establishment of such a commerce with Western China.

"3rd. That to make treaty available, your memorialists believe that it is necessary a road should be made by the most direct practicable route over the line of country from Rangoon to Kiang-hung, on the Upper Cambogia River.

"Your memorialists, therefore, very respectfully pray your Lordship that you will be pleased to cause early instructions to be transmitted to Her Majesty's Viceroy and Governor-General of India, to have a survey made to ascertain the best route for merchandise between Rangoon and Kiang-hung; and that such survey may be carried out by some well-known and approved engineer, so as to insure, as far as possible, the election of the best route.

"And your memorialists will ever pray, &c.,
"(Signed) "THOMAS CHILTON,
"Shipowners' Association, Liverpool, "Chairman.
"24th September, 1863."

MEMORIAL 15.

This is the third memorial from the Leeds Chamber of Commerce to Her Majesty's Ministers on the subject:—

"*To the Right Honourable*
"*Viscount Palmerston, K.G., G.C.B., M.P.,*
"*First Lord of Her Majesty's Treasury.*

"The Memorial of the Leeds Chamber of Commerce, through its President, showeth:—

"That in the year 1860 your memorialists had the honour to address your Lordship in reference to the desirableness of efforts being made to open more direct commercial relations between this country and the South-western provinces of China Proper, through the Port of Rangoon in British Pegu; and that later in the year your memorialists addressed Her Majesty's Secretary of State for Foreign Affairs on the same subject.

"2. That since then a treaty of commerce has been concluded with the King of Burmah, by which the transit of goods and passengers is permitted through Burmah on reasonable terms: and your memorialists believe that the conclusion of this treaty affords a favourable opportunity for extending the trade of this country with such Western Provinces of China.

"3. That these provinces are inhabited by a numerous, industrious, and wealthy population; and produce tea, silk, and other articles of the best quality, well suited for European consumption; against which the products of England may be beneficially exchanged.

"4. That, at present, access to those provinces of China is circuitous, difficult, and expensive; and in the opinion of your memorialists commercial relations with them cannot be satisfactorily developed until a more direct and convenient route is established for it.

"5. That the city of Esmok, a large commercial city on the South-west frontier of China Proper, is a suitable centre for trading purposes; being connected by roads, canals, and navigable rivers, with a large number of populous trading towns spread over the neighbouring provinces of China.

"6. That a tramway or road from Rangoon to Kiang-hung on the Upper Cambogia River will afford an efficient means of communication between Rangoon and the said Chinese provinces.

Digitized by Google

"7. That before such a tramway or road can be constructed, it is essential that a careful survey of the intermediate country should be made—a distance of about 500 miles, with a view to discovering the most advantageous route for commercial purposes.

"Your memorialists, therefore, respectfully request that instructions may be sent to the Indian Government to cause such survey to be immediately made through British Pegu; and to obtain the King of Burmah to make, or to permit to be made, a similar survey through the intervening portion of his country.

"Your memorialists would further request that such survey may be intrusted to a competent engineer, specially instructed to keep in view the advantage of such route for commercial purposes, and for the establishment of telegraphic communications, and its capabilities of being kept open for trade throughout the year.

"(Signed) "Darnton Lupton,
"Chamber of Commerce, Leeds, "President.
"1st October, 1863."

MEMORIAL 16.

This is the third which has been sent up to Her Majesty's Ministers on the subject by the Liverpool Chamber of Commerce:—

"*To the Right Honourable*
"*Viscount Palmerston, K.G., G.C.B., M.P.,*
"*First Lord of Her Majesty's Treasury.*

"My Lord,—I have been requested by this Council again to bring under the notice of your Lordship the question of opening up a trade with the western portion of China Proper, and to call to your remembrance the fact that in August, 1860, and September, 1862, this Chamber addressed communications to departments of Her Majesty's Government upon the subject.

"Since then this Chamber has been much gratified to learn that a treaty of commerce has been arranged between Her Majesty's Government and the King of Burmah, which permits the settlement of British merchants in Burmah, and of Burmese merchants in the British territory, for the purposes of trade.

"For the full development of the provisions of that treaty, this Chamber is of opinion that, if a thorough practical survey, under the superintendence and direction of duly qualified persons, were made, in order to ascertain the most direct and easy line for a tramway or road for the conveyance of goods and passengers between Rangoon and Kiang-hung, private enterprise would most likely be used to establish a means of commercial communication between British territory and Western China.

"The Council of this Chamber, therefore, humbly submit this subject to the favourable consideration of your Lordship, in the hope that the suggestion they have ventured to make may receive the careful attention of your Lordship and of Her Majesty's Government.

"I have the honour to be, my Lord,
"Your most obedient humble servant,
"(Signed) "R. A. Macfie,
"Chamber of Commerce, Liverpool, "President.
"6th October, 1863."

THE ANNAMITE AMBASSADORS.

(FROM OUR PARIS CORRESPONDENT.)

The time appointed for the departure of the Ambassadors of Tu-Duc is rapidly approaching, if it has not already expired, and they have not yet seen the face of the Emperor, nor can they have made much advance in the business for which they specially visit Europe, namely, the repurchase of the provinces ceded to France by the late treaty, for there has scarcely been a minister at his post in Paris since their arrival. Rumour says that Phan-Tang-Giang is extremely disgusted, and does not conceal his feeling that he is being played with, and that his visit will have little other result than making a few of his countrymen acquainted with the outside of French habits and customs. Whether there is any truth in this it is impossible to say, but it is pretty evident that there will be a very short interval between the Imperial reception and the *congé*, and that when the Ambassadors have laid Tu-Duc's presents at the feet of Louis Napoleon, and have expressed the intense admiration which their master feels for France, they may think of packing up and calling at Madrid on their way home. Nothing is said about their visiting England, and perhaps, under the circumstances, such an act would be a breach of diplomatic etiquette. The Emperor is expected to arrive in Paris daily, and will, most likely, be at St. Cloud before this is in print, but the reception of the Annamites is announced, semi-officially, as to take place at Compiègne, where the Court will certainly not arrive before the 20th instant, and probably not till the beginning of November. Besides the representatives of Tu-Duc, the King of Greece, the Emperor elect of Mexico, and the deputation from that country, are expected to visit Compiègne.

While the Ambassadors and their suite are waiting the Imperial pleasure, they are being introduced to the lions of Paris, and are in their turn lions for the gossips and loungers of this gossipping and lounging capital. Their dark visages and strange dresses are to be seen wherever there is anything to amuse the eye or attract attention; and writers of gossip and comic sketches treat the world daily to accounts of the doings, sayings, and even thoughts, of the visitors, more or less true, and more or less amusing. They have arrived in the midst of the off season of *canards* and big mushrooms, and are a mine of wealth to the penny-a-liners. Amongst a thousand other things said about them are the following:—Ten of the Embassy are natives of Lower Cochin, and the rest of Hué, the capital of the Kingdom of Annam; seven of them are Christians, converted by the missionaries and are persons of great erudition, speaking Latin, French, English, and Spanish, and being well informed respecting European literature and philosophy; and all wear the dress of the old Chinese dynasty of Ming. It is said they are making elaborate memoranda of what they see and hear, and that whenever they are at home the Secretaries of the Embassy are fully occupied writing up the journals from the dictation of their superiors. It is evident, from all accounts, that the envoys sent over are serious men and are entrusted with serious duties; and it is remarked, to their credit, that matters of utility and industry rivet their attention far more than mere spectacles and amusements. In the picture galleries they were especially struck with the effects of perspective; gas lighting naturally attracted their curiosity immensely, and they have been taken over the metropolitan gas works, where they listened with deep interest to the explanations afforded. The tapestry manufacture of the Gobelins chained them for a considerable time, especially the dye-houses attached to the works, where they examined the samples of coloured wools minutely, comparing them with the brilliant hues of their own dresses, and inquiring respecting the substances and methods used in the production of the various tints. At the Jardine d'Acclimatation, the system of managing bees and the culture of the silk-worm naturally attracted their attention, and they spent nearly the whole of a day there, and expressed an intention of paying the establishment another visit.

As regards the personal habits of the Ambassadors, we are told that they think so highly of French cookery that they have adopted it entirely, and have thrown aside the provisions which they brought with them from their country, and that they at once took very kindly to French tables and chairs, and French beds and bedding. Admiral Bonard received a visit from the Embassy the other day at the Hôtel de Bade, where he is staying, Lieut. Recunier and M. Aubaret acting as interpreters between the host and his guests. The Chief Ambassador took his seat on a sofa by the side of the Admiral, and partook of tea and cakes, which he seemed to enjoy. He afterwards drank several glasses of champagne in acknowledgment of his health being drunk by various members of the company, and pronounced the tipple excellent.

A characteristic incident is said to have occurred at this visit. The son of the chief Ambassador, a youth of fifteen or sixteen, was present, and was invited by Admiral Bonard to drink a glass of champagne. The boy refused, but his father made a slight sign to him, when he took the proffered glass, bowed, touched it against that of the gentleman who had invited him to drink, as he had seen others do, and then turning away towards the wall, he tossed off the wine at a draught. It appears that a well-educated young Annamite neither sits down, eats, nor drinks, in his father's sight.

A special performance was given the other night by M. Robin, the wizard, for the gratification of the Ambassadors, who were much delighted with the scientific tricks, of which he is an able exhibitor; and they were not a little astonished to see the spectre of one of their own attendants produced on the stage and run through with a small sword. M. Robin also surprised them with some beautiful dissolving views, including two of the grotto Quam-am, at Tourane, in Cochin, expressly prepared for the occasion. Of course, the comic fellows won't "let the bodies be," and the *gests* of the Annamites are served up in all quarters and in all forms. One smart writer gives us their memoranda after the fashion of Goldsmith's "letters from Mustapha-rub-a-dub-kely-khan, in the "Citizen of the World," and manages to put in their mouths some amusing cuts at French manners. He makes the visitors suffer so terribly from the damp, cold atmosphere of Paris that they dread being compelled to adopt the frightful costumes worn by the natives of this inhospitable clime, until some kind friend introduces flannel waistcoats, which they wrap round their shivering bodies beneath their own silk stuffs, and glow again with warmth and gratitude. One of the Annamites inquires who sent these delicious garments, and being told that they came from the hosier, he declared that hosier could mean nothing else than blessed spirit, and that whenever anyone did him a service in future, he should say, "you are a hosier!" The same journalist books the remark that

Digitized by Google

the French are generally ugly; that they want the long, large ears which are indubitable signs of intellect and scientific capacity, that their noses are too small and too short, their eyes too large, their faces not square enough, their mouths too small, and wanting altogether in the ornament of ebony-tinted teeth. The visitors are surprised that the French should carry their money in such an inconvenient manner instead of having a hole through their *cash*, and carrying them on a string as in China; and are perfectly scandalised at the filthy habits of using a handkerchief more than once, and actually carrying it in their pockets, and afterwards wiping their eyes and faces with it. "My very heart heaves when I speak of it!" says the Annamite exquisite. The chronicler persists in thinking that his Ambassadors were taken to the gas works to smell the perfume in which the Parisians delight, and pokes his fun at the Governors who tried to look as though they enjoyed the exhibition. He remarks that the judges here never have beards, but that the ladies have sometimes, which is certainly ungallant! At the hippodrome, this fast young journalist takes the acrobats for criminals condemned to break their necks sooner or later for the amusement of a brutalised populace, and looks upon the trapeze as a horrible instrument of torture and lingering death. Crinolines naturally do not escape, and he wants to discover how husbands lock up these steel cages in which their wives are imprisoned.

A banquet, followed by a display of fireworks, took place at the residence of the Annamite Ambassadors in honour of the birthday of their Sovereign. Numerous invitations had been issued to persons in the official world. Although women in Cochin China hold but a secondary rank, and never sit, particularly in the higher classes, at table with their husbands, PHAN-TANG-GIANG departed from the usual etiquette, and invited Madame VANNIER, the old Annamite lady, formerly married to a French officer, and her daughter to the banquet. They presented themselves in splendid Annamite costume, and the Ambassador, feeling grateful for this mark of attention, departed from the customs of the East and paid them a well-turned compliment on their politeness. On the company taking their seats at table, M. AUBARET, the officer who acts as interpreter, presented the first Ambassador with a letter from M. DROUYN DE LHUYS, in which the hon. Minister testified to the delegates of TU-DUC his sympathy in the *fête* which was then being celebrated. The letter expressed in the most friendly terms the desire of the French Government that the treaty concluded at Huć, beween France and the Empire of Annam, might lead to a durable union between the two countries. PHAN-TANG-GIANG received the letter with every mark of respect, holding it for a short time in both hands over his head, and then said to the persons present, "I also offer up the most sincere wishes for the long duration of the friendly relations which now unite the two greatest nations of the West and the East."

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, OCT. 5.

According to the financial statement of the Minister of Finance in the Second Chamber of the States-General, the affairs of this country are in a most flourishing condition, mainly owing to the possession of Java and other parts of Netherlands India, which contribute largely to the total revenue, and enable the Government to pay off every year a part of the national debt, and cover the extraordinary expenses that would otherwise have to be raised by new taxes. The disposable surplus of the colonial revenue for 1863 is put down at 26,882,396 fl. 55 cents, or, as the Minister estimates it in round numbers, at 27 millions of florins. The estimated home revenue for 1864 is taken at 62,835,695 fl. 80 cents. With a few other items, the total receipts are set down at 106,269,949 fl. 13 cents, whilst the expenditure for 1864 is estimated as follows:—Ordinary current expenses for the home service 73,508,514 fl. 59 cents, and extraordinary expenses (including 15½ millions for railroads and 5 millions towards paying off the national debt) 24,634,253 fl. 33 cents, making a grand total of 98,142,767 fl. 92 cents, and leaving as surplus the respectable sum of 8,127,181 fl. 21 cents.

The *Staats Courant* contains the following announcement of the Colonial Department:—

"Goods of Dutch produce or manufacture, accompanied by a certificate of origin, exported from this country after the 1st of November, 1863, by the so-called overland mail, will be admitted into Netherlands India on payment of the reduced import duty, provided they are reshipped from Singapore by Dutch vessels or those assimilated to them by treaty. (The flags of Russia, France, Belgium, Spain, and Portugal are thus excluded from the competition.) In order to obtain such certificate from the Colonial Minister, the exporter must send in a declaration stating that the goods are to be sent by the overland route, with a specification of the contents. (This certificate supersedes the one usually required in Netherlands India for goods imported, containing the name of the ship and captain.) The certificate granted will be worded as follows:—

"'Seen and registered, in order to enjoy the privileges accorded to goods of Dutch origin, on arrival in Netherlands India by the overland mail of the . . .

"'The Hague . . .

"'(Signed by the Colonial Department.)

"It will be important to those who may wish to make use of this facility to know that the other regulations in force concerning the certificates of goods of Dutch produce or industry as contained in the *Staats Courant* of September 25, 1862, must in this case also be complied with."

By Royal decree of the 17th of September, 1863, No. 37 (published in the *Staats Courant* of the 2nd inst.), confirmation is granted to the Notarial Act executed by the Notary Public, H. A. Amya Esser, at Amsterdam, for the incorporation of the anonymous association called the "Netherlands India Railway Company," on the petition of Mr. W. Poolman, of the Hague, and Mr. A. Mendel, of Amsterdam.

Addresses of thanks to the Second Chamber of the States-General and to the Colonial Minister, for their warm and successful support of the Bill for the railway concession in Java, have been received in this country from the merchants and others residing at Samarang.

Mynheer van Reenen has been reappointed by the King as President of the Second Chamber during the present session.

Amongst the petitions received by the Second Chamber is one from Ratoe Saripha Aysah, eldest daughter of the late Sultan Sarif Rasim, dated Singapore, August 10th, complaining of the conduct of the Dutch Government with regard to the Empire of Pontianak, in Borneo, to the prejudice of the legal heirs of the above-named deceased Sultan. The petition was given to the Committee of the Chamber for Petitions to examine and report on.

The King has conferred the insignia of Knight of the Military Order of Willem on his Naval Aide-de-Camp in Ordinary, Captain-Lieutenant Younker F. de Casembroot, commander of H.N.M. steam-corvette *Medusa*, of 19 guns, for his gallant conduct in silencing the forts that traitorously fired on that ship in Japan. It is stated that the King wrote him an autograph letter of the most flattering description.

A pamphlet, entitled "A Glance at Java, Saigon, Southern China, and Bombay," and written by Mr. R. W. Bake, has just been published at Arnhem by Mr. H. A. Tjeenk Willink. All the unfavourable things the author observed in Java he ascribes to the influence of the Liberal party, and the measures taken by them and at their instigation. It is only astonishing that he does not also lay to their door the failure of the rice crops in some parts of Java that he describes! For the rest his remarks and observations are very superficial, as the title of the pamphlet implies; nevertheless, what he says of Hong Kong and Saigon, especially the part relating to the trade of those ports, is not altogether devoid of interest.

A letter from Java, in the *Rotterdam Courant*, contains the following:—

"The submarine telegraph between Batavia and Singapore is as great a failure as the Red Sea cable. Mr. Gisborne has now been granted a concession for a new line. In the meantime it appears to be the opinion of people capable of forming a judgment that another and different route would be preferable, viz., a short submarine cable across the narrow Straits of Sunda, from Anjer to Telok-Betong, in Sumatra, and then a land line to Palembang, with submarine wires again along the coast and to Singapore. This would be a much better direction, and the cable would sink and lie perfectly safe in the soft mud banks along the coast of Sumatra. At the same time it ought not to be overlooked that great natural difficulties would have to be surmounted in making telegraph lines on Sumatra, as they must necessarily be carried for a long distance through wilderness, forests and jungles. Above all things, preventive measures must be taken to protect the wires from the elephants who occasionally would be apt to pull up with their trunks the telegraph posts."

From the annual report of the Dutch Missionary Society, read at their last meeting, it appears that their receipts from all sources in 1862 were 95,036 florins, showing an increase of 1,029 florins over 1861. But though their expenditure was 9,282 florins less than in 1861, it still amounted to 104,318 florins, thus leaving a deficit of 9,282 florins. After the conclusion of the current business the newly-appointed missionaries, Mr. S. J. de Vries for Ceram, F. Kyftenbelt for Java, and Messrs. M. van der Wal and B. de Jong for Minahassa, were presented to the meeting, received their instructions, and were addressed on the responsibilities of their calling by the chairman, who was answered in a befitting manner by the above-named Mr. Kyftenbelt.

Digitized by Google

The Colonial Minister gives notice that assistant engineers and inspectors of the third class are required for the Water-state and Public Works department in Java, salary 250 florins per month (£250 per annum) for the engineers, and 90 florins per month for the inspectors.

Mr. H. J. D. Padday has beenappointed to be His Netherlands Majesty's Consul at Penang.

A detachment of 100 men, supplementary troops, under the command of Capt. N. Volkerts, of the E. I. Infantry, and accompanied by Lieutenants W. H. Neys and J. G. Schlenker, have arrived at Nieuwe Deep by steamer from the Colonial Recruiting establishment at Harderwyk, for embarkation on board the hired transport *Java Packet*, Captain Crap Hellingham, for Batavia.

COMMERCIAL.

Coffee.—The market remained in a calm state till the beginning of the month, when it became known that the deliveries in September were very considerable (205,000 bags), since which a better feeling has prevailed.

Sugar.—There is an increased demand for the raw article, especially in the lower numbers, both for export and refining purposes. The sales of this last week amounted to 7,000 kranjangs. Brown descriptions have risen in value, and are now worth only ½ fl. under last sale's prices; middle and higher numbers are 1 fl. under ditto. Refined goods during the last few days have taken a sudden start at the late reduced quotations, and 2,000 tons of A S R, H R, and W & Z, have been bought for delivery in November and December.

Tea.—The company's sale of 21,291 packages of Java on the 1st inst., went off as follows:—

903	chests	Bohea	45 to 105 cents.
5,725	„	Souchong	78 to 134 „
5,269	„	Congou	87 to 157 „
2,962	„	Pekoe	120 to 420 „
3,622	„	Tonkay	62 to 142 „
543	„	Skin	43 to 89 „
1,383	„	Hyson	90 to 138 „
470	„	Uxim	82 to 144 „
394	„	Joosjes	123 to 174 „

With the exception of 65 chests of green, and 102 of Pekoe, the whole sold flowingly. The ordinary and middling qualities went off high, the better descriptions comparatively lower. By private contract 86 quarter chests of superfine flowery Pekoe were since disposed of at secret prices.

Rice.—With the exception of Java, which commands an easy sale, all other sorts rule heavy. In values no alteration

Spices.—Some dealings are reported in Java cinnamon No. 3 at 98 cents, also of clover No. 2 of 1863 at 24 cents. Pepper dull.

Tobacco.—There is no improvement to notice in Java. There have been considerable arrivals since last post, and two large sales announced; one of 3,616 bales of Temayang on the 9th inst. by tender, and the other 8 510 bales TANL, MGB, BJdL, GG, LS, and LC, per *Rotterdam*, *Grootmeester National* and *Dageraad*, by public auction on the 5th of November. Present stock, 16,517 bales.

Tin.—Banca advanced to 74 fl., but has since given away, and purchases may be made at 72 fl., at which figure 1,500 blocks were disposed of.

Hides calm. Prices unaltered. Stock of E.I. 15,125 Java ox, and 7,377 do. buffalo.

Drugs.—No animation in the market, and sales confined to the requirements of the trade.

Indigo.—The 500 piculs of Java expected by the company have arrived, viz., 309 chests per *Reinhardt*, and 299 per *Salatiga*, by which their sale on the 8th and 9th inst. is completed, and will contain, on the whole, 1,167 piculs (548 chests) against 1,657 piculs (828 chests) at the autumn sale last year. Fine descriptions are scarce, and prices well supported. Inferior qualities rather easier.

DENMARK.

Lieutenant-Colonel Raassloff, Danish Ambassador at Washingtou who had been sent on a special mission to China to negociate a treaty with that empire, has successfully effected the purpose of his mission, and returned from the Far East to Copenhagen, where the King rewarded him with the insignia of Knight Commander of the Royal Order of the Dannebrog.

THE SWISS EMBASSY IN JAPAN.

The Federal Council has decided to withdraw the Swiss embassy from Japan, in consideration of the political situation of that country.

WEST INDIES.

The Demerara Court of Policy held a sitting on the 26th August. The Consolidated Immigration Bill, originally drafted by Mr. Crossley, the Immigration Agent-General, had been remodelled, and would be laid before the Court in its amended form on the 8th inst. The Court had adopted the following resolution:—"That this Court requests his Excellency the Governor will bring under the notice of Her Majesty's Government the fact that while Indian and Chinese immigrants are introduced into the colony subject to indentures of service for five years, captured Africans above the age of fifteen years are only liable to be bound for three years. Further, that his Excellency will express the strong hope of the Court that any captured Africans above the age of fifteen years introduced after this date shall be subject to indenture for five years, the Court being satisfied that while the extension of time would be a boon to the employers, it would also tend to the future welfare of the Africans, inasmuch as it would keep them for a longer time under the discipline of instruction and settled habits, and so render them less likely to retire beyond the limits of civilisation on the expiration of their terms of service."

Literature.

Chinese Scenes and People; by Jane R. Edkins. London: James Nisbet and Co.

This is altogether a pleasing work. Scenes and characters in China are sketched in a natural and unlabboured manner. The authoress was in China in an eventful period—1859 to 1861—during the time of our third war, and whilst noting the "right English sentiment" of the foreign communities of Amoy, Shanghai, and Tien-tsin, was watchful also of the changing phases of native sentiment, which she depicts with force and feeling, and with reference to ultimate results. Exquisitely sensitive to beauty of scenery, she makes it a background to some charming portrayals. Villagers, Chinese merchants, priests, come before us in their daily avocations and are taken off to the life. Her beautiful activity of spirit displays itself in every page. A missionary in the truest sense, she would, had her life been spared, probably have won to herself a name as eminent in its own sphere as that of Florence Nightingale. There was a single-heartedness in her disposition—a devotion to her cause, that made her a heroine; and with all her retiringness of disposition, she was eminently calculated to win her way amidst the native population. To the work is appended a very useful and interesting narrative of a visit to Nanking by her husband, and to which she frequently refers in her letters. We think her father exercised a very wise discretion in giving these letters to the world, which we trust will be the means of inducing others, if not equally gifted, at least equally devoted to the cause of missions, to take her place, rendered vacant by an early death.

Monetary and Commercial.

City, Wednesday, Oct. 9.

As anticipated in our last, the price of Mexican Dollars has fallen. Sales of the last importation have been made at 5s. 3d., and a portion not suitable for the China market, at 5s. 1d.

At a meeting of the Chartered Bank of India, Australia, and China, on the 7th inst., Mr. Mitchell, M.P., in the chair, the available balance was stated to be £56,000, out of which a dividend was adopted at the rate of 10 per cent. per annum, absorbing £32,000, and leaving about £24,000 to be carried forward. It was announced that the company are about to open a branch at Batavia, in addition to the branches already in operation at Rangoon and Kurrachee. A report of the meeting will be found in another column.

The biddings for £400,000 in bills on India took place on the 7th at the Bank of England. The proportions allotted were, to Calcutta, £220,000; to Bombay, £160,000; and to Madras, £20,000. The *minimum* price declared was as before:—1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay, and the applications within the limits amounted to £1,210,000. Tenders on Calcutta at 1s. 11½d. will receive about 14 per cent.; on Bombay, at 2s., about 68 per cent.; on Madras, at 1s. 11½d, about 63 per cent.; and all above these prices in full.

The consumption of tea progresses satisfactorily. Below we give a comparative table for three years of the quantity of tea and sugar retained for consumption in the five months from 1st April to 31st August. It will be seen that the consumption of sugar has been quite stationary, while tea has increased at the rate of 17 per cent.:—

	Tea.	Sugar.
1861	33,595,709 lbs.	222,431 tons.
1862	33,856,432 „	220,013 „
1863	39,623,032 „	221,835 „

Bank returns for the week show a renewed falling off of £200,000 in the stock of specie, while there is also a diminution of £382,000 in the total of "specie and demand notes" held by the Government treasury. The accounts of the condition of the coloured population who have been set free and transferred to Washington, or who are retained under the protection of the Federal armies, are still of a sad description. The accounts also mention a current report that Mr. Stevens, the Southern Vice-President, had sailed for Europe with full powers from the Confederate Government to make terms with the Emperor Napoleon, even including emancipation within a reasonable time. There are also statements afloat of the existence of a party in California who are desirous not only of seceding from the Union, but of joining the Mexican Empire.

The *Assaye*, which was announced as having left with an instalment of the submarine cable for the Persian Gulf, put into

Digitized by Google

Plymouth with sprung mainmast, and is now fitting a new one. The *Tweed*, *Cospatrick*, and steamer *Charente*, will shortly follow with the remainder of the cable.

The Suez Canal is becoming a formidable nuisance. It hinders the growth of Egyptian cotton, and, consequently, the prosperity of the Egyptian labourers. The cotton pays splendidly, and all the labourers wish to work at it; but the Suez fanatics insist on their 20,000 labourers, which is no little drain on the cotton-growing population. The Viceroy, who sowed about 4,000 acres lest year in cotton, is said to have planted 19,000 this, and to have offered to supply the people gratuitously with seed, and he hopes next year will see 70,000 to 100,000 acres under cultivation.

The annexed circular in connection with the old estate of Messrs. Reid, Irving and Co., has just been made public. There is yet the prospect of the house paying altogether a most encouraging dividend:—

"2, Gresham-place, Lombard-street, London, 1st October, 1863.

"Sir,—Referring to our announcement of the 20th January last, we have to apprise you that we are prepared to pay a further dividend of 1s. in the pound, on and from the 8th inst., Saturdays excepted, between the hours of eleven and two o'clock, and against the production of the usual securities. The continued depreciation in the value of sugar is still detrimental to the prompt collection of the Mauritius assets, but we are making progress therein, and we hope to declare a further distribution in the course of next year, and to report the realisation of our mortgage claims on estates in Jamaica, which are shortly to be offered for sale in London under the Encumbered Estates Act.—We are, respectfully, Sir, your obedient servants, "Reid, Irving, and Co."

The Italian Government have contracted with Mr. W. T. Henley for the manufacture and laying of a submarine cable sixty-two miles in length, from Otranto to Avlona, which will give a route by way of Italy for messages to Constantinople, and thence to the new line, *via* the Persian Gulf to India.

The London Commercial List 1863-64, by Messrs. Estell and Co., has made its appearance. In addition to a complete commercial list giving name, business, when established, mercantile or monetary credit, extent of trade, and negotiability of acceptances and remarks, its appendix contains all necessary information relative to the London joint-stock banks, of colonial and foreign ditto, of insurance companies in operation, or being wound up, partnership dissolutions from January, 1858, bankruptcies and assignments since 1851, changes, amalgamations, and new firms, with other valuable and serviceable information. The work is now in its sixth year; the system and symbols adopted are remarkable for succinctness, brevity, and clearness, and could not easily be improved upon.

The exports from London, Liverpool, and the Clyde to the undermentioned ports, from September 17th to October 1st, were as follows:—

To Shanghai.—Plain cottons, 119,781 yards; coloured cottons 219,537 yards; printed cottons, 97,300 yards.

To Hong Kong.—No exports.

To Singapore.—Plain cottons, 3,171,949 yards: coloured cottons, 235,473 yards; printed cottons, 161,684 yards; twist, 357,200 lbs.

To Batavia.—No exports.

To Ceylon.—Plain cottons, 821,080 yards; coloured cottons, 96,306 yards; printed cottons, 78,091 yards; twist, 42,300 lbs.

The Board of Trade returns for the month of August have made their appearance. The following were the exportations to the Far East in that period:—

To China.—Cotton yarn: The quantity exported in August last was 178,898 lbs., against 147,600 lbs. in August, 1862, and 173,320 lbs. in August, 1861; the amount exported in the first eight months of this year was 895,370 lbs., against 3,051,499 lbs. in 1862, and 5,504,850 lbs. in 1861; the value of the exports for August last was £19,662, against £9,016 in August 1862, and £7,605 in August, 1861. Cotton Goods: The quantity exported in August last amounted to 3,589,936 lbs., against 6,069,235 lbs. in August, 1862, and 20,892,594 lbs. in August 1861; the amount exported in the first eight months of this year was 27,895,987 lbs., against 73,960,985 lbs. in 1862, and 197,929,857 lbs. in 1861. The value of the exports in August last was £104,841, against £98,394 in August, 1862, and £271,623 in August, 1861. Woollen and Worsted Manufactures: 162,556 yards were exported in August last, against 219,896 yards in August, 1862, and 139,496 yards in August, 1861; the value of the exports for August last was £28,720, against £27,487 for August, 1862, and £17,437 for August, 1861; the total export for the first eight months of this year reached 1,267,509 yards, of the value of £226,571, against 1,518,262 yards, of the value of £189,779, in the corresponding period of 1862. Worsted Stuffs: The exports in August last reached 991,356 yards, against 1,083,507 yards in August, 1862, and 503,971 yards in August, 1861; total export in the past eight months, 5,555,615 yards, against 5,200,662 yards in the corresponding period of 1862; value of the export for August last, £73,297, against £53,639 in 1862, and 30,246 in 1861; the value of the exports for the past eight months was 400,951, against £257,101 in the corresponding period of 1862, and £260,059 in 1861. Lead: Exported in August last 875 tons, against 863 tons in August, 1862, and 343 tons in August, 1861; export for the first eight months of this year 10,693 tons, against 6,194 tons in 1862, and 3,894 tons in 1861; the value of the export for August last was £18,643 tons, against £18,034 in 1862, and £7,462 tons in 1861; value of exports for the first eight months £229,287, against £132,815 in the corresponding period of 1862, and £35,396 in 1861.

To Philippine Islands.—Cotton Manufactures: Export in August last, 3,851,507 yards, against 2,544,974 yards in August, 1862, and 2,576,985 yards in August, 1861. The export for the first eight months of this year was 10,152,734 yards, against 11,187,849 yards in 1862, and 28,118,526 yards in 1861. The value of the export for August last was £104,841, and for the first eight months of this year £8,689,826.

To Java.—Cotton Manufactures: In August last the export reached 1,805,223 yards, of the value of £44,388, against 2,184,775 yards in August, 1862, of the value of £44,170, and 5,031,132 yards in August, 1861, of the value of £75,260. The amount exported in the first eight months of this year reached 9,054,794 yards, of the value of £218,711, against 23,546,245 yards, of the value of £428,944, in the corresponding period of 1862, and 34,585,837 yards, of the value of £522,832, in the first eight months of 1861.

The amount of bullion by the P. and O. Company's steamer *Pera*, which left Southampton on the 4th inst, was:—In gold, to Alexandria, £57,000; to Calcutta, £1,645. In silver, to Penang, £935; to Hong Kong, £45,242; to Foo-chow-Foo, £950; to Shanghai, £4,133. Total, in gold, £58,645; in silver, 51,260.

ARTICLES OF IMPORT.

Tea.—The last few days the attention of the trade has been directed to the cargoes of the five ships from Foo-chow, samples of which have been freely placed upon the market. Only a small portion, chiefly of fine to finest kinds, have as yet found buyers, at prices rather in favour of purchasers. The general outturn of these teas confirms the opinion generally entertained by the trade, after tasting those ex *Bahama* and *Fiery Cross*. The *Annette* has arrived from Hankow, with the new season's Monings and Wopaks, but her teas are only just on the market. There has been a fair demand for all kinds of Congou, up to good common, at about previous prices. Fair to good Sinchune Kais, and fair Kaisow kinds, of old import, have been sold to a fair extent at rather easier prices. Fair to good Ho-Hows and Ning-Chows have been saleable at the low rates current, say from 1s. to 1s. 3d. per lb. There has been a steady demand for second-class Honams, Monings, and Wopaks, at from 1s. 4d. to 1s. 8d. per lb., being about previous prices. Good and fine Kaisows of old import have been sold rather lower; a few of the finest kind still to be met with have been sold for export. In old season's fine Monings and Wopaks, a limited business has been done at about former prices. The sales of good to fine Kaisows show a decline of about 1d. per lb. The finest kinds, as also of the Pakling, have supported former rates. Tayshans have sold at about former prices. Fair to good Oolongs have sold at a decline of 1d. to 2d. per lb. at public auction without reserve. Fine have been rather more wanted. Souchongs remain much as last month. Flowery Pekoes have been sold irregularly at public sale. Common to fair Scented Capers have sold fully 1d. per lb. lower. Fine, Canton and Foo-chow make, wanted. Fair to good Scented Orange Pekoes have sold lower at the public sales, but latterly rather better prices have ruled. Fine, both of Canton and Foo-chow make, have sold at fully former prices, being rather scarce. The new season's Foo-chow make have not been of quality equal to former years. Uncoloured Japans have sold irregularly, in some cases at ½d. per lb. decline, but they are again in demand for export. There have been no public sales of Indian Teas, but one will take place on the 15th. In Green Teas there has been a large amount of business. Purchases to some extent have been made for export to America and Canada, both of Twankays, Hyson Skins, and Young Hysons, chiefly the latter, including a large quantity of Japan kinds, which had been held for some time; these sold at somewhat irregular prices, but generally at a decline of fully 1d. per lb. In all the better kinds of Young Hyson prices show an advance of fully 1d. per lb. Hysons, of good to fine quality, have sold 1d. per lb. lower, owing to larger supplies offering; finest commands fully former

Digitized by Google

rates. Imperials have fully maintained former value. Gunpowders have been wanted, and sales of good and fine show 1d. to 2d. per lb. advance. Canton-made Young Hysons have sold lower at Public Sale. Gunpowders, of common to fair quality, have also sold 1d. per lb. lower, good to fine have however realised former prices. The quantity of tea afloat now now is about 30,000,000 lbs. in 45 ships.

SILK.—The following is from the circular of Messrs. Waithman, Jacomb, and Hogg, of 1st inst. :—"We have had a sudden and unlooked for rebound in the silk market during the past month, and a large business has been transacted both in China and Japan silk, the quotations of to-day being from 1s. to 1s. 6d. above the lowest prices of August. The deliveries for the month, 3,784 bales of China and 1,988 bales of Japan, indicate that consumption is progressing on a somewhat improved scale. The latest accounts from China report total settlements to date (4th August) 8,800 bales, against 22,500 bales in 1862, and 9,500 in 1861. Unsold stock on the market was estimated at 14,000 bales, against 18,000 in 1862, and 14,000 in 1861. Prices were firm, notwithstanding the unsatisfactory nature of the advices from this side, and No. 3 Tsatlee was fetching 420 taels, equal to 23s. 6d. per lb. here; while Taysaams, owing to their scarcity, had been sold for native consumption at prices utterly unknown in this market. The total supply of China silk for the season is expected to be short, even compared with that of last year. From Japan the political advices are contradictory, but the ports were open and business going on much as usual. Prices for silk were extravagantly high. Bengal silk is attracting a little more attention, owing, no doubt, to the present comparatively high rates for China silk. In Italian silk there is nothing to notice. At New York holders are now quite firm and generally asking higher prices. Although the stock is not large, it is fully adequate to the demand for consumption, as our market is kept well supplied with Taysams from England.

SUGAR.—The market during the week has exhibited a considerable degree of buoyancy and excitement; the speculative feeling which was manifested on Friday last, having since been followed up by a brisk demand, and transactions have been both numerous and extensive at advancing prices, now ranging on the average fully 1s. per cwt. higher than quoted on the 2nd instant. Foreign descriptions have likewise participated in the general animation, and sales of magnitude have been effected at a corresponding advance to that established in the Colonial market, viz., 140,000 bags Clayed Manila, middling old to good new quality from 32s. to 33s. 6d.; and 600 tons Unclayed (for arrival) at 17s. 6d. to 18s.; 340 baskets soft grey Java at 34s.; 500 bags Siam at 36s. 6d.

COFFEE.—Market quiet, and no business of any consequence to report; only 34 bales at auction, and those retired. We quote—Mocha, long and pea berry, 92s. to 102s. per cwt.; garbled, good to fine, 93s. to 100s.; garbled, ordinary to middling, 88s. to 92s.

RICE.—Fair business done in the several varieties, but more especially in cargo kinds, which have realised a slight improvement in terms. Quotation, 9s. to 16s. 6d. per cwt. Java: No business to report; quotation, 9s. 6d. to 14s.

SAGO.—Steady: 192 boxes at auction sold at 23s. to 24s. per cwt. for fair to good small. Sago Flour: Held firmly, but the demand appears for the present to have subsided, and 3,819 bags at auction were all retired.

SPICES.—Ginger: Calicut and Cochin hold very firmly, and of 1,022 packages at auction, one-third sold at 63s. to 84s. per cwt. for low small to good. Pepper: Black is steady; and 3,005 bags Singapore at auction, all sold at and after the sale at 3⅝d. to 3¾d.; and 2,364 bags Penang sold at 3⅞ to 3½d., with Trang at 3⅝d. to 3¾d. per lb.; White is again rather cheaper; and 475 bags Singapore at auction sold at 5½d. to 5⅝d. per lb. Cinnamon: We quote 1st sort 1s. 2d. to 2s. 3d. per lb.; 2nd sort, 1s. 1d. to 1s. 9d.; 3rd sort, 11d. to 1s. 5d.; 4th sort and jungle, 9d. to 1s. 1d.; limited trade at full prices. Cloves: Flat; and of 167 bags Zanzibar at auction, very few sold at 3¼d. per lb.

COTTON.—Tinnevelli has declined in value ¼d. to ½d. per lb., whilst Western has risen ⅜d.; operations on the spot small, but for arrival considerable. Latest quotations:—Tinnevelli, 7⅛d. to 1s. 1¼d.; Northern and Western, 1s. 8¼d. to 1s. 10¾d.; Oomrawuttee and Dholera, 1s. 6¼d. to 1s. 11d.; Mangarole, 1s. 6d. to 1s. 10¼d.; Compta, 1s. 5⅜d. to 1s. 11 per lb.

HEMP.—Manila: This market has become quiet; very little business has been done privately; and 1,855 bales at auction were nearly all retired. Quotation; £26 to £29. 10s. per ton. Sunn.—Firm: 31 bales at auction retired. Of 539 bales Kurrachee, two-thirds sold at £29 to £33. 10s. per ton for middling to good; and 193 bales Bombay sold at £32. 15s. to £33.

TIN.—Is less firm; moderate business done, chiefly at £116 to £116. 10s. per ton cash for Straits, and £122 with prompt, for Banca.

JAPAN WAX.—Rather dearer; and of 80 boxes at auction, about half sold at 67s. to 67s. 6d. per cwt. for fair block.

MISCELLANEOUS.—Aloes: Steady, at £3 to £16 per cwt. Cardamons: Of 12 cases Malabar at auction half sold at 5s. to 6s. per lb. for middling to good; and 7 bags damaged Ceylon sold at 4s. 6d. to 5s. 1d. Gums: Gum Animi, Arabic, Assafœtida, and Olibanum, have all sold well, fully sustaining their previous several values. Linseed: Market still flat with large supplies. Rapeseed: Market better for demand; prices firm Teeth, Elephants': 70 lbs. and upwards, £33 to £39 per cwt.; 40 to to 60 lbs., £31 to £38; 20 to 40 lbs., £27 to £34; Scrivelloes, £12 to £33; Ball do. cut, £43 to £54; Ball do. uncut, £28 to £43; Hollows, £13 to £30; Points and Tips, £14 to £34. Sea Horse: 4 lbs. and upwards, 7s. to 13s. per lb.; 3 lbs., 4s. to 7s.; 1 to 2 lbs., 1s. to 3s. Turmeric: Of 185 boxes China at auction, half sold at 35s. per cwt.; and 100 bags Java retired at 20s. Camphor: China has further declined as much as 15s. per cwt., leaving the market still very depressed and unsettled; of 130 cases China at auction, 100 cases sold at £6. 10s.; private trade very moderate up to £6. 15s. Japan remains firm, and of 685 boxes at auction, half sold at 89s. to 92s. per cwt. for second to first piles. Gutta Percha: Firm; fair business at 1s. 4d. to 2s. 6d. per lb. India Rubber: Auctions confined to Assam, 658 packages of which sold at 7½d. to 11½d. per lb. for ordinary foul ball to fine lump. Musk: 35 caddies brought to auction sold with good competition at 27s. to 32s. per oz. for middling to good Tonquin. Of 10 tins grain, half sold at 42s. to 51s. for middling to very good. Oil of Anniseed: Demand, chiefly speculative, has during the last few days become very general and animated; some 300 chests have changed hands, the bulk at 6s. per lb. Rattans: Scarce and much needed; quotation, 3s. to 12s. per 100. Mother-o'-Pearl Shells: Steady; 111 cases Manila offered at auction, and subsequently sold at 85s. per cwt. Cocoa-Nut Oil Cochin: More business has been done, and prices have improved 5s. to 10s. per ton. 131 casks Cochin, 130 casks Ceylon, and 348 casks Sydney at auction.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 10s.; nail rod, £8 to £8. 10s.; hoops, £10. 10s.; sheets, single, £11. 10s.; Staffordshire bars, £9. 10s.; rails, £6. 15s.

STEEL.—Swedish keg, £16 to £16. 10s.

COPPER.—Sheet and Sheathing, £102 per ton; yellow metal, 8½d. to 8¾d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I.C., 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20 to £20. 10s.; shot, patent, £23. 10s.; sheet, £20. 10s to £20. 15s.; spelter, £18. 10s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The following comments on the market are from Messrs. French and Smith's circular:—There is a steady inquiry for nearly all descriptions of metals, and although there is a disposition amongst speculators to operate, yet the bulk of the business transacted is for export or home consumption. Iron: During the past month there has been considerable activity in the Scotch pig trade, and prices have advanced to 61s. 6d. cash, and 62s. 3d. three months open, mixed numbers. Welsh iron is in great demand, and even higher rates than at present quoted must be looked for. In Staffordshire also, the late advances are well maintained. Copper: The improvement mentioned in our last circular continues. All the makers seem well supplied with orders. Holders of foreign are stiff in their demands. We quote Burra £98, Kupunda £99, Chili £87. There is also good inquiry for copper ores. Tin: The nominal quotations for English have not altered since 10th August last, but it has been easy to purchase under smelters' quotations. Banca is quite neglected in this market. Straits has fluctuated a good deal the last few weeks, having advanced from 117s. to 120s. three months prompt, and again receded to the former price, 117s. three months, £116 cash, which are the present quotations for good merchantable tin. For fine quality a higher price is asked. The depression in prices must be in some measure attributable to the increase in production of the English mines, which, from the best information we can obtain, is increased 15 to 20 per cent. during the last few years. Tin Plates: The price of all descriptions of tin plate is very firm. Coke is advanced generally 1s. per box. An advance is anticipated on charcoal. The shipments last month of tin and terne plates were about 71,000 boxes. In September, 1862, the shipments were 70,000 boxes. Lead is very firm, but at present no advance is established. Spelter has been drooping for some time, and remains very quiet at quotations. The stock in London is 5,690 tons, against 3,761 tons, same date in 1862.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Outward freights for vessels on the berth continue a little firmer, but vessels are in ample supply. Homeward freights are steady, and ships in good demand.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 30s. measurement. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £44 and £2. 2s. 6d. For Shanghai: £53 and £2. 10s. 0d. to £2. 12s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2, nominal. For Singapore: £28 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have ordered the screw-steamer Edward Percy to be surveyed for the conveyance of Government stores to Hong Kong, and have received tenders for the further conveyance of about 131 tons navy and victualling stores, and 720 hogsheads porter in two vessels, from the River Thames also to Hong Kong.

CASUALTIES.

Mauritius, Sept. 5.—The Chene (French barque), Blanchard, from Singapore to Bordeaux, put in here to day for survey, having been on shore in Banca Straits.

The Pomone (French ship), Giraud, from Bankok to Cherbourg, which put in here Aug. 6, with vessel and cargo very much damaged, and making six inches water per hour, is now discharging, having experienced very

Digitized by Google

bad weather since leaving the Straits of Sunda on July 18, and will probably be condemned.

The Snow Squall, Dillingham, which arrived at New York Sept. 15, from Penang, reports having been chased by a privateer (the Confederate barque Tuscaloosa), July 28, 160 miles S.E. of the Cape of Good Hope; but having lightened the ship by staving several casks of water and heaving overboard a quantity of heavy provisions and a small portion of the cargo, she outsailed her and escaped.

Deal, Oct. 4.—The Jacob Drenth, from Rotterdam for Batavia, has been supplied with an anchor and seventy-five fathoms of chain, to replace others parted from the previous day in bringing up.

Cowes, Oct. 3.—The Ouderkirk van den Amstel, Swan, from Rotterdam for Batavia, has put in here with pumps choked.

Rio Janeiro, Sept. 6.—The Swallow, Scott, from London for Shanghai, has put in here short of provisions, and with bottom foul.

Rio Janeiro, Sept. 8.—The Sea Belle (Brit. barq.), M'Credie, from London to Amoy, put in here, Aug. 27, leaky; she has been surveyed and recommended to discharge until the leaks appear.

Ceara, August 29.—The Raven, schooner, Bushe, bound to Shanghai, with coals, has put into Granjae, a port about 160 to 180 miles north of this place, in distress, and unable to proceed on her voyage from, as reported, the foul state of her bottom, and not answering the helm. The master, it is stated, has written home and awaits instructions.

The Flying Spur, Ryrie, which arrived in the river, October 4 from Foo-chow-Foo, reports that on the August 15, in lat. 34 S., lon. 18 E., a screw-steamer came off towards her, showing English colours, and asked if she had seen any American ships; on being answered in the negative, the steamer hauled down the English colours, and hoisted the Confederate flag; she was brig rigged, apparently a very fast vessel, and with a great number of men showing on her decks.

At St. Helena.—Aug. 9, Remigius Adolphus, Browning, from Java, and sailed, 11, for Rotterdam; 15, Henrietta Gerardina Susanna, Sissingh, from Batavia, and sailed for Rotterdam; Thames, Andrew, from Ningpo, and sailed, 17, for Liverpool; 18, Luisita, Gordia, from Manila, and sailed, 20, for Cadiz; Lady Agnes Duff, Bruce, from Singapore, and sailed, 19, for London; 21, Margaretha, Reekina, from Foo-chow-Foo, and sailed, 22, for Falmouth; 22, America, Thompson, from Penang, and sailed for London; 23, Dunmore, Robertson, from Nagasaki, and sailed for London; 24, Golconda, Montgomery, from Penang, and sailed for London; G. H. Wappous, from Singapore, and sailed, 25, for Liverpool; 25, Singapore, Grillaud, from Singapore, and sailed for Bordeaux; 27, Annette (ss.), Jones, from Shanghai, and left, 28, for London; 28, Castle Howard, Lamprell, from Shanghai, and sailed, 29, for London.

At Table Bay.—Aug. 13, Chieftain, Borlase, from Singapore.

At Simon's Bay.—July 27, Kwang Tung (Chinese war str.), from Falmouth, and left, Aug. 14, for China; sailed, July 21, Amphitrite, Bergland, for Batavia.

At Algoa Bay.—Aug. 3, Keang-soo (Chinese war str.), from Simon's Bay, and left, 4, for China.

At Panama.—Aug. 26, H.M.'s Tartar, of Mexico, with $1,000,000 in silver, and sailed, Sept. 2, for Japan.

At Mauritius.—Aug. 9, from Singapore, Reward, Bider; 18, Duc de Malakoff, Bourdase; 20, from Manila, Thrudvang, Lee; 31, from Shanghai, West Derby, Sergeant; Sept. 2, from Falmouth, Kwang Tung (Chinese gunboat); sailed, Aug. 13, J. J. Grandville, Robert, for Batavia.

At Reunion.—Humboldt, Crutzer, from Macao, and sailed, Aug. 30, for Havre.

Mr. Charles Grant.

TEMPORARY OFFICES—69, LOMBARD-STREET.

The system of Land Credit, or "Crédit Foncier," has now been established in many of the chief countries of Europe, with the uniform result of large profit to the Companies engaged in it, and great benefit to the holders of land. The principle of all these associations is the same, viz., the intervention of a company whose large subscribed capital, and consequent credit, enable it to borrow money to the best advantage, as an intermediary between individual lenders who seek investments on mortgage, and borrowers who seek for loans.

Thus, the French Crédit Foncier has a large Share Capital, of which only half is paid up, and is authorised by its statutes to issue its own Bonds against an equal amount lent on mortgage, with a Sinking Fund for redemption, on first-class landed security. The security to the Bondholder under these circumstances is ample, represented as it is by the whole unpaid-up Capital of the Company, and all its investments and assets, while the profit to the Shareholders, being the profit on the employment of a large Capital distributed in dividend over a small paid-up capital, is so great, that with £10 paid up the £20 Shares of the French Crédit Foncier stand at a market value of upwards of £50.

The present Company is formed in the belief that, on the one hand, it will be very profitable to the Shareholders, and, on the other, most beneficial to India. It is obvious that our Indian territories present an unrivalled field for a Company of this description. Land there is rising in value with a rapidity quite unexampled, and the fixing of tenures, the improvement of laws, and the opening of communications, are fast creating an ease and certainty in dealing with it equal to those enjoyed in any country of Europe. At the same time Capital is scarce, and the rate of Interest extravagantly high, as compared with any European standard.

In Bengal, where, in the first instance, the operations of the Company will be principally directed, land is held upon a Zemindary tenure, which may be described as conferring the fee-simple of the land in perpetuity, held direct from the Crown, on condition of paying a fixed annual quit rent, which is always moderate, in comparison with the value of the Estates. An accurate and simple system of registration precludes doubt and dispute concerning the title to Estates, and the first mortgage on the register takes precedence of all other claims. The principle of a permanent settlement has been adopted by the Government, and will doubtless be shortly extended to the other Provinces of India.

The land included in the Lower Bengal system is estimated at a value of more than One Hundred Millions Sterling, and by the establishment of railways, the operation of irrigation works, and the general extension of Indian trade and industry, it will be doubled and trebled within a moderate number of years. Of these estates a very large proportion are at present under advances from local money-lenders, at a rate of 12 per cent. interest, besides incidental bonuses, and on other conditions, that are alike unfavourable to their owners and to the community at large.

With prudent management the results of an Indian Crédit Foncier can hardly fail to be even more successful than in France, considering the wide margin between the rates of interest at which money can be borrowed in England and lent in India.

The field for operations in India is practically unlimited, and in no country in the world are all the elements of national prosperity, including the value of land, in a state of such rapid development. The Revenue of the State has risen in ten years from £28,500,000 to £45,125,000 a-year; and the aggregate Import and Export Trade during the the same period has more than doubled, and last year reached the enormous total of £100,000,000 including bullion. During the same period £60,000,000 of English Capital has been invested in Railways in India, which are now approaching completion, and will greatly accelerate the march of prosperity.

The benefit to India of obtaining Capital on landed security on reasonable terms, and emancipating the native landed proprietors from an exclusive dependence on native money lenders, will be incalculable; and this benfit will be specially felt at a time when the prosperity of the country, the completion of roads and railways, the sale of waste lands, the extension of the permanent settlement, the introduction of an improved currency, and, generally, the adoption of a wise and liberal system of Government, are giving everywhere a rapid impulse to improvement.

OBJECTS.—The Company will be prepared to grant Loans on land, either for fixed periods, or upon terms that will extinguish the debt during the currency of the mortgage, by the payment of an annual instalment on account of the principal in addition to the annual interest, thus conferring on the borrowers the benefit of an eventual liquidation of their debts.

CAPITAL.—The present Capital is fixed at £2,000,000 sterling, of which £2 per Share is payable upon allotment. It is not the intent on of the Directors to call up more than a small proportion of the Share Capital in all, as the successful conduct of a business of this description is chiefly through borrowed Capital.

BORROWING POWERS.—As a means to make the advances on the extended scale contemplated, the Company will issue Debentures for fixed periods, and bearing a fixed rate of interest, payable half-yearly in this country; and in order to give the holders of such Debentures undoubted security, they will have a lien on the entire property of the Company, consisting first of the whole of the Estates held on mortgage, and much exceeding in value the total of its liabilities, and secondly, of the assets of the Company, in which its paid-up Capital is invested, together with its large reserve of uncalled Capital. The transactions of the Company will be conducted free from all speculation or purchase on their own account, and may be regarded as partaking of the nature of a Commission Agency between the European lender and the Indian borrower, opening to the latter a command of Capital limited only to the value and security his Estates afford.

PROFITS.—The profits of a well-conducted business of this description, in such a field for operations as India, may be tested by a comparison with the results realised by the French Crédit Foncier and other similar undertakings both abroad and at home. The institution named is limited by its statutes to lend at 5 per cent. interest, and it has to pay more than 4 per cent. interest on money raised on its debentures. The margin of profit is, therefore, very small. Nevertheless, the French Company pays a dividend of 16 per cent. per annum, carrying a further sum equal to 7 per cent to reserve. In India the margin of profit between the rate at which the money is borrowed and the rate at which it is lent, will certainly not be less than 3 per cent., so that each £1,000,000 borrowed in England, and loaned in India, will give £30,000 a-year towards dividend on the share capital, of which it is not probable that more than £500,000 out of the £2,000,000 will be called up.

MANAGEMENT IN INDIA.—Arrangements have been made with the above three leading firms to act as Agents in India, so as to enable the Company to commence business without unnecessary delay.

75,000 shares have been subscribed for privately, and the remaining 25,000 shares are reserved for public subscription.

Copies of the Memorandum and Articles of Association lie for inspection at the Office of the Solicitors, Messrs. Freshfields and Newman, 5, Bank-buildings, Lothbury, and at the temporary offices of the Company.

Applications to be made in the subjoined form to the Temporary Offices of the Company, 69, Lombard-street; or to the Offices of the General Credit and Finance Company of London (Limited), 90, Cannon-street.

FORM OF APPLICATION FOR SHARES.

No.

To the Directors of the Land Mortgage Bank of India (Crédit Foncier Indien) Limited.

Gentlemen,—I request that you will allot me Shares of £20 each in the capital of the Land Mortgage Bank of India (Crédit Foncier Indien), Limited, and I hereby agree to accept the said Shares, or any smaller number that you may allot to me, and to pay the deposit of £2 on each Share so allotted, and I agree to become a member of the Company, and request you to place my name on the Register of Shareholders in respect of the Shares allotted to me.

I am, Gentlemen,
Your obedient servant,

Name in full .....
Address in full .....
Profession orbusiness .....

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

HOLLOWAY'S PILLS.—The Body's Bulwark.—Nine-tenths of the maladies afflicting adults depend upon a disordered state of the stomach. Holloway's Pills correct the first symptoms of indigestion by acting healthily on the gastric juice, and wholesomely exciting the liver. They dispel flatulency in incipient indigestion, and overcome heat, distention, and pain, attending more advanced or neglected cases. These Pills invigorate and soon restore the dyspeptic from the great and sudden depression of strength always accompanying stomachic disorders or biliary derangement. They beget cheerfulness, vigour, and happiness. In rectifying disorders of the digestive apparatus, these Pills prove themselves the promptest preventives of disease. They raise a bulwark against all approaching maladies, and preserve freshness, health, and life.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

NOTICE.

DELFINO, NORONHA, PRINTER, OSWALD'S-TERRACE, VICTORIA, HONG KONG (Established 1847), begs to inform the community that being amply provided with printing materials of all kinds, from the best London tradesmen, he can undertake every variety of job-printing, and execute the same with neatness and despatch, upon moderate terms.

Overland prices current, embracing tabular work, executed on the shortest notice.

JEAN MARIA FARINA Cologne; London 2, Salters'-hall-court, and 16, St. Swithin's-lane E.C., begs to recommend his Stock of EAU DE COLOGNE and LAVENDER WATER in Bond—Double, at 9s.; Single, at 5s. 6d. per dozen. Duty paid—Double, at 21s. sparkling Hock, Moselle, Champagne, and Claret, in Bond and Duty Paid.

TO THE NERVOUS AND DEBILITATED.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa, &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Invaluable Lotion, the result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 29, 1858.

The book concludes with numerous, varied, and interesting cases, to which is added the Author's Receipt for a Preventive Lotion.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA, CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

The work may be obtained of Mr. HINNAM, Queens-road, Hong Kong.

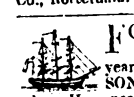
In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bacalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.



FOR SHANGHAI Direct, the well known clipper FIERY CROSS, A 1, 13 years, 689 tons register, RICHARD ROBINSON, Commander, lying in the West India Docks. Has excellent accommodation for passengers.

For Freight or Passage, apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular line of packet ship.

FOR HONG KONG and WHAMPOA, the well-known Clipper, FALCON, A 1 13 years, 794 tons register. JOHN KEAY, Commander. To load in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange Buildings, E.C.

To follow the AVERY. With despatch.

FOR COLOMBO Direct, the fast-sailing clipper barque ALGERNON, A 1 eight years, 448 tons register, W. RICHARDSON, Commander; loading in the London Docks. This excellent clipper was built under special survey, and is strongly recommended to shippers as a fast and safe conveyance.

For Freight or Passage apply to JOHN WILLIAMSON, York-chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

To follow the "Salvador Packet."—With despatch.

FOR MAURITIUS direct, the nearly new Cumberland-built barque, WHITEHAVEN LASS, A 1 for nine years; 311 tons per register; T. BEEBY, Commander; loading in the West India Docks. This beautiful vessel is well known for her great speed, and is recommended to shippers desirous of a fast and safe conveyance.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR SINGAPORE and PENANG (to follow the Constantin), the well-known clipper ship FEROZEPORE, A 1, 12 years, 558 tons register, J. RANKIN, Commander; loading in the West India Docks. Has just discharged a cargo of tea from China in perfect order, and will be found an excellent opportunity for shippers of fine goods.

Apply to ANDREW WRIGHT and Co., 19, St. Helen's-place; or to DOUGLAS and MILLS, 23, Billiter-street, E.C.

Under engagement to Her Majesty's Government, and will have immediate despatch.

DIRECT for HONG KONG and WHAMPOA, the splendid new clipper ship, EDWARD PERCY, classed A 1, 20 years in the Liverpool Book, 880 tons register, C. STEWART, Commander, loading in the East India Docks. This magnificent ship, built in 1861, by Messrs. Laird Brothers, of Birkenhead, presents a most favourable opportunity to shippers of fine goods.

For freight, apply to RAYDEN and REID, 12, King William-street; or to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.

With quick dispatch.

FOR HONG KONG and FOO CHOW, the splendid new Aberdeen clipper ship, YANG-TSZE, A 1 13 years (built by Messrs. A. Hall and Co.) 700 tons register, WM. BILLING, Commander, East India Docks. This ship has very superior accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

To follow the MIN.

FOR SHANGHAI Direct, the well-known clipper ship CHALLENGER, A 1 twelve years (built by Messrs. R. and H. Green), 699 tons register; T. MACEY, Commander; East India Docks. This ship has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

Last shipping day, 26th October.

FOR SHANGHAI, direct, the well-known China clipper ship MIN, A 1 13 years, 629 tons register, J. SMITH, Commander, West India Docks. This ship has good accommodation for passengers.

For Freight or Passage apply to Messrs. ASHTON and Co, 39, Lombard-street, E.C.; or to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

Will be quickly despatched, having a large portion of her Cargo engaged.

FOR HONG KONG and WHAMPOA, the splendid British-built clipper ship CHANDERNAGORE, A 1 ten years, J. LYNAS, Commander, 564 tons register, now loading in the London Docks. Has excellent poop accommodation for passengers.

HOLMES, KNEVITT, and HOLMES, Sun-court, Cornhill, London, E.C.

MANILLA direct, the Spanish clipper barque PERLA, A 1 at Lloyd's, 500 tons burden. MARIANO DE HORMAZO, Commander, St. Katharine Docks. Has only a limited quantity of room left, and shippers are requested to make their engagements immediately.

For Freight or Passage apply to C. HINGSTON, No. 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helen's, E.C.

Regular line of Packets.

FOR BATAVIA, the fine fast-sailing barque WEST, A 1, thirteen years, 409 tons per register, coppered and copper fastened throughout, W. H. HAWKINS, commander. Lying in the St. Katharine Dock; has superior accommodation for passengers.

For Freight or Passage apply to the owners, Messrs. THORNTON and WESTS, Old Swan Wharf; or to RANGELL, WOOLLETT and Co., 1, Lime-street-square.

FROM LIVERPOOL for CHINA, the new clipper ships:—

Ships.	Tons	Class.	Destination.	Sails about.
Serica	707	A 1 13 years	Hong Kong and Whampoa	Oct. 15
Young Lochinvar... ...	700	A 1 13 years	Ditto	Nov. 15
Victoria Cross	668	A 1 12 years	Shanghai ...	Oct. 1
Eliza Shaw ...	700	A 1 15 years	Ditto	Oct. 31

For terms of freight or passage, having superior cabin accommodation, apply to McDIARMID and GREENSHIELD, Liverpool.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Ellen Rodgers	W.I.D.	With des.
Hong Kong	Robin Hood	E.I.D.	With des.

The present mails would have been delivered on the 27th but for the detention in Egypt owing to the overflowing of the Nile, a notice of which will be found in another column.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Vectis, arrived Oct. 27.—From Hong Kong: Mr. De Silva, sen., Don Carcen and child, Mr. Gonzalvez.—From Singapore: Mr. Madeley.—To Southampton, per Pera, expected to arrive Nov. 2.—From Shanghai: Mr. Shuttleworth, Mr. and Mrs. Tate, infant, and native female servant.—From Hong Kong: Mr. Turner.—From Singapore: Mr. Davidson, Mr. Harrison. To Gibraltar.—From Hong Kong: Mr. Martinez and daughter. To Suez.—From Shanghai: Mr. Muller. To Alexandria.—From Singapore: Messrs. Van der Berk, Van der Buck and Robinson, Mr. and Mrs. Ebbs and two children.

Per last Bombay Mail to Southampton, per Ellora, arrived Oct. 25.—From Hong Kong: Mr. Sothern.

PASSENGERS OUTWARD.

By this mail, per Ripon, from Southampton, Oct. 20.—To Singapore: Mr. R. Bruce.—To Penang: Mrs. Walter Gillespie, infant, and two children.—To Hong Kong: Mr. G. Bishop, Mr. King.—To Calcutta: Captain and Mrs. Stanton and infant, Mrs. and Miss Welshman, Mrs. Sandys and infant, Mrs. John Rose, Mrs. H. Braddon, Mr. and Mrs. and Miss Blechynden, Miss Bayley, Miss Driver, Miss Tweedie, Mr. and Mrs. E. W. Molony, Mr. and Mrs. R. Alexander, Mr. Playfair, Mr. J. R. Beard, Miss Milroy, Mrs. Greenhill and infant, Mrs. G. W. Allen and infant, Mrs. Obbard, Mrs. Watson and two infants, two Misses Wintle, Mr. and Mrs. Walton, Captain J. H. Moore, Rev. and Mrs. Cole and fire children, Mr. Harrison, Miss Shaw, Captain D'Aguilar, Mr. Keswick, Mr. J. Birkmeyer, Mr. Fisher, Major and Mrs. Cobbe, Mr. and Mrs. Newman and infant, two Misses Pengree, Mr. F. W. Cowley, Mr. E. H. Ruddock, Miss Sandys, Miss Hastings, Miss Kirke, Miss Golding, Mr. H. M. Forbes, Mr. Kirkwood, Mr. T. G. Hanson, Mrs. Thornhill and two children, Miss Perreau, Mr. W. de St. George, Mr. G. Forrester, Mr. W. B. Saunders, Mr. and Mrs. Dexter.—To Madras: Mr. H. Wigram, Mr. T. S Smyth, Misses Simpson and Thompson, Mrs. Touch, Major and Mrs. Buchanan and infant, Captain Beckley, Mrs. Cameron Geddes and child, Mr. A. C. Lister, Mr. T. McDonell, Mr. and Mrs. Barker, Assist. Surgeon Howell.—To Ceylon: Messrs. Barter and Robertson.—To Alexandria: Mr. C. and Miss Grove, Mr. T. Brown.

From Marseilles, per Massilia, to leave Oct. 28.—To Hong Kong: Mr. Crawford Kerr. Mr. Wadman, Mr. Bryans.—To Singapore: Mr. Callaghan.—To Calcutta.—Mrs McDonell and infant, Capt. and Mrs. Cotton, Mr. and Mrs. E. Johnson, Mr. and Mrs. and Miss Vansittart, Mr. F. W. Per P. and O. steamer, Dec. 4, from Southampton.—To Hong Kong: Mrs. Whitty, Miss Simpson, Mr. Dixon.—To Singapore: Mr. O. A. Vidal, Mr. Kennedy, Mrs. Wilson and two children.—From Marseilles, Dec. 12.—To Shanghai: Mr. Dealtry, Mr. A. K McDonell.—To Hong Kong: Mr. A. Campbell.—From Suez: To Singapore: Mr Schoffer.

Per P. and O. steamer, Dec. 20, from Southampton to Hong Kong: Mr. and Mrs. W P. Galton.

By last Bombay mail, per Euxine, from Marseilles, Oct. 21.—To Hong Kong: Mr. Groom.

Per French mail steamer Peluse, from Marseilles, Oct. 19.—To Shanghai: Mr. W. Watson, Mrs. Hume, Mr. and Mrs. Stewart.—To Hong Kong: Mr. Mann, Mr. Hinsch. —To Singapore: Mr. MacGibbon, Mrs. Goymour.

Summary of News from the Far East.

JAPAN.

THE CULPABILITY OF MAJOR-GENERAL BROWN.

(FROM A CORRESPONDENT.)

YOKOHAMA, August 27th, 1863.

The present mail conveys important news to England—namely, the details of the destruction of Kagosima, the chief town of the Prince of Satsuma, by a squadron of British men-of-war, commanded by Admiral Kuper. That this operation, however, has been but imperfectly carried out, the feeling here is general, the Admiral having removed his squadron from the Bay of Kagosima and returned to Yokohama, without either having destroyed Satsuma's defences or thrown his guns (ninety in number) into the sea. That the operation is thus seriously incomplete we believe no one to be more sensible of than the gallant Admiral himself, and we know the feeling to be shared by every officer in the fleet. That Admiral Kuper is responsible for this partial failure we do not think. He considered that he had not force sufficient at his command to undertake landing, and he therefore determined to incur no risk, but confine his operations to the silencing for the time of the batteries and destruction of the town. There is an officer, however, undoubtedly responsible in the fullest sense for whatever difficulties or complications may ensue consequent on Admiral Kuper's inability to complete, in an efficient manner, the operations he commenced against the batteries of the Prince of Satsuma. That officer, I have no hesitation in saying, is Major-General Brown, commanding the forces in China, an exceedingly eccentric person, that all accounts concur in representing as being totally unfit for the important post that, through some singular oversight at home, he appears to have been selected to fill. His conduct in respect to Japan has been so directly opposed to the rules of action which are supposed to guide officers holding trusts, such as his, under Government, that we cannot suppose the authorities will permit him longer to retain a position which he has given the most marked proofs of his incompetency to fill. That we are not indulging in hyperbole, it will be our object to show in the following brief summary of his proceedings relative to the Japan question.

On the 12th of May last, in consequence of the refusal of the Japanese Government to pay the indemnity of £100,000 demanded by Her Majesty's Government for the attacks on the Legation at Yedo, and owing to the alarming aspect of affairs in and around Yokohama, where a large amount of British property and life was at stake, Colonel Neale determined to apply

Digitized by Google

to General Brown for troops, a proposition supported by Admiral Kuper, who immediately sent H.M.'s *Racehorse* to Shanghai with Colonel Neale's most judicious request—a request, we may add, that while he felt it was a necessary one, he also felt it a most reasonable one, inasmuch as news had just reached Japan that the authorities at Shanghai were advertising for transport to convey a battery of artillery and the 31st Regiment to England, and the 5th Bombay Native Infantry to India. The *Racehorse* proceeded to Shanghai, and returned immediately with an unsatisfactory reply from General Brown. The senior naval officer, however, at Shanghai, Captain Strode, of H.M.'s *Vulcan*, with a discretion and judgment which was absent in the Commander of the Forces, immediately stopped the preparations which were in course for the provision of transport to remove the troops for China. He also equipped and provisioned his ship, and intimated to General Brown that he was prepared, in twenty-four hours, to convey 1,000 men to Japan. The application for troops met with the most open and public ridicule from General Brown, and the most lavish abuse—in the most objectionable of language—was, in the open streets and at private tables, lavished by him on Captain Strode for the obstructions which he was offering in furthering his desire of hurrying the troops off to England and India. Suffice it to say that, in consequence of Colonel Neale's request not having been responded to, the protection of the British community at Yokohama was undertaken by the French Admiral (Jaurez), who, without hesitation or delay, sent over to Shanghai, and directed every available French soldier to be embarked forthwith for Yokohama. This was done, and when three hundred of the Algerine Light Infantry arriving the community were at once re-assured, and all idea for the time given up of abandoning the settlement, as the gallant Admiral Jaurez came forward and undertook to hold himself responsible for their defence. The reader will naturally ask where the British Admiral was; he was lying with his fleet in the anchorage, and had intimated to the community his inability to undertake their defence on shore, and recommended them to remove themselves and property to ship board. Thus has been brought about a vast preponderance of French influence locally, in consequence of the withholding of troops from Shanghai. There is no doubt that Admiral Kuper was fully justified in declining to land his crews, because he could not have kept his fleet in a state to undertake naval operations had circumstances rendered such necessary at the time, had he committed himself to the shore defence of Yokohama. To Admiral Jaurez, therefore, a deep debt of gratitude is due by the British mercantile community of this place, because there is no doubt but that for him, on the return of the *Racehorse* with General Brown's refusal to give troops, the settlement would have been abandoned by the foreign residents, so menacing had the aspect of affairs become. While the necessity for troops here continues most pressing, General Brown at Shanghai brought the pressure of his superior position to bear on Captain Strode, and insisted on transport being taken up without the least delay, so as to get the troops beyond the reach of Japan. His orders were carried out, and the battery of artillery and the Bombay Regiment were got off. Before, however, the 31st Regiment could be got out of Shanghai, the necessity for a British military force here, however small, had become even greater than formerly, and early in July the Admiral despatched H.M.S. *Centaur* to Shanghai, with a second request that General Brown would send over whatever troops he could without reference to number. At the very period that the despatch was delivered to him by Capt. Creasy of the *Centaur*, the left wing of the 31st Regt. was lying at anchor on board a sailing transport in the Yang-tse-kiang, waiting for a fair wind, and the head-quarter wing of the same regiment was still in Shanghai. General Brown, with a pertinacity amounting to monomania, continued to refuse the aid of a single soldier, directed the embarkation of the remainder of the 31st to be carried out without delay, and apparently with the view of removing himself further from Japan, immediately took his departure for Hong Kong.

THE INDEMNITY FOR MR. RICHARDSON.

Thus matters stood here at the beginning of July; every prospect of trouble with the Tycoon's Government, and no hopes of any support from our military resources in China. Fortunately at this juncture, owing chiefly to the tact and judgment displayed by Colonel Neale, the Tycoon's Government paid the indemnity money of £100,000, but, at the same time, served a notice on the foreign Ministers, that in conformity with instructions from the Mikado, or Spiritual Emperor, all foreigners must forthwith leave Japan. This notice, however, was qualified by a private communication from the Ministers of the Tycoon that they had no resource but to serve this notice, but that they neither wished nor expected it to be acted on. The Mikado, we may remark, is a sort of Pope, exercising spiritual authority over the Tycoon. He is in the hands, at present, of the Prince of Mito, who has gained his ear through money. The Prince of Mito is an enemy of the Tycoon, and as a means of dethroning him is anxious to embroil him with foreigners; hence Mito is actively engaged bringing all his influence with the Mikado to bear to issue edicts hostile to foreign intercourse, and especially to those Powers that the Tycoon has entered into treaty relations with. The serving of this edict occurring coeval with acts of hostility by the Prince of Negato at the entrance to the inland sea, naturally led to an absence of all feeling of real security, notwithstanding the friendly professions of the Tycoon's Government, and interfered with the remaining portion of the demands of her Majesty's Government being carried out with that celerity which at this particular juncture was desirable. These demands referred to the Prince of Satsuma, and embraced the public execution of the murderer of Mr. Richardson, and the payment of £25,000 indemnity money for his relatives, and for those who were wounded with him. In consequence of the refusal of General Brown to furnish troops for the protection of the community on shore, Admiral Kuper did not feel himself justified in leaving the anchorage of Yokohama. Pressure, however, was brought to bear upon him early this month by Colonel Neale, who was naturally anxious that the demands on the Prince of Satsuma should at least be presented to him in conformity with the instructions from home, at his town of Kagosima, and as the French Admiral and a considerable fleet of war vessels of various nations was in the anchorage, no danger was apprehended for this place. It was therefore determined that the Admiral, with a portion of his fleet, should proceed to Kagosima, Colonel Neale with his Legation proceeding with it, so that no delay in negotiations should occur.

FAILURE OF OUR ATTACK ON KAGOSIMA.

On the 6th of August, a squadron, consisting of the *Euryalus*, *Pearl*, *Perseus*, *Coquette*, *Racehorse*, *Argus*, and *Havoc*, left this anchorage, under the command of Admiral Kuper, Colonel Neale being with him in the *Euryalus*. The squadron anchored off Kagosima on the 12th. Officials came off to demand our business. The letter containing the demands was sent on shore, and twenty-four hours given them to reply. In the afternoon they came off again to say that it was impossible to get the Prince of Satsuma's answer in that time, as he was at a place sixty miles distant. Colonel Neale then extended the period six hours. On the evening of the 13th the answer came off, but as it was in Japanese no reply could be given until the following day, as the document required translation. On the 14th, the document being found to be evasive and unsatisfactory, the matter was placed in the Admiral's hands by Colonel Neale. The day was occupied re connoitring the bay, and three of Satsuma's steamers, recently purchased by him from British merchants, were discovered lying apparently hidden in a small bay. The following day the Admiral sent the *Pearl*, *Argus*, *Coquette*, and *Racehorse*, under the command of Captain Borlase, of the former ship, to capture the three steamers; this was done, and they were brought to the anchorage. They were found to be the *Sir George Grey*, the *England*, and the *Contest*. The Admiral now waited to see what steps Satsuma would adopt, and in the course of three hours all doubt was removed by the batteries on shore opening a heavy fire on the squadron. The signal was immediately made to burn the three prize steamers, which was speedily carried out; the squadron then went into action, and engaged the batteries, the *Euryalus* leading and receiving for some minutes the almost concentrated fire. The batteries were not silenced until the afternoon, by which time the town was in flames. The casualties in the squadron amounted to 63, 13 being killed and 50 wounded; amongst the former Captain Josling, the flag captain, and Captain Wilmot, commander of the *Euryalus*. They were both killed by the same ball; both their skulls being shattered by a round shot, which took them while they were standing on the bridge. The Admiral was with them, and narrowly escaped sharing in their melancholy fate. The next day (the 16th) some of the batteries having reopened fire, the squadron again engaged them until they were silenced. On the 17th the squadron got

Digitized by Google

under weigh, and sailed for this place, where it is now once more at anchor. What the ulterior proceedings in respect to Satsuma will be we are unable to say. The Admiral, in consequence of having no troops to form a landing party, has been unable to destroy Satsuma's guns, and as it is considered indispensable that these guns should be destroyed, and as no troops can be got out of Major-General Brown, we understand that the present mail takes home an application from Colonel Neale for 1,000 marines, to enable the Admiral to complete his operations. Thus, through the folly and incompetency of a general officer commanding in China, has the prestige of British arms been seriously damaged in Japan, on the very first occasion that they have been called on to make active hostilities. We attacked a town from the sea, burned and destroyed property, but did not venture on shore to destroy their means of defence. This no people will be more readily sensible of than the Japanese.

That there is any necessity for an expedition being sent out, either from India or England, I neither think it desirable nor necessary. All that is wanted is a sufficient number of soldiers or marines to form landing parties, where such may be necessary, in chastising hostile or troublesome Daimios from the sea. That the Tycoon's Government is desirous of peaceful relations with us there is little reason to doubt, and it is possible that the severe lesson which Satsuma has received may have a salutary influence over other Daimios—such as the Prince of Negato—who have been taking an active part against foreigners.

WHY MR. RICHARDSON WAS KILLED.

One cannot but regret, when such valuable lives as those of Captains Josling and Wilmot, with eleven British seamen, have been sacrificed; also 180,000 harmless people burned out of house and home in Kagosima, that the cause should have originated in the arrogance and disregard for national customs of a party of our own countrymen, who we may say deliberately rushed on their own destruction. The Japanese authorities intimated that it was desirable that foreigners should not be riding on the Tokaido, or great public road, on the 15th of September last, because it was probable that Daimios with their hosts of feudal retainers unaccustomed to the sight of foreigners would be travelling on it. This was notified to the community. On the evening of the 14th, Mr. Richardson, a young man proceeding home from China with a fortune, was visiting Japan on the way. That same evening he had intended returning to Shanghai, by H.M.'s depatch boat *Renard*. At the request of Mrs. Borrodaile, a Hong Kong merchant's wife, also a visitor to Japan, he prolonged his stay, and accompanied her, Messrs. Marshall and Clarke, on their injudicious ride to the Tokaido that evening. They met for a considerable extent of the road Daimios retainers, and common sense ought to have dictated to them to return, as they knew perfectly that they must shortly come in contact with a Daimio himself, which they did, namely, Shimadzoo Sabura, the father of the Prince of Satsuma, and which, unfortunately, occurred at a point of the Tokaido where it is suddenly narrow; here the mounted party came in direct collision with the Daimio himself, and in place of getting off the road, which they could have done with the greatest ease, they remained upon it, drawing to one side only. They were then attacked, when they immediately got off the road, but by this time the fatal blows had been received by Richardson. That any blows were aimed at Mrs. Borrodaile the Japanese deny; they never strike at women with cutting instruments, and facts tend to support their statement, inasmuch as Mrs. Borrodaile's hat, as stated, was not cut in two, but picked up entire, having been lost by her in her flight. The story about her riding into the sea, preferring drowning to murder, is in advance of the fact; her pony took her through a swamp on his way to regain the road.

YOKOHAMA.

Dates are to the 27th of August. The fleet engaged at Kagosima had partly returned, and all was quiet. The details of the attack on Kagosima will be found in another column.

The case of assault between a Japanese officer, Messrs. E. R. Davies, R. B. Davies, and Thomas Tatham will be tried before the Consul. The above-named Europeans first made the complaint against the Japanese, thus constituting themselves the complainants, but Mr. Winchester has in preference received the complaint from the Japanese against them, and bound them over to appear within five weeks to answer the charge. We cannot at present see the justice of this mode, but it may be shown on trial.

NAGASAKI.

Dates are to the 28th August. The Governor of Nagasaki still remains or still appears to remain friendly towards the foreigners. A severe typhoon passed over Nagasaki on Sunday the 16th August. The barometer fell during Saturday to 29·45, very gloomy, heavy weather prevailing; and at midnight the gale commenced with hard squalls and rains from 6 to 10 A.M. The squalls were very severe, the rain and spray driving across the harbour in a perfect foam; while most of the vessels were driven from their moorings The barque *John and Mary* drove foul of the s.s. *Chusan*, but after both ships had sustained some slight damage they were lashed together. At 9 A.M. the schooner *Josephine* drove across the bows of the *Chusan*, carrying away her main-boom, cutting down the bulwarks and severely scraping her main-mast. She afterwards fell across the bows of the *John and Mary*, carrying away her jibboom. H.M.S. *Rattler*, after much trouble, veered away cable and sent a hawser to tow the schooner clear. H.M.S.S. *Rattler* and *Leopard*, the P. & O. S. *Granada* and *Chusan* were under steam all day. A Dutch brig lost two men overboard, and a lighter alongside of her was swamped with a valuable cargo on board. At noon, the weather moderated, and in the evening the men-of-war weighed and shifted farther down the harbour. At 7 P.M. the weather had so far cleared that the *Granada* was able to proceed to sea; outside she experienced a fresh breeze with heavy sea till daylight, after which the sea began to moderate. The lowest point of the barometer was 29.30; the squalls veered from S S.E. to S.W., moderating at the latter point. With the exception of one hong blown down completely, only slight damage was done ashore.

The Prince of Choseu is said to have taken forcible possession of the forts to the south of the Straits of Simonasaki. These are in the province of the Prince of Kokura. The Vice-Governor of Nagasaki went to enquire into the affair, but up to the departure of the *Rattler*, 28th August, no intelligence as to the result had been received.

It is announced that Mr. G. S. Morrison, the Consul, has deserted his post, and is now on his way to England.

THE ENGAGEMENT AT KAGOSIMA.

The following account of the circumstances preceding the British attack on the Kagosima batteries we take from the *Japan Herald*:—

"The Argus and the Havoc, both of which were engaged on the occasion, come into port this morning (August 22.) We have awaited the hourly-expected arrival of the flag ship, in the hopes to be able to place before our readers official information of the affair, but, as curiosity is so generally awakened as to the real particulars, we give the following, which, although not official, may be regarded as authentic:—

"The fleet, consisting of the Eryalus, 35, Admiral Kuper's flag ship; Pearl, 21; Argus, 6; Perseus, 17; Coquette, 4; Racehorse, 4; and Havoc, 2, which left here on the 6th, entered Kagosima Bay on the afternoon of Tuesday, the 11th. The bay is described as forming a very splendid harbour, and is surrounded by that lofty and picturesque scenery so graphically described by Osborn and others, and by some its defences would be considered next to impregnable. The fleet was anchored some distance from Kagosima, a city of vast extent, said to contain 180,000 inhabitants, and having its factories, warehouses, &c., on a most extensive scale. On the 12th the fleet moved up, and anchored opposite the town in 20 fathoms water, about 1,200 yards from the batteries, which extend along the whole of the town front—say about two miles from the extreme south to the extreme north. At six A.M., several of Satsuma's high officers went on board the flag-ship. It was observed by many that their demeanour was far from that courteous and conciliatory kind we are accustomed to; indeed that there was an amount of swaggering and bullying about their manner, reminding one of the looks of a caged tiger when his human tutor enters at the door, whip in hand. Colonel Neale had, it was clear, need before him for the exercise of all his patience and watchfulness, and some then began to foresee the necessity for the firm application of the iron lash. They said that Satsuma was not now at Kagosima, but at Kirisimi; they received the letter of demands, and having been told that the reply was expected in 24 hours they took their departure.

"On the following day all was quiet on board the fleet, Colonel Neale being busily engaged in diplomatic negotiations. His recently tested and proved forbearance had to endure another trial; the Yakouins were constantly running backwards and forwards, always bringing with them some evasive reply, and leaving without any definite conclusion.

"On the afternoon of the 13th, the allotted time having long

Digitized by Google

expired, an officer arrived, who said he had brought a letter of reply, but since he had left the shore a messenger had been sent after him to recall it, 'as there was a mistake in it.' It could not be extracted from him, and he left, saying that another should be sent immediately. None arrived until at nine o'clock that night, when one of a most important character was sent. This document we hope to place before our readers before long.

"Still Colonel Neale was patient. On the 14th, about nine o'clock, two officials went on board, saying they had been sent for a receipt for the reply. They then stated that when at Kioto, Stotsbashi (the Vice Tycoon) and two members of the Gorogio had most distinctly ordered Shimadzo Saburo that Satsuma was not to take any steps in respect to the murder of the foreigner by his retainers, and that the Tycoon's government would settle all the matter themselves. They pretended that it was believed that the whole matter was settled at Yedo; that they had heard nothing from Yedo on the subject, and could not at first imagine what could have brought the fleet to Satsuma; and asserted that, according to Japanese law and custom, Satsuma had no power to settle the affair himself, either by acceding to or refusing the demands of the British."

The *Japan Commercial News* gives the following as the purport of the letter written by Satsuma's ministers:—

"His August Master, previous to the arrival of the British fleet before Kagosima, had no intimation given him by the Tycoon's Government as to the demands which Great Britain was about to make upon him. That in regard to any money demands, the minister must address himself to the Government at Yedo, as he (Satsuma) could not decide on such a question as that, without the sanction of the Tycoon's ministers. That according to the laws and customs of Japan he had done no wrong whatever. That, in regard to the murder of Mr. Richardson on the Tokaido, he knew it to be a fact, but denied that Shimadzoo Saboro had any hand whatever in the matter; that the man who causelessly murders another in Japan is amenable to punishment of the severest kind, and that, in this instance, he had endeavoured to find the murderers, but for so far, they had evaded his authority. That if he had a mind to deceive the foreigners he could in an instant take some condemned criminals out of prison and hand them over to the Admiral as being the murderers of Mr. Richardson; but this deception his honour would not permit to be practised. That he was not bound by the Treaties of the Tycoon with foreigners. That those treaties were contrary to the time-honoured laws of Gongen Sama. That the Tycoon alone was answerable in this case, as he had permitted foreigners to come into Japan contrary to law and custom, and granted them liberties which permitted them to interrupt and impede the movements of Japanese princes on the high roads. That if this were permitted to continue, it would soon be impossible for a Japanese Prince to travel through the country. That the attack on Mr. Richardson's party was not contrary to the laws of Japan, and that, therefore his master (Satsuma) had done no wrong, and that under no circumstances could he or would he comply with any of the demands made by Great Britain."

The attack of the British fleet and the results are thus described in the *Japan Herald*:—

"All hope of any peaceful settlement being crushed, deceit and subterfuge appearing to be the only aim, Colonel Neale now stepped aside and the Admiral took the matter in hand. On the afternoon of the 14th there was a general shifting of the disposition of the fleet, the greater part of which were placed under the island, out of range of the guns on the fort in the middle of the channel—say 1,700 yards on either side.

"The Euryalus, although shifting, still remained within range, as did also the Perseus. On the morning of the 15th the Pearl, Coquette, Argus, Havoc, and Racehorse proceeded up the bay, and took as hostages three steamers there at anchor, said to be the England, purchased by Satsuma in 1861 for $120,000; the steamer George Grey, for $40,000; and the Contest, which cost him $85,000 in May last. The locality of the anchorage of these vessels was snugly behind Point Wilmot.

The weather, which had been stormy during the whole morning, now became worse; it was raining in torrents, and the wind blowing a hurricane round the bay. At ten o'clock the above-named vessels, English and Japanese, had returned, and at twelve o'clock the men were just piped to dinner, and nothing immediate expected, when suddenly the battery on the main covering the Euryalus, and that on the island covering the Perseus, opened fire. The three hostage steamers were forthwith fired, their crews having been previously sent ashore, and one of the head officers on board, recognised as having belonged to the staff of the late ambassadors to Europe, and another officer, at their own request having been taken on board the flag ship, where they now remained. All the ships weighed and formed line of battle. The Perseus then engaged the battery that had been firing at her in beautiful style, as we are informed, knocking her antagonist's guns over, one after the other, and when she had completed that, as though she had been only getting her hand in, she passed over to the other side, and engaged the battery on the opposite shore. All the batteries (10) were then engaged by the ships at point blank range, at from 400 to 800 yards respectively (the Euryalus was within 200 yards), commencing with the northernmost, and passing down the entire line. About dusk the town was fired in several parts by our shells, and three of the forts silenced. All the ships then returned to their anchorage save the Racehorse, which had got ashore within 200 yards of the nearest battery, of which accident she availed herself in true British style to pour her metal into it until it was effectually silenced. The Argus was sent to bring her off, which she accomplished after about an hour's delay, during the whole of which time she was under fire from one or other of the batteries.

This was Saturday, the 15th, during the whole of which day it had been raining and blowing fiercely. The loss on this day to us was 11 killed and 39 wounded; amongst the former there will be general regret that we have to name Captain Josling, of the flag-ship, an officer esteemed and respected by all who knew him; in ordinary times mild and gentle, but when the lion was aroused within him he was bold and daring: a true type of a British officer. Commander Edward Wilmot (late of the Agamemnon), of whose character all speak in the like glowing terms, met a glorious death by the same shot. Both were standing on the bridge of the flag-ship about the middle of the engagement (3.30), when a shot passed through the boat and struck them both instantaneously into eternity. The Admiral escaped death by the same shot in a wonderful manner; both he and the master were standing on the narrow bridge when the captain fell.

"About nine o'clock the whole of one side of the town was blazing.

"The following day (Sunday) the weather cleared up, the dead (two officers and seven seamen) were consigned to their sailors' grave in Euryalus Bay at eleven o'clock, and the fleet stood out, passing close to the batteries on the island, which it engaged the whole way.

"The destruction accomplished by the fleet appears to have been enormous.

"There can be no doubt that the whole city is now one mass of ruins, including the palace, the factories, and the arsenal and warehouses. The batteries have also been seriously damaged. Not one of them which had been engaged during the first day fired a shot on the second day as the fleet passed out.

"The three destroyed ships alone have cost Satsuma 245,000 dols., upwards of half of which he has paid very recently. Several large junks also were destroyed. The Japanese are said to have stood well to their guns, so long as the play was at long range, but seemed somewhat taken aback when our ships came to such close quarters.

"Their metal appears to have consisted of 13-inch and 8-inch shells; four 150-pounders, ten 80-pounders, and the remainder 32-pounders, &c.

"It will take some time to bring out all the little interesting episodes of the affair, but we have already heard of some surprising instances of pluck, and many more of the good practice of our guns.

"Considering the close firing, as we have said in some cases only 200 yards, the amount of damage done to our ships is wonderfully small. The Euryalus, of course, suffered most, and her damage appears to have been principally in her boats and rigging.

"The list of casualties is—Euryalus, 10 killed, 21 wounded; Pearl, 7 wounded; Argus, 6 wounded; Coquette, 2 killed, 4 wounded; Racehorse, 3 wounded; Perseus, 1 killed, 9 wounded.

"We had nearly omitted to mention that several most pressing invitations were sent to Colonel Neale to attend with as many of his suite as he chose on shore, at a conference, in a place prepared to receive them—a courtesy declined with thanks.

"It is useless to attempt to speculate at present what will be the next steps taken to bring this haughty Prince to reason.

"The description of ammunition used by Satsuma's forts must have been of a superior description. The quantity expended by us was considerable, and as matters have evidently not come to a conclusion, we may congratulate ourselves that a large further supply has arrived in the Cormorant and Barossa."

The *Japan Commercial News* publishes the following statement as to the subject of the Japanese in seeking to induce Colonel Neale, or Admiral Kuper and their suites to come ashore ostensibly for a friendly conference:—

Digitized by Google

"Satuma's officer who went on board the flag-ship said he had been commissioned by his chief to invite the Admirl and Colonel Neale, withr the whole of their respective staffs, to come on shore to the palace o, castle—there to confer regarding the demand made upon Satsuma. This of course, was declined.

"It has since transpired that this was an attempt to lead the Admiral and the minister, &c., into a snare; and that if they went on shore as invited to do, every arrangement had been made for their seizure, by the lifting of drawbridges, &c.; and, if this were effected, word would have been sent off to the squadron, that the captives would be beheaded the moment a shot had been fired at the town by any of the ships. If the intended treachery proved successful, the captives were to be imprisoned at Kirisimi—another town or strong hold, of Satsuma, some 50 miles inland."

CHINA.

SHANGHAI.

The dates are to the 3rd of September. The London mails of July 10 arrived on the 24th of August. The weather was unseasonably warm. Thermometer 80 to 90 deg., and cholera had reappeared.

Commodore Sherard Osborn had arrived in the *Peking*. His flag vessel, the *Keangsoo*, was daily expected. It was supposed that his first operations would be in concert with Colonel Gordon.

The reward offered for Burgevine has given rise to the following correspondence:—

"To His Excellency Lee, Futae, &c.

"Shanghai, August 20, 1863.

"Sir,—The undersigned consuls of treaty and non-treaty powers have perused with surprise a notification appearing in the public prints, to the effect that your excellency would reward any person procuring the delivery to of you the body of General Burgevine, dead or alive, to the amount of 3,000 taels.

"The undersigned see in this proposition a direct disregard of treaty stipulations.

"The undersigned are aware that according to American law the act of General Burgevine in taking up arms for the insurgents is an offence than which none could be greater, but they are also aware that the punishment therefor, as provided in the American treaty (A), and similarly in all others, can only be inflicted by the representative of his own Government; and, further, that were there no treaties in existence, he ought only to be punished according to the rules of civilised warfare.

"The undersigned are agreed in saying, that as regards General Burgevine, the utmost extent to which you may go is to procure his arrest, and this is true of the subjects of all treaty powers.

"We, therefore, respectfully request and demand that your notification shall be withdrawn or modified accordingly.

"The undersigned are agreed further in representing that any course of action towards the subject of non-treaty powers, which does not grant them when taken in arms the usual privileges of prisoners of war, will go far to alienate from your cause the sympathies of all the Western nations."

To this document the Futae returned a speedy reply. The following is the reply addressed by the Imperial Commissioner to the despatch from Mr. Consul Seward:—

"'Lee, Futae, to the American Consul.

"On the 22d instant I received your communication to the effect that a notice has appeared in the newspapers, offering a reward for the capture of Burgevine, dead or alive, and further to the effect that I have forgotten the treaty, and requesting me to withdraw the proclamation, &c.

"In reply, I observe that Burgevine has been invested with Chinese official rank, and has been employed as a military leader on behalf of the Chinese Government; and having violated Chinese law, it is right that he should suffer the penalty attached by China to the crime. His case differs entirely from that of ordinary offenders of your honourable nation, who are to be handed over for punishment to their consul. In fact, when foreigners become invested with Chinese official rank, and violate the laws within the limits of Chinese territory, by whom are they to be judged? The treaty contains no provision whatever on this point. How, then, can it be said that I am oblivious of the treaty?

"Moreover, the crime committed by Burgevine is not one with which other offences can be brought in comparison. Having already received rank as a superior officer of the third grade, to strike an official and to disobey the orders of those in authority, are in themselves a crime beyond excuse; yet the Board of Foreign Affairs and myself, from regard for the feeling of your honourable nation, refrained from pressing the matter. Burgevine has now, however, audaciously passed over to join the rebels at Soochow, and appears as the foe alike of China and of the forces of the several powers engaged in the protection of Shanghai. Thus Burgevine, having become one of the banditti cannot be accounted a citizen of your honourable nation; but if he still be accounted as such, it is certainly the consul's duty to have restrained him betimes, and to have adopted measures of precaution. How is it that he has been allowed to join with banditti? Furthermore, supposing that a Chinese subject were to become naturalised in your honourable country, and after receiving marks of favour from the Government, were of a sudden to turn rebel, would no notice of him be taken by your honourable Government? or could China endeavour to shield him with protection?

"The principles of reason are the same, whether in China or with foreign nations, and it is your duty as consul to assist me in capturing Burgevine, and bringing him to justice, in fulfilment of the obligations of amity and good-will; no principle exists which would justify his being suffered to join the rebels, or actually favoured with protection and support. As Governor, invested with supreme military authority in the province of Kiang-su, I am doing no more than arresting a rebel within the limits of my jurisdiction, in taking measures, as at present, for the seizure of Burgevine.

"Your dispatch itself asserts that the consuls representing all the different powers agreed in saying that I, as Governor, am empowered to arrest Burgevine; and my proclamation was directed to no other end. Not a word is contained therein respecting any ulterior punishment. You appear to have attached a mistaken interpretation to the words 'dead or alive,' and to have supposed me desirous of inflicting the penalty of death. I now distinctly state in reply that the expression 'dead or alive' contained in the proclamation refers to the apprehension that on Burgevine's capture it cannot be certain that resistance will not be offered, and firearms be used in the fray, resulting in Burgevine's death, whilst I should not, on this account, be justified in withdrawing the reward offered by proclamation.

"At the present moment the consuls of all the treaty powers are ready to assist me in protecting this place, in order that security may be afforded to the trade of all nations; and in seizing Burgevine I am actuated by no other motive than that of ensuring the safety of the country and of the respectable mercantile community; an undertaking which is surely one of complete humanity and justice.

"Foreign nations are all thoroughly actuated by principles of reason, and there is assuredlyno danger of their becomingestranged on this account. The consul may therefore set his mind at rest. There is nothing extraordinary in the proclamation, and it is needless therefore, to withdraw it. The consul is requested to take note hereof."

The programme of the races to come off on the 11th and 12th November promises good sport.

Of the movements of the Anglo-Chinese forces we find the following accounts in the *North China Herald*:—

"Major Gordon still remains at Quinsan, and for the present confines his attention to harassing the country round Soochow, so as if possible to cut off all supplies. We regret to have to announce the death, from dysentery, of Major Loudon, who for some months has commanded the Rifle Battalion of the Quinsan force. He was slightly wounded, we believe, in a recent skirmish with the rebels, and gradually sank from loss of strength.

"In prosecuting the campaign against the rebels, Major Gordon is likely to meet with very valuable assistance from the Sungkong force, recently organised by Doctor Macartney (late 99th Regiment). The following account of the attack on Fung-ching, sent to us by an eye-witness, seems to us to warrant the most sanguine expectations as to the ultimate success of Dr. Macartney and his troops:—

"'On Sunday, the 23rd August, Dr. Macartney marched with seven hundred men out of Sung-kong, and arrived on the 25th at a small village within five li of Fung-ching. Here he was joined by a force of Imperialists from Kin-san-wei. As soon as the Imperialists arrived on the ground, they commenced to entrench themselves, and in an incredibly short space of time had thrown up earthworks. Before these defences were completed, the rebels sallied out and attacked them, but were driven back with considerable loss. On the following morning, Dr. Macartney moved up to within three hundred yards of the place, and opened fire with six twelve-pounder howitzers, and five mortars Fung-ching is a town larger than Kahding, although surrounded solely by the walls and stockades thrown up by the rebels. The creeks surrounding it are extremely complicated, and the greatest possible advantage has been taken of this fact by the Chang-mao engineers. The other defences consisted principally of two ditches surrounding two stone-walled camps, inside which there was much woodwork, barricades, &c. However, after two hours' steady fighting, a breach was made, and the boats moving up at the same time, formed bridges over the two ditches. Here the Imperialists showed their pluck in a most remarkable manner. Many of them, too eager to get into the place to wait for the boats, swam the creeks and entered. Just as an entry was effected the camp, which had been most shelled, blazed up, the woodwork having been set on fire, and the foremost ranks were, in consequence, driven back upon the rear. A slight unsteadiness, caused by a rumour that the retreat of the men first in was caused by the return of the Chang-maos, was easily remedied, and the place was, in a few moments more, fully in the possession of the Imperialists. Fung-Ching will be found on the map of North-East China, published by the hydrographic office. It is there marked Fong-kyangchin. The importance of the position is manifest, as, being held by the Imperialists, it will interfere seriously with the transmission of supplies to Kah-hsing. This victory is more especially important as it was gained by troops who, since being subjected to English discipline under Dr. Macartney, had never been in action. It was also the first occasion upon which the shot and shell manufactured at the Sungkong arsenal had been tested against an enemy."

H.M.'s steamer *Rattler* left for Yokohama, loaded with relays of powder, ammunition, &c., for the fleet. The Consul has issued an acting extract of a despatch received from the Honourable Sir F. W. A. Bruce for general information.—

Digitized by Google

"I have to instruct you, therefore, to inform the British community that vessels under the British flag are not entitled to communicate with Nanking, or to anchor in face of the city, or within such a distance of the positions held, as may justify the position that they intend to communicate with them; and that if they do so, and are fired upon by Government cruisers, they will have no claim for redress, and will expose themselves to a revocation of the licence on the river."

The following items are from the *Friend of China*:—

Mr. Consul Markham has discharged from the gaol some 15 of the men arrested a little while ago on a charge of being about to join Burgevine. The charges would not hold water, we suppose, while the cost of feeding and looking after the prisoners must have been something serious.

"As notified by some of our correspondents on several occasions, the Chinese denizens of Shanghai will persist in the pernicious practice of leaving coffins, with dead bodies in them, in suburban fields. Particularly in the region of that section of Mr. Chaloner Alabaster's property occupied by the Cart and Horse Joint-Stock Company as stables and head-quarters of the *Ka-ting* (appropriate term for the Carting Co.) do they delight in depositing the foul effluvium yielding cases; and it strikes us that it would be well for the Municipal Council to detach a constable for that beat whose duty it should more especially be to look out for these nocturnal body depositors. If we could only catch one man in the act, the best way to stop the nuisance would be to erect a cross on the road side, and lash his arms to it spread-eagle fashion. We need not follow Chinese practices, and stick little flagged arrows in his ears, but we might decorate him with a crown of coloured paper, and place an inscription over his head, 'This is the man who tried to poison the community by depositing a rotten corpse in the fields.' We would not flog the man, nor starve him, nor let him stand like a scarecrow exposed to the sun; on the contrary, we would suggest every care of him, give him the best of food, and even put copper cash in his hand, as compensation for the public benefit his exposure would yield. We undertake to say that a three days' spectacle of this kind would be a lasting cure.

"We regret to state that an apprentice boy, about 17 years of age, belonging to the British ship Star of the North, lying outside the Marks, was lost in one of the ship's boats during the evening of Monday, and has not yet turned up. The particulars of the case, as far as we can glean from the captain, are as follows: The boat, with the second mate, steward, and four hands, pulled on shore to purchase poultry and vegetables, leaving the boy in charge of the boat, who fastened her to the fishing stakes. Being rather late, and darkness coming on, when they arrived in sight of the boat the boy attempted to near them by hoisting a staysail, but the wind being a little off shore, the boat could not reach, drifted away, and was subsequently lost sight of. The night of Monday, it blew fresh and squally, and it is feared that the boy, getting frightened at the darkness, was upset in one of the squalls. The captain has offered $100, a liberal reward, for the recovery of, or any information that may lead to, the boy's recovery."

A scheme for a railway from Shanghai to Soochow has been matured and placed before the Chinese Government for approval. The distance is about seventy miles, and the route will embrace the cities of Kahding, Taitsan, and Quinsan. It is not yet known whether a concession will be granted, or whether immediate steps are in contemplation for the construction of the road.

CHING-KEANG.

A correspondent from the place, under date 31st August, writes:—

"I wish to know, considering the great risk of life and property, why a gunboat is not stationed here instead of Silver Island, a distance of 2½ miles from where we are, and actually not visible from any hulk anchored in the stream? True, there is a gunboat, but merely protecting H.M.'s Vice-Consul and the Commissioner of Customs at Silver Island. These two are the only Europeans resident on that island.

"With regard to the allotment of the British concession, I must say a few words. H.M.'s Vice-Consul, Mr. Adkins, informed us that he had received a notification from Her Majesty's Plenipotentiary at Peking, stating that he was to allot the land; but this 'active' gentleman replied that he would not do so till the cool weather came on, for fear of a sunstroke. The sun is not at all powerful, as I have been myself many times surveying land, and felt no effect from the sun. In doing business with the Consul, we are bound, in spite of wind, rain, or sun, to go to Silver Island; and why should not the Consul be made to do his duty, whether in wind, rain, or sun?"

HANKOW.

The correspondent of the *Friend of China* writes:—"By this opportunity I have little or no news to offer, except the seizure of two American lorchas by the British and French gunboats, on a charge of piracy and murder. One has been released, but the other is still held by the French Consul, and a trial of the captain (a man named Carrol) and crew has taken place. It appears that the lorcha now seized has been squeezing Chinese junks out of considerable amounts of money, and on one occasion two or three Chinamen were shot. On coming here she was recognised and seized, doubtless very justly; and it is to be hoped that the crew, if guilty, will meet with the severest punishment the law affords. The name of the lorcha is the *Maria*, said to be owned by a respectable American shipmaster. Freights are still down, and show no signs of an upward tendency. A great deal of tea, oil, &c., is still being sent to your port. At Kiukiang a good trade exists, and a great many steamers fill up there. The *Elfin* flies the Imperial banner, and is manned by Customs' officers. Buckley, the expatriated, is supposed to be on the river. Report says he has been at Kiukiang and Hankow."

NINGPO.

There have been loud reports of the Franco-Chino Contingent being unable to hold their own at Shouhsing, and D'Aguibelle, it is said, has been ordered, at Peking, peremptorily to give up interference with the army of Chekiang. D'Aguibelle, it is supposed, will join Burgevine, to whose force an addition has been made from Ningpo, lately, of over fifty Europeans.

HONG KONG.

The dates are to the 11th Sept. The London mail of 27th July arrived on the 8th Sept.

From the *China Mail* we extract the following:—"An appeal case from Yokohama against Consul Vyse's decision was heard before Acting Chief Justice Ball, on the 27th Aug. H. E. Hoey was appellant, and W. Kemptner respondent. The Consul's decision was affirmed. It may be remarked that the present judge is much given to 'gravely doubting' the merits of the respondent's case, and as it has been laid down by some eminent authority that for an appellate Judge gravely to doubt is to affirm, there are now almost no Consular decisions reversed. Judge Adams, on the other hand, used to make a legal meal of almost every Consular decision that came before him."

It is with much regret that we have to record the death of our respected townsman, Dr. Enscoe, which occurred on the 30th August, the cause being heart disease. Dr. Enscoe was for nearly three years surgeon to the Seaman's Hospital, and much esteemed and trusted by all who knew him. The suddenness of his death has cast a gloom over the large circle of his acquaintances.

The Praya has suffered rather severely from the effects of the late gale. We expected that Messrs. McGregor and Co.'s new pier would have had a few planks started as the water was high enough to force them up from below, but our reporter states that not the smallest damage hhs been done to the pier

We (*Daily Press*) observe that the advices from Peking, brought from Shanghai per *Ganges*, confirm the report of the decapitation of Shi Tai-kai, the ex Taiping chief in the province of Sz'chuen. Our readers may remember, in our issue of the 25th of August we gave currency to the rumour, considering that it required confirmation. Shi Ta-kai was a superior man. He left Nankin with a large force, having become disaffected in consequence of Hung-tsui-tsuen (Taiping Wong) having put to death the Eastern King and all his retinue.

PHILIPPINES.

MANILA.

The correspondent of the *China Mail* writes—"On the 28th of August a heavy gale blew over Manila and its environs, causing some damage to the shipping, and to property on shore. It was not a regular typhoong, but apparently the edge of one, and its full force has probably been felt further north; it was followed by an inundation which did considerable hurt to the crops in some places. Other news is not very exciting, but such as it is, I will give it to you.

"At Iloilo, destined to be the emporium for Philippine Exportation, the trade and shipping have increased mightily of late, this is doubtless owing to the exertions of our respected Vice-Consul Loney while in England.

Digitized by Google

"The captain of the *Gipsy Bride* with his wife and child, and the remainder of the men, have safely arrived overland, having been nearly wrecked a second time in the Pelays; the kindness of the priests and others in the provinces through which they passed compensated them in a great measure for the hardships they underwent.

"On the 7th, the great lottery came off, but nobody got the coveted $16,000. One infatuated individual was so worked up by disappointment, that he publicly accused the master of the ceremonies of leaving out 2,000 numbers; of course the insane denunciator was immediately carried off to Bedlam.

"On the 31st July, a heavy earthquake was felt at Cagayan, the schock extending to the district of Lepanto; on the same day, a proa was upset in a gale on the lake, and a poor native woman drowned.

JAVA.

BATAVIA.

The weather was very boisterous and more like west than east monsoon. Floods all over the island were doing much damage to coffee, sugar, rice, and indigo plantations. The people in the interior were all complaining. Several shocks of earthquake had also been felt in the interior.

The last statement of the import and export duties again shows how much the trade has diminished during this year. The sum total for the first seven months of 1863 is less by 340,000 f. than the amount received in the corresponding period in 1862, and 657,000 f. less than in 1861.

Everything was quiet in the dependencies, the only remarkable occurrence noted being a fall of hail in the XIII Kottas on the west coast of Sumatra, the hail stones being of the size of a musket bullet.

MALACCA STRAITS.

SINGAPORE.

A communication had been received from the Governor of India relative to the draft of a bill to authorise the levy of port dues in the Straits Settlement which he transmitted towards the close of 1862, which led to a strong protest from the mercantile community, the Secretary of the Chamber of Commerce drawing up a very able paper condemning the project, and showing that the imposition of the very slightest incumbrance upon the freedom of the Port would greatly endanger the native trade of Singapore. An assurance has now been received from the Government of India that it was not at present intended to carry out the measure. So the matter rests now; but the condition of the settlement with respect to it cannot be said to be altogether satisfactory.

The Netherlands Consul writes to the *Straits Times* contradicting what he terms erroneous reports respecting "the proceedings of the Dutch" on the East Coast of Sumatra, which if credited, he states, might prejudice trade and foster distrust. "I have the honour to inform you," he writes, "on the most reliable authority, that no blockade has been established at any river or port in those parts, nor has a gun been fired at any boat, even as a signal, by any Dutch Government vessel; and, further, that not the least impediment to trade or to intercourse with the natives has taken place at any part of that coast."

The Commander-in-Chief in India, Sir Hope Grant, was shortly expected to pay a visit to Singapore for the purpose of inspecting the condition of military defence; two batteries of artillery from Mount were on their way. The project of arming of Fort Canning with Armstrong and Withworth rifled guns, of the heaviest calibre, in place of the smooth bore guns at present mounted, was said to be entertained by the Commander-in-Chief.

By the P. and O. Company's steamer China, sixty Singalese convicts had arrived from the Ceylon Government. The prisoners were sent on to Malacca by one of the Straits steamers. The periods of transportation the prisoners are sentenced to range from seven to twenty-one years. We understand that another batch of convicts are on their way to the Straits.

BIRTHS.

BRAMWELL—On the 13th August, at Hong Kong, on board the British ship King Arthur, the wife of Captain Bramwell, of a daughter.
CHALDECOTT—On the 10th Oct., at Boomond, Chertsey, the wife of T. A. Chaldecott, Esq., late of Hong Kong, of a son.
COBBOLD—On the 12th Oct., at Ipswich, the wife of J. P. Cobbold, of a daughter.
DURRANT—On the 18th Oct., at Dalston, the wife of Mr. Alfred Durrant, of a daughter.
HULEATT—On the 19th Oct., at the Parsonage, Potter's-bar, the wife of the Rev. Hugh Huleatt, late Military Chaplain at Hong Kong, Principal Chaplain, Aldershott, of a son.
LINSTEAD—On the 30th August, at Hong Kong, the wife of T. G. Linstead, Esq., of a daughter.
MURRAY—On the 14th Aug., at Hong Kong, the wife of Dr. J. Ivor Murray, F.R.S.E., H.M.'s Colonial Surgeon, of a son.
PARKER—On the 1st Sept., at Hong Kong, the wife of E. F. Parker, Esq., of a son.
SHIPMAN—On the 20th Oct., prematurely, at 171, The Grove, Camberwell, Surrey, the wife of William Shipman, Esq., London Manager of the Agra Bank, of a son.
STILL—On the 2nd Sept., at Hong Kong, the wife of C. F. Still, Esq., of a son.
WRIGHT—On the 15th Sept., at Singapore, Mrs. G. T. Wright, of a son.

MARRIAGES.

ALLAN—WALLER.—On the 1st Sept., at St. George's Church, Penang, by the Rev. Jas. Mackay, John Allan, Esq., to Harriet Scott, daughter of George Waller, Esq., R.N. No cards.
FINCH—BORRADAILE—On the 20th Oct., at All Saints' Church, Blackheath, by the Rev. Abraham Borradaile, M.A., assisted by the Rev. M. M. Ffinch, B.A., John Parkinson Ffinch, Esq., of Barnstaple, Devon, to Frances Joseph, fifth daughter of the late John Watson Borradaile, Esq., of Blackheath and Fenchurch-street, City.
ODELL—BIRD.—On the 13th Oct., at St. Bride's, by the Rev. E. Roberts, M.A., John Odell, of Foo-chow, China, second son of Thomas A. Odell, Esq., of Peckham-rye, Surrey, to Elizabeth Robinson, second daughter of Richard M. Bird, Esq., of Grove-street, Liverpool. No cards.

DEATHS

CLAYTON—On the 20th Aug. last, at Hong Kong, aged 24, George Clayton, Captain 99th Regiment, youngest son of John Clayton, Esq., of Lancaster-place, Strand, and of Hook, Surrey, from the effects of a wound received while acting as aide de-camp to Major Gordon, R.E., commanding the Anglo-Chinese Force at the attack on Kwanshan, on the 28th May last.
CLAYTON—On the 19th August, at Kowloon, from the effect of wounds received before Quinsan, George Clayton, Esq., Capt. H.M.'s 99th Regiment.
ENSCOE—On the 30th Aug., at the Hospital-hill, Hong Kong, Dr. John Enscoe, Resident Surgeon of the Seaman's Hospital.
EMANUELSON—On the 23rd Aug., at the Seamen's Hospital, Hong Kong, Charles Emanuelson, late of the Royal George.
GIBSON—At Whampoa, on board the steam-ship Robert Lowe, on the 6th Sept., Thomas Dudley Milner Gibson, aged 19 years, son of the Hon. Milner Gibson, M.P. for Ashton-under-line.
HALE—On the 14th Oct., at Guernsey, Frederick Howe Hale, Esq., late of H.M.'s Consular Service in China.
HINCKLEY—On the 15th Sept., at the residence of the United States Consul, Singapore, Margaret A. Hinckley, wife of Captain Thomas L. Hinckley, aged 36 years.
JOSLING—On the 15th Aug., killed in action on board H.M.S. Eurydus, in Japan, Captain J. J. S. Josling, R.N., second son of the late T. Josling, Esq., of Lisbon.
JORDAN—On the 27th August, at Shanghai, of Morbus Brightii, V. P. Jordan, Esq., bill-broker, one of Shanghai's oldest and most respected residents.
LINNELL—On the 23rd Aug., at Hong Kong, on board the ship Tynemouth, Charles Linnell, apprentice.
LOUDON—On the 21st instant, at Quinsan, David Loudon, Major 4th Rifle Regiment, of dysentery, aged 24 years. During the past eighteen months Major Loudon has distinguished himself on every occasion in front of the enemy, and is much regretted by all who served with him.
LOW—On the 31st Aug., at the *China Mail* office, Hong Kong, Robert A. Low.
MACLARIN—On the 12th Oct., at 114, Princes-street, Edinburgh, Donald Maclarin, Esq., of Lockbry, late of Batavia.
MUMFORD—On the 25th August, at the Hongque Station, after two days' illness only, of bowel complaint, aged 37, George Mumford, Constable in the Municipal Police Force.
RANKIN—On the 2nd July, at Tangchow, Rev. H. V. Rankin, aged 36 years. He had been a Missionary to the Chinese for more than fourteen years.
SOUZA—At Hong Kong, on the 30th August, Luiz Joao de Souza, aged 21 years.
WILKINSON—At the Seamen's Hospital, Hong Kong, Thomas Wilkinson, late of the Black Watch.
WILMOT—On the 15th August, killed in action, on board H.M.S. Eurydus, in Japan, Commander Edward Wilmot, third son of Sir Henry S. Wilmot, Bart., of Chaddesden.
WILSON—On the 11th Aug., at Hankow, China, after a few days' illness, the Rev. Robt. Wilson, B.A., of the London Missionary Society, aged 34.
WOODRUFF—On the 12th Aug., at Nagasaki, Mary Evelyne, youngest daughter of Mattie A. and Samuel C. Woodruff, aged one year and six months.
WOOD—On the 20th August, at Shanghai, Emily Julia, wife of J. W. Wood, Esq., aged 22 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The amount exported to Great Britain is unprecedentedly large. Taking this circumstance into consideration, as well as the unfavourable advices received each successive mail from London, the range of rates is singularly high.

MACAO.—Tyshan prepared in Kysow fashion, sale 2,500 half-chests, at 23.50 to 24 taels. Souchong, 1,200 half-chests and 1,200 boxes, at 25.50 to 25 taels. The stock of unprepared leaf on the market amounting to 1,200 piculs, mostly of common sorts, have just been taken for the colonies, at 15.50 taels, adding up the settlements for the season to date, for Australia 11,000 packages, and for England 17,000 packages.

CANTON.—The Teamen have yielded about 1 to 1¼ taels in their demands for Congous, but are still above what London rates will justify. The arrivals from the country have been 13 chops, whilst the settlements, as detailed below, have been insignificant. In other descriptions than Congou but a small business has been transacted. Scented Orange Pekoes, and com. to mid. kinds of Caper, are rather easier. Greens are fully one tael lower.

AMOY.—An advance of about $1 to 1.50 was established in the early part of the month on Congous and Oolongs, which has been maintained on the latter description. Congous however are less inquired for, and have declined to the rates previously current. The settlements of this description are stated at 5,400 hf-ch. at $20.75 to $26.50 for common to flowery kinds. Oolongs and Ankois. Supplies have continued much below the average of late seasons: the deficiency to date being upwards of 43,000 hf.-ch. This circumstance added to a report of disturbance in the Ningyong districts, has caused the Teamen to become firm holders. Of true Ningyongs, only one or two chops are now upon the market, and for these extreme rates are asked. The settlements of the fortnight amount to 18,000 hf.-ch. at $20 to 25—one small parcel, very fine, fetching $32.50. The current quotations are $20 to 22 for common to good common, and $23 to 25 for fair cargo teas. Of good Ankois, 300 hf.-ch. have also been settled at $16 to 18. Plain Capers.—800 boxes have been taken at $13, leaving only 450 boxes on the market. Plain Orange Pekoes.—No transactions.

FOO-CHOW.—The arrivals of Congou from the interior have been large during the fortnight, which circumstance, combined with the unfavourable advices from England, has tended to depress rates for Congous. The inquiry for broken-leaf kinds has abated, and the advance noted last mail has been lost. Other qualities have declined one tael, demand at the reduction being pretty active. Souchongs have continued in full supply, and have declined one to two taels. Oolong are in limited sup-

Digitized by Google

ply, and the business to the United States has consequently been restricted. Flowery Pekoes are also in small supply, fine quality being scarce; the bulk of the settlements are for shipment to India. Scented teas have declined one tael, but the supply is scant.

Shanghai.—Black: Only a small business at previous rates was transacted before the 10th of July mail arrived on the 27th ult.; the accounts brought of the home market were again most unsatisfactory, the demand for local consumption and export being very small, sales could not be made unless at a further decline of 1d. per lb. These news naturally had a very depressing effect on the market, more especially as better accounts had been looked for, and it was not until a concession of fully two taels had been made that purchasers came forward; about thirteen chops were settled at these rates, and as buyers were inclined to go on at these prices, tempted by the fall in exchange and higher rates in Hankow, holders became firmer. Settlements on the market, 30 chops; 16,340 chests Oopacks, Oonahms, Ningchows and Hohows. Re-shipped on owners' account, 8 chops, 4,941 chests Oopacks—21,281 chests, making total to date 208,851 chests. Stock waiting shipment for re-sale 31,000 chests, second Crop Oopacks and Ningchows are quoted at Taels 30 to 36; first and second Crop Hohows Taels 25 to 28: Green.—The market was opened on the 27th for Pingsueys at Taels 38½ for a good chop of country packed Tea. As the bulk of the crop has this year been contracted for by foreigners, little will be offered on this market. A chop of good new Shanghai packed has been taken at Taels 28. A demand for common young Hyson amongst the Shansi traders for shipment to Tientsin has cleared this market of a great portion of old stocks. New country teas are not looked for till the middle of the month.

Hankow.—The unfavourable accounts of the London market, brought by the Mail of 26th June, for a while made buyers less anxious to continue paying previous rates, but Teamen being firm holders for all good teas, purchases were made at about previous rates. Prices now current show a further advance of about 1 tael per picul on Oopacks. Oonams maintain their previous value, but are less sought after, and are at times to be got on cheaper terms. The quotations, short price, are 26 to 29 taels for fair to good third crop Oopacks; 25 to 27 taels for good third crop Lylings and Chongsowykes, and 20 to 25 taels for common to fair Oonams. The settlements of the fortnight are reported at 26 chops, making the total settlements of the season to date (including contract teas) 407 chops, against 267 chops, corresponding period last season. The stock for sale on the market is 23 chops.

Kewkiang.—Black.—Settlements 3 chops at 27.0 to 27.5 for Ningchows, and 21.5. for common Honam. Stock 3 chops medium Ningchow, 1 chop Moning, and 4 chops common Hohow. Total arrivals to date 105 chops, of which 69 contracts. 14 Sales, 15 shipments, 8 stock. Green Teas: One more small chop of new Tea (mixed Kewkiang packed leaf) has been settled at taels 28.6, leaving no stocks. Arrivals have been delayed by bad weather, several chops new Tea being now on their way from the country. The Chinese will persist in not recognizing the transit duty certificates, whereby Teas in transit under these documents are made to pay higher charges than native owned parcels. Exports to date from 1st June. Blacks, 62,784 chests. Greens, 5,401½ chests, and Leaf, 4,740 piculs.

Raw Silk.—Shanghai.—The continued unsatisfactory reports of the home market by the 10th of July mail caused the dealers to be more anxious to make sales, and several purchases were effected at a slight reduction on former rates. As the demand, however, became more general, the silkmen were firmer, and have since established a return to fully last mail's prices. The supply from the interior is estimated at 2,000 bales, which about equals the settlements, so that the amount of unsold stock remains unchanged. About 1,058 bales have been received from Japan. The settlements of the fortnight are reported at 3,200 bales, against 6,900 bales corresponding fortnight last season, and 5,500 bales corresponding fortnight of season before, making the total settlements to date of the present season 13,700 bales, against 23,000 bales last season, and 18,000 bales the season before. The stock on the market at those periods stands thus:—15,000 bales, 11,000 bales, and 9,000 bales. The following are the current quotations:—Tsatlees, No. 1, 445 tls. per picul; 2, 435; 3, 405 to 415; Taysaams, No. 1, chops, 385 to 395; 2, 370 to 375; 3, 340 to 355. Macao: Arrivals from the fourth crop of the season amount to about 150 piculs, of which only 10 piculs, No. 1 Loongkong, at $410, and 10 piculs Sewlahm, at $320, found buyers for India, leaving in stock 30 piculs Loongkong, held at $410 to 420 for No. 1, and $395 to 405 for 2; about 70 piculs of Cumchook and Kowkong, held at $380 down to $350, and some 30 piculs of Sewlahm, for which dealers demand $335. Canton: Since the date of last report, no settlements of Loongkongs have been made by Europeans for London, the prices still asked by the dealers being much over the home quotation. The only purchases during the fortnight for Europe consist of Tsatlees, and imitation Japans, of which for this mail about 100 bales go forward. The Indian houses have been very small buyers for this steamer, and should their further operations be on a more moderate scale, a decline in prices may be reasonably anticipated, influenced of course by the outturn of the 5th and 6th crops. The winding off of the 4th crop Cocoons is nearly completed, and the silk of the 5th crop will be ready for market in about ten days from this time. Prices remain nominally the same as those before quoted, viz.:—Loongkong, No. 1, $405 to 410; Loon-kong, No. 2, $385 to 395; Kow-kong, No. 1, $365 to 370; Canton Tsatlee, $460 to 465; imitation Japan, $430 to 435. Yokohama: European advices by the mail of 10th June, exerted a considerable check on the market, which previously was steady. Native dealers appear willing to concede the reductions at which foreigners may become buyers, but no operations have as yet been made which would fix the rates. The quotations, therefore, are nearly nominal. Present stock about 800 bales; further quantities expected. Mybash, best, $500 to 510; medium, $480 to 490; inferior, $460 to 470. Coshu, best, $430 to 440; medium, $410 to 420; inferior $390 to 400. Hatchegee, $370 to 380. Oshio, inferior, $390 to 400.

Drugs, &c.—Macao.—Cassia Lignea: Sales 1,500 piculs, at $15.50; stock 600 piculs, held at $16. Cassia Oil: Sales 10 piculs, at $190; stock 30 piculs. Aniseed Oil: Sales 25 piculs, at $133; stock 100 piculs. Star Aniseed: Sales 40 piculs, at $15; stock 30 piculs. Galangal root: Sales 500 piculs, at $3.10 to 3.20. Ginger Preserves: $3 for best. Vermilion: $35.50.

CHINA IMPORTS.

HONG KONG.

Cotton Yarn.—Neither from this colony, nor from Canton, have any sales of cotton yarn to be reported, if we except 25 bales of sea-damaged goods disposed of by public auction. From Amoy, 170 bales are advised as sold at $73 to $75 for Nos. 16 to 24.

Grey Shirtings.—These goods have also been without any inquiry during the past fortnight, and although the nominal quotations are pretty nearly the same as those given last month, the dealers evince no desire to make purchases.

White Shirtings.—Some 4,000 pieces of these goods have been settled, and prices show no material alteration.

T-Cloths have met with no inquiry, and the only sales to notice are those of damaged goods, amounting to about 2,500 pieces, which have been moved off at auction.

American Drills.—There has not been anything done in these fabrics.

White Spotted Shirtings, Dyed do., Brocades, White and Coloured, have likewise remained quiet, without inquiry, and there is not a single sale reported, either in this colony, or from Canton.

Chintzes and Handkerchiefs.—The former have not met with any demand during the past fortnight, but the latter have been taken to the extent of about 700 dozens, $1.27½; in Canton nothing has been done.

Raw Cotton.—There is not much change observable in the value of this staple since the date of last report, and the business of the fortnight has again been upon a moderate scale, estimated at about 3,700 bales. No transactions have been reported from the cotton market, and at Amoy the demand has, for the time, almost entirely ceased: the sales of the past month aggregating only 310 bales of Shanghai taken at $24 per picul.

Woollens.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths.—The sales in this colony during the past fortnight are reported at 240 pieces of the first-mentioned goods, which show a slight decline in value as compared with the prices previously current. Habit Cloths have also met with a little more inquiry, and the sales of these goods are put at 340 pieces. In Canton there have not been any transactions. Long Ells do not show any decline in prices during the fortnight, and have met with fair demand; the sales in Hong Kong being estimated at about 2,000 pieces; while in Canton, they form the only description of woollen fabrics which has found buyers; the settlements there being 150 pieces at previous rates. Camlets.—The business transacted in these goods has been very small, amounting to only 240 pieces sold in Hong Kong. Lastings.—The sales of Lastings in Hong Kong are put at 260 pieces, at previous rates.—Blankets have not lately been quite so much inquired for, and the sales of the past fortnight do not exceed 190 pairs.

Metals—Iron, Flat, &c.—There has not been much inquiry for Iron during the fortnight, and the prices of the various descriptions remain generally pretty much as before quoted; the settlements reported are 595 piculs of Round, Square, and Flat, 600 piculs of Hoop, and 200 of Iron Wire. In Canton, the sales are put at 850 piculs of Nail Rod; other kinds being quite neglected. Lead has not advanced from its present low value, and the sales in this colony are estimated at 760 piculs. In Canton, the demand for this article has been tolerably active, and has resulted in sales of 2,800 piculs, but without improvement in price. Tin has been sold in this colony to the extent of 460 piculs at previous rates. In Canton, there has not been anything doing. Tin Plates—The quotations for Tin Plates remain as at the date of last report, with sales of 700 boxes in Hong Kong. Steel.—No transaction to notice.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 3d. to 6s. 3¼d.	6s. 3d. to 6s. 4d.

From SWATOW.—None.

From HONG KONG and CANTON.—For London: Sept. 7, Canadian. For Liverpool: 1st, Iron Crown. For Hamburg: 3, Athlet.

From MACAO.—For Falmouth: Aug 23, Parana.

From MANILA.—None.

From SINGAPORE.—For London: Aug. 27, Sawey; Sept. 6, Prince Alfred; 13, Maid of the Tyne. For Liverpool: Aug. 20, Bogota; Sept. 2, Tigris; 11, Alfred Roy; 12, Thomas Mitchell; 13, Lous Cezard. For North Shields: 4, Zes Gezusters.

From BATAVIA.—None.

LOADING.

At JAPAN.—For London: Medina, Broadwater, J. C. Munro, Esperanza, Cambridge.

At HANKOW.—For London: Finzel.

At SHANGHAI.—For London: Gauntlet, Moneta, Clara Babuyan, Sovereign of India, Siam, King Arthur, Rock City, Clarendon, Reindeer. For Liverpool: Allendale, Lorton, Childe Harold, Cordova, Jane Leech.

At FOO-CHOW.—For London: Empress Eugenie, Naomi.

At HONG KONG and CANTON.—For London: Queen of the Age, Queen of the North, Ocean Bride, Tamana, Agincourt, John Lidgett. For Liverpool: Beautiful Star (full).

At MANILA.—None.

At SINGAPORE.—For London: Andromeda, Peter Symon, Latona (calling at Cape). For Liverpool: Morning Star, Halton Castle.

At BATAVIA.—For London: William Simpson. For Channel: Wave, For France: Isly, Chaptal. For Amsterdam: Nicolaas Wilson, Batavia. Imphilrite, Margaretha, Etha, Alma, Merchantman. For Rotterdam: Mercator, Mary and Hillegonde, Jannetje, Batavia, President Plete, India, Johanna.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.—19th August: Forerunner from Sunderland to Shanghai; 23rd: Manilla, from London to Manilla: 24: Meppel, Amsterdam to Japan; Cutwater, Liverpool to Hong Kong; 25: Hawthorn, Sunderland to Shanghai; Speedy, London to Shanghai; Adelaide, Newcastle to Shanghai; Benvoirlich, Shields to Singapore; 26; British Banner, Swansea to Shanghai; India, Cardiff to Singapore; Glendower, Sunderland to Shanghai; 27: Endora, Cardiff to Shanghai; 28: Spahis, Bordeaux to Singapore; Sir Harry Parkes, Sunderland to Shanghai; Standard, Sunderland to Hong Kong; 29: Chaptal, France to Batavia; Bulyersteyn, Rotterdam to Batavia; Zeelandia, Shields to Batavia; Oscar I, England to Batavia; India, Rotterdam to Batavia; Jacoba Helena, Rotterdam to Batavia; Jeannette and Cornelia, Rotterdam to Batavia; Vibilla, London to Amoy; Santon, Sunderland to China; Johanna, Bordeaux to Hong Kong; 30, George Beker, Glasgow to Singapore; Zingra, Glasgow to Shanghai; September 1, Sappho, Glasgow to Shanghai; Helens Bank, Glasgow to Batavia; Samuel, Sunderland to Shanghai; 4, Narcis, Hamburg to Hong Kong; 6, Ascendant, London to Singapore; 10, Electric, Liverpool to Singapore; Laurel, London to Hong Kong. From United States, &c., to China, &c.: August 21, Fearless, from New York to Shanghai; 25, Endeavour, New York to Shanghai, J. W. Seaver, Boston to Siberia; 26, Queen of the Seas, New York to Hong Kong; 29, Sparrow, Boston to Shanghai. From China, &c., to England and Continent.—Aug. 17, Fanny, Batavia to Amsterdam, de'Elmina, Sourabaya to Rotterdam; 19, Sparkler, Singapore to Liverpool; 20, Maritana, Manila to Liverpool; 20, H. Pudomsey, Singapore to London; Banian, Hong Kong to London; Chrysolite, Hong Kong to London; 23, Brodie, Batavia to Rotterdam; 26, Caroline Coventry, Shanghai to London; 30, Invincible, Hong Kong to Liverpool; Sept. 5, Landbouw, Batavia to Rotterdam; 6, Minerva, Batavia to Middleburg; Staatsroad van Ewyck, Batavia to Amsterdam. From China, &c., to United States.—Aug. 24, Manila to New York; 25, Sooloo, Manila to Boston; 30, Kitty Simpson, Manila to New York; Horatio, Manila to New York.

FREIGHTS AND CHARTERS.

JAPAN.

Yokohama to London: Cotton, £4. 10s.; Tea, £5.; Silk, £6. 10s.; Nagasaki, £4. 10s.

HANKOW.

To London: £5 per ton of 50 cubic feet. To Shanghai: Taels 25.0.

SHANGHAI.

The rate for Tea and Cotton is £3. Tonnage in the harbour is much larger than required, and until the Cotton comes down in quantity better rates cannot be looked for.

FOOCHOW.

To London £3. 10s.

HONG KONG.

Very little is doing; coast rates remain low, tonnage in the harbour large. The following are some of the charters:—Ismyr (British schooner, 207 tons), Macao to Melbourne, £3 to £3. 10s.; Johanna (Dan. brig, 199 tons), Whampoa to Hamburg, £3 to £3. 10s.; Glenclune (B ritish barque, 471 tons), Foochow to New York, £3. 5s.; Ingeburg (Dan. barque, 368 tons), $1,300 per month for twelve months; Cohen Family (British ship, 897 tons), to Shanghai with rice, 20 cents. per picul; Catherina (Dan. brig, 260 tons), Whampoa to Cheefoo and back, 48 cents. per picul.

SINGAPORE.

Freights have a downward tendency consequent on the large number of arrivals. Five vessels are on the berth for London and Liverpool, loading at the following rates—£2. 15s. to £3 for Tin, Antimony, Ore, and Sago Flour, £3 to £3. 5s.; Gambier, £3. 15s.; Pearl Sago, £4.

CASUALTIES.

NAGASAKI.

The Lucy E. Ashby, from Shanghai, encountered the Typoon on the 15th inst., and was towed into Nagasaki on the 17th by a Russian steamer. She was dismasted, but further particulars are not reported.

The Prussian barkentine Dove, which arrived at Shanghai from Hakodadi, encountered a heavy typhoon on August 16, in lat. 35 N., lon. 130 E., commencing from the N.E. and veering round. The bar fell to 27·00. During the gale she lost the quarter-boat from the davits, and seveaal sails were blown away.

The British ship Osprey, Capt. Andrews, while proceeding to Shanghai in tow of the Martin White, came into collision with the Kim-Hong-Kieng (Dutch barque), carrying away her jibboom, and knocking the flue of the anchor through her side. The pilot turned the steamer back full speed, and ran into the J. H. Ransom, doing her considerable damage, and sustaining serious damage to herself. So badly was the vessel managed by the pilot that Capt. Andrews suspended him from charge, and handed the pilotage of the vessel to the captain of the Martin White, who very ably and creditably released the Osprey from her difficulties, and placed her in a safe anchorage for the night, proceeding to Shanghai the following day.

HONG KONG.

The steamer Arratoon Apcar experienced a typhoon on 29th August, twenty-five miles north of the Paracels wind N.N.E. to N.N.W. lowest bar: 29.55 ship stood to the southward to avoid the brunt of it, about 100 miles, and was delayed outside, not a great distance from Hong Kong, in consequence of the crank pin of the air pump breaking.

The Siames barque *Lucky Star* was hove to in sight of the Lema in the gale of 3rd September and lost her spars through the seizings of the topmast backstays giving way—everything was new and not properly stretched. The vessel worked so heavily that the rigging became slack and the ship leaked.

The Sir Hugh Rose, bound to Calcutta, has returned to harbour, with loss of bowsprit, &c., having been in collision with the British ship Crimea.

A collision has occurred between the steamers Cadiz and Hydaspes The latter vessel has lost the whole of her port quarter and portion of steer-frame; the former is slightly injured about the stem.

We regret to hear that the three-masted schooner Mona is reported as totally lost on the coast of Japan. The steamer St. Theodosius is also missing.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Oct. 26, at Falmouth, from Maulmain: Cames. From Akyab: Earl Canning, Ocean Traveller. From Rangoon: Transit. Oct. 25, off the Eddystone, from Shanghai: Coulrakyle; Falmouth, from Akyab, Theodor Kornnr. 28, at London, from Shanghai: Guinevere; at Liverpool, from Shanghai: Oxus; at Cowes, from Basseim: Morning Glory.

DEPARTURES.—Oct. 23, from Cowes, for Batavia: Ouderkirk, a.d. Amstel; 23, from Deal, for Singapore, Kosmos; 28, from Newport to Hong Kong: Margaret Mitchell; 24, from Sunderland, for Hong Kong: Nieuwland; 29, from London, for Shanghai: Min; 27, from Deal for Batavia: Australie; 26, from Cardiff, for Shanghai: Nicoline; from Queenstown, for Shanghai: Achilles; from Glasgow, for Liverpool to Shanghai: Eliza Shaw; from Liverpool, for Cork and Singapore: Fortitude.

The Silver Eagle, Caroline, Coventry, and West Derby, now on their homeward passage from Shanghai, with troops, are daily expected to arrive, but up to the time of our going to press, no intelligence respecting either of them had been posted.

Digitized by Google

The Fuchs, Fuchs, arrived at Simon's Bay September 3, from Bordeaux, and sailed 6th for China—not the Focke, Focke, as before reported.

Amsterdam, Oct. 22.—The Argo, Gesterkamp, from Shields, (not Cardiff, as before reported), to Batavia, which put into Simon's Bay, September 19, was leaky, and had thrown part of her cargo overboard, having encountered heavy gales from September 5 to 11, in lat. 37 and 38 S., lon. 25 E.

THE DETENTION OF THE MAILS THROUGH EGYPT.

A correspondent thus describes the condition of transit from Alexandria to Cairo. The present mails would have been received on the 27th but for this delay:—

"From Alexandria to Caffre Zayat the rail was still available. At Caffre Zayat the Pasha's yacht had been given up for the accommodation of first-class passengers, and having succeeded in scrambling to that through a crowd of yelling Arabs, in a sun almost powerful enough to broil a steak, we found men stirring up potatoes and meat with their fingers—with their feet, too, probably, behind our backs. The confusion was, of course, immense, and things were not made better by our running aground every mile or so, and by the fact that every one of the crew seemed to be skipper. We passed villages where the water had flowed up to the very doors of the huts, and although the Pasha had sent steamers to carry the inhabitants off, they preferred staying by their household gods, and cowered abjectly on the ground, gazing with listless melancholy on the advancing current. Tall date trees just showed their heads above the stream—dead cows and sheep floated past by the score, and now and then a tawny object drifted by which looked unpleasantly like a human form. Darkness came on, and it was feared that we should anchor for the night, huddled together upon the deck, with dew descending like a shower of rain. This fate was reserved for the second-class passengers behind in another steamer—we were fortunate enough to get within reach of Cairo, after a dreary passage of twelve hours."

The "Silver Eagle," from Shanghai, Stopped by an American Privateer.—The following is the report of Captain W. H. Longman, commanding the ship *Silver Eagle*, from Shanghai to Woolwich:—"On the evening of the 9th of September, in lat. 26.30 S., long. 6.48 W., when under all sail, with a light breeze from S.W., we descried a sail on our weather bow steering the same as ourselves, which we soon perceived to be a barque, apparently a trading vessel. About 7 P.M. observed her dropping down towards us, and on her getting close alongside we hailed her, when the reply was, 'the *Star of the East*, bound into Simon's Bay,' saying they were in want of beef and water. A gun was immediately fired from her, with another hail, 'Heave to, and I will send a boat on board.' We then hove the ship to, but in the act of doing so a second gun was fired from her. We then thought the affair looked rather suspicious, hearing there was a likelihood of war between England and America. The commanding officer of the troops on board was then requested to have a guard under arms in case of anything occurring, which request was immediately acceded to, and all preparations made for an attack. In about half an hour afterwards a four-oared boat came alongside with an officer, all armed. The officer then ascended the gangway, and on his arriving on board we observed he had his sword on and a brace of revolvers in his belt; the men were armed with cutlasses. The following conversation then took place between the officer and Captain Longman:—Officer: 'Are you an American?' Captain Longman: 'No, I am Captain Longman; and what do you want?' Officer: 'I want to see your papers.' Captain Longman: 'Those you shall not see; but we are a British ship from Shanghai to Woolwich, with about 200 soldiers (artillerymen) on board, and if you are in want of anything there is a guard of gunners there (who were all armed with swords and loaded rifles).' The officer then observed them, and was making his way to the gangway, when Captain Longman asked him what right he had to stop a ship on the high seas under false pretences, when he replied, 'Recollect, we are at war,' and then left the side for his vessel. We then filled and proceeded on our voyage. The *Silver Eagle* has on board five officers and 152 men, one woman, and child, of the 13th battalion of Royal Artillery, and one man of the 14th battalion; she has also on board two lieutenants of the Royal Navy, one lieutenant of the 29th Regiment, and 30 men, three women, and two children of the 67th Regiment, invalids and time-expired men, in charge of Lieutenant Tibberts, Her Majesty's 31st Regiment, besides five private cabin passengers."

Testimony from China for Miss Nightingale.—We extract the following appeal from a letter sent from Shanghai:—"I am sorry to say cholera has made its appearance again, and I am afraid we shall have such another summer as the last. We are losing men fast; not a day passing without one or two dying from it. I was in charge of funeral parties three nights running last week, and fearfully sudden are the attacks. The sister-in-law of one of our officers (who came out with his wife, and who are living in the same joss house and next room to myself) was attacked a week ago and partially recovered, but I am sorry to say is now dying. I can hear her groaning where I am now sitting. It seems so sad. Certainly this is not a place for ladies. Sunstroke has knocked over a good lot, too. They will not take us out of this filthy place. You really can have no idea of what Chinese dirt is, and they are commencing to leave their coffins about again in hundreds. The other night when going round the garrison guards, the stench was overpowering, and very nearly made me ill, and we cannot go a hundred yards without coming upon a lot of them. No wonder there is cholera about, and no wonder so few men recover when once they get it. Small-pox is also very prevalent here. I do wish we could get out of this place to Hong-Kong, or anywhere, for there is no doubt of this being the worst station in China. There must be something decidedly wrong that we should be kept in this foul place for no earthly reason. Three of the regiment died to-day of cholera; also that poor girl Miss H. But her troubles are over now. Whose turn will it be next, I wonder, for one cannot tell what an hour may bring forth?" The soldier dies in the East—not at the cannon's mouth, but at the mouth of a sewer.

The Prince of Satsuma.—The name of this nobleman is Matsdaira Satsuma no Kami; he is lord over the provinces of Satsuma and Fouigo, in which he possesses the fortresses or strongholds of Kagosima and Sadowava. It was the first-named of these which repulsed the attack of the English. He possesses also the Loochoo Islands. The Prince's revenue is given in the Japanese Red Book at two millions four hundred and thirty thousand dollars per annum. He has always been a bitter enemy of the foreigners, of whom his retainers have assassinated several. Nor is he a very quiet subject of the Tycoon. Sir Rutherford Alcock saw a Japanese of "considerable official rank," who was remarkable as the only one of seven *ometskys*, or official spies, sent successively from Yedo into the Prince of Satsuma's territories, who came out alive. There is a story told of him which shows curiously the absolute power he wields in his dominions. According to Japanese etiquette, if the subject or vassal of one prince insults one of another, the latter is held to be dishonoured if he does not avenge it. The present Prince of Satsuma, finding himself inconvenienced by the quarrels of his followers with those of the neighbouring nobles, made a rule that, if one of his people was insulted by the subject of another Daimio, he might avenge himself by taking the life of his adversary, but on the condition that he performed hara-kiru, or ripped open his own bowels, immediately afterwards. At the same time he gave instructions that if any of his people were insulted and failed to retaliate, he should be taken on board one of the ships of the Prince, have his head struck off without trial, and head and body thrown into the sea.

The Chinese at the Rocky River.—The special correspondent of *Armidale Express* says, writing to that journal:—"Although declared worked out some years ago, Sydney Flat has always maintained a number of miners with varied success. At the upper end of the flat a good deal of activity prevails. Besides the European parties who keep steadily at work, there are a number of Chinamen—a much more superior description of that particular specimen of the genus homo than prevails on Australian gold fields. They are principally from Amoy, and, unlike nomadic predatory Chinamen, who are merely the scavengers of a gold field, scarcely ever working two consecutive days in one place, they have settled down into *bona fide* mining, sinking shafts from seventy to ninety feet and working them in a style which deserves credit. It is hard to ascertain the truth respecting their earnings, but they seem satisfied, and have all the outward appearance of prosperity. I am informed that one shaft worked by Chinamen pays from three to five ounces to the load. The whim party (Chinese) have built quite an establishment on their claim and are prosecuting their work with vigour, the abundance of water being greatly in their favour. Higher up the hill some shafts have been recommenced. This hill seems to be a barrier to a successful following of the lead, rising as it does some sixty or seventy feet above the flat, whilst the bed rock remains on the same general level. The increased depth makes ground otherwise rich unprofitable with present appliances. Shafts have been sunk and worked on the top of the hill, and in the face of all drawbacks and with the primitive windlass £2. 10s. per man per week has been averaged."

The U.S. Frigate "Niagara."—This vessel, well known on the China station, has been thoroughly refitted, and is now considered by the Americans one of the most formidable vessels afloat. Her Parrot guns have a range of a little over five miles, and her speed is sixteen knots per hour. Her destructive power is thus tremendous.

Messrs. Cama and Co., of London, have given £1,000 to the University College Hospital, in addition to a sum for the Lifeboat Institution.

Foreign Intelligence.

HOLLAND.

(from our own correspondent.)

Amsterdam, Oct. 26.

One of the most important acts of the present Liberal Cabinet is the Bill for the reform of the East India Colonial finances just presented to the Second Chamber of the States-General for their concurrence and approval. Hitherto the Colonial Budget was drawn up by the Minister, and confirmed by a Royal Decree, and subsequently—after a lapse of two years from the time of the expenditure—it was laid on the table of the Second Chamber, but merely for their information, as it was a matter beyond their control. It is true that the States-General retained in this respect some little power in their hands, as the small fraction of the East India surplus made use of by the mother-country was accounted for in the home budget, and its disposal required the sanction of the Dutch Parliament. In this manner it was just possible to precipitate a Colonial Minister for improvidently squandering the colonial revenue, but only after the lapse of two years; whilst the Chambers have no previous control of the resources of the colonies. All this will now be altered, and it was reserved for the present Prime Minister, Mr. Thorbecke, to have the credit and honour of taking the initiative in abolishing this last remaining vestige of despotic government by the introduction of this sweeping Reform Bill, which cannot fail to be gratefully and joyfully accepted by the nation and the representatives of the people in both Chambers. The Indian finances will in future be placed on the same level, and be subject to the same control as the other departments of the public service, and thus perfectionate the constitutional monarchy under which this country has become so flourishing and prosperous.

Digitized by Google

For a long time past exertions have been making by patriotic Dutchmen to celebrate in a dignified and significant manner in the present year the jubilee or fiftieth anniversary of the independence of this kingdom and its delivery from the French yoke. In every town and almost every village local committees have been formed to collect donations and contributions for a national monument, and considerable sums have already been received. The Government now intend to bring in a Bill and ask the Chambers for a vote of a million of florins to build a "Palace for the States-General" at the Hague, "as a national memorial of the above-mentioned events, and as a befitting and significant sign of the renewal of the bonds of harmony and love happily subsisting between the House of Orange and the people of the Netherlands." The idea is said to have emanated from the King personally, who proposes that the building shall also contain an historical picture-gallery with artistical representations of the principal battles, congresses, and other events of special importance to this country, which may be contemplated by future generations with pride and satisfaction. At all events, His Majesty must take a great personal interest in the realisation of the plan, as the draft of the Bill was forwarded by the Minister of the Interior, Mr. Thorbecke, to the Second Chamber, accompanied by a Royal message, which happens but on very rare occasions, the text of which is published in all the newspapers.

Reports having been generally circulated for some time past that the Prince of Orange is engaged to one of the young Princesses of England, a semi-official journal of the Hague states that as yet nothing is definitively settled on the subject, and adds that it is a much more probable circumstance to find that on the 17th of November—as the day on which the jubilee or national festival is to be celebrated—the announcement will be officially made of the betrothal of the Prince to the Princess Frederica Sophia, eldest daughter of King George V. of Hanover, born on the 9th of January, 1848, and now in her sixteenth year.

The operations of the Second Chamber have been hitherto confined to examining in committees the different bills brought in by Government, on which they will have to make a report previous to the general debates. Among these bills are several for the naturalisation of foreigners. Amongst these are the names of Messrs. A. H. J. Muller, C. W. Schotborg, C. C. Schaftlein, G. A. Diederich, T. Munder, W. Munder, D. C. A. Gruhle, and L. A. Drigny, all described as residing in Netherlands India, and Mr. G. E. Gaspar, living in Batavia.

In my letter of August 22, I mentioned the appointment of Mr. J. P. de Bordes as principal engineer, for the construction of the railroads in Java. I am now enabled to confirm the statement, and to add that he will leave this country in the middle of November, and go out with his family by the overland route. His salary is fixed at 15,000 fl. per annum.

Younker P. F. von Siebold, titular Colonel in the East India Army, and at the disposal of the Colonial Minister for consultation on the affairs of Japan, has resigned his appointment, and is permitted to retire from the service on the 1st of November with a pension and the expression of the King's gratitude for the important services he has rendered the country.

Count Schimmelpenninck, one of the oldest and most respected statesmen of this country, and formerly Minister of State, died on the 20th inst. at Arnhem, in the 70th year of his age. His father was a member of the Government of the former Batavian Republic, and he himself was one of the original projectors, and for many years President, of the Netherlands Trading Company. Under King William I. the deceased filled for many years the post of Minister, Secretary of State, and subsequently represented his Sovereign at the Courts of St. James and St. Petersburg, after which he was a member of the First Chamber of the States-General. In 1848 he was selected by the King to form a Cabinet, in which he filled the double post of Minister for Foreign Affairs and of Finances. Besides being decorated with several foreign orders, he was Knight Grand Cross of the Crown of Oak and Commander of the Netherlands Lion.

A magnificent Royal tiger, a present to the Zoological Society of *Natura Artis Magistra* in this city, has just been landed in splendid condition from the *Stad Leyden*, Capt. Van der Poll, from Tjilatjap.

The following first-class vessels have just been chartered by the Netherlands Trading Company to convey cargoes of produce from Java to this country as subjoined:—

Ship.	Captain.	Destination.
Willem and Karel ..	Capt. Steenveldt ..	Amsterdam.
San Salvador	„ Munnix ..	Do.
Buline Constance Eleonore	„ Van Haften ..	Do.
Billiton	..	Do.
Japan Packet	„ Exter ..	Rotterdam.
Jacob	„ Mulder ..	Do.
St. Jan	„ Lommerse ..	Schiedam.

Mr. A Loudon, hitherto Secretary-General of the Government of Netherlands India, is confirmed in his appointment as member of the Supreme Court of Netherlands India, *vice* Younker J. F. Hora Siccama resigned; and Mr. W. J. Van de Graaff, also member of the same court, is permitted at his own request to retire from the service with the award of a pension, but on condition of his remaining at his post till the appointment of his successor.

It has been decided to reinforce very materially the Dutch naval squadron in the waters of Japan. The *Staats-Courant* announces that H.N.M. steam corvettes *Djambi*, 16 guns; *Vice-Admiral Koopman*, 14 guns; *Citadel of Antwerp*, 14 guns, and *Amsterdam*, 8 paddle-wheel, have already been despatched from Java by the Governor-General. Despatches have been sent out from this country by the last mail to Surinam with orders to the fourth class ten-gun screw corvettes *Stavoren* and *Delfzyl* to proceed immediately to Japan; and the following ships of war are now being fitted out in this country with the greatest possible despatch for the same destination. At the Royal Dockyard at Nieuwe Deep, the steam frigate *Admiral van Wassenaer*, 45 guns, and the screw corvettes *Princess Amelia*, 19 guns, and *Metalen Kruis*, 16 guns; at Helvoetsluys, the fourth class screw-corvettes *Soestdyk*, 10 guns, and the *Coehorn*, 10 guns; and at Vlissingen, the steam frigate *Adolph of Nassau*, 51 guns. Thus these reinforcements comprise an imposing force of twelve vessels with 223 guns. The screw corvette *Zoutman*, 16 guns, will probably be added to the squadron.

COMMERCIAL.

COFFEE.—This market is in a sluggish state, owing to a want of orders, but prices are firm, the principal holders being unwilling to sell under present values.

SUGAR.—Ever since last mail the raw article has been in great demand at successively rising prices, and 13,000 kranjangs of Java have changed hands. The lower qualities are now paid 2fl. above September prices, and the higher descriptions fetch 1 to 1½fl. above the same. A further improvement is expected. Among the sales were 856 kr. of Java, ex *Kortenaar*, No. 15, very soft, at 33fl.; 1,251 kr. do., ex *Aletta Augusta*, No. 15, fine, at 34½fl.; 790 kr. do., ex *Henriette Gerardina Susanna*, No. 15, at secret prices; 1,179 kr., ex *Johann Lange*, No. 14¾, fine Tagal quality, at 34fl.; 492 kr., per *Minister van Hall*, for arrival, No. 14, good to very good, at 33fl.; 658 kr., No. 12½, at 31½fl.; 560 kr., No. 15, at 34¼fl.; and 439 kr., No. 12½, at secret prices—all ex *D. F. Weber, Senior*—and 202 kr., ex *Alblasserdam*, No. 10½, quality very good, at 30¾fl. The refined market was at first inclined to follow the movement for raw sugars, and 700 tons were taken at rather better prices; but since then speculators are irresolute, and during the last week the dealings have not been extensive, though prices remain firm,

RICE.—The only sales of Java were 2,300 bags, ex *Gertruida Maria*, at 8¼fl., and 3,269 bags, ex *Amazone*, at secret prices. Holders of cleaned grain are not disposed to sell at present rates, and anticipate an improvement as the autumn advances.

SPICES.—There is rather more inquiry for mace at sale prices, whilst on the other hand cinnamon is neglected, and might be bought a shade lower. In other articles but very small transactions and no alteration in their values.

HIDES.—East India ox and buffalo firm, and prices looking up in consequence of small stocks and short supplies. At Rotterdam, 1,000 ox, ex *Henriette Gerardina Susanna*, were sold at secret prices.

TOBACCO.—Java finds ready customers. There have been considerable dealings since last mail, both by tender and public auctions, among which may be mentioned 1,000 bales GP, ex *St. Jan*, for the Austrian Government; 3,532 bales Temayang, and 84 bales FF, ex *Sourabaya Packet*, also for the Austrian Government monopoly; 1,411 bales Blitar, BB, S, and SS, fetching respectively on the average 58 4-5ths, 30, 29, and 21¼ cents; 15 bales Japan, at 27½ cents; 110 mille Manila cigars, second Habanos, 1861, at 34½ to 35fl. per 1,000 in bond; 150 mille, do. third Habanos, 27½ to 28fl.; 55 mille, do. do., 1859, at 21¾ to 22¼fl.; and 60 mille Malang cigars at 9¼ to 10¼fl. Notwithstanding the above sales, the present stock of Java tobacco is 12,136 bales. Some sales are announced for next month, among which 3,119 bales Kawi and D, 810 bales BN, 894 bales Gading, 676 bales MPC, and 1,762 bales marked Havana.

INDIGO.—The company's sale of 557 chests of Java went off with great animation, especially for the finer descriptions, which fetched 10 to 30 cents more than at the sale in May, whilst the common and medium sorts went at 10 lower to 10 higher than the same. Since then an improvement of 15 to 20 cents on all descriptions is established, and the market closes firm.

TIN.—Banca continues in a depressed condition. A very few thousand blocks only have been disposed of, and not more than 71 fl. could be obtained.

COCHENILLE.—Java is considerably higher. At the company's sale of 194 bales, the first quality sold at 15 to 25 cents above May sale prices; second quality, 40 to 50 cents above ditto; and zacatille 40 to 50 cents above ditto.

LONDON, THURSDAY, OCT. 29, 1863.

THE BRITISH ATTACK ON KAGOSIMA.

In the attack made by a portion of our fleet on the Japanese batteries at the head of Kagosima Bay, the site of a large and flourishing entrepot of Japanese trade, we have administered a timely lesson to Japanese Daimios, such as is likely to exercise a beneficial influence on future negotiations; and to reduce that arrogance and assumption on their part which asserts itself not only against treaty rights, but the laws of humanity, and which blinds them to the discovery of any harm in the murder either of a hated foreigner, more especially if his equipage is in the way of one of their retinue on a Japanese high road. Cheaply as human life is valued by this mixed Oriental race, the disablement of batteries, partly protected by huge natural bastions, and which had been constructed with infinite labour and skill, the reduction to ashes of Kagosima, the annihilation of the Prince of Satsuma's castle and arsenal, and the burning of eight large vessels, including three steamers laden with sugar makes an aggregate of material loss which the Japanese cannot fail to feel sensibly. Unsupported by a land force, the fleet was comparatively unprepared for the amount and character of resistance offered, yet what was done was done in summary style, and reflects great credit on Admiral Kuper and his officers. To inflict the greatest possible material harm in a given amount of time, rather than to attempt to subdue the whole resistance, still less to make a landing that would lessen the efficiency of the fleet, and then to get off with as little loss as possible, was the only reasonable course to pursue. The unhousing of a vast population, the suspension of trade at a port exclusively Japanese, the stoppage of factories that for generations had engaged the almost ceaseless industry of tens of thousands of native artisans, is a scene that has not been witnessed in the empire since the two memorable and disastrous Tartar invasions.

In Japanese estimation we have taken a terrible revenge but, after all, have obtained neither the required indemnity nor the delivery of the murderers. Indeed, our chief satisfaction is, that the fleet sustained no greater injury, and that the plot miscarried by which Admiral Kuper and Colonel Neale, with their suites, were to be invited ashore, and then held treacherously as hostages, liable to be beheaded should a gun be fired. Should the news received from Nagasaki—that the Prince of Chosew had taken possession of the forts on the south side of the Straits of Simonoseki, thereby holding the key to the inland sea—prove true, it is evident that our fleet would have been better employed in anticipating this wily move, and so have taken the best of all securities for respect to treaty rights hereafter. In a former article we demonstrated the importance of our taking possession of the entrance to the inland sea; we stated that the power possessing it would control the foreign policy of Japan. The command of these Straits would do us more service than the destruction of a thousand Japanese marts of trade, or of any number of water batteries.

The able letter of our Yokohama correspondent makes representations which we trust will secure the attention of the Home authorities.

From the following telegram, received previous to this mail, via San Francisco, it would appear that the Japanese are fain to represent the departure of the fleet as decisive evidence of victory on their part. How far this is correct our readers can now judge.

"San Francisco, Sept. 28.

"As the British fleet entered the inner harbour of Kagosima, an armed Japanese decoy-boat drew towards the shore, was pursued, attacked, and speedily sunk. Masked batteries then opened on the fleet from the shore, riddling the advance vessels before they could get out of range. The Japanese claim to have disabled the greater portion of the fleet, and stated that the rest retired from the contest."

THE STRAITS TRANSFER QUESTION.

Referring to our last notice of this subject, we have now to announce that in order to avoid further loss of time in correspondence, the home Government have directed that a commission be constituted to decide on the spot, the items on which there are doubts and fears. The commission will comprise the Governor and other officers in the Straits, and Sir Hercules Robinson, the Governor of Hong Kong, who proceeds by this mail to resume his post. Sir Hercules will remain a sufficient time at Singapore to complete the enquiry and make a report to the home Government. We understand, on first-rate authority, that the principal point on which the Colonial Office is anxious is the one of revenue *versus* expenditure. If the local authorities can only prove to Sir Hercules that the revenue of the Settlements is equal to its expenditure, the transfer will be completed, but not otherwise. We heartily trust that Sir Hercules may be able to give the finishing stroke to this long-troubled heading of "The Straits Transfer." We may add, by the way, that it will somewhat increase his prestige in doing so. He must know how much easier a Governor can develop the resources of a place under the Colonial Office than under the double heads of Indian Secretary at home and the Viceroy in Calcutta.

STEAMERS, &c., FOR CHINA.

The *Sea King*, Captain Pinel, which we have already noticed as building for the direct China trade, has had her trial trip on the Clyde, and is now in London, in the hands of Messrs. Robertson and Co., the ship brokers, who are, with Captain Pinel and others, the owners of the vessel. She is now under engagement to convey troops to New Zealand, and from thence she will proceed to Shanghai to the same address as the *Bahama*, lately despatched by Messrs. Robertson and Co. The *Sea King* is built with an iron frame and wood planked, is of 1,200 tons register, and 150 H.P., and on her trial trip she accomplished over twelve knots with the tide and nearly ten against. She was built by Messrs. A. Stephen and Sons.

The screw steamer *Annette* is announced to proceed to Shanghai on the 12th November.

The *Far East*, double screw, lately noticed as building under the superintendence of Captain Jones, for the direct trade, will be launched on the 29th inst. by the builders, Messrs. Dudgeon Bros., on Thames. It is expected that she will load direct for Shanghai, and be despatched about the end of December.

Messrs. Denny and Co., Dumbarton, will shortly launch the steamer building for the Yang-tsze, on account of Messrs. Gibb, Livingston, and Co.

The *Wokee*, Capt. Oakney, has been despatched by Messrs. George Duncan and Co. for Shanghai. Particulars of this vesse were noticed in a previous issue.

On the 14th inst., Messrs. A. Stephen and Sons launched from their east shipbuilding yard, at Kelvinhaugh, on the Clyde a fine new iron sailing ship of 650 tons, named the *Bothwell Castle*, the property of the "Glasgow and Asiatic Shipping Company." The *Bothwell Castle* is loading for Singapore and Penang, and is the third vessel of this line. The *Edinburg Castle* and *Roslin Castle* have both been despatched to the addresses of Messrs. Sandilands, Buttery and Co., Penang, and the Borneo Company, Singapore. The *Bothwell Castle* will be despatched to the same addresses on the 11th proximo.

The *Caractacus* was launched from the yard of Messrs. R. J. Evans and Co., on the west side of the Brunswick Dock, Liverpool. She has been built for Messrs. E. C. Friend and Co., and is intended for the China trade. She is 700 tons register, and her dimensions are as follows:—Length, 176 ft.; breadth, 30 ft.; depth, 20 ft.; classed A 1 at Lloyd's for 13 years, and is to be fitted with the most recent improvements.

The clipper *Fy-chow*, built by Messrs. Hall and Co., Aberdeen, for Messrs. Gellatly, Hankey, and Sewell (successors to Dunbar), is announced to load for Shanghai.

P. AND O. CO.'S STEAMERS.

In addition to the vessels lately noticed as launched for the P. and O. Company, another paddle-wheel is building at the yard of the Thames Iron Building Company to be named the *Nianzi*. Her tonnage is 1,988, and her engines 450 H.P. She is expected to be ready about April, and will be placed on the Marseilles and Alexandria line. The *Syria* (paddle), also for this

Digitized by Google

line, will be ready in all December. The screw steamers *Delhi*, *Golconda*, and *Baroda*, each of about 2,000 tons, and 400 H.P., and intended for the Indian stations, will be ready for despatch in all this year.

FRENCH REINFORCEMENTS FOR COCHIN CHINA.

The *Ardéche* embarked a battalion of marines and a staff of officers, for Cochin and China, by way of Suez, on the 10th inst. Another battalion of the same arm is under orders to follow; of these, three companies are to leave Toulon and proceed overland at the end of the month, the rest will go by the Cape in the steamer *Sarthe*, a fine armed transport, commanded by Captain Galley, and constructed, specially for the Chinese seas, at Cherbourg. Two commercial vessels chartered by the Government, are under orders to carry out arms, ammunition and provisions. "We are assured," says the *Messager du Midi*, "that these reinforcements are intended to put our corps of occupation in Cochin China in a condition to meet all demands in the Far East, and Saigon will become the base of operations from which will proceed all troops destined to protect the interests of France whether in China or Japan."

While all these speculations and preparations are going on in France, the Annamite Ambassadors await in Paris the summons to lay at the feet of Louis Napoleon the proofs of the friendship and admiration of Tu-Duc.

We understand the case of Mr. Moss will be again brought to the notice of Parliament, and that considerable support to his claims has been promised.

THE NAVAL ENGAGEMENT IN JAPAN.

(THE TIMES.)

Four powerful nations were engaged by the last accounts in chastising one or other of the Japanese Daimios. The Government continued to hold friendly language towards Europeans, and had even gone so far as to authorise foreign ships of war to seize all vessels that did not show the Tycoon's flag; but the great chieftains, who have always been our enemies, were, perhaps for this reason, more hostile and insolent than ever. The Prince of Nagota had actually fired successively upon an American steamer, a Dutch corvette, and a French gunboat. In each case the insult was promptly avenged, and an English ship which passed the same Straits soon afterwards, seems to have been treated with more civility. In the meantime, however, we had an account of our own to settle with another of these rebellious feudatories. The last, or nearly the last, of the murderous outrages upon foreigners in Japan was perpetrated in the presence, and by the retainers of, Prince Satsuma. The details of this case will not have escaped the memory of our readers, and it will be recollected that the Tycoon's Government, admitting its flagrant atrocity, was willing to grant any redress for it short of bringing the guilty parties to justice. If this was to be done at all, it was necessary for us to take the law into our own hands, and there is reason to believe that the authorities at Yedo were not ill-pleased to delegate this part of their duty to us. To secure the person of the Prince himself was of course impossible, but the English fleet was sent to Kagosima to enforce the demands of reparation to be made upon him. What the exact nature of these demands was we do not yet know, but, whatever they were, they were rejected. The Prince of Satsuma, like the Prince of Nagota, was not afraid to try the strength of his batteries against the navies of the West, and seems to have been the first to open fire. His guns are said to have been well served, but the contest was too unequal, and the result was the utter destruction of the town which had the misfortune to belong to this unscrupulous noble. Three forts were silenced by our fleet, three steamers demolished, and the city, with its palace, factories, and arsenal, reduced to a mass of ruins. This was a severe lesson for the marauding aristocracy of Japan, but it was not administered without serious loss on our own side. A list of 11 killed and 39 wounded is a long one, considering that our antagonist was not the Tycoon himself, but only one of his lawless subjects. Nor is this the whole cost of our petty victory, for among the 11 killed are the names of two Captains, Gosling and Wilmot—a sacrifice of superior officers which would have been considerable even for such actions as that of the Nile.

The first question that will occur to the public mind on the receipt of this news is whether the expedition which was attended with these sad casualties was really necessary. To answer this question completely would require a detailed review of our relations with Japan, if it did not lead us into the perilous region of English policy in China. Without being prepared to reopen this controversy, we may still do justice to the motives of those who represent England in Japan. It is to be remembered that, being there, as a matter of fact, we must do something; that is, we must either abandon our position or maintain it by some means. There are probably few who would advocate the former course, but, if there be any, they are bound to show on what grounds and for whose sake we should break off all communication with these islands. We did not establish ourselves there by force, but with the full consent of the only responsible or visible Government, and, as far as we can ascertain, with the goodwill of the people, properly so called. When the "selfish interests" of our merchants are described as conflicting with the dictates of our national conscience and the rights of the Japanese, it seems to be assumed that commerce can flourish without the voluntary co-operation of buyers and sellers. If the trade returns from Japan are promising and show a progressive increase both of exports and imports, this proves neither more nor less than that many of the Japanese are glad to exchange their products for ours. The Tycoon's Ministers profess to desire the same thing, and though it is often asserted that the Mikado is a greater potentate than the Tycoon, and vehemently opposed to the opening of the ports, we have no evidence either of the one fact or the other. What we know is that a compact body of enormously wealthy proprietors, surrounded by armed vassals, have conspired to expel us, and shrink from no crime or treachery in the execution of this design. A worse reason for abandoning our Legation and leaving our factories defenceless cannot be imagined, and Sir R. Alcock, while he earnestly deprecated anything like aggression or occupation of territory, very properly declined to waste words on the discussion of this alternative. If, then, we are to remain, how are we to secure the lives and properties of our countrymen against the attacks of the ruffians in the pay of these robber-barons? The Government confesses itself too weak to protect us, but it leaves us free to protect ourselves. It may be doubtful whether this can be done by bombarding the castles of the guilty Daimios, and whether their infatuated hatred of us can be held in check by any fear of retribution whatsoever. Montesquieu, who is always talking of the laws and customs of Japan, argues that "men who have a natural contempt for death, and who rip open their bellies for the least fancy," are not to be deterred from crime by the severest punishments. Still, the experiment is worth trying, and if it should help to break down the power of this tyrannical class, so much the better. There is not the least danger that we can see of our being drawn into a meddlesome interference with Japanese politics. Where we have committed this mistake in our dealings with Asia, it has generally been out of jealousy of other Powers. No such jealousy can lead us astray in Japan. We know that we must share any commercial privileges with France, Holland, and the United States, and that Russia, having a seacoast so near at hand, will naturally get somewhat more than her due. Nor can it be said that we are making ourselves the allies of the liberal party against the party of exclusion. If the latter are strong enough to organise a revolution and close all the ports again, it will be time to consider what we should do; meanwhile, we must stand upon our treaty rights and defend ourselves, even though it should incidentally strengthen the hands of the Central Government.

In spite of our resentment against these overbearing Daimios, we cannot help admiring the military qualities and mechanical genius of the Japanese, as exhibited in the late engagements with European ships. The American vessel *Wyoming* lost sixteen men in her encounter with the forts and war steamer of Prince Nagota, and had to sheer off at last. The Dutchmen, being prepared, fared better, but one French ship was disabled and another a good deal injured. We have yet to hear what damage Prince Satsuma's artillery inflicted upon our fleet, but, judging from the casualties among the men, it can hardly have been trifling. The Chinese would have run away long before their town was in flames, and had not until very lately, if they now have, any ordnance equal to that manufactured in Japan. This is exactly what we had been led to expect. Sir R. Alcock, who has no undue partiality for the country in which he lived so long in fear of assassination, declares that Japanese artificers are capable of competing with Sheffield and Birmingham on equal terms. They have not yet produced an Armstrong or a Whitworth, but if they once get hold of a rifled gun they will certainly know how to imitate it, and perhaps to improve upon it. While this aptitude for the production of destructive engines cannot afford us much pleasure just at present, it may well inspire us with respect for the intelligence and confidence in the future destiny of this extraordinary nation. The better the Japanese fight, even in the service of men like Prince Nagota and Prince Satsuma, the more reluctant should we feel to give up the prospect of peaceful and friendly intercourse with them.

(MORNING POST.)

The negotiations for an amicable settlement of our differences with the Government of Japan having, as we anticipated, ended in failure, steps have been taken to enforce the reparation which was refused. We learn from a telegram received yesterday (Oct. 20) at the Foreign-office, and which we publish elsewhere, that the seaport town of Kayosima has been bombarded by our fleet, three of the batteries defending it silenced, and the town reduced to ruins. Three Japanese steamers are also reported to have been destroyed. The success, however, appears to have been dearly purchased on our part, two naval captains having been returned amongst the killed; and, as the batteries are said to have been well served, the damage sustained by the fleet was doubtless not inconsiderable. With the particulars of the engagement we are not yet made acquainted; but as on the second day of the attack the fleet is stated to have "stood out, engaging the whole of the batteries," we may conclude that so far as their destruction was concerned the victory was not complete.

It is certainly not pleasant to reflect that we are engaged in another of those petty wars which are from time to time forced upon us in the most distant regions of the globe. They are always unsatisfactory, and nearly always profitless. But they are not the less inevitable. In the present instance we are making war less against the Japanese Sovereign than against one of his Princes, and there is every reason to believe that the Tycoon would gladly have obtained for us the redress which we demanded had it been in his power. It is undoubtedly a great hardship that we should be obliged, so to say, to regulate the internal affairs of an Eastern empire with which we are unconnected, and in order to vindicate the rights of those British subjects who have settled in Japan, to mete out to offending Daimios that punishment which the native Government is too feeble to inflict. It is really with the Prince Satsuma that we are now at war; and the town which has been destroyed is one in which he exercised undisputed sway. It was in his territory, and at his instigation, that the murder of Mr. Richardson took place some months since, and it was from him, through the Imperial Government, that reparation was demanded. For many weeks the English Envoy was led to believe that redress would be given; but the time which was by us lost in negotiation was turned to account by the Japanese. Prince Satsuma knew that it was on his territory that the threatened blow would fall, and made his preparations accordingly. The batteries, which are said to have been so well served, and which were still able to respond to the fire of the fleet when the latter withdrew, were most probably constructed, or, at least, placed in their late effective state, whilst diplomatic messages were being interchanged between our repre-

Digitized by Google

sentative and the Government of the Tycoon. It would be incorrect, however, to suppose that the powerful Daimio, whose town we have destroyed, stood alone. The traditional policy of excluding strangers from Japan is still respected by a numerous portion of the native Princes, and Prince Satsuma is merely the representative of a class which we must either subdue or appease before we can hope to prosecute peaceably our commercial relations with Japan.

The first thought which will occur to the minds of our readers will doubtless be, where will all this end? In a naval war with the Japanese, or with such of the Daimios as thought proper to espouse the cause of Prince Satsuma, we should be able to inflict endless damage on shipping and seaport towns. But there our exploits would end. No place within reach of an Armstrong shell discharged from the deck of a man-of-war would be safe, but beyond cannon range of the coast line the Japanese and their towns would remain secure from molestation. The general principle that a central Government is responsible for the acts of every individual living within its territory, and nominally submissive to its authority, might possibly be enforced, and the town of Yedo consigned to the fate of Kagosima if full redress were not given by the Tycoon. But it is doubtful whether even the threats of destroying their capital would influence the Daimios, and certainly even if carried into effect would not conduce to the establishment of peaceful relations at a future time. But except with our fleet, it is not easy to discover how we can inflict punishment on the Japanese. If it should be deemed expedient to carry war into the interior of the Japanese islands, an expedition would be required of whose magnitude it is not easy to form an adequate notion. From the skill which the retainers of Prince Satsuma evinced in serving batteries, it is not improbable that the same skill would be manifested in conducting operations against land forces. It is incontestable that the Daimios can, by co-operation, bring into the field most numerous and well-appointed armies, and to subdue those armies it would be necessary for us to prosecute the war on a very extensive scale. *Cui bono?* the public will naturally inquire. The reply is, the necessity of protecting British interests in Japan. The Japanese for several centuries totally excluded foreigners from their empire, and refused to trade with the rest of the world. But some years since this rule was broken through in favour of the Americans, and subsequently in our own. Then followed the treaty which was concluded by Lord Elgin, and which, as was supposed at the time, established our commercial connection with Japan on a satisfactory basis. But that treaty, though entered into by the Tycoon, and approved of by many of the influential Daimios, excited the bitter resentment of the remainder. Then succeeded the long series of outrages on English residents in Japan which culminated in the attack on the British Embassy. No alternative was left to us but to demand reparation or discontinue protecting our interests in Japan, and therefore neces-itate the withdrawal of every British merchant. As the latter course obviously could not be adopted, the alternative was only nominal, and we were obliged to have recourse to force to secure compliance with our demands. The punishment inflicted upon Prince Satsuma has been so signal and severe that when he and his brother Daimios see how little is to be gained and how much is to be lost by provoking our enmity, they will doubtless acknowledge the expediency of permitting English merchants to pursue their avocations in the city of Japan unmolested by their savage retainers. If they will not now admit themselves convinced, we must only continue in our present course until we have carried conviction to their minds.

(MORNING HERALD.)

It may be very difficult for a great commercial nation, governing a wide range of colonies, to keep its hands free from all interference in foreign quarrels, or to stand aloof from apparently profitable political relations. The very forbearance we have shown in the American war, our extreme caution in the contention of the Poles with Russia, and, indeed, the whole tenor of that neutral policy which, though weakly maintained by Whig statesmen, has become a tradition of our Government, is sufficient proof that such a quiet and careful course is possible. We do not say that Lord Elgin had not good reasons for entering into negotiations with the Japanese authorities, and originating a treaty seemingly much to our advantage. But it must now be admitted that a conclusion was come to without sufficient inquiry or any certain knowledge of the internal organisation and political institutions of the people we were to deal with. Beyond all doubt too much was made of that compact at first. It was heralded in England by a leading contemporary, and other journals, as about to open a source of unbounded wealth, and of indefinite commercial relations between Englishmen and a wealthy, an enterprising, and ingenious people, heretofore strangers to us. We remember at the time that we conselled a little moderation in the sudden fit of enthusiasm. We had grave suspicions that neither the treaty with China nor that with Japan would turn out satisfactorily, or be of essential benefit to our manufacturing interests and commerce. Subsequent events have amply justified our caution. The only notable profit derived up to the present from our relations with Japan has accrued to a body of speculators whom the British mercantile world is not willing to acknowledge. The scandalous transactions in Jedo, carried on by certain Jews and others, in order to induce the natives to part with their gold, which happened to be at a cheap market price in the islands, are too well known, and have been too widely condemned to need recapitulation. These dealings at the outset disgusted the Japanese with foreigners, and subsequent events did not much help to engender friendly feelings. Then it was that Lord Elgin and others began to perceive the nugatory character of all our negotiations.

The Tycoon, indeed, was in our favour, or appeared to be so. But his authority does not in reality go for much among the mass of the people. The thirty millions who compose the population of the Japanese islands own a higher sway. The Mikado, or Spiritual Emperor, has most influence and authority over them. The Daimios, or great nobles, are almost to a man of his party. The temporal commander, indeed, has also his special following. The Saimios—a description of knights or inferior nobility—he may count as among his retainers. The more enterprising and forward of the middle classes, and perhaps the entire body of merchants, and of those whose interest or business depends on their intercourse with foreign nations, may belong to his party. But it is only too evident now that the whole exclusive feeling, the utter contempt and dislike of foreigners, is a deep and settled passion in the nation, and cannot be changed or mitigated by the force of any treaties, however advantageous these may be even to the natives themselves. This was not sufficiently considered by Lord Elgin and the Government that acted with him. The mass of the people capable of understanding the treaty regard it with detestation. The Daimios from time to time have not been slow to manifest their hatred of the European connection. To their hostility we owe the attack on the British Embassy, in which Mr. Oliphant nearly lost his life. It was a foremost man of their order, Prince Satsuma, who, with his retainers, waylaid and murdered Mr. Richardson. It is true that the $440,000, demanded as a fine by our Government for this act of atrocity, have been paid by the Tycoon, after some powerful persuasives had been used; but we have not learnt that the apology stipulated for has been tendered, or the destruction of the legation buildings at the Goten-yama, near Yedo, atoned for, or that the murderers of Mr. Richardson have yet been executed. The Mikado and his nobles, it is but too clear, are deeply incensed against all foreigners, and he has given positive orders for their expulsion from his territory. Even the Consul-General of Holland has been ordered to quit the empire, taking his Dutch fellow-subjects with him. As we are all aware, more violent demonstrations than these ordinances of the Government were made against the European authorities.

Dutch, American, French, and English ships had been fired into at the date of our former intelligence in the narrow Strait of Simonosaki, which separates Niphon from the southern Island of Kewsew. These unprovoked assaults very naturally led to formidable and effectual reprisals. But we have now a brief telegraphic communication bringing intelligence from Shanghai down to the 4th ult. This informs us that Admiral Kuper has besieged and destroyed the important city of Kagosima, which lies to the south-west of the Island of Kewsew. This is in the territory of Prince Satsuma. The admiral, it appears, first tried negotiation and remonstrance. But, as might have been expected, these proved a failure. He had then only one course to pursue. The information communicated by the telegram is but meagre, but the mention of a siege and the levelling of the town imply a hotly-contested victory. This, however, we must regard as complete, for the fleet had sailed back to its former station at Yokohama. No full list of casualties is given, but it is painful to have to record that two superior naval officers have fallen in this miserable and unworthy contention. It is plain, indeed, that we are committed to a war which will cause a large expenditure of treasure, which has already cost us the blood of brave men, and which will only have too fortunate an issue if the Mikado, the Tycoon, the nobles, superior and inferior, and the natives, shall be brought to yield willingly to the force of treaties or the practice of the amenities and decencies of civilised life. Three of Prince Satsuma's steamers, we are told, were sunk, and no doubt the chastisement inflicted on this haughty and sanguinary Daimio was as ample as the provocation was cruel and treacherous. To aid us in any further contest, there is still probably a fierce internal struggle going on in the heart of the empire. The Mikado and Tycoon are at war. The latter, we were told in a previous communication, had availed himself of European support in ships and in troops. It is possible that he will persevere in his resolution to observe the conventions formally entered into with foreign Governments. But the Spiritual Emperor has a numerous population, the whole religious and patriotic sentiment of the islands, and the powerful aid and authority of the Daimios to back him. So that the contest, as regards the Temporal Sovereign, may be one of long continuance, and not easily decided by a European and American alliance and co-operation.

(DAILY TELEGRAPH.)

Rather more than two months ago, while we were getting in a splendid harvest, and thinking of anything but battle and bloodshed, a naval engagement was proceeding on the other side of the globe, the tidings of which have just reached us. Her Majesty's fleet in the Japanese waters was fighting, "hammer and tongs," with the forts of Prince Satsuma; the quarters of a populous city were blazing; palaces, factories, and arsenals were being levelled with the dust; and, worst of all, the officers and men of our squadron were falling thick and fast in this dispute with a barbarian. It is a curious function to have to criticise such a telescopic war. The losses and gains of it are so long past before we get a chance of balancing them, that, for any purpose which grave consideration can serve, we might as well examine the particulars of Cæsar's campaign in Gaul, or debate the Wars of the Roses. In this respect, the enormous empire which obeys the sceptre of Victoria has come to be like the "Rakshi" of Hindoo mythology. He was so vast and immeasurable, this giant of the ancient times, that when one of his hundred hands was cut off, it took many moons before he heard of it. It takes some, if not many, to communicate to the centre of the British empire the news that its extremities are at war. We have a campaign going on in New Zealand, and another now in Japan—concerning either of which the swiftest steamship and the most energetic telegraph clerk cannot give us breathless particulars by the electric wire under sixty-four days—the fifth of a year! It is impossible to speak of such wars in the tense of present time; they are fought and won, or lost, as the case may be, before we know of them; they are history, and stale history too, before we get tidings of them; and public opinion, which is supposed to exercise a universal and salutary influence everywhere, is half a year old before the belligerents gather what we think of them and their doings. Prince Satsuma, for example, whose paternal residences we have been knocking about his ears, may by this time be our very good friend; so that to rejoice at his discomfiture would seem the worst conceivable taste. Or he may have committed "happy despatch" in a frenzy of "daimionic" patriotism, bequeathing Japan immortal hostility towards the foreign devils. There is nothing to do in the matter, except to treat it as so much simple history: we are circumstanced towards it exactly like the spirits in Dante who had a past and a future, but no present; and if the necessity is novel and embarrassing, it is the price we must pay for fighting antipodean campaigns—wars turned topsy-turvy.

It seems, then, that all negotiations being hopeless as regarded satisfaction for the death of Mr. Lennox Richardson, the English fleet proceeded "last summer" to take justice into their own hands. We, as "posterity," have no fault to find with the determination in such a case to burn Prince Satsuma's city down, and blow up his forts. His father was implicated in the murder of our fellow-subject, and he himself, among the eighteen "Daimios," was foremost in insolently refusing our demands; so that as

Digitized by Google

an accomplice after, if not before the fact, he has been deservedly punished. We could wish, however, that the administration of justice had not cost quite so much. It seems that our fleet took up its station opposite his city of Kagosima on the 15th of August, and was immediately opened upon by two Japanese batteries. The ships returned the fire, and by dusk Kagosima was in flames in several places. Late in the night, "the whole town" is reported on fire, and "three forts silenced;" but, *per contra*, we get a list of eleven Englishmen killed, including two captains, and thirty-nine wounded. The next day's news is our latest; we learn that "the city is in a mass of ruins—palace, factories, arsenal," and that "three steamers of Satsuma are destroyed." But—again a disquieting *but*—"the fleet stood out," it is telegraphed, "engaging the whole of the batteries." Like Cleopatra, "we do not like this *but*," nor do we like the last sentence of the telegram, which is ominously complimentary to the Japanese artillerists. "The shore batteries are reported to have been well served." Reported! If punishing barbarians at long range is to cost us a whole gunboat's crew, the doubt arises whether Sir William Armstrong would call them barbarians. Did the fleet "stand out"—that is, as we construe it, sail out of the bay—leaving the unsilenced batteries in full play upon it? Was no party landed to make a finish of the Japanese nobleman's pride, and to place the flag of England upon the palace of the titled murderer of one of its citizens? We wait with some uneasiness for fuller accounts to enlighten us upon these points; for, as they stand, it looks as if in seeking for a Daimio we had "caught a Tartar" instead. It is true that the city was burnt, and that the telegram reports it "one mass of ruins." But we must translate this high-sounding intelligence into Japanese, and then it only means that a wilderness of mud-cottages, with bamboo mats for sides and doors, paper windows, and tiled roofs, has been bombarded into the dust from which it sprang, and from which it can be raised again before the fleet gets back to port. The sum total of the news as it stands is this, that we have destroyed Prince Satsuma's palace, some of his forts, with three of his little steamers, at a cost of sixty killed and wounded, and what we trust may not turn out a retreat of the British squadron; we must repeat our conviction, therefore, that justice is very dear indeed in Japan.

Nevertheless, this was undoubtedly the right, as it was the only course, for the authorities to take. The assassination of Mr. Richardson could not be left unpunished, and yet it would have been most unfair to involve the Tycoon and the Japanese people in a war which, if they possessed the wish, they had none of the means to prevent. The "Daimios" are all-powerful, and they refused us satisfaction or compensation. It is upon them, a potent faction of the country, but not the country, that we have levied war; and the course thus taken goes far to reconcile us to its outbreak, and was, indeed, that which we counselled at the first tidings of a difficulty. Our only regret is, that the blow appears to have fallen somewhat short, and to have sorely jarred the arms that struck it. If enough, however, has been done—and we should hardly think the *Euryalus* would steam away with her captain's dead body on board, and leave much remaining to do—the effect will be very salutary. The power of these Oriental oligarchs will have been shaken in the defeat and ruin of the proudest of their number, and, as Prince Satsuma has many other possessions quite as accessible at Kagosima, he is likely, if he has survived, to eat humble pie, and to recommend that sour dish to his brother Daimios. The pro-foreign party would in that case gain influence, and our treaty-rights would stand in the way to be respected. Indeed, so fragile, so like their own houses of porcelain and paper, is the constitution of these Eastern societies, that a rude push such as this may bring it all down in shards and tatters, and repeat in Japan the revolution which is progressing in China. But we must not forget that these contingencies have been long ago settled one way or another—we are writing of the past in a future tense—it is all over before we know more than the beginning of it; and, instead of having for his motto, "*What will be, will be*," the Foreign Secretary of an empire which fights at once in Japan, China, and New Zealand ought to bear for his badge, "*What will be, has been.*"

(ARMY AND NAVY GAZETTE.)

The news from Japan up to this moment would have been meagre if it had not conveyed to us the melancholy intelligence of the serious loss of life which attended Admiral Kuper's attack upon the stronghold of the chieftain who had presumed to commit a wanton outrage upon the power of England. Eleven killed and thirty-nine wounded make up a serious list, and the circumstances goes far to prove that the Japanese are enemies not to be lightly held. We shall wait for more detailed accounts before passing a positive opinion on the judgment displayed in taking the ships into action against an enemy of whose force we were apparently ignorant. That our victory was not a complete one may be gathered from the fact that our ships retired while some of the forts were still in a position to continue the engagement. In Captain Josling and Commander Wilmot the service has been deprived of two most promising officers.

THE CIVIL WAR IN CHINA.

(THE TIMES.)

The merit of recognising the Chinese insurgents as belligerents, entitled to equality of consideration, belongs to an American. Until the secession of Colonel Burgevine the Imperialists had a monopoly of this species of support; but the defection of so skilful an officer to the side of the rebels has given an example the importance of which it would be difficult to overrate. It is true that the precedent has been denounced, that the man himself has been proclaimed as a traitor, and that a price has been set on his head by the Imperial authorities. It appears, also, that the American Consul condemns the act, and that he would lend his aid to the transportation of the offender; but all this is unlikely to weigh against the obvious temptations which a competition for such services will produce. At no time, perhaps, in the history of Europe was there a larger mass of soldiership afloat and available than at present. The Polish insurrection and the American civil war have absorbed much of it, but enough remains to impart an entirely new character to the rebellion in China if it should really be attracted in that direction. An infinite population, an immeasurable territory, and a chaos of strife furnish elements which a military adventurer would readily turn to account. The Consuls of all nations in China have protested against proceedings so subversive of recent views and hopes, but there lies the carcass, and it will be hard to prevent the eagles from gathering together. We have no desire to see China pass through the several stages of transition into the condition of a European dependency, even though we should be its sovereigns. We should regret to see it partitioned or divided, or subjected to any other Government than that which seems best adapted to its people. We do not think that any prospect is so promising for the Chinese as that of a restoration of the Imperial authority, and we were in hopes that the aid of Europeans would be contributed to this end alone. It was with these views that we advocated the expedition of Captain Osborn, whose squadron will soon be at the service of the Emperor in the re-establishment of order. No consummation could be so useful or so creditable to us as that. If the civil wars of China, already sufficiently destructive, are to be prolonged and aggravated by the indiscriminate alliances of Europeans, we can see no end to the agonies of the Empire. The rebels are already a match for the Imperialists. The weight of European skill thrown into the scale of the latter would decide the struggle, but if both scales are to be weighed equally the contest will only be rendered more sanguinary and hopeless than before. Looking, however, at the state of the world, it is impossible to say that such a contingency is out of the question. If the Taipings bid high, as no doubt they will, for service of this kind, it is but too likely that they will get what they want, and then we shall see the beginning of an end beyond reach of conjecture. In the meantime India, with its new plantations of tea, and its natural productiveness developed by British capital and enterprise, may supplant China in a trade which for nearly two centuries has been enriching it. The day may come, and perhaps shortly, when at least half of the tea consumed in England will be drawn from the slopes of the Himalayas, while the Flowery Empire is languishing under the ravages of interminable strife. With the natural course of a trade we cannot interfere, but nothing can conduce more certainly to our interests than that a nation numbering its hundreds of millions of industrious people should be restored to the pursuits of peace. In no capacity can the Chinese do us so much good as in the capacity of customers. We want to buy from them and sell to them according to our respective demands, and nothing more. A short time ago it seemed not improbable that an amount of support which would have cost us nothing would have enabled the Chinese Government to put a stop to bloodshed and re-establish tranquillity. That prospect, we are concerned to say, seems now more remote."

(MORNING HERALD.)

Among those whose studies have been directed to the commercial and political interests which connect China with the British Kingdom, there prevails just now no little anxiety as to the nature of our relations with the people and Government of that wonderful empire. It is no long time since that, at some cost and considerable inconvenience, we concluded a peace with the Government; yet, by an inconsistency that has no parallel we know of, a very intimate alliance has left us with a war on our hands waged with about a hundred millions of its subjects. The war, it is true, is but a "little one," and is costing us as few men and as little money as it is bringing us little profit or small glory. A war, however, it is, and though not involved in it ostensibly as a nation, it is by no means clear that it may not shortly assume very different proportions, and bring on us a wholly new class of complications. The people we are lending our help to subdue as rebels are more numerous than the inhabitants of France, Austria, and Prussia united, and there is no certainty that by the time we have made them thoroughly hostile they may not have reached an organisation and power which might convert our little war into a great one, without making it, therefore, a safe one. Our recent news gives rather less than more promise of an early termination of a rebellion which has existed in formidable proportions during fifteen years, and is now in possession of some of the richest cities and fairest provinces of the "Flowery Empire." A power which holds sway over more than a hundred millions of people, as the result of so long a contest, is less a revolt than a second Government, and our speculations as to the future awaiting the vast territory, which numbers among its inhabitants nearly a third of the human race, must necessarily have the uncertainty about them that belongs to a limited knowledge of the genius of their people and the tendencies of their institutions. Hitherto the failings, whatever they have been, of the Taipings, have arisen less from any opposition they have received from the Government they were resisting than from the extreme licence that has marked their moral and social principles, and from the frightful mixture of anarchy and despotism which has characterised their administration.

The thirty millions of Chinese which represent the carnage already effected by this extraordinary civil war, leaving both parties pretty nearly where they were some dozen years ago, stand before us in numbers the gigantic prototype, in character the Liliputian companion-piece, of what is going on in America, and show that while the principle of cohesion is gone which bound a whole people to a Central Government, the reparative power which should enable the central Government to conquer the weakness, is at least as much in defect. The rebellion, like the man with one eye, has been something, because presenting itself under a Government of the blind, and has, what the Government has not, a principle of nationality at its base which makes up for that want of organising power which has otherwise characterised it. Its true danger is best shown by the fact that the disgusting licence and pitiable administrative imbecility which have been depopulating provinces, destroying cities, and disorganising immense masses of population, have not prevented its holding its own so long over a large division of the territory. Despite the aid which the naval and military forces of France and England have been giving the Imperial Government since the signing of the peace in October, 1860, we fail to perceive any corresponding change in the position of the two sides. The introduction, too, into the Imperial service of the element of European free lances, of an English built navy, and of Chinese corps under European officers, has been nearly equally fruitless. The contingent, indeed, organised a year or two ago by an American adventurer, and on which such large expectations were founded, is now offering an element of danger whose consequences it is difficult to estimate. The force originated in some arrangement between the late Colonel Ward, who was occupied establishing a commission agency at Shanghai, and a Chinese

Digitized by Google

merchant named Ta-ke, a Government banker residing in the same city. With the irregularity characterising the general administration of the Imperial Government the pay was not unfrequently in arrear, and when the death of Colonel Ward transferred the command to another American, erroneously supposed to be a Frenchman, a sailor named Burgevine, a large party of the dissatisfied mercenaries, who had demanded. with their leader at their head, the payment of the arrears, made no difficulty, on being refused, in offering their services to the Taipings. The accession of from three to five hundred European soldiers, and of a number of disciplined Chinese, with a skilful and daring commander at their head, introduces an entirely new element into the history of the civil war, and may be expected to more than neutralise the services rendered by the auxiliaries under the command of Major Gordon or Captain Sherard Osborn.

With the prospect of booty offered by the Taiping operations there is some danger that the unprincipled European adventurers who hang about the Chinese coasts in the neighbourhood will hasten to join Burgevine's army. Already there are fears that the influences of that chieftain may detach from the force of Major Gordon, who is operating against the rebels, a considerable part of his followers. Our correspondent "Kathay" announces that the rich and populous city of Soochow, which forms the head-quarters of Burgevine, is to form one of the earliest objects of attack of the Anglo-Chinese army, but expresses his opinion that no force the Imperial Government can bring against the place has a chance against such a defence as Burgevine will be able to make. The Taipings offer better elements for an army than their opponents. They have the greater courage arising out of an adventurous life, and the higher discipline, skill, and confidence taught by the experience and successes of a long series of campaigning. What they have chiefly wanted have been the resources and organisation given by European enlightenment, and the first victory won under the direction of the American leader may give him a controlling influence in the whole Taiping movement. Our position as a nation in reference to the rebellion may thus undergo a change from day to day which will demand from us a reconsideration of the policy we have been pursuing in that empire. It is difficult to quarrel with the prudence which has been protecting the two depots of our commerce, Shanghai and Ningpo, with a range of some thirty miles round them, from the incursions of the rebel hordes; but the assistance of our fleets has at times extended further, and it is impossible to say how far, with the growing power of the Taipings, we may not be soon called upon to repel aggressions which will ask operations altogether out of keeping with this moderate policy. Since Mr. Layard told his constituents in Southwark that the ministerial policy in China was one of non-interference, the proceedings of Admiral Hope and General Staveley have furnished commentaries on the assurance which show how difficult is any such policy while our fleet and regiments are holding possession of the disputed territory, and our fear is, that in the growing complications arising out of so ambiguous a position, we shall have speedily to decide on either meeting the Taipings as national enemies, or leaving to them the territories that our forces have alone prevented them from occupying.

SUPPLY OF ARMS TO CHINA.

(EXAMINER.)

By the China mail, which arrived on the 15th, we find that the Government of India has issued an order prohibiting the sale and export of arms from the settlements in the Straits of Malacca to all countries and all parties, saving the Emperor of China. This is a blundering and eccentric piece of legislation, to which there is, we believe, no parallel in our commercial legislation. The trade in arms, more especially from Singapore, now a great emporium, has been carried on prosperously for close on half a century, and this order puts a stop to it at once, except under licence for the arsenals of his Imperial Majesty of China. The trade had been carried on chiefly with Siam, with Cochin-China, with the islands of Borneo, Sumatra, and Celebes, and but to a small extent with China. All this branch of trade is, in fact, knocked on the head. To show the blundering character of the order, gunpowder, the very article which the Chinese rebels are well known to stand most in need of, for they are well supplied with arms, is left out. The Taipings, no doubt, are a great nuisance, and have no belligerent rights, and it was our duty to our ally, the Emperor, to see that British subjects did not supply them; but it would have been quite sufficient to have prohibited their exportation to the ports of China from which the rebels might have been supplied, or even to all China, without issuing a proclamation of such comprehension as that to which we are alluding, not to say that it is of very doubtful legality and in direct opposition to the policy we are pursuing with belligerents at home. Singapore is a mere place of deposit, the packages not being even opened there. It is the merchants and manufacturers of Birmingham who are chiefly concerned, and we doubt not that their voices will be soon heard at the Foreign-office.—[Our contemporary did not "examine" his files from Singapore, or he would have found that the Governor had confined the restriction to China only.]—Ed.

Naval and Military.

The last two vessels despatched for the China station have been unfortunate, and returned for repairs to Plymouth. The Scylla had been in contact with the Duke of Wellington, from Ceylon to London, and received various damages in bulwarks, rigging, &c. The Pelorous, owing to the heating of one of her boilers, had been on fire, but beyond the damaged boiler, which must be replaced, no harm was done.

The following movements areannounced by the last mail from the Cape. Her Majesty's screw steam frigate Narcissus, Capt. Joseph S. Bickford, had been appointed for a cruise, and Admiral Sir B. Walker was to hoist his flag on board the paddle-wheel steam frigate Valorous, 16, Capt. Charles C. Forsyth. The screw steam gun vessel Penguin, 5, Lieut. John G. G. M'Hardy, sailed from Simon's Bay on the 22nd of August for the Mozambique. The iron screw steam troopship Himalaya, from Portsmouth, with the 25th Regiment, arrived at Capetown on the 28th of August, and sailed on the 5th September for Ceylon. The screw steam corvette Esk, 21, Capt. John Hamilton, from Rio for Australia, arrived on the 4th September and sailed on the 12th.

The court-martial on Colonel Crawley will probably begin in the second week of November; when it will end is beyond our powers of guessing. A number of the officers have received leave from this week till November the 5th and October the 30th. The men have been, by the judicious arrangements of Brigadier Hodge, attached to the 13th for service, and have something to do, instead of wasting their time in canteens, tap-rooms, or idleness. The cause of the delay in proceeding to trial is merely the non-arrival of the last batch of witnesses from India. It is to be hoped the Judge-Advocate will confine the evidence closely to the points raised in the two charges on which Colonel Crawley is to be tried, and that he will not permit extraneous issues to be raised. With such a host of witnesses the trial might be made as long as that of Warren Hastings, if every hare that may be started is to be run to death.

It is stated, and recent disclosures give probability to the report, that many of the workmen in the gun factory at Woolwich have been discharged, and that the manufacture of Armstrong guns has been suspended, if not brought to a close. We cannot but hope that the report may prove correct. By the inventor himself, as well as by all his friends, the Armstrong gun is at least admitted to be far from a perfect weapon, yet it has so occupied the field as practically to block out improvement.

It appears that the rotton gunboats which are now in course of of demolition are to be replaced by a squadron of armour-plated vessels. The new gunboats, we are told, will be constructed on "an entirely new system," from plans prepared by Mr. Reed. They will be propelled by twin screws, and each boat will be capable of carrying two heavy guns.

Coptain Spratt, R.N., so long employed in surveying the Mediterranean has resigned. Captain Spratt was actively employed in surveying the Black Sea during the Crimean war, and was made a C.B. and an officer of the Legion of Honour for his services.

The 1st division of the 55th Regiment, stationed at Portsmouth, embarked there for India on board the Hougomont hired transport. The headquarters, whose embarkation has been delayed by the rejection of the ship Meteor, tendered for their conveyance, will embark at Portsmouth, the headquarters of the 76th Regiment for India on board the Hornet transport at Portsmouth. The remainder of the regiment will embark from the same port on board the Atalanta.

Her Majesty's armour-plated screw steam ram vessel Valiant, of 34 guns and 800-horse power engines, was launched in a most successful manner on the Thames in the presence of many thousands of spectators.

Messrs. Dudgeon have been commissioned by the Admiralty to build a vessel on the twin-screw system, which is to be 50 feet in length, 11 feet in beam, and is to draw 7 feet. This little, but we trust useful, craft is intended for service at the Island of Ascension.

The *United Service Gazette* says:—"We understand that Rear-Admiral George St. V. King, C.B., will command the East India station, the limits of which will be from the Cape of Good Hope to Penang. The West Coast of Africa will be a separate command, and the commodore will probably have a red pendant. A commodore, probably Commodore Montresor, will be stationed at the Cape of Good Hope.

THE LATE CAPTAIN JOSLING AND COMMANDER WILMOT.

The following is an epitome of the services of the above officers of Her Majesty's ship Euryalus, 35 guns, and flag-ship of Vice-Admiral Kuper, C.B., who lost their lives in the attack on Kagosima, Japan.

Captain John James Stephen Josling was only thirty-seven years of age, and entered the navy over twenty-three years ago, nineteen years and nine months of which had been devoted to active sea-sevice. He was acting-lieutenant of the Scout, 14, Commander Loring, in the East Indies, in 1847, and senior of the Thetis, 38, Captain Kuper, C.B., in the Pacific, from July, 1850, to the spring of 1854, when he joined the Eurydice, 26, Captain Ommanney, in the White Sea, and remained in her until promoted to commander, November 2, 1854. As commander he served in the James Watt, 91, at Devonport, from May, 1856, until June, 1857; in the Princess Royal, 91, in the Mediterranean, from Feb., 1858, until Dec., 1859, when he joined the Queen, 86, and again served on the same station until advanced to post rank.

Commander Edward Wilmot was in his 30th year, and entered the navy in 1845. He was mate of the Prince Regent, 90, employed on particular service, from June, 1852, until the spring of 1853, when he was appointed to the Royal Yacht Victoria and Albert, and remained in her until the following September, when his captain, Lord Adolphus Fitzclarence, G.C.H., obtained flag rank. He was advanced to the rank of lieutenant, September 26, 1853, and after a few months' employment in the Excellent, gunnery ship at Portsmouth, joined the Royal Albert, 121, flag ship of Vice-Admiral Lord Lyons, G.C.B., &c., June 24, 1854, and was employed in the Mediterranean until August, 1858. He was lieutenant of the Indus, 78, flag ship of Vice-Admiral Sir Houston Stewart, K.C.B, on the North American and West India station, from November, 1858, until the spring of 1859, and was flag-lieutenant to Rear-Admiral George Rodney Mundy, C.B., in the Hannibal (89), in the Mediterranean, from May, 1859, until advanced to the rank of commander, Dec. 24, 1861. As commander he served in the Agamemnon, 89, on the North American and West India station, from January, 1862, until paid off in October following.

Literature.

Messrs. Nisbet and Co. have published *A Narrative of the Conversion of a Chinese Physician*, to which are added incidents in his subsequent career; a work compiled by the Rev. Henry Moule, from Journals and Letters of the Rev. W. A. Russell,

Digitized by Google

Rev. G. E. Moule, and his family, and records of conversations between the physician and the catechist Bao at Ningpo. It exhibits in a singularly clear light the engrafting of Christianity on the Chinese mind.

No. 4 of the *Chinese and Japanese Repository*, edited by the Rev. J. Summers, of King's College, evinces great ability and learning, and is replete with subjects of interest. The first article is a sketch of various Aboriginal Tribes inhabiting highlands in the Southern and Western Provinces of China Proper; the Origin of the Kwang-si Insurrection; the Religious Practices and Superstitions of the Annamites; a memoir of Marco Polo, the Venetian traveller to Tartary and China; and documents concerning the present state of affairs in Japan in relation to European Powers.

Mr. Murray announces as in the press—*Narrative of Travels and Discoveries in the Kingdoms of Siam, Gambojia, and Leo*, by the late Henri Mouhot.

The Port and Trade of London; Historical, Statistical, Local, and General, by Charles Capper, Esq., Manager of the Victoria (London) Docks, is published by Messrs. Smith, Elder, and Co., and is an invaluable guide to the merchant, besides being essential to the library of every scholar. Its information concerning London trade with the East will prove especially serviceable to residents in India, China, and Japan.

Monetary and Commercial.

A quantity of piping and other material, for the Shanghai gas works, left in the steamer *Bahama*.

At the meeting of the Oriental Bank Corporation, held on the 22nd inst., the accounts stated the net profit for the half-year ending June last at £111,727. An *ad interim* dividend of 35s. per share, or at the rate of seven per cent., was declared for the half-year, free of income-tax. The chairman, Mr. H. G. Gordon, remarked that at this period of the year, which hardly embraced the operations of six months, the directors do not present any general report or audited statement of accounts. They trust, however, that when they meet in April, they will be able to submit to the shareholders such a statement, and to declare such a dividend, as will afford fresh evidence of the continued prosperity of the corporation.

The issue of new shares of the Mercantile Bank was lately noticed. A circular has been forwarded to the shareholders, notifying an issue of 10,000 new shares, at a premium of £10 per share. The following is an extract:—

"Sir,—I beg to inform you that, pursuant to resolutions, of which a copy is enclosed, the court of directors will, on the 30th day of November next, in respect of every two shares of which you may then be the registered holder, allot to you one share in the proposed new capital at a premium of £10 per share, and in respect of any odd share held by you the memorandum mentioned in the resolutions will be issued on application. The premium and first instalment are to be paid to the bank at London on or before the 31st December next, and a furthur instalment of £7. 10s. per share on the 1st July, 1864, and the remainder on the 1st January, 1865."

The Chartered Bank of India, Australia, and China have also announced a new issue of 7,800 shares at £10 prem. The amount realised by this premium will be the first opening of a "reserved fund."

The preliminary arrangements of the Royal Bank of India (an instituted lately started in Bombay) for opening in London are now completed. The London and County Bank are the company's bankers, and offices in the East India Chambers, Leadenhall-street, have been secured. Mr. Macculloch, formerly manager of the Agra and United Service Bank, Bombay, is the London agent.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £160,000; to Bombay, £120,000; and to Madras, £20,000. The *minimum* price declared was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to £3,170,000. Tenders on Calcutta, at 1s. 11¾d., will receive about 30 per cent.; on Bombay, at 2s., about 6 per cent.; on Madras, at 1s. 11¾d., about 93 per cent.; and all above these prices in full.

Three of the best tugs in Liverpool have been purchased, and are under despatch to Calcutta, and one is building at the yard of Messrs. Dudgeon, on Thames.

The New York Custom-house returns for the nine months ended the 30th of September show that the imports of foreign "dry goods" (wool, cotton, silk, and linen manufactures, &c.) entered for consumption amounted in value to £7,300,000, against £7,720,000 in the same period of 1862, and £4,540,000 in 1861. The total of woollen manufactures was £3,180,000, against £3,570,000 in 1862, and £1,450,000 in 1861; of cotton manufactures, £800,000, against £1,105,000 in 1862, and £570,000 in 1861; of silk manufactures, £1,830,000, against £1,700,000 in 1862, and 1,870,000 in 1861; and of linen manufactures, £1,040,000, against £970,000 in 1862, and £300,000 in 1861. Under the head of "miscellaneous dry goods," the totals are £450,000, against £375,000 in 1862, and £350,000 in 1861.

To render more completely available for English traffic with France the extensive system of railway which connects Havre and Honfleur, a company has been established under highly respectable auspices to run a line of iron steamers between Littlehampton, on the Sussex coast, and those two points. Increase of despatch and lessening of expense in the delivery of goods in the west and south-west of France, has become a necessity. Honfleur has communication by the Western Railway of France with Caen, Cherbourg, Brest, Orleans, Bayonne, and other important points. This route also affords a ready and convenient means of transport for goods to Spain and Portugal. Ample provision will be made for conveyance of passengers also. This company is a natural result of that increase of trade which has sprung up under our new commercial treaty with France. The Brighton Railway Company and the Great Western have engaged to make arrangements to meet the requirements of this projected channel line.

The following loans and new undertakings have been issued since our last:—

The British Indian Tea Company (Limited), capital £250,000, in £20 shares, to carry on tea planting on 2,000 acres now in plant, and on 40,000 acres of uncleared land suitable for the purpose, in the districts of Assam, Cachar, Sylhet, and Darjeeling.

The Central Darjeeling Tea Company, capital £75,000, in £10 shares, for the purchase and culture of estates in the Central Darjeeling districts, for the growth of the cinchona plant.

The Bois de Boulogne Hotel and Land Company (Limited), capital £120,000, in £20 shares, to purchase compulsorily, under authority of the French Government, 120 acres of freehold land at St. Cloud, and to construct three boulevards on the same, and a first-class family hotel, Mr. G. T. Braine, well known in China, is one of the promoters of this company.

The Constantinople and Alexandria Hotels Company (Limited), capital £300,000, in £20 shares, for erecting superior hotels, with every accommodation, at Constantinople and Alexandria.

The Staffordshire Joint-Stock Bank (Limited), capital £1,000,000, in £25 shares, to carry on the business of banking, to commence with the purchase, on very favourable terms, of a private bank of high reputation.

The Discount Corporation (Limited), capital £2,000,000, in £100 shares, for opening branches for discount business at the chief ports and towns of Great Britain; the company commencing with the purchase of an established business. Mr. George Lyall and Mr. H. D. Cartwright, lately of China are in the direction.

A new Portuguese Three per Cent. Loan of 1863 for £2,500,000 stock, in bonds of £100 and £500 each, has been issued and favourably received; the applications from the public reached upwards of £11,000,000, while the total amount to be allotted amongst them is only £1,250,000.

Cape of Good Hope Government (Kowie Harbour) Six per Cent. Debentures for £24,000 have been disposed of at the average price of £103; all those above £107. 11s. were accepted in full.

The Ottoman Railway Company have notified an issue of £588,000 debentures, bearing interest at the rate of 6 per cent., and redeemable in forty-two years by annual drawings; these debentures, at the price of issue, yield 8 1-3 per cent. per annum, besides bonus on sinking fund operations.

Cape of Good Hope Six per Cent. Debentures to the extent of £150,000 have been disposed of; the tenders recovered in price from par to 14 per cent.; all above £108. 3s. were accepted in full, while those at £108. 3s. will participate *pro rata*.

The South Blackpool Hotel Company (Limited), capital £50,000, in £5 shares, for building a first class hotel at that noted sea-bathing place, the best on the north-west coast of England.

The Littlehampton, Havre, and Honfleur Steamship Company (Limited), capital £150,000 in £10 shares, for running fast iron steamers between Littlehampton and Honfleur, calling at Havre, and thus bring the two latter ports within about eight hours of London.

The London Permanent Exhibition and International Agency Company (Limited), capital £100,000, in £5 shares, for agency business, allotment of space, and effecting sales for exhibitors at the Paris Exhibition.

The amount of bullion by the P. and O. Company's steamer *Ripon*, which left Southampton on the 20th inst. was:—In gold: to Alexandria, £20,400; to Mauritius, £40,000; to Ceylon, £165. 10s.; to Madras, £2,968. 10s.; to Singapore, £1,165; to Hobson's Bay, £3,000. In silver: to Madras, £1. 6s. 6d.; to Calcutta, £1,900; to Penang, £5,000; to Singapore, £1,995; to Hong Kong, £92,620; to Shanghai, £32,819. Total—in gold, £67,699; in silver, 134,355. 6s. 6d.

ARTICLES OF IMPORT.

TEA.—During the past fortnight there has been a slight improvement in the tone of our market, the absence of public sales, which were postponed until the first week in November, having given confidence to buyers, enabling them to devote more attention to teas privately; the result has been more business done, at prices in most cases slightly in favour of importers. The teas ex *Annette* have been placed on the market. The quality generally has been much approved, although the teas are rather deficient in strength, but they as a whole compare very favourably with previous seasons, and are much above the average of the Kaisow teas in quality. They found at first a slow sale at from 2s. 4d. to 2s. 7d. per lb., with one chop at 2s. 2d. per lb. Further arrivals of these kinds ex *Challenger* fully confirm the favourable opinion as to quality, and sales of these have been made from 2s. 4d. to 2s. 8d. per lb., the latter prices for the chod "Hop Fat." A large portion of the higher priced ones have been taken for export to Russia. Low dusty to good common kinds have only been in moderate demand. Fair flavoury kinds of old Import have not met with much inquiry, but the few sales have been at former prices. Fair to good Ho-Hows and Ning-Chows, also second-class Honams, Wopaks, and Monings of old Import have been more inquired for, and prices are fully ¼d. per lb. dearer. Good and fine Kaisows of old Import show no alteration. There has been a limited demand for old seasons fine Monings and Wopaks at former prices. Medium Kaisow kinds of new season have been difficult of sale; good to fine have been taken largely; at one time prices showed 1d. per lb. reduction, but the last few days they have been in demand at an advance of 1d. to 1½d. per lb. from the lowest points. Finest, being scarce, are fully supported. Tayshans show no change. Fair to good Oolongs have been heavy of sale at the low prices current, but fine are in fair request. Flowery Pekoes and Souchongs show no material change. Common to fair Scented Capers remain dull of sale at former prices; good and fine, both of Canton and Foo-Chow makes, are wanted. In Scented Orange Pekoes there is no alteration to notice; fine, being rather scarce, command full rates. Uncoloured Japans have sold steadily at former prices. Indian Teas have sold readily at public sale, fine qualities showing an advance in price of 1d. to 2d. per lb. In Green Teas, in the absence of fresh arrivals of magnitude, business has been limited, but the demand continues good for all the fair to fine country kinds at fully former prices. Japan kinds have sold rather higher, the quality of some of those ex "Dunmore" shows an improvement on former importations. Canton Young Hysons continue without demand at low rates. Common to fair Gunpowders are difficult of sale, but good to fine at 1s. 4d. per lb. upwards, command a ready sale at full prices. The public sales of the 8th concluded without alteration. The Indian Teas on the 13th comprised 2,579 packages, of which 2,160 packages were sold. The full prices that have been realised under the continuous large supplies brought to sale are still a subject of remark, and are rightly accepted as one of the fruits of a reduction in duty. The trade is, indeed, steadily undergoing a most healthy change, and, in consequence of the certainty of no very severe reduction in price at sales without reserve, merchants and dealers are encouraged to adopt that mode of sale as the most satisfactory and prompt way of disposing of their goods; and even wholesale dealers see that a time has come for the abandonment of the old system of heavy stocks, and begin to sell their remnants at auction instead of retaining them, as hitherto the custom, until slowly disposed of over a space of one and even two years. The new system of sale by auction is one which must also exercise a favourable influence upon the private purchases of the larger houses, and tend to lower market value, or to establish prices on a secure basis. Such changes are but consequences of a larger and more active trade and greater competition, which lessen rates of profit, enforce more attention to purchases, and greater economy in trade charges, such as interest on death stock; indeed, similar changes have always accompanied reductions in duty. The obsolete system of testing the market by advertisements of teas never intended to be sold is now, also, we sincerely trust, at an end. So clearly, indeed, is this system now understood, that sales not printed without reserve are seldom sampled or tasted, while every care is devoted to those clearly stated as to be sold. The no less objectionable plan still adopted by brokers of sending unpriced samples round from dealer to dealer, asking for a bid, will also, we trust, terminate, as it tends only to mystify the trade, and hide the very transactions which rectify market prices. No one will deny that the few months that have elapsed since the reduction in duty have been marked by greater changes in the tea trade than many previous years had brought; not alone has the consumption increased, but the trade has already been thrown more open.

SILK.—We have had an active market for China and Japan Silk during the past fortnight, though the extent of business has no doubt been curtailed by the increasing pretensions of importers. The public sales which took place on the 21st and 22nd inst. passed off with perhaps more spirit than ususal, but buyers seem very reluctant to pay the present high rates. Deliveries, 30th September to 23rd October, inclusive:—China, 2,803 bales; Japan, 1,630 bales; total, 4,433 bales. The quotations are as follows:—Tsatlee, No, 1, 23s. 6d. to 24s. 6d.; Taysaam, No. 1, 20s. 6d. to 21s.; Mibash, No. 1, 24s. 6d. to 24s. 9d.

SUGAR.—Considerable excitement prevails in the market. There is an advance of 2s. 6d. on all brown kinds, and 1s. to 1s. 6d. on the finer sorts. The large speculative demand is chiefly for exportation. The sales have included 186,000 bags clayed Manilla on the spot, commencing at 33s. to 34s., and closing at 35s. 6d. to 36s. for new and old import; likewise 300 tons for arrival at 23s., and 500 tons unclayed at 19s., ex ship; 480 bags white China were taken in at 43s. 6d.

COFFEE.—This market continues quiet, and abundantly supplied: several successive falls leave the prices of Plantation about 2s. per cwt. below the currency of our last, and Native 1s. per cwt. Our quotations are:—499 barrels and bags Plantation Ceylon, have passed off languidly at 72s. to 108s. per cwt.; but 934 bags Native sold steadily, good ordinary to superior 68s. 6d. to 71s.

RICE.—This market has been tolerably active, and a very fair extent of business accomplished in most of the varieties upon fully former terms. Current rates rule 9s. to 14s. 6d. per cwt. Privately, a floating cargo of 1,200 tons. Nakrenzie has been sold for Liverpool at 9s. 9d.

SAGO.—Quiet, and without any business of importance. We quote:—Pearl, large, 18s. to 21s. per cwt.; small, 20s. to 24s.; flour, 15s. to 15s. 6d.

SPICES.—Cinnamon: We quote 1st sort, 1s. 2d. to 2s. 3d. per lb.; 2nd sort, 1s. 1d. to 1s. 9d.; 3rd sort, 11d. to 1s. 5d.; 4th sort and jungle, 9d. to 1s. 1d. Mace and Nutmegs: Three cases at auction retired at 2½d. per lb. Cassia: Sales at 9s. 3d. to 9s. 6d. per lb. Ginger: Calicat and Cochin has risen on the average 5s. per cwt., and 1,091 packages at auction mostly sold at 63s. to 94s. per cwt. for low small to good bold. Pepper: Steady, with fair private trade in both Sumatra and Penang upon fully former terms; black, 3½d. to 4d. per lb.; white, 5d. to 6½d. per lb. Cloves: Zanzibar steady, and 600 bags sold at auction at 3½d. to 3⅝d. per lb. for good, and 3⅜d. for dark. Pimento: A small parcel, 155 bags, low middling and middling quality, at public sale, brought 2½d. per lb.

COTTON.—This market has been wonderfully animated; operations on the spot and for arrival enormous, and prices as much as 2d. to 3d. per lb. higher; within the last day or two we have become quiet. Latest quotations—Tinnevelli, 1s. 10d. to 2s. 2d.; Northern and Western, 1s. 11d. to 2s. 1½d.

HEMP.—Manila: This market is better; large transactions have taken place for arrivals and on the spot, and prices have risen 10s. to 20s. per ton, 2,908 bales at auction; current quotation, £27 to £30. Sunn firm, with very limited supply; quotation, £18 to £33 per ton.

TIN.—This market remains very flat, with most limited transactions, and former prices scarcely maintained. We quote Banca, £119 to £120 per ton; Straits, £116 to £118.

JAPAN WAX.—Nothing of any importance to report; the quotation is 58s. to 70s. per cwt.

MISCELLANEOUS.—Camphor: Further reduction submitted to, and limited business done at £6. 5s. per cwt. for China, and £6. 12s. 6d. for Japan, leaving the market as flat as possible. 50 chests at auction retired. Shells, Mother o'Pearl £8 to £11, Sincapore 125s. to 150s. per cwt. Turmeric quiet, and generally rather cheaper, China selling at 34s. per cwt.; and of 430 bags Java at auction, a very small proportion placed at 20s. per cwt. for good, and 15s. middling bulby. Galls: We quote China and Japan 42s. and 65s. per cwt. Galangal Root dull: of 59 bags at auction, only 10 bags sold at 26s. per cwt. Cocoa Nut Oil: Demand had increased and prices slightly improved, but latterly the market has become quiet; quotations for Cochin £45 to £47. 15s. Senna has risen on the average 1d. per lb., and 146 bales sold at auction at 4d. to 1s. 0½d. for ordinary to good bold Coculus Indicus: Rather dearer, and 50 bags at auction sold at 19s. to 20s. per cwt. for fair quality. Elephants' Teeth; 70 lbs. and upwards, £40 to £42 per cwt.; 40 to 60 lbs. £37 to £39; 20 to 40 lbs. £30 to £34; Scrivelloes, £18 to £33; Ball, £28 to £43. Rattans: Continue to command very long prices, and 5,834 bundles Sincapore sold at auction at 8s. 1d. to 9s. 9d. per 100. Safflower: Very firm and rather dearer, and 276 bales at auction mostly sold at £3. 15s. to £7. 10s. per cwt. for inferior to fine.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

MANCHESTER MARKETS.

The madness with which speculation is forcing up the price of cotton threatens for a time to stop many of our cotton mills again, middling Orleans being quoted 2s. 5½d. per lb., and fair Dhollera Surat 2s. 0½d. per lb. Spinners have put up their prices to correspond, and so have manufacturers; but while the former are able to do business at the advance, the latter find it next to impossible to make sales at paying prices.

The circular of Sam. Mendel quotes Grey Shirtings, 39-inch, weight, 7 lbs.; count, 14 by 12, 17s. 6d. to 18s.; 8 lbs., count, 17 by 17, 22s. 6d.; 9 lbs., count, 17 by 17, 24s. Cotton Yarn, 16 by 24, 2s. 6½d. to 2s. 7½d.

From BATAVIA.—At LONDON: Java. At CHANNEL: Ceres, Sud.

From PENANG.—At LONDON: America, Isabella, Avalanche.

FREIGHTS AND CHARTERS.

In outward freights for vessels on the berth we have no change to report. Coal freights remain steady, no material alteration in rates having taken place. In homeward freights there is a little stirring, especially from the rice ports, for which suitable vessels are easily placed on favourable terms.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 42s. 6d. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. measurement. To Shanghai: 50s. weight, 30s. measurement. To Hong Kong: 40s. weight, 30s. measurement. To Manila and Labuan: 50s. weight or measurement. BANKERS.

The Union Bank of London, Princes-street, E.C.
Messrs. Alex. Bossiere and Co., Honfleur.

BROKERS.—Messrs. Field, Son, and Wood, 9, Warnford-court, E.C.

SOLICITORS.—Messrs. Geo. Faithful, Son, and Coode, 53, Parliament-street, London, and of Brighton; Anthony Carr, Esq., 25, Rood-lane, City.

CONSULTING ENGINEER AND NAVAL ARCHITECT.—John Grantham, Esq., M.C.I.N.A., 31, Nicholas-lane, City.

MARINE AND TRAFFIC MANAGER.—Mr. James C. Shaw.

SECRETARY (PRO TEM.)—Alfred Elborough, Esq.

TEMPORARY OFFICES—31, Nicholas-lane, City.

PROSPECTUS.

1. The object of this Company is to run fast iron steamers between Littlehampton and Honfleur, calling at Havre, so as to bring the latter two ports within about eight hours of London.

2. The direct railway route from London to Littlehampton is now opened for traffic, and the Western Railway of France (which alone embraces a system of 1,000 miles, in full operation)—is also opened to Honfleur, placing that port in direct communication with Caen, Cherbourg, Brest, Orleans, Bordeaux, Nantes, Bayonne, Pau, &c. The Company's steamers will, therefore, supply the only link required to complete this, the shortest and easiest route between London and the west and south-west of France, with the prospective advantages to arise from the communications with Spain and Portugal—now being developed. A saving of about 100 miles in distance will be effected by this route.

3. The Brighton Railway Company have laid down rails to the waterside at Littlehampton, and are erecting buildings, and forming spacious quays, for the use of the steamers. The large floating dock at Honfleur is also admirably adapted for the Company's vessels, and the rails are laid down along the quays, so that both passengers and merchandise can be transferred to and from the steamers and railway, at either port, without inconvenience or loss of time.

4. The directors propose to commence by building two first-class iron steamers, with water-tight bulkheads, and spacious accommodation for first and second-class passengers and merchandise.

5. The Brighton Railway Company, and the Western Railway of France, have agreed to enter into satisfactory traffic arrangements for the conveyance of passengers and merchandise over their respective lines, thus securing liberal through-rates to the public.

6. The rapidly increasing traffic between England and France, arising from the recent commercial treaty, will, it is anticipated, contribute largely to the success of this undertaking.

7. The estimates submitted to the directors by competent persons, and revised by the Company's engineer and manager, afford every prospect of a net profit of 15 per cent.

8. The directors will proceed with the undertaking as soon as sufficient capital is subscribed.

9. Applications for shares may be made to the directors, brokers, and officers of the Company.

LITTLEHAMPTON, HAVRE, and HONFLEUR STEAM-SHIP COMPANY (Limited).

The Directors having received offers of considerable quantities of CARGO, are making arrangements for COMMENCING the TRAFFIC forthwith, under Charter, pending the construction of their own boats.

A. ELBOROUGH, Secretary pro tem.

THE AGRA AND UNITED SERVICE BANK (Limited).

ESTABLISHED IN INDIA, 1833. PAID-UP CAPITAL £1,000,000 (One Million Sterling). SUBSCRIBED CAPITAL, £2,000,000 (Two Millions Sterling), in 20,000 Shares of £100 each. RESERVE FUND, £192,658 17s. 8d.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 30, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper

HOLLOWAY'S PILLS.—Mothers and Daughters.—How many suffer from disease for which, through bashfulness, no relief is sought till their strength of constitution is sapped! The headace, deranged digestion, and dull pains in the back and loins attendant on these maladies, may be safely and permanently cured if the system be regulated by these celebrated pills. All diseases affecting the lower bowels, which are so troublesome and so weakening, may thus be cured without consultation and without vexing explanations. The pills are equally suitable to the young, the middle-aged, and the old—at all ages and in any climate. Full instructions for their use accompany each packet of these medicaments.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

Dr. Curtis on Marriage, Nervous Debility, Spermatorrhœa &c, with Plates. Post free by the Author, 12 stamps; sealed ends, 20.

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour; being a Medical Essay on the treatment of Nervous and Generative Debility, Impotency, and those peculiar disqualifications to marriage which originate in youthful errors and excess: the cure of Infectious Diseases without Mercury, and their Prevention by the Author's Prescription of his Infallible Lotion, the result of Twenty, five Years' successful practice. By Dr. J. L. CURTIS, 15, Albermarle-street, Piccadilly, London.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Curtis on Manhood should be in the hands of young and old. It is an ably-written medical treatise on diseases of error and effects of climate."—Sunday Times, March 23, 1856.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the source of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1858.

N.B.—Agents in India—Thacker, Bombay; Von Lintzy, Loll Bazaar, Calcutta; Athenæum office, Madras; Hinnam, Queen's-road, Hong Kong, China; Observer office, Colombo, Ceylon; Esperance, Bombay; Times office, Malta. Coveney, C. Jones, wife, and two infants.—To Calcutta: Mr. and Mrs. I. Prinsep, infant, and European female servant, Dr. and Mrs. Corbyn, Mrs. and Miss Dowleans, Mr. R. T. Lattey, Dr. I. Picthall, Mrs. Sanders, infant, and native female servant, Mrs. C. W. Gordon, Captain B. W. Ryall, Mrs. Sage and child, Mr. J. and Mrs. Bullen, infant, and European female servant, Mrs. B. W. Morton, Mr. and Mrs. Matthew, Mr. and Mrs. C. W. Hatch, Captain G. M. Dobbin, Dr. J. E. and Mrs. Tuson, Mrs. and Miss Hills, Mr. and Mrs. Alone and two children, Captain J. Hunter, Mr. H. Mosley, Mr. W. Irvine, Mr. B. E. Goolden, Mr. C. Lampneys, two Misses Brunghams, Mr. T. W. Tolbort, Mr. L. P. Evans, Miss Couper, Mr. H. M. Hancock, Mrs. and Miss Berry, Mr. W. Young, Miss Riddell, John Finlay, Mrs. Ashton, Miss Littlejohn, Miss A. Pigott, Captain Drought, Isabella Blakiston, W. Hillier, Mr. J. H. Lloyd, Miss Colquhoun, Mr. G. McNaghten, Mrs. E. Ratt and nephew, J. Robertson, Miss Biddle, Mr. White, Mrs. Dundas' native female servant, Mrs. Tierney's native female servant, Mr. J. G. Hirons, Thos. Smith, John Prince, Capt. Hon. J. Drummond, J. McKay, Dr. H. G. Henderson.—To Madras: Captain Plant, Lieutenant G. Murray, Mr. and Mrs. Robinson, two infants, and European female servant, Misses Pycroft and Boyson, Mr. G. A. Parker, Mrs. Bivar's servant, Mrs. and Miss Falls and Ayah, Mr. C. J. Shubrick's Ayah, W. Pemberton.—To Ceylon: Messrs. Spooner and Pigott, John Rodger, John Drummond, one lieutenant, one sergeant, and four privates Ceylon Rifles, Mr. Peck's Ayah.—To Suez: five second-class passengers.—To Alexandria: Messrs. E. Young, Carpenter, and Warburton, Mr. Cox's man servant, Messrs. M. and A. Lubbock, Mr. Williamson's servant, Thos. Allom, Mr. John Bateman, Mr. Chisholm (and back). From Suez to Singapore: Mr. Stok.—To Calcutta: Messrs. R. P. Harrison and Steinthal, Mr. and Mrs. H. Knowles, Misses Tillotson and Crocker.

From Marseilles, per Euxine, to leave Nov. 12.—To Shanghai: Gilbert Howard.—To Hong Kong: W. Feyronnard, F. Jamber, A. Darde.—To Calcutta: Captain G. J. Reeves, Mr. W. Landall, Mrs. Brett's native female servant, Messrs. E. T. Downes, H. Rait, J. C. Williams, J. Schmidt, J. Woodburn, J. H. Twigg, Jones, Harris, and C. Milner, Mr. and Mrs. W. H. Grimley, Mr. Noverre, Mr. and Mrs. G. R. Boyce, Messrs. Fitzwilliam and A. M. McGregor.—To Madras: Mrs. and Miss Brett, Mr. and Miss Pelly, Messrs. J. C. Hughesdon, W. Donald, and C. S. Crole, Miss L. Clarke, Mr. L. Vans Agnew.—To Alexandria: Rev. T. H. Tooke, Messrs. Mott, Barnaby, Cox, Walls, and W. A. Jones, Mr. A. A. Spiers and man servant, Mrs. Spiers and female servant, Lord Howard and man servant, Lady Meux and female servant.

Per P. and O. steamer Ellora, November 19, from Southampton.—To Shanghai *via* Bombay: Mr. Meyne.—From Marseilles, Nov. 20.—To Hong Kong, *via* Bombay: Mr. and Mrs. W. Davidson.—From Suez.—To Singapore, *via* Bombay: Mr. and Mrs. de Bordes and child, Mr. W. Lang.—To Shanghai, *via* Bombay: Mr. C. A. Brodermann.

Per P. and O. steamer Pera, Nov. 20, from Southampton.—To Hong Kong: Deputy Assistant Commissary Gencral Servantes and Mrs. Servantes, Mr. Forrester, Mr. Harvey.—To Penang: Mr. J. P. Stewart.—From Marseilles, Nov. 28.—To Singapore: Messrs. C. R. Rigg, J. Fraser, J. Guthrie, and J. M. Webster.—To Shanghai: Mr. Nering Bogel.

Per P. and O. steamer, Dec. 4, from Southampton.—To Hong Kong: Mrs. Whitty, Miss Simpson.—To Singapore: Mr. O. A. Vidal, Mr. Kennedy, Mrs. Wilson and two children.—From Marseilles, Dec. 12.—To Shanghai: Mr. Dealtry, Mr. Barber, Mr. A. K. McDonell.—To Hong Kong: Mr. A. Campbell, Mr. J. F. Holliday, Mr. F. Parry.—To Singapore: Miss Blankengen, Mr. Caspar Glinz, Mr. Thomson, Mr. T. C. W. Heyn, Mr. Frank Adam.—From Suez.—To Singapore: Mr. Schoffer.

Per P. and O. steamer, Dec. 20, from Southampton.—To Hong Kong: Mr. and Mrs. W. P. Galton.—To Shanghai: Mr. W. H. Haslam.

Per P. and O. steamer, Jan. 4, 1864, from Southampton.—To Hong Kong: Mr. Dixon.

Per P. and O. steamer Pera, Nov. 20.—From Southampton to Hong Kong: Lieut. R. de B. Hawtrey, R.N.

Per P. and O. steamer, Dec. 20.—From Southampton to Penang: Mr. Brown. To Singapore: Mr. J. C. Gray. From Marseilles, Dec. 28.—To Shanghai: Sir Rutherford and Lady Alcock.

PER "CHALLENGER," TO SHANGHAI, to SAIL ON 18TH.—Mr. and Mrs. Treasure Jones, Mr. and Mrs. Hudson.

Summary of News from the Far East.

JAPAN.

No further hostilities had taken place. It is reported that Satsuma has been boasting of his victory over the English. It was doubted whether, without a land force, any display of power sufficient to influence the disaffected nobles could be made. It was felt that the Admiral was bound to do something more to secure the full satisfaction of Colonel Neale's demands. The Shimonosaki Straits are more completely shut out than ever to the passage of foreign vessels. The Prince, who made a mischievous use of his batteries on the north side, has, it seems, also seized the southern shore with its forts, and the passage in such hands is considered so unsafe for foreign commerce that insurance offices will not any longer accept risks on ships going that way. All this goes to show that the Empire is not likely to be reduced to the adoption of amicable relations by means of any such expedition as we have been in the habit of sending to numerous other parts of Asia. The likelihood is that there will be a rivalry among the strongly anti-foreign nobles, who will vie with each other in carrying out the policy of exclusiveness which has for centuries formed a portion of the national constitution. There are princes in Japan who have always been looked up to by the whole nation as very powerful, and it will not be surprising should they determine to stand by the Empire of the Rising Sun in the hour of its sorest need. Thus we can anticipate a species of danger that may not be lightly set aside in our plans for the future.

The *Japan Herald*, in commenting on the present condition of affairs, observes:—

"If there is anything to regret, and we say it with diffidence, it is that the fleet did not stay a little longer on the spot to show that they were still ready to come up to time, if it were called, and to wait to see if the enemy had really 'thrown up the sponge.' Doubtless, from the judgment shown throughout the whole affair, good reason existed for Admiral Kuper acting as he did.

"What are the results to be expected from the late proceedings? and what steps are to be taken in consequence of them? are questions which every one asks. There are the two friends, the most noted opponents of foreigners, the two most powerful of the Diamios, who have recently come into collision with foreign Powers. We cannot shut our eyes to the fact that the Inland Sea is now a

Digitized by Google

Mare Clausum, a route interdicted by fear to merchant vessels, and for fear of inducing an attack to men-of-war, Also, under present circumstances, no insurance office will cover a vessel taking that route, and such will continue to be the case until some settlement is come to by which these piratical attacks shall have been put a stop to. What steps Shimadzo Saburo will take in consequence of his recent punishment we cannot predict, but we always look with some anxiety for news from Nagasaki. Should he rouse himself from the blow and detach men to attack that settlement, we fear it could with difficulty be prevented. But things cannot remain as they are. The sea-shore has necessarily external, or what may be called international relations which do not attach themselves to any internal or local arrangements, such as the Tokaido. Every seaward fort must be in the hands of the Government, and the Government hold itself responsible for every shot fired from these batteries. The coast on both sides of the Straits of Simonoseki must be held by the Tycoon. If the town of Simonoseki and the ground immediately about it belongs to the Tycoon, as we understand it does, he must extend his sea line along the whole of the Straits. He must give Chosiu some other territory in lieu of that, as it is evident that a spot so important as this is, both internationally and commercially, cannot be left in its present undefined piratical position. Indeed, holding, as Japan now does, external relations with other countries, no fort or point along the whole seaboard can be regarded as any other than in charge of and held possession by the Tycoon's Government as the responsible master. As to Shimadzo Saburo, so far as punishing him for his recent bold defiance and avowal of war to the knife at sea or on the highway, we cannot but insist that his forts be taken over by the Japanese Government, but in addition to this, the Lookioo Islands cannot be allowed to remain in the hands of such an irresponsible law-defying savage. It is frequently asserted that large quantities of foreign goods have been at times sold at Satsuma, and the conclusion come to has been that they were the cargoes of some foreign vessel stranded on his coasts or those of the islands. What has become of the crews must remain a mystery, but reports are current as to them. An extensive and increasing communication is likely to take place between Hong Kong and Japan. The Lookioo Islands, lying in the highway, might, by a joint guarantee of European Powers, be put in a position of independence similar to that of the Sandwich Islands. Thus Shimadzo Suburo would be punished, and commerce benefited, while to Japan it is a matter of very little importance what is done with them. In the meantime we must remember that Satsuma's partisans are numerous: that there are many of his followers both in his own provinces and at Yedo ready to give themselves up to death that they may avenge their master's cause—perhaps their own. These men may infest the roads, and while no open war is being carried on we may be living amidst a set of cut-throats, armed to the teeth, defying authority and despising death—yet amenable to 'the policy of the laws of England which requires special justification for the use of fire-arms.' But the subject is too extended a one for us. For the solution of the two-sworded question we must look to the Japanese themselves, believing that the termination of the custom can only be the result of long continued civil war, and intestine discord, terminated by another military dictatorship. In conclusion, we believe that at the present juncture of affairs, it would be of advantage that the whole affair, from the 14th of September, should be put fairly before the Japanese by a short, clear statement, concisely drawn up in Japanese, being printed and circulated generally among the native community in Yokohama, Nagasaki and Yedo."

KANAGAWA.

The following is the report of trial of the case of assault alluded to in our last. We are glad to see that the reversal of position there pointed out has not resulted unfavourably to the European gentlemen concerned :—

H. B. M.'S CONSULAR COURT.

Kanagawa, 9th September, 1863.

The QUEEN—upon the information ex officio of the Governor of Kanagawa

Versus

Thomas Tatham, George Robert Davies, and Richard Bell Davis.

Before—CHARLES WINCHESTER, Esq., H.B.M.'s Consul,

and

Charles Rickerby, Esq., William Kemptner, Esq., Edwin J. Spence, Esq., } Assessors.

Charge.—Shooting at and wounding, or, the being accessory to the shooting at and wounding of Morotamon, a Japanese officer, on the evening of the 30th July last, at Kanasawa, within the Consular district of Kanagawa.

The Court, as above constituted, sat to-day to hear this case, which was one of deep interest, and the foreign community, accordingly, attended in considerable number to watch the proceedings. The arrangements of the Consular Court were admirable.

Mr. Otha, one of the Japanese interpreters who accompanied the Embassy to Europe—a very clever man—and L. Fletcher, Esq., of H.B.M.'s Legation, were in attendance to interpret the evidence of Morotamon, who appeared with his arm bound up but on the whole looking tolerably well.

The Consul opened the case by reading the information and recording the plea of the defendants—"Not Guilty."

The Consul then laid down the law of the case clearly and fully from Russell, Archbold, and Alison. The observations of the defendants, the evidence, and the defence, we are obliged, by want of space, to defer publishing for the present; but we publish the all-important part—the finding of the Court—for the satisfaction of our readers, and for the gratification of the friends of the defendants.

The evidence having been completed on both sides, the Court retired to consider its decision, and on coming into court again, the Consul stated shortly that in view of the decision of the Court he considered it matter of congratulation for the defendants that the case had been so fully and thoroughly gone into and investigated. After suppressing an attempt of the audience to give an inconveniently noisy expression of their approval of his statements, the Consul read the following

DECISION.

The Court having considered the evidence of Morotamon and others, tendered on behalf of the Crown, as well as that brought forward for the defence, finds that there is no satisfactory evidence to establish the charge against the defendants in law.

Firstly.—The testimony of Morotamon stands alone and unsupported so far as other oral testimony is concerned. No second witness corroborates his statement; and, but for the magisterial declarations of the defendants, the charge might have fallen through for want of identification.

It appears there were other Japanese present, whose evidence would have been received had they been brought forward.

Secondly—The fact of Morotamon having drawn his sword before he was fired at, was fully established by his own evidence in court—although in the original information it was stated that his sword was not drawn until after he was wounded. The defendants seeing him in pursuit of them with a drawn sword, could hardly suppose that his intentions were limited to a demand for explanations of words used, while the sword was being waved only in self-defence. Japanese laws of honour may require such proceedings on the part of their military officers; but, on the other hand, foreigners cannot be deprived in this country of the right of self-defence.

Looking to the circumstance of their being pursued by a Japanese officer with a drawn sword, the defendants, even supposing the opprobrious words complained of were spoken, could not infer any other intention in such pursuit than one of grievous injury to themselves.

While the circumstances of the country generally demonstrate the danger and imprudence of making use of abusive terms towards the natives as a practice which no sane or sober-minded man in this country ought to give way to, their employment would hardly avail to counterbalance or invalidate the plea of self-defence, provided the other evidence, oral and circumstantial—proved the existence of actual immediate danger.

Thirdly.—With respect to the actual existence of such danger, threatening one or more of the defendants at the moment Morotamon was wounded, the Court finds that the shot was fired in the debouchment of a narrow jetty on the main road, that the parties were then about five yards apart, and that horses entangled together on such ground could not be put to their full speed at once; it seems reasonable to doubt, therefore, whether, up to the time at which the shot was fired, the being on horseback was of much advantage, save to the foremost of the party, and finds itself led to the conclusion that the danger was then, and had not ceased to be of such a character as to excite those reasonable apprehensions of injury which justify the use of self-defence.

In conclusion, the Court finds the defendants—"Not Guilty."

(Signed) CHARLES. A. WINCHESTER, H.B.M. Consul.

Assenting { CHARLES RICKERBY, WILLIAM KEMPTNER, EDWIN J. SPENCE, } Assessors.

September 4th, the anniversary of the birth of the Prince of Orange, was held as a festival by the Dutch residents. In the evening a ball was given by the Netherlands Diplomatic and Consulate Corps at the residence of Mr. de Graeff von Polesbrook, H.N.M.'s Acting Consul General. It was attended by the British, French, Prussian, and American Ministers, the Consuls, and a great number of the residents of all nationalities. The liberality at the board of Mr. Von Polesbrook, the taste with which he had decorated his house and ground for the occasion, and his *bon hommie* in the reception of his guests caused the entertainment to pass off as one of high gratification to the assembled guests.

Digitized by Google

The following promotions have been made consequent on casualties which occurred at Kagosima :—

Commander Alexander to be Captain, vice Josling (killed.)

Lieut. Roe to be Commander, and appointed to *Coquette*, vice Alexander.

Lieut. Hunter to be Commander of *Euryalus*, vice Wilmot (killed).

Mr. Morris (Sub.-Lieut.) to be Lieutenant, vice Hunter.

Mr. Wickham (Sub.-Lieut.) to be Lieutenant, vice Roe.

Lieut. Denniston (*Coromandel*) to be Flag-Lieutenant to Admiral Kuper.

Lieut. Poole (*Havoc*) to command *Coromandel*.

A curious incident occurred in Yokohama Bay. A convivial party had met on board the *Carthage*, and, as the evening progressed, fired off some rockets as a signal to friends on shore to come on board. Three rockets had unfortunately been the signal agreed on for the debarkation of the naval and military force. Accordingly, the troops immediately landed to the consternation of the residents, and the entire settlement was soon in a state of wild excitement. As soon as the cause was discovered, the party on board the *Carthage* was taken on board the *Euryalus*, the circumstances however were soon explained, and ignorance of the private signals pleaded as an excuse.

NAGASAKI.

H. M. S. *Rattler* had arrived at this port on her return from Shanghai. The Japanese yacht *Emperor* arrived on the morning of the 5th September from Kagosima, whither she is said to have been sent from Yedo, so soon as intelligence reached the Tycoon of the projected attack by the English on that port; in consequence of head winds and bad coals, however, she made a very long passage, and on arriving at Kagnsima, found that the English had already been there, and destroyed half of the city, all the forts, factories, steamers, &c. She leaves for Yedo in a few days. In trade, there is nothing doing; a large fleet of merchant vessels is in port, and very little freight offering for them. A few cases of cholera have occurred amongst the shipping and native population. The Rev. Rowland K. Edwards, Chaplain and Naval Instructor of H.M.S. frigate *Leopard*, fell a victim to it on the night of the 8th Sept.

The Russian Admiral left on the morning of the 29th, his destination is not known. The Russian corvette *Norviek* left three days before the Admiral, with sealed orders. The Russians seemed much alarmed.

HAKODADI.

We (*Shanghai Shipping List*) have received the following from our Hakodadi correspondent under date of September :—Vessels in port at this date—Russian Government steamer *Manjour*, Japanese steamer *City of Hankow*, barque *Waterwitch*, and schooners *Hakodadi* and *Governor Wallace*. British sailing vessels *Osborn* (Messrs. Dent and Co.) leaving for Shanghai; *Comet*, *Renown*, and *Egmont*, leaving for Shanghai, French schooner *Monetta*. The *Lady Elizabeth* and *Eliza Mary* left on the 2nd for Shanghai, and the Russian steamer for the Amoor. At this port everything remains perfectly quiet, as it has been during the whole summer. We have news per *Comet*, from Nagasaki, of the reported defeat of the British squadron at Kagosima, but the Japanese have not yet heard anything overland from Yedo, which is the route by which native intelligence from the South reaches this place. There has been some heavy weather, and during two days such excessive rain that much damage has been done to the roads. We have had a late arrival from the Amoor River, but without any news of interest. The Russian men-of-war of Admiral Popoff's squadron, now invariably leave under sealed orders, so that this mode of communicating with other ports is now closed to foreign residents here. Whether it is done for political purposes, or because the Admiral does not wish his vessels to carry passengers, is not known. The steamer *Abrek* was dismasted in a gale in the Japan sea, and is said to have put into one of the ports on the southern part of the Manjourian coast, probably Vladiwostor.

SHANGHAI.

The following notice appears in a Shanghai paper of Tien Wang's Yamun :—

The Tien Wang-foo (which, being translated, means the Heavenly Prince's Palace) is situated a short way within the Taiping Mun of Nanking, and is surrounded by a high wall. Its interior is divided into twenty-one courts, the third of which is the grand reception hall, where audience is granted on state occasions by the Heavenly Prince; the rest are apportioned to various domestic purposes, such as dormitories, sitting-rooms, &c.

"Tien Wang himself, since his assuming regal titles, has shut himself up within his palace walls, and is the happy possessor of no less than 36 wives and 70 concubines; his eldest son is named Yuen-bow, or the Sacred Treasure, and is 15 years of age, and the reputed successor of his father's dubious honours. Tien Wang is described by those who have been admitted within the precincts of the palace as tall and of good presence, and now somewhat corpulent, though said by English authors to be only of middle height. His last birthday was celebrated as his forty-eighth, though called by the aforesaid authorities fifty-three. Contrary to the majority of his countrymen, he is embellished with a long and very black beard and whiskers, which extend round the whole face from ear to ear, and has large and somewhat expressive eyes; his nose as usual flattish, but the division between the eyes broad; his ears long and pendant.

"In the third moon of the present year he was blessed with a vision, in which, as he asserts, he was told to shave all hi people's heads; this he communicated to the Chung-Wang, his Prime Minister and Commander-in-Chief, who, however, being more acquainted with the outside world and its prejudices, and the danger likely to occur if such a proceeding were carried out to the letter, and at the same time not daring to oppose the wishes of his master, with a facility of evasion truly Chinese, effected a compromise by which a portion only of the newly-grown hair was to be cut off, and so gave no offence either to the dreamer of dreams, or the unfortunate men his adherents."

THE ANGLO-CHINESE FORCE.

The following is from the *Overland Trade Report*:—General Brown and Captain Osborn, seeing that the Futai was trifling with them, determined on going to Peking. Captain Osborn left immediately in his flag-ship for Tientsin, and if General Brown had not left at date of last advices, he was on the point of doing so. The general's intention in going to Peking is said to be the obtaining of Sir F. Bruce's assent to the employment of a portion of the British force in the contemplated attack on Soochow, in accordance with private instructions from home!

The result of this visit to Peking may be looked forward to with some anxiety. The anti-foreign party will strongly resist acquiescence to the pretensions of Captain Osborn, supported as those pretensions will be by the British minister and general. Should the Government acquiesce, an amount of responsibility will be thrown on the shoulders of the British authorities which will compel future active interference. Should the Futai be borne out, the probability is that dictation will be employed by the British minister, thereby causing the present degree of apprehension and mistrust on the part of the mandarins to be intensified.

Meanwhile, with the exception of the Sungkiong force, commanded by Dr. Macartney, late of H. M. 99th Regiment, who is entirely devoted to the Futai, operations are suspended. Major Gordon is on the defensive at Quensan, where it is alleged the Taipings harass his outposts nightly. There must be some apprehension about his position, as General Brown has sent 200 Belooches to Quensan (which is 50 miles beyond the radius). He has also sent a company of the 67th and a company of the 22nd N. I. to Tai-tsan, (also beyond the radius), evidently to keep open Gordon's retreat. Captain Osborn's fleet remain inactive until its chief shall have definitely arranged his position. He, no doubt, requires to be under the orders of the Peking Cabinet—in other words, of the British minister, and not under those of the provincial authorities.

The situation of affairs at Shanghai on the arrival of Captain Osborn was critical. It was very desirable that the crews of his fleet should be formed into a naval brigade, and co-operating with Major Gordon's force, attack Soochow. This was doubtless part of the plan laid down by the British military authorities, and warmly adopted by Major Gordon. The Futai's obstructiveness alone frustrated it. Time, which is everything to Burgevine, has been allowed the Taipings for organisation and suitable equipment. Burgevine himself is confined to his room at Soochow from some of his old wounds having broken out afresh, but he seems to have subordinates who can carry on the duty, for he certainly continues to be reinforced by Europeans continually. The crews of Captain Osborn's fleet turn out to be the refuse, and not the pick of British seamen. Some have deserted, others have been discharged, and acclimatisation has still to do its work. If many of these men have

Digitized by Google

not already joined Burgevine, there can be no doubt they soon will.

The following extract from the *North China Herald*, a paper entirely devoted to the Imperial cause, will illustrate the true position of the recruiting system carried on by Burgevine:—

"Three men formerly connected with the Sunkong force under Burgevine, have been placed under strict surveillance by General Brown. One of these, formerly a sergeant in an infantry regiment, held the appointment of a major in Sunkong. He accompanied Burgevine to Soochow, and it is thought that his object in coming to Shanghai was to enlist Europeans for the rebels. Of the other two, one held the rank of the colonel under Major Gordon, but has left the force; the other has but just arrived from Japan, and there is not, we believe, any direct proof of complicity with Burgevine. Suspicion only attaches to the two latter, but as to the former there can be no doubt. What ultimate steps the General may take in the matter we do not know."

It is difficult to understand what General Brown can have to do with the matter; but he seems to have adopted the Imperial cause without stint or limit. The statements above given as to the steps he has taken to support it, incredible as they may appear after what occurred in the House of Commons in reference to the death of Lieut. Tinling, may nevertheless be relied on.

There is one subject on which the Futai has just grounds of complaint, and which, taken in connection with what has been already stated, materially tends to confirm the misgivings of the mandarins as to the *bona fide* intentions of foreigners. The Futai claims the right to deal with such foreigners as he may capture in arms against the Imperialist Government. The consuls of the treaty Powers insist that such captives shall be surrendered to them to be dealt with according to the laws of their own country. The discussion has assumed a serious shape, owing to a reward which the Futai offered for Burgevine, dead or alive. Several foreigners belonging to non-treaty Powers, who have been captured under the circumstances, have been summarily decapitated. Certainly it seems hard thus to throw the mantle of protection over men who, by their own acts, have placed themselves beyond the pale of their own laws.

Major Gordon has dismissed the body-guard of Europeans whom he had engaged. The probability is that arrears of pay caused them to become intractable. The two hundred Belooches above-mentioned were doubtless sent by General Brown to replace them. Gordon is still much in want of officers. The conduct of the mandarins has been such as to put an entire stop to the movement which was, a little time ago, so strongly manifested in the British force in China, of military officers joining the Imperial service.

During the fortnight, Dr. Macartney, in command of the Sungkiong force, attacked and carried a Taiping stronghold called Sedong, about thirty five miles distant. This officer is entirely devoted to the Futai, and is supposed to be his principal adviser. He is ambitious and not on friendly terms with the British military authorities. He seems to rely entirely on the native element, which is the Futai's hobby. Assuredly if he can obtain native officers, and instil *esprit de corps* in his men, he has vast materials to work with—but the *desideratum* of a chief with military capacity appears to be lost sight of.

It is stated that the Tao-tai has agreed to appropriate 6,000 taels to the blowing up of the *Lord Lyndhurst*, and the removal of a junk sunk off Pootung point. These have for some time been serious obstructions to the navigation of the river, and their removal will be a great benefit.

The following items are from the *Friend of China*:—"As the *Express* passed Nanking, the Imperialists were firing away at the rebels (seen comfortably seated on the walls of the outer fort smoking) in perfect Gettysburgh style. All smoke, however. Speaking of the *Express*, we hear that Captain Castilla (for some political purpose, we suppose) offered a master of a junk 50 taels if he would let him tow him past Nanking. The junk captain declined, on the plea that if he did so the mandarins would find him out and punish him, orders being peremptory to be towed only by the *Antelope* or *Willamette*, which vessels exhibit the English or American flag, as it pleases them. Captain Castilla then offered to purchase the whole cargo (salt, we conclude), but still the same answer —No can!

Report has it that Commodore Osborn requires $300,000 from the authorities to pay for the steamers, before he fires a shot. We hope he may *not* get it—and if so—How?

The P. and O. S. N. Company's steamship *Pekin*, Captain Soames, arrived in the river with the English mail of the 26th of July, a little after one to-day (16th September). Singularly, the *Pekin* also broke down on her way up, being with the *Mooltan* and *Emeu*, the third steamer bringing this mail which came to grief, and yet we have our London letters on the 51st day out. It appears that the *Pekin* had reached the He-shan group, about two-thirds of the way, against a strong north-easter, when one of the piston-rods gave way, and the vessel had to anchor for a few hours until arrangements could be made for completing the passage under one engine. Fortunately, the breeze moderated, and the Light Ship was reached last night about 8 P.M., say 5½ days only from Hongkong, which port she left early on the morning of Thursday last. Had the monsoon continued strong, she would have had to put back.

So critically situated was the *Pekin* when the accident occurred, that Capt. Soames hoisted the ensign union down, as a signal to the *Fokien* seen in the distance, about 9 A.M. on Monday last, the *Pekin* eventually anchoring within half a mile of some ugly islets, to keep off which she had a difficulty in wearing. It would have been a splendid salvage for the S. S. N. Co., the *Pekin* having upwards of £90,000 sterling, and some 560 chests of opium, besides other valuable cargo on board.

HANKOW.

Mr. Dick, of the Custom-house, leaves in a few days for Shanghai to act as second Commissioner. Mr. Macpherson, of the Shanghai Customs proceeds to Hankow to take charge. We understand that the Chinese authorities have refused to acknowledge Mr. J. H. Evans as Portuguese Consul at Hankow. They also deny the right of the Portuguese to trade on the Yang-tsze until after the ratification of the Treaty.

We regret to have to report the death from typhoid fever on the 9th Sept. of Mr. Ankers, chief engineer of H.M.'s gunboat *Hardy*.

NINGPO.

It is likely that the Franco-Chinese may advance to the assistance of the Futai at Fo-yang; but it is still uncertain whether the Anglo-Chinese will co-operate with them or attack Chapoo, a city on the grand canal about thirty-five miles from Ningpo.

AMOY.

Two of the vessels of the Sherard Osborn fleet put into this place, the *Tien-tsin* and *Keangsoo*, the latter with loss of rudder head.

HONG KONG.

The following notification has been published:—

COLONIAL SECRETARY'S OFFICE,
HONG KONG, Sept. 3, 1863.

SIR,—With reference to my letters No. 644 and 670 of 15th and 17th June respectively, I have received the directions of His Excellency the Acting-Governor to acquaint you that His Grace the Duke of Newcastle has signified the approval of Her Majesty's Government of the Proclamation of 21st February, by which the export of military stores from this Colony is prohibited.

Permits will be given as heretofore to applicants authorized on behalf of the Imperial Government of China.

The conditions of these permits I am instructed to particularise as follows:—

1. A certificate given by the British Consul to the officer who may be deputed by the Chinese Government for the purchase of military stores specifying the kind and quantity required.

2. An original certificate by the Commissioner of Customs, stating the kind and quantity of military stores required by the Chinese Government; the signature of the Commissioner being certified by the British Consul.

I am to add that His Excellency is glad to avail himself of this opportunity to convey the above information; as it appears from a communication made to this Government by one of the mercantile firms in the colony that an erroneous idea exists as to the views of the Home Government in this matter.—I have the honour to be, Sir, your most obedient servant,

(Signed) W. H. ALEXANDER, Acting Colonial Secretary.

J. J. MACKENZIE, Chairman,
Hong Kong Chamber of Commerce.

The case of Sassoon *v.* Barton came on as an appeal from the Consular Court at Shanghai; the Consular decision was affirmed with costs.

The Hong Kong Choral Society's late concert in aid of a City Hall Fund yielded $691, which has been handed over to the fund's treasurer. A notification appeared in the *Gazette* specifying the proposed stands for public vehicles, and the intended rates of payment. The new vehicle Act is meant to come into force next month.

A curious *expose* took place at the gaol the other night. The acting superintendent had married a sister-in-law of Stanford, the notorious confederate of Rustomjee, the great opium swindler of last year, and it appears that at a supper given in the gaoler's residence, Stanford sat down as a guest, his wife being also pre-

Digitized by Google

sent. The acting superintendent was next arrested, and now awaits his trial for aiding the escape of a convict.

The *Evening Mail* notices the fact that Mr. Lay, of the Customs, was bringing discredit upon himself and the service by dismissing officials in order to create vacancies for *protégés* of his own. This fact was certified to under the hand of the late Mr. H. Tudor Davies, in a testimonial which he had given to a dismissed tide-surveyor. It would be well that Mr. Lay caused the customs service to be respected, and to stand as high as other services abroad; these latter are esteemed on account of the scrupulous care exercised in the dismissal of servants, which never takes place except where misconduct has been proved. It may be that certain classes of people in England entertain erroneous ideas as to the Chinese Customs Service and its English head. This dismissal of a batch of men recently is a dangerous sign.

The usual quiet of Chinese life in Hongkong has been broken during the past few days, by a religious festival on a large scale. Processions paraded the streets, carrying, among other things, a tremendous dragon, and affording a vast deal of harmless mirth to the foreign community. An immense matshed was erected near West Point and filled with works of art, in the shape of numerous allegorical groups of figures in the most powerful style of dramatic rendering, and all with some moral lesson in their design.

On Wednesday, the 16th Sept., the Hong Kong Volunteers commenced exercising for the season. A full battery was mustered, and the corps marched out to the first carriage turning beyond East Point, where they encamped for the day. Some of the excellent shot and shell practice was gone through, refreshments were partaken of, and the corps returned home after a very successful march out.

CANTON.

The *Daily Press* has the following notice of rebel movements and Customs:—"It would appear that the rebels, the Taipings, we suppose, have for many years held a town in this province called Kwonghai, situated in the district of Sinning, which lies West of Macao. A report is current in Canton that Woo, the provincial judge, has, after a prolonged resistance, at last reduced this place. This Mandarin Woo is very popular amongst the people in the Canton province—in fact, it is said that he is the only high provincial official in whom the masses have confidence.

"We further learn that when Mr. Lay was here, a deputation of Canton merchants called on him and lodged a complaint against all the Chinese officials employed in the Maritime Customs at Canton. In pursuance of this complaint Mr. Lay took the requisite steps at Peking, and the consequence is that the whole of the native Customs officers complained against, have been ordered to the capital. Here is a lesson for the foreign merchants. When they have any Customs complaints to make they should keep them a profound secret, and, forming a deputation, go and respectfully represent their grievances to Mr. Lay, who will not fail to extend his earliest and most favourable consideration, &c. And referring to Customs matters, we should not omit to inform our readers that Sir F. Bruce has fully approved of Mr. Consul Robertson's doings with reference to the fire cracker case."

SIAM.

From Siam we (*Strait Times*) learn that the French Admiral, La Grandiere, has concluded a somewhat exclusive treaty with the Viceroy of Cambodia. This Viceroy is the nominee of the King of Siam, to whom that part of Cambodia is tributary, and the Treaty will of course be void, unless it be ratified by the Court of Siam; which, judging from the nature of the treaty, we scarcely think probable. Admiral La Grandiere has evidently had it in view to steal a march upon the other European nations in this transaction; but if our authorities are at all active, and if Siam is true to its interests, the Treaty will either be set aside or be deprived of its exclusive effect.

MALACCA STRAITS.

SINGAPORE.

Commodore Montresor, of H.M.'s ship *Severn*, has arrived with part of his squadron, namely, the *Pantaloon* and the *Vigilant*; the gunboat *Janus*, which belongs to the same squadron, is also here. The *Pantaloon* has gone down to Borneo to relieve the gunboat *Leven*, which has arrived to take in her stores The *Pantaloon* will return in about three weeks, and either she or the *Vigilant* will most likely be placed upon this station. The Commodore returns to Ceylon; his stay has been protracted here owing to the nature of the intelligence from Japan, and which at one time made it highly probable that Admiral Kuper would require the Commodore's squadron to proceed there.

Rajah Sir James Brooke comes home by this mail in much better health and vigour than he did two years ago. He has placed the government of Sarawak once more in a satisfactory condition, and when in Europe will endeavour to procure that measure of protection which is alone wanting to secure the permanent prosperity of his kingdom.

The *Straits Times* says:—"We have had the perusal of a statement written by Sir James, in refutation of the claims which are set up by his nephew, Mr. Brooke Brooke; it seems to us clear enough that though Mr. Brooke was created Rajah Muda, and as such administered the government for some time, still Sir James always retained in his own hands the supreme authority. As we said before, Mr. Brooke has been very badly advised to place himself in opposition to the Rajah; by doing so he has shown an undue haste for power, and has alienated from himself that consideration and affection to which his long service in the Government of Sarawak had entitled him."

Mr. W. H. Read, one of the most active public men we have had here, also leaves for Europe by this mail; he is a partner in the firm of A. L. Johnston and Co., the oldest mercantile house in the settlement. Mr. Read has been a persistent advocate of the freedom of this port from all burdens; and has strongly supported the transfer of the settlement to the Crown. In the course of public discussion he has frequently come into collision with ourselves, and he has used our columns at times with considerable freedom; but we are nevertheless sensible of losing in him a valuable member of the community.

The Chinese steamer *Kwangtung*, the last of the fleet fitted out for His Majesty the Emperor of China, left for Shanghai, October 1st.

Francis Leonard Baumgarten had been appointed Sheriff of the United Settlements of Prince of Wales' Island, Singapore and Malacca, for the ensuing year, to commence from 29th October.

A correspondent from Siak states that the Dutch expedition had proved a failure.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CUSHNY—On the 11th inst., at Aberdeen, Mrs. A. Cushny (late of Shanghai), of a son.

DELANO—On the 10th Sept., at Rose Hill, the wife of Warren Delano, of a son.

EDGELL—On the 31st Oct., at the Royal Naval Hospital, Haslar, the wife of Captain Harry Edgell, R.N., C.B., A.D.C. to the Queen, of a son.

GLEDSTANES—On the 22nd Oct., at Gunnersbury, the wife of Albert Gledstanes, Esq. of a son, still-born.

HALKETT—On the 5th Sept., at Shanghai, the wife of R. W. Halkett, of a daughter.

HOWES—On the 1st Aug., at Bangkok, Siam, the wife of Victor Howes, Esq., Commander of the ship Burlington, of a son.

MCCLELLAND—On the 25th Oct., at Bath-crescent, Glasgow, the wife of Charles Grey McClelland, Esq., of Singapore, of a daughter.

ROTHWELL—On the 29th Oct., at 20, Upper Bedford-place, the wife of Richard Rothwell, of a son.

MARRIAGES.

BORBEON—WIERS.—On the 5th Sept., at St. John's Cathedral, Hong Kong, by the Rev J. J. Irvin, Colonial Chaptain, Louis Börbeon, clerk, to Rosalie Wiers.

GALTON—PARKER—On the 4th Nov., at St. Paul's, Herne-hill, by the Rev. Charles Mayor, M.A. uncle of the bride, assisted by the Rev. Matthew Anderson, M.A., incumbent, William Pitcairn Galton, of Foo-chow, China, second son of Edmund John Galton, Esq., Brixton-rise, Surrey, to Georgiana, youngest daughter of William Augustus Parker, Esq., of Brockwell, Dulwich, Surrey. No cards.

GAYNOR MEREDITH.—On the 15th Sept., at St. John's Cathedral, Hong Kong, by the Right Rev. the Lord Bishop of Victoria, Francis Seymour Gaynor, Capt. 99th Regt., to Fanny, youngest surviving daughter of the late George Meredith, of Cambria, Tasmania. No cards.

GROVER—GAILLORD.—On the 8th Sept., at the American Consulate, Canton, by the Rev J. G. Schilling, Rev. R. H. Grover, to Mrs. E. M. Gaillord.

GUNN—MACKILLIGIN—On the 4th Nov., at St. Stephen's Church, Bayswater, by the Rev. Arthur Dixon, assisted by the Rev. Henry W. Brooks, Hector Gunn, Esq., Manager of the Agra and U.S. Bank, Lahore, son of the late George Gunn, Esq., of Rhives, Sutherland, N.B., to Mary Eliza, eldest daughter of the late William Mackilligin, Esq., of Relguas, Morayshire. No cards.

HOLLOWAY—PENGELLY—On the 13th Oct., at the Garrison Chapel, Halifax, Nova Scotia, by the Rev. E. W. Milner, M.A., Garrison Chaplain, C. W. Elphinstone Holloway, Esq., Military Store Staff, second son of the late Colonel Holloway, C.B., to Caroline, second daughter of Edward Pengelley, Esq., Military Store Staff, Halifax, Nova Scotia.

KELSON—LEMOS—On the 27th Oct., at the English Episcopal Church, Hamburg, by the Rev. — Weideman, Frederic Hughes Kelson, Esq., of Jersey and Ceylon, only son of Lieut. Col. Charles Kelson, of St. Helier's, Jersey, to Rosa Maria, second daughter of Adolphe de Lemos, Esq., of Hamburg.

MARGESSON—BEAUMONT—On the 14th Oct., at Darfield Church, by the Hon. and Rev. P. G. Willoughby, assisted by the Rev. H. Clayforth, Major Margesson, of the 56th Regt., to Lucy Matilda, youngest daughter of E. B. Beaumont, Esq., of Wood-hall, Yorkshire.

RYALL—HEWITT.—On the 14th Sept., at St. John's Cathedral, Hong Kong, Charles Ryall, Acting-Superintendent of Victoria Gaol, to Eliza Hewitt, of Penzance, Cornwall.

SALL—TUCKER—On the 24th Oct., at the parish church, St. Marylebone, by the Rev. G. P. Bennett, vicar of Kelvedon, Essex, and uncle of the bride, assisted by the Rev. E. A. Sall, Major Henry M. Sall, unattached, late 1st battalion 22nd Regt., to Elizabeth Sarah, widow of the late Thomas Reeve Tucker, Esq., of Ceylon, and second daughter of Lieut.-Col. J. W. Bennett, late 101st Regt. No cards.

SHERMAN—DEASY.—On the 23rd July, at Labuan, by the Rev. Julian Moreton, Chaplain, Capt. William Henry Sherman, barque Atlantic, Malden Mass., U.S.A., to Ann, daughter of Mr. Conductor C. Deasy, Ordnance Department.

SEYMOUR—KENNEDY.—On the 7th inst., at Christ Church, Marylebone, by the Very Rev. Sir John Cullen Seymour, Bart, Dean of Gloucester, uncle to the bridegroom, assisted by the Rev. L. L. Davis, Michael F. K. Seymour, Esq., only son of Vice-Admiral Sir Michael Seymour, G.C.B., Commander-in-Chief at Portsmouth, to Elizabeth Georgina Frederica, only daughter of Captain W. H. Kennedy, R.N., and granddaughter of the late Admiral the Hon. Sir Charles Paget.

DEATHS.

ANKERS—On the 9th Sept., at Hankow, of typhoid fever, — Ankers, chief engineer of H.M. gunboat Hardy.

BURKE On the 16th Sept., at the General Hospital, Hong Kong, Timothy Burke, private. 99th Regiment.

CAMPBELL—On the 9th inst., at Givon's Grove, Surrey, Angus J. Campbell, Esq., late of China.

CONNORS—On the 13th Sept., at the General Hospital, Hong Kong, Michael Connors, private, 99th Regiment.

EDWARDS On the 8th Sept., at Nagasaki, Japan, of violent cholera, the Rev. Rowland K. Edwards, Chaplain and Naval Instructor of H.M.S. Leopard, aged 33 years and 9 months.

FOSBERY—On the 10th July, at Shanghai, of fever, aged 38, Francis Godfrey, eldest son of Godfrey Fosbery, Esq., Commander R.N.

HAYDON—On the 6th Sept., at Shanghai, W. Haydon, R.N., Master H.M.S. Ringdove, aged 22 years.

HUTCHINS—On the 16th Sept., at Shanghai, W. Hutchins, a native of Sheldon, Tynemouth, aged 34 years.

KELLY—On the 14th Sept., at the General Hospital, Hong Kong Michael Kelly, private, 99th Regiment.

LOBACK—On the 10th Sept., at Hong Kong, Gustavus Adolf Loback, aged 26 years.

LONDON—On the 10th Sept., at the Civil Hospital, Hong Kong, J. London, Inspector of Nuisances.

LANG—On the 21st Sept., at the Oriental Hotel, Hong Kong, T. H. Lang, a native of New York.

M'AULIFFE—On the 22nd Sept., at the Military Hospital, Kowloong, Daniel M'Auliffe, private 99th Regiment.

M'KECHNIE—On the 21st Sept., at the Seamen's Hospital, Hong Kong, James M'Kechnie, seaman of the British ship Tamana.

MACANAYA—On the — August, before Kinghein, in Kiangsu, killed by the explosion of a shell, aged 27 years, Senhor Vicente Macanaya, commanding Imperialist troops, and formerly aide-de-camp to General Ward.

METCALFE—On the 18th Sept., at Shanghai, China, Lieutenant Henry Metcalfe, R.A., son of Charles Metcalfe, Esq., of Inglethorpe Hall, Emneth, Norfolk, in his 26th year.

MARTIN—On the 10th Sept., at the Civil Hospital, Hong Kong, Wm. Martin, late a constable of the dockyard.

MILRIELEES—On the 12th Sept., at Shanghai, in the 23rd year of her age, Hannah, wife of Capt. James Milrielees, of the ship Mahe.

PATMORE—At Shanghai, on the 9th September, from the effects of an accident at Sungkong, aged 32 years, the wife of Mr. J. Harry Patmore, daughter of J. C. Rice, Esq., Cow Glen, Pollack-shaws, near Glasgow.

PRITCHARD—On the 12th Sept., at the Seamen's Hospital, Hong Kong, Richard Pritchard, late engineer of the steamer Feelong.

PETERS—On the 19th Sept., at the Seaman's Hospital, Hong Kong, Carl Peters, late cook of the ship Laertes.

RANKIN—On the 2nd July, at Tang-chow, Rev. H. V. Rankin, aged 33 years. He had been a missionary to the Chinese for more than fourteen years.

ROGERS—At Quinsan, on the 7th of September, of dysentery, Lieutenant Rogers, Rifle Regiment.—[This makes the seventeenth officer of H.I.M.'s Chinese levies who has died at Quinsan this summer.]

ROBERTS—On the 26th Sept., at Hong Kong, Mary P. Roberts, the youngest daughter of John Roberts, aged 20 years.

ULCOQ On the 23rd Oct., at 9 bis, rue de Londres, Paris, C. J. Ulcoq, Esq., of Queen Victoria and Bonne Mère Estates, Mauritius, Doctor of Medicine, Member of the Royal Society of Arts and Sciences, and of the Chamber of Agriculture of Mauritius, &c., aged 71, most deeply regretted. Friends in England are requested kindly to accept this intimation.

WISE—On the 29th Oct., at Fulsham House, Wilmslow, aged 2 years, Alfred John, son of John Wise, Esq., late of China.

WILSON—On the 3rd Sept., at Shanghai, Catherine Brophy, wife of Charles Wilson, of Ningpo, aged 23 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The position of the market for Congous is precisely as last described—the teamen being firm holders at rates above what exporters can afford to pay: the business in this description has consequently been very limited. In Scented Teas a moderate business has been transacted at previous rates. Transactions to a moderate extent have taken place in Canton Greens, also at previous rates—few of which are intended for shipment to England. In other kinds no business is reported. About thirteen chops of Congou have arrived from the country during the fortnight. It is said large supplies of country Greens may be expected, owing to the route between the producing districts and Kewkiang being infested with rebels.

SHANGHAI.—Black: Business for the fortnight has been very dull, and settlements only amount to 20 chops. Before the arrival of the *Reiver*, anticipating the English mail of the 27th July, former prices were maintained, and holders were generally very firm; but since then, in consequence of the furthur decline in London, and the critical state of relations with Russia, buyers would not come forward unless at a reduction on previous rates. As common Oonahms and Hohows were in large supply, a decline on these classes of fully two taels has been established, but holders have not at present lowered their rates for good Oopacks, which continue scarce. Stocks are still heavy, and should advices by the next mail be unsatisfactory, a further decline of prices must take place. Settlements on the market, 20 chops, or 10,853 chests Oopacks, Oonahms, Ningchows, and Hohows. Re-shipped on owners' account, 34 chops, 13,252 chests Oopacks—together, 24,105 chests; making total to date 232,464 chests. Stock waiting shipment and for re-sale, 51 chops. Second crop Oopacks and Ningchows are quoted Tls. 30 to 35½; second and third crop Oonahms, Tls. 23 to 29; first and second crop Hohows, Tls. 21 to 28. Green: Considerable quantities of Pingsueys have come forward from Ningpo, but the demand here has been very slack, and three chops only are reported as having been settled at prices ranging from Tls. 37 to 41. No new country teas have at present arrived from Kiukiang. In Shanghai packed kinds a little has been done at previous rates. Re-shipments and settlements, 580 half-chests Fychow, &c., 4,563 chests Pingsuey, 3,834 half-chests Japan—8,977 half-chests; making total to date 32,752 half-chests. Stock of Green Tea is estimated at 991 half-chests Fychow, &c.; 3,200 half-chests Shanghai packed Japan; 6,700 chests Pingsuey—10,891 half-chests.

FOO-CHOW.—The advices per 26th July mail caused buyers to retire from the market, when a fall took place of 1 to 1½ tael on the lower grades of Congou, and 5 mace to 1 tael on the better kinds, at which reduction business was resumed on a tolerable scale. Fine Kysows are scarce and held at former rates. Settlements of Souchong have been made to some extent, fine at previous rates, common at a fall of 1 to 2 taels. The business done in Oolongs has been all for New York at previous rates. In flowery Pekoes and scented teas the little that has been done has been at previous rates. The following are the settlements of the fortnight:—Congous: 45,300 chests at 6½ to 11 taels for dusty and broken leaf, up to 26 to 29 taels for fine Kysows. Souchongs: 4,750 chests at 20 taels for common up to 36 taels for fine. Oolongs: 6,100 half-chests at 17 taels for common up to 25 for fine. Flowery Pekoe: 440 chests all common to medium at 30 to 32 taels. Scented Teas: 5,600 boxes all common to medium at 11 to 25 taels. The supply of Congous is on a par with last season, but the total yield will probably run short. Souchongs will be in excess, and will about make up the deficiency. Oolongs, flowery Pekoes, and scented teas will be in shorter supply this season than last.

HANKOW.—Late shipments to Shanghai having resulted in loss, and the advices from London continuing very unfavouable, exporters had retired from the market and rates had fallen fully one tael to fine, and two taels on the commoner kinds. The settlements on the fortnight amount to forty-nine chops, including four contract, making the total settlements of the season to date 488 chops. Supplies from the country come in pretty freely, and it is anticipated that the shipments for the season will approach 700 chops. The stock on the market is variously estimated, and probably exceeds thirty chops.

KEWKIANG.—Again no business to report. Green teas (Moyune and Fychow) are held back in consequence of the unanimous protest of the teamen against the new additional war tax. 40,000 pgs. are said to have accumulated at the barrier, where this tax is leviable. Three chops new Teenkai have arrived, but are not yet landed. Market quiet here. Black Teas—Three chops have been settled at again lower rates, 18 taels for Hohow, and 27 to 28 taels for fine Ningchow; no stock.

YOKOHAMA.—The high rates asked for this article have not suited the generality of buyers, and consequently there has been a marked falling off in the quantities exported lately, most of which has been for the American market. Parcels of best descriptions find buyers immediately on arrival, but supplies are limited. Fine, $26 to 30; medium, $19 to 25; common, $10 to 18; ordinary, $1 to 9 per picul.

RAW SILK.—SHANGHAI.—There has been considerable activity in the market, reported transactions having reached 3,600 bales. A very general demand commenced early in the fortnight, and a large portion of the purchases was then made at prices similar to those ruling at the close of last mail. The extent of the operations caused dealers to ask higher prices and they have succeeded in establishing an advance of taels 5 to 10 per picul, at which many of the last settlements have been made. The market is firm, and up to the close of the steamer the activity has not abated. The supply from the interior has not been in proportion to the sales, and the stock therefore shows a reduction. About 850 bales have been received from Japan, and by last advices the supply they were receiving was moderate, which had caused prices to advance $10 per picul. The settlements of the fortnight are reported at 4,500 bales, against 2,800 corresponding fortnight last and 3,000 the season before. The corresponding total settlements to date stand respectively 18,200 bales, 34,800, and 21,000. The respective corresponding stocks stand 14,000 bales, 10,000, and 21,000. The following are the quotations:—Tsatlees, No. 1, 455 to 460 taels per picul; No. 2, 435 to 440; No. 3, 415 to 425; Market, No. 3, 400 to 410; No. 4, 385 to 395; No. 5 and common, 365 to 380 Taysaams, No. 1, chops, 390 to 395; No. 2, 375 to 380; No. 3, 350 to 360; No. 4, 5, and common, 320 to 340.

CANTON.—The silk of the fifth crop has been coming forward from the time advised in last report. The quality and colour prove good, and the quantity is likely to be abundant. During the fortnight 12 bales of superior No. 1 Loong-kongs have been purchased for London, and beyond this no other settlements by Europeans have taken place in long-reels. Of short-reels about 200 bales go forward by this steamer. The Indian houses have been small buyers, owing, it is understood, to the less favourable accounts of the Bombay market. Prices are, in consequence a little easier, and may be quoted:—Loong-kong, No. 1, $400 to 405; do., No. 2, 385 to 390; Kow-kong, No. 1, 360 to 465; Canton Tsatlee, 460 to 465; imitation Japan, 430 to 439. The export of silk for Europe and Bombay, made up from the Custom-house returns, is as follows:—

July	Europe	bales 140	Bombay	cases 1,057
August	"	" 273	"	" 1,418
September	"	" 342	"	" 649

YOKOHAMA.—The demand having been more active the last day or two, prices have advanced generally about $10 and even more on some articles. Arrivals from the interior continue on the same limited scale, and are eagerly bought up, so that there is no stock to speak of on the market. The quotations are as follows:—Ida: best, $525 to 535; medium, 460 to 480; inferior, 420 to 440. Mybash and Sinchus: best, 520 to 530; medium, 500 to 510; inferior, 480 to 490. Coshios: best, 470 to 480; medium, 450 to 460; inferior, 420 to 440. Ooshios: best, 489 to 470; inferior, 420 to 430. Hatchogee: 395 to 405. Mashtah and Taysaam kinds—400 to 420 per picul.

DRUGS, &c.—CANTON.—Cassia Lignea: Sales 800 piculs, at $16.25 to 16.50; stock 1,000 piculs. Cassia Oil, Cassia Buds, Gamboge, Star Aniseed, and Aniseed Oil, market still bear of supplies. Rhubarb, the market has been cleared by the purchase of 100 piculs at $67. China Root is quoted $3.75 to 4; stock 250 piculs. Galangal quoted $3.75 to 4.25; stock 300 piculs. Vermilion: $40 per box. Galls, $17 per picul; only 100 piculs on the market.

CHINA IMPORTS.

HONG KONG.

COTTON YARN—Has remained quite neglected, both in this market and in Canton during the past fortnight, and from neither place is there a single regular sale to report. The quantity of sea-damaged Yarn moved off by auction in Hong Kong amounts to 147 bales; buyers being by no means anxious of supplying themselves to any great extent.

GREY SHIRTINGS.—The sales reported of these fabrics are limited in Hong Kong to 400 pieces, while about 1,200 pieces have been moved off at auction owing to sea-damage.

Digitized by Google

WHITE SHIRTINGS.—The sales of these goods are put at 2,250 pieces, disposed of in Hong Kong at prices which do not shew any material alteration in the rates previously given.

T-CLOTHS.—About 4,500 pieces of T-Cloths have been moved off by public auction during the fortnight, but no private enquiry exists at present, and the annexed quotations are almost nominal.

AMERICAN DRILLS are quite without enquiry, and there have not been any sales of these goods reported for some time past.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED have found purchasers in this Colony at the annexed quotations, to the extent of 500 pieces of Dyed Spotted Shirtings; and a similar quantity of Dyed Brocades have also been moved off during the past fortnight. In Canton there has not been a single sale of Cotton Goods of any description.

DAMASKS.—These goods have also found buyers in Hong Kong to the extent of 550 pieces, quotations remaining much as before.

CHINTZES AND HANDKERCHIEFS.—The sales of Chintzes during the past fortnight are reported at 1,200 pieces, but there does not appear to have been any enquiry for Handkerchiefs.

RAW COTTON shows a decline in value to the extent of about 50 cents per picul during the past fortnight. The business done in the staple has been upon a moderate scale, amounting to 4,130 bales settled by Chinese, and some 2,400 bales reported as purchased on Foreign account. No transactions are reported from the Canton market, where Shanghai staple remains at the quotations last given; while Cotton of Ningpo growth has declined about 4 mace per picul.

WOOLLENS, SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS.—These goods have met with good enquiry in Hongkong during the past fortni
ported at about 2,500 pieces; prices, however, continue very low, and notwithstanding the large business done, show but a slight improvement upon the quotations given under date of 10th instant. In Canton, some 240 pieces have found purchasers, prices remaining without change. Long Ells generally show a decline in value of about 10 cents per piece, and the business done in these goods during the past fortnight has been limited to 400 pieces, which have found buyers in Hongkong. Camlets have met with slightly better enquiry since the date of last report, and prices remain much as before quoted; the sales of the fortnight are estimated at 540 pieces. There are not any settlements to report from Canton. Lastings.—200 pieces of Lastings have been sold in Hongkong at about the quotations given in last report. Blankets have again met with a fair amount of enquiry, and have been sold to the extent of 450 pairs.

METALS.—IRON, FLAT, &c.—The sales of Iron in Hong Kong during the past fortnight are reported at 840 piculs of Nail Rod, and 265 piculs of Iron Wire. Prices for the most part have a downward tendency, and our quotations in the present report are generally about 5 cents per picul lower than those given under date of 10th instant. In Canton, where prices remain steady, the transactions which have taken place during the fortnight amount to 500 piculs of Nail Rod, 600 piculs of Flat Bar, and 700 piculs of Hoop. Lead again shows a decline in value in the Hong Kong market, with a moderate amount of business doing, estimated at about 1,000 piculs for the fortnight. In Canton, where prices remain tolerably steady, the sales since the date of our last report amount to 2,350 piculs. Tin has found purchasers in this colony to the extent of 658 slabs, which have been taken at about the rates previously current. Tin Plates show a decline in value of about 10 cents per box, with a business limited to 200 boxes sold in this colony during the fortnight. Steel remains without enquiry.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 2d. to 6s. 2¼d.	6s. 2d. to 6s. 3d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent. and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At JAPAN.—From Amsterdam: Aug. 29, Maria Catharine.

At KANAGAWA.—From London: Sept. 4, Sea Witch.

At HANKOW.—None.

At SHANGHAI.—From Liverpool: Sept. 7, Glenhuntly. From Newcastle: 14, Harvest Home; 17, Electra. From Sunderland: 17, Zodiac, Alexandra. From New York: 3, Henry Harbeck.

At FOO-CHOW.—None.

At AMOY.—None.

At HONG KONG.—From London: Sept. 15, Stuart Wortley; 17, Laurel. From Liverpool: 10, Brilliant; 17, Falcon. From Cardiff: 20, Cutwater. From Sunderland: Standard. From New York: 17, Orient.

At MANILO.—None.

At SINGAPORE.—From London: Sept. 27, Lucknow. From Liverpool: 19, Electric; 27, John Paul; 29, Hilander, Kwangtung (Chinese steamer). From Glasgow: 27, Claymore. From New York: 26, Caroline. From Boston: Pearl. From Hamburg: 23, Catherina. From Antwerp: Oct. 4, Rosa.

At BANGKOK.—From London: Sept. 23, Lode Star.

At PENANG.—From London: Teesdale.

DEPARTURES.

From JAPAN.—Sept. 3, from Kanagawa, for London, Medina.

From SHANGHAI.—For London: Sept. 1, Solent; 2, Jubilee; 12, Moneta. Reindeer; 14, Sovereign of India. For Liverpool: 3, Cordova; 8, Allandale.

From FOO-CHOW.—For London: Naomi, Prince Alfred. For New York: White Eagle.

From HONG KONG and CANTON.—For London: Sept. 15, John Lidgett; 18, Tamana. For Liverpool: 15, Beautiful Star. For New York: 12, Agincourt.

From SINGAPORE.—For London: Sept. 30, Andromeda.

From BANGKOK.—None.

From PENANG.—For London: Sept. 24, John Masterman. For Falmouth: 10, John Land; 11, Schlosser.

LOADING.

At JAPAN.—For London: Cambridge, Broadwater, Esperanza, J. C. Munro.

At SHANGHAI.—For London: Clarendon, Edith, Gauntlet, Ironside, Jas. Vinnicombe, Julia, King Arthur, Lorton, Queen of Nations, Sarah Emma, Siam, Thomas, S. Stowe, Rock City. For Liverpool: Palmyra. For New York: Claro Babuyan.

At FOO-CHOW.—For London: Bucton Castle, Janet Mitchell.

At HONG KONG AND CANTON.—For London: Dwina, Mary Ann Wilson. For Hamburg: Catherine.

At MANILA.—For London: Die Prusse, Minden, Pelicano. For Liverpool: Belvedere. For Falmouth: Amanda, Maggie Lorder. For New York: Winged Racer.

At SINGAPORE.—For London: Avalanche, Latona, Arthur, Peter Symons, Maori. For Liverpool: Oasis, Morning Star. For Bordeaux: Salazes, Frehel. For New York: Caroline. For Boston: Pearl.

At BANGKOK.—None.

At PENANG.—For London: Daylight. For New York: Odessa, Rocket.

FREIGHTS AND CHARTERS.

JAPAN.

Yokohama to England: Silk, £6; tea, £4 and £4. 10s.; cotton, £4. To Shanghai, $4 to $5 per ton measurement.

HANKOW.

To Shanghai, 3 taels per ton of 40 feet.

SHANGHAI.

The demand for tonnage is somewhat better; rates, however, remain about the same, viz., £3 for tea, £3. 5s. for cotton, and £4 for silk.

FOO-CHOW.

To London, £4. 10s. per ton 50 cubic feet; America, £3. 10s. per ton of 40 cubic feet.

HONG KONG.

Rates continue low, especially for coast charters. The berth is fully occupied for Great Britain at £3 to £3. 10s. The following are some of the settlements:—Catherine, Danish brig (238 tons), Whampoa to Hamburg, at £3. 10s. per ton; Ceres, Hamburg barque, Whampoa to Shanghai, at 35 cents per picul; Dwina, Russian barque (250 tons), at £3. 10s.; Eleanor, British barque (275 tons), to Liverpool with cotton, £3. 10s.; Gleam, British barque (291 tons), to Chinhai, 27½ cents per picul; Julie, French ship (562 tons), to Bangkok and back, at 45 cents per picul.

Digitized by Google

MANILA.

£3. 10s. to £4 to Great Britain for hemp. No sugar transactions have taken place.

SINGAPORE.

The demand for vessels of suitable sizes continues good. The following are the rates:—Tin, £3; sago, in boxes, £3. 15s.; sago flour, £3. 15s.; gambier, in bales, £3. 5s.; sugar, £3. 10s.; black pepper, £3. 15s. per ton of 16 cwt.; coffee, £3. 15s per ton of 18 cwt.; hides and horns, £3. 15s. per ton of 16 cwt.; gutta percha, £3. 15s. per ton of 20 cwt.; measurement goods, £3. 15s. of 50 cubic feet.

BANGKOK.

To Hong Kong, 45 cents per picul; to Shanghai, 75 cents per picul.

PENANG.

Nothing offering. Nominal rates are £3. 5s. for dead weight, and £4 for light freight.

PASSED STRAITS OF SUNDA.

From England and Continent, to China, &c.—15th Sept.: Cressy; from London to Shanghai; 16: Musquito, Cardiff to Shanghai; Marquis of Argyle, London to Shanghai; 17: Charlotte, Marseilles for Hong Kong; 19: Oliver Cromwell, Newcastle to Shanghai; 20; Aldebaran, Hamburg to Shanghai; 22: Sea Bird, Sunderland to Hong Kong; 24: Sir Robert Peel, Amsterdam to Singapore; Herald, from Sunderland to Hong Kong; 25: Ben Nevis, Sunderland to Shanghai; from United States, &c., to China · None. From China, &c., to England and Continent.—Sept. 10: William Simpson, from Batavia to London; 13: Tigris, Singapore to Liverpool; July 14: Isly, Batavia to Nantes; 15: Sawely Cludow, Singapore to London; 17: Jura, Hong Kong to Liverpool; 19: Prince Alfred, Singapore to London. From China, &c., to United States, &c.—Sept. 11: Panama, Hong Kong to New York; 21: Sumatra, Manila to New York; Antonia Terry, Manila to New York.

CASUALTIES.

JAPAN.

The Lucy E. Ashby, from Shanghai for San Francisco, *via* Yokohama, put into Nagasaki dismasted, and in a damaged state, and would probably be condemned.

The barque Barracouta has been lost on Quelpart Island in about lat. 32. 49 N., and long. 126.7 E. The Barracouta experienced very heavy weather shortly after leaving Hakodadi, and was compelled to lay to under her main spencer and foretopmast sail. A strong current drifted her on a rock, on which she struck heavily three times. She then drifted clear, bnt began to fill so rapidly that it was found necessary to take to the boats; and all on board, with the exception of the carpenter and a Chinese passenger, succeeded in reaching the shore.

The St. Theodoisus, Amoor River steamer, about the safety of which fears were entertained, has arrived in Nagasaki.

HONG KONG.

The Claramont, from Manila, bound to Sidney; the Reindeer, from Shanghai, bound to London; the A. O. Anderson, and Kusrovie, from here, bound North, have put back disabled—many more are looked for.

The British ship Catherine Glen left Hong Kong on the 27th Aug., about midnight. Wind E. N E., bar. 29 60. When fifteen miles from the Ladrones had squally weather, with rain, thunder, and lightning. At noon of 29th, experienced a strong gale—all light sails were taken in. At one a.m. on 30th, relieving tackles for rudder carried away, damaging the wheel; ship at this time under close reefs, and labouring heavily in a turbulent sea. At a quarter after three bar. 60.29., ship under bare poles, wind N. W., pumps dry, the mainmast broke off about eight feet below the top and shortly after again close by the deck, about three minutes after that mizen mast went. Sounded the pumps, found about three feet of water in the well, but the ship was rolling so heavily that it was difficu't to ascertain correctly. The Lascar crew were with difficulty induced to assist in clearing away the wreck. Found that the falling of mainmast had damaged three of the ships pumps, the remaining one was also rendered useless, in consequence of the fly wheel being bent. Aug. 31st, at 9 a.m., bar 29·20. Wind in violent squalls from S.S. W.; the foremast, the only spar standing was partially secured by swiftering in the rigging; however, at seven a.m. it went over the side also, taking with it the jib boom; these spars were a long time thumping under the ships bows in consequence of the difficulty in severing the wire jib stay. Every boat, hencoop, and the rest of the movable articles on deck were broken up or swept off the deck by this time. Cabin bulkheads all knocked down and everything in the 'tween decks knocking about in the greatest confusion'; at daylight found the rudder and part of the stern post had gone. At p.m. wind more moderate, sea tremendous, ship leaking, pumps kept constantly going. Midnight spoke the Alexine, who asked if assistance was required; but as the ship was driving towards Hong Kong at the rate of from forty to fifty miles a day, and as it was concluded that the vessel would reach that port in four or five days, assistance was refused. At daylight, on the 1st of September, found that a portion of the bow was stove in, and the starboard side greatly damaged; ship soon got a list to starboard and began settling down by the head. September 2nd.—Wind easterly; fine weather, strong current setting the ship W. S. W. Ship settling more by the head, provisions all lost, every probability of the ship going down. resolved to abandon, if a chance occurred. Soon after a vessel hove in sight. It was the Kate Howe, from Hong Kong, bound to Singapore. The C. Glen was then abandoned in lat. 19.20 S. long. 11.21. 30 E., and the crew received on board the K. Howe, where they met the greatest kindness from Capt. Fuller, his officers and crew.

The *Friend of China* reports the British ship Electra from Newcastle, N. S. W., with coals, on her way here from Woonsung, has made another Lord Lyndhurst obstruction in the river; in a word, she is sunk outright, we are told.

COMMERCIAL POSTSCRIPT.

SILK.—Messrs. Waithman and Co.'s circular states:—Our market during the fortnight has been quiet, though at one moment there seemed to be a little more inquiry, which, however, was checked by the sudden advance of the Bank rate; still importers continue to be firm holders, and our quotations show little or no alteration from those of last mail. Deliveries from 31st October to 7th November inclusive:—China, 697 bales; Japan, 442 bales; total, 1,139 bales.

According to a circular of Messrs. Arles Dufour and Co., the silk market of Lyons during the past month has been affected by unfavourable reports from New York, combined with the unsettled state of politics in Europe, and the growing tightness of the money market. Prices, however, have experienced no material change, and those of Asiatic silk even present a fresh advance, owing to its high cost, as well as to the short supply resulting from a bad crop in China, and the chances of arrivals from Japan being cut off for some time. Considering the large decrease in the American consumption, the fact that the total export of silk goods from France has experienced a rapid augmentation is regarded as highly satisfactory. The value of these exports during the first nine months of the present year has been £11,800,000, against £10,720,000 in the corresponding period of 1862, and £9,120,000 in 1861.

ARRIVALS NOT INCLUDED IN THE TABLES.—Nov. 9, at Liverpool, from Hong Kong, Yuca; 4, at Bremen, from Rangoon, Paula; 9, at Deal, from Shanghai, Antipodes; 10, at Queenstown, from Akyab, Juventa; 8, off Dungeness, from Batavia, Caterina, Minister van Hall; 11, at Texel, from Batavia, Catherine; 6, off Dungeness from Batavia, Hermina, Maria Elizabeth; 10, at Falmouth, from Rangoon, Norway; at Liverpool, from Shanghai, Empress of India; 11, at Deal, from Foo-Chow-Foo, Corriemulzie; 11, off Queenstown, from Maulmein, Volunteer; 11, at Liverpool, from Hong Kong, Flatworth; 12, at Queenstown, from Maulmain, John Sydney; at Deal, from Shanghai, Vigil; at Falmouth, from Shanghai, Raphael; 8, at Bremen, from Akyab, Santee; 13, at Falmouth, from Maulmain, Araminta; 12, at Liverpool, from Akyab, Margaret; 13, at Deal, from Hong Kong, Chrysolite; from Singapore, Ellenborough; at Falmouth, from Akyab, Collingwood; 14, from Bassein, John O. Baker; 13, at Liverpool, from Manila, Areta; from Hong Kong, Invincible; 14, at Deal, from Japan, Copernicus; from Shanghai, Aerolite; at Liverpool, from Shanghai, Ophir; Oct. 31, at New York, from Shanghai, Mary and Louisa; Nov. 3, from Canton and Hong Kong, Candace; 16, at London, from Foo-Chow-Foo, Chanticleer; from Singapore, Hurry Puddemsey; from Canton, Banian; 15, at Falmouth, from Rangoon, Lone Star; from Bassein, Ida.

DEPARTURES.—Nov. 6, from Cardiff for Hong Kong, Echo; for Singapore, Carita; 7, from Shields for Batavia, Petronella; 9, from London for Hong Kong and Canton, Flying Spur; 10, from Liverpool for Singapore and Columbia River, Liriope. From New York, Oct. 8, Pyramid for Shanghai; Oct. 13, Benefactress for Hong Kong; Nov. 6, from Deal for Sourabaya, Grondovet; 9, from Swansea for Shanghai, Courier; for Singapore, Alida; 8, from Cardiff for Hong Kong, Marco Polo; 9, from off New Haven for Singapore, Auguste and Meline; 10, from Deal for Batavia, Graf Dirk III.; 7, from Cardiff for Hong Kong, Jupiter; 10, from Shields to Sourabaya, Koophandel; 9, from Sunderland for Shanghai, Bride of the Seas; from Deal for Shanghai, Khantai; 12, from Portland for Singapore, Albertina; 13, from London for Hakodadi, Ocean Gem; 10, from off Mount's Bay for Hong Kong, Atalante; 11, from Cardiff for Singapore, Vooruit, Elizabeth; 13, from Queenstown for Singapore, Fortitude; Oct. 12, from Callas for Hong Kong, Lima; Nov. 13, from Newport for Shanghai, Canvass Back; for Hong Kong, Isabella; 12, from Cardiff for Shanghai, John Stanton; 13, from Liverpool for Singapore, Athelstan; 11, from Hamburg for Japan, Blairrongre; 14, from London, for Singapore and Penang, Ferozepore; from Glasgow for Batavia, Samarang and Sourabaya, Alexander; for Singapore, Bothwell Castle.

LAID ON.—At London, for Singapore, Bonnie Lassie. At Liverpool for Shanghai, Caractacus, Alice. At London, for Shanghai, Chrysolite; for Hong Kong, Seawfell; for Hong Kong and Canton, Glenaros; for Nagasaki and Kanagawa, Mountain Ash; for Singapore, Valdivia.

Neither the West Derby nor the Caroline Coventry, both from Shanghai with troops, have as yet been reported.

SPOKEN.—Anna Maria, Amsterdam to Japan, Sept. 2, 2 N., 25 W.; Nederland, Amsterdam to Batavia, Sept. 17, 1 S., 22 W.; Minerva, Batavia to Middelburg, Sept. 17, off Prince's Island; Julie, Padang to Rotterdam, Sept. 28, 4 S., 19 W.; Milbrook (barq.), Shields to Shanghai, Oct. 2, 6 N., 25 W.; Ægean, Cardiff to Shanghai, Sept. 27, 6 S., 23 W.; Maria Magdalene, Rotterdam to Padang, Oct. 27, 47 N., 9 W.; West Derby, Shanghai to Portsmouth, July 10, 18 N., 130 E.; Sharpshooter, Liverpool to Singapore, Oct. 13, 7 N., 21 W.; Port Durand (French ship), Toulon to China, Oct. 2, 15 S., 33 W.; Humboldt, Macas to Havre, 82 days out, Sept. 8; Dewa Gunghadur, Singapore to London, Sept. 11, 29 S., 42 E.; Ægidia and Paulina (Dutch ship), Batavia to Rotterdam, Sept. 17, 32 S., 31 E.; Bavarian ship, Hong Kong to London, Sept. 29, 31 S., 13 E.; Hurry Puddemsey, Singapore to London; Dunnikier, Shanghai to Montreal, Sept. 10, 27 S., 5 E.; Admiral Piet Hein (Dutch barq.), Amsterdam to Batavia, Oct. 4, 7 N., 25 W.; Ary Sheffer, Batavia to Rotterdam, Nov. 6, 48 N., 18 W.; Hermelia (barq.), Manila to Falmouth, Sept. 3, 25 S., 53 E.; Sliedrecht, Batavia to Amsterdam, Oct. 16, 11 S., 11 W.

The Admiralty have invited tenders for the conveyance from the River Thames to Shanghai of 5 tons heavy ordnance, 115 tons loose shells, and 10 tons shells in boxes; also for 39 tons light measurement stores, and 42 tons gunpowder and combustibles.

At St. HELENA.—Sept. 30, Caribbean, Winchester, from Manila, and sailed, Oct. 1, for London; Oct. 2, Governor-General, Shelford, from Manila, and sailed, 3, for London: 5, Zephyr, Smith, from Foo-chow-Foo; 6, West Derby, Sergent, from Shanghai.

DOVER, Nov. 12.—The Petronella, Shootman, bound for Batavia, has arrived off here to-day with damage, having been in collision with a brig, which was sunk.

GUERNSEY, Nov. 12.—The Khankai, of Dundee, from the Tyne for China, has been towed in here to day by the Viborg, steamer, having been dismasted off the island on the 10th.

BRISTOL, Nov. 13.—The John Stanton, J. Johns, from Cardiff to Shanghai, with coals, has been towed here leaky, and will discharge and dock, having grounded on the bank outside Cardiff docks.

OVERLAND TRADE WITH THE WEST OF CHINA, FROM THE PORT OF RANGOON.

Memorials in favour of this trade approach to the inland West of China, continue, we are most gratified to say, to be sent up by the principal commercial bodies of the kingdom to the Prime Minister. The Chambers of Commerce of Bristol, Gloucester, and Halifax, have now come forward. The *Halifax Courier*, October 10th, 1863, and *Leeds Mercury*, of same date, give the following report of the discussion in the Council of the Halifax Chamber on the subject. We congratulate that Chamber on possessing such far-seeing men as Mr. Edward Akroyd, Mr. John Crossley, &c.:—

Yesterday afternoon a meeting of the Council of the Halifax Chamber of Commerce was held; Edward Akroyd, Esq., President, in the chair.

The minutes of the last meeting having been read and confirmed, the Secretary, Mr. Holroyd, read a letter from Captain Richard Sprye and his son, Mr. Reynell H. F. Sprye, dated the 10th of September, 1863, on the Commercial opening of Western Inland China, &c.

"That during the seven years they had devoted themselves to the task of ventilating this peaceful proposition for a new trade with fully 150 millions of people, to the permanent benefit of the manufacturers, merchants, shipowners, and people generally of the United Kingdom and of India, they had printed and extensively circulated six private pamphlets, with four maps—compiled and engraved by themselves, and now had nearly ready for the printer their seventh and they trusted last pamphlet, the map for which was being engraved. In addition, they had printed, for similar private circulation in the manufacturing districts and commercial ports, a succession of single sheets like the three they annexed, containing leading articles on the subject from different influential public journals of England and India. They had also corresponded extensively with Her Majesty's Ministers, and with the ruling authorities in India, including the Lieut.-Governor of British Burmah. In May last they had transmitted to the Halifax Chamber a copy of the text of a Commercial Treaty the King of Burmah had entered into on the 10th November, 1862, with the Viceroy and Governor-General of India; the seventh article of which provided that British merchants should be allowed to settle and to hold lands for the erection of houses of business in any part of the Burmese empire. This gave to British merchants the right of settlement close up to the frontier of Western China on the banks of the Upper Cambogia, and considerably eastwards of a portion of that river, there called Mei-Kong. That stream, at the Burman Shan City of Kiang-Hung, which stood on its right bank at a distance of about 250 miles only from our north-east Pegu frontier, was, during the floods, 1,600 feet wide and 60 deep, and at all seasons navigable for large boats far up *north* into China; while it ran a course of 1,240 miles *south* of Kiang-Hung to the sea, with which it united through the French newly-acquired possessions in Cochin-China, at their fortified port of Saigon, &c."

The Mayor, John Crossley, Esq., stated that Captain Sprye, since his visit, two years ago, to Halifax on this subject, had favoured him with a correspondence; and after perusing it he must say that he really thought it was necessary something decided should be done in the way of obtaining a survey of the country referred to. The Captain showed an extensive general knowledge of it; and having left India impressed with the importance of opening a direct trade across Pegu with the south-west of China from the Port of Rangoon, he had, for several years, given exclusive attention to its advocacy in this country; making it, in fact, the principal object of his life. His letters to him, though long, were very much to the point; and he had also corresponded with numerous persons in almost every part of the world, the better to promote this important project. He had shown that they were virtually excluded from a population which may be counted by its tens and tens of millions, a thriving and enterprising people, producing very many articles—including wool, cotton, silk—which could not find their way into this country for the want of a practicable direct road to the sea. A favourable commercial treaty with Burmah having been negotiated, what was now necessary was that a detailed survey should be made of the country between Rangoon and Kiang-Hung on the Upper Cambogia River, where that stream issues from China; so that it may be seen whether a direct trading communication can be so opened with those many millions of Western Chinese, or not; as if it can be—and Captain Sprye considers it can—he feels certain that it must prove a great and permanent benefit to England and India. He, the Mayor, hoped, therefore, that the Chambers would give the Captain all the support they possibly could, and he would consequently move that a memorial should be sent up to the Government from that Chamber.

Mr. S. Baines felt pleasure in seconding the motion.

The Chairman observed that men like Captain Sprye were by some people considered "bores;" but it was truly a most fortunate thing for the country that there were such travelled men, who persistently submitted to others their ideas on subjects they made their special study, and which were but very imperfectly, and often inaccurately, understood by the generality of persons; as in this case of the West of China, and the country intervening between it and the port of Rangoon. He, the Chairman, believed that our commerce with interior China was yet in its infancy, and he had no doubt that a flourishing trade might be done in numerous articles, which were at present unknown to either country, if only proper routes were opened up between them.

Mr. J. Baines said that the wife of a French traveller in the part of the world being treated of, had given him some cotton grown on the banks of the Cambogia, and it was very much superior to any imported into England, being much more silky. He considered the Mayor should be supported in this matter; and that the Government ought to undertake and carry through such a survey as was required, as they could do it more effectually than private individuals.

The Chairman thought that the request of a survey was a reasonable one, whether the route proved practicable or not. As the Mayor had remarked, their manufactories were now starving for the lack of raw material, and this road would increase their supply. Government would do nothing in the matter, unless it was urged and compelled.

The Mayor observed that large quantities of wool and cotton might be derived from that part of the world when commercially opened up.

Mr. Morris remarked that he did not move a negative. He had merely suggested that in such matters Chambers of Commerce should approach Government only after mature consideration.

The resolution was then put and carried.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 10.

Since last mail the States-General have been busily occupied in examining in detail the different Government Bills brought in for their concurrence, so that the members of both Chambers may be prepared for the debates that will take place at a later period. The only occasion on which they have held their usual public sittings during the fortnight was to take into consideration the Bill—considered as pressing—mentioned in my last letter as emanating from the King personally, and accompanied by a royal missive, asking for a vote of a million florins to build a Parliament House at the Hague, as a votive offering of the Dutch nation in grateful remembrance of their regaining their liberty and independence in 1813. The Second Chamber was the first to discuss it, as it is a money Bill, and passed it with twenty nine votes against nineteen (twenty-four members being absent). The first Chamber passed the Bill by twenty votes to thirteen.

The Colonial Minister having learnt that many shippers of goods of Dutch origin to Netherlands India appear not to be aware of the regulations in force, has called the attention of the mercantile public to the announcement of the Colonial Office published last year in the *Staats Courant* (25th Sept., 1862); it is as follows:—

COLONIAL DEPARTMENT.

Certificates of Dutch Origin or Industry.

"Goods and merchandise cleared outwards in Dutch ports for Netherlands India, and accompanied by a certificate of origin in this country, can only be imported in Netherlands India at the reduced rates of duty, when such certificate is endorsed by the Custom-house at the port of shipment that the goods in question are not exported in bond but from free traffic. Goods exported in bond must be accompanied by a certificate to that effect from the Custom-house authorities at the port of shipment."

Accounts have been received from the Cape announcing the arrival in Simon's Bay of H.N.M. steam corvette *De Heldin*, in forty-four days from Java, to bury the corpse of her commander, Captain-Lieut. Binks, who died on board on the fourteenth day after her departure from Batavia. The funeral took place on the 14th of September, the procession being swelled by the British naval and military authorities at the Cape, and during the whole time minute guns were fired from the corvette. All the flags on the forts and the shipping in the harbour were half-mast high.

The same mail from the Cape announces the arrival there of the Dutch ship *Johanna Elizabeth*, of 639 tons, Capt. Junius, from Batavia to Amsterdam, with fifteen passengers and a cago of sugar and tobacco. Having been dismasted in a gale of wind off Cape Agulhas, she fortunately fell in with the United States steamship *Vanderbilt*, then on the look out for Confederate cruisers and the protection of Federal merchantmen, who took her in tow and brought her into port in safety, for which service Capt. Baldwin, U.S.N., of the *Vanderbilt*, generously declined to receive any recompense. In consequence of this signal act of kindness and humanity, the passengers of the *Johanna Elizabeth* inserted in the *Volksblad* a letter of thanks to Captain Baldwin for his disinterested and important services.

Messrs. Wusde and Hintzen, of this city, have despatched a vessel from hence to Buenos Ayres, to take on board a cargo of horses and mules of the best breed, and convey them to Samarang. As any improvement of the means of land transport in Java is devoutly to be wished for, which will become the more needful to keep up a communication between the stations on the railway, and the towns and villages in their neighbourhood, this spirited undertaking of the above-mentioned firm cannot be sufficiently applauded. The usefulness of mules in tropical climates is duly appreciated in other countries, and there is but little doubt that they will be found equally useful and profitable in Java when once introduced. It appears that the colonists in Australia have of late been turning their attention to the breeding of mules, for which they will, by-and-bye, find a profitable market in Java, without much expense in transporting them by sea, as the vessels from Europe, after landing their passengers and discharging their cargoes in Australian ports,

Digitized by Google

now generally go up to Java in ballast to seek return cargoes, and would be glad to carry up mules at a moderate freight.

The following vessels have been chartered by the Netherlands Trading Company to convey cargoes of coal from Newcastle to Java: *Tweelingen*, Capt. Bakker; *Otto*, Capt. Tresling; and *Hollands Trouw*, Capt. Keuker.

The Rotterdam journals publish the prospectus of the "Netherlands India Gas Company," established at Rotterdam for exploiting the concession granted to Messrs. K. and H. L. Enthoven, of the Hague, for lighting the city of Batavia and its suburbs with gas. The capital is fixed at 3,500,000 florins, in 7,000 shares of 500 florins each, 6,000 of which are already subscribed for, and now the remaining thousand shares are offered to the public at par. The subscription list will be closed on the 9th inst.

The directors of the Netherlands Trading Company give notice that they have resolved to reduce the interest payable on their original bonds to the amount of five million florins, from four to three and a-half per cent. Those bondholders that agree to the conversion are required to send in their original bonds, accompanied by the unpaid coupons, to the company's offices, between the 14th and 31st of December, when they will be exchanged for new bonds bearing the reduced interest as above from the 1st of January, 1864. Those bondholders who object to the above conversion will be paid off at par (1,000 florins for each bond). These bonds bear a very high premium, the market price as quoted by the Stock Exchange in this city being 1,400 florins each, or forty per cent. above par.

During the months of September and October the number of vessels that arrived from the Far East was 28, of which 16 brought cargoes for the Company, and 12 for the private trade. Thirteen discharged at Amsterdam, twelve at Rotterdam, and three at Schiedam. Sixteen came from Batavia, seven from Sourabaya, three from Tjilatjap, and two from Padang. Among other produce they brought 70,186 bags of coffee, and 26,421 kranjangs of sugar.

PERSONAL.—Mr. P. Bondam, municipal architect at Kampen, is appointed one of the engineers for the construction of the railroads in Netherlands India, his service to commence on the 1st of January.

The King has promoted his Naval Aide-de-Camp Extraordinary, Rear-Admiral H. Wipff, to be Vice-Admiral, and the Second Lieutenants, W. F. Cramer and H. van Goens, to be First Lieutenants in the Navy.

Lieutenant-Colonel A. Netscher, formerly of the East India Artillery, now in receipt of a pension, has been decorated with the insignia of the Military Order of Willem, for his valorous conduct in the expedition to Bali in 1848.

Mr. W. Nieuwenhausen, medical officer in the East India Army, is appointed medical officer of the East India Military Asylum at Bronbeck.

Mr. A. J. Wattendorff is designated as successor to Mr. A. Loudon as Secretary-General of Netherlands India.

Mr. W. A. Duvelaar van Campen, officer of the E.I. Civil Service, late Assistant Resident of Saparoca and Haroeko, in the Molucca Islands, now in this country on leave of absence, has been permitted to retire from the service with a pension.

Baron J. L. van Isselmuden, Lieut. R.N., now serving in India, has been permitted to retire from the service.

The following gentlemen have been appointed officers of the E.I. Civil Service:—G. H. Blanken, J. P. Kruyt, H. Visser, A. J. Immink, and F. Mayor—all of the Royal Academy at Delft.

The King has nominated to be Knights of the Military Order of Willem Lieut. J. C. Joekes, R.N., and G. A. van Ewyk, medical officer, R.N., for their gallant conduct in H.M. str. *Retch* during the attack on the pirates off a small island in the Bay of Lobo, on the west coast of Karatelang Island, one of the Talaut group, on the 18th of April, 1862.

Lieutenant H. S. Nederburg, of the Royal Engineers, is transferred with the same rank and seniority to the Engineer Corps of the Army in Netherlands India.

PASSENGERS OUTWARDS.

Per *Christina*, Capt. Remeeus, from Amsterdam, to Sourabaya: Rev. D. van Stede, Messrs. Umbgrove, Soeters, van den Broek, and P. A. Pistorius.

Per *Maria Magdalena*, Capt. Willenbrink, to Padang, Mr. J. Bunge.

Per *Australie*, Capt. Lucas, from Amsterdam to Batavia; Mr. and Mrs. Willenrood, Mr. van den Lingen, Lieut. P. van Blyck, Messrs. J. P. Heeson, K. van der Veen, and A. F. Heyl, medical officers, Lieut. Beyer, Mr. and Miss Niepot, Mr. and Miss Putman, Miss van der Plaat, Miss Machielson, two Messrs. Bosquet, Mr. de Kanter, Mr. J. F. Arnold, Lieut. Levysohn, Mr. de Clercq, Mr. C. J. Blankert, Lieut. J. Lugt, Lieut. J. D. van Lingen, and Lieut. H. R. Beyen.

COMMERCIAL.

COFFEE.—This market is rather inactive, the only sales of any magnitude since last mail being 1,400 bags of Padang, ex *Johann Heinrich*, at 45½ cents, and 1,154 bags of Java, ex *General de Stuers*, at same price, to which may be added about a similar quantity in divers small lots to the trade. There are buyers of bright descriptions at moderate prices, but holders ask such exorbitant rates that business is much restricted. The deliveries in October amounted to 96,273 bags, and the present disposable stocks—to last till the spring sale—are only 182,012 bags.

SUGAR.—The raw article continues in a favourable position, with large sales at successively rising prices. Brown descriptions are now worth 3 fl. above September sale prices, yellow 2 fl. and white 1 to 1½ fl. above the same sale. The transactions amounted to 8,000 kranjangs. A parcel of 761 kr. of Sourabaya, No. 12, has been disposed of by private contract at 34 fl. The company have advertised 21,400 kranjangs and 400 mats of Java for sale on the 21st inst. As refiners demand higher prices for their goods, the business done has been rather limited.

RICE.—There is but little inquiry for rough, and the only transaction reported is 3,815 bags of Java, ex *Vision*, at secret prices by sealed tender. Cleaned grain is also quiet. The harvest has been everywhere so abundant that rice is likely to be neglected.

SPICES are all dull of sale, though prices have undergone no alteration.

HIDES maintain their value, and some sorts are 1 to 2 cents higher. Among the sales are 878 Java ox. Arrived since last mail, per *Provincie Drenthe*, from Batavia, 810 ox and 490 buffalo.

INDIGO.—40 chests have been sold, with a small advance on the prices of the company's last sale.

COCHINILLE is also higher, and several parcels of Java have been taken for exportation.

TOBACCO.—In the expectation of the large sales next week, this article is dull, with a tendency to fall. 2,100 bales have arrived since last report, per *Provincie Drenthe*, from Java. The stock of Java is 15,336 bales.

METALS.—Banca tin continues drooping. A very few lots have been sold at 71 fl. Copper firm; company's fetches 54 fl.

DRUGS, &c.—The company's sale brought some life into the market, and everything was sold flowingly as follows:—41,299 bundles of rattans (1,941 piculs), Banjermassing, 17½ to 20 fl.; Padang, 17 fl.; Koetie, 13½ to 15 fl.; 40 chests getch gitang, 33½ fl.; 42,000 kil. gutta percha, A. A. 203 cents. B. 164 to 173 cents, B.B. 156 to 165 cents, C 101 to 106 cents, D. 101 to 127 cents; 1,001 chests Japan wax—A. 37½ fl., B. 36½ fl., C. 32 fl., D. 32½ to 33½ fl.; 844 bales Japan camphor, five-eights prime, 20 cents, half do., 20 cents; 44 chests nutmeg soap, first quality, 225 fl.; second do., 200 fl.; 20 bottles Java oil of cinnamon, 7 fl. Yesterday and to-day were sold by private contract, 10,995 bundles 848 piculs of rattans, ex *Vision*, at secret prices.

SWITZERLAND.—JAPAN.

Advices have been received from the Swiss Embassy at Yokohama, announcing that the Ambassadors have received a first official visit from one of the chief officers of the Tycoon. The Ambassadors believe that America and Russia are pursuing an ambiguous policy, and exciting the Japanese to resist the other Powers.

Naval and Military.

We are glad to see that Government has acted promptly in endorsing the distinguished services of officers engaged in the late naval attack on Kagosima. The following immediate promotions were gazetted on the 10th inst.:—

Commander Lewis James Moore to be captain;

Lieut. James Augustus Poland to be commander;

Lieut. George Poole to be commander;

Mr. Charles Richard Godfrey, assistant-surgeon, to be surgeon.

The detachments per *Caroline Coventry* and *West Derby* from Shanghai we hope to report in our latest.

The *Army and Navy Gazette* announces that Rear-Admiral Kuper has given the death vacancy so unfortunately placed in his hands by the loss of Captain Josling, to Commander J. H. I. Alexander, of the *Coquette*, to which vessel he has nominated his flag-lieutenant (Arthur G. R. Roe), at the same time advancing him to the rank of Commander (poor Wilmot's vacancy), and the First Lieutenant of the *Euryalus* (James E. Hunter) will do the duty of Commander in the last-named ship. Acting Sub-Lieutenants Henry Morris and Edward Wickham have received the two Lieutenants' commissions, subject of course to the usual regulations; also that Rear-Admiral George St. Vincent King, C.B., will shortly proceed to relieve Rear-Admiral Sir Baldwin W. Walker, K.C.B. Admiral King will hoist his flag on board the *Princess Royal*, 73 guns, 3,129 tons, and 400-horse power. It is generally believed that the new admiral's command will extend along the east coast as far as the Straits of Malacca, and that his head-quarters will either be at Penang or Trincomalee; that Captain Cockburn will hoist a second class commodore's broad pendant; and that Commodore Montresor will very likely remain where he is at present—Bombay. The West Coast of Africa will again very possibly, as in olden times, be placed under the orders of a commodore of the first class. In such a case Commodore Dunlop, C.B., will not be an unlikely officer for so lucrative and important a command. Captain William Gore Jones (1861) has been selected by Rear-Admiral King to be his flag captain. Captain Jones is at present studying at the Royal Naval College, Portsmouth. It is probable that the *Chesapeake* will be selected to succeed the *Narcissus* as the flag-ship at the Cape of Good Hope, the *Chesapeake*, one of the last of the 50 gun sailing frigates converted to screws, not having seen any service for some length of time.

The *Scylla* has completed her repairs and proceeded on the 6th inst. to the China station. The *Pelorus* will follow in a few days. A Court-martial has been held on Mr. Job Annable, assistant engineer, for the bursting of the boiler, which was the cause of her putting back. The gist of the defence was, that it was admitted by the prosecution that the accident must have arisen from the blow off cocks having been opened, or left partially open. The evidence for the defence proved that those cocks had not been meddled with during the prisoner's watch, they must have therefore been suffered to remain partially open from the previous watch. The prisoner did not know this, through Mr. Joseph Irvin, engineer, who kept the previous watch, having taken upon himself to remove the feather of the spanner, whereby the spanner could be taken off without the cock being securely closed, the previous practice having been always for the cock to be securely closed when the spanner was off, the feather being intended to enforce that practice, and the prisoner being unaware of the removal of the feather. A long list of first-class certificates of service

Digitized by Google

were read on behalf of the prisoner, and an excellent character given him by Mr. Dinnen, inspector of machinery afloat at Devonport. The court considered the charge proved, and adjudged the prisoner to be dismissed from his ship, to be placed at the bottom of the list of first-class assistant engineers, and to remain there for three years.

The *Silver Eagle* arrived on 30th October from Shanghai, with Capt. and Brevet Major Govan, Second Capt. Leacock, Lieutenants Yeatman and Harrison, Assist.-Surg. Gulland, M. D., 157 non-commissioned officers and men belonging to the No. 3 of the 13 brigade battery; Lieut. Tibbets, 31st Regiment; Lieut. Sandwith, 29th Foot; and 40 invalids from different corps disembarked at Woolwich. The *Silver Eagle* sailed from Shanghai on the 27th of June; 15 of the invalids who died during the passage were buried at sea. They consisted of 8 men and 1 woman belonging to the 67th Regiment, 1 man of the Royal Engineers, and 5 of he 67th Regiment.

In the discussion carried on respecting the actual attainments of modern artillery, all facts relating to the performances of the Armstrong gun are obtaining great attention, and as that weapon has had some service in China, the reports relating to this service are receiving their due prominence. It is somewhat singular that the Select Committee on Ordnance, appointed by the House of Commons, should not have invited to attend their experiments those officers now in this country who have had the largest experience of the working of this gun in China; not even one artillery officer who served in China was summoned before them. Sir William Armstrong himself testified in March last before the committee, that from the 12-pounders in use in China 4,000 rounds have been fired. Major Hay, R.A., in his report concerning the action of the 12-pounder guns to Brigadier-General Crofton, commanding the Royal Artillery in the Chinese war, said, "Their precision of fire and the actual results obtained by them cannot for a moment be doubted; they were the admiration of all.'

Major Milward, R.A., who commanded a battery of Armstrong guns in China, in his report to General Crofton, wrote:—"An enormous advantage of the gun is the great facility of replacing the ammunition; the old difficulty of being out of one description of ammunition while there may be plenty of another is entirely obviated; a few seconds re-fills a limber box, and the waggons can retire out of fire, only one at a time being required up with the battery—1st. On the subject of ammunition Major Milward has stated that, 'they were only supplied with one kind of projectile, but that they found a great benefit in having only one kind of ammunition in the battery, because they found that in replenishing the ammunition in the field they had simply to bring up any limber or any waggon and empty it into the one they were using, and whenever they put their hands into the limber-box whatever they wanted was at hand.'"

Respecting the destructiveness of the projectile in the last China war, Sir William Armstrong said:—"I will first speak of the destructive effect of the gun when used in the open field as a field-gun. In an action near Pekin a body of about 500 Tartar cavalry halted at a distance of about 1,500 yards from some of our guns, where they imagined themselves to be safe. Sir Hope Grant proposed to try the effect of one shot at them, and he accordingly ordered one gun to be fired. The projectile, which was the ordinary segment shell, containing the usual concussion fuze, touched the ground a few yards in front of the Tartars, and burst in the usual manner. The Tartars immediately fled, and left on the ground thirteen dead men and three disabled horses, all destroyed by that one shell, which was the only one fired. I state this on the authority of Captain Richard Harrison, of the Royal Engineers, who was standing close by when the shot was fired. I further state, on the authority of Major Milward, who commanded a battery of those guns in China, that he used the guns with very great effect in the open field at ranges varying from 450 to 2,000 yards. He states that the damaging effect of the shells was very great, that the Tartar horses are very thick horses, and that at 1,200 yards he found that the segments had gone completely through them, and left a mark on the off side of the horse just as if cut out with a knife, as clean as on the near side. The shells and concussion fuzes, he asserts, acted admirably; nothing could be better than the bursting of the shells. He found great benefit in the concussion fuzes from the circumstance that he could pick up the range with great facility because the place where the shell burst was distinctly seen. Next, as to the effect of the guns against Tartar gunners, protected by earthworks, Captain Harrison has stated that at a large fortified village called Tangku there were 16 or 18 gunners of the Tartars killed at one gun. He says that the shells were very destructive against the men behind the parapet. He saw where the shells struck the parapet, and the men behind were all killed by the Armstrong shell. He says the Armstrong guns were considered terribly effective, and that at the taking of the Taku forts they saved a great deal of loss on our side, and that there was an immense number killed by the Armstrong guns. Captain Harrison, who says this, states that he saw every shot fired by the Armstrong guns against forts in China. I further state on the authority of Major Milward, that his battery fired into the Taku forts, at the distance of 2 000 yards, and that it was afterwards ascertained that the shell had produced very great effect. All these effects were produced by ammunition of the oldest patterns, which, as may easily be supposed, were very far from perfect. The bursting charges of the shells proved insufficient to break them thoroughly up, and both fuzes and bursters had suffered great deterioration by exposure to damp. The time fuzes, in fact, had been completely spoiled. There cannot, therefore, be a doubt that the effects obtained in that war would fall greatly short of what would now be realised by the ammunition in its improved form. No such effects as those have ever been claimed for the French artillery, and, in fact, it is quite impossible to suppose that ammunition such as they used, even if their guns had been equally powerful, was capable of producing comparable effects." Dr. Muir, C.B., Inspector-General, principal medical officer of the expeditionary army in China, states that—"The severity of the wounds made by Armstrong shell was remarked upon by every medical officer. They were positively frightful. The effects of this destructive weapon had evidently produced a panic, as several dead Chinese soldiers were found tied to their guns by their plaited tails of hair, as a punishment, doubtless, for attempting to escape." The Committee upon this and other evidence reported in favour of the gun as the most destructive missile known; but a strong opposition has now set in to its enjoying a monopoly of Government favour.

Literature.

A Personal Narrative of Thirteen Years' Service amongst the Wild Tribes of Khondistan, for the Suppression of Human Sacrifice, by Major-General JOHN CAMPBELL, C.B., appears from the press of Messrs. Hurst and Blackett. This work has been looked forward to both in political and literary circles. Its novel, strange, and exciting scenes supply every element of interest. In dealing with these wild tribes, dwelling in dense forests, the General had a novel task, in which he acquitted himself with tact and skill. In his first crusade against a Meriah sacrifice, he was accompanied by irregular troops raised by himself for that special purpose. In the illustrations, some of the victims saved are sketched. The record of his hazardous adventures and diplomatic undertakings are interwoven with vivid delineations of the character, social habits, and modes of life of the Khonds, all stamped with singular originality. The work, which is unique, is besides a valuable contribution to geographic and geological science. Our readers will probably recognise the author as having seen active service in China from 1842 to the close of the first China war, for his gallant conduct in which he received the Order of the Bath.

A sixth edition of *Tables for Calculating Exchanges between England, India, and China in Sterling Rupees and Dollars*, by HENRY RUTTER, Esq., late Agent of the Commercial Bank of India, Hong Kong, has been issued by Mr. Effingham Wilson. The journal-book style of arrangement, with side finger-references, is adopted, so that the table giving the exchange required may be found in an instant. The tabulated sums have a wide range, so as to meet every requirement. Arbitrated rates of exchange and prices of bullion are further adapted to Shanghai rates. A valuable portion of the work is that affording a guide to the negotiation of short-sighted bills and French bills in India and China.

The Chinese and Japanese Repository for November contains the lecture of Professor Rosney, of the Imperial Oriental School in Paris, and who remarks that "Japanese literature has preserved for us many vestiges of the language spread over China when the two nations first entered into communication with each other." Chinese Fables of Beasts and Birds are given by Professor Rost. The notice of Cochin China is peculiarly opportune at the present time.—*British Enterprise beyond the Seas; or, the Planting of our Colonies*, by J. H. FYFE, Esq., and published by Messrs Nelson and Sons, is an illustrated volume for youth. The text details in vivid historical recitals in which the great actors are brought into the foreground, the means by which British valour and daring not only entended British sway, but laid the foundationsof future empires. The work is written in an attractive vein, and the striking events narrated undergo effective treatment.—"Mr. Chinese Secretary Wade, who is now in England," says the *Chinese and Japanese Repository*, "has the intention of publishing, as soon as possible, some works of an elementary nature on the Chinese language. From Mr. Wade's long experience and study, coupled with the opportunities he has had by his residence in Peking, we may expect some very valuable matter from his pen.—Mr. Murray announces as in the press, *Narrative of Travels and Discoveries in the Kingdoms of Siam, Gambogia, and Leo*, by the late HENRY MOUHOT.

The Genuineness of the Book of Daniel, Asserted on Evidence External and Internal; by J. CONWAY WALTER, B.A. London: Longman and Co. This is a scholarly and logical examination of the text, in which much critical sagacity is displayed, more especially in the collating of dates and occurrences corroborative of the truth of this prophetic narrative, and deduction of inferences from its style and other features; a large amount of historic learning, corroborating its genuineness, is brought to bear in the form of extraneous evidence. A most interesting portion is where the writer elucidates and vindicates the predictive element in divine revelation.—Messrs. Houlston and Wright publish an entertaining work appealing to the love of the marvellous, and verging ever and anon on the supernatural. It is entitled *Nature's Secrets, or Psychometric Researches;* by WILLIAM DENTON, Lecturer on Geology, Boston, U.S., and Mrs. ELIZABETH DENTON; edited, with an introduction, by a Clergyman of the Church of England.—*The Heavens; a Guide to Astronomical Science*, by Dr. ROBERT JAMES MANN, is published by Messrs. Jarrold and Son. The method of treatment is, after a brief statement of each axiom or truth in the science, to furnish the demonstrations, explanations, and illustrations. Astronomy is practically applied in all its branches.

The London & China Telegraph.

LONDON, MONDAY, NOV. 16, 1863.

ATTACK ON KAGOSIMA—WHAT NEXT?

THE news from Japan is rendered unsatisfactory, chiefly by its undecisiveness. The resistance displayed by the Prince of Satsuma, the active hostilities of the almost equally powerful Daimio, who commands the entrance to the Inland Sea, and who has latterly erected forts on the southern shore, cannot fail to be strengthened by the late apparent success on the departure of Admiral KUPER's fleet from Kagosima Bay before the batteries were fully reduced. But the more set, positive and determined hostility is a necessary phase in what the French would term "the development of the question." Admitting that we have failed in the first endeavour at reparation, we yet know very well what course to pursue. Japanese strategy, whether in diplomacy or war, can no longer baffle us. The more serious the hostility displayed, the more imperative it becomes to take ample security for the future against the arbitrary violation of treaty rights. With singular moderation we accepted the attack on the Inland Sea as that of a Prince refusing to be controlled by the Tycoon, and went direct to Satsuma for the balance of our demand, but to deal summarily with a gigantic and organised conspiracy to exclude us from trade, and compel a retreat from the settlements we must again revert to the Tycoon as the central authority, regard the sea ports as under his command, and every hostile gun fired as an act of war on the part of the nation. We have already refused to recognise a dual Government, and now it has virtually become hydra-headed. To the Tycoon, therefore, we must look for the influence within to operate in our favour, anticipating it less from any goodwill than from the necessity of keeping his rule intact. It will take time to operate favourably on the people, whose resentment the Daimios are using every possible means to incite. Such a thing as public opinion does not exist in Japan. With no middle class, with the people virtually enslaved, and divided and subdivided into numberless communities, under the strictest official espionage, their minds fixed in immemorial traditions, and always debarred from direct intercourse with the outer world, we can expect from them little sentiment in our favour, little more indeed than unfeigned astonishment at the display of our power and the pertinacity of our purpose. It is impossible they can do otherwise than misapprehend the motives to a formal resistance to an Imperial decree.

What, then, are we to hope in relation to the increase of a trade now virtually suspended? No Government in the world, not even the Dutch, in maintaining their monopolies in the Spice Islands, have ever held local trade so completely under control, and trade in Japan is not a thing to be forced. Whatever the nature of the success of naval and military operations that we and other nations obtain, we must, above all things, secure free access to Osaco, to which the port of Hiogo holds much the same relation as Yokohama to Yedo. At Osaco reside the true Japanese merchants who have carried on commerce through their agents at Yokohama, and there the people have attained to an independence of spirit, and freedom of action, which not only distinguishes them from other people in Japan, but renders them the mainstay of the Tycoon's power. They have thus been enabled to enlarge their privileges, from time to time, and to resist encroachment. When we come into direct contact with them, a change will come over the spirit of our trade; the large riverine communication connecting with this quarter will distribute wide not only our goods, but our ideas. Trade, and not dominion, is our aim, and it is impossible that the Daimios, with all their power, can long stand out against the influences that have generated Western progress.

THE BRITISH ATTACK ON KAGOSIMA.

The correspondence between Earl RUSSELL, Colonel NEALE and Admiral KUPER, has been published in the *London Gazette* and will be found in our SUPPLEMENT. Both Colonel NEALE and Admiral KUPER have been severely handled by a large portion of the press in this country for the destruction of the houses of the inhabitants of Kagosima. They maintain that this act was as barbarous as the murder of Mr. RICHARDSON. For our own part, we can appreciate the great difficulties under which Admiral KUPER acted. Had he possessed the means of landing a force to complete the destruction of the PRINCE's batteries and arsenals, we are quite sure the town would have been spared; but it should be manifest that he could not impress the Japanese with any degree of respect for our power had he confined his fire to the unimpressible batteries. It is always easy to point out what should have been done after the event, but not so while in action in a gale of wind. In our correspondent's letter, which will be found in another column, it will be seen that the miscarriage of the expedition is entirely owing to the extraordinary conduct of General BROWN in refusing to grant the troops requested by Colonel NEALE and Admiral KUPER, and we can scarcely doubt but that General BROWN's recal goes out by this mail.

WHY MR. RICHARDSON WAS KILLED.

A CORRESPONDENT, dating from Yokohama, in a letter which we published in our last issue of the *London and China Telegraph*, attributes the death of poor Mr. RICHARDSON to a rashness which is characteristic of Englishmen in a foreign country. In the hurry of getting to press we had not time to differ from the opinions therein expressed. We have throughout this melancholy affair maintained that Mr. RICHARDSON had a right to be on the road, and that he and his party did all they could be expected to do, in drawing to one side to allow Prince SATSUMA and his retainers to pass. No such exception is made in the Treaty, and the barbarous attack fully merited the punishment which Earl RUSSELL directed should be meted out to the perpetrators. We have also been since assured by Mr. BORRODAILE, who is at present in this country, that his wife did receive a cut on the head, severing the hair, which is visible to this day; and we are further assured that Mr. RICHARDSON did not remain in Yokohama at the request of Mrs. BORRODAILE, but had engaged to stay at the request of many residents there to take part in the races which were to come off a week later. *The Times* in a leading article, which will be found in another column, having noticed the statements made in our journal, we addressed the following letter to the Editor:—

To the Editor of *The Times*.

SIR,—As your article of this day, on the death of Mr. Richardson in Japan, and the extract you have inserted from our journal, are calculated to mislead our readers as to our views on the subject, I beg to point out that the extract is from a correspondent's letter (which I enclose you in full). Our own view of the case was thus given at the time of the occurrence:—

"The murder of Mr. Richardson, although the news received by telegraph is not corroborated, and we have no proof that it was perpetrated from political motives, adds one more fatal testimony to the many we possessed before of the virulent and persistent opposition maintained by the Conservative party against the intrusion of Europeans. Indeed, it is evident that the Japanese wish to confine us as much as possible within the limits accorded to us by treaty, and even within those limits Europeans may be said to live in daily peril of their lives.

"Our merchants in Yokohama are doubtless brave men, as well as able men of business. Men, indeed, of another and feebler calibre have no right to be in Japan at all; yet they are traders by profession, and not heroes, and it must be extremely detrimental to the prosperous conduct of their affairs to feel that at any moment they may fall victims to the sharp swords of hired assassins.

"It is to be hoped that nothing less will be demanded by England and other Powers than the throwing open the entire country to foreign trade. Submission to restrictions such as the Japanese imposed on the Loo-Choo islanders, when these were first brought into contact with commercial nations, will never do. Experience has shown that the people are in favour of an extension of foreign connection, and that a great gulf, bridged over by polite and servile forms, lies between them and those Japanese Princes and officials whose rapacity has made them both hated and feared."—I am, Sir, your obedient servant,

EDITOR "LONDON AND CHINA TELEGRAPH."

12, George-yard, Lombard-street, November 4th, 1863.

THE FRENCH IN COCHIN CHINA.

(FROM OUR CORRESPONDENT.)

At length the Ambassadors of Tu-Duc have been received by the Emperor and Empress. They were present at the opening of the Legislative Session, and might have had the pleasure of hearing, had they understood French, that Louis Napoleon was compelled to go to war with the Cochin Chinese

Digitized by Google

in order to increase the commerce of France, and to make head against the vast possessions of England in Indo-Chine. They would have remembered, perhaps, that when that expedition was undertaken, the world was told, on authority, that France and Spain went to Saigon simply to punish the Annamites for their cruelties towards the Christians, and that neither one nor the other would appropriate to itself a foot of territory, and that they did not go to colonise! However, it is the old story; they went, they saw, they, or at any rate one of them, stopped, and means to remain. Consolation is, however, contained in another paragraph, in which Louis Napoleon promises that France will develop the resources of that immense country, and to civilise it by commerce. What more can the Annamites desire? Surely the Ambassadors of Tu-Duc must be delighted, and go home singing the praises of France and her Emperor in joyous tones! Strange to say, however, rumour does not bear out this inference; the Ambassadors are to leave immediately for Madrid, in charge of Captain Aubaret, there to deliver their presents and make their genuflections as they did the other day at the Tuileries, and report says that they feel very acutely the kindness and the amount of honour and attention which has been paid them by the Government, and that they leave France with hearts overloaded with gratitude, or some other feeling not quite of the same character.

We shall doubtless hear a good deal more about Cochin-China and that neighbourhood when Tu-Duc's emissaries have departed; but the news that is already afloat sketches out the plan of future operations pretty clearly. It has been declared in all the ministerial papers, even while these Eastern envoys were waiting the pleasure of the Emperor in his own capital, that a deep-laid plot is being hatched against the French at Hue, and that even the sacrifice of the Ambassadors would not prevent the designs of Tu-Duc and his advisers being carried into effect; and we find the reflection of this in such passages as the following, which I translate, verbatim, from a Paris journal under my hand:—"We could not, at the present moment, without being the first to violate treaties, claim the whole of the Western as well as the Northern provinces of Annam; but the treason which is ripening will, in a short time, furnish us with a fitting occasion, and then it will be impossible for the Government to let slip the opportunity of endowing France with one of the richest jewels of her crown." The accuracy of the information upon which this threat of further conquest is based is not supported by any kind of proofs. Many arguments are put forth in support of these views, all being derived from that source, which here is supposed or pretended to be characteristic of English policy, namely, self-interest. We nowhere find, in connection with this subject, any of those grand ideas which are made to play so prominent a part in the policy of France, as painted, like the famous sketches of Garvani and others by herself. In talking of the Far-East, French writers, whether Imperial or Democratic, content themselves with the arguments of ordinary mortals, and in so doing they certainly do not lose more in dramatic effect than they gain on the side of sincerity and common sense. They tell us simply, as Louis Napoleon told us in his speech, that France is not powerful enough in China; they enumerate the possessions of Spain, Holland, and Russia, and refer to those of Great Britain as being too numerous for cataloguing, and add, that now that France has obtained a footing in China, it only depends upon herself to become predominant there. This last impression is from a French writer, and given verbatim.

The possession of the three provinces in Annam, and the protectorate gained by the zeal of Admiral La Grandière over Camboge, are considered to offer every facility for carrying out the objects referred to, and, as every one is not fully posted on the subject, it will be well to state the case as set forth in the *Moniteur de l'Armée* and other important Ministerial journals. Admiral La Grandière, we are informed, in the month of August last, made a journey into Camboge, and visited the King of that state, who solicited the protection of France, and offered advantages in return. Camboge touches not only Siam and the territories of the King of Annam, but also the provinces lately ceded to France and the possession of the savage tribes, as they called the Penougs, the Theugs, and the Chiams; but its whole extent is only about 150 miles in length by about 100 miles in breadth. Formerly it consisted of seven large provinces, but of these Battam-ban and Angcor were ceded to the King of Siam not long since. The King of Camboge, who is described, as usual in similar cases, as an intelligent young prince, is said to fear the ambition of Siam, and hopes with the aid of France to secure his territories from attack, and in the words of a Parisian journalist, "to commence a new era of civilisation and progress." (It is very curious how this sentence, penned several days since, coincides with that quoted above from the Emperor's speech.) This treaty, we are told, will become "the corner stone of French installation in Cochin China;" the expression is too modest, the corner stone is at Saigon; where the other corners are to be we have yet to learn, and so has the intelligent young King of Camboge! The provinces already in possession of France are bounded on the south by the sea, on the north by Camboge, and on the other two sides by the possessions of the King of Annam. "Thanks to the treaty with Camboge," says one writer, "we are now secure on two sides, but we are still hampered on the other two;" and, he adds significantly, "we cannot calculate on the good faith and loyalty of the Annamites; they have sent ambassadors to France with the view of buying back the ceded provinces at any cost, and as they do not feel certain of regaining them by such means, they have not waited the return of their envoys to organise a rising and treacherous stratagems to recover them by force. At the time the last mail left Saigon it was believed there, we are assured, that Tu-Duc would sacrifice Phan-Tang-Giang, and do all he could to favour a new revolt." Having thus established a case on *ipse dixit* the writer goes on swimmingly, and shows that such infamous treachery must be met by annexing the western provinces of Annam to the French possessions. This, he says, "will render Annam tributary to France, for these provinces and those already in our possession supply the whole of Tu-Duc's dominions with rice, and other principal articles of food."

The importance of, and the facilities for, establishing French supremacy in these countries are regarded as self-evident, but the principal argument used in support of the position is that nature has been prodigal of the benefits to Annam, which is a land flowing, not exactly with milk and honey, but with silk cotton, indigo, tea, dye woods, vegetable oils of a delicacy unknown in Europe, and tobacco, while the Mountains of Compongson are described as all gold, and those of Cuyas rich in iron. The case, in fact, is much the same as was that of the monks of Old Sarum, who moved down from their old bleak position to the present site of Salisbury, "because the meadows there were rich and fertile, and proper for man's habitation and God's glory." This is business-like. But philanthropy follows in the train of commerce, and tells us that the population will be quadrupled as soon as the preponderance of France is fully established; that the surplus millions of China, now dying of misery and want of air, will flock to the rich and smiling plains of Cochin-China; and the indifference of the natives as regards religious ideas will, we are gravely told, make them easy converts to Christianity! Nothing was wanting, we are told, but the installation of the French at Saigon to throw open the doors of this rich and fertile country to European enterprise and civilisation. Its immense forests will supply the finest ornamental and dye woods at a nominal cost, and ivory, pearl, lac, and gamboge will be had almost for the fetching in the good time coming. "Its geographical position," says the enthusiastic writer in his peroration, "will, of necessity, cause all the riches of Cambogia to come down to Saigon, which will be the granary and the entrepot of the Far East!"

Some further particulars have recently arrived respecting the treaty concluded by Admiral de La Grandière with the King of Camboge. This document contains two principal points; in the first place the King recognises the Sovereignty of France in lieu of that of Tu-duc. "The King of Siam claims the protectorate of Camboge, but, says a letter from Saigon, documents of unquestionable authority prove that his claim is far less ancient than that of the King of Hué represented now by France!" The second clause confers on France the right of forming an establishment in Cambogia, on the Mei-kong, at a spot called Nam-van, or the four arms, that is, where four branches of the river unite. This position is said to be of great strategic importance, and to give its master complete command of this vast river, which, after having irrigated the principal provinces of Lower Cochin China, falls into the sea in four streams. The distance between Nam-van and Mytho is stated at about 150 miles, and from the former to Saigon nearly 200. The last paragraph of this letter is worked up into the Emperor's speech, a fact that gives a stamp of authority to that portion above quoted. The same writer tells us that Catholicism is well established in Cambogia, that the French mission and

Digitized by Google

bishopric at Pignalu, about forty miles above Nam-van, are flourishing, and that the Christian schools at Oudon, the capital, are well attended.

Captain Aubaret has just been appointed Consul and Chargé d'Affaires at the Court of Siam, in place of M. Zanole, deceased.

LAUNCH OF THE "FAR EAST."

This vessel, which has been noticed in our previous issues as building by the Messrs. Dudgeon, under the superintendence of Capt. Harry Jones, late of the *Ballarat*, was launched on the 31st ult., in the presence of a large number of visitors, including Mr. J. E. Reed, chief constructor of the navy; Mr. James Luke, inspecting officer of the controller's department of the Admiralty; Mr. John Dinnen, inspecting engineer to the Admiralty; Vice-Admiral Sir Edward Belcher, Captain Thomas E. Symonds, R.N., patentee of a system of double-keeled and screw vessels; Messrs. Abbott Dunbar, Gellatly, Hankey, Sewell, and J. Davies, of Warrington—who, with Capt. H. Jones and Messrs. Fletcher and Co., form the owners of the vessel—Mrs. Davies, Mr. and Mrs. Vacher, Mr. Findlay, Mr. and Mrs. Knevitt, Captains McGregor, White, Molison, Scott, and Freeman; Messrs. Carter, Goddard, Rowe, sen., Rowe, jun., Moule (2), Tweedale; Mrs. and Miss Aves, Mr. and Miss Angier, and others interested in the China trade. The ceremony of christening was most successfully performed by Mrs. H. Jones, the vessel, after the usual groans at leaving *terra firma*, sliding into her own element without a check.

The *Far East* is intended for the direct trade between London and China, and on her first voyage will be despatched with a general cargo to Shanghai, returning with the new season's teas from Foo-chow. She is the first vessel of her class to which the double or twin screw system has been applied.

The *Far East's* principal dimensions are as follows:—Length between perpendiculars, 227ft.; length of keel, 210ft.; breadth of beam, 34ft.; depth moulded, 22ft; depth of hold, 20ft. 6in.; depth at load water line, 17ft.; displacement of hull, 2,200 tons; builder's measurement of tonnage, 1,270 tons. On her upper deck she has a capacious poop and forecastle, with a first rate house and cabins amidships. She is fitted with engines of 150-horse power nominal, which drive a two-bladed lifting screw under each quarter. The engines have circular combined cylinders, the diameter of the high pressure cylinder being 24in., and of the expansive cylinder 50in., with a stroke of piston of 2ft. The screws have each a diameter or 8ft. 2in., and a pitch of 16ft. The two boilers have each six furnaces, with 109 square feet of firebar surface, and a tube surface of 1,883ft. The shafting of the screws project through a wrought-iron tube of great strength, which is bolted on to a false iron bulkhead, clear altogether of the ship's frame. This tube at its outer end is connected with a massive wrought-iron slide, which guides the screw to the well when being lifted, or to the shafting when being lowered. The ordinary "cheese-coupling" by which the screw is connected with the shafting is superseded in the *Far East's* shaft by a square head at the end, which fits into a corresponding recess in the boss of the screw, which is connected by a thrust block fixed on a sliding rest. The screws are lifted by a worm and barrel; the whole arrangement for lifting the screws into their wells on each quarter looks perfectly efficient, and, at the same time, of that simplicity which is of itself the best recommendation of all similar mechanical arrangements. She is to be full ship rigged, but to spread a large amount of fore and aft canvas; iron lower masts and topmasts in one; top gallant-mast shutting into head of topmast on after part, thus doing away with the necessity of tressle trees, tops, and cross trees; steel yards and steam winches for cargo, &c.

After the launch a handsome *dejeuner* was provided by Messrs. Dudgeon, in one of the spacious workshops in the yard, which most of the visitors preferred to being sent "empty away." After the leading toast of "Success to the *Far East*," the health of the owners was drunk, Mr. Dudgeon availing himself of the opportunity to record his high opinion of Captain Jones, who had, throughout his superintendence, well sustained the delicate operation of looking after the builders. He had never had occasion to refuse any suggestions made by him, as they were always judicious. Sir Edward Belcher proposed "The health of Messrs. Dudgeon," noticing the extraordinary progress of this firm, who had only entered on their new premises in March last, and since that time four steam vessels have been launched from it, of an aggregate tonnage of 3,000 tons. Eleven steam vessels are now on hand there, including the small double screw steamer building for the Admiralty and intended for service at Ascension. The health of Mr. Reed was responded to by that gentleman, who stated that the improvements made in the mercantile navy were not, as was generally supposed, pooh-poohed by the Admiralty.

LAUNCHES FOR THE CHINA TRADE.

The clipper *Fy-chow*, already noticed as building for Messrs. Gellatly, Hankey, and Sewell, has been launched at Aberdeen, and is announced to load for Shanghai.

The clipper *Childers*, belonging to Messrs. Green, and to be commanded by Captain Enright (late of the *Highflyer* and *Chrysolite*), was launched on the 31st ult,, and will load out for Hong Kong.

Another new craft, intended, we believe, for the coasting trade, has been launched at the yard of Messrs. Birnie and Co., Montrose, and named the *Hoang-Ho*. She is 154 tons N.N.M., or 231 tons builders' measurement; length, 98 feet 8 inches; breadth, 22 feet 7 inches: length of keel, 92 feet; and depth of hold, 11 feet. This vessel loads for Natal and proceeds on to China.

THE *Ethels*, owned by Edwin Fox, Esq., Messrs. Halliday, Fox, and Co. took out to Rangoon a steamer in pieces, and will proceed from thence to China, to be employed on the coast. She is consigned to Messrs. Ellisen and Co,

THE PIRATICAL ATTACK ON THE "PARANA."

WE had hoped that we had heard the last of those thrice horrid cruelties practised on European trading vessels in China. But again are we compelled to record one of the most cruel acts of butchery by those cold-blooded wretches, the Chinese pirates. The press in England insists on the employment of our men-of-war in rooting out these rascals, but they know not the difficulties which prevent so laudable a task being accomplished. Still we think it right to remind our ADMIRAL on the station that he should as often as possible send a gunboat round the well known cruising ground of these villains. We would also remind our MAGISTRATES in Hong Kong that the benefit of the doubt in such cases should be given to the unfortunate captain and crew. We notice with astonishment that after the very praiseworthy efforts of the consignees and charterers of the *Parana*, in bringing the perpetrators to justice, the magistrate declined to commit them for murder. Surely such MAGISTRATES must be sitting on the bench in the interest of the Chinese, and not of our countrymen.

Messrs. James Poole and Co., of Liverpool, have published the letter of Messrs. Walker, Borradaile and Co., of Hong Kong, the consignees of the vessel. From this account it appears that the *Parana* was loaded with cassia at Macao, by Messrs. Oxford and Co., and sailed for Falmouth on the 2nd September. The following is an extract from the letter:—"On the 12th, news arrived from Macao that some mandarin boats had had an engagement with piratical junks, which ended in the former capturing one or more of the junks, as also twenty prisoners. These they brought over to Macao. On reaching the junk it was found to contain about 300 cases of cassia, which the agent of the *Parana* found to be marked 'O. and Co., *Parana*,' and a portion of the cargo he had shipped by that vessel. On an examination of the pirates by the Mandarins, one of them stated that when close by Latai they attacked and boarded a foreign vessel, plundered her, and then set fire to her, after having killed Captain Morrish and crew. Our senior, with one of the firm of Oxford and Co., the charterers, waited on the senior naval officer immediately after the receipt of the news, and communicated the facts of the case to him, upon which he ordered the *Opossum* gunboat out with orders to procure any tidings they might be able to gain of Captain Morrish and the crew, or any other particulars of the unfortunate event. The gunboat returned on the 21st. They had twice visited the piratical haunt, destroyed in all five of their junks, and brought with them thirteen prisoners, a small quantity of cassia, a timepiece, and some ship's gear, which has been proved to have belonged to the *Parana*. The examination of these thirteen men took place on the 21st, at the Police-court, in the presence of our senior, when it was proved by the China pilot of the gunboat that one of the thirteen men acknowledged to at least being cognizant of the whole circumstances attending the affair. His story was, that five boats had attacked a foreign vessel, taken all her valuables out of her, put the crew below, battened down the hatches, and set fire to the vessel. This, if true—which we have little doubt of—is in its result one of the most barbarous piratical attacks we have ever heard of, even in China. We regret to say that after the conclusion of the examination the magistrate thought there was hardly sufficient evidence to convict them of murder. He could only, therefore, commit them for piracy, but gave us the option of a remand for further evidence, of which we have availed, and have addressed Her Britannic Majesty's Consul, Mr. D. B. Robertson, at Canton, with full details of the case, requesting that he would lay the matter before the proper Chinese authorities, in whose custody is the first batch of the prisoners taken by the Mandarin boats, in order that they might, if possible, aid us with any evidence tending to convict the above thirteen men of murder. To this we have not as yet received any official reply, but from a private source we gather that six of the twenty taken by the Mandarins have confessed to having been in the piratical attack; that the vessel was boarded out at sea in the night, pillaged, and burnt, all the Europeans on board, doubtless, perishing; but of this there is no actual certainty." This melancholy event was first reported by telegram from Suez as the *Panama*, Captain Johnson, which left Hong Kong on the 31st July.

GENERAL BURGEVINE.

Colonel Sykes has published a letter from Shanghai, of which the following is an extract:—

"Burgevine has lately been in Shanghai *incog.*, and called on me, and from him and others who went with him from Souchow to Nanking I have learnt much. He laughs heartily at the absurd reports which the local newspapers have written of him and his movements since he took the steamer Kar-j-eor at Hong Kong; he was never out in any of those engagements spoken of, nor is he going to do any small fighting, or large either if he can help it, till he has his men well drilled. Altogether he has got only about a hundred white men with him (other people speak of hundreds—600 at least), who he says are as good men, at least, as those he

Digitized by Google

had when in the Imperial service. They get—privates, 50 taels a month uniform, &c., found; officers (captains), 250 taels, which is say 25 per cent. better than the Imperial Government gives. He says he harangued them the other day, and said he wanted no privates, he wanted officers only, and those who were the first to show merit should be promoted. Incorrigibles (and there are some rough ones) would be sent back to Shanghai. Souchow is described as full of life, fine buildings going up. Population migratory, say 250,000, every man of whom is liable to service at arms. There may be 125,000 in camp regular fighting men, superior in spirit to the Imperialists, for their heart is in the cause. These men get rations only, and clothes and quarters. They fight for love of the cause. They are very well ordered, and after the roll-call at eight o'clock P.M. not a man is out or seen till daylight, except the guards. He saw very little divine worship among them, though they kept the Sabbath strictly. But he had, been but little among the men as yet. Souchow cannot be approached by Osborne's fleet within fourteen miles, and there is little apprehension. There never was that panic which was proclaimed so loudly on Gordon's approach. Burgevine did not stay long at Souchow, but went on in the Kar-j-eor to within forty-five miles of Nanking. The country is lovely—the people most happy—Christian-like people, as different, said Mr. Jones who was with him, from the Imps, as light from darkness. Money is plentiful. Arrived at Nanking, the Chung-wong accorded Burgevine the most flattering reception, and the Teen Wang (Emperor) sent him a patent of royalty, with which he was duly invested. The Chung-wong admits that he sees the necessity for a foreign element on their side, to combat the same on the other. None of the forced labour was seen of which we have heard. He saw a wide moat being cut, and the coolies, without overseers, taking it very easy, some swimming to cool themselves; only a few women were at labour, but that is common all over China. No opium, no spirits to be sold in the city. Burgevine's visit here was for the purpose of arranging more regular means of communication. They are making capital shell with reliable fuses at Souchow; he says they have lots of arms though not all good ones. Powder in plenty, made in the city. I don't think of more to interest you. The two 32-pounders abandoned by Captain Holland at the siege of Tait-seang are at Nanking, and Jones saw them."

THE MURDER OF MR. RICHARDSON.

(THE TIMES.)

For the people of the last generation the world still contained a wonder. In the remote East, beyond even the unknown regions of China, there existed an empire enveloped in impenetrable mystery. It was an organised State of high antiquity, vast wealth, and advanced civilisation. It was inhabited by a numerous population more than usually intelligent, and yet not a living soul from any foreign country was allowed to set foot on its shores. This immense community was absolutely secluded from the rest of the world like a huge monastery. Nobody could gain admission to it, or escape with his life if accident threw him near its people. The Dutch alone of all the nations in the world were permitted to enjoy a species of indirect and distant intercourse with it, and this intercourse was so strangely regulated as to leave the mystery more profound than before. Once in a year two Dutch ships proceeded to a certain rendezvous, where they were met by two ships of this marvellous empire. The cargoes of the vessels were then exchanged, and the squadrons returned to their respective ports. This was all that could be known of Japan, and yet such was the ingenuity of its inhabitants that their manufactures found their way to our firesides, and left a mark on our household vocabularies. The two great empires of the East gave names to our commonest chattels, and we spoke of our lackered wares as "Japanned," while we called our crockery "China." Curious writers used to speculate on the possible institutions or customs of this wonderful State, and those who believed that the world held no regions yet to be discovered amused themselves by remarking that there was still a country to be unveiled. That veil has now been lifted, and to very strange purpose indeed. We have found out what kind of an empire Japan is, and we fear it is almost a natural consequence that we are at war with it.

Japan is more like China than any other country, and yet very different from China. In China the polity is absolutely monarchial, and there probably never was a State in which the monopoly of power was so complete. But in Japan this result has not been yet attained. There feudalism is dominant, and the distribution of power resembles that prevailing in European kingdoms four or five centuries ago. The singularity, however, of the case consists in this—that a succession of institutions can be traced, one over another, still preserved. There are two Sovereigns in Japan, just as in Merovingian France there was a King, and under him a Minister who was more King than his master. There is also a very powerful aristocracy, and the Princes of Japan are as rich and as formidable as the old Dukes of Normandy or Burgundy. But this aristocracy and this double monarchy all exist together, so that to get anything like a parallel from European history we should have to compound the France of the Childeberts with the France of Charles VII. At the very time that a British Minister is bewildered in his negotiations by "the anomalous state of political rule in Japan," our Admiral finds a Japanese nobleman enthroned in an opulent principality, with a strong seaport, a fleet of steamers, fortifications mounting the most approved modern ordnance, and a luxurious palace about fifty miles inland. The whole case of the war between England and Japan turns upon the pretensions of the class to which this nobleman belongs.

The "Daimios," as they are called, or the great feudal nobles of Japan, claim, it is said, the privilege of having even a public road to themselves when they choose to travel upon it. On the 14th of September last year, Mr. Richardson, an Englishman, who happened to be in Japan, was riding on one of the high roads in company with two or three friends when they encountered a Daimio and his retinue. The retainers of the Prince fell upon the party immediately, and Mr. Richardson was killed. It was for this murder that Prince Satsuma was called to account in the recent operations of our fleet, and the case lies in an unusually small compass. The Japanese Government not only acknowledged the justice of our demands when redress was claimed, but proceeded to satisfy them as far as it could. The apology which we required was given, and the fine which we asked was paid. But when we came to deal with the offending Daimio our claims were eluded. The Prince's Ministers argued that, though the Supreme Government of the Empire might have given us by treaty certain rights of travelling on the high roads, these rights ought to have been subordinated to the inalienable privileges of the nobles of the land, and that, though the casualty in question might be deplorable in itself, it was but a natural incident of the mistake made by the English party in confronting a Daimio on progress. This view of the case has actually found acceptance among the English in China, for we read in one of their journals a serious lamentation over the folly or perverseness by which so fatal a risk was incurred. It is not alleged that Mr. Richardson and his friends were doing anything but what they had a right to do by treaty, or that they conducted themselves in any way provokingly or offensively, except by meeting a nobleman on the road. The only prerogative which they infrigned was the Daimio's prerogative of monopolising a highway to the exclusion of all impertinent intruders. When a Daimio rides abroad other people should stay at home, just as the Arabian Nights tell us that all the inhabitants of Bagdad were ordered to confine themselves to their houses when the Sultan's daughter was going to the baths. That is the claim advanced on behalf of the Daimios. Mr. Richardson, it is said, was unfortunate in paying the penalty with his life, but his own ignorance or hardihood led him into the danger.

It might very well be a question whether the recognition of such extravagant privileges as these could consist with that right of residence in Japan which British subjects have now acquired, but to say the truth we do not believe a word of the argument. We do not believe either that the Daimios could establish their title to such privileges, or that as a matter of fact Mr. Richardson was killed for infringing them. The Japanese Government itself put in no such plea for its feudatory. The Ministers of Prince Satsuma do not venture to advance it so nakedly as it has been advanced for them. They merely remark that the Daimio found his path impeded, and that his retainers accidentally killed a person in clearing the way somewhat rudely of the intruders. This defence would liken the affair to an affray between Leslies and Seytons in the High-street of Edinburgh, or a faction fight in Ireland brought on by a fortuitous collision. It is needless, however, to observe that no such account can hold good of an onslaught made by a retinue of 200 ruffians on three gentlemen and a lady. We have no doubt that a Daimio expects people to get out of his way; but the true offence of this unfortunate party was that they were foreigners. That spirit which for two centuries kept all the world out of Japan still survives, as it would naturally survive longest, in the aristocracy of the Empire. The fear, or hatred, or jealousy of strangers which is found in every barbarous race lives in the breast of the Japanese Princes, and the detested spectacle of a party of foreigners induced the Daimio and his retainers to seize what they thought a colourable opportunity of committing murder. They did simply what the villagers of every Chinese hamlet used to do to every foreigner they caught, what the tribes of Central Africa do to all travellers, what the savages of Hawaii did to Captain Cook. They set upon the objects of their abomination to kill them, and then, when they found themselves called to account, they invented the best excuses they could. The Japanese Government is probably innocent. The guilt was that of a noble far exalted above the Sovereign's displeasure. We have reached this Prince through the accident of his residence on the sea, and we have punished him as far as we could. It is to be hoped that the example will deter others from offending, but the obligation resting upon us is none other than that which follows us to every settlement made in a barbarous country. We exact treaty concessions from the Government, but the Government cannot control the people, and the offences are given which leave us with the alternative of quitting the place altogether or fighting for our safety.

OUR POLICY IN JAPAN.

(SPECTATOR.)

In Japan the process is absolutely identical with China, though the incidents make a different impression on the imagination. Instead of allowing adventurers to enter the native service, the British Government has entered it itself. The feudal Prince of Satsuma committed an atrocious murder, for which we asked compensation and atonement. The Tycoon conceded the justice of the demand, and granted compensation, but professed inability to secure atonement, and asked the British Government to secure it on his behalf. The British Government agreed, the whole tremendous machinery of civilisation was virtually lent to the Tycoon, and England knows now how it has been employed, All that we ventured last week to suppose of horror and atrocity these accounts prove to have been outdone. The British fleet for two days bombarded a mighty city whose inhabitants had done nothing whatever of any kind to offend or injure us. The bombardment, intended, we trust, at first only for the batteries, was in the irritation of combat soon transferred to the town; it was continued for hours after the fire broke out, and ended only with the total destruction of a city said to contain 180,000 people, and proved to be rich, populous, and vast. The fire, report eye-witnesses, "was over a mile in extent," and of unknown depth. All Saturday night (August 15th) the "factories," "foundries," "junks," all that creates the wealth and the prosperity of Kagosima, were seen to be burning fiercely; but still the shelling went on. On Sunday the town was on fire, and on Monday at 2 P.M. the ships at the distance of fourteen miles could still see the huge volumes of smoke rolling up from the conflagration. Imagine the scene *within* that town, the vast Oriental population unable to imagine even the cause of attack, coerced by their Prince into abstaining from submission, with their city sending up smoke visible for fourteen miles, with all their houses of wood, and half their walls of paper, striving helplessly to save women and children by scores of thousands at once under the fire of a British fleet. Think for an instant of all the City of London in flames at once, the dockyards going first; and the whole population at once striving in panic, fear and rage to escape flames amidst which engines of irresistible force were perpetually flinging death! And we have done all this because an evil noble in a fit of pride earned hanging by cutting down an unoffending Englishman; have fired, as it were, among a school of children, to repress the insolence of their pedagogue. And we who do it sit

Digitized by Google

and shriek with horror because an American general pours fire into a town defended by men who have injured his country, and who, in all the arts which make military resistance successful, are at least his equals.

But one addition was wanting to make the incident complete, and that also has been supplied. The bombardment, morally inexcusable, has been politically a failure. The Prince refused to yield, and the squadron steamed away with none of its demands conceded, and a loss of some seventy men, and endless damage to the fleet. Kagosima will be rebuilt again, and already there is a demand for a Sepoy army to march to Miako and extort from the Spiritual Emperor his signature to the treaty which the temporal Emperor has already signed, and which has produced no result whatever, except the murder of Mr. Richardson and the bombardment of a great city. In other words, we are to shatter down the fabric of Japanese society, as we have already that of Chinese, and then—that is pricisely the point at which the English mind stands still. It is conceivable even in a case like that of Kagosima, that if the British people replaces the organisation it has crumbled to powder, the world, as a whole, and, in the long run, may be largely gainers. China would undoubtedly benefit by a century of British rule, and even Japan—whose civilisation is much more thorough—might be rid of her nobles with great advantage to her people. But is the country prepared to have three Indias instead of one to undertake, amid jealous allies and watchful foes, the direct administration of more than half the human race, to find governors for six hundred millions, while it can scarcely discover them for two? If it is not, then its present action in Asia is simply and purely destructive, and involves *ex necessitate rei* a series of incidents hard to distidguish from a series of political crimes. Is it without an object that we are to bombard flourishing cities, without a policy that we suffer our subjects to ssume the dominion over three hundred millions of Chinese?

CHINA IN DECOMPOSITION.

(ECONOMIST.)

China is fast succumbing beneath those toils of European influence by which it has so long been threatened. The latest news not only bears out all the grave anticipations which we had formed of the progress of events there, but shows that the empire is dissolving at a rate that we could hardly have anticipated on the first contact with European ambitions. We have always maintained that the resolution taken by the Foreign-office to loan military and naval power to the Imperialists in China would be a powerful impulse urging the empire there in the same direction in which India has gradually slid under European dominion. And now the process is going on so rapidly before our eyes, that even the sceptics who last session professed to see nothing in the English move but an effort to restore to the Imperial Government some of its old strength, will have their eyes opened to see the truth. China is becoming, as India became in the last century, a prey to contending foreigners—French, English, and American. The Chinese are falling into the same subordinate position as the native troops of India, making admirable soldiers when disciplined and led by Europeans, but a mere crowd of craven-hearted Orientals when they are not stiffened by the distinct purposes and guided by the originating intellect of the West. No indication is wanting which we had in India, that Oriental rule is practically over. For the future we may have nominal Chinese Emperors and Princes, as we have so long had Moguls and Peishwas in India; but the day is gone by when they can rule without Western aid. We began by proposing to prop up the falling empire against the barbarous hordes of the Taipings. And now what do we see in China? An American adventurer directing the operations of the Taipings; and on the other hand, English officers, French officers, and even American officers still adhering to the cause of the Imperialists, and at once making war on the Taipings, disputing jealously with each other, but agreed on all hands that no European or American, whether on one side or on the other, shall ever be tried or judged by a Chinese. All the signs go to prove that China will now be the prey of the strongest Western leader. What Dupleix was to India, the American Burgevine is at the present moment to China; he is countermining the aid lent by England and France to the Imperialists, by lending exactly similar aid to Taipings. And as soon as he is more powerfully reinforced—as he soon will be by other adventurous Americans or Europeans—we shall see the mark of their influence on all the proceedings of the Taipings—stronger government, clearer aims, a check on destructive barbarisms, but probably a fresh stimulus to greedy oppression of the natives for the sake of pecuniary gain.

Finally, the foreigners, even on the same side, are beginning to quarrel amongst themselves. We find the Franco-Chinese officers holding back prize-money from Anglo-Chinese officers, and much, though not hitherto serious wrangling and coldness, and incapacity for co-operation, resulting therefrom. No law of nature is more certain than that these jealousies will spring up again and again, will become more and more serious, and that before long there will be at least three, if not four, distinct foreign influences struggling together in China. The English, the French, the Americans, and the Russians will all be at work before long, forming temporary alliances amongst each other, falling also into bitter rivalries amongst each other, and carrying the Chinese with them into their mutual animosities. Instead of setting up the Imperial authority in concert, there can be no doubt that we have substituted for the struggle between the Taipings and the Imperialists the struggles between very many distinct parties, led by Western science and backed by Western courage.

This is not a cheerful view of the prospects of China, but it is the true view. Already the form of going only where we are asked has been abandoned. Many of the Chinese rulers are not anxious for our aid—have the greatest dread of it, and turn the cold shoulder. The central Government, of course, does not in such cases interfere; but the English, at least, don't wait to be asked. They call the old-fashioned Chinese fools for not welcoming their alliance, force it on them at the point of the bayonet, and reconquer districts for them, which, of course, they rule themselves. If the Government is not prepared to authorise a conquest of at least a portion of China—which we are well convinced they are not—they would do well to withdraw their sanction to the Osborn expedition, to limit the area of English operations to the treaty ports, and to outlaw all Englishmen who engage in the Chinese service without permission.

CHINESE HEATHENISM IN SAN FRANCISCO.

We take the following interesting account from the *San Francisco Bulletin*, on the chance of its having already appeared in the local journals of the Far East:—

"The Chinese are having a great time in their Temple, in Sacramento-street, just now. Evidently the festival is of a religious character, though whether the proceeds are to be devoted to cancelling a mortgage on their church, or to sending out pagan missionaries to win over Christian believers to Buddhism, is more than inquisitiveness itself has been able to ascertain. The first thing which strikes the visitor on entering the vestibule of their sanctuary is a most ancient and fish-like smell, and if he approaches the altar he will discover that the breath of the gods smells strangely of stale salmon. The first object of Chinese adoration that meets the eye is a high and hilarious god, standing some 7 feet or 8 feet in his stockings, and flourishing a cigar in his left hand like a Montgomery-street swell. The attitude of this idol is not very graceful, while his legs widely spread apart, and the air with which he braces back against the wall, suggest that he is under the influence of the rosy. Altogether, he has a convivial look about him highly cheerful to behold, and the effect is heightened by two horns with serrated edges, which sprout gaily from behind his ears. Passing on and ascending a narrow and fishy staircase, we find a balcony, gay with flags and lanterns, and illuminated with scrolls written in sinuous characters, probably pregnant with the wisdom of the immortal Kung-fe-tse, whom the Latins name Confucius. Here the sound of music is loud—reckless disciples play crashing anvil choruses upon immense gongs, while milder-mannered musicians keep up a rattling accompaniment on kettle-drums, blended with a symphony of shrill notes from the lips of cracked fifes. The gods stand it marvellously well, however, and so does the temple, though a much less noise brought down the walls of Jericho. In the temple, the gods and worshippers are so numerous that one calls them no longer John but legion. You stumble over a little god on the floor, or precipitate your head into the stomach of a big one braced against the altar. The big ones number two, and face each other in a Gog and Magog style. In height they are Anaks, each standing a good eight feet above the level of the floor, without counting in a slight wrinkle in the back, which would give them a few inches more were it ironed out. Each has one foot perched on a suppositious rock, while the other rests on a paper tiger—they seem to have been bucking against the tiger all the night through. One holds a golden apple in his hand, plucked from no one knows what Hesperides; the other grasps a golden wreath. They are spangled like harlequin, and bearded and moustached like bogus barons. A chronic lassitude rests on their features—probably occasioned by having been up all night. Before them is spread either a late breakfast or an early lunch, but they seem in no hurry to attack it. Undoubtedly they feel safe in the assurance that no one else will eat it. Ranged round the wall, in convenient sentry boxes, stand fudgy little gods, with splay feet. These be the common "Josses" of the concern. One of them is habited like a Christian martyr, and has the dolorous look of one condemned to be burnt. The apprehension seems not entirely groundless, as a number of torches are lighted close to his feet. Should they burn on the spectacle would probably be furnished of a baked tomato. The worshippers in the purlieus of the temple are not very devout. They loaf around, and take all sorts of liberties with their gods, even to the occasional smouching of a tom-cod for their breakfast table. There are dowagers, with head dresses which tower up in crinigerous Babels, and damsels with eyes more clam shell than almond-shell shaped. There are male Chinamen having the look of chimpanzees, and others dandified enough in appearance to stand as lay figures in barbers' windows. Altogether the picture is a motley one, and well worth seeing, but curious visitors should be vaccinated before entering the synagogue, and carry smelling salts with them. Were there time in this connection to indulge in speculation and reflection concerning this curious people who have moved their temples and gods into our midst and sat down among us, but of whom we really know so little, there were ample food for it. How long will they maintain their idolatrous worship in the full blaze of the light which a Christian community sheds? Or is it unfair to call them idolaters when these images which they make unto themselves are not made "in the shape of anything in the heavens above, in the earth beneath, or in the waters under the earth?" Will ever an Iconoclast come along and send those paper deities a flying higher than any kite? will these Thors finally be broken with their own hammers? or will this people go on chanting barbarous hymns through their noses and beating tom-toms to the honour of their tom-tomcods and tom-tomgods to the end of another century?"

BATAVIA AN ELYSIUM.—A traveller thus writes of Batavia:—"Batavia is a brilliant specimen of Oriental splendour. The houses—which are as white as snow—are placed one hundred feet back from the street, the intervening space being filled with trees, literally alive with birds, and every variety of plants and flowers. Every house has a piazza in front, and is decorated with beautiful pictures, elegant lamps, cages, &c., while rocking-chairs, lounges, and ottomans of the nicest descriptions, furnished luxurious accommodations for the family who sit here mornings and evenings. At night the city is one blaze of light from the lamps. The hotels have grounds of eight or ten acres in extent around them, covered with fine shade trees, with fountains, flower-gardens, &c. Indeed, so numerous are the trees, the city almost resembles a forest. The rooms are very high and spacious, without carpets, and but few curtains. Meals are served up about the same as at first-class hotels in the United States, although the habits of living are quite different. At daylight coffee and tea are taken to the guest's room, and then again at eight o'clock light refreshments. At twelve breakfast is served, and at seven dinner. Coffee and tea are always ready, day and night. No business is done in the streets in the middle of the day on account of the heat. The nights and mornings are cool and delightful; birds are singing all night. The thermometer stands about eighty-two degrees throughout the year. The island of Java contains a population of ten thousand. The island abounds with tigers, leopards, anacondas, and poisonous insects of all kinds. The finest fruits in the world are produced in great profusion."

THE LAMENT OF THE "LIVERPOOL ALBION."—It is not only along the passes of the Peshawur frontier alone that the storm is lowering and

Digitized by Google

muttering; it darkens the political firmament in China and Japan even more profoundly. The defection of the filibuster Burgevine has been such a serious blow to the Imperialists as to show upon what a precarious foundation the Mantchou dynasty stands, and to what grave eventualities England may be committed by adopting its cause. The siege of Nanking, the chief object of Captain Osborn's expedition, cannot be undertaken because General Gordon cannot leave Soo-chow, for fear Burgevine's *condottieri* should overrun the province, and the Imperialist forces are not strong enough to invest the place without other help than that of the naval squadron. In Japan a large town has been bombarded by Admiral Kuper, because it was the property of a noble who had incurred our resentment, and who could not be brought to account by the Tycoon. This may be the beginning of a system of interference such as we are pursuing in China, and the ill effects of which we may soon be made to feel. In New Zealand, too, we are called upon to suppress a Maori revolt, evidently of formidable proportions, in which there is at least sufficient justice on the side of the insurgents to evoke a feeling of regret that we should be obliged, for the preservation of the colonists, to enter upon a war which, there is too much reason to fear, will be one of extermination.

Rear Admiral James Pulling.—We have to record the death of Rear Admiral James Pulling, which took place at Plymouth on the 2nd inst. The gallant deceased, who had attained the advanced age of seventy-six, entered the navy July 26, 1803 as midshipman, on board the *Fisgard*, 38, and was present in Sir Robert Calder's action, July 22, 1805; and in the expedition to Walcheren, in 1809. He joined the *Atalanta*, 18, in September, 1811, and while serving in her as acting master on the North American station, was engaged in frequent skirmishes with gunboats and armed parties on shore; assisted in the attack on Craney Island, in June, 1813; and was wrecked in the following Nov., on the Sisters Rocks, off Halifax. He was advanced to the rank of lieut. February 23, 1815, and was afterwards, for many years, engaged in the coast-guard service, in Hampshire; and in 1825 was highly commended for his conduct in an affray with smugglers. From December, 1826, until promoted to the rank of commander, September 8, 1829, he commanded the *Skipjack* schooner, on the Jamaica station, and was actively employed in the suppression of piracy and the slave trade in the West Indies. He obtained post rank January 16, 1845, after having been employed eleven years as inspecting commander in the coast-guard service; became retired captain, May 16, 1856; and retired rear admiral, April 27, 1863.

The Senior Lieutenant of Greenwich Hospital.—We have to record the death, on the 2nd inst., of Lieutenant Basset J. Loveless, the senior lieutenant of Greenwich Hospital, at the advanced age of seventy-nine years. The late lieutenant entered the Royal Navy in 1801; he was present in the actions fought under Sir James Saumarez, off Algeziras on the 6th July, 1801, where he was wounded; and, in the Gut of Gibraltar, on the 13th July, 1801. He was mate of His Majesty's ship *Bonetta*, at Copenhagen, under Lord Gambier, in 1807, and was wrecked in his Majesty's ship *Astrea*, in 1808, which ship was wholly lost on a coral reef off Anagada, and he remained for three months on that barren and swampy island, where he suffered many privations for the want of food and clothing.

Colonel Charles Henry Somerset, C.B.—The gallant deceased, who was in his forty-sixth year, was the eldest son of the late Lieut.-General Sir Henry Somerset, K.C.B., K.H., Commander-in-Chief of Bombay. He served as aide-de-camp to Sir Benjamin D'Urban during the Kaffir war in 1835, became ensign July 30, 1836, and lieutenant Sept. 20, 1839. In 1841 he accompanied Major Smith's expedition to Natal, and served in the Kaffir war of 1846 and 1847 as aide-de-camp to his father, and afterwards, to Lieut.-General Sir George Berkeley during the successful operations in 1847, for which he received a medal.

Mr. Ferrand and Sir Michael Seymour.—The attention of Sir Michael Seymour having been drawn (says the *Western Daily Murcury*) to a report of a speech recently delivered by Mr. Ferrand to his constituents at Devonport, wherein that gentleman asserted that "Sir Michael Seymour had told the Government that if they did not give him his due he would resign his seat," we are authorised to say that this statement of Mr. Ferrand is entirely without foundation, and is denied by Sir M. Seymour without any reservation whatever.

Teacher for the School in Hong Kong.—The following advertisement appears in the daily papers:—"An assistant master is wanted in the English department of the Central School in Hong Kong, to teach English to Chinese pupils; at the same time he will be required to study the Chinese language, and to supply the place of the head master during that officer's leave of absence from the colony. The salary of the assistant master will be £300 per annum; he will have free quarters, and a passage will be provided for him at the public cost. He must be under twenty-five years of age, and applicants for the appointment, who will probably be required to present themselves for examination before the Civil Service Commissioners, must send their testimonials to the Crown Agents for the Colonies, 5A, Spring-gardens, on or before the 17th inst."

Appointments, &c.—The Queen has been pleased to approve of Mr. Henry James Duncan Padday as Consul at Penang. The Queen has been pleased to approve of Mr. Gustav Schunhoff as Consul at Capetown for His Majesty the King of Hanover.

Monetary and Commercial.

The rise in the Bank rate of discount has not caused any alteration in the price of silver. Besides the extensive Indian demand for this metal, some very large orders have lately been executed in the various continental cities on Russian account. The inquiry has been especially strong in Hamburg not only for Russia, but also for Copenhagen and Stockholm. It is conjectured that the disquieting position of politics in these countries has induced the hoarding of silver amongst the lower classes. The exceptional demand for that quarter has helped to create a great scarcity of silver on the Continent, and orders sent from this side for supplies intended for Bombay are executed with great difficulty.

The following vessels with cotton from China are now on their way:—

For Liverpool:—The India, with 2,200 bales; the Ouangondy, with 4,654 bales; and the Cordova, with 1,916 bales, from Shanghai; the Forfarshire, with 1,635 bales; the Verbena, with 2,018 bales; and the Iron Crown, with 2,422 bales, from Hong Kong. For London, the Artemesia, with 1,459 bales; the Hanover, with 4,711 bales; the Cambalu, with 1,883 bales; and Runnymede, with 2,260 bales, from Shanghai; and the Warwickshire, with 810 bales, from Hong Kong.

It will be seen by our Export Supplement that the *Ellen Radford*, from Liverpool to Shanghai, takes out a further instalment of the plant for the Shanghai Gas Works, valued at £4,000., besides bricks and tiles, &c.

The biddings for £400,000 in bills on India took place a the Bank of England. The proportions allotted were—to Calcutta, £220,000; to Bombay, £160,000; and to Madras, £20,000. The *minimum* price declared was as before—1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to the extraordinary sum of £2,830,000. Tenders on Calcutta at 1s. 11⅞d. will receive about 90 per cent.; on Bombay, at 2s. 0¼d., about 28 per cent.; and on Madras, at 1s. 11⅞d., all.

A call of £1 is to be paid on the shares in the Singapore Gas Company (Limited) by the 19th inst.

Fifty of the German merchants who were despatched about twelve months since to Shanghai have returned in the *Castle Howard*, not at all satisfied with the reception they met with there.

Several iron houses are in course of shipment to Shanghai.

The following has appeared in the *London Gazette*:—

"A copy of a despatch has been received from Her Majesty's Minister in China, reporting that the Chinese Government has provided that in cases where due notice is given to export, within twelve months, produce brought down the Great River to Shanghai, the half duty paid thereon shall be refunded if the marks, packages, amounts, and weights are found by the Chinese Customs' authorities to correspond with those originally entered in the books, and if such produce is exported within the twelve months now allowed in lieu of the three months hitherto granted."

Two vessels are loading at Bordeaux with general cargoes for Saigon.

The Messageries Imperiales Company advertises the issue, from the 6th to 25th November next, of 10,000 of the 20,000 bonds which the shareholders, in their last general meeting, authorised to be sold. Shareholders are to have the preference in the subscription, and are to be allowed one bond for ten shares. The bonds are of 500f., are to bear 6 per cent. interest, and are to be paid off before 1880. A sum of 250f. is to be paid on subscribing, but, shareholders subscribing are to receive by anticipation the provisional dividend of 20f. for 1863, due 1st December next. The company also announces that non-subscribing shareholders can receive the same dividend from the latter date.

The fourth series of colonial wool sales of the year have commenced. The catalogue comprised 1,117 bales Sydney, 541 bales Port Philip, 49 bales Adelaide, 654 bales New Zealand, and 994 bales Cape, making a total of 3,355 bales. Prices may be quoted ½d. to 1d. advance, stout stapled wool attracting much competition. The following quantities have arrived:—From New South Wales and Queensland, 10,207 bales; Victoria, 4,867 bales; Tasmania, 1,362 bales; South Australia, 608 bales; West Australia, 970 bales; New Zealand, 14,953 bales; total Australasian, 32,967 bales; Cape of Good Hope, 30,265 bales; total colonial, 63,232 bales.

The exchange business of Messrs. Adam Spielmann and Co., of Lombard-street, has been purchased, and will henceforth be carried on by the London, Hamburg, and Continental Exchange Bank, Mr. Spielmann acting as manager.

A curious case has come before Judge Shipman, at New York. It may be called a cockroach claim. It seems that Eiles and Company, of Amoy, shipped 10,053 chests of tea on board the British ship *Miletus*, M'Dowell, master, consigned to Westray, Gibbes, and Hardcastle, of New York. The vessel was infested with cockroaches of a very ferocious character. On the voyage they ate off the outer labels of the packages, so that on arrival at this port it was necessary to cut the coverings of the packages to get at the inner labels. The consignees sue for 10,000 dollars damages. The defence is, that the cockroaches came on board with the tea chests, or where engendered on the

Digitized by Google

voyage by them, and consequently that the ship is not liable. The trial will last some time.

The preliminary arrangements of the Royal Bank of India (an undertaking lately started in Bombay) for opening in London are stated to have been completed. The London and County Bank are to be the company's London bankers, and Mr. Maculloch, formerly manager of the Agra and United Service Bank, Bombay, is to be the London agent.

The Egyptian Commercial and Trading Company (Limited) have made arrangements to furnish the Egyptian Government with a temporary advance of £700,000 to meet the contingencies arising from the losses sustained in certain districts of that country from the recent murrain in cattle and the damage caused by the inundations. The entire sum is to be repaid in a year or two.

The Hon. W. S. Fitzwilliam, member of the Supreme Legislative Councilof India, and one of the directors of the Indian Land Mortgage Bank, has left for India, with the view of at once commencing the operations of the company.

The following loans and new undertakings have been issued since our last :—

The National Steam Navigation Company (Limited), capital £2,000,000, in £100 shares, to establish, in the first instance, a fleet of screw steamers between London and Liverpool and New York, the service to be fortnightly.

The Mercantile Credit Association (Limited), capital £2,000,000, in £50 shares, to facilitate trading and commercial enterprises with the leading provincial towns of the United Kingdom, by the assistance afforded.

The English and Swedish Bank (Limited), capital £2,000,000, in £50 shares, to afford Sweden additional banking accommodation, and the means of increasing her foreign financial transactions, which are mostly adjusted in London.

The City and County Assurance Company (Limited), capital £500,000, in £20 shares, to conduct fire insurance business under a less arbitrary system than that adopted by the combined offices.

The London and Caledonian Marine Insurance Company (Limited), capital £5,000,000, in £25 shares, for the purpose of establishing a marine insurance company for Scotland, a field hitherto unoccupied

The Merchant Banking Company of London, capital £2,000.000, in £100 shares, to conduct on a joint-stock principle the trade of "Merchant Bankers," which has hitherto been in the hands of private merchants, and as such making advances to manufacturers, acting as agents for foreign and colonial Governments, &c.

Muntz's Metal Company (Limited), capital £600,000, in £20 shares to purchase and carry on the large and lucrative works for "Muntz Metal," which has extensively superseded the use of copper for marine purposes.

The Gloucestershire Smelting Company (Limited), capital £70,000, in £5 shares, for the purchase of smelting works in connection with the freehold of a colliery of about 150 acres, including adequate plant machinery.

A circular, notifying an issue of 7,800 new shares in the Chartered Bank of India, Australia, and China, at a premium of £10 per share, has been forwarded to the proprietors.

The National Bank of Liverpool have announced an intended issue of 10,000 new shares, thus increasing the present capital from £1,000,000 to £2,000,000, to be issued rateably to the present proprietors at £5 premium.

The subscription for the £588,000 debentures of the Ottoman Railway Company was closed on the 7th instant.

The directors of the Union Bank of Australia will propose on the 11th instant the issue of 10,000 new shares of £25 each, at a premium of £20 per share, and payable by instalments.

The Board of Trade Returns for the month of September have made their appearance. The following were the exportations to the Far East in that period :—

To China.—Cotton Yarn : The quantity exported in September last was 511,320 lbs., against 160,336 lbs. in September, 1862, and 398,400 lbs. in September, 1861, and in the first nine months of this year 1,406,690 lbs., against 3,211,835 lbs. in 1862, and 5,903.250 lbs. in 1861. The value of the export for September last was £54,260, and for the first nine months of this year £144,815. Cotton Manufactures : Exported in September last 6.328,453 yards, against 1,522.713 yards in September, 1862, and 12,643,492 yards in September, 1861, and in the first nine months of this year 34.224.440 yards, against 75,483,698 yards in 1862, and 210,573.349 yards in 1861. Value of export in September last was £140,703, and in the first nine months of this year £830.589. Woollen and Worsted Manufactures : Export in September last 99,246 yards, against 85,192 in 1862, and 109.544 in 1861, and in the first nine months of this year 1,366,755 yards, against 1,603,424 in 1862, and 2,567,136 in 1861. Value of export for September last was £25,211, against £10,649 in September, 1862, and £13.693 in September, 1861 ; value of export for the nine months ending September 30th, £251,782, against £200,428 in 1862, and £320,892 in 1861. Worsted Stuffs : Exported in September last 842.546 yards, of the value of £60,974, against 485,122 yards in September, 1862, of the value of £24,012, and 128,744 in September, 1861, of the value of £9,622. Export in first nine months of this year 6,398,161 yards, of the value of £461,925, against 5,685,784 yards in 1862, of the value of £281,113. Lead : Exported in September last 663 tons, of the value of £13.841, against 566 tons in September, 1862, of the value of £12,081. Export in the first nine months of this year 1,239 tons, of the value of £243,128, against 7,785 tons, of the value of £144,896 in the corresponding period of 1862.

To Philippine Islands.—Cotton Manufactures : Export in September last 957,829 yards, of the value of £20,495, against 1,438,033 yards, of the value of £33,854, in September, 1862, and 1,907,570 yards, of the value of £31,035, in September, 1861. Exported in the first nine months of this year 11,110,563 yards, of the value of £273,010, against 12,625,882 yards, of the value of £252.329, in the corresponding period of 1862.

To Java. — Cotton Manufactures : Exported in September last 1,318,502 yards, against 118,800 yards in September, 1862, and 2 764,427 yards in September, 1861. Export for the first nine months of this year 10,373,296 yards, against 23,665,045 yards in 1862, and 37,350,264 yards in 1861. Value of export for the nine months ending September 30th £251,774, against 431,766 in 1862.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton, on the 4th inst. was :—In gold, to Alexandria : £148,000. To Suez : £60. To Madras : £600. To Singapore ; £1,620. In Silver.—To Hong Kong : £5,214. 11s. 3d. To Foo-chow-Foo ; £1,800. To Shanghai : £9,945. Total in gold, £150,280. In silver, £16,959. 11s. 3d.

ARTICLES OF IMPORT.

Tea.—Notwithstanding the rapid rise in the value of money and the large quantity of Tea, nearly 30,000 Packages, declared for absolute sale on the 3rd instant, our market closes firmly both as to tone and prices. Low and dusty kinds of Congou have found buyers from 8d. to 10d. per lb.; the fair to good common are scarce, the latter being worth 1s. 1d. per lb. ; flavoury kinds, of old import, have been in very limited request, but prices show no alteration. Fair to good Ho Hows and Ning Chows, also second-class Honams, Monings, and Wopacks, of old season, have been saleable to a moderate extent, and latterly prices have advanced ½d. to 1d. per lb., fine, of old season, have been neglected. The medium Kaisow kinds, of new season, were at one time much depressed, but owing to a strong inquiry for fine to finest kinds they have become more saleable, especially out of the early ships. Fine to finest Kaisows have been in demand, and prices show a rise of 1d. to 2d. per lb. from the lowest point. The new season's Monings and Wopacks have sold from 2s. to 2s. 9d. per lb. Tayshans have sold at about previous prices. Common to fair Oolongs, of old import, have sold at about previous rates. The new season's have sold from 1s. 7d. to 2s. 3d. per lb., being fair prices. In Souchongs there has not been much done, the new season's have sold from 2s. 4d. to 2s. 10d. for fine to finest. Flowery Pekoes remain in very limited demand. Common to fair Scented Capers remain dull of sale at former prices. Good and fine are in fair request at full rates. Fair to good Scented Orange Pekoes, up to 1s. 7d. per lb., show an advance of ½d. to 1d. per lb. ; new season's, fair to good, have sold from 1s. 8d. to 1s. 11d., but the demand is not active ; a few really fine have sold from 2s. 4d. to 2s. 5d. Foo-Chow kinds are in request, and both old and new season's have sold rather dearer. Uncolored Japans were at one time in fair demand at fully former prices, but latterly they have sold at rather lower prices. Indian Teas have sold with spirit, and the finer kinds at 2d. per lb. advance. In Green Teas business has been limited, owing to the absence of fresh supplies, the large arrivals of the last few days not having yet been generally offered ; the demand continues good both for export and home consumption. Twankays and Hyson skins have sold at former prices. Japan kinds of Young Hyson have sold rather better, the quality of those, ex *Dunmore*, showing some improvement on former imports. Gunpowders generally are very scarce and command full rates, also fine Moyune Young Hysons. Canton Young Hysons continue to sell at public sale without reserve, at 8d. to 8½d. per lb. for fair quality, being much depressed. Canton Gunpowders have sold from 8½d. to 1s. for low to fair qualities, the medium kinds are difficult of sale, but good to fine are in demand from 1s. 4d. to 1s. 8d. per lb. The Public Sales of Indian Tea comprised 2,579 packages, of which 2,160 packages were sold. Those of the 3rd instant comprised 53,157 packages, of which about 40,000 packages have passed auction, and about 25,000 found buyers, 23,800 packages being without reserve. The sales will finish to-morrow. Messrs. Travers and Son, in their circular, say :—"We repeat, that the largest transactions in first-hand Tea are made by private contract, and that the prices seldom transpire ; that they do not, therefore, exercise the corrective influence

Digitized by Google

that establishes market value, but that prices are latterly more guided by the large re-sales of dealers at auction. Surely such a system cannot be beneficial to importers, and merchants would do better to sell their Teas directly at public sale, guarding against the prejudice against second-hand Teas, by printing in their catalogues 'Sold for account of the importers,' in the words adopted in the notice of sales."

SILK.—The activity in the silk market has continued during the past month, though the aggregate of business has not been equal to that of September, as might naturally be expected after the recent important advance in prices. The deliveries for the month are 3,739 bales of China, and 2,081 bales of Japan. The last letters from China report total settlements to date 13,700 bales, against 32,000 bales at the same period in 1862, and 18,000 bales in 1861. Unsold stock on the market was estimated at 15,000 bales, against 12,000 bales in 1862, and 20,000 bales in 1861. Prices had at one moment shown some weakness, but as the demand increased dealers succeeded in re-establishing former quotations.

SUGAR.—Increase in the rate of discount has arrested the rapid rise in prices. No further immediate advance can be anticipated. The total stock is 97,247 tons. Purchases for export have been small.

COFFEE.—This market has been dull, with very limited business privately; and 323 bales very common sold at auction at 75s. to 77s. 6d. per cwt., being cheap.

RICE.—The general market much more active; business very large, and prices 3d. to 6d. per cwt. higher. Very firm; only 15 bales at auction, half sold at 5d. to 10½d. per lb. for middling to good.

SAGO.—Pearl: Small steady, but medium and large neglected, and rather lower. Of 1,002 cases at auction, about one-fourth sold at 23s. to 23s. 6d. per cwt. for fair to good small, and 18s. to 18s. 6d. greyish large. Flour: Steady; private transactions at fully former terms; 983 bags at auction retired.

SPICES.—Cinnamon: Quiet; 17 cases at auction all retired. Mace and Nutmegs: Three cases at auction sold at 2½d. per lb.; 12 cases paste all retired. Cassia: Has further and steadily advanced 1s. 6d. per lb., and several cases sold at the progressive rates. Ginger: Calicut and Cochin, £3. 5s. to £7. per cwt.; little doing. Pepper: Black steady, but without much animation; and 3,064 bags Singapore at auction sold at 3⅝d. to 3¾d. per lb.; but of 7,451 bags Penang, only about one-fifth sold at 3½d. for fair brownish, and 3⅝d. to 3¾d. good Trang. White: Steady; and 123 bags Singapore at auction sold at 5⅜d. to 5½d. per lb., and 524 bags Penang at 5⅜d. to 5½d. Cloves: Penang are fully 1d. per lb. cheaper; and of 25 cases at auction, only half sold at 1s. 2d. to 1s. 2½d. for very good. Zanzibar: Abundant, and prices unfavourably affected Of 198 bags at auction, a few only sold at 3½d. per lb. for middling.

COTTON.—Prices declined 1d. per lb. last week, but demand good and fair business done. Tinnevelli, 1s. 9d. to 2s. 1d.; northern and western, 1s. 10d. to 2s. 0½d.

HEMP.—Manila: Market very strong and active at advancing prices; business large, including floating parcels, mainly at £28. 10s. to £31 per ton for common to good roping, and £31 to £31. 10s. Sorsogon. Sunn: Sales firm and very scarce; £18 to £33 per ton.

TIN.—This market remains very flat, and a further reduction in terms of £1 to £2 per ton in Straits has not led to any augmented demand. We quote Banca, £119 to £120; Straits, £114 to £116.

JAPAN WAX.—Quotation, 58s. to 70s. per cwt.; quiet.

MISCELLANEOUS.—Galls: 519 cases Japan sold at auction at 52s. to 54s. per cwt. for fair to good, being about 5s. per cwt. dearer. Elephants Teeth: The quarterly sales have opened favourably; current quotation: 70 lbs. and upwards, £33 to £39; 40 to 60 lbs., £31 to £38; 20 to 40 lb., £27 to £34 per cwt. Camphor: The downward tendency continues, and of 144 cases China at auction, one-third only sold at £6 per cwt. Very little done privately. Cocoa Nut Oil: Transactions limited; 640 casks Cochin at auction sold from £45 to £48 per ton. Cubebs: Flat and rather lower. Dragon's Blood: Steady, and of 14 cases at auction three-fourths sold at £7 per cwt. for fair lump. Galangal Root: Flat, no business doing; quotation 21s. to 24s. per cwt. Senna: 2½d. to 6d. per lb. Turmeric: So scarce as to preclude business; quotation 30s. to 35s per cwt. Gutta Percha: Only 3½ tons at auction, sold at 2s. 4d. per lb. for good natural, and 9d. ordinary reboiled. Sapan Wood: Increased demand has led to improved rates, and somewhat large business has been done privately in both Siam and Manila. Of 42 tons Siam at auction one-fourth sold at £9 per ton; and 28 tons Manila, all retired. Rattans: In request; 3s. to 12s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8.; nail rod, £8. 5s. to £8. 10s.; hoops, £10. 10s.; sheets, single, £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7.

STEEL.—Swedish keg, £16 to £16. 10s.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8¼d. to 9d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD, &c.—English pig £20. 5s. to £20. 10s.; W.B., £21. 10s.; shot, patent, £23. 10s., sheet, £20. 10s. to £20. 15s.; spelter, £18. to £18. 5s.; zinc, English sheet, £24; quicksilver, £7 per bottle.

The following remarks are from the circular of Messrs. French and Smith:—The Metal Market continued good all the past month. The business transacted having been mainly for actual orders, and the amount of speculation but trifling, we do not look for much reduction in prices, consequent upon the advance in the rate of interest. Iron: A large business is being done both for Welsh and Staffordshire. Scotch Pig Iron is in good demand, and the shipments are large. Copper: The price is well maintained, owing mainly to the great scarcity of Ores. Foreign is steady. Burra £100. Kapunda £102. Chili £90. Tin: English is inactive. Banca and Straits are depressed, and parcels are forced on the market for sale. In Holland there is but little doing, quotation 71 florins. Tin Plates continue in good demand, and price very firm. The shipments last month were about 94,000 Boxes, in October, 1862, they were 62,000. Lead is firm, and price well maintained. Spelter is very flat at £18 on spot. The stock in London is 5,423 tons, against 4,566 tons same date in 1862.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

At LIVERPOOL: Tigris, Finland, Sparkler, Bagota, Alfred Roy, Thomas Mitchell, Lous Cezard. At FALMOUTH: Lorenzo, Carl and Aguste, Panic. At SHIELDS: Zes Gezustus. At Bordeaux: Chene.

From BATAVIA.—At LONDON: William Simpson, Java. At CHANNEL: Ceres, Sud, Helene. At FALMOUTH: Frederika.

From PENANG.—At LONDON: Isabella, Avalanche. At FALMOUTH: John Land, Schlosser.

FREIGHTS AND CHARTERS.

Outward freights remain without alteration, and the different berths are well supplied with shipping. Homeward freights are steady at 75s. from China, and 80s. from Manila.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The *Yang-tsze* is taking out for Hong Kong shot, shell, &c.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £46 and £2. For Shanghai: £53 and £2. 10s. 0d. to £2. 12s. 6d. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26. 10s. and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES, &c.

Amsterdam, Oct. 22.—The Argo, Gesterkamp, from Shields, (not Cardiff, as before reported,) to Batavia, which put into Simon's Bay, Sept. 19, was leaky, and had thrown part of her cargo overboard, having encountered heavy gales from Sept. 5 to 11, in lat. 37 and 38 S., lon. 25 E.

The Star of China, Leask, which arrived at London, Nov. 1, from Foo-chow-Foo, had had stormy weather and heavy squalls since she passed the Azores, and had encountered a severe gale from N.E., on Oct 25.

The Catharina Jacoba Henrietta, Tonjes, from Nieuwe Diep to Batavia, put into Cowes, Nov. 1, leaky.

The Amsterdam, Wehdemeyer, from Batavia to Amsterdam, was stranded at Kykduin, Nov. 4, and will be lost. The crew (except one man) have been saved.

The Gottingen, Lachwitz, from Hamburg for Hong Kong, put into the Mauritius, Sept. 20, with loss of some bulwarks, galley and boat, and rudder sprung, having experienced hard gales, Aug. 24, in 37 S., 25 E., during which she sprung a leak.

The Chene, (French barque,) Blanchard, from Singapore to Bordeaux, which put into the Mauritius, Sept. 5, for survey, having been on shore in Banca Straits, was found to be leaky.

The Doggersbank, Dutch ship, Nuss, from Batavia, to Rotterdam, with sugar and coffee, put into the Mauritius, Sept. 6, leaky, having experienced hard gales Aug. 26, in lat. 14 S., long. 88 E. She had discharged part of her cargo, and was repairing on Oct. 5, caulking her upper works, &c.

The Agricola, British barque, McLeod, from Manila, at Singapore to Falmouth, with sugar and pepper, put into the Mauritius, Sept. 7, leaky, and making eighteen inches water per hour at sea, having experienced hard gales Aug. 22, in lat 9 S., long. 99 E., and Aug. 30 in lat. 15 S., long. 79 E. She was discharging cargo on Oct. 5.

The Thomas, W. Sears, American ship, Wilson, from Padang to New York, with coffee, &c., put into the Mauritius Sept. 28, having experienced a heavy gale off the Cape of Good of Hope, from the 10th to 25th Aug., during which she sprung a leak, and was obliged to throw some cargo overboard, and also had her mizen-mast sprung and lost a suit of sails. On Sept. 12, in lat. 37 S., long. 58 E., the master, Ichaboe, was lost overboard. The vessel was discharging on Oct. 5.

The Flora, Cobb, from Manila to Liverpool, which put into Bahia 11th October, leaky, had been surveyed, and would have to discharge; she was making two feet of water per hour, and would probably be condemned.

The Lady Ebrington, from London to Shanghai, put into Table Bay Sept. 21, her crew being mutinous.

Intelligence was received here on the 5th inst. of the destruction by pirates in the China Seas, of the Parana, Captain Morrish, from Macao to Liverpool, and of the murder of the captain, officers and crew.

ANTWERP, Nov. 6.—The Amsterdam, Wehdemeyer, from Batavia to Amsterdam, stranded at Kykduin, has broken in the middle. Only twenty-seven chests of tea had been landed, and the salvage was being continued with great difficulty; all the cargo was wet, and some of the coffee had washed ashore.

Advices from Curacoa dated 7th October state that the Diligence, Smit, from Batavia to Amsterdam, which put in there leaky, 14th Sept., had been condemned; the damaged part of the cargo would be sold.

The Benlida, after discharging her cargo of teas, in proceeding down river was capsized in a squall and beached. She has since been got afloat, and we hear been sold.

Havre, Nov. 6.—The Pomone, French, Girand, from Bankok to Cherbourg, which put into Mauritius, August 6, leaky, has been condemned there.

AT ST. VINCENT.—Oct. 7, Bahama (st.), Rowe, from London, and left, 8, for China; 6, Sterling (st.), Henderson, from Cardiff, and left, 8, for Borneo.

The Fuchs, Fuchs, arrived at Simon's Bay Sept. 3, from Bordeaux, and sailed 6th for China—not the Focke, Focke, as before reported.

AT MAURITIUS.—Sept. 7, Maritana, M'Lellan, from Manila; 10, Vellore, Didier, from Singapore; 11, Ararat, Moreau, from Singapore. Sailed, Oct. 3, Shooeyleen (st.), Mann, for Singapore.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY AND THE ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natura colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

WHOLESALE AND SHIPPING PRICES ON APPLICATION AT THE

WORKS, UPPER MARSH, LAMBETH, LONDON.

CHOLERA, DYSENTERY, DIARRHŒA, AGUE, FEVER, SPASMS, &c. The Safest and Best REMEDY is that marvellous remedy known as

CHLORODYNE,

which was discovered by Dr. J. Collis Browne, M.R.C.S.L. (ex-Army Medical Staff), and the SECRET OF HIS RECIPE CONFIDED ONLY to J. T. DAVENPORT, pharmaceutical chemist, 33, Great Russell-street, Bloomsbury-square, who is the sole manufacturer. Medical testimony furnished by the highest authorities in military, naval, and Civil practice, and numerous gratifying statements from the public generally, establishes this property as invaluable. It relieves pain, soothes the system, inducing refreshing and soothing sleep without producing or having any unpleasant effects like opium, and may be taken at any time in a few drop doses. Extracts from the General Board of Health, London, as to its efficacy in Cholera:—"Third Stage, or Collapse—In all cases restoring the pulse. So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases." From Dr. Andrew Smith, Director-General Army Medical Department:—"I have seen it used, and apparently with much advantage." From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am perfectly satisfied with the results." From Dr. M. M'Millman, of New Galloway, Scotland:—"I consider it the most valuable medicine known." Dr. M'Grigor Croft, late Army Staff, says:—"It is a most invaluable medicine." Dr. Gibbon, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa." Dr. I. Baker, Bideford:—"It is without doubt the most valuable and certain anodyne we have."

Sold in bottles, 2s. 9d. and 4s. 6d., by the sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; or sent carriage free on receipt of Stamps or Post-office Order, and with Professional Testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp on each bottle.

*** Beware of counterfeits sold under the same name. Orders can be sent through any of the Agents of this Paper.

HOLLOWAY'S OINTMENT AND PILLS. Diseases and casualties incident to youth may be safely treated by the use of these excellent medicaments, according to the printed directions folded round each pot and box. Nor is this Ointment alone applicable to external ailments; it, conjointly with the Pills, exercises the most salutary influence in checking inflammations situated in the interior of the body; when rubbed upon the back and chest it gives the most sensible relief in asthma, bronchitis, pleurisy, and threatening consumption. Holloway's remedies are especially serviceable in liver and stomach complaints. For the cure of bad legs, all sorts of wounds, sores, and likewise scrofular and scorbutic affections, this Ointment produces a cooling and soothing feeling, most acceptable to the sufferer.

THE ATTACK ON KAGOSIMA.

(LONDON GAZETTE.)

EARL RUSSELL TO LIEUTENANT-COLONEL NEALE.

Foreign-office, December 24, 1862.

Sir,—The barbarous murder of Mr. Richardson, and the murderous assault on two gentlemen and a lady who were in his company, have inspired Her Majesty's Government with great and just indignation. It was to be hoped that the instant trial and condign punishment of the murderers, together with an offer of further reparation, would have shown, on the part of the Japanese Government, a due sense of the magnitude of the offence which had been committed. But the letter of the Japanese Ministers of Foreign Affairs, dated the 16th of September, dispels this hope. In a tone of helplessness or evasion they say that, in the answer which Saboolo gave to their officer, there is something very improper, and that they will have the whole state of the case more accurately inquired into, and inform you of the result. There could have been no doubt in the minds of the Ministers of Japan that a barbarous murder had been committed; no doubt that other murders had, at the same time, been contemplated; and the only course which a Government sensible of its duties, and able to perform them, could have pursued, was to arrest, try, convict, and execute the murderers. But even the first step of this process does not seem to have been taken. In fixing the reparation to be required, Her Majesty's Government have had to consider the anomalous state of political rule in Japan. They find two parties who are responsible to the British Government; first, the Government of Yedo, who, when British subjects are attacked and murdered on the high road, in full daylight, by persons who are known, nevertheless allow those persons to remain unpunished; secondly, the Daimio Prince of Satsuma, whose relation, Simadzoo Saboolo, permitted, if he did not actually order, his retainers to commit this horrible crime, and who do not punish it.

You are instructed to ask as reparation from the Japanese Government—1. An ample and formal apology for the offence of permitting a murderous attack on British subjects passing on a road open by treaty to them. 2. The payment of £100,000 as a penalty on Japan for this offence.

Next you will demand from the Daimio Prince of Satsuma—1. The immediate trial and capital execution, in the presence of one or more of Her Majesty's naval officers, of the chief perpetrators of the murder of Mr. Richardson, and of the murderous assault upon the lady and gentlemen who accompanied him. 2. The payment of £25,000, to be distributed to the relations of the murdered man, and to those who escaped with their lives the swords of the assassins on that occasion.

If the Japanese Government should refuse the redress you are thus instructed to demand, you will inform thereof the admiral or senior naval officer on the station, and you will call upon him to adopt such measures of reprisal or blockade, or of both, as he may judge best calculated to attain the end proposed. You will at the same time communicate the substance of your instructions to the envoys and naval commanders in Japan of other European powers; and you will concert with the British admiral and the naval officers of those Powers arrangements for the safety of foreigners during coercive operations.

If the Daimio Satsuma should not immediately agree to carry into effect the terms demanded of him, the admiral should go with his own ship, and with such others as he may think fit to take with him, or he should send a sufficient force to the territory of the Prince, which I have been informed is a peninsula on the most southerly point of the island. He has a port, I am told, at the south-west end of the Island of Kiu-siu. The admiral or senior naval officer will be better able to judge than Her Majesty's Government can be whether it will be most expedient to blockade this port, or whether it will be possible or advisable to shell the residence of the Prince. I have also been informed that the Prince of Satsuma has steamships brought from Europe of considerable value; these might be seized or detained till redress is obtained.

During these operations, whether against the Government of Japan or the Prince of Satsuma, care must be taken by the admiral to protect the ports where British persons and property may be in jeopardy. The distinction between the Government and the Daimios is one that must be kept in view.

The Prince of Satsuma is said by one of the Japanese Ministers to be a powerful Daimio, who could not easily be coerced by the Japanese Government. He must not, nor must the other Daimios, escape, on that account, the penalty of their misdeeds.—I am, &c.,

(Signed) RUSSELL.

LIEUTENANT-COLONEL NEALE TO EARL RUSSELL.

(Received August 27.)

Yokohama, June 24, 1863.

I hasten to announce to your lordship that I have received within the walls of Her Majesty's Legation the whole amount of the indemnities demanded by Her Majesty's Government from the Government at Yedo, amounting to £110,000 sterling, represented by 440,000 Mexican dollars; the reparation affixed for the families of the guards murdered at Her Majesty's Legation on the 26th June is comprised in this amount.

LIEUTENANT-COLONEL NEALE TO EARL RUSSELL.

(Received September 14.)

Yokohama, July 13, 1863.

My Lord,—I have the satisfaction of transmitting herewith to your lordship the letter of apology addressed to me by the Japanese Government, expressive of regret at the murders and outrages committed in this country upon British subjects during the course of last year. I transmit this paper in original Japanese, accompanied by a literal translation, as well as by a translation of the Dutch version. Thus the demands I have been instructed to make upon the Government at Yedo have been happily brought to a satisfactory and successful issue, not, however, without the most persistent efforts on my part to resist all difficulties and obstructions opposed by the distracted Government of this country at so serious a crisis. In respect to the apology, however expedient I had deemed it to abstain from being over-exacting as to the terms in which it should be expressed—especially as the payment at last, without comment, of the indemnity was of itself an acknowledgment of the justice of the reparation demanded—still I was under the necessity of twice declining to accept two other written apologies tendered to me, as in translation they were obscure and undefined. The third I conceive to be clear and acceptable; and it remains for me to trust it will be found sufficiently satisfactory by Her Majesty's Government.—I have, &c.,

(Signed) EDWD. ST. JOHN NEALE.

THE JAPANESE MINISTERS FOR FOREIGN AFFAIRS TO LIEUTENANT-COLONEL NEALE.

Inclosure.—(Literal translation from the Japanese.)

We communicate with you by a despatch. Last year at the British Legation in Yedo a wicked and murderous act took place. Again, on the tokaido a British subject was murdered. Such unfortunate affairs were for us highly to be regretted. Thus we hope that affairs likely to break off the intercourse between the two countries may not again arise. We desire to inform you thus much.—Respectful and humble communication.

(July 3, 1863.)

Yokohama, August 26, 1863.

My Lord,—I had the honour to inform your lordship upon closing the last mail, that I was on the point of embarking on board the flag-ship of Vice-Admiral Kuper, and of proceeding with the squadron under his command to Kagosima, the capital of the Prince of Satsuma. I deemed it right to acquaint the Tycoon's government of my intentions, and I accordingly addressed them a letter, a copy of which I have the honour to enclose. I promptly received a reply soliciting me at least to postpone the projected expedition. I had hardly received this communication, a copy of which is likewise enclosed, when a vice-minister came down from Yedo and sought an interview with me on the 5th instant. Far from urging further arguments to dissuade me from the intention of proceeding to the territory of Satsuma, he stated that the Tycoon's government purposed sending a Japanese steamer with us, having a high official on board. No steamer, however, appeared then or at any subsequent period.

The squadron, consisting of her Majesty's ships *Euryalus*, *Pearl*, *Perseus*, *Argus*, *Coquette*, *Racehorse*, and *Havoc*, weighed from its anchorage at Yokohama, on the 6th instant. I was accompanied by most of the members of Her Majesty's legation, distributed over Her Majesty's ships—their more or less proficiency in the Japanese language, it was deemed, might be highly useful, and the result has confirmed this expectation. Under easy steam and sail Her Majesty's squadron reached the entrance of the Bay of Kagosima on the evening of the 11th instant, and anchoring ground was found about ten p.m., after some difficulty, in the extreme depth of water, which was found generally to prevail in that noble bay.

Early in the morning of the ensuing day, the first boat, containing two officials, came off from the shore to the flagship. They inquired the nationality of the ships, whether it was our intention to proceed farther into the bay, whether a native pilot was on board, what number of guns the ship carried, and other questions of this nature, which having been replied to, the boat returned to Kagosima. Her Majesty's squadron a few hours afterwards weighed and cast anchor off the batteries of the town. A second boat, with four other officials, came off immediately to the flagship, and stated that it was understood to be their intention to deliver a letter addressed to the Prince of Satsuma. My despatch, as originally written, a copy of which I have already had the honour to transmit to your lordship, and amended only in respect to the altered dates, together with a supplementary letter announcing the admiral's arrival with the squadron, and my own presence on board, were delivered to the officials, who undertook to return, with a receipt, copies of both of which, in their amended form, I have the honour to enclose. This they did in a few hours, and at the same time informed me that the Prince of Satsuma was not at Kagosima, but at a residence inland, about fifty miles distant; the officials again came on board, and stated that they were charged by the three members composing the Prince of Satsuma's council to request that Admiral Kuper and myself would come on shore, where a building for the reception of foreigners had been specially arranged for our interview. Great anxiety was evinced that we should accede to this proposal; and they urged that it would be impossible to commit to writing all that might be discussed. Admiral Kuper fully concurred with me in replying that the only business which had brought us to Kagosima was fully set forth in the despatch I had presented, and which was clearly conveyed in three languages—English, Japanese, and Dutch. We declined to proceed on shore or enter into any discussions. The officials departed much disconcerted that we should not land. Viewed by the light of the occurrences which followed, it may well be assumed that treachery and violence was in store for us, had we unsuspectingly fallen into their designs.

On the 13th instant several officials, one of whom was stated to be of superior rank, again came alongside the flagship, accompanied by numerous two-sworded adherents in several boats. They entered into long parley before coming on board, requested to know whether I would personally receive the high official; of this they were assured. They then requested permission that he should be accompanied on deck by at least forty of his adherents, which was acceded to by the admiral, who at the same time directed a guard of Marines to be drawn up, with fixed bayonets, facing the gangway by which they entered. Upon reaching the deck these armed retainers of Satsuma were disposed of in single file along the line of guns, and at once assumed their natural position of sitting in a kneeling attitude. The high personage referred to then finally decided upon ascending the ship's side. I received him, the admiral being present, when he exhibited the utmost agitation and confusion. He was speechless, when one of his attendant officers stated that he was charged to speak for his chief, and that he had to inform me that he was the bearer of the written reply to my despatch, but that they had some serious matters to add in connection with it. No sooner had he proceeded thus far when it was found that a boat, waving a flag, had reached the ship and communicated something, which, when made known to the chief official, caused him to rise suddenly and leave the cabin, return to it, and leave it again. Finally, I was informed by him that he must return to the shore immediately, as he had received a message to the effect that a mistake had been made in the despatch, which must be rectified; upon which he hurriedly left with the undelivered despatch, if, indeed, he had been the bearer of any such.

Digitized by Google

During the interval occupied by these communications, the batteries on shore were constantly manned, and the guns diligently trained and pointed at the ships of the squadron, and especially on the flagship, the whole of them being within range. These and other suspicious circumstances induced the admiral to determine upon shifting the anchorage of the squadron to as convenient a position, though still partially within range, as the extreme depth of the water would admit. As the Japanese officials were descending the ship's side, the anchors of the squadron were weighing.

Contrary to my expectation, the official last referred to returned late in the evening to the flagship at the new anchorage, and delivered into my hands the answer to my despatch preferring the demands. A careful translation of that document I have here the honour to lay before your lordship. Having no further communication to make to me, the bearer of the letter left the ship. I deemed the general tone and purport of this reply of Satsuma's counsellers to be utterly unsatisfactory. It raised the question whether, according to the laws of Japan, a Daimio, travelling with his retinue, is not fully justified in beating or thrusting off the road all persons who encounter him on the highway. It raised also the question whether or not the Tycoon was free from blame for not having inserted in the treaty these assumed and extravagant privileges. The indemnity demanded, it is said in the reply, will be an after consideration, when it had been decided whether the Tycoon or the Daimio was to blame. Such being the general purport of the reply which I had received, I considered it to be my unavoidable and immediate duty to call upon Admiral Kuper at once to resort to such preliminary measures of coercion, by reprisals or otherwise, as he might deem most expedient and best calculated to arouse the Prince of Satsuma to a sense of the serious nature of our mission. I have the honour to enclose a copy of my despatch, addressed in that sense to the admiral.

A relation of what ensued I can best convey to your lordship by laying before you the succinct and graphic despatch which Admiral Kuper addressed to me at the close of the operations which were enacted. It would be unbecoming in me to indulge in expressions of admiration at the able and gallant manner in which the operations, suddenly rendered necessary, were determined upon, and immediately carried out by the ships of Her Majesty's squadron, under the immediate command and direction of Vice-Admiral Kuper, upon whom it devolves to bring to the knowledge of Her Majesty's Government the spirited incidents and all sufficient results which attended the combat at Kagosima. The strength of the batteries, mounting 81 guns, the gale blowing during the action, the comparatively severe loss sustained by us, especially in the untimely fate of those brilliant and deplored officers, Captains Josling and Wilmot, of the flag-ship, will be duly appreciated by Her Majesty's Government. I did not hesitate to convey to Admiral Kuper my unqualified opinion that enough had been effected to vindicate the outrage committed upon British subjects by the adherents of Satsuma, at least until I had the honour to receive your lordship's further instructions. The chief agent of that outrage is generally understood to have been Shimadzu Saboolo, the father of the Prince; his guards but obeyed his instructions. No power as yet brought to bear upon Japan by Her Majesty's Government is calculated to coerce the Prince of Satsuma to deliver up his father to condign punishment, as the principal perpetrator of the outrage committed. It was determined upon this to return to Yokohama, when, after a series of severe gales and typhoons prevailing at this season on this dangerous coast, the squadron returned to this anchorage on the 24th inst.

Thus I have the satisfaction to report to your lordship, that the instructions with which I have been charged, onerous as they were palpably and in fact, and having reference to the outrage of last September, have been carried out in letter and in spirit. The indemnities demanded of the Tycoon's government are afloat on board Her Majesty's ships. I have had the honour to transmit to your lordship the written apology of the government of Yedo; and in respect to the Prince of Satsuma having ill-advisedly sought to evade the specific demands which Her Majesty's Government deemed it advisable to direct me to make upon him, after due consideration of all the circumstances, and after long forbearance, his capital is in ashes, his foundries destroyed, and his steamers burnt. It remains for me to trust that Her Majesty's Government may deem that my instructions have been thus fulfilled in a manner best adapted to the difficult circumstances with which I have been, and still continue to be, surrounded.

In conclusion, I trust your lordship will pardon me if I do not resist the natural impulse of desiring to bring under your lordship's notice the special and unlooked-for services rendered on the occasion of the expedition to Satsuma of Messrs. Eusden, Gower, Macdonald, Willis, Fletcher, Von Siebold, and Satow, of this legation. In their absence all communication with the shore at Kagosima must have failed. Interpreters from the shore were held back and never appeared; an attempt to impede all explanations rendered nugatory by a ready knowledge of their own language, which they found on board, nor shall I have accomplished my duty were I to omit to solicit your lordship's favourable notice to the devotion with which these members of Her Majesty's civil service exposed themselves to the anticipated perils of naval combat, unaccompanied by any ostensible prospect of the ordinary honours and rewards attending the exposure of life in the profession of arms.—I have, &c.,

EDWD. ST. JOHN NEALE.

P. S. I have the honour to annex to this despatch memoranda of interviews held on board Her Majesty's ship *Euryalus* with the officers of the Prince of Satsuma. E. ST. JNO. N.

The Right Hon. the Earl Russell, K.G.

(Inclosure.)

FROM THE JAPANESE MINISTERS FOR FOREIGN AFFAIRS TO LIEUTENANT-COLONEL EDWARD ST. JOHN NEALE.

Yedo, August 4, 1863.

On receipt of your despatch of the 3rd August, we have fully understood that you intend to go, within three days, to the territory of the Prince of Satsuma, with the men-of-war now lying in the Bay of Yokohama, in order to demand satisfaction for the murder of a British merchant on the Tokaido last year. But owing to the present unsettled state of affairs in our empire, which you witness and hear of, we are in great trouble, and intend to carry out several plans. Supposing, now, something untoward were to happen, then all the trouble and care both you and we have taken would have been in vain and fruitless; therefore we request the said departure may be delayed for the present. With respect and consideration.

TO HIS HIGHNESS MATSUDAIRA SHIURI NO DAIBOO, THE DAIMIO PRINCE OF SATSUMA.

Her Britannic Majesty's Legation in Japan,
Yokohama, August 1, 1863.

Your Highness,—It is well known to you that a barbarous murder of an unarmed and unoffending British subject and merchant was perpetrated on the 14th of the month of September last (21st day of 8th month of 2nd year of Bung-Kew of Japanese reckoning), upon the Tokaido, near Kanagawa, by persons attending the procession and surrounding the norimon of Shimadzu Saboolo, who, I am informed, is the father of your Highness. It is equally known to you that a murderous assault was made at the same time by the same retinue upon a lady and two other gentlemen, British subjects, by whom he was accompanied, the two gentlemen having been severely and seriously wounded, and the lady escaping by a miracle.

The names of the British subjects here referred to are as follows:—Charles Lenox, murdered; Mrs. Borradaile, Mr. William Clarke, severely wounded; Mr. William Marshal, severely wounded. This event filled with great and just indignation the British Government and people, and excited the sympathy of, and produced a painful impression upon, all civilised countries. Impressed with friendly and considerate feelings towards the Government of the Tycoon, with whom the Queen of Great Britain, my august Sovereign, is in relations by treaty of peace and amity, I acted with proper consideration for the Tycoon's Government by leaving in its hands the legitimate means of speedily arresting and bringing to capital punishment the murderers from among Shimadzu Saboolo's retinue. This necessary forbearance on my part has been entirely approved of by my Government, and appreciated and acknowledged by the Government of the Tycoon. A different course proposed at the moment to be adopted in the excitement attending this barbarous outrage might have resulted in the capture, and, perhaps, death, by summary retribution, of Shimadzu Saboolo himself.

Ten months have now elapsed since the perpetration of this unprovoked outrage, during which period my Government has been duly informed by me of the circumstances attending it, while the Tycoon's ministers have held out to me from time to time assurances and hopes that the murderers would be given up to your highness, according to the Tycoon's desire, and sent to Yedo for trial and execution. But I have had occasion to report to my Government that, removed in your distant domain from the direct influence of the Supreme Government, and shielded also by certain privileges and immunities which belong to Daimios of this empire, you had utterly disregarded all orders or decrees of the Japanese Government calling upon you to afford justice by sending the real criminals to Yedo. They have not been arrested nor sent; and no redress has consequently been afforded by the Tycoon's Government, however desirous it may be of doing so. In the meanwhile I have received the explicit instructions of my own Government how to act in this matter.

The Tycoon's Government may be impeded by the laws of this country, and more especially by political embarrassments, from enforcing its desires upon Daimios of the empire in regard to criminal acts committed by their adherents; but when British subjects are the victims of those acts, Japan, as a nation, must, through its Government, pay a penal y, and disavow the misdeeds of its subjects, to whatever rank they may belong. Under instructions from my Government, I demanded from the Tycoon's Government an apology and the payment of a considerable penalty for permitting the murderous attack made by your retainers on British subjects passing on a road open to them by treaty. Both these demands have been acceded to. But the British Government has also decided that those circumstances constitute no reason why the real delinquents and actual murderers should be shielded by your highness, or by any means escape the condign punishment which they merit, and which they would be subjected to for great crimes, such as they have committed, in all other parts of the world.

It has thereupon been determined by my Government, and I am instructed to demand of your highness, as follows:—First. The immediate trial and execution, in the presence of one or more of Her Majesty's naval officers, of the chief perpetrators of the murder of Mr. Richardson, and of the murderous assault upon the lady and the gentlemen who accompanied him. Secondly. The payment of £25,000 sterling, to be distributed to the relations of the murdered man, and to those who escaped with their lives the swords of the assassins on that occasion. These demands are required by Her Majesty's Government to be acceded to by your highness immediately upon their being made known to you. And upon your refusing, neglecting, or evading to do so, the admiral commanding the British forces in these seas will adopt such coercive measures, increasing in their severity, as he may deem expedient to obtain the required satisfaction.

The commander of Her Majesty's ship of war charged with the delivery of this letter is made acquainted with the specific demands which I have the honour to communicate to you in this letter, and, according as they are accepted or refused, he has received instructions either to carry out and witness their execution within a period of days which will be named, or in the event of a refusal, to commence at once coercive operations pending the arrival of additional forces. Your highness is therefore earnestly requested seriously to consider the course you will adopt upon receipt of this communication, the terms of which it is not in my power to modify, alter, or discuss. I avail myself of this occasion to offer to your highness the assurance of my respect and consideration.

(Signed) EDWD. ST. JOHN NEALE.
Her Britannic Majesty's Chargé d'Affaires in Japan.

TRANSLATION OF A DESPATCH IN JAPANESE FROM KAWAKAMI TAJIMA, MINISTER OF MATSDAIRA SHIURI NO DAIBOO, PRINCE OF SATSUMA, TO COLONEL NEALE, HER BRITANNIC MAJESTY'S CHARGE D'AFFAIRES.

It is just that a man who has killed another should be arrested and punished by death, as there is nothing more sacred than human life, and although we should like to secure them (the murderers), as we have endeavoured to do since last year, it is impossible for us to do so, owing to the political differences at present existing between the Daimios of Japan, some of whom even hide and protect such people; besides this, the murderers are not one, but several persons, and therefore find easier means of escape.

The journey to Yedo (undertaken by Shimadzu Saboolo) was not with the object of committing murders, but to conciliate the two courts of Yedo and Kioto; and you will easily, therefore, believe that our master (Shimadzu) could not have ordered it (the murder). Great offenders against the laws of their country (Japan) who escape, are liable to capital punishment. If, therefore, we can detect those in question, and, after examination, find them to be guilty, they shall be punished, and we will then inform the commanders of your men-of-war at Nagasaki, or at Yokohama, in order that they may come to witness their execution. You must therefore consent to the unavoidable delay which is necessary to carry out these measures. If we were to execute criminals condemned for other offences, and told you that they were the offenders (above referred to), you would not be able to recognise them; and this would be deceiving you, and not acting in accordance with the spirit of our ancestors.

The (provincial) Governments of Japan are subordinate to the Yedo Government, and, as you are well aware, are subservient to the orders received from it. We have heard something about a treaty having been negotiated in which a certain limit was assigned to foreigners to move about in; but we have not heard of any stipulation by which they are authorised to impede the passage of a road. Supposing this happened in your country, travelling with a large number of retainers as we do here, would you not chastise (push out of the way and beat) anyone thus disregarding and breaking the existing laws of the country? If this were neglected Princes could no longer travel. We repeat that we agree with you that the taking of human life is a very grave matter. On the other hand, the insufficiency of the Yedo Government, who govern and direct everything, is shown by their neglecting to insert in the treaty [with foreigners] the laws of the country [in respect to these matters] which have existed from ancient times. You will, therefore, be able to judge yourself whether the Yedo Government [for not inserting these laws] or my master [for carrying them out] is to be blamed. To decide on this important matter, a high official of the Yedo Government, and one of our Government, ought to discuss it before you, and find out who is in the right. After the above question has thus been judged and settled, the money indemnity shall be arranged.

We have not received from the Tycoon any order or communications by steamer that your men-of-war were coming here. Such statements are probably made with the object of representing us in a bad light. If it were not with this object you would certainly have them in writing from the Gorogio; and if so we request you to let us see them. In consequence of such mis-statements great misunderstandings are caused. All this surprises us much. Does it not surprise you? Our Government acts in everything according to the orders of the Yedo Government. This is our open-hearted reply to the different subjects mentioned in your despatch.

29th day of the 6th month of the 3rd year of Bung-kew.
18th August, 1863.

(Signed) KAWAKAMI TAJIMA.
SHISSEI, Minister.

(Inclosure.)

Euryalus, in the Bay of Kagosima, Aug. 17, 1863.

Sir,—I have the honour to acknowledge the receipt of your despatch of the 14th inst., in which you request me to enter upon such measures of coercion as I may deem expedient and best calculated to awaken the Prince of Satsuma to a sense of the serious nature of the determinations which have brought Her Majesty's squadron to this anchorage.

I immediately directed Captain Borlase of the *Pearl* to proceed at daylight on the following morning with a portion of the squadron, to a bay to the northward of Kagosima, for the purpose of seizing and bringing to our anchorage three steamers, the property of the Prince, which had been previously ascertained to be lying there; Captain Borlase was also desired to avoid as much as possible all unnecessary bloodshed or active hostility. This service was executed with much zeal and discretion by Captain Borlase; and the three steamers, namely, *England*, screw, 759 tons; *Sir George Grey*, screw, 492 tons; *Contest*, screw, 350 tons; arrived at the anchorage during the forenoon of the 15th inst., lashed alongside three of Her Majesty's ships; the object I had in view being the detention of these vessels as reprisals until such time as the Prince of Satsuma should either comply with the demands made upon him, or should make advances with a view to their settlement.

These considerations were however suddenly and unexpectedly set aside by the assumption of hostilities on the part of the Japanese; for at noon of the same day, the batteries opened fire with shot and shell on the squadron, an act which it became necessary immediately to resent, in vindication of the honour of the flag, and as a punishment for the outrage; and as it was impossible for the small force at my command to carry out the requisite operations, and at the same time to retain possession of the three steamers in question, I gave orders that they should be set on fire and destroyed, which was accordingly done.

The squadron then, as you are aware, proceeded to engage the batteries of Kagosima, advancing in line of battle (the *Euryalus* leading) from the northermost battery, along the whole line, and finally attacking the southernmost or spit battery, after which I deemed it advisable, in order to ensure the safety of Her Majesty's ships, to direct them to seek an anchorage; the weather, which had been threatening for a gale, becoming at this time most unfavourable, and as night was approaching, the signal was made to discontinue the action, and the squadron returned to an anchorage under Sakura Sima. It was impossible to ascertain precisely the extent of the injury inflicted upon the batteries; but considering the heavy fire which was kept up from the ships, at point blank range, the effect must have been considerable, many guns were observed to be dismounted, the batteries were several times cleared, and the explosion of various magazines gave evidence of the destructive effects of our shell; one half of the town was in flames and entirely destroyed, as well as a very extensive arsenal or factory and gun foundry, and five large Loo-Chew junks, the property of the Prince, in addition to the three steamers as already described. A heavy typhoon blew during the night, and the conflagration increasing in proportion to the height of the storm, illuminated the entire bay. On the following afternoon, the gale having moderated, and as I deemed it necessary to remove the squadron to a safer anchorage than the great depth of water opposite Kagosima afforded, and having also observed the Japanese at work erecting batteries on the hill immediately above the little bay where the small vessels were at anchor, close to the shore, we weighed, and passing in line between the batteries of Kagosima, steamed out and anchored to the southward of the island. This opportunity was taken advantage of to shell the batteries on the Sakura Sima side which had not been previously engaged, and also the palace of the Prince in Kagosima. These operations were attended with complete success. There is every reason to suppose that the palace has been destroyed, as many shell were seen to burst in it, and the fire, which is still raging, affords reasonable ground for believing that the entire town of Kagosima is now a mass of ruins.

Thus having accomplished every act of retribution and punishment within the scope of operations of a small naval force, and having received from yourself the verbal expression of your satisfaction with the extent of those operations, I purpose returning with the squadron to Yokohama, immediately the partial refit which is now in progress shall admit of our putting to sea.—I have, &c.,

(Signed) AUGUSTUS S. KUPER.

Lieut.-Colonel Edward St. Jno. Neale, &c.

A despatch, of which the following is an extract, has been received from Vice-Admiral Kuper, C.B., the Commander-in-Chief of Her Majesty's ships and vessels on the East India and China station:—

"EXPEDITION TO KAGOSIMA.

"*Euryalus*, Gulf of Yedo, August 22.

"In the forenoon of the 14th I proceeded in the *Havoc*, partly for the purpose of satisfying myself as to the position of the three steamers mentioned above, and also to examine the large bay or lake at the head of the gulf above Sakura Sima; it proved to be everywhere as deep as any part we have yet sounded, there being generally fifty fathoms within 100 yards of the shore. A strong breeze from the eastward had already sprung up, and the rapid falling of the barometer indicating the probable approach of a typhoon or heavy gale, the top-gallant masts were sent on deck.

"I have now to report to their lordships the further progress of the events following the receipt, on the evening of this day (14th instant), of a despatch from Her Majesty's Chargé d'Affaires, and its enclosures, in which I was requested to enter upon such measures of coercion as I might deem expedient and best calculated to awaken the Prince of Satsuma to a sense of the serious nature of the determinations which had brought Her Majesty's squadron to the Bay of Kagosima.

"The *Pearl*, *Coquette*, *Argus*, *Racehorse*, and *Havoc*, were sent at daylight on the 15th, under the orders of Captain Borlase, to seize the three steamers already referred to, and which may be briefly described as follows:—*England*, screw, 1,150 tons, purchased for 125,000 dollars; *Sir George Grey*, screw, 492 tons, purchased for 85,000 dollars; *Contest*, screw, 350 tons, purchases for 95,000 dollars. Captain Borlase was further directed to avoid, as much as possible, all unnecessary bloodshed or active hostility. The steamers were accordingly taken possession of without opposition, and brought down to our anchorage during the forenoon of the 15th, lashed alongside the *Coquette*, *Argus*, and *Racehorse*, which vessels anchored in the same bay as before; the object I had in view being the detention of these steamers as reprisals, until the Prince of Satsuma should either comply with the demands, or make overtures to Her Majesty's Chargé d'Affaires which might lead to their settlement.

"The weather still looked threatening.

"At noon, during a squall, accompanied by much rain, the whole of the batteries on the Kagosima side suddenly opened fire upon the *Euryalus*, the only ship within range, but, although many shot and shell passed over and close around her, no damage was done beyond cutting away a few ropes. Finding that the springs on the cable would not keep the ship's broadside on, and as it was impossible with the comparatively small force at my command, to engage the batteries underweigh, and at the same time to retain possession of the steamers, I signalled to the *Coquette*, *Argus*, and *Racehorse* to burn their prizes, and then to the whole squadron to weigh and form the line of battle according to seniority, the *Havoc* being directed to secure the destruction of the three steamers.

"Previous to this, the *Perseus* having slipped her cable, was directed to fire on the north battery until the signal was made to form line-of-battle, which service was executed by Commander A. J. Kingston with great promptness.

"Although the weather was now very dirty, with every indication of a typhoon, I considered it advisable not to postpone, until another day, the return of the fire of the Japanese, to punish the Prince of Satsuma for the outrage, and to vindicate the honour of the flag; and everything being now ready, I proceeded towards the batteries, opening fire upon the northernmost one with considerable effect, and passed, at slow speed, along the whole line, within point-blank range. Owing probably to the unfavourable state of the weather, the ships astern did not maintain their positions in as close order as I could have wished, and the *Euryalus* was consequently exposed to a very heavy and well-directed fire from several of the batteries at the same time, and suffered somewhat severely. About this time, also, and whilst in the thickest of the action, I deeply regret to state that I was deprived, at the same moment, of the assistance of Capt. Josling and Commander Wilmot, both of whom were killed by the same shot whilst standing by me on the bridge of the *Euryalus*, directing the

Digitized by Google

fire of the quarters, and setting an example of coolness and gallantry which was emulated throughout the entire ship.

"In consequence of the dense smoke, and occasional heavy showers, it was difficult to ascertain the extent of the damage done to the earthwork batteries, but by the time the *Euryalus* got abreast of the last or southernmost battery, I could observe the town to be on fire in several places; and the weather having now assumed a most threatening appearance, I considered it advisable to discontinue the engagement, and to seek a secure anchorage for Her Majesty's ships. The *Racehorse*, owing to a momentary stoppage of her engines, unfortunately took the ground opposite the northern battery, but by the prompt energy of the commanders of the *Coquette*, *Argus*, and *Havoc*, which vessels were despatched to her assistance, she was got off without damage. The steady fire kept up by Commander Charles R. F. Boxer prevented the *Racehorse* receiving any serious injury from the battery, which had already been much disabled by the fire of the other ships. The *Havoc* was then ordered to set fire to five large junks belonging to the Prince of Satsuma, which Lieutenant George Poole accomplished in a most satisfactory manner; and these, as well as a very extensive arsenal and foundry, for the manufacture of guns, shot, and shell, together with large storehouses adjoining, were also completely destroyed.

"During the whole of the succeeding night it blew almost a hurricane, but all the vessels of the squadron rode it out without accident, with the exception of the *Perseus*, which vessel dragged her anchors off the bank into sixty fathoms water, and was compelled to slip her cable during the following forenoon, when the gale had somewhat moderated. The gale subsided gradually during the 16th, and as I observed the Japanese at work, apparently erecting batteries on the hill above the anchorage, enveloped in trees and bushes, and which might have inflicted much damage upon the small vessels lying within pistol shot of the shore, I became anxious for their safety, and determined to move the squadron out to the anchorage we had occupied on the night of our arrival in the Gulf, for the purpose of repairing damages, fishing spars and refitting, previous to proceeding to sea.

"The squadron accordingly weighed at 3 P.M. of the 16th, and passing in line between the batteries of Kagosima and Sakura Sima, steamed through the channel and anchored to the southward of the island, taking advantage of the occasion to shell the batteries on the Sakura side, which had not been previously engaged, and also the palace of the Prince in Kagosima. A feeble fire only was returned from the batteries which had not been closely engaged in the first attack, and this happily without effect upon Her Majesty's ships.

"The injury inflicted upon the possessions and property of the Prince of Satsuma, during the operations above described, may be briefly summed up as follows, viz.:—The disabling of many guns, explosion of magazines, and other serious damage to the principal batteries, the destruction by fire of the three steamers and five large junks before mentioned, the whole of the town of Kagosima and palace of the Prince, together with the large arsenal and gun factory and adjacent storehouses, added to which may be noticed the injury to many of the junks lying in the inner harbour, caused by explosion of shells which may have passed over the batteries. The conflagration thus created continued with unabated ardour up to the time of the departure of the squadron, forty-eight hours subsequently to the first attack.

"I have already reported to their lordships, in a separate despatch, the severe loss the profession has sustained in the melancholy death of Capt. John J. S. Josling and Com. Edward Wilmot, both of this ship, who fell while gallantly doing their duty in the face of a heavy and destructive fire. With much regret I have to add that the returns received from the various ships present a list of casualties unusually great, being no less than thirteen killed and fifty wounded, the half of which occurred in my flagship alone. The particulars of these casualties will be found in an enclosure to this despatch.

"Having thus accomplished every act of retribution and punishment within the scope of the operations of a small naval force, and having received from Her Majesty's Chargé d'Affaires the expression of his satisfaction with the extent and complete result of those operations, and of which I trust Her Majesty's Government may also be pleased to approve, I left the Gulf of Kagosima, in company with the squadron, on the afternoon of the 7th inst., on my return to Yokohama.

"It now becomes my duty to point out to their lordships the zealous and efficient assistance I received during the above operations, carried out in a totally unknown port, and under circumstances of considerable difficulty, from stress of weather, &c., from the various officers present at Kagosima. I deemed it proper to convey to the squadron generally (as will be seen by the annexed copy of a memorandum issued on the 16th inst.) the sense I entertained of the gallantry and zeal displayed by all classes; and although the melancholy termination of the gallant career of Captain Josling and Commander Wilmot has enabled me to reward with immediate promotion a few of the officers engaged, I should be wanting in appreciation of the same high qualities displayed by others were I not to bring their names prominently to the notice of the Lords Commissioners of the Admiralty for their favourable consideration.

"The services of Captain John Borlase, C.B., of the *Pearl*, have been so frequently brought before their lordships by my predecessor in this command that I feel it will be unnecessary for me to do more than to add my testimony to the valuable assistance I have invariably received from that officer, and particularly during the operations I have here had the honour of describing. Commander John H. I. Alexander, of the *Coquette* (since promoted); Commander L. J. Moore, of the *Argus*; Commander A. J. Kingston, of the *Perseus*; and C. R. F. Boxer, of the *Racehorse*, were severally and collectively most active and energetic in their co-operation, and in their efforts to carry out my wishes in every respect. Lieutenant George Poole, commanding the gunboat *Havoc*, an officer of long standing and high character, rendered most useful and efficient assistance in zealously performing the various duties with which he was entrusted, and merited my warmest acknowledgments.

"The services of other officers under my command, I would also desire to commend to their lordships' favourable notice; but those which have been brought more prominently to my knowledge are those of Mr. W. H. Parker, master of my flagship, who, with the assistance of the master of the ships present, succeeded in making a rough survey of the Bay of Kagosima, without which the squadron would have been unable to take up the eligible position it subsequently occupied whilst attacking the batteries. The steady and confident manner in which Mr. Parker steered the *Euryalus* within point blank range deserved my highest commendations.

"I have also to thank Captain Frederick Brine, Royal Engineers, whose services were placed at my disposal by the Major-General commanding in China, for much useful information as to the strength and position of the batteries, &c.

"Their lordships will observe the testimony borne by Mr. Morgan, surgeon, to the able assistance rendered him by Mr. Charles R. Godfrey, acting-surgeon of the *Vulcan*, who at the time of the engagement was on board this ship waiting a passage to Shanghai.

"In order to make the nature of the operations described in this despatch the more intelligible to their lordships, I have the honour to enclose a chart of the bay of Kagosima and position of the batteries, together with an approximate return of the guns they respectively contained at the time of the attack.—I have, &c.,

"AUGUSTUS L. KUPER,
"Vice-Admiral and Commander-in-Chief.

"To the Secretary of the Admiralty, London."

Euryalus, at Kagosima, August 17, 1863.

Sir,—I have the honour to transmit, for the information of the Commander-in-Chief, a detailed statement of the casualties in the squadron engaged with the forts at Kagosima, on the afternoon of the 15th instant. I would beg to bring to the notice of the Commander in-Chief the able assistance rendered me by Mr. Charles R. Godfrey, acting-surgeon of Her Majesty's ship *Vulcan*, who was awaiting passage to that vessel, trusting the Commander-in-Chief will be pleased to bring the same before the favourable notice of the Lords Commissioners of the Admiralty. Mr. Edward A. Birch, acting assistant-surgeon, I would beg also to mention, who was untiring in his attention to the wounded.—I have, &c.,

D. L. MORGAN, Surgeon.

Commander James E. Hunter, Commanding
Officer of Her Majesty's ship *Euryalus*.

LIST OF CASUALTIES IN THE SQUADRON EMPLOYED AGAINST THE FORTS AT KAGOSIMA, ON THE 15TH OF AUGUST, 1863.

Euryalus, Kagosima Bay, Aug. 17, 1863.

Her Majesty's Ship *Euryalus*.—J. J. S. Josling, captain, age 37, killed, skull shot away; Ed. Wilmot, commander, age 30, killed, back part of skull shot away; Michael Hegarty, A.B., age 22, killed, compound fracture of the skull and jaws; Patrick Fleming, private R.M. light infantry, age 23, killed, fracture of base of skull; William Lindsey, A.B., age 21, killed, fracture of base of skull; John Warren, ordinary, age 19, killed, compound fracture of skull; John Smith, A.B., age 22, killed, compound fracture of skull, and compound fracture of pelvis; William Yardley, A.B., age 24, killed, compound fracture of skull; John Hawkins, ordinary, aged 19, mortally, died the same evening, compound fracture of pelvis and upper third of femur; Thomas Harding, boy, 1st class, age 17, mortally (since dead), right side of chest torn away by shell, ribs fractured, lungs lacerated, also compound fracture of arm; Alfred Jephson, lieutenant, age 22, slightly, contused wound from shell on right shoulder, face burnt by explosion, also various minor contusions; George W. Jones, assistant-paymaster, 1st class, age 26, slightly, contused splinter wound right leg; James Kennett, ordinary, age 28, slightly, face and arms burnt by explosion of shell; John Pittman, ordinary, age 20, slightly, splinter scalp wound, face burnt by explosion of shell; Silvanus Abbott, A.B., age 22, slightly, splinter wound in back of both forearms, and contusion of inside of left thigh; John Skinner, ordinary, age 19, slightly, face scorched with powder; W. Mitchell, ordinary, age 22, slightly, scalp wound (splinter); George Reader, leading seaman, age 23, slightly, contusion of right arm (splinter); Samuel Fox, A.B., age 22, slightly, contusion of both arms, contusion of right groin and leg; Henry Oram, ordinary, age 19, slightly, contused wound of left leg (splinter); Isaac Newberry, ordinary, age 19, slightly, wound of scalp and left foot by splinters; William Badcock, wardroom cook, age 40, slightly, contusion of left side and arm (splinter); William Huggett, ordinary, age 19, slightly, contusion of right leg (splinter); W. Howden, private R.M. light inf., age 26, dangerously, right side of face shattered by shell, right half of lower jaw excised; Daniel Leary, private R.M. light inf., age 21, severely, shell wound of right thigh, eyes, face, and arms scorched by explosion; William Sale, gunner, R.M.A., age 27, slightly, contusion of chest from splinter; Eugene Neil, leading seamen, age 24, slightly, contusion of left arm, fingers and face scorched by explosion of shell; John Stiff, A.B., aged 23, slightly, lacerated wound of left foot by splinter; George Bartlett, ordinary, aged 19, slightly, face burnt by explosion; George Alexander, ordinary, age 19, slightly, contusion of right thigh (splinter); Thomas Mitchell, A.B., age 22, slightly, splinter wound of foot, face scorched by explosion of shell.

Her Majesty's Ship *Pearl*.—Mr. Armstrong, carpenter, 2nd class, age 38, slightly, splinter wound of forehead and ankle; James Friend, quartermaster, age 44, dangerous, splinter wounds of face and left thigh; William Farrell, drummer, R.M., light inf., age 18, severe, splinter wounds of buttocks, thighs, and feet; H. Mercer, A.B., age 26, slight, splinter wounds of ankles; George Kimmins, ordinary, age 21, slightly, splinter wound of calf of leg; F. Dobson, blacksmith, age 32, slightly, splinter wound of finger; James Mitchell, boy, 2nd class, age 16, slightly, splinter wound of calf of leg.

Her Majesty's Ship *Coquette*.—Thomas Finn, gunner, R.M.A., age 27, killed, compound fracture of pelvis; Henry Gale, captain maintop, age 29, mortally (dead), compound fracture of upper third of right thigh; D. A. Denny, lieutenant, age 26, dangerously, gunshot wound of left knee; William Harris, gunner, R.M.A., age 30, dangerously, gunshot wound of left leg; William Mumford, private, R.M., age 35, severely, contused wound of right thigh; William Vernon, boy, 1st class, aged 17, slightly, contused wound of left side.

Her Majesty's Ship *Perseus*.—George Head, boy, 2nd class, aged 16, mortally (dead), compound fracture of both legs; Fras. J. Pitt, lieutenant, age 22, slightly, incised wound on left leg and contusion of right leg; Robert Gilpin, master, age 33, slightly, burn of right hand from effects of

Digitized by Google

a shell; H. Cook, acting chief engineer, age 40, slightly, incised wound of the third finger of right hand from splinter; J. R. Aylen, midshipman, age 17, slightly, contusion and punctured wound under right scapula from splinter; Thomas Biggs, 2nd captain foretop, age 29, slightly, lacerated wound of right arm; William Knight, cooper, 25, slightly, incised wound of left arm from splinter; Charles Suitors, A.B., age 27, slightly, lacerated wound of left ancle from splinter; Wm. Gibson, ordinary, age 21, severely, lacerated and contused wound of both arms from splinter; Charles Gale, private R.M. light inf., age 26, dangerously, compound fracture of right arm and wound of right thigh from splinter.

Her Majesty's ship *Argus*.—Wm. Barnes, captain afterguard, aged 31, slightly, splinter wound of leg; John Fountain, A.B., aged 29, slightly, splinter wound of face; James Hemett, ordinary, aged 20, slightly, splinter wound of leg; Thomas Lardner, private R.M.L.I., aged 22, slightly, splinter wound of leg; George Doyne, gunner's mate, aged 30, slightly, splinter wound of arm; William Cooper, captain forecastle, aged 41, slightly, splinter wound of face.

Her Majesty's ship *Racehorse*.—William Chilton, A.B., aged 28, dangerously, amputation of left arm; James Keenan, 2nd captain foretop, aged 28, slightly, laceration of thumb on right hand; James Purr, boy, 1st class, age 19, slightly, contusion of right arm.

D. L. MORGAN, F.R.C.S., Surgeon.
(Approved.) JAMES E. HUNTER, Commander.

ABSTRACT.

Euryalus.—Killed, 10; wounded, 21; total, 31. *Pearl*.—Wounded, 7. *Coquette*.—Killed, 2; wounded, 4; total, 6. *Argus*.—Wounded, 6. *Perseus*.—Killed, 1; wounded, 9; total, 10. *Racehorse*.—Wounded, 3. Killed, 13; wounded, 50; total, 63.

OPINIONS OF THE PRESS.

(THE TIMES.)

The report of the naval action in the harbour of Kagosima will be read, we fear, with more interest than satisfaction. Five English ships of war, with an Admiral in command, entered the bay on the 11th of August to demand satisfaction for the murder of a British subject. The demand was refused, or evaded, in the manner our past experience of the Japanese authorities might have led us to expect; and a signal and immediate retaliation was made—more promptly, perhaps, than the native officials, if they judged us by our past forbearance, could have anticipated. After an engagement of six hours with the twelve well-armed forts that line the harbour, all the batteries were silenced, their magazines blown up, and a great portion of the town of Kagosima destroyed by fire. If the blow should really prove a lesson, and convince the Government that the Treaty with the European Powers is a compact of which the observance will certainly be exacted, the effect may be salutary; but the cost of the lesson has been heavy enough to make us seriously regret its necessity. That the collision was inevitable we feel assured. It had been calculated, prepared for, and sought. The long line of forts, with their eighty-eight guns and mortars, could not have been hastily constructed and mounted; nor could the rapidity and precision of the fire with which the English vessels were met, and which told so fatally on the *Euryalus*, have been attained by men unused to the service of artillery. The fighting, indeed, was very severe. The action was not short, but certainly sharp, and, in the local result, sufficiently decisive. Prince Satsuma's town is in ashes, his batteries dismantled, and his three English steamers captured and burnt. But the return of the killed and wounded in the action appended to the report might have been less in number for a greater battle, with an enemy we should have thought more formidable. Altogether, the engagement compels us to consider the extraordinary condition of our relations with the Japanese Empire.

That we are fighting is, unhappily, but too evident. But are we at war; and, if so, with whom, or what? We have come in contact with a social system and a political organisation we do not yet understand. Even when dealing with the more simply constructed Administration of China, the conclusion of a treaty of peace was no security against an act of violence cunningly contrived as a piece of treachery, and yet very stupid as a calculation of consequences. We were not at war with the Chinese Government when our ships were fired on in the Peiho river; and, notwithstanding the engagement between our ships and the forts in the harbour of Kagosima, we are still at peace with the Government of Japan. But a peace liable to incidents which have all the worst features of war evidently requires explanation. One side or the other grossly misunderstands its principles. Something requires to be cleared up. We fear the question is much more complicated than it appears. As seen from the Japanese side, it may be there is no Treaty existing at all. There was much discussion, signing, and interchanging of signatures, with which European diplomacy thinks everything accomplished. We regard the Treaty as a solemn compact. The authorities of Japan seem, at the time it was made, to have considered it rather as a device to pacify and get rid of the intrusive foreigners. They have evaded and broken its provisions continually from the hour it was concluded, their audacity increasing exactly in proportion as time lessened their first apprehensions. How, when, and by what means the Japanese made their preparations for the open defiance we have now encountered we may hereafter learn; but we doubt whether, at the date of the Treaty, Prince Satsuma possessed three war steamers, well-built forts mounted with heavy artillery and mortars, and troops capable of firing them for six hours with singular "rapidity and precision." The Prince is a great feudal chief, one of the wealthy and powerful vassals whom European sovereigns in past times found so capriciously loyal. But the Prince is only one of many such potetates in Japan, and we should like to know more distinctly why he has drawn the British thunder on himself so readily. Here is the complication of the matter. We are fighting with a subject who seems as strong for hostilities as the Government, yet we are at peace with the Government itself. Now, as al the Daimios of Japan keep trains of ruffianly retainers, who are the terror of the mass of the people themselves, it is a remarkable circumstance that Mr. Richardson should have been murdered by the armed servants of the only Japanese noble who had staamers, a harbour, such forts, and guns. We have punished Prince Satsuma by the kind of vigour with which we should burn out a Malay pirate's stronghold. But this incident may expand into hostilities with a populous empire, and before going further we ought to know whether the Prince really stands alone in his defiance of Great Britain, or whether he is identified with the Japanese Government. Are we, in fact, at war with the Tycoon, or the Mikado, or with both, or with Prince Satsuma only, or with all three together, and the whole princely class of Japan besides? If there is to be any intercourse at all between the two nations, we must be secured from the outrages which have been too often repeated to be accidental. But to obtain that security we must find out where the real power of Government in Japan is placed. Of the two Emperors, one, we are told, is a ruler in name only. At present it suits a purpose to assure us that the second sovereign of the d uality is powerless also, and we are referred for redress to a subject for whose misdeeds the Government does not hold itself responsible. Prince Satsuma happens to be a kind of Japanese Baron of the Cinque Ports, charged with the defence of the seacoast. He was, therefore, assailable, and may be more prudent for the future. But what shall we do if any British residents are murdered by the retainers of an inland potentate? We shall require an army, an invasion, and an occupation of the country to get at him. Other nations must protect their citizens in the same manner, as we cannot possibly assume the championship of all Europe; and what is the prospect such a state of things holds out? In our own interest we are bound to discover whether the apparent order and regularity of the Japanese system of administration is only a disguised Oligarchy. If so, our Chinese experience will be of little service to us. There was always an Imperial Government at Pekin which could make and unmake the local officials, who were to a great extent responsible for their acts. But independent Princes, having enormous revenues of their own, with which they can maintain armies, and now, it seems, even purchase fleets, are a very different class from the Chinese Mandarians. We hardly anticipated this difficulty in Japan, which we represented to ourselves rather as another China. But that nation may have gone through some stages of development Japan has hitherto escaped.

Will Europe furnish the invaders who are to consolidate its Government into something more like an empire than it can be if Prince Satsuma is really a specimen of his class? If he is, we have stumbled on another India in entering Japan, and may have a repetition of much of our Indian policy forced on us. We should contemplate the necessity with very qualified satisfaction. We have no wish to become territorial lords in Japan. We should be quite satisfied to retain the character in which we first went there—that of merchants. If compelled to assert our power to secure our own safety, the change will be forced on us, and we should not stand alone in the transformation. If Japan has anything to render it a prize, it will be shared among the European Powers, and what is now influence would become dominion by some process of partition. That change is possible in the East we see by what is going on in China, and both China and Japan contain elements which an encroaching and ambitious policy might with little difficulty turn to account. Under European training and leaders the Chinese become good soldiers, whether Imperialists or rebels. Those leaders may not always be content to serve either cause, if they can carve out a throne for themselves. The retainers of Prince Satsuma were scarcely converted into excellent artillerymen without European instruction. That kind of training might be turned against the present authorities, as it is being directed by the adventurous spirits who are appearing as military chiefs in China. We hope the Government of Japan will be found stronger than it describes itself, for if it cannot be treated with as a Power, or give any protection to Europeans, they will find means of protecting themselves, and the fate of the native Princes of India may be that of the powerful nobles of Japan.

(MORNING POST.)

The details of the late naval engagement in the Japan seas confirm the impression at first made on our mind that its results afforded slight matter for congratulation. We shall doubtless claim a victory, but impartial inquirers may well question the grounds on which that claim will be based. If the object with which our fleet was despatched to Kagosima was attained, we have a right to proclaim ourselves successful; but if that object was not attained, then it is difficult to avoid drawing the opposite conclusion—that we have been worsted. Engagements, however, both on sea and land, are but seldom decisive; and the aggressor, though he may fail to annihilate his opponent, may justly pride himself on having inflicted more damage than he received. Now, the object with which the English fleet, under Admiral Kuper, proceeded to Kagosima was to obtain reparation from Prince Satsuma for the outrages recently committed on English residents in Japan. After some tedious negotiation, this reparation was refused. An engagement between the fleet and the batteries defending the town of Kagosima then followed, the Japanese being the first to open fire. The contest began about noon and closed at sunset, at which time some of the Japanese batteries were silenced and the town of Kagosima in several places set in flames, whilst on their side the English had lost thirteen killed, inclusive of a naval captain and a commander' and fifty wounded, besides the damage sustained by the fleet in the course of the action. On the following day the fleet again engaged the batteries, but at long range, and then stood out to sea without having suffered, or to any appearance inflicted, any additional loss. That the object for which the fleet sailed to Kagosima was not attained is sufficiently evident, and, consequently, we are obliged to fall back on the reflection that the punishment inflicted on the Japanese was greater than that which we ourselves received. Even of this, however, there may be some question, and when we glance at the long list of casualties we may well doubt whether our victory has not been bought too dear. Of the actual damage sustained by the Japanese we are but imperfectly acquainted. The effect of silencing a battery is only manifest during the remainder of the engagement in which that result is produced; and there can be no reason to doubt that, had the attack been renewed three days later, the Japanese would have been enabled to offer as effective a resistance as on the first occasion. But the town, we are informed, is a mass of ruins, and the palace, the factories, the arsenal' and the warehouses are totally destroyed. This, however, is mere conjecture. During the time the engagement lasted the smoke from the

Digitized by Google

ships was carried towards the land, and rendered it impossible, except at intervals, for those on board the fleet to see the forts with which they were engaged. When night set in the aspect of the sky gave evidence of a considerable conflagration. All we know for certain is that we destroyed three steamers and some junks, and that we inflicted some damage, possibly considerable, on the batteries and the town. We also know that on the following day the fleet stood out to sea, and that an immediate renewal of the bombardment was not at that time probable. Under these circumstances, then, we think we are right in saying that we have but scant subject-matter for congratulation.

The fleet, which was composed of seven vessels, entered Kagosima Bay on Tuesday, the 11th of July. The *Euryalus*, the Admiral's flag-ship, carried 35 guns, the *Pearl* 21, the *Perseus* 17, and the remainder only carried from two to six guns each. On the 12th the fleet anchored in front of the town, under cover of the batteries, and negotiations were then opened with the Japanese with a view of obtaining from Prince Satsuma the reparation which was required. This and the two following days were occupied in negotiation, and on the morning of Saturday, the 15th, the Japanese authorities having refused to comply with our demands, the fleet having in the meantime withdrawn to a greater distance from the shore, three of the vessels composing it proceeded up the bay, took possession of three of Prince Satsuma's steamers, and, together with their prizes, rejoined the rest of the fleet. This operation appears to have been effected without any opposition, but about two hours afterwards the batteries opened fire on the *Euryalus* and *Perseus*, which were at anchor within range of their guns. The fleet thereupon weighed anchor; and, having set fire to the prizes, formed line of battle, and proceeded to engage the batteries. The latter, which were ten in number, mounted in the aggregate about ninety guns, inclusive of four mortars, and were situated at intervals along the shore of the bay. The weather, which had been stormy in the morning, became still worse in the course or the day, and the engagement appears to have been fought in the midst of a hurricane. At dusk the town was fired in several places, and three of the ten batteries silenced. The ships then returned to their anchorage, with the exception of one—the *Racehorse*—which had gone aground under the fire of neighbouring battery, but which, with the assistance of the *Argus*, was ultimately enabled to rejoin her companions. Whilst the fight was at its hottest the captain and commander of the *Euraylus* were struck down by the same shot, and a shell from one of the batteries exploding on the deck of the same vessel killed simultaneously seven men and wounded severely six others. When such havoc was made by one of the few shells which the Japanese succeeded in dropping into one of our vessels, we may well congratulate ourselves that the remainder went wide of the mark. The guns used by the Japenese varied between 150-pounders and 32-pounders, and are said to have been of American manufacture.

However gallantly Admiral Kuper's fleet behaved, and however severe may have been the loss inflicted on the Japanese, there can be but little doubt that the force was not sufficiently powerful for the enterprise which was undertaken. If it was our object to reduce Prince Satsuma to submission, we have undoubtedly failed to do so, and if the batteries which line Kagosima Bay are not only to be silenced, but dismantled, a more powerful fleet than that at the Admiral's disposal must be employed. The ships are said to have expended a considerable quantity of ammunition, and we are almost led to conjecture that deficient supplies contributed as much as anything else to render necessary their withdrawal from the scene of action. It is probable also that the English Admiral was convinced by the results of the first day's engagement of the inexpediency of attempting the absolute reduction of Kagosima and its batteries with his present force. He will await reinforcements, and then return to the attack. In the meanwhile, however, the delay cannot but be prejudicial to our interests. The loss of his steamers and the destruction of a portion of his town will, doubtless, make Prince Satsuma regret that he did not in the first instance comply with our demands; but they will not in themselves bring him to terms. We have no alternative now but to proceed vigorously with the war which has been thus inaugurated; much, however, remains to be done before we can hope to bring it to a successful issue.

(HERALD—CONSERVATIVE.)

We are hard at work civilising the Japanese. Before we intruded our company upon them they were very well content with their old manners and customs. They had no particular wish of their own for a closer contact with the Western nations, being deterred from it by the same kind of instinct as that which taught the earthen pot of the fable that it was unadvisable to swim down the river in close company with the iron pot. We, however, thought better. We pitied these poor barbarians in their obstinate and self-afflicting isolation. We would teach them our customs, inoculate them with our superior civilisation, make them know the advantages of commerce, the working of those political institutions which answer so admirably in Europe as well as in America; we would teach them to use pocket-handkerchiefs, wear stockings, and dress in tail-coats. More than this, we would convert them to Christianity. But however good all this might be, there is no denying that we addressed ourselves to the task in a strange way. No one thought of trying persuasion or argument. That would be too slow. The door was not at once opened to our knocking, and so we broke it open. The fortress of a thousand years did not admit us at the first summons, and so we breached it with cannon-balls. Lord Elgin, with a fleet of steamers, made an armed entrance into Japan, and forced his treaty of commerce down the throat of the reluctant Tycoon and still more reluctant Mikado. This was a strange method of persuasion, a fashion of civilising scarce heard of since the time of Charlemagne, who drove the Germans to baptism at the point of the sword. If the beginning of our recent acquaintance was bad, the Japanese have a still better right to conclude from our late conduct that our views of Christian civilisation are of the same decided nature as those which the verse of "Hudibras" ascribed to the Puritans of this day. We oo are—

> "Such as do build our faith upon
> The holy text of pike and gun,
> Decide all controversies by
> Infallible artillery;
> And prove our doctrine orthodox
> By apostolic blows and knocks."

It is scarcely by such sanguinary proceedings as the burning of Kagosima that we can hope to vindicate the honour of the British name, inculcate a becoming regard for our superior civilisation, or commend to the hearts of the heathen the religion of Christ.

Our readers must have already perused with the interest which it deserves the history which we have extracted from the columns of the *Japan Herald*. We do not mean to say a word in defence of the titled miscreant whom Admiral Kuper has thus attempted to chastise. Satsuma is one of the richest of the Daimios of Japan, a determined enemy of foreigners, and adherent of the party of the Mikado as opposed to that or the Tycoon, which is said to favour us. In the extent of his territory, of which he seems absolute lord, in his wealth and influence, and by reason of his great ability and commanding character, he is something more than a feudatory, he is almost the equal of Mikado and Tycoon. His temper appears to be vindictive and cruel, but his tastes are to some extent civilised and progressive. While he hates foreigners, he condescends to buy steam-boats from them, and constructs his batteries on the most approved European model. It was by the retainers of this man, and probably by his orders, that Mr. Richardson was brutally murdered at Yokohama. Our Government had, of course, no choice but to demand an indemnity and full atonement for the outrage. The Government of the Tycoon paid the money, but declared that it could do no more. It had no power to apprehend the murderers or to touch Prince Satsuma, who rested secure among his subjects, enthroned as a monarch in the midst of his vast possessions, which comprehend a large portion of the Island of Kewsew.

In a deep bay to the south of that island lies the beautiful town of Kagosima. To that bay Admiral Kuper repaired with his fleet, with Colonel Neale, the British envoy, on board the flag-ship. So far it was right. We have always recommended, in default of proper amends being made by the Japanese Government, that an attempt should be made to chastise the real offender. If it had been in the power of the British admiral to lay hold of this insolent ruffian and make an example of him—to cut off his head, shoot him, drown him, hang him at the yard-arm, nail him to a barn door *pour encourager les autres*, or administer any other kind of corporal punishment that might be thought desirable or becoming, we should not have made the least objection to it. We can have no pity—we ought to have none—for the brute who is said to have looked on and given his orders, while poor Richardson, helpless and alone, was hacked to pieces by the roadside. It is another thing to visit his fault upon thousands of innocent men, women, and children, who had done and thought no evil, and had probably never seen or heard of us till the day when they were burned in their homes by the red-hot shot of the *Euryalus*, or blown to pieces in the streets by British bombshells. When the retainers of Prince Satsuma refused satisfaction it was right enough to give him a lesson, to seize upon his property, those steamers which he had just bought from us, to destroy his place, blow up his arsenals, silence, if possible, his forts. We wish this could have been done without burning Kagosima to ashes. We shudder as we read that this unfortunate town of wooden houses contained 180,000 souls. It was not without a lamentable loss on our part that Admiral Kuper succeeded in destroying the city of Satsuma. The guns of his batteries seem to have been well served. A single shot deprived us of two of the ablest officers in the British service. Poor Josling and Wilmot were doing their duty as brave men when they died. Every officer and man in the fleet seems to have fought as an Englishman should. They were obeying orders; and it is not they who are to be blamed for this truculent example of a fatal and cruel theory, which supposes that the only way in which to deal with Asiatics is to strike terror, to spare none, to destroy the innocent with the guilty.

(DAILY NEWS.)

The new light cast upon our political relations with Japan imposes a new duty on all citizens concerned for the honour of their country. The blow long threatened has fallen upon the Japanese, and we are now able to estimate its effect. Our naval operations have been attended with the fullest success. As a demonstration of power, nothing could be more comple e. We have wiped out a great city, and the Japanese must now be convinced that it would be easy for us to repeat the operation round the entire circumference of their coast. Having done this, however, we are now told by those who ought to know best, that we have done nothing, and are so far from having attained the end of our endeavours, that the Japanese are as obstinate as they were before Kagosima was destroyed. It is said that they are so self-sufficing and self-satisfied a people that even if we should visit every port, and destroy every maritime city, the only effect would be that they would retire to the interior, and live contentedly without us. But this we are told must not be allowed on any account. The futility of our operations being now as conspicuous as their gallantry, it is assumed that we must carry war to the capital of the country.

Before any such resolution is come to we would earnestly appeal to our countrymen of every rank and degree, and especially we would call upon those of our statesmen who acknowledge a rule of right and wrong in the conduct of States, to reconsider seriously our relations with Japan by the light of recent events. Especially we appeal to Earl Russell and Mr. Gladstone, who so nobly protested against an unnecessary China war, and with them to the high-minded statesman who stands at the head of the great Conservative party, not to suffer England to be pledged to the task of carrying death and sorrow into the homes of a people who were happy and inoffensive before we interfered to force upon them an intercourse which has been fruitful in disaster, and who even now desire no more than to be permitted to enjoy their own islands in peace. First of all, what objects do our Government seek in Japan? A British subject has been murdered, and it was necessary to require satisfaction; that satisfaction having been refused, has been taken an hundredfold at the cannon's mouth. Mr. Richardson's death has been expiated by the slaughter of hundreds of Japanese who never heard his name. Is that too little? And if so, where is vengeance to stop? But it is said we have treaties to maintain. But they are our own treaties, and it is always for us to consider how far and by what means it is right and expedient to enforce them. Let us beware of deluding ourselves by mere formal pleas. Embassies, treaties, and expeditions are only means to ends, and by the value of the ends we pursue in Japan, as by a standard, impartial history will try our measures. Those who come after us will not ask what technical rights we had, but how and for what

Digitized by Google

purposes we used our power. Do the ends for which we seek to establish ourselves in Japan justify the terrible means which it is now seen we must employ if we will persist in forcing our intercourse upon that unwilling country? Only let the intelligence of England entertain, and the conscience of England decide that question, and we are perfectly willing to abide the result. Now, the sole business of Englishmen who go to Japan is to get money. We find this universally admitted. It is not suggested that our countrymen go there with any other object. If there is such an one we have not heard of it, and shall be glad to learn what it is. There is no need to enlarge on the beneficent effects of international commerce. We all acknowledge them where they exist. The question now is, whether we shall attempt to force trade by war, whether we are justified in destroying towns and slaughtering people to obtain access to a field of mercantile operations? We know what answer some would make to this question. They are ready to say that this is simply a practical matter; that a good trade is to be done with Japan if we will only use our fleets and armies to overcome opposition, and we shall be very foolish if we do not so employ them. To such persons we have nothing to say. We appeal to those who believe that considerations of justice and humanity are entitled to a place in all our dealings with our fellow-men. Ten years ago the Japanese were all but unknown to us. They dreaded intercourse with foreigners, and kept us out of their country. Since then English travellers have visited the interior of their islands, and been astonished at the order and prosperity visible on every side. The bright pictures of Japan drawn by the Bishop of Victoria will recur to many minds. Our intercourse began after the conclusion of the Chinese war of 1858, by the signature of a treaty which it is now acknowledged was obtained simply by the terror of our arms, which had just been so successfully displayed on the neighbouring continent. The Japanese have exhibited an unequivocal and unconquerable aversion to our presence. It would be easy to show from the signature of the treaty they have acted wrongly, that they probably never meant to keep their engagements, and that the devices they have resorted to to get rid of them are detestable. And if their wrong could constitute our right, our case would be unimpeachable. But when everything has been said on this point, the question returns in all its force. Are we, as a great Christian people, morally entitled to enter upon a sanguinary war for the sole purpose of extending trade? If we decide that we may wage war in order to open to our citizens new spheres in which to make money, how can we in future raise our voice against any war whatever? and how can we rebuke another nation for its absorbing devotion to the almighty dollar? If we could hope that these questions would be taken to heart by our countrymen and considered on their merit, we should have no fears for the result. The danger to be apprehended is, that people will be persuaded that, as a nation we are so completely under the dominion of circumstances that it is of no use asking what is right, but that we have only to resign ourselves to the inevitable. But posterity will hold this generation responsible for its faults, and will not absolve its misdeeds because they were perpetrated under the demoralising influence of a cowardly fatalism.

(STAR.)

It is a praiseworthy characteristic of Earl Russell as Foreign Secretary that he does not delay the publication of official intelligence. He has lost no time in making public the despatches relating to the hostilities in Japan. The *London Gazette* of Friday night has placed in our hands an authentic history of the bombardment of Kagosima,—beginning with Lord Russell's instructions to Colonel Neale, and ending with the surgeon's list of thirteen killed and fifty wounded. We know now by whose authority, and for what reason, these "casualties" have been sustained, and a provincial capital converted into a vast heap of smoking ruins.

It was hardly possible for a Minister writing from the other side of the world, and about an almost unknown country, to be more precise. There is no unnecessary vagueness about these instructions. Their spirit is clearly that of moderation. Our representatives in Japan are directed to obtain redress, but not to inflict punishment,—and least of all to visit upon a helpless and unoffending population the misdeeds of a solitary and powerful offender. No envoy or admiral in his senses could draw from this despatch, so temperately conceived and so carefully worded, authority to perpetrate a massacre and to demolish a great city. However anomalous the distinction drawn between the Tycoon and the Daimio—however unprecedented in political action and liable to abuse as a precedent—there can be no doubt that the motive to it was humanity and prudence. Lord Russell very properly desired to avoid war with the Japanese nation, while teaching certain turbulent members of the Japanese aristocracy that they could not be allowed to violate a treaty to which their Sovereign had assented. All other questions apart, we take this to be the obvious and laudable meaning of Lord Russell's despatch. He could not have dreamed that the answer to it would consist in the narrative of operations more bloody and destructive than any recorded in the annals of modern warfare.

The Government of Japan conceded the demands presented by Colonel Neale. After some discussion an acceptable apology was penned, and the fine of £100,000, with £10,000 as indemnity for a previous offence, was paid over in Mexican dollars. The Daimio had then to be settled with. The Tycoon seems to have been not unwilling to sanction, by the attendance of a war junk, the chastisement of that refractory vassal. But some delay arose, and the British fleet proceeded to Kagosima unaccompanied by any representative of the Government at Yeddo. In the communications that took place between our representatives and those of Satsuma, prior to the commencement of hostilities, it is very likely that the former had just cause of dissatisfaction. It was not unreasonable to suspect treachery, and little was to be hoped from delay. It may be assumed, at any rate, that the circumstances had arisen in which the measures of coercion indicated by Lord Russell might be employed. The seizure of the steamers, and possibly of a few junks had come within the letter of his lordship's instructions. But no necessity had arisen for bombarding even an isolated residence. It seems to us, therefore, that Admiral Kuper was guilty of a wanton display of barbarity as well as of gross bad taste when he threatened Satsuma's envoys with the destruction of their town, and bade them remember that they were about to encounter "one of the first nations of the world,"—and that they themselves, instead of being civilised people, as they thought, were really barbarians. The reply of the envoys, immediately rising to depart, "we cannot discuss these matters,"—may be taken in some quarters to represent a dignity which the first nations of the world are not always fortunate enough to send abroad in the person of their commanders. This interview took place on board the flagship, on the 14th of August. The same night Colonel Neale wrote to the Admiral desiring him to enter upon measures of coercion. Next morning the steamers were seized, and lashed alongside three of our smaller ships. With this, the Admiral states, he intended to remain content until the Prince made some advances to a settlement, but that his peaceful intentions were frustrated by the batteries opening fire upon his ship. No doubt he was entitled to return the fire, and to defend his prizes to the utmost. But, instead of this he burned the captured steamers and commenced that terrible work of destruction the completion of which he records in the appalling words, "The entire town of Kagosima is now a mass of ruins,"—and which Colonel Neale varies in self-complacent sentences by the terse equivalent, "his capital is in ashes."

We confidently believe that Colonel Neale will be wofully disappointed in his anticipation of the approval of Her Majesty' Government. We will not inquire now into the comparative responsibility of the Envoy and the Admiral for their frightful abuse of the powers entrusted to them. These two men have perpetrated an act which all humane and reasonable Englishmen must be profoundly ashamed of—an act which, if accidental, its authors should be the first to deplore, but which was too clearly foreseen and deliberate—an act as infinitely in excess of Earl Russell's instructions as of justice and necessity. Authorised to capture a few Japanese vessels, to blockade a port, or at the most to demolish a palace, they set fire to a populous city, watched it burning through a gloomy night, fed the conflagration with fresh showers of shot and shell on the calmer morning of the next day; and, as they steamed off, forty-eight hours after the hellish work began, saw the smoke and flames still rolling over the ruined homes of a hundred and eighty thousand people. And these are the deeds of men who boast themselves the representatives of one of the most civilised of nations!

(ECONOMIST.)

The third, and far the most difficult and painful question, is how far we were warranted either by the usages of war or the dictates of humanity in bombarding and destroying by fire the city of Kagosima. Under the peculiar internal polity of Japan (which we have more than once explained), we entertain no doubt whatever that we were justified in demanding reparation from the Prince of Satsuma rather than from the Tycoon. Neither can we doubt that on his refusal to afford such reparation—if, indeed, that reparation was just in amount and kind, and if it was virtually refused, as is believed and assumed - we were justified in destroying the batteries and seizing the steamers belonging to the Prince. It is possible also—perhaps probable—that we were also warranted in destroying the forts and foundries which he had established and the palace in which he resided. If the outrage justified violence at all—the enforcement of redress—then it clearly must be held to justify violence up to this extent. But if it be true that in addition we intentionally shelled and kept in conflagration for at least forty-eight hours a city said to contain 150,000 inhabitants, many thousands of whom may have perished in the flames, and perhaps not one of whom had committed any offence against us or were at all aware even what the quarrel was about, and whose only crime was living in a town belonging to a prince who had wronged us, and owing allegiance to him—then we confess we do seem to have outstepped all the now recognised boundaries of civilised and credible warfare. We have in that case needlessly made war on non-combatants. We have assaulted and destroyed a place that was not fortified and that did not impede our military operations, and artisans who were not soldiers, nor in arms, nor offering resistance. It is likely enough that if we had not taken signal vengeance for the outrage complained of the safety of Englishmen in Japan would have been seriously jeopardised, if not actually sacrificed. But it is absolutely certain that in punishing that outrage by burning to the ground a populous, defenceless, and unoffending city as large as Sheffield, we have jeopardised, if not sacrificed, the reputation of our country for justice, mercy, and moderation.

(SPECTATOR.)

If there is a source of power which Great Britain possesses apart from shells and bayonets, it is her steady advocacy of the claim of human beings to be exempt from causeless slaughter. That influence will, by this catastrophe, be utterly destroyed. Whether Admiral Kuper be innocent or guilty, innocent of all but the heartlessness of his despatches, or guilty of firing upon an unarmed town, the broad fact will still remain. Great Britain, in order to punish an individual assassin—for the Tycoon had apologised and paid for the official wrong—has fired a vast and peaceful city, destroyed the commercial sources of wealth of a whole province, slaughtered human beings by the thousand—for thousands must have perished in that conflagration which, says the Admiral who produced it, "burnt with unabated ardour for forty-eight hours"—and reduced a population equal to that of a first-class European city to the certainty of beggary and the imminent risk of starvation. There may be excuses to be made for all those upon the spot. Colonel Neale may have had private instructions which he has misinterpreted. Seamen with shell whistling through their rigging, and their comrades falling fast, are not expected to reason with philosophic coolness, or even much humanity. But if Englishmen sitting in comfort at home, chuckling over the vast expenditure they have incurred in order to avoid the very suffering they have inflicted on the Japanese, sanction the burning of Kagosima, their remonstrances against cruelty, hitherto so operative, must cease for very shame.

(ARMY AND NAVY GAZETTE.)

The particulars of the serious engagement which took place between the British naval forces, under the command of Admiral Kuper, and the Japanese in Kagosima Bay, on the 15th of August, are now before the public. We regret that the great demand which exists upon our space will not permit us to dwell upon the subject at the length which its importance deserves; but the different accounts of the operations, which we give elsewhere, will readily enable our readers to arrive at the same conclusion which we ourselves have reached; and that is, the success of our gallant countrymen was not so great as we could wish, nor equal to that which the bravery exhibited most unquestionably merited. Our office:

Digitized by Google

and their crews fought as Englishmen always do fight when properly led. They comported themselves before the enemy as men. We can pay them no higher compliment. The force was numerically small in *matériel* and in *personnel;* but as it was opposed to a set of "barbarians," as Admiral Kuper describes the Japanese, it should have been sufficient not only to have effectually silenced the batteries, destroyed the stronghold of Satsuma, but if the punishment thus inflicted upon the abettor of the murder of Mr. Richardson had not been severe enough, to have allowed the British men-of-war to have remained off the smoking ruins of the once densely-inhabited city until such time as reinforcements should have come up, so as to have sanctioned a disembarkation, and thus have followed up the previous victory. But we fear our flag was not carried out of the "beautiful bay" with that degree of glory surrounding it which we, as amongst its most ardent admirers, could have desired. It is quite evident that we underrated the prowess of the Japanese as artillerists; and we only discovered our mistake when we had to mark to our surprise the rapidity and precision with which they fired. That terrible shell which burst at one of the main-deck ports of the *Euryalus* has left its mark upon the memory of the survivors of the fight which will not be easily obliterated. Then, again, that destructive shot which at once took the lives of two young and useful men, and jeopardised those of the admiral and master, will not fail to impress upon us all that times have changed in the Eastern seas, when a few ships belonging to the Honourable East India Company, feebly manned and armed, could with safety defy the united forces of China and Japan. We have since then done that which led to the fall of the old Roman Empire—taught our enemies to fight. It behoves us, therefore, now to be cautious. The Japanese have 8 inch guns and 8 and 10-inch mortars, and if they are as wise as we suspect them to be, they will soon have much heavier ordnance. Our ships, if they had been supplied with guns such as the Americans, French, or even the Russians now have on board their war vessels, could have quietly taken up a position beyond the range of the mischievous power of the smooth-bores of the Daimio, and thus have done all the harm upon him that could have been wished, while we should have quitted the engagement, in all probability, scatheless. We cannot refrain from expressing our regret and astonishment that the three superior officers and the master of the *Euryalus* should have permitted themselves to have been enfiladed on the bridge. The admiral and master escaped by a miracle, and it is to be hoped that the terrible lesson which we have learned on the occasion will not be thrown away upon us, and that unless an imperative necessity (and we cannot conceive any such) exists, no such assemblage will again be allowed in so exposed a position when any of Her Majesty's ships may be under fire.

ADMIRAL KUPER CONDEMNED.

(To the Editor of *The Times.*)

SIR,—Of course, if a word be breathed against the doings of Admiral Kuper at Kagosima, the usual stale cant will be talked about the cruelty of blaming public servants when not by to defend themselves; just as if the public had not the right to keep an eye on the doings of its servants, and as if they were to be free from the wholesome fear of public censure! Now, as to the gallantry and decision of character shown by Admiral Kuper there can happily be no question; but as to the judgment and humanity shown in the burning of the town there is room, I think, for two opinions.

When the first telegram came reporting the burning of Kagosima one could not but hope that it might prove to have been an accident which everyone would deplore, but for which no one could be blamed. That hope has been dissipated by the despatches. It appears that the day before the attack Admiral Kuper stated on board his own ship to the Japanese Envoy, that "the settlement of this matter can no longer be delayed; Kagosima is at my mercy; hostilities once commenced, your town will be destroyed."

This shows the Admiral's deliberate intention, in his own words, to "destroy the town." After the engagement the Admiral sums up "the injury inflicted upon the possessions and property of the Prince of Satsuma" as follows:—"The disabling of many guns, explosion of magazines, and other serious damage to the principal batteries. The destruction by fire of three steamers and five large junks, the whole of the town of Kagosima, and the Palace of the Prince," &c. "The conflagration thus created continued with unabated ardour up to the time of the departure of the squadron, forty-eight hours subsequent to the first attack." It appears that Her Majesty's Chargé d'Affaires "expressed his satisfaction with the extent and complete result of these operations."

Now, it is to be observed that the town was set on fire in several places during the first day, but the main destruction would seem to have taken place on the second day, when, we are told, "a feeble fire only was returned" from some batteries out of the way. This "feeble fire" did no damage whatever to the ships. It needs no stretch of imagination to conceive the horrors of that day in the town of Kagosima. Being built of wood and paper, wherever a shell lighted the flames must instantly have spread far and wide. The town contained 180,000 people, and in the awful consternation with which that vast multitude must have been seized, with fires blazing forth in all parts of the town, and shells bursting among them, it is impossible to hope that there was not frightful loss of life (and that by the most terrible of deaths) among the children, the aged, and the sick; and such horrors might, of course, have been foreseen, with a hurricane blowing at the time, which could not but kindle the flames to tenfold fury.

But I fear the loss of life at the moment was but a small part of the misery that must have ensued. Fancy a multitude of 180,000 men, women, and children suddenly driven from their homes, utterly penniless, without food, without shelter! How were these poor wretches to be kept from starvation even for a single week? Where was the charity that could save them? And what can become of the survivors during the winter? Let it be remembered that, as the *Quarterly Review* says, "woollen goods had of all English products the fairest prospect of meeting with a steady demand in Japan, on account of the severe cold in the winter." And how terrible it is to reflect that the horrors were mainly inflicted after the resistance even of these batteries had virtually ceased, and when the town lay utterly defenceless before our guns!

Sir, let it be remembered that in thus destroying the houses of the unarmed inhabitants we are setting a new precedent, and one which may be inconceivably disastrous to mankind. There has now for very many year been a common understanding among all civilised nations that in wa] private property is not to be destroyed. And though this may not have been laid down as an absolute principle by all the leading writers on international law, still the history of modern times demonstrates that such is the universal practice. Examples of its transgression may, no doubt, be found. Napoleon, for instance, had no more scruple to destroy private property than to commit any other crime that would help him to his ends. And as in war, most especially, "necessity knows no law," occasions may, no doubt, often arise in which a due regard for the safety or the comfort of his men, or for the success of his operations, compels even the most humane general to do some injury to private property and persons. And, again, the soldiery themselves cannot always be withheld from wanton devastation, or both sides may become so enraged that all restraint is flung aside.

But, though some exceptional cases arising from these causes may be found, it cannot be denied that, as a rule, unarmed individuals and their property are regarded as sacred. In fact, during the last few years, we have had constant discussion of the question whether private property at sea should enjoy the same immunity as private property on land—thus admitting the principle as regards the latter. And experience has shown the utter fallacy of the only objection that has ever been made to this usage—viz., that the more harm war does, the sooner it will end. Experience has shown, on the contrary, that no wars are so lasting and deadly as those in which men are enraged by cruelty.

But even if this principle should be disputed, no man can deny that the bombardment of a town—and how much more of a town whose resistance has ceased—is looked upon by every people of Europe with horror. The suggestion to burn Odessa, and thus deprive the Russian Emperor of the supplies for his army, was scouted with contempt. Palermo was in armed resistance to its lawful Sovereign; yet the nickname of "King Bomba" was fixed by the loathing of Europe on the cowardly scoundrel who ordered its bombardment. When, a few weeks ago, Gilmore threw some shells of Greek fire into Charleston you, Sir, did but utter the feeling of every man who had the feelings of a man in your indignant protests. Yet, in that case Charleston was still encompassed by vast fortifications. A large army lay within her walls. In the view of the Federals she was in flagrant rebellion against the Government and law of the land. It was of the highest moment to them to break her resistance down. Yet, which of us did not boil with indignation at such an atrocity? But what words could have uttered our feelings if this had been done in cold blood, after her batteries had been virtually silenced, while she lay defenceless before the enemy's guns? How fearful again would the aggravation have been if this had been done without notice; twenty-four hours notice was given there, but what if her people had suddenly found themselves hailed upon by a tempest of shells? And if her houses had been of wood and a hurricane had been blowing, would not the wrath of Europe have waxed high?

And, in the case of Japan, every principle of justice and of policy demanded gentleness and self-restraint. The murder of Mr. Richardson was atrocious; no one dreams of palliating it. We were quite right to insist on compensation and on the punishment of the murderers; and failing that, it probably was right and wise to destroy the fortifications and the fleet of the Government which refused us redress. But who will say that it was either right or wise to visit this vengeance upon the heads of the unoffending people of Kagosima? They were no more responsible for the murder of Mr. Richardson than the people of Birmingham.

But, rising above these local considerations, ought it not to be one of the first and foremost principles of British statesmanship that England should invariably be on the side of humanity? Let Russians fill Poland with blood; they have shown themselves to be but savages. Let a Neapolitan king bombard his subjects, he only did after his kind. Let Butler, and Turchin, and Gilmore disgrace the Federal cause: civil war can never be free from horrors. But the question for us is whether England is to follow or to abjure such examples. Are we to take the lead in replacing among the usages of war the bombardment of unresisting towns? Should not the precedents set by England be all precedents on the side of humanity, and of noble, generous dealing with weaker Powers? Earnestly do I trust that Lord Russell will repudiate Admiral Kuper's act, and thus rid mankind of such a ruinous precedent, and save the fair fame of England from being stained by what our neighbours, at any rate, will took upon as a shameful crime.

I am, sir, your obedient servant,

Foxwarren, Cobham, Nov. 1. CHARLES BUXTON.

Mr. Cobden on this subject writes:—"Now, let me ask you to consider for a moment what is really implied by the destruction with incendiary shells, without previous warning, of a city of even 100,000 inhabitants? There are always in such towns hundreds of infants at their mother's breasts, thousands of children under five years of age, hospitals with their sick, and numbers of aged and infirm, tottering on the brink of the grave; there, too, must be women over whom the pangs of maternity are impending, and there will be found homes filled with mourning for the dead which are awaiting the rites of sepulture. Such is the normal condition of every large city, whether in Asia or Europe. Now, picture this great commercial entrepot, with all its contents, reduced in forty-eight hours to a heap of ashes; try to realise in imagination the fate of its population, and then ask yourself what great crime they had committed to bring on themselves this havoc and destruction. To our shame and confusion the answer must be that this is the way in which Englishmen, under the command of Admiral Kuper and Colonel Neale, administer justice for the murder of an individual 100 miles away—of which crime the inhabitants of Kagosima were as guiltless of all knowledge and complicity as your own neighbours in Rochdale. It is precisely as though an enemy should lay Bristol in ashes because an individual had been murdered on the highway between London and Brentford. And the chief actors in this outrage on humanity, instead of expressing one word of regret, or even emotion, coolly lay claim to the approbation of their Government."

"Advices from Japan, *via* Hong Kong, October 26, state that a French officer has been murdered by the Japanese. Immediate reparation was demanded. Hostilities by the combined French and English forces were generally expected." This reaches us by French mail and Suez telegram.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Euxine, arrived Nov. 25.—From Hong Kong: Messrs. J. L. Sandford, J. B. Crane, C. C. Fish, Fairbridge, and Brown.—From Singapore: Mr. Ellinghuysen and native servant, Mr. T. Purvis.

To Southampton, per Poonah, expected to arrive Dec. 1.—From Shanghai: Captain Cow.—From Hong Kong: Captain Purcell, Messrs. W. Douglas and J. Douglas, J. Tucker, A. Voorloop, C. Wilson, Mr. and Mrs. Bonifacee, Mr. Burman, J. Geddes.

To Gibraltar.—From Hong Kong: Mr. Monceba.

To Suez, per Bengal.—From Singapore: Mr. Van der Hyde.

To Alexandria.—From Hong Kong: Mrs. Duddell.—From Penang: Mr. E. Taylor.

PASSENGERS OUTWARD.

By last mail, per Pera, Nov. 20, from Southampton.—To Shanghai: G. Richards, Mr. Campbell's groom.—To Hong Kong: Deputy Commissary General Servantes and Mrs. Servantes, Mr. Forreste, Mr. Harvey, Lieut. R. de B. Hawtrey, R.N., and G. Fleming.—To Penang: Mr. J. P. Stewart.—To Calcutta: Mr. W. H. Jones, Captain Cayler, Mr. J. C. Hutchinson, Capt. and Mrs. Harris and European female servant, Mr. J. H. Urquhart, Hon. Mrs. Pellew, Rev. T. Skelton, Mr. F. S. Growse, Mr. G. N. Dodd, Miss Allen, Captain Betts, Mr. Coxhead, Miss Trimnick, Mr. G. Dalton, Mrs. Brownlow, Mr. and Mrs. J. T. Crawford, Mr. Kennedy, Miss Thompson, Messrs. W. Finlayson, Beal, and J. W. Maxwell, Mr. and Mrs. McNair, Rev. W. Handcock, Lieut. McCausland, Mr. Ellis, Miss Waylen, Assistant Surgeon Stewart, Miss Howey, Mrs. Blandford, Mrs. Poynder, Mrs. J. Taylor and infant, Mr. Saville, Capt. Barlow, Miss Rivers, Messrs. A. Stokes, Prosser, and C. Otter, John Begg, C. Hoggarty.—To Madras: Captain T. Sweet, Mrs. Bruce, three children, and European female servant, Mrs. Hamilton and child, Miss Faunce, Mr. and Mrs. Maxwell, infant, and native female servant, Messrs. A. C. Smith, P. J. Duff, McCally, and C. Cuningham, Miss Spring, Mrs. Fisher and infant.—To Ceylon: Miss M. A. Williams, Robert Potter, Mr. A. Bayley, Alex. Milne.—To Alexandria: Mr. C. F. Fawcett, Mr. and Mrs. Cunliffe and female servant, and seven second-class passengers.—From Gibraltar.—To Alexandria: Messrs. Kennard and Brassey.—From Suez.—To Calcutta: Mr. G. Tamvaco and European male servant, Mr. C. S. Quinn, Mr. and Mrs. H. Balfour, Mr. Sheriff, Mr. A. Sheriff.—To Madras: Dr. Donaldson, Capt. and Mrs. Raynsford, Mr. J. D. B. Gribble.

From Marseilles, per Vectis, to leave Nov. 28.—To Singapore: Messrs. C. R. Rigg, J. Fraser, J. Guthrie, and J. M. Webster.—To Shanghai: Mr. Nering Bogel.—To Hong Kong: Commander John Moresby, Lieutenants T. Gooch and E. Barkley.—To Calcutta: Mr. Bandon, Mr. and Mrs. Brandreth, Mr. and Mrs. Chambers, Mr. and Mrs. Gunn, Mr. and Mrs. Lattey, two infants, and European female servant, Messrs. H. S. Reid, M. R. Cowie, J. Stewart, Capt. and Mrs. Oakes, Mr. A. T. Peterson, Mr. Clark.—To Madras: Mr. F. L. Moncreiff, Mr. J. H. Latham, Capt. R. Church.—To Ceylon: Mr. R. H. Ellis.—To Alexandria: Miss Taylor, Mr. Cameron.

Per P. and O. steamer, Ripon, Dec. 4, from Southampton.—To Hong Kong: Mrs. Whitty, Lieuts. Lloyd and Brereton, Ensign Eyre, Miss Simpson.—To Singapore: Mr. Kennedy, Mrs. Wilson and two children.—From Marseilles, Dec. 12.—To Shanghai: Mr. Dealtry, Mr. A. K. McDonell.—To Hong Kong: Mr. A. Campbell, Mr. J. F. Holliday, Mr. F. Parry, Mr. C. A. Lutz, Mr. R. S. Dana.—To Singapore: Miss Blankenhagen, Mr. Caspar Glinz, Mr. Thomson, Mr. T. C. W. Heyn, Mr. Frank Adam, Mr. Masfen.

Per P. and O. steamer, Ceylon, from Marseilles, Dec. 20.—To Shanghai, via Bombay: Mr. and Mrs. Oppert.

Per P. and O. steamer, Poonah, Dec. 20, from Southampton.—To Hong Kong: Mr. S. Brenell, Mr. and Mrs. W. P. Galton.—To Shanghai: Mr. W. H. Haslam.—To Penang: Mr. Brown.—To Singapore: Mr. J. C. Gray. From Marseilles, Dec. 28.—To Shanghai: Sir Rutherford and Lady Alcock.

Per P. and O. steamer, Jan. 4, 1864, from Southampton.—To Hong Kong: Mr. Dixon.—To Singapore: Mr. O. A. Vidal.

Per French Mail steamer, Moeris, from Marseilles, 19th inst.—To Yokohama: Mr. Neville.—To Shanghai: Mrs. Morton.—To Hong Kong: Messrs. Kerr and Severs.—To Singapore: Lieut. Burn, Messrs. Edwards, R. S. Scott, and J. S. Scott.

PER "CHALLENGER," TO SHANGHAI, SAILED 18TH.—Mr. and Mrs. Treasure Jones, Mr. and Mrs. Hudson.

Summary of News from the Far East.

JAPAN.

Nothing is known of Admiral Kuper's movements, and negotiations appeared to be at a standstill. The Prince of Satsuma has formally called on the Tycoon to aid him against foreigners, but the latter has not yet replied. The Daimios are said to be bringing pressure to bear on the Tycoon with the same object. It appears that the Spiritual Emperor has been demanding of the Daimios the cause of "the long delay in putting away foreigners."

The principal affair has been that of the three Princes Owaru, Mito, and Kisiu, from whom alone the Tycoon can be chosen. Owaru, who was the principal speaker, urged the Daimios to make preparations for war, saying to the lesser Daimios assembled, "If you have not money we will provide you with it; to those of you who do not possess 10,000 kokus we will lend up to the amount of 40,000 itzibus. You can then buy all you want for the war, arms, swords, bows, muskets, lances." After the sitting was closed, on the same day, Midzo Idsu-n Kami reproduced this discourse to all the Hatomotos, and the day following documents were sent to every Governor and head of of police to be distributed through all Japan, stating the terms on which those capable of bearing arms would be received into the army.

It is said in some Japanese quarters that the proceedings of the Prince of Nangato in attacking the foreign vessels without orders from his superiors have been severely reprobated by the Mikado, and that Mori has been condemned to an arrest for a long period in his own dominions. Nangato is thus under the ban of his Sovereign's displeasure, not, however, in punishment for the act itself, but for having been beaten when the French effected their landing. His excuse is that he had everything prepared to blow into dust and to cut into pieces the "barbarians," but unfortunately the men who had been placed in the forts to the number of 600, had all got intoxicated after dinner.

Numbers of armed Limonoseki men and Yaconins were pouring into Nagasaki, and a band of sailors heavily armed, nightly patrolled the town. Several of the Japanese merchants of Osaco and Hiogo, who carry on foreign trade through their agents at Yokohama, had been murdered, and the people had been directed by the Mikado to withdraw all intercourse from them, and not to pay their debts. In correspondence with the French Minister with reference to the closing of the inland sea, and the decree of expulsion, it was promised that the Prince of Kanga too should be summoned to Yedo.

YOKOHAMA.

The *Japan Herald* has the following in reference to the correspondence of the French Minister with the Japanese Ministers on the subject of the closing of the ports, and excluding foreigners from Japan :—

The Minister grounds a hope for the ready withdrawal of this document upon the fact of the disgrace of the Minister by whom it was written, directly after it was issued. Then comes a letter to the Tycoon in which the French Minister dwells in very impressive terms upon the many proofs of good feeling and friendships evinced by foreign Governments for Japan, and points out the injurious effects of a rupture of good understanding, and the grave responsibility upon those in authority who shall allow events to fructify to such an end. He then points out to the Tycoon four lines of action which it would appear necessary to pursue to avert from the reigning dynasty the gravest responsibility :—

1. That the Tycoon should declare the letter of Ongassawara to be withdrawn, and the Treaties in full force.

2. That the Tycoon shall repress all aggression, and procure complete satisfaction for the outrages committed on the foreign flags.

3. That the Tycoon shall engage to protect foreigners in their persons, their property, and their trade, and

4. That he shall guard and endeavour to promote the extension of relations between Japan and foreign countries, especially in respect to the opening of Osaco and Hiogo.

The Japanese Ministers reply to this in a manner which at once testifies their recognition of the important truths thus held up to them, and cleverly avoids the indication of any intended line of policy. They avow that "it is very natural that when one of the subjects of the Empire commits an act of violence against the flag of a friendly power, the Tycoon must be much afflicted thereby, and admit—(and this seems to be the great end gained by the correspondence)—that 'such acts call for an evidence of its disapprobation by a solemn arrangement by the government;' but then, they say, in consequence of the form of their government, such arrangements take a long time for execution, and cannot be made in an instant, and then throw out something more than a broad hint that their present aim is some measures which may satisfy at the same time the public mind and the foreign powers."

They further state that when it is necessary to take proceedings consequent upon any illegal acts in any Princedom, the Prince or one of his chief subjects is called—the circumstances are judged, and the amount of culpability decided, and then they give an assurance that the Government have for some time sought occasion to prove that it has been occupied in considerations of the different Powers, and would do all it could.

What "evidence by solemn arrangement" may be looked for; what the end of that arrangement, or with what end the "consideration of the different Powers" now that the public mind and the foreigners' requirements are proposed to be united—none of these is apparent in this very carefully worded document; nor do we see that they are drawn into any admission as to the connection of the removal of Ongasawara and the withdrawal of the letter of expulsion. But one avowal of great signifiance was made by the Minister Kawadje Saye Monnodzfo, viz., that the acts of aggression committed by Nangato were not authorised by the Tycoon or his Government, but his own independent act. The Government admit that this act which they state "naturally afflicts the Tycoon, calls for an evidence of solemn arrangement," and then they go on to expose their form of procedure in the investigation of such illegal acts, namely the citation to Yedo of the offender.

We now shall watch with some curiosity to see if Nangsto is really summoned; if he appears; in case of his refusal what course will be pursued by the Government : or if, on the other hand, as our information of last week had it, he is really now under punishment ostensibly for acting as he did without orders, but really for being beaten. In the meantime we have no information as to the safety of the passage through the inland sea; whether the recent lessons there read may be supposed to have been effectual and that foreign ships will be allowed to pass without molestation or the reverse. We have some ground for belief that the question will not long remain in abeyance. The main point involved in this correspondence cannot be avoided or parried off, or covered up by matters of less consequence. The truth is clear and undeniable, and cannot be put in terms too distinct :—the blessings of peace and security can never again be known to Japan until the letter of expulsion,—a virtual declaration of war against every nation with which is has a treaty, be repudiated and withdrawn.

The following official notice had appeared :—

The undersigned was this day informed, by the Governor of Kanagawa, that instructions had been received from Yedo, to the effect that measures had been taken to render the conveyance of silk to this settlement, from to-morrow or the day following, as unrestricted as it was prior to the supposed restriction.

The undersigned, who was further authorised by the Governor to communicate the above to the British mercantile community, hopes the event may fulfil the assurance.

(Signed) CHARLES A. WINCHESTER.
H.B.M.'s Consul.

September 24, 1863.

In Osaco and in Miako a very disturbed state of affairs existed. Several assassinations were reported, and the victims were said to be merchants of the higher class, who are known to have trading relations with the Yokohama merchants. The assassins pass as "Ronins," the secret as to whom they serve with their murderous swords being hitherto well kept. In the first week of September notices were posted throughout Miako threatening those who continued to trade with foreigners. We have not yet received a translation of this notice, but it runs much to the following effect :—

"The Tycoon has secret doings with the foreigners : this is with the aid of our bad merchants who do business with foreigners. These merchants go to Yokohama, sell everything, silk tea, and other produce ; therefore all produce is very dear, and all people are much troubled. If we were not to take care all would be oppressed. We are charged to punish these merchants. You who may owe money to Yokohama traders do not pay them, and if they complain to the officers at Yedo have no care on that account, but say you will cause them to be cut to pieces. Coshiu, Oshiu, Sinchu merchants, merchants from all the silk provinces, see to this matter. Take care that you send neither silk, tea, nor cotton to Yedo. If you disregard this you, your children, and your relations shall be crushed."

"We cannot," says the *Japan Herald*, "quite assure ourselves of the signature to this. It is, however, one of those anonymous affairs so common with the Japanese, but is supposed to have its origin in the highest quarter. One interpretation we have of the signature is, 'The workers (or executioners) of justice.' Rumours are becoming more authenticated as to a conjoint movement by Satsuma, Choshu, and Toza, to raise a large body of troops, with designs upon Miako."

NAGASAKI.

Affairs at this port appear in a most unsatisfactory state. The residents are again armed to the teeth, and prepared to embark at a moment's notice. It appears that large bodies of Simonosaki men have arrived lately, and intend doing mischief there. The Vice-Governor of Nagasaki called upon the British Consul, and warned him that a large body of disaffected Yaconins, over whom he (the Governor) had no jurisdiction, was crowding into the town. He therefore recommended foreigners never to enter the town after dark, and whenever necessity compelled them to leave their homes, to go armed. The consequence of this communication was that a meeting of residents was held at the Consulate, and at night a guard of sailors heavily armed patrolled the settlement. That the authorities consider these reports authentic and important, may be inferred from the fact that the commanding officers of the *Leopard* and *Rattler* have ordered the warrant officers to be on board ship by 7 p.m., and the commissioned officers by 11 p.m. The disturbances, it is said, are originated by the Prince of Chosew, who is determined to stop the trade of Nagasaki. He has detained sixty-seven junks, with cargo to and from Nagasaki, and will not allow a junk to pass. There is said to be a revolution at Chosew, the party in favour of foreigners being larger than that against foreigners, and that the Prince of Chosew is afraid to leave his castle; three junks only ran the blockade, and have arrived in Nagasaki. A number of armed men are said to be on the look out for those who have run the blockade at Simonosaki, and also some of the Tycoon's officers for allowing them to come here and sell their cargoes to foreigners. The senior naval officer, and the British Consul had an interview with the Governor to ascertain from him what steps he intended taking for the safety of foreigners, but it came to nothing. The Governor told Captain Leckie that he could not be responsible for the acts committed by the Ronins, and had no power to arrest them. Captain Leckie in return told the Governor that should they molest any foreigner, he should fire upon them, and if any shell or rockets set fire to the town, he could not be responsible for it. Trade remains dull, and will continue so until Admiral Kuper decides on sending a man-of-war through the Straits of Simonosaki. A correspondent complains that the Chinese absorb a considerable portion of the trade. Almost all business in exports is done for Chinese consumption ; and, of course, if the Chinese carry on the trade themselves, foreigners cannot compete with them. A murder has been committed by a shipchandler named Cavanagh, under the influence of liquor. He went home drunk, dragged his bookkeeper out of bed, and beat him to death without the slightest provocation. Cavanagh has been found guilty of manslaughter by the American consul, and sentenced to five years' imprisonment with hard labour.

CHINA.

PEKING.

The *China Mail* has the following on this port :—

"From Peking we have intelligence of importance. The Nyenfei are said to have lately appeared near Tien-tsin, but the report wants confirmation. Sir F. Bruce's policy of supporting the imperial power, and of constantly urging them to exertion, is beginning to bear fruit, and an effort is being made to bring a larger force of men into the field. Although our influence at

Digitized by Google

the Court of Peking is considerable, and our material support to the Government nearly invaluable, it is a mistake to suppose that the Chinese love us heartily; and, let matters assume the very best aspect, we must not forget that anti-foreign leanings are by no means removed from the Chinese mind. Our position in the country will be a difficult one for many years to come. Nothing has as yet transpired as to the convention at Peking of Mr. Lay, General Brown, and Captain Sherard Osborn. There is not much likelihood of their designs proving abortive, however, for the British Minister, with his plenipotentiary functions, can determine the direction and extent of British support whether moral or otherwise, and has thereby means at his command of carrying out whatever views he may choose to adopt That he will further the views of Mr. Lay and Captain Osborn is not at all unlikely."

The *Friend of China* says:—"At Tientsin, when the *Swatow* left on Sept. 17, the current report was that Horatio Nelson Lay intended to throw off the customs tie at once, and demand of Prince Kung the appointment of Secretary for Foreign Affairs. Both southern and interior advices confirm this;—and what is more, French Jesuits declare that, after a period to be fixed by the Emperor, Napoleon will take his own course in managing China affairs."

SHANGHAI.

The dates are up to October 9th. The London mail of 10th August arrived on 30th September.

On the Anglo-Chinese forces the *Friend of China* says:—

Our reports from the seat of war are both profuse in quantity and peculiar in quality. We give them as hearsay, and for what they are worth only:—

1. Tatseang, a place which on Chinese maps is as far beyond the boundary of thirty miles as Sungkong (which is on the verge) appears distant from Shanghai, is garrisoned by H.M.'s 67th and Royal Artillery with one Armstrong gun, two 12-pounder howitzers and two Congreve rocket tubes. These troops first went to Quinsan direct, but as Gordon's plans were not completed, marched on to Tatseang.

2. Quinsan, as before reported, is garrisoned by H.M.'s Belooches.

3. Gordon has taken all the stockades before Soochow, and is now planting guns for a regular siege. The disciplined, under his orders, number 3,000. Other Chinese troops between 60,000 and 70,000.

4. Burgevine and Gordon have met several times on board the *Hyson* (and there are other stories in connection with these meetings so singular that we do not repeat them).

5. Gordon says he is bound to have Soochow.

6. Gordon says Soochow is too many for him.

7. 30,000 Taipings were seen marching into Soochow a day or two before the last fight.

8. Gordon is afraid he will be surrounded, and, in all haste, has sent to Tatseang for Her Majesty's forces.

9. Some of the line officers object to go into action with Taipings without direct orders under General Brown's hand (poor Tinling's Dew-ful fate being dreaded).

10. The officer shot last week was a new hand. He is not shot dead, but cannot recover.

11. The *Kanjoor* floats the Sungkong flag in gallant style, close to Soochow, and dares the *Hyson* and *Firefly* to come on!

12. Burgevine's men have nothing to eat.

13. Burgevine's men have beef, flour, tea, and vegetables in any quantity.

Later arrivals from Quinsan say the French went in heavy and got heavily mauled—half a dozen of them are wounded—Gordon fell through a bridge, and is seriously hurt—Burgevine, under a flag of truce, has announced himself Commander-in-Chief of the Taipings forces, and wants to know whether the war is to be conducted on strict western principle, prisoners to be dealt with humanely, &c.

The *North China Herald* has the following:—"By late news received from Major Gordon's force, we learn that the lines around Soochow are being gradually drawn closer, preparatory to the commencement of a siege. With a view to contracting the lines on the east and south sides of the city to a more reasonable limit than from Way-quay-dong to Kah-poo, Major Gordon left the former place on the 28th ult. with 500 Infantry and 200 Artillery of his own force, and 300 Franco-Chinese, under Captain Bonnefoi, accompanied by the *Hyson* and *Firefly*, and sixty or seventy gunboats. The force arrived at the Patachow stockades, on the grand canal, on the following morning—a miserably wet one. The steamers and gunboats at once opened fire from the front, while the flank was turned by the 1st Regiment and the Franco-Chinese. According to their usual custom, when they see themselves menaced in the rear, the rebels took to flight—an exercise in which they seem every month to be attaining a greater proficiency—and effectually out-distanced their pursuers until they reached the city. Under its walls they rallied and looked calmly on until the latter began to retire on Patachow, when, aided by a reinforcement of 2,000 men from the city, led by Europeans, they attempted an attack in the rear. The fire from the *Hyson* and gunboats, however, drove them back with considerable loss, and several Europeans were seen to fall. In the afternoon a considerable body again sallied from the city, and marched down in line on the flank of Patachow, but were driven back in confusion on the right bank by the infantry, and made to take to cover by shells thrown with unpleasant precision on the left by the steamers. Night coming on, they gradually withdrew, leaving Major Gordon in quiet possession of the 9 stockades. The only Imperialist casualties were two French privates and six Chinese wounded. This success is an important step towards hemming in the rebels, who from the slight resistance offered, appear to be losing all confidence in their own prowess. Since the capture of Tai-tsan, Major Gordon's appearance before a rebel fortification has been the signal for its evacuation. Unless a much more determined resistance is offered at Soochow than has been shown of late, the attack on that city will be a less formidable undertaking than has been generally anticipated."

The *Tien-tsin*, one of Commodore Osborn's vessels, has arrived at Shanghai. She spoke the *Aurora*, dismanted, bearing up for Swatow.

At a recent meeting of the Municipal Council it was determined to revert to the old scale of wharfage dues, as a decrease of 20 per cent. was experienced under the plan alluded to in our last issue.

Captain Kemp, of the barque *Barracouta*, has asked us to deny the report that Captain Staples, of the *Nellie Merrill*, had refused to accept his share of the subscription raised at Hakodadi in behalf of the sufferers by the wreck of the *Barracouta*, in order to remove the impression which might arise that the $469 had come into his possession and been retained by him.

The following report is from the *Daily Shipping News*:—"The evidence given before the U.S. consul during the trial of Williams and Carrol, for piracy and murder on the Yang-tsze, discloses a state of lawlessness and crime on that river which we should hardly have imagined could have existed even in a country where the executive is so notoriously weak as in China. Until the decision of the Court be made public, we, of course, refrain from examining the case as affecting the prisoners now on trial; and merely design to call the attention of Captain Sherard Osborn and his officers to the existence of crime, before which trading in arms with the rebels becomes an insignificant misdemeanor. Whether or not the prisoners now on trial at the American Consulate committed the piracy on the *Jupiter*, the commission of that piracy and of three foul and unprovoked murders, is an admitted fact. Three armed Europeans, afterwards reinforced by five 'friends,' board a lorcha in broad daylight, compel those on board to give them a large sum of money, and deliberately shoot three Chinese in very wantoness of cruelty. No excuse is attempted to be assigned for the deed; one was shot because he laughed, and the others, apparently, because the two second ruffians would not be behind their comrade. But the record of criminality does not end with the piracy, although, from the outrageous nature of the circumstances attending the deed, the minor offences of the *Jupiter* are so effectually cast into the shade as, apparently, to have escaped notice. Notwithstanding that she had papers from the Custom-house in this particular instance, the *Jupiter* appears to have been plying a thriving trade with Nanking. In fact, according to the evidence of the Frenchman, Marie Antoine, it was the fact of her having 'made three trips to Nanking' without having been caught, which first suggested to the individuals who robbed her, the idea of doing so. The *Maria*, too, had before been carrying on a contraband trade in salt, paper, &c., between various places on the Yang-tse; and when she 'saw a Custom-house boat was in the habit of throwing her cargo overboard.' Then again, Thomas Sayers, *alias* Charlie, whose name is David Williams, gives a list of acquaintance whose very pseudonyms are sufficient, at least, to throw suspicion on the nature of their pursuits, and to suggest the impression

Digitized by Google

that they are members of anything but a respectable clique. It is impossible to avoid the conclusion that, 'Tom the Greek;' 'Old White Head;' 'Young White Head;' and the 'Man with one eye,' are not respectable characters; and that they are members of a more numerous fraternity not more respectable than themselves. People do not give themselves such names; and the selection does not say much for the refined taste of the donors. Many of these lorchas, however, appear to turn their attention to piracy, smuggling, and legitimate trading alternately, as occasion offers, or as either is most profitable, a fact which must considerably enhance the difficulty of detecting them. Still, one or two of Sherard Osborn's steamers might be advantageously employed in cruising on the Yang-tsze, and overhauling suspected vessels—the especial purpose for which, according to Mr. Layard's statement in the House of Commons, they were organised."

Lieut. Ridge, of the Osborn fleet, with a party of men, proceeded with a warrant to search the house of Mr. Tarrant, editor and proprietor of the *Friend of China*, on suspicion of secreting General Burgevine, and having papers in his possession connected with the rebels. Nothing was found, and there the matter ended. Mr. Tarrant, in his paper of 23rd, gives the details in a letter of remonstrance to the Consul. Truly the Osborn-Ley fleet and British officers have descended mightily to be Chinese police officers. However, if they are paid for it, they must do it. We should like to see them actively employed in clearing off the Yang-tse rowdies.

What with a jockey club, a cricket club, and a Chamber of Commerce, the Ying-tse community seem to be pretty well advanced in the northern world of China.

The trial of a Mr. Pinder, in the United States Consulate, had created great excitement. Pinder is the Marshal of the United States Court. The following account of the trial is from the *North China Herald*:—"A boat, containing a large quantity of arms, and manned by nine foreigners, was seized on the 20th ult. by H.I.C.M.'s *Amoy*; and a boat's crew, under the command of Commander Moriarty, of H.I.C.M.'s *Ballarat*, on the following day, seized the *Rose*, a lorcha which the *Amoy* had in chase after she had captured the boat above referred to. It was said that Burgevine was on board the *Rose*, but the *Amoy* went ashore, and thus lost the opportunity of ascertaining the fact. When the *Rose* was seized, she had one European on board, together with a quantity of provisions. Great interest was excited by the seizure, in consequence of the Marshal of the U.S. Consulate being on board the former boat. When arrested he declared that he had himself captured the boat with the aid of the Europeans then on board, and that the former crew had beached her and run away when they saw him in pursuit. The commander of the *Amoy* considered the statement open to considerable doubt, as Pinder, when captured, was beating down stream away from Shanghai, against a head wind. The latter said his object was to get provisions at Woosung, he having been out all night; but the explanation was not considered satisfactory, and he together with those of his companions who were Americans, was made over to the United States Consul. The Englishmen found on board were made over to H. B. M. Consul. Further suspicion attached to Pinder from the fact that he was found to be the charterer of the *Rose*, which had fled from the *Amoy*, and on board which a quantity of provisions had been found, which it was suspected was intended for the rebels. The evidence, however, was only inferential, and the Consul, after a trial of two days, recorded a verdict of acquittal. This was, of course, tantamount to a declaration that the men taken with Pinder were also guiltless of any intention to join the rebels, and they were released also. The English prisoners were taken before Mr. Markham on remand, and dismissed. In fact, the procedure was a mere matter of form, as the judgment given in Pinder's case necessitated their acquittal."

Messrs. Dent and Co.'s new steamer, the *Fusi-yama*, made her first trip under steam, and gave the highest satisfaction. Starting with ten pounds of steam on, within fifteen minutes of hooking on the blowers, she exhibited twenty-five pounds. The blowers being then taken off, the quantity named was maintained on the gauge, all the way, with a moderate draft. Wheel revolutions, twenty. Her speed may be inferred from the run off the end of Blockhouse to the Red buoy in forty minutes, and from the Red buoy to her old anchorage here, in sixty-five minutes, all against a strong tide. If she can keep at this, loaded against the current, she may be deemed a fast boat. Mr. Henry Dent, who was on board, with Captain Macqueen, late of the *Cosmopolite*, her intended commander, is said to have expressed to Messrs. Collyer and Lambert, the *Fusi-hama's* builders, the highest opinion of their ability in the specimen before us.

HANE

The report of the refusal of the Chinese Viceroy to recognize Mr. Evans as Portguese Consul has been denied by that gentleman.

KIU-KIANG.

The British Vice Consul, Mr. Hughes, has issued a notice to the effect that his Excellency Tsing-Qu-Fan has expressed his determination to continue the imposition of the local tax imposed upon produce in the interior. The merchants sent a reply to Mr. Hughes as follows:—

Concluding that you have remonstrated in vain with the Chinese authorities on this subject, we are of opinion that, instead of informing us of the determination of H. E. Tsing-Qu-Fan to continue those impositions, it would be clearly your duty to lay the matter before his Excellency Sir W. F. A. Bruce, K.C.B., &c., &c. Should you not already have done this, we have now to request that you will take the earliest opportunity of adopting such a course.

This did not please Mr. Hughes, who replied:—

Gentlemen,—I am in receipt of your letter. Though to pass it over in silence would be, perhaps, a more becoming course, I notice it out of respect to the good sense of some who signed the letter, and who must have done so under misapprehension of the facts.

Some races were got up by the foreign community, and came off with great *éclat*. The programme was well filled, the weather was favourable, Aunt Sallies were on the ground, a grand stand was erected, and everything went off as pleasantly as could be desired. The Chinese, especially the mandarins, appear to have taken great interest in the proceedings, and to have mustered in considerable numbers on the course.

NINGPO.

From this port we learn that the Franco-Chinese corps mustering 850 men, carried Fo-yang by assault on the 20th Sept., after a combat of five hours, with a loss of twelve killed and thirty wounded. Fo-yang was first besieged by the Futai of Che-keang nearly four months ago, with an army which he himself said numbered 70,000 men, but which may probably be put down at a quarter that number without danger of too low an estimate. Since then he has made several attacks, and each time been repulsed, but has until very lately persistently refused aid from the foreign contingents. He appears at length to have awoke to the conviction of his own powerlessness, and accepted the proferred aid of the Franco-Chinese; and foreign discipline and arms, as usual, carried the day.

HONG KONG.

The dates are up to the 15th of October. The London mail of August 26 arrived on the 6th of October. The news arrived the day previous by the *Clan Alpine*. The French mail steamer *Donnai* arrived on the 29th of September, with dates from London to the 17th of August, and Marseilles to the 19th. The following items are collected from the *China Mail* and *Evening Mail*:—

What of the new coinage for Hong Kong? An answer to this will be found in another part of our impression. Complaints were current that the Surveyor-General did not efficiently perform the work of his office, and it was ridiculous to expect he would on £1,000 per annum, his private practice being worth far more. We can tell our friends in Hong Kong that a good man can be got for this sum.

The new China Coolie ordinance had caused a strike, and not a Coolie could be got. Attention has been drawn to the miserable condition of the Court House, which is badly ventilated, and not yet water-tight. It is quite a treat for a misanthropic man to go into court and observe the sorry plight in which the barristers are placed, their only revenge being the break-down of the misanthrope if he rashly takes a seat, the forms being more or less aged, and not exempt from the general law of decay. The Court House, altogether, is not up to the requirements of the time, and a new building is a reform which we are glad to believe has been determined upon.

A grievance connected with the new mode of collecting the police and lighting rates was exposed. It appears that no more than forty or fifty receipts can be granted at the office to Chinamen in one day, and it appears that a hundred ratepayers are usually in attendance. They wait, some of them, all day and then fail to get their receipt; some of them have been known to give three days' attendance before being allowed to pay over their rates. The collection used to be made by a travelling agent which suited very well; the present plan is annoying to

Digitized by Google

the public and vexatious to Mr. Forth, the colonial treasurer. It is a most indecent spectacle to see work put upon the shoulders of a man receiving £1,000 a year, which used to be done by a Portuguese at £100.

A trial trip of the paddle steamer *Kinshan* (850 tons) took place. The *Kinshan* was brought from New York to Whampoa in pieces, and there erected. She belongs to Messrs Augustine Heard, & Co., and has commenced to run as a night boat between this and Canton, leaving either place at 5 P.M. It was recorded that the Clock Tower had been freed from debt after considerable trouble on the part of the Secretary. Two of the Banks subscribed after all, the other four gave nothing. It must not be forgotten that the clock was never charged for, being made a free gift of by the Secretary, just to get matters settled, and the Architect's fee still stands due. We have no doubt Mr. Rawling wil, continue solvent under the circumstances, but a professional man should have his commission for all that.

The *Daily Press* says:—"By the American barque *Philipe de la Noye*, from Nagasaki, a report has been received to the effect that Prince Satsuma made, or caused to be made. a descent upon that city with an army of 10,000 men, which put to death all Japanese having commercial intercourse with foreigners—thus destroying, root and brench, foreign trade. Foreign residents, generally, still remained; the ladies had, however, left. Nagasaki lies in the principality of the bloodthirsty Satsuma.

The following are the local bank returns as given in the *Gazette*:—

	Notes issued.	Specie in reserve.
Oriental Bank ..	$824,894	$300,000
Mercantile Bank..	637,087	300,000
Chartered Bank..	339,738	150,000
Total ..	$1,801,719	$750,000

JAVA.

The accounts of the damage done by the unseasonable rains continue to be of the most unfavourable nature. Not only have the crops of the present year been in a great measure destroyed, but much injury has been done to the crops of next season. This is especially the case with the coffee, the blossoms having in some places been knocked off by the rains. The tobacco planters are loud in their complaints, and the sugar manufacturers are also sufferers to a great extent. Great damage has been done to the second crops and the sawahs by the inundations.

A severe drought prevailed on the West coast of Sumatra in the month of August, accompanied by strong and cold winds, which lasted until the end of the month, when heavy squalls from the north-west were experienced. The coffee produce was much injured by the drought, the unripe berries being shrivelled up and dropping off.

On the 24th September last the English ship Cornwallis, Captain Blick, arrived at Pasoerean, having on board the passengers and crew of the ship Undaunted, Captain Clare, which had been wrecked in Torres Strait. The Undaunted was in ballast.

A frightful case of amok took place at Salatiga, on the island of Java, in September last. The Regent of Salatiga, Raden Tumengong Psawiro Kusumo, on the 21st and 22nd, had been celebrating the marriages of two of his daughters, and everything had passed off smoothly, when on the morning of the 23rd, about half-past six o'clock, the brother-in-law of the Regent, named Raden Prawiro Direjo, who was Coffee Mantri of Tengaran, suddenly began to stab every person he met in the palace. The Regent being disturbed by the uproar, came from his sleeping place to see what was the matter, when he was at once stabbed in the heatr by the amoker and fell down dead. The brother of the Regent then ran the smoker through the back with a spear and he was soon despatched. Besides the Regent, nine of his relations and followers were killed, and six were more or less severely wounded. The amoker was much given to the use of opium, and had at one time lost a valuable employment under government on account of his indolence and carelessness. Through the intercession of the Regent he had received another appointment, but was not satisfied with this, and appears to have conceived an ill-will towards his relation for not supporting his claims more strongly.

MALACCA STRAITS.

SINGAPORE.

The dates are to the 23rd October. The London mail of 10th September, arrived on 12th October. The French mail steamer with London dates, 17th September, arrived on 20th October, and sailed for Hong Kong *vix* Saigon.

A collision took place in the Straits of Malacca, between the steamer *John Bright*, Captain Betham, then on her way from Bombay to this, and the French barque *Salazes*, Captain Pelieu, bound to Penang. The barque sank within a few minutes after the collision, but the crew were saved and brought on to Singapore by the *John Bright*.

The steamer *Shooey Leen*, intended for the China waters, which left England in August, arrived from the Cape and Mauritius on the 19th of October.

The *Straits Times* says:—"Immediately before the departure of last mail, and after we had closed our *Overland Journal*, the Siamese steamer *Chow Phya* arrived from Bankok, bringing intelligence of a treaty which had been concluded by the French with the Viceroy of Cambodia. This Viceroy is the nominee of the King of Siam, and has no power to act independently, and as the Treaty he has just concluded places Cambodia in point of fact under the protection of the French, there can be no doubt that it will be as unpalatable to England as it is derogatory to Siam. We have not heard the French account of the transaction, but we believe that they will support the Treaty on the ground that Cambodia was, according to them, anciently a sort of debatable ground between Annam and Siam, and that for the sake of peace it was agreed about half a century ago to construct it into a separate kingdom with a monarch appointed alternately by the King of Siam and the King of Annam; and that, though the King of Annam has not latterly availed himself of his right of nomination, it still exists. The French claim their right to make this treaty under the King of Annam; but even if their historical data be correct, the treaty would be invalid without the assent of the King of Siam."

"We do not think there is much cause for uneasiness to England in the spread of the French empire in these parts, provided its commercial growth and prosperity keeps pace with its military strength. But here, we confess, the French proceedings in Cochin China are not altogether satisfactory; their military proceedings do not appear to be followed up by any measure of commercial prosperity at all commensurate with the expenditure they make; and still they go on adding piece by piece to their territory, and adding company by company to the troops they have already there in large numbers. The French are not good colonists, and it may be that the way they go about matters at Saigon is the result of inexperience; still, we shall be glad to witness a change in the condition of affairs there, to see a larger exportation of produce, a greater amount of trade, and a little less military pomp and circumstance."

"By the latest intelligence received from home, it would appear that all obstacles in the way of our transfer to the Colonial-office have now been very nearly removed. It is, however, only reasonable to suppose that the Supreme Government, before making any final arrangements, will first require an estimate of the revenue, and an approximate of the probable expense of carrying on the Government under the new system, to be drawn upon some more reliable and less biassed authority than that of the various statements which have hitherto found their way home in the newspapers and in the protests of the community. No doubt the preparation of this Budget will be entrusted to the Governor, and we hope he will bear in mind the real necessities of the settlement, and not load our expenditure with those few expensive sinecures which at present exist, and which have been created by the Indian administration less with a view to our requirements than to the employment of supernumerary Indian servants. Again, in respect to our revenue, it is to be hoped that some notice will be taken of the anticipated advance which our opium and other farms will bring next year."

The local authorities at Singapore seem to keep the intentions of the Home Government quiet, as nothing appears in reference to the expected visit of Sir Hercules Robinson.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ALLARDICE—On the 21st Nov., at 23, Lansdowne-road, Kensington-park, the wife o D. Allardice, Esq., of a daughter.

CARPENTER—On the 17th Nov., at Surbiton, the wife of F. S. Carpenter, Esq., Deputy Commissary-General, of a daughter.

CONGOR—On the 8th Oct., at Hong Kong, the wife of H. N. Congor, U.S. Consul, of a son.

FARQUHAR—On the 12th Nov., at Guernsey, the wife of A. B. Farquhar, Esq., Commanding the Peninsular and Oriental Company's steamship Carnatic, of a son.

HALKETT—On the 5th Sept., at Shanghai, the wife of R. W. Halkett, of a daughter.

HELBLING—On the 19th Nov., at 18, Albert-road, Regent's-park, the wife of J. C. Helbling, Esq., of a daughter.

HILL—On the 14th Nov., at 4, Richmond-terrace, Victoria-park-road, the wife of Mr. Thomas J. Hill, purser, Peninsular and Oriental Company's Service, of a son.

JONES—On the 22nd Nov., at The Grove, Blackheath, the wife of Henry Jones, Commander of the twin S.S.S. Far East, of a son.

JORDON—On the 1st Oct., at Shanghai, Mrs. G. P. Jordan, of a daughter.

MELVILLE—On the 14th Oct., at Singapore, the wife of Captain David Melville, of a daughter.

PICKWOAD—On the 23rd Nov., the wife of Edwin Pickwoad, of a daughter.

SMITH—On the 20th Nov., at Shopwyke, near Chichester, Sussex, the wife of J. Caldecott Smith, Esq., of a daughter.

STILL—On the 16th Nov., at Hillside House, Avening, Gloucestershire, the wife of E. A. Still, Esq., of a daughter.

TAVARES—On the 1st Oct., at Shanghai, Mrs. L. A. Tavares, of a daughter.

MARRIAGES.

BAIN—BAIN.—On the 22nd Oct., at Singapore, by the Rev. J. Matheson, James Bain Esq., of Sarawak, to Barbara, fifth daughter of Hugh Bain, Esq., City-road, Glasgow.

BRUCE—THORNHILL.—On the 19th Nov., at Riddlesworth, by the Hon. and Rev. A. Phipps, the Hon. T. C. Bruce, youngest son of the late Earl of Elgin and Kincardine, to Sarah Caroline, eldest daughter of Thos. Thornhill, Esq., of Riddlesworth, Hall, Norfolk.

DEATHS.

BATTEN—On the 1st Oct., at Shanghai, of cholera, Louisa, the beloved wife of Ovid Batten, of Bexley Heath, Kent.

BLISH—On the 26th Sept., at Macao, Capt. Frank Blish, late Master of the barque Ly-ee-moon.

BOYNTON—On the 25th Sept., at Honque, Shanghai, William Boynton, a native of Maine, U.S.A., aged 37 years.

BRYANT—On the 8th Oct., at the Civil Hospital, Hong Kong, Oliver W. Bryant, keeper, of the City of Hamburg Tavern.

CARTIDGE—On the 11th Sept., at Shanghai, Thomas Curtidge, of the Clarence Hotel, Honque.

DAUELSBERG—On the 20th Oct., at Singapore, Richard, the infant son of Heinrich Dauelsberg, Esq., aged 4 months.

KING—On the 7th Sept., at Hong Kong, Sarah, youngest child of W. King, Ordnance, Department, aged two months.

LOCKWOOD—On the 2nd Oct., at Shanghai, Alfred L. Lockwood, of Stamford Conn. U.S.A., aged 24 years.

LYNCH—On the 25th Sept., at Honque, Capt. James Lynch, of the Quinsan garrison (This is the 21st officer of the garrison dead in three months.)

MANSFIELD—On the 24th Nov., at No. 2, Craven street, Strand, George Mansfield, Esq. of the late firm of G. I. Dare and Co., Singapore, and third son of the late J. Mansfield, Esq., shipbuilder, of Lyme Regis, Dorset, after a short illness of four days, aged 36, deeply lamented.

MOORE—On the 13th Oct., at Hong Kong, Susan, wife of C. E. Moore, H.M.'s Surveyor's Department.

PAYNE—On the 19th Sept., at Amoy, China, Rowland Henry Payne, second son of William Nelson Payne, of The High Elms, Church street, Hackney, in the 26th year of his age.

ROGERS—On the 19th Sept., at Quinsan, of dysentery, Lieut. Rogers, of the 4th Regt., formerly under-turnkey of the Hong Kong Gaol.

ROUSBY—On the 7th Sept., at Shanghai, Arthur, third son of the late James Edwards Rousby, Esq., of Cottisford House, Oxfordshire, and Captain of the China and Japan Company's steamship Titan.

STOILENG—On the 4th Oct., at the Seamen's Hospital, Hong Kong, George Stoiling, seaman ex Asiloter.

TRUBSHAW—On the 4th Oct., at Shanghai, James Trubshaw, of the firm of R. Mcgregor and Co.

TWIGG—On the 26th Sept., at Hongque, Henry Edward, aged four years; and on the 28th, Catherine Ann, aged two months, children of P. O. B. Twigg, manager of the Shanghai Carting Company.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—MACAO.—Tyshan prepared in Kysow fashion. Congou sales 3,500 half-chests, at 22.5 to 23.5 taels. Souchong sales 1,700 half-chests and 2,000 boxes, at 26 to 26.5 taels, common Tyshan Congou sales 2,000 half-chests, at 15.5 taels; no stock.

CANTON.—The teamen continue unwilling to make the required concessions in their asking rates for new Congous. The highest offers do not come nearer than 3 to 4 taels from the ideas of the native holders. The result is that no business is reported in this description. Two more full chops have arrived down. A small business has been transacted in Scented Teas and in Canton Gunpowders. Capers are a little cheaper, Pekoes as before, Gunpowders 1 tael lower. Of country Greens, arrivals are expected within a month. The following are the settlements of the fortnight:—Scented Teas, 5,500 boxes Caper, at 15 to 18 taels for common to fair, and 20 to 23½ taels for middling to good; 1,200 boxes ordinary Pekoe, at 18 to 22 taels for common to fair, 23 to 27 taels for middling to good, and 29 to 37 taels for fine to finest. Canton Gunpowder, 7,500 boxes, at 15 to 24 taels for common to good. The stock on the market s as under:—Congous, 44 chops. Oolongs, 3,500 half-chests. Scented Caper, rather large. Scented Orange Pekoe, moderate. Canton Gunpowder, uncertain.

SHANGHAI.—Black: Business since the departure of last mail has again been very dull, and settlements on this market only amount to twenty chops. Continued bad advices from home almost entirely checked buyers, and contracts could only be made at a decline on previous rates until we received the French mail on the 4th, reporting the arrival of the Bahama, and telegrams advising the opening of the market at very high prices; since then, more inquiry has sprung up, and holders are firmer. The bulk of the transactions have been in second and third crop Oopacks at from 30 to 33 taels, which, with the low rate of exchange, lay down nearly at present home rates. Settlements on the market, 20 chops, 10,588 chests Oopacks, Oonahms, Ningchows, and Hohows. Reshipped on owners' account, 45 chops, 21,616 chests Oopacks—32,204 chests; making total to date 266,668 chests. Stock waiting shipment, 27 chops. For re-sale, 30 chops, 57 chops. We quote second and third crop Oopacks and Ningchows, 28 to 34 taels; Oonahms, 23 to 28; Hohows, 20 to 28. Green: There has been a rather better inquiry for Pingsuey for the American market, and very full prices have been paid, the demand for England continues small, and at present our export is short of last year's. In country teas we have had no transactions, only a few small parcels having arrived. Our old stock of Shanghai packed and Japans is now nearly exhausted, as the demand amongst the Shansi traders still continues, and considerable shipments are being made to the north. We make no change in our quotations, but fine Pingsueys are rather higher. Reshipments and settlements, 1,154 half-chests Fychow, &c., 8,458 chests Pingsuey, 398 half-chests Japan, 10,010 half-chests, making total to date 42,762 half-chests. Stock of Green tea is estimated at 3,427 half-chests Fychow, &c., 2,500 half-chests Shanghai packed Japan; 7,375 chests Pingsuey—13,302 half-chests.

FOO-CHOW.—Transactions in Congou have continued on a large scale, and teamen having readily met the market prices declined 5 mace to one tael; arrivals from the country have not been coming in quite so freely, and holders during the last three or four days have been somewhat firmer, but no advance in prices can be quoted. The last two days the arrivals have been again large. Good common Congou may be called 15 taels. The supplies of Oolongs have been coming in more freely, and rates are about 5 mace lower. Good cargo may be quoted 20 to 21 taels. The following are the settlements of the fortnight:—Congous, 23,000 chests and 25,400 half-chests, at 6 to 15½ taels for ordinary to broken leaf; 15 to 19½ taels for good common to flavoury; and 18½ to 25 taels for Souchong to med. Kysow; fine, none. Souchong, 3,900 chests, at 18 to 36½ taels for common to good. Pekoe, 440 chests, at 23 to 28½ taels for common to good. Oolong, 7,500 half-chests, at 17 to 25 taels for inferior cargo to superior. Green Tea, 100 chests, at 26 taels for Gunpowder. Scented Tea: 400 boxes, at 11 to 31 taels for dusty and com. to fine.

AMOY.—Prices have had a downward tendency throughout the month, and as the teamen have evinced more desire to meet the market, a good business has been the result.

HANKOW.—During the early part of the fortnight there was more activity shown in the market which however has again subsided during the few days. Prices are as last quotations. But few chops of the finer grades now remain, the chief supply being of the medium and common kinds. It is estimated that there are still about 100 chops to come forward. Settlements for the fortnight amount to 52 chops including 7 contract, making the total settlements for the season 540 chops against 320 chops at same time last year. Stock on the market about 20 chops. Present quotations are:—Fair 3rd crop Oopack, Tls. 24 to 26 per picul, short price; medium Ningchow, Tls. 23 to 26 per picul, short price; Fair 3rd crop Leyling and Chongsowkyes, Tls. 22 to 25 per picul; common to fair Oonams, Tls. 17 to 20 per picul.

KEWKIANG.—Green Tea: The obstruction in the transit on the Poyang Lake owing to mandarin exactions still continues, and consequently supplies continue trifling. The difficulty will, doubtless, be overcome shortly, when the consequent augmentation of stock must necessarily cause the teamen to moderate their demands. The stock now on the market is about 8,000 hf.-ch., including 600 Kewkiang packed. Extreme rates are asked which exporters seem indisposed to entertain. Season being far advanced, the accumulation at the barriers must be considerable. There is no business to report. Black Tea: The settlements of the fortnight have been 1 chop Ningchow at 24½ taels, and 1 chop Hohow at 15 taels, these rates showing a small decline. There is but 1 chop on the market. The teamen prefer sending their congous on to Shanghai on their own account, to realising on the spot.

NAGASAKI.—Such high prices have been asked by holders that nothing has been done, and Stocks of medium and fine kinds have increased considerably.

YOKOHAMA.—The market has returned slightly in the buyer's favour, but the decline is nothing like sufficient to establish a fair range of prices. Should buyers abstain for a while, we may look for lower rates; supplies only moderate. In Cotton, a good business doing at $18½ for good quality; the new crop is spoken of as likely to be both plentiful and of good quality; some contracts have been entered into for future delivery at $17½ to $18. Stocks of Chow-chow goods are small, and the business s very limited.

RAW SILK.—SHANGHAI.—The restrictions placed upon the exports of this article from Japan, together with the decline in exchange here, have caused a steady demand to be maintained, including 500 or 600 Japans, are 2,500 bales for the fortnight, making a total of 22,500 bales for the season, against 37,500 bales same period last season, and 23,500 bales season before. The present unsold stock is 13,000 bales; same period last season it was 10,000; same period season before 23,000. Prices were already considerably above home rates, but, nevertheless, an advance has been established upon Tsatlees of 5 taels to 10; chop No. 3 being held for 430, offers of 425 having been refused. Taysams have not been in much request, but are firm at last prices. Quotations are as follows:—Tsatlees: No. 1 and 2, 440 to 470 taels per picul; No. 3, 420 to 433; inferior to 4, 375 to 410. Hangchow, 380 to 400 taels per picul. Yuenfa and Haining, 360 to 425 taels per picul. Taysams, No 1 and 2, 370 to 400 taels per picul; No. 3, 345 to 360. Inferior to 4, 320 to 340. Exports to date 12,203 bales against 37,476 last season.—The present steamer has 2,100 bales.

MACAO.—Loongkong, No. 1 sales, 12 piculs at $400 stock 10 piculs. Cumchook and No. 1 Kowkong sales, 25 piculs at $370 to 385 stock 60 piculs. A few piculs of inferior Kowkong and Sewlahm are also offering at 360 to 330 respectively.

CANTON.—The fifth crop silk—now nearly completed—has fallen off very much, both in quality and colour, since the date of the last report, owing, the Chinese say, to the late boisterous and wet weather, which partially injured the Cocoons, causing the silk to run fouler and coarser than usual, and the colour to be of a more uncertain tint. The silk of the sixth crop is expected in another week, and is reported by the dealers as likely to prove both good and abundant. During the fortnight, 36 bales of Loongkongs have been purchased for London. About 155 bales of Canton, Tsatlee, and imitation Japan go forward by the present mail steamer.

NAGASAKI.—There have been small arrivals, but not in sufficient quantities to establish rates. Itchozen Silk is held for extreme rates.

Digitized by Google

YOKOHAMA.—The conditions and prospects of the Silk market are not satisfactory. The supply is still small, and although the prices of all descriptions have advanced from $20 to 25 a picul, still all that appears find ready buyers, and no stock is left on the market. The settlements do not average more than 50 bales a-day.

DRUGS, &c.—CANTON.—Cassia Lignea: Sales 200 piculs, at $16.50. Stock, 1,000 piculs. Cassia Oil, Cassia Buds, Star Anise ed, Aniseed Oil, Rhubarb, Gamboge, and Musk: No supplies, and therefore no trade. China Root: No settlements; stock, 300 piculs. Galangal: $3,75 to 4; no sales; stock, 300 piculs. Galls: 100 piculs are on the market, for which $17 are asked.

CAMPHOR.—HONG KONG.—No late supplies arrived, and but little disposed of during the fortnight. The stock on hand some 600 piculs held at $22 per picul unpacked.

RAW COTTON.—In Canton a good inquiry exists, and prices have been advancing; the quotations are for Shanghai, 15*t* 6*m* to 15*t* 9*m*, and Ningpo, 16*t* 5*m* to 17*t*. Stock in Canton of Shanghai and Ningpo is estimated at 4,500 to 5,000 bags.

HONGKONG.—In the early part of the fortnight little inclination to purchase was shown, but since the advices per last Mail Steamer of the high rates ruling in England and India, the demand has been more general and active, Indian Houses have been buying for shipments to England and Bombay, and considerable business has been done within this week at an advance of one to one and half dollar per picul. Sales during the fortnight are reported at 12,174 bags Shanghai at $21.80 to $23.50, and 4,625 bags Ningpo at $22.40 to $24.50, and 600 bales Japan at $25 to $26.50 per picul. Prices are quoted to-day for ordinary to good Shanghai at $23 to $23.50. Ningpo at $23.50 to $24.50, and Japan at $25.50 to $26.50 per picul.

SHANGHAI.—The new crop is arriving apace, and large purchases continue to be made for shipment to England. Best qualities are now quoted 14*t* 1*m* to 14*t* 2*m*; inferior, 13*t* 7*m* 5*c*. Arrangements for screwing are being made upon a large scale, and the probability is that the quantity sent forward will be limited only by the exhaustion of shipping. During the fortnight one ship has been despatched for Liverpool with 2,400 piculs, and another for London with 2,000 piculs. Upwards of twenty large ships are now being laden with the article, bound to Liverpool or London.

AMOY.—There have been no sales by foreigners during the month, and stocks are as last stated—namely, 925 bags—the nominal quotation being $19½ to $21. There have been trifling supplies to the Chinese, which appear to have satisfied the demand. Stocks in native hands are only 1,500 bags.

YOKOHAMA AND NINGPO.—Shipments are being made, most of which will probably find their way to England. The capacity of production of China and Japan for this staple will now be tested. The probability is, should political affairs in the United States remain as last advised, that China, at the present standard of rates, is capable of supplying as much cotton as will be required.

CHINA IMPORTS.

COTTON YARN has remained almost without any inquiry, and the sales reported amount to about 50 bales. By auction some 120 bales of damaged yarn have been moved off, but the prices realised do not come up to those fetched under similar circumstances during the previous fortnight.

GREY SHIRTINGS.—The sales reported of these goods amount to 750 pieces, and prices remain unchanged. 950 pieces of damaged have also been sold by auction.

WHITE SHIRTINGS have found buyers to the extent of 1,450 pieces, without alteration in value. There is not a single sale of any of the foregoing articles to report from Canton.

T-CLOTHS have not met with any inquiry, and there are not any settlements to report. Some 2,000 pieces sea-damaged goods have been moved off at auction.

AMERICAN DRILLS have not been sold on the market, but a small shipment of these goods has been recently made to India.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED, have met with but small inquiry during the fortnight, and sales are limited to 500 pieces dyed spotted shirtings; in other kinds there has been nothing done.

DAMASKS have been purchased in this colony to the extent of 910 pieces.

CHINTZES AND HANDKERCHIEFS have been without any inquiry.

RAW COTTON.—There has been considerable animation in the market for this staple during the past few days, and the value of the various descriptions of stock has advanced considerably. Transactions are estimated at 4,250 bales purchased on foreign account, and about 10,000 bales taken by the dealers. In Canton, where prices remain without change, sales are put at 1,000 bales.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: The inquiry for these goods noticed under date of last circular has been fully maintained during the fortnight which has since elapsed, but prices do not show any material alteration. The sales reported are 2,656 pieces of Spanish Stripes, and about 350 pieces of the other descriptions. In Canton 240 pieces of Spanish Stripes have found buyers at the rates previously current. Long Ells have likewise been in fair demand during the fortnight, and rates have partially recovered from the decline mentioned in last report. The amount of business done in these goods is estimated at 2,780 pieces. Camlets: A fair amount of business has been transacted, and the value of these fabrics has improved slightly; the sales of the fortnight are reported at 1,090 pieces of English, and 40 of Dutch manufacture. Lastings have been sold in Hong Kong to the extent of 574 pieces, the value of these goods remaining as quoted during the previous fortnight. Blankets have again been in request, and have found buyers to the extent of 600 pairs.

METALS.—IRON FLAT, &c.—Both in this colony, and in Canton, the demand for Iron has been active during the past fortnight, and (with the exception of Nail Rod, which, in Hong Kong, is quoted slightly lower), the prices obtainable at the date of last report have been fully maintained. In Canton, likewise, prices remain very firm, and in some instances a considerable advance has been established. The sales reported in Hong Kong are 5,340 piculs of Nail Rod, 800 piculs of Square and Flat, and 672 piculs of Hoop; while in Canton, transactions are put at 2,100 piculs of Nail Rod, and 350 of Hoop. Lead: notwithstanding a steady business having been done, this article has again given way in value, and the sales of the fortnight are put at 1,000 piculs. In Canton, where a decline has also been submitted to, the transactions are reported at 2,800 piculs. Tin has met with a good demand in Hong Kong, the sales of the fortnight being put at 1,800 piculs. Tin-Plates: 60 boxes sold. Steel: remains without enquiry.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 0d. to 6s. 1d.	6s. 1d. to 6s. 1⅛d.

DEPARTURES.

From JAPAN.—Sept. 22: Cambridge, London.

From HANKOW.—Sept. 26, Finzel, for London.

From SHANGHAI.—For London: Sept. 26, Edith; 29, Gauntlet; Oct. 2, Queen of Nations; 5, Clarendon. For Liverpool: Sept. 18, Jane Leech; 21, Lorton. For New York: Oct. 2, Claro Brbuyon.

From FOO-CHOW.—For London: Sept. 5, Naomi; 23, Prince Alfred. For New York: Sept. 2, Vesta; 10, White Eagle; 22, Maria Lucie; 27, Glenclune.

From AMOY.—For New York: Sept. 1, Sclavonia; 4, Hainan; Oct. 4, Moldavian.

From SWATOW.—None.

From HONG KONG and CANTON.—For Liverpool: Oct. 3, Eleanor.

From MANILA.—No report.

From SINGAPORE.—For London: Sept. 30, Andromeda; Oct. 10, Latona. For Liverpool: 6, Halton Castle. For Bordeaux: 17, Frehel, For New York: 16, Sclavonia; 21, Moldavia.

From BATAVIA.—For England: Sept. 15, Helena; For France: 13, Isly; 17, Alphonse N. Cezard. For Holland: 13, Jacob and Anna, Stad Middelburg; 20, Margaretha, Simoneta, Zwanan, Prinses Amalia; 22, Schoonderlor, Emergens, Hercules; 23, Tenanate, Hebe; 25, Stad Enschede; 27, Graaf V. H. Reinstein, Mescator, Amalia Augusta; 30, Stad Assan; Oct. 4, Hadda Frederika; 5, Ida Elizabeth; 12, Amphitrite, Johannes Christian; 13, President Plase, Anna, Watergens. For Rotterdam: Sept. 29, Jason.

LOADING.

At JAPAN.—For London: Broadwater, Isabella Ridley, J. C. Munro, Esperanza, Medina, Ravensbourne. For Liverpool: William Eggerts.

At HANKOW.—None.

At SHANGHAI.—For London: Ironsides, Jas. Vinnicombe, Julia, Lord Macaulay, Mirage, Osprey, Palmerston, Peep o' Day, Phillip I., Spirit of the Deep, Fairlight, King Arthur. For Liverpool: Palmyra, Jas. Gibson, Lady Elizabeth, Niphon, Our Queen, Sarah Emma, Surat, Thomas S. Stowe, Chalmers, Childe Harold, Star of the North, Loodianah, Ranee, Victoria, Rheine.

At FOO-CHOW.—For London, Standard.

At HONG KONG and CANTON.—For London: Laurel, Bellissima, Lord Lyndhurst, Mary Ann Wilson. For Liverpool: Melbreck, Nile, Agra. For Hamburg: Siwa.

At MACAO.—For Hamburg: Johanna.

At MANILA.—No report.

At SINGAPORE.—For London: Avalanche, Arthur, Peter Simons, Maori. For Liverpool: Electric, Oasis.

At BATAVIA.—For Channel: Tinsko, Java, Richard, Der Nord, Fantasia, Mary, Constantia, Dygden, Bravo. For France: Chaptel, J. J. Grandville, Jules Cezard. For Sweden: L. A. Bang.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton, £4; tea, £5; silk, £6. 10s.

SHANGHAI.—Tonnage is more inquired for. The rates are as follows:—To London and Liverpool, £3. 10s. for cotton and tea, and £4. 10s. for silk, with an upward tendency. To New York, $16 per ton of 40 cubic feet.

FOO-CHOW.—To London, £4 per ton of 50 cubic feet.

HONG KONG.—A decided improvement has taken place both for home and coast charters. The following are some of the settlements:—Alliance (338 tons), to Liverpool, £3. 7s. 6d. per ton, for cotton; Abdul Medjid, British ship (400 tons), to Liverpool with cotton, £3. 10s.; A. O. Anderson, Norwegian brig (134 tons), to Falmouth for orders, £3. 10s.; Bellissima, British barque (420 tons), for London, £3. 10s.; Cadovins, Danish schooner (251 tons), to Shanghai, 45½ cents per picul; D. T. Visser, Danish barque (345 tons), to Rangoon, to load for Shanghai and Ningpo, at 90 cents per picul.

MANILA.—To London: Hemp £3. 10s. No sugar offering.

SINGAPORE.—For Tin, £2 15s. to £3. Antimony Ore, Gambier, Sago, Flour, £3. 5s. Pearl Sago, Gutta percha, Pepper, and other light cargo £3 10s.

CASUALTIES, &c.

FOO-CHOW.

The British ship Cairngorm was totally lost at the mouth of the river Min, on the night of the 23rd Sept. She was under charge of a pilot at the time and was from Shanghai bound to Foo-chow.

HONG KONG.

The French ship Rochebonne from Saigon, bound to Hong Kong was totally wrecked on the Pratas on 22nd September, having been driven there in the fierce typhoon which has recently scoured these waters. The captain, crew, and two passengers, in all sixteen, arrived in Hong Kong on the 20th Sept. in a China boat. We understand after the ship had been abandoned, two attempts were made to leave the reef in China craft, both of which, a short time after leaving, were driven on shore and went to pieces. With the third boat they were more fortunate, having reached here in safety, with, of course, the loss of everything.

The American ship Hellespont, from New York, with coals, bound to Shanghai, was towed into Hong Kong on the evening of the 4th Oct. by the steamer Jamsetjee Jejeebhoy. The Hellespont has been in the late typhoon, lost her top gallants masts, heads of fore and main topmasts, and is leaking badly. She will have to discharge. Saw the ship William Sturgis near Anjer from Cardiff, bound to the Philippine Islands.

SINGAPORE.

We have just heard that the French ship Salazes, which vessel left this on 16th Oct. for Bordeaux, was run down and sunk by the John Bright in the Singapore Straits.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Sept. 14: Lucknow, from London to Singapore; 15: Cressy, from London to Singapore; 16, Musquito, from Cardiff to Shanghai; Marquis of Argyle, from London to Shanghai; 17, John Paul, from Liverpool to Singapore, Highlander, from Liverpool to Singapore; Henriette, from Newcastle to Batavia; Zephir, from Rotterdam to Batavia; Hugo Gratius, from Rotterdam to Batavia; 19th, Charlotte, from Marseilles to Saigon; Oliver Cromwell, from Newcastle to Shanghai; 20, Aldebaran, from Hamburg to Shanghai; Puget, from Marseilles to Saigon; 22, Sea Bird, from Sunderland, to Hong Kong; 24, Sir Robert Peel, from Amsterdam to Singapore; 25, Ben Nevis, from Sunderland to Shanghai; 25, Zeemanshoop, from Rotterdam to Samarang; Herald, from Sunderland to Hong Kong; Taffarette, from France to Foo-chow; Oct. 4, Soun Hong, from Hamburg to Singapore; 5, Str. Yeddo, from London to Shanghai.

From UNITED STATES, &c. to CHINA.—Sept. 16, Marmion, from New York to Singapore; 30, Pearl from Boston to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT, &c.—Sept. 9, Kinderdyk, from Batavia to Rotterdam; Patriarch Samhiri, from Batavia to Schiedam; 10, William Simpson, from Batavia to London; 13, Tigris, from Singapore to Liverpool; 14, Hendrika, from Batavia to Amsterdam; Australia, from Batavia to Rotterdam; 15, Sawley Cluden, from Singapore to London; 16, Stad Middleburg, from Batavia to Middleburg; Jura, from Hong Kong to Liverpool; 19, Prince Alfred, from Singapore to London; 23, Patna, from Whampoa to Liverpool; Stad Enschede, from Batavia to Amsterdam; 29, Northfleet, from Canton to London; Garrawalt, from Shanghai to London; Oct. 1, Stad Assen, from Batavia to Amsterdam; Strathmore, from Shanghai to London: 2, Mathilde, from Samarang to Amsterdam; 4, Warwickshire, from Hong Kong to London; Beatrice, from Hong Kong to London; 11, Alfred Roy, from Singapore for Liverpool.

From CHINA, &c., to UNITED STATES.—Sept. 11, Panama, from Hong Kong to New York; 21, Sumatra, from Manila to New York; Antonia Ferry, from Manila to New York.

COMMERCIAL POSTSCRIPT.

SILK.—Messrs. Waithman's circular says:—We have had an unusually quiet fortnight in the silk market, and prices, owing no doubt to the stringency of the money market, having receded some 6d. to 1s. per lb. Within the last day or two there has been more disposition to do business, buyers being influenced by the warlike nature of the recent advices from Japan. Deliveries from 1st to 24th November inclusive:—China, 2,094 bales; Japan, 1,270 bales. Total 3,364 bales.

SUGAR.—The private business has again been extensive, at a further advance in price, viz.:—Manila, 70,000 bags, clayed, at 40s. 3d. to 41s. 6d.; 11,600 bags unclayed Manila, at 22s. 6d.

ARRIVALS NOT INCLUDED IN THE TABLES.—Nov. 22, off Dungeness, from Java, Souburg; 24, at Liverpool, from Manila, Maritana; 24, at Clyde, from Maulmain, Navarino; 23, at Brouwershaven, from Batavia, John Matthie; 25, at Queenstown, from Bassein, John Patten; 23, at Hamburg, from Foo-chow-Foo, Zephyr; 22, at Texel, from Batavia, Oceaan; 26, in the Downs, from Foo-chow, Whinfell.

DEPARTURES.—Nov. 23, from Cardiff for Shanghai, Rio Janeiro; 25, from Queenstown for Singapore, Fortitude; from London for Kanagawa, Patricia; 24, from Cardiff for Singapore, Monitor.

SPOKEN.—County of Ayr, Clyde to Batavia, Aug. 4, 19 N., 26 W.; No. 5,631, 3rd d.p., Macao to Falmouth, Sept. 7, 23 S., 43 E.; Whilhelmina. Rotterdam to Macassar, Oct. 17, 46 N., 9 W.; Sooloo (Am. ship), Manila to Boston, Sept. 24, 31 S., 33 E.; Hanover, Shanghai to London, Oct. 6; an English ship, showing 3rd d.p., No. 5,812, Foo-chow-Foo to London, Sept. 23, 35 S., 24 E.; Susanna, Vonk, Amsterdam to Batavia, Nov. 13, 47 N., 9 W.

LAID-ON.—At London, for Shanghai, White Adder.

The Caroline, Coventry, from Shanghai with troops, has not yet been reported.

THE "DAILY NEWS" ON JAPAN.—From the following extract of a leading article we must conclude that our contemporary would have foreigners caged in at Yokohama, similar to the durance vile at Canton before the last war. We wish these writers would try these positions for themselves before recommending them as a panacea for the faithlessness of the Japanese:—"It is most lamentable in the case of Japan to observe how the clouds are thickening, the shadows are darkening, and frightful loss is impending over a whole race of human beings. Scarcely five years have elapsed since that beautiful country may be said to have been re-discovered, yet already how great the change in the manner with which it is regarded, how questionable the benefits which have accrued to it from Christianity and from the civilisation of the West! Evidently, in the present state of matters, it is best for us not to intrude upon the capital of the Tycoon, and not to allow full blooded, supercilious young Englishmen to ride smiling past the norimons of feudal chiefs, or to irritate Japanese country gentlemen from remote parts by treading with dirty boots on the clean matting of Japanese public tea-houses, or treating every female servitor with familiarity. Our treaty with Japan was entirely an experiment on both sides. Neither Lord Elgin nor the Ministers of the Tycoon knew what it would bring forth, or even what were the circumstances which it was most desirable to take into account in framing it. When a country has been almost absolutely secluded for two centuries, the first arrangements made for the commencement or renewal of intercourse should only be considered as tentative measures, to be modified by the light of the experience which they bring. Of that experience in this case we have now sufficient to show that, for some years at least, our commerce in Japan will be best developed, and our hopes of further more intimate relationships be best preserved, by allowing commercial interests quietly to work their own natural way, by avoiding points of contact where the attitude of foreigners tends to destroy the institutions of the country, and arranging with the Japanese to place our merchants within certain convenient and sufficient limits, where they will be amenable only to their own authorities, and yet not interfere with Japanese habits and customs."

THE AMERICAN PRESS ON THE JAPANESE WAR.

Notwithstanding that an action has come off between the commander of the American war-vessel *Wyoming* and certain of the forts in the Inland Sea; notwithstanding the decree of expulsion which the Japanese Government has launched against all foreigners, and which, as a violation of treaty rights, and accompanied by active hostile operations as undistinguishable in their object as the decree, which of itself is as clear an act of war as it is possible to imagine, the Americans, if we are to judge from the tone of their press, can discover no *casus belli*. This has been more especially apparent since the British attack on Kagosima, which, as opening out the prospect of an indefinite prolongation of hostilities, is taken advantage of to indulge in that retaliatory spirit towards this country which, since the commencement of their own civil war, has characterised public sentiment in the Northern States.

The following is an extract from a leader in the *New York Herald*, which represents at the same time our commercial policy as much the same as that of the Portuguese a century since. The singular display of conscientiousness with which this sapient journal utters its rebukes will not escape the attention of our readers :—

"The policy of both England and France in regard to Japan has been that of thwarting the designs of the United States to open a lucrative commerce with the people of that country, and exasperate the Japanese against the Americans. The United States never had cause to quarrel or fight with Japan until the war steamer *Wyoming* was fired into, in pursuance of the determination of the Japanese, incensed as they were by the demands of British admirals and Vice-Consuls, to exterminate all foreigners. The Americans have always been on terms of peace and goodwill with these people, and their treaties and commercial compacts were never violated until the envy and jealousy of the English and French aroused the hate of the natives, and caused the Americans to be included in the sweeping determination to wipe out all traces of the existence of a foreign footstep on their soil. We have no interest in the quarrels of the Japanese with the European Powers further than may be demanded by the dictates of humanity or the requirements of civilisation. We do not wish to quarrel with them. It is not our policy to make enemies of them, or any other foreign people. Every consideration of a commercial character points to a different line of conduct; and it is unfortunate that any commander in our navy should have felt obliged to have fired a hostile gun upon a Japanese fort or vessel; and it is still more unfortunate that our former good friends should have struck the first blow, and that, too, out of a mistaken notion of our identification with the acts of a jealous grasping Power like that of Great Britain. But this destruction of the rich city of Kagosima is perhaps only the beginning of a series of disastrous and bloody attacks upon the territory and people of Japan by the British. When once the British lion places his paw upon an unoffending and innocent people, it rarely occurs that he withdraws them until his thirst is satiated. He has now placed one paw on a part of Japan, and let us prepare to receive the intelligence that another will soon be planted upon some other part of those populous and wealthy islands. France is the ally of England in this work of occupation; and neither of these Powers has shown any friendliness or sympathy with the United States in its present terrible struggle. It would be strange, indeed, if we should be found on their side, and fighting their battles against a people who have never done us any real harm."

California, whose people have always regarded with enthusiasm the prospect of an extension of American commerce and influence in the East, if fairly represented as to their sentiments on this matter in the *Sacramento Union*, shares in a desire for a Japanese war with Great Britain, in which Americans may take a part damaging to our interests.

"In the event" says this journal, "of an open rupture between England and Japan, the neutrality doctrine of the former could be applied by the United States in a manner which would not tend to the increase of English commerce on the Pacific Ocean, The United States Government would, of course, declare itself strictly neutral, while it would permit its citizens to fit out steam war-vessels to prey upon the commerce of England. Her doctrine of neutrality would thus be sent home to her and her merchants. English commerce would be swept from the Pacific Ocean, should war in reality be declared between England and Japan, and continue for a couple of years. The only plan which the English Government could adopt to prevent the destruction of her Indian commerce, in the event of a conflict with Japan, would be to announce her readiness to pay the United States Government for all the ships and cargoes which have been destroyed by the pirate ships *Alabama* and *Florida*, which were fitted out in her ports, and armed, equipped, and manned by Englishmen. In this view of the case, the late attack by Captain McDougall on certain Japanese vessels-of-war and batteries may prove an unlucky blunder, as it is the interest of the United States just now to be on good terms with the Japanese Government."

To announce an intention is not uncommonly to defeat it, and the danger Americans have been so ready to warn us of, will be admitted at once into our estimate of probabilities, and duly guarded against. To recognise as belligerents a people so barbarous as to ignore all treaties, whose political annals are a series of bloodshed and crimes, and this by a step which would lead to international complications under which present laws and usages governing the relations of friendly communities would disappear, is a proposal which bears upon its face the brand of dishonour, and discloses only too clearly the puerility and cowardice lurking beneath a vain show of power and independence.

OUR POSITION IN CHINA.

On this subject the *New York Herald* says :—

"There have been, for some time past, a number of adventurous Yankees in China fighting to aid in putting down the big Chinese rebellion. England and France have been not a little jealous of the enterprise of these Americans, and they interfered at Peking to the injury of Yankee influence. The result was that after the death of Ward, the great American mandarin, the Emperor became opposed to Burgevine, an officer who had always been the companion of Ward in his campaigns. He tried to arrange the matter with the Emperor, but could not. So one fine morning he coolly marshal'ed his body of two or three hundred trained soldiers and went over to the rebels. The Emperor has thus put his foot into a serious scrape, and he is naturally greatly terrified at the probable result of Burgevine's secession, having already offered a reward of three thousand taels for his apprehension, dead or alive. There is no doubt that this bold American will gather a strong party around him, and unless the Emperor looks very sharp he will beat him in the Celestial war, and then England and France will be still more astonished to find that Russia and America are carrying everything before them in China."

OUR TRADE WITH JAPAN.

We are glad to have so complete a confirmation of our oft-repeated assertion, that our trade with Japan is more than a bagatelle, as our Cobdens and other honourable members of the House of Commons would have the tax-paying people believe. Long may we have a Palmerston and a Russell to reign over us, who will not give in to the barking of those gentlemen. "Away with such trade as this," they say, "while we can better promote it in Europe." We trust that the British communities in China and Japan have addressed a special despatch to Earl Russell, approving and thanking him for the bold advocacy he and his Ministry have given to their claims in Japan. We can assure our readers that in doing so the Earl has run the risk of losing all that is dear to a man in his station. If not done, let it be done at once, for we can vouch that the approval of our merchants resident there is of considerable value to the Government.

London Gazette, Nov. 24.

The following is an extract from Colonel Neale's despatch to the Foreign-office, dated Sept. 11 :—

"The enclosed returns furnished to me by Mr. Consul Winchester, are descriptive of the degree of progress which the trade has reached during the period when the situation of affairs has been more unsettled than at any previous period. Your lordship will observe that the value of the export trade in British vessels has increased from £253,337 in 1862 to £561,120.

In imports we have in the first six months of the year £111,470, against £68,981 in 1862."

"I beg leave to call your lordship's attention to the fact that in this half-year's return the article of cotton figures for the first time to the extent of nearly 800,000 lbs.

"In respect to the foreign trade generally, I beg to inclose an excellent and very accurate report extracted from a local paper."

[The report here spoken of so highly by Colonel Neale was in the *Japan Commercial News*, and will, of course, have been seen before this by our readers.—ED. *L. and C. T.*]

(INCLOSURE 1.)

A return of British and foreign vessels arrived at and departed from Kanagawa for the half-year ending the 30th June—In 1863, 40 British vessels of 12,938 tons, against 14 of 4,391 tons in the corresponding period of 1862; 19 American of 7,347 tons, against 12 of 9,135 tons in 1862; 15 of other countries, against 7 of 1862.

(INCLOSURE 2.)

A Return of the Import Trade in Forty British Vessels at the Port of Kanagawa during the Half-Year ended 30th June, 1863, compared with that of 1862, during the same period.

THE JAPAN STATISTICS OF TRADE.

(THE TIMES.)

Imperfectly as we are acquainted with the institutions of Japan, we are still not without the means of forming an accurate opinion on a point which is just now of the greatest importance. We can scarcely tell how the Japanese are governed, or what are the influences at work to affect the position of foreigners at the settlements opened under the Treaty. We do not know with any certainty what are the relations between the supreme Government and the aristocracy, or what the views by which their respective proceedings are determined. On these points we can do little more than estimate probabilities, but there is a point most intimately connected with the questions now pending on which there happens to be no room for doubt. We know from unimpeachable evidence that the people of Japan are ready and willing to trade with us, and that they are as freely and as naturally disposed to buy and sell as we ourselves are. Their country is rich in products of great value, and they are exceedingly quick in answering a demand. They have discovered with singular acuteness what produce will prove most remunerative, and have acted accordingly. They are now drawing considerable sums of money from foreign countries, and receiving imports of great utility; nor will it be easy, we think, after a perusal of the statements subjoined, to doubt the effect of those circumstances on the general disposition of the people.

Be it remembered that four years ago there was no trade with Japan whatever. For two centuries that populous Empire had been sealed against all foreigners, with a single and scarcely appreciable exception in favour of the Dutch. A couple of years ago—that is to say, at the beginning of 1862—the trade of one of the ports opened under the treaty had already become considerable. As many as thirty-three foreign vessels, with an aggregate burden of some 15,000 tons, arrived at Kanagawa in the first six months of the year, fourteen under the British, and twelve under the American flag. But we have now an official report of the arrivals at the same port during the first six months of the present year, and we find that in the brief interval between these periods the trade had all but doubled itself. The returns give seventy-four vessels in place of thirty-three, and the tonnage as 25,000 instead of 15,000, Our own share, too, in this trade has been more than maintained, for, out of the seventy-four vessels, forty were British, and nineteen only American. There can be no question, therefore, about the natural expansibility of this commerce. When we recollect that the spring of the present year was signalised by political disturbances threatening the very existence of our settlements in Japan, we must acknowledge that a trade which could make such progress under such discouragement must be a very legitimate trade indeed.

But there is something more to be learnt from these returns. The Japanese of Kanagawa, who bought goods of us to the value of £70,000 in 1862, enlarged these dealings to the extent of £112,000 in 1863. It will be said, perhaps, that these are insignificant figures after all; but they represent the trade at a single port, and for six months only. The essence of the story, too, is in the comparison between the two successive years. If the Japan trade does but continue to grow at this rate, it will soon form an important branch of our national commerce; and there is evidence to suggest that such a growth is not improbable. It was but the other day that we knew little or nothing about the production of silk in Japan. The first importation of this article took place in the summer of 1859, but the failure or the silk crop in France and Italy naturally turned the attention of our merchants to the capabilities of remoter regions, and one of the first inquiries made in Japan was for silk. It was answered with incredible promptitude. In 1862 the Japanese—we are still speaking of the port of Kanagawa alone—sold us £200,000 worth of this commodity; but in the year following they had more than doubled this supply, and the total amount of silk exported from Japan during the present season is valued at nearly £2,500,000. In four years, therefore, a supply of a very precious article has been more than quadrupled. Nor is this the only specimen of Japanese enterprise. After inquiring so successfully for silk, we proceeded to inquire for cotton. The Japanese had hitherto only cultivated this plant to a small extent for their own use, and in 1862 they had not a single pound to spare for us. No sooner, however, had the demand been notified to them than they set to work, and their very first year's contribution, received during the present season, amounts to nearly 9,000 bales. The American supply made no such beginning as that.

When, therefore, we describe the exports from Kanagawa alone as amounting to upwards of half-a-million in value, that sum in itself tells but a small part of the tale. What renders these figures so remarkable is the proportion which they bear to the returns of the year previous, which reached but a quarter of a million. The fact to be noted is the disposition which these transactions irresistibly evince. When we discover that the first demand on our part is met by the Japanese with such energetic efforts to create a supply, it is impossible to believe that they are wedded to political exclusiveness, or that they can desire a return to the isolation of former days. On the contrary, we must necessarily conclude that a people so disposed are only kept to their old traditions by force and terror. The great nobles of Japan may be opposed to the new policy as inimical to their interests or authority, but the customs on which they insist with such savage bigotry can have no real hold on the population of the Empire. It is possible enough that the old laws or traditions of Japan did ordain that foreigners should be massacred wherever they were found on Japanese soil; but it is safe to conclude that, except for the commands of the aristocracy, such laws would no longer sway the proceedings of industrious and enterprising trade s. The idea that a people so eager to sell would feel an impulse to murder those who came to buy is utterly absurd.

So far as we can judge, we have the Government and the people on our side, and the aristocracy and their retainers against us. It even appears as if the Ministers of the Daimios themselves were disposed to peace and amity, though they are unable to impress this policy on the minds of their masters. Under such circumstances, it is not to be expected that we should submit to injuries at the hands of these wilful and obstinate nobles. Besides the guarantees of the Treaty, we have probably the support of the Government, and certainly the goodwill of the people, and there is no reason why we should surrender these advantages for the satisfaction of a class. The alternative before us is simple. We must either give up this growing trade altogether, or we must defend our rights to such purpose as will secure the lives and property of our countrymen. If an Englishman may be murdered on a high road simply because he meets a Daimio and his retinue, there is an end of our sojourn in Japan. It may be true enough that such an offence was a serious crime according to the old traditions of the Empire, but unless these traditions are repudiated, we can have no place on Japanese territory. Nor can we think it altogether unprofitable to eradicate such doctrines. It is almost as charitable to reclaim a people from habits of indiscriminate assassination as to reclaim them from cannibalism. We should not, perhaps, have charged ourselves spontaneously with the mission; but if, in protecting the lives of our countrymen, we can teach these Japanese better morality, we shall have done them some service. It is deeply to be regretted, when innocent people suffer for the faults of their rulers, but that, unhappily, is an incident of all wars alike. We must protect ourselves by force if we cannot enjoy security otherwise, and when arms are once appealed to, the consequences are rarely confined to those who have deserved them.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Nov. 22.

During the whole of the week just elapsed all Holland has been swimming in an ocean of blissful excitement, and the inhabitants of all degrees, sexes, and ages were fully absorbed by the engrossing topic of celebrating their political jubilee—that is, the fiftieth anniversary of their liberation from the French yoke, and the erection of the former republic of the Batavian United Provinces into a constitutional monarchy under the mild and parental sceptre of the House of Orange-Nassau. Everybody wore about his person orange cockades and ribbons, not only in this metropolis, but all over the country. The houses and shipping were everywhere decorated with flags, banners, and wreaths of flowers and evergreens, and I saw even many horses and dogs ornamented with orange-coloured ribbons bearing the device "Orange bosen." Everybody made holiday, business was neglected, and in the evening there were illuminations, fireworks, bonfires, music, and dancing for the people to their heart's content. At the Hague the King, who is the Grand Master of all the Lodges in Holland, laid the foundation-stone of the new national monument with due masonic ceremonies, and in the presence of innumerable spectators, who gave him a most hearty reception, cheering vociferously all the time. Then there were Court festivities, processions, receptions, and reviews, and a stranger labouring under the generally received popular prejudice that the Dutch were a cold, apathetic, and phlegmatic people would scarcely credit his senses, and believe he was in Holland. But now that "the gala days of Aranjuez" are over, the people have put on the sober face of every-day life, and have returned to their usual daily avocations.

According to official tables presented by the Government to the States-General, the foreign trade of Java in 1861 was as follows:—

Digitized by Google

	Goods.	Specie.	Total.
Private trade imports in 1861..	45,203,245 fl.	1,602,815 fl.	46,806,060 fl.
Do. do. in 1860..	44,173,801 „	1,726,594 „	45,900,395 „
More in 1861....	1,029,444 „	.....	905,665 „
Less in 1861	.....	123,779 „	.....
Government imports in 1861..	7,146,050 „	22,692,000 „	29,838,080 „
Do. do. in 1860..	5,676,017 „	17,765,000 „	23,441,017 „
More in 1861....	1,470,063 „	4,927,000 „	6,397,063 „

The private trade imports of 1861 were made up by the following items :—

From Holland	18,816,486 fl.
„ Great Britain	11,132,411 „
„ France	460,797 „
„ Sweden	109,185 „
„ Hamburg	215,920 „
„ Bremen	1,515 „
„ North America	266,903 „
„ Cape of Good Hope	17,605 „
„ Bengal and Ceylon	231.526 „
„ Persian Gulf	168.878 „
„ Manila	640,473 „
„ China	1,668,632 „
„ Siam	178,104 „
„ Japan	755,247 „
„ Australia	305,727 „
„ Eastern Archipelago	10,233,836 „
Total	45,203,245 fl.

The Colonial Minister has sent to the Second Chamber a set of documents relating to the opium monopoly in Java, which have been placed in the hands of a Committee of the Chamber, consisting of Messrs. Van Bosse, Myer, Van Lynden and Guljé, to examine and report on.

In noticing in my last letter the offer of 1,000 shares for sale in the Netherlands India Gas Company, I inadvertently stated that they would be disposed of at par, whereas I ought to have said by tender. When the tenders were opened it was found that no less than 3,281 shares were asked for at different prices, from ¼ to 5 premium.

The Netherlands Trading Company have chartered the following vessels to load cargoes of produce in Java for this country :—*Cornelia*, Captain H. Croese ; *Allegonda Jacoba*, Captain D. Swart ; and *D. T. Visser*, Captain W. van den Linden, all for Amsterdam ; and the *Maria Magdalena*, Captain J. Willenbring, for Rotterdam.

H. N. M. steam corvette *De Heldin*, 10 guns, from the East India station, last from Simon's Bay, where she put in to bury the corpse of her late commander, Captain Lieutenant S. H. Binkes, who died shortly after leaving Java, safely arrived at Nieuwe Deep, on the 18th instant, under the temporary command of the First Lieutenant Younker J. C. Clifford Kock van Brengel. She made the passage from Java in 100 days, including the delay caused by putting into Simon's Bay.

A small detachment of eighty-five supplementary troops, among whom are seven non-commissioned officers, has received orders to leave the E. I. Depot, at Harderwyk, on the 28th instant, for embarkation at Nieuwe Deep, on board the hired transport *Anna and Sophia*, Captain H. Beckering, for Java. The detachment is under the orders of Captain J. P. Ermeling, of the E. I. Engineer Corps, accompanied by the Second Lieutenants of the E. I. Infantry, H. T. Soeters and H J. Holsboer.

The Anatomical Museum of the University of Leyden has lately received a valuable addition in a present of a large collection of skulls of natives of different parts of the Eastern Archipelago, from Dr. C. Swaving, formerly principal medical officer at Batavia. In token of grateful acknowledgment for this valuable present, the King has forwarded to the doctor a gold medal accompanied by a flattering letter of thanks.

A further addition to the Dutch mercantile navy has been lately made by the launch of the fine new ship *Lichtstraal*, of 1,600 tons, belonging to Mr. Fop Smit, a new ship, called the *Philips van Marnix*, of 1,516 tons measurement, built by Messrs. Pot Brothers for account of the firm of Van Zeylen and Decken, of Rotterdam, and the purchase of the American ship *Amos Lawrence* by a shipowner at Delftshaven, who has transferred it to the Dutch flag.

PASSENGERS OUTWARD.

Per *Willem Daniel*, Capt. Zeylstra, from Amsterdam to Samarang: Capt. H. G. le Clercy, of the East India army, and daughter; Messrs. O. P. Houdius and P. S. Gerlings.

Per *Billiton*, Capt. van der Straater, from Rotterdam to Batavia: Younker de Willigen von Schmidt, lady and daughter, Mr. and Mrs. Maier and family.

Per *Rotterdam*, Capt. Adriaans, from Rotterdam to Batavia: Mr. and Mrs. van Thiel, Miss J. Knappert, Mr. and Mrs. Kruyt, Mrs. van der Wick, Mrs. Havinga and child, Mrs. Seyf Cooke, Miss Beukman, Miss Waleson, Miss van der Worp, Mr. and Mrs. Harting, Mr. B. Gentil, Mr. Vrede Bik, Mr. Vrydag, Capt. G. van Rhyn, E. I. Army, Assistant-Engineer C. L. Post, Lieut. A. van Delden, Lieut. W. van der Schalk, Lieut. E. van Ende, Lieut. J. Sterk, Lieut. A. Clignett, Lieut. C. Woldringh, Lieut. F. Pompe van Meerdervoort, Art. Lieut. J Cassa, Art. Lieut. W. Suringar, Art. Lieut. F. Bauer, Engineer Lieut. J. von Dentsch, Engineer Lieut. H. Broese van Groenow, medical officer W. Osterhoff, medical officer J. Adriani, medical officer A. de Graag, L. Kaulbach, Civil Service, Miss Pottger and three children, Mr. and Mrs. Bergman and child, Mr. and Mrs. J. van Hemert and child, Mr. and Mrs. S. Gebing, Mr. H. A. Blommenberg, four Japanese native servants

COMMERCIAL.

COFFEE.—Hitherto the bright descriptions of yellow Java and Sumatra have been most in request, but within the last few days green is in in favour, and full prices are easily obtained, but the transactions were only of moderate extent. The market is in a firm condition.

SUGAR.—Raw has undergone a further improvement, and but little is offered for sale, as importers prefer to wait, in the expectation of a further rise. Among the sales were 1,250 kranjangs of Java, No. 13½, at 35½ fl., which is four florins above September sale prices; 36¾ fl. has been paid for No. 16, and 38 fl. for No. 18. The brokers have valued the Java sugar in the company's sale as follows :—No. 10, 33 fl. ; No. 12, 34½ fl. ; No. 14, 36 fl. ; No. 16, 37¼ fl. ; No. 18, 38¼ fl. ; and No. 20, 39¼ fl. The sale went off as follows :—

		September Sale.	November Sale.
No. 11,	736 kranjangs ..	29½ florins ..	36 florins
„ 12,	632 „ ..	30¼ „ ..	37½ „
„ 13,	1,120 „ ..	30¾ „ ..	38½ „
„ 14,	2,067 „ ..	32 „ ..	39½ „
„ 15,	1,909 „ ..	33½ „ ..	40½ „
„ 16,	3,154 „ ..	34¼ „ ..	40½ „
„ 17,	3,380 „ ..	35 „ ..	41½ „
„ 18,	1,718 „ ..	35½ „ ..	42 „
„ 19,	464 „ ..	36 „ ..	42½ „

All flowingly sold considerably above the valuations. Refined goods follow the rise of raw, and but few refiners are inclined to enter into new contracts at present rates. B and H and HR No. 1 are not to be had under 36 florins.

RICE.—Fine Java is in request for distilling purposes at 15½ fl. There is no demand for other descriptions. Prices without alteration.

SPICES.—Cloves command more attention, and Java cinnamon is more inquired for, in consequence of which holders demand higher prices for both. There are also purchasers of nutmegs No. 2 and 3, for which an advance of 2 to 3 cents on the company's sale prices is paid. In other articles there have been but limited transactions, and prices remain unchanged.

HIDES have a drooping tendency. By private contract the following were sold :—414 Batavia buffalo, ex *Augusta*; 1,006 Java ox, ex *Julie*; and by tender 482 buffalo, ex *Noach*; 115 do. ex *Grootmeester Nationaal*; 87 and 237 do. ex *Gertruida Maria*; 832 do. ex *Dageraad*; 3,206, ex *Grootmeester Nationaal*; 91 and 736, ex *Gertruida Maria*; all at firm prices, but since then some sales have been effected at lower rates.

METALS.—Banca tin has gone down again. 1,200 blocks were taken at 70 fl., but since then it is offered at 68½ fl. without finding purchasers. Company's Copper has also receded, and can be had at 54 fl.

INDIGO maintains its position, and 25 chests of Java were sold at former quotations.

DRUGS calm. Some parcels of india rubber, gum damar, gutta percha, and benzoin have come to hand from Java per *Lobelia*.

TOBACCO.—There have been some more considerable sales of Java both here and at Rotterdam, of which the following is the result, at the Company's Sale on the 11th inst., in this city :—

629 bales	Nauta Blitar ..	average price	51¼ cents.
380 „	Kotta	„	37 „
153 „	NN	„	16½ „
Private Sales :—			
1,912 „	Kawie	„	30 „
1,207 „	D	„	21 „
346 „	M	„	51½ „
147 „	MD..	„	43½ „
183 „	CP	„	37½ „
319 „	RDGN	„	30 „
1,122 „	MGB	„	105 „
1,754 „	BJDL	„	48 „
1,288 „	TANL	„	55¼ „
981 „	LS in a square ..	„	69½ „
373 „	MK	„	29⅝ „
301 „	TM/N	„	27 „
23 „	G	„	30 „
1,631 „	GG	„	53 „
633 „	LC	„	44 „
399 „	BD/HR	„	30½ „
1,070 „	CH/DB	„	29⅝ „

Several parcels have arrived from Java per *Lobelia*, *Minister van Hall*, and *Fortuna*. The present stock of Java is 9,634 bales.

CIGARS.—282,000 Manila were offered at public auction, but were bought in at 30 to 50 fl.

FRANCE.

A private letter of the 22nd September, received by the *Moniteur de l'Armee*, of Paris, says that the American Burgevine has entered into an arrangement with the rebels to supply a corps of 2,000 Americans, well armed, equipped, and drilled, within one year. This news is said to be confirmed by the information of two of Burgevine's agents, who fell into the hands of the Imperials. The Imperials are said to have the advantage of their opponents on account of the positions they occupy around and commanding Nanking.

SPAIN.

The Annamite Embassy has arrived at Madrid. The presents sent by the King of Annam to the Queen of Spain are forty-three in number. Among them are boxes and dressing-cases in ivory, mother-of-pearl, and different metals ; six gold and five silver coins ; a pound of odoriferous wood, called tranmhuang ; five pounds of cinnamon; forty rolls of silk, of different kinds, manufactured in the kingdom of Annam ; thirty pounds of the flour of a tubercle called thuynhtinh ; 200 pounds of white sugar, and 1,000 pounds powdered white sugar.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter.

Subscription, including postage, payable in advance, to the "EXPRESS," Twelve and Export Supplement 2½ dollars per annum.

The "LONDON AND CHINA TELEGRAPH" is published at 5 P.M. on the day of the delivery of the Mails in London.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

A NEW ISSUE FOR THE FRENCH MAIL.

The *London and China Express* will be published for despatch on the 17th of each month by the French mail, commencing on the 17th December next.

The London & China Telegraph.

LONDON, FRIDAY, NOV. 27, 1863.

THE PERSISTENT HOSTILITY OF THE DAIMIOS.

THE complex character of the events that have taken place at Japan sets all calculation at defiance as to the ultimate course that will be taken by the Daimios and their followers. Stimulated to carry out an impossible decree by the MIKADO, whom they regard as the interpreter of the decrees of fate, they cannot see clearly, or perhaps at all, the means by which so laudable an object is to be achieved. The endeavour to cut off our trade is already rendered futile by the readiness with which the Governor of Kanawaga engages to forward silk from the interior to the settlement. The reported outbreak in favour of foreigners in the Prince of CHOSEW'S dominions, if confirmed, will serve to throw considerable light on the policy to be pursued; let a party amidst the Japanese once rise in our favour and every day must add to its strength. Such a rising—even if only a pretext to secure some other political boon—will materially influence the TYCOON, who can have no hand in the murder of the merchant Princes of Osaco, who, of all others, are most in favour of the enlargement and strengthening of his power even at the expense of restricting the claims of the Spiritual EMPEROR, and of humbling the haughty pride of the Daimios. The evidence that the Princes of the Inland Sea are really under the control of the TYCOON is shown by the citation of one of these, concerned in the late attacks, to the city of Yedo. The meeting of the Daimios in solemn conferences, the particulars of which have strangely leaked out, appear to be bent on facing "the world in arms." Could they only carry out their schemes, they would accomplish marvels; but such confidence as they show in the plans laid to effect their aims is evidently based on a large supply of arms received from America. There are always speculators ready to take advantage of any demand thus arising; and looking to the calibre of the guns that opened fire on our vessels at Kagosima, we may suppose that the Prince of CHOSEW has by this time got possession of a similar description of artillery. The conferences of the Daimios, taken in connection with the circulars which followed, calling the able-bodied population to arms, is indicative of a resolute purpose; but the very means adopted for carrying it out amongst industrial populations may excite the now smouldering discontent at official exactions into a flame, and by weakening the power of the Daimios, and to the same extent the prestige of the Mikado, strengthen the Tycoon; who, as far as can be judged, is not indisposed to give effect to treaty rights.

SIR HARRY PARKES, K.C.B.

IT is whispered that Sir HARRY is to relieve Sir FREDERICK BRUCE at Peking, who comes home shortly. This report requires confirmation, which time does not permit us to obtain.

SIR RUTHERFORD ALCOCK, K.C.B.

SIR RUTHERFORD has been induced again to proceed to the scene of his former labours in Japan. Although his departure has not been officially announced, and no special mission has been publicly assigned him, there is no doubt that Her MAJESTY'S Ministers, impressed with the serious liability that lies upon them as to the future action to be taken in Japan in vindication of our outraged treaty rights, has given full plenipotentiary powers to Sir RUTHERFORD to act in a diplomatic capacity. If knowledge of the Japanese character and acquaintance with the Japanese political organisation can serve our interests, these will now be put to service in the person of the fisst Envoy. Sir RUTHERFORD will find a far more complicated state of affairs than those he had to arrange and settle on his former mission. With every respect to Colonel NEALE, it must be confessed that the present involved state of our relations has not been satisfactorily shown to have been unavoidable, had a different course been pursued, less delay afforded to the Japanese to arrange their plans and gain time for the present hostile demonstration. Sir RUTHERFORD proceeds by the mail of the 26th December, and will be accompanied by Lady ALCOCK. Many of our countrymen will not welcome the arbitrary judge and jury of the Moss trial. All we urge is, that on no account should our countrymen be handed over to the tender mercies of the Japanese. This is against the treaty, and monstrous.

THE NEW CURRENCY FOR HONG KONG.

THE colony of Hong Kong will, at an early day, be in possession of the first issue of the improved currency. Twenty millions of bronze mils of the new coinage are now ready for shipment, and will be shipped off in a few days, together with a first instalment of the new silver coinage. Every arrangement has been made for the early completion of the balance by Mr. KINDER, the newly-appointed Master of the Mint, under whose supervision they will be promptly despatched. In the *London and China Telegraph* of the 27th March, we stated the value of the several pieces composing this new coinage. Between the mil and the dollar there will, when all the proposed issues are made, be a series of intermediary coins, of decimal values, closely assimilating to that of the United States.

THE FRENCH TREATY WITH THE KING OF CAMBODIA.

IN our last issue we published an able letter from our Paris correspondent, giving the details of the treaty concluded by Admiral DE LA GRANDIERE, in August last, with the King of CAMBODIA (or Camboge), himself a tributary of the King of SIAM. We refer to the subject in the hope that ere too late a strenuous effort may be made to save the route through British Burmah, to which we had occasion very recently to refer, and with which the name of the Messrs. SPRYE is indelibly associated. The point at which the right of trade on the Cambodia is limited by treaty is uncomfortably near Kien-Hung, considering the very backward state of our preparations to avail ourselves of the natural and political advantages we enjoy. We have in another column incidentally alluded to the strategic importance of Captain SPRYE'S route, which becomes of tenfold greater degree should the French succeed in passing up the Cambodia before our arrangements were completed. Once the route was opened, we might laugh to scorn all idea of rivalry; but in order that we should derive that feeling of security, it is absolutely necessary that we should be up and doing. The unreadiness of our Saxon nature will hardly ever have landed us in a more irretrievable disaster than if we permit the two great centres of our influence in the East to be dissevered by the interposition of a third, and that a rival Power, rapidly becoming commercial under the inauguration of a more enlightened policy of free trade. We regret also to perceive that Sir CHAS. WOOD answered a recent representation on the subject in the usual stereotyped form—that nothing could be done till the surveys of Burmah, about to be effected, were completed by the Indian Government. This is not the reply of a statesman eager for his country's welfare. While the official survey is being elaborated the opportunity may have passed away for ever. The Paris correspondent of *The Times* writes:—

"A private letter from Saigon of the 26th of September contains some new details relative to the progress of the French in their colony of Cochin-China. Special commissioners were

Digitized by Google

about to leave for Camboge, and were to ascend the Mei-Dong, in order to lay the foundation of an establishment which the French Government is about form at the junction of the four branches of that river, in pursuance of a treaty which the KING of that country signed with Admiral LA GRANDIERE. This establishment promises to be of great value. It is to be situated near the town of Nam-Vau, which the new KING is about to make the capital of Camboge, in place of Houdon, which is placed in a less favourable situation. After having accomplished this part of their mission, the commissioners are to proceed to the mines of Anghor, which are rich in coal. In case the quality of the coal should prove to be as good as it is represented, the mines are to be worked by the engineers attached to the French army, and native Christians are to be employed. The latter are very numerous in the country, and enjoy the reputation of being the best workmen. There are likewise many excellent foremen among them, who were trained in the professional schools directed by French missionaries."

THE REMEDY FOR THE SITUATION IN CHINA.

WE greatly fear that there are troubles in store for China, such as she has never yet undergone, not even when the Taipings first cropped up, and signalised their existence by pitiless massacres and endless devastation. The very fact that they are now being organised under Western civilisation should make all who take any interest in the fate of China bestir themselves, and sink minor differences in the main object of saving society there from utter dissolution. We are not going to waste time, like so many of our contemporaries, in speculating as to the motives that actuate those who have thrust themselves forward in this quarrel. All the invective in the would will not recall the past, or enable the Imperialist Government at Peking, even if it would, to eradicate foreign ideas and foreign influence from the shores of the flowery kingdom. It is simply to ignore what is passing before our eyes, to refuse to accept as a *fait accompli* that we are, whether Professor GOLDWIN SMITH will have it or no, committed, as a nation, to the Protectorate, at no distant date, possibly the ultimate absorption of China. The sooner statesmen and peace-orators, and timorous publicists recognise that great truth as a something definite, which is certain to work incalculable mischief if not at once permitted to enter as an element into all questions of policy in the Far East, the better for our own dignity, the better for the 400,000,000 of Chinese, and the better for humanity at large. It may serve for generations to come as a text and a warning, to be enlarged upon by moralists and others; but the statesman's duty, as a man of action, is plain and immediate. Once the conviction is forced upon him that such is to be the result, he is bound to see that his country's influence is wielded by properly responsible authorities.

According to latest accounts, it will need all the skill of Lord PALMERSTON'S Government to refrain much longer from interfering effectively, and thus paving the way for the transition which is imminent. Disorganisation is actively at work in every rank of those who had obtained permission to enrol themselves in the ranks of defenders of Imperialism in China. Not alone is Captain OSBORN, unable, owing to natural causes, to co-operate with the hard-pressed garrison of Quensan, but he finds he cannot obtain the pecuniary means necessary to enable him barely to pay his troops. Mercenaries are the same in all ages. We are ready to acknowledge Captain SHERARD OSBORN'S chivalrous nature, but his crew, it seems, instead of being picked seamen, are a set of unreliable desperadoes. The natural result of pay being in arrear has followed. The men are deserting wholesale, while their leader has gone to Peking. Major GORDON, in like manner, has found it necessary to dismiss his European body-guard, who will, of course, swell BURGEVINE'S ranks. The rebels are being further constantly reinforced by crowds of reckless adventurers, all flocking to the standard of BURGEVINE, who has wisely resolved not to risk any general action till he has his troops thoroughly drilled, and a basis of operation fully organised. We all know how ready manufacturers are in this country to denounce an annexation policy with the tongue, while the brain contrives and the hand furnishes the means of supplying both parties indiscriminately with the means for maintaining that chronic state of hostilities which must sooner or later result in our absorbing the territory, or at least the largest, and, let us hope, the best portion of it. We may yet find Russia on the Hoang-ho, and France on the Upper Cambodia, "making her influence felt" throughout Western China, while we shall be interposed, sandwich-fashion, in the valley of the Yang-tse-Kiang, but cut off through official apathy from our true basis of operations, India *via* British Burmah.

At Peking itself we see nothing but uncertainty and its inevitable accompaniment, distrust. Mr. LAY and Prince KUNG are evidently at issue as to the precise functions of the so-called Customs Fleet of Commodore OSBORN. The fact that 1,000,000 taels are due on account of pay, looks very much like one of those devices for compelling a diversion from the original design which unscrupulous rulers are so fond of. Whether Captain OSBORN really supposed himself appointed Admiral-in-Chie of the whole Chinese navy, is only important as showing another absurd complication; for it seems he always regarded himself as bound to take orders from Mr. LAY, a subordinate official in the Foreign Department of the Board of Customs! And in order to lend the last touch to this marvellous compound of trickery, mismanagement, cupidity, and utterly unstatesmanlike indecision of purpose, we find that Mr. LAY resolves, as his ultimate appeal, to get Sir FREDERICK BRUCE, Her MAJESTY'S representative at the Court of China, to use all his influence in obtaining for Captain OSBORN permission to violate what, on the hypothesis, is a solemn agreement! We fear it would be too much to expect Sir FREDERICK BRUCE to fix Mr. LAY and Captain OSBORN upon the horns of this dilemma—"Either you had a written understanding with Prince KUNG defining your powers—in which case produce it—or you had not, in which case I cannot help you, as in your present official position you are neither of you answerable to British authority." Such is the common-sense view of this particular difficulty, in solving which no excessive delicacy need be observed. Until, however, it is settled, the Imperialists are exposed to the most fatal of all dangers, that of divided counsels, with the added peril that concession or denial are alike ominous of "the beginning of the end." If Captain OSBORN be relieved of all subordination to local viceroys, the days of Imperialism in China are numbered. The MANTCHU dynasty depends for its very existence exclusively upon its supposed power to reward and punish at will. There cannot be two concurrent jurisdictions, and hence Captain OSBORN, if his request be granted, virtually supersedes all mandarins of whatever class. If, on the contrary, the Cabinet of Peking refuses to delegate its authority to the commodore of a departmental fleet, it forfeits its best, almost only, chance of suppressing the rebellion. The foreign trading community, meanwhile, will find the practical benefit of a strict neutrality, when the two contending parties are headed by men of their own Caucasian race, and once the two combatants are fairly exhausted, they can always get up a fourth British war against the victor.

We confess we see but one remedy, and that is to accept the position, and get certain of the treaty ports declared Crown colonies of Great Britain—say Shanghai and Ningpo. The first-named is virtually an English colony at present, and the advantage of having it confirmed, by formal investiture in the Crown of Great Britain is, that we should then have a permanent foothold in the country, entitling us to give advice and render assistance (always present on the spot) without, as at present, having to go to war on all occasions, and transport men, horses, artillery and material 15,000 miles, and as many back. The actual position of Chinese policy very much resembles the Treaty of Vienna. That was to have pacificated Europe, and Europe has ever since been in one continual ferment, with a series of wars and revolutions. Without actually going so far as the Emperor NAPOLEON in saying it has "ceased to exist," we may admit that what is good of them is quite susceptible of retention in another form. In like manner our attempts to enable Chinese and English civilisation to get on comfortably together, by making us regard each other as benefactor and humble recipient, has signally failed, and a continuance of such a policy will, as we have seen, inevitably produce far greater evils. It would be infinitely cheaper for England to purchase thees colonial privileges, even for £10,000,000, than to continue a series of wars, enormously costly in themselves, yet petty in every sense, since they are only waged to uphold a few commercial monopolies, they advance no one principle of civilisation, and they have for result simply to embitter the minds of the governing and educated classes against us. What progress we have hitherto made has been at the cannon's mouth. Can there be any harm in laying aside punctilio, and endeavouring to propagate our great and deserved influence, by the peaceful weapons of common-sense, legitimate enterprise, and statesmanlike foresight?

THE OPENING OF WESTERN CHINA.

The East India and China Association have again addressed Lord Palmerston on this subject, and we regret to see that the letter was handed over to the tender mercies of Sir Charles Wood, who, it will be seen, gives the request an evasive and unsatisfactory reply :—

"East India and China Association,
2, Cowper's-court, Cornhill, E.C., Oct. 29, 1863.

"My Lord,—The committee of this association learn with pleasure that a treaty of commerce has been concluded between Her Majesty's Government and the King of Burmah, which allows the settlement of British subjects in Burmah, and of Burmese subjects in Her Majesty's territory for trading purposes.

"This association is of opinion that the conclusion of this treaty, if the provisions are rightfully carried out, will be a favourable opportunity for the extension of the trade of this country and the western provinces of China, the inhabitants of which provinces are well conducted, industrious, numerous, and wealthy, and produce silk, tea, and other articles of good quality and well suited for British consumption, and for which the British products may be beneficially exchanged. At present, however, those provinces of China are inaccessible except by a difficult, circuitous, and expensive route, which will prevent commercial relations from being fully and satisfactorily developed.

"This association, therefore, respectfully submit this subject to your Lordship's consideration, in hopes that Her Majesty's Government will cause instructions to be transmitted to the India Government for a thorough practical survey to be made under the superintendence and immediate direction of some duly qualified and well-known engineer, in order to ascertain the most easy and direct route for a road or tramway between Rangoon and Kiang Hung, as by so doing private enterprise would doubtless be used to establish a means of commercial communication between British territory and the western provinces of China.

"I have the honour, &c.,
"S. GREGSON, M.P., Chairman.

"To the Right Hon. Viscount Palmerston, K.G.,
G.C.B., M.P., First Lord of Her Majesty's Treasury."

"India-office, S.W., Nov. 17.

"Sir,—I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letter of the 29th ult., addressed to Viscount Palmerston, praying that the Government of India may be instructed to depute a qualified engineer to survey the country between Rangoon and Kiang Hung, with a view to the eventual construction of a road, as may be found best, between those two points; and I am to inform you in reply that the Government of India have been instructed to report on the best means to be adopted for developing the resources and improving the intercommunications of British Burmah. Pending the receipt of their report, Sir C. Wood is not prepared to issue any further or more specific orders on the subject.

"I am, Sir, your obedient servant,
"HERMAN MERIVALE.

"Samuel Gregson, Esq., M.P., Chairman,
East India and China Association."

CONSUL SWINHOE ON THE ISLAND OF FORMOSA.

More than ordinary interest attaches to that insular appanage of the Chinese empire—Formosa. The opening of a treaty port, the location at Taiwan of a British Consul, the proved resources of the island, and the increasing consequence of its trade, added to its relative position, have led, of late years, to a better appreciation of its commercial value. The major part of our knowledge is quite recent. The flowery generalities in a native Chinese work on "Chinese Formosa," published some time since, afforded little real information, though perhaps answering its purpose as an emigration puff. "Merchants and travellers," said the sapient scribe, "resort to the colonies in numbers, and merchandise flows its endless round. Bad characters have been driven elsewhere; fortune attends the place, and the people enjoy the benefits of peace." The Dutch works on Formosa are as hazy and voluminous and unsatisfactory as a tome of Dutch theology, and consist chiefly of obscure dissertations on its traditional history and glorifications of their thriving but short-lived settlements. For although the "red-haired men," when they laid hold of it in 1630, aimed to make it an indestructible stronghold, their batteries were too weakly manned to withstand a well-concerted attack, and little more than a quarter of a century sufficed to measure out Dutch supremacy in Formosa. Two centuries have flown since the Dutch were ousted; but Dutchmen delight in doing things in substantial style, and the ruins of those "red-haired forts" still mantle the crest of the Formosan hills, and revive the memory of the great sea rover COXINGA.

Mr. ROBERT SWINHOE, Her Majesty's Consul at Taiwan, has treated of Formosa in every aspect which can command the interest of the political, scientific, and commercial world. His papers, read before the British Association, the Royal Geographical, and the Ethnological Societies, embodying the results of his investigations, have not only brought him fame for the researches they record, and given him rank as a discoverer in natural history, but constitute a valuable contribution to our commercial knowledge. In that excellent publication the *Ibis*, we have come across Mr. Swinhoe's contributions to ornithology. Mr. Swinhoe observed in Formosa no less than 200 species of birds, thirty-two of these new to science. The illustrations and descriptions of these will be embodied in the magnificent work now in preparation, entitled "Birds of Asia." As to the ethnology of Formosa, the author broadly divides the people into two races, the wild aborigines and their descendants of the Malay type, and the commercially civilised descendants of the Mongol type. Mr. Swinhoe visited the neighbouring islands, and found the Pescadores to be inhabited by Chinese fishermen and farmers, emigrants from Amoy, Chinchew, and Swatow, all speaking the Teck-chew or Hoh-keen dialect. It appears that a Chinese functionary at Makung, in the Pescadores, exercises jurisdiction as a naval commandant, responsible to the chief military authority at Taiwanfoo. This functionary, with a small fleet of dilapidated junks under his command, exercises jurisdiction over the entire group of islands, which are inhabited by Chinese fishermen and farmers.

Though the plains and lower hills are colonised by Chinese, the wooded mountains and fastnesses of the interior are still held by tribes of men of the Malay type, more or less allied to the natives of the Luzon. The author visited these tribes, and gives the following account of one of them :—

"The savages were anxious to know if the Chinese were hiring us with our good guns to exterminate them. They were very anxious to procure any of our guns, but one of the women recommended them to only ask for the rifle. They wanted to know whence we came, we replied from China; they said they would like to go to China, at which the Chinese laughed loud. Most of the Chinese about there could speak some words of their language, and some were on very good terms with them, living on their hills, and associating with them.

"This savage clan appears to muster a very few for the size of their country. They are said to have only seven *sear* or villages, containing each from 300 to 400 souls under four supreme and several petty chiefs. Owing to the introduction of spirituous liquors and other unknown causes, they seem to decrease in numbers, and will, probably before the lapse of many centuries, entirely dwindle away before the steady advance of the rapidly-increasing Chinese colonists. The Chinese state with confidence that another century will witness their entire extermination, but this is perhaps too short a time for its fulfilment. The nearest chief lived in a village called Geeehing-sear, said to be about two days' journey from where we were. He gloried in the name of Pai-ho-pai-yet. The land beyond his was controlled by the Yew-bin-ah-tan, who lived in the village of Tungsear."

A Dutch minister who resided in Tefurang, in Formosa, gives the following account of a tribe called Sakkam who have entirely disappeared :—

"They were rude and savage, robust, and almost of a gigantic size, not black like the Kaffirs, and counted it no immodesty to go stark naked. Their women well built for stowage, short, and inclining to grossness, wearing apparel; yet twice a-day they strip themselves, and are not ashamed to bathe and wash in public. These, though a barbarous people, were kind to the Netherlanders, heartily entertaining them with their own, hough mean, yet wholesome fare."

The Chinese work to which we have alluded enumerates as tempting baits to adventurous travellers the jade mountain, the inland salt lake, and the volcano; but Mr. Swinhoe gives us the following from the islanders themselves :—

"The wonders of the world are usually set down as seven; Formosa has its eight wonders, but they are wonders only to the untravelled native of a Fokien city. As they may prove of interest to some I will here mention them. '1st. The sun rising from the eastern ocean. 2nd. The appearance of prismatic colours in the vapours overhanging the western isles. 3rd. The return at nightfall of the passage boats. 4th. The lights used by fishing boats viewed at night from the Sha-kwan sands. 5th. At Loo-wah-mun, the spring floods from the mountains. 6th. The snow on the mountains near Kelung. 7th. The boundless ocean viewed from Chingtai. 8th. The roar of the angry billows on the Feiting shore.' One cannot help feeling pity for the Chinese cockney that first noted these as wonders."

The author visited the Kelung coal mines in 1857. They consist of a dozen excavations at different heights on the side of a hill facing the sea; the strata of coal is from one to three feet in thickness; the coal obtained is small, and bituminous, and burns fast, with great heat and flame; it turns out to be a lignite, and, as the author remarks, can never compete with English coal in the Hong Kong market. Besides burning too rapidly for steam purposes, it gives out a sulphurous stench. The following is a sketch of one of the sulphur mines between Kelung and Tamsuy, visited by Consul Swinhoe :—

"The sulphur mine appeared at a distance like a canker on the side of the grass-covered hill, which was fresh and green everywhere except in the immediate vicinity of the mine. The broad sulphur valley, or chasm, was everywhere a pale sickly tint of yellow and red; and out of many of its numerous recesses hot steam gushed out in jets with great noise and force, like the steam from the escape-pipe of a high pressure engine; in other spots small pools of pure sulphur were bubbling. At the bottom of the barren ravine rippled a foul rivulet carrying off the sulphurous oozings

Digitized by Google

from the ground. Within, and round about this hollow, the earth underfoot crumbled and groaned, and the air was so saturated with the exhalations of sulphur as to have been extremely noisome, and destructive to insect life especially, of which we saw abundant proof in the numerous remains of beetles and butterflies scattered around."

The British trade with Tamsuy is yearly enlarging. The exports comprise rice, indigo, coarse sugar, jute bark, ground-nut cakes, camphor, grass-cloth fibre, wood, rattans, tea, rice-paper pith, pickled vegetables, small pulse, barley, wheat, and sulphur. The tea does not appear of a superfine character, but finds a market in Australia, the Cape, and Singapore. As to rice, Formosa has earned the title of the granary of China. The author considers that but for Swatow and Amoy usurping the Formosa sugar market for North China, we might expect a good business in the exportation of this article from Formosa. Of Formosa imports the author remarks:—

"The imports are mainly Chinese produce from the ports of Ningpo, Foo-chow, *Chinchew*, and Amoy, and through the same channel foreign goods have found their way, but the demand is small. The staple import, as throughout China, is opium, and to supply the 3,000,000 Chinese colonists of Formosa with this almost necessary of life, a large flow is required. Many of the aborigines, I am told, have also learned to smoke it, but they seldom manage to get more than the refuse of the pipe, or, as it is called, *opium dung*."

Respecting the article of camphor we have the following remarks:—

"The manufacture of this article has for some years been monopolised by the Taotai (or head Mandarin) of the island, and its sale farmed out to wealthy natives. In former years a good deal of the drug was clandestinely produced and smuggled across to China, where it was largely bought up by foreign speculators, and carried to Hong Kong for shipment to Calcutta, at which place it finds the readiest market, being used by the natives of Hindostan for lubricating the body and other domestic purposes. But now its monopoly is so closely watched that almost the entire trade in it falls to the lucky individual whose Chinese agents can secure the monopoly. This bad system has occasioned the price of the article in Hong Kong to increase considerably in value, and to make the profits accruing to the fortunate monopolist almost fabulous. The cost of the drug, I learn, amounts to only six dollars at its place of manufacture. The monopolist buys it from the Mandarin at sixteen dollars the picul, and sells in Hong Kong at twenty-eight dollars. The gigantic laurel (*Laurus Camphora*) that yields the camphor, covers the whole line of high mountains extending north and south throughout Formosa. But as the greater part of this range is in the hands of the aborigines, the Chinese are able to gain access only to those parts of the mountains contiguous to their own territories that are possessed by the more docile tribes. The trees as they are required are selected for the abundance of their sap."

Notwithstanding the political circumstances that have tended to check the trade of the little port of Tamsuy, the author is hopeful of the future, and calls upon the naval authorities to essen the dangers of approach to this port.

THE YANG-TZE-KIANG AND THE NEW TREATY PORTS.

(To the Editor of *The Times*.)

SIR,—On the morning of the 11th of February, 1861, the naval expedition under command of Vice-Admiral Sir James Hope left the Woosung River for the purpose of exploring the upper waters of the Yang-tze-kiang, and of opening intercourse with the trading ports on its banks. Nearly three years have elapsed since the successful results of this expedition have been published to the world, and since that time many have been the evidences of the vast resources which opening the interior of China has presented to the commerce of western nations.

From observations made during a recent visit to Hankow with a thousand ton ship I am enabled to testify to some of the difficulties of the navigation during our progress up in ballast and down full of tea, drawing 19ft. 4in. The first and great difficulty is the Lang-shan crossing, about fifty miles above Woosung; at this part of the river there are numerous sandbanks, partly covered at high water, and the channel between them is rather intricate; but it is well buoyed, and there being a light ship as well makes it comparatively easy, the least water in it coming down in July was half five, and, in fact, the danger was less than getting from Woosung to sea. From the Lang-shan to Chin-kiang the navigation is easy, the river contracts gradually, the channel deepens, but the current increasing in strength. At Silver Island I had to land, at the imminent risk of being capsized, to show our river pass—a formality instituted by the authorities causing considerable detention; the tide at this place runs so strong that a six-oared gig could only just stem it, and Her Majesty's Consul in charge was lately capsized in a man-of-war's cutter. These dangers might be mitigated by the removal of the Consulate and Custom-house to Chin-kiang, or temporarily to a floating hulk, of which there are several in the anchorage. Chin-kiang is a fine city, but presents a very dilapidated appearance, having been formerly held by the rebels. The Grand Canal is here intercepted by the Yang-tse, and several tug steamers are employed in towing the deeply laden salt junks past the rebel lines at Nankin. There is one serious drawback, and that is the anchorage. Vessels lying at that port, or calling, must all anchor on the opposite shore to the British concession, that being the only decent anchorage in it. The adjacent banks are low and marshy, and unsuited for European residences; but on the city side are several pretty sites for bungalows. The current from here up runs with great rapidity, and the numerous steamers now constantly passing on the river render the practice of running all night extremely dangerous. The loss which would result in event of collision, whether sustained by assurer or insured, would be heavy, their cargoes valuing at times £50,000.

The upper passage of the river above Chin-kiang is well-known to the experienced pilots now on the river, and there is good anchorage to be had in any part of it, until reaching Kew-kiang, where a goodly array of foreign residences have sprung up, and but for the ever-recurring and disgraceful atrocities of the "braves" it would be a pleasant place of residence. A range of mountains two thousand feet high at the the back, forms a pleasing contrast to the flat uninteresting plain opposite. As at Chin-Kiang the anchorage is bad here, the ground is rocky and the water deep, and the river about three-fourths of a mile wide. Kew-kiang has, however, not realised the expectations formed of it when Sir J. Hope's party visited it; it is a market for green teas and a few blacks, but does not improve in its demand for manufactured goods. Thence to Hankow we pass through some of the finest scenery in the world, the river at times winding through a rich, cultivated plain; at others, past the base of a high range of hills, some cultivated to the summit. Every here and there are dotted towns and villages, wedged in sometimes between two hills, with their numerous pagodas and battlemented walls, and Buddhist monasteries perched on the brow of some lofty hill, and the small craft attached to each town, some fishing, others larger moving, to all appearance, through paddy fields, and the people in a state of prosperity, the whole country bearing a marked contrast to the ruined cities, broken walls, and burnt joss houses of the rebel districts through which we passed.

The approach to Hankow, which in past years, before the rebels descended the river, was marked by a forest of masts lining both sides of the Yang-tze-kiang, here about a mile wide, is now discerned by the long and imposing range of English hongs and warehouses extending about half a mile above the river Han, and three-quarters of a mile below it, quite overtopping all the native houses in the vicinity, and affording a most refreshing prospect after coming so many hundred miles from the sea. The important city of Woo-Chang, the capital of the Hoo-Qwang, and seat of the Viceroy, is immediately opposite. There are now established at Hankow about 30 British firms, including all the leading names in Hong Kong and Shanghai, three American and three or four German and French houses, and one Russian hong. The most anxious care is now requisite to select a fitting anchorage, which in the summer months is no easy matter; the strength of the current and the chow-chow water render a safe berth, where cargo may be landed and shipped, very difficult to find; lucky, indeed, is the vessel that escapes without loss of more than an anchor and cable, for broken windlasses and hawsepipes are among the disasters attending the anchorage opposite to Hankow. There is an abominable chow-chow water formed by the river Han, which empties itself into the Yang-tze-kiang at right angles, the main current of the larger river sweeping it away, and forming those eddies many miles down. We found it prudent to moor with three anchors; one passed on shore o the bund made the ship comparatively easy, and the anchors should be sighted at least once a week, as they very soon get covered from the silt out of the Han and plant which grows very rapidly at the bottom. From information received from the captain of one of the gunboats the anchorage opposite Han-Yang appears to be the best; there the bank is more gradual and the water more shallow. Han-Yang is on the right bank of the Han river, a narrow stream of about 120 yards in width, and is preferred by some of the residents as being more healthy than Hankow; the land is higher, the air purer, not having to pass over a dense Chinese town during the summer months; and, above all, the anchorage is safer. The French Consul has taken up his consulate here, and a suspension bridge to connect the two towns has been projected, as a means of bringing into closer connection the warehouses above the Han with the native shopkeepers and hongs below. The present system of cargo boats is wretchedly bad; they are unwieldy, and propelled by a great scull oar, worked by ten or a dozen men, and when they get involved in the chow-chow water it is difficult to extricate themselves. One of these boats leaving a steamer with about £3,000 worth of cash got foul of our bows and disappeared, drowning some of the men. This is a common occurrence. Unless the present anchorage opposite Hankow is changed for a better one, such as that off Han-Yang, where a ship can ride in safety, there will always be great risk in landing and in shipping goods at this port. There is every probability of sailing vessels taking away first teas in future, no less than four of large tonnage having sailed for England this season, and it is only reasonable that the Chinese authorities should facilitate as much as possible any measures which are calculated to render the navigation or anchorages safer and more convenient for the receipt and despatch of cargo. The Lang-shan crossing is the only point of danger in the navigation from Woosung to Hankow, but, notwithstanding this, the voyage is not attended with greater risk than the navigation of the Hooghly at the present time.

The British concession at Hankow covers an area of about ninety acres. The allotments have the advantage over those at Shanghai of being held by titles direct from the British Government. From fifteen to twenty British hongs are now in course of erection, and the municipal council are engaged in bunding and in laying out roads. A large piece of land has been presented by the British Government for a church, the plans of which are before the community, and a club-house has been contracted for; in short, the most indifferent observer cannot be otherwise than impressed with the conviction that Hankow is destined to become the Kiakhta of Central China, and the most important of any of our seats of commerce in that most interesting country.

ALEX. BOWERS, R.N.R.,
Master of the ship *White Adder*, belonging to Messrs. John Willis and Son.

The letter of Captain Bowers furnishes us with that precise information of the navigation and of Hankow itself which we much needed, for the local papers (as is only natural) assume that people here know all about it. We can assure our contemporaries that the letter of Captain Bowers and the leader in *The Times* have been quite the topic with China people in the City, and we hope shipmasters will more frequently favour us with their notes on the great Yang-tsze. We shall be most happy to publish them. *The Times*, in drawing attention to this interesting letter, has the following leader:—

Digitized by Google

It will be wise to speculate but cautiously upon our recent news from China. The country is too big, and the influences which produce events there are too imperfectly known, to allow us to generalise at once with rapidity and certainty. The old Empire is like a great whale in the southern latitudes, struggling, and splashing, and diving, and heaving under the simultaneous attacks of three or four thrasher-fish; and perhaps there are also whalers not far off armed with all the appliances dictated by human sagacity, and watching their opportunity to cut up the creature's blubber and boil it down for their own European purposes. Under such circumstances we cannot judge from a distance what may be the especial strength of this or that blow from this or that thrasher-fish, or what may be the chances of this or that harpooner. We cannot tell from any single convulsive effort of the perplexed monster which of the thrasher-fish he most dreads, or whether his next effort will be to go right away down to the bottom, or to lash about him upon the surface, or to drive head-foremost at the nearest ship. Even if a European statesman were at this moment the adviser of the infant Emperor and the Regent Mother he might, perhaps, be puzzled to know whether his most fatal foes were to be found among the Taipings, or whether he had not still more to dread from the American soldiers of fortune who pass from side to side as their interests seem to sway: or the French Consul, who is always pressing upon him costly and undesired assistance; or the British Government, which limits its aid within restrictions which to an Oriental mind may easily appear capricious; or the expeditionary force of Commodore Osborn, which demands securities for its own preservation and which imposes conditions for its own self-respect. It must be clear, even to Prince Kung, that of all the many friends who offer their swords to the Empire no one is actuated by pure and loyal love of the Imperial dynasty. The shrewd mandarins of Pekin can see that no one among these foreign friends cares anything either for the dynasty or for the Empire. We ought to bear with them, therefore, while they are trying to ascertain which of their friends has the most harmless object, and which is least hostile to the existence of the present Empire. One, at least of the Chinese advisers of the Empire is a shrewd and enlightened man, and, ultimately, the Court of Pekin will certainly see that England is the only European country which wants no Chinese territory, and that the British expeditionary force is the only force which, although it may be made to retire in disgust, can never be provoked to change sides in the war. Whatever difficulties may have occurred at Pekin, nothing has happened that has not been foreseen, and which is not necessarily incident to all Eastern Councils. One fact is quite certain—that whatever might have been the eagerness of the Government of Pekin to employ their newly arrived fleet to clear the Yang-tze and put down piracy, the wary leaders of that expedition would never have committed themselves to any serious work until the hot season had passed, and the rivers and their banks became safe for their sailors. Under no circumstances could we have had any news of actual achievements. It will be time enough to listen to bad auguries when the season for action has come and no news of action arrives.

Meantime, although the Empire does not spring up in a moment into life and strength, as some would seem to expect, it is allowable to mark what strangely rapid changes are passing before our eyes in the social and commercial condition of the Chinese people. We invite the statesmen who took part in the Arrow and Sir John Bowring debates to compare the state of things which they then had to "get up" for that great gladiatorial contest with the condition of affairs described by the plain seaman whose letter appears in our columns to-day. To men of a moderate experience in our political conflicts, it seems but as yesterday that eloquent leaders of parties were inveighing in our House of Commons against the unreasonableness of English merchants who complained of being stoned from the walls of Canton, or of having their companions murdered during a walk just outside their factory. They will remember how, even after the debates were over, we were almost besieged in our little island of refuge at Hong Kong, our supplies were cut off, our Chinese servants called away from us, and a strong party in England was ready to declare there was nothing for it but to abandon the ports, reduce our transactions, and be content with the scanty streamlet of commerce that might be made to flow again through the old hongs. This journal, which pertinaciously—not to say obstinately—persisted in pointing out the necessity to this country of a complete commercial intercourse with China, through the instrumentality of the great Yang-tze River was sneered at as having believed itself to have discovered a new river in China. We were told that all that was known of it had been known for centuries; that it was a turbulent, erratic flood of waters, always changing its course, and known above Nanking only as a fabled and mythic stream whereon returned missionaries had vaguely placed cities of incredible proportions. Even the Geographical Society would have been puzzled to tell at that short distance of time, from the *Lettres Edifiantes* and Du Hulde and Father Huc, whether Hankow contained eight millions or a-half of people; or where it was, or whether it was, indeed, but an item of a congeries of cities; or, in fact, whether it existed except in the imagination of the Jesuits. English opinion was, however, nearly unanimous on one point, and that was that the notion of shipping our teas direct from this mysterious and very doubtful place was about as wild a notion as ever came from a distempered brain. This universal ignorance as to Hankow, and this partial scepticism as to its existence, are not more than five years old. Well, now read the letter of Captain Bowers. Here is an Englishman who has just come down the Yang-tze from this very city of Hankow, in a British ship of a thousand tons, drawing nineteen feet of water, and full of tea. All the uncertainty, all the mystery, we may almost say all the danger, has vanished from the doubted city of the Upper Yang-tze. We are not insisting upon this as a great naval achievement. Our naval men in ships of war have done it before. But we draw attention to it as a simple commercial voyage now performed in the ordinary course of business. The voyage, we are told, is not attended with greater risk than that up and down the river by which we reach Calcutta. In this far-away city in the centre of China there is at this day a space of ninety acres cleared for British residences. From fifteen to twenty British hongs—we should call them palaces in Pall mall—are rising; the residents are tracing out the lines of a church, and are approving plans of a club-house; and "the Municipal Council" are engaged in laying out public walks and in constructing roads. There are some difficulties about the anchorage, but four ships of large tonnage have sailed laden with teas this season, and it seems now that henceforward our British ships will take up their cargoes of teas in the very emporium to which all the markets of China are but tributaries, and will bring them home, bulk unbroken, to the Thames. It is less than five years; yet the river has been buoyed up, lit up, and thoroughly mapped with as accurate a survey as we have of the Mersey or the Medway; and as the great ships float swiftly down, laden with their precious freights, and pass the ruined haunts of the Taipings, they ask for nothing but a fair protection from piracy to make the intercourse between the centre of China and the port of London direct and secure. Thus, in a period of time which is inappreciable in the life of nations, while the numbers of *Hansard* which record the old protests are yet unbounded, we have a practical refutation of all the prophecies which warned us of the obstinate hatred of the Chinese people and of their detestation of foreign trade.

We must not now plunge into figures, or we might go on to show how great in value has that trade become, and how vastly it is increasing month by month. Such, however, is not the moral we would draw from the simple statement which this officer of our commercial marine has put before us. We would only say that while matters are prospering so hugely, while we are so succesfully invading this great territory of hundreds of millions by our merchants, our ships, our commerce, and our missionaries—the armies and sutlers of our Christian civilisation—let us not be too impatient as to political occurrences, or too desponding as to the ultimate success of the little we are doing to procure peace as well as civilisation for this people whom we so little understand. That China must, in some at least, of her provinces, very soon become rich and prosperous, and that we shall be partners in that prosperity, is now sufficiently apparent. In the end, prosperity and riches will create for themselves protection, and protection means a strong Government. It may be that our present efforts may be frustrated by the folly and imbecility of those we are desirous to assist. We do not augur that this will be so, but it may happen. In the end, however, we are certain that our intentions and our acts will be appreciated by the Chinese people. Already the Chinaman has learned to ask, when about to intrust his goods to a ship, the important question, "Can insure?" It is but a short step forwards to make the still more important inquiry of how he can insure his life, his property, and his home. He will be very soon convinced that for some time yet to come this can only be done by the maintenance of an efficient and regularly paid force upon whose honour and fidelity he can rely.

LORD CLARENCE PAGET ON THE ATTACK ON KAGOSIMA.

At a public dinner at Deal Lord Clarence fully confirmed the opinion we expressed in our last in reference to the difficulties which Admiral Kuper had to contend with in the gale while engaged with the batteries:—"Again, in Japan our sailors have been called upon to perform a very gallant action in avenging the death of an Englishman who had been murdered by one of the lawless chieftains of that country. And I am the more gratified in expressing my thanks to you for your honourable mention of the navy on that occasion, inasmuch as a report has got abroad, and has been very extensively spread by the Press, that the gallant Admiral who was charged with the duty of punishing this Daimio, the Prince of Satsuma, had acted with wanton cruelty in wilfully destroying the large town of Kagosima. Well, I can assure you that Her Majesty's Government deplore the loss of property which took place on that occasion. They deplore, as we all must deplore, that the property of innocent persons should be sacrificed in any of these warlike operations, accompanied probably with considerable loss of life. We have no intelligence whatever with regard to the loss of life, but we have intelligence that the loss of property must have been great and grievous. It has been assumed that Admiral Kuper and the gallant sailors under him wilfully bombarded a defenceless town, and destroyed the property of its innocent inhabitants. Now, it becomes me, as a brother officer of these gallant men, and likewise as the officer who may be said to represent them in this country, or, at all events, in the House of Commons, to explain to you that the loss of property, through the dreadful conflagration which occurred on that occasion, was not due to any intention of the Admiral or the officers and sailors of the fleet, whose only object was to punish the insolent Daimio who had been guilty of the murder of an Englishman. The action was precipitated by the forts of the Daimio commencing to open fire on the British ships. It so happened that it blew a very heavy gale of wind at the time, and my brother sailors around me will easily understand that in the midst of a furious storm, with a heavy sea running, and on a lee shore, it was a very arduous enterprise that this small squadron, with its handful of men, had to perform."

MR. COBDEN.

At a public meeting, held at Rochdale on the 24th inst., and attended by about 3,000 persons, Mr. Cobden, in the course of his speech, spoke as follows with reference to the late attack of our fleet on Kagosima:—

"When I see that Russia is burning Polish villages I am restrained from even approaching them, because I am afraid they will point Japanwards, and sound in our ears the word 'Kagosima.' Here that word Kagosima brings me to a subject upon which I wish to say one or two words. I see that my noble friend, the Secretary to the Admiralty, who always enters upon the defence of any naval abomination with so much cheerfuiness—(hear)—that really he seems to like the task,—has lately been speaking at a meeting of his constituents. He alluded to the horrible massacre which took place in Japan, and he says it is quite wrong to suppose that our gallant officers ever intended to destroy that town, Kagosima, with its 150,000 rich, prosperous, commercial people; it was quite an accident—(laughter). Unfortunately, he can't have read the despatch which appeared in the *Gazette*, addressed to his own department, where it is stated that Admiral Kuper threatened the Japanese envoys who came on board the Admiral's vessel the day before the bombardment that if they did not accede to the demands made upon them he would next day burn their city. The conflagration was only the carrying out of the threat.

Digitized by Google

But there is another circumstance in connection with that affair for which I feel greatly ashamed,—the stealthy, shabby, mean way in which it was managed to make it appear that the Japanese were the aggressors. Lord Russells's instructions to Admiral Kuper were that he might go and take this Japanse Prince's ships of war, or he might shell his palace or he might shell his forts. He does not tell him to do all these things; he was to demand satisfaction, and, in case satisfaction were not given, it was suggested to him to do certain things by way of reprisals; and one of the things was to take the ships belonging to this Prince. Well, the ships were moored—hid, as it were—concealed away at some distance from the city, and steamers were sent by our admiral to seize these vessels, and they were not within miles of the fort which has been firing on our ships. If the admiral had contented himself with seizing these ships, which were three steamers of great value bought from Europeans, and waited to see whether this had brought the Prince to his senses, there would have been no conflagration; but how did he act? He lashes these steamers alongside his own, and then with his whole fleet goes under the batteries of the Japanese, and waits for several hours, and when the Japanese fire on him, he says that the honour of the British flag required that he should at once commence to bombard the place, because he had been attacked first. I remember that during our last war with the Burmese precisely the same manœuvre was resorted to—the only ship of war belonging to the Burmese Government was seized by our officers under their forts, and because they fired on our vessels in the act of carrying off their whole navy it was said they commenced the war, and the honour of the British flag required immediate bombardment of the place. Now, let us suppose that a French fleet came off Portsmouth and took three of our ships of war at Spithead and lashed them alongside their steamers, and then came within range of our forts at Portsmouth. If the commander of these forts did not immediately attack the French with all his available resources he would assuredly be hung up to his own flagstaff on the first occasion. (Cheers.) Is it not deplorable that we English directly we get east of the Cape of Good Hope lose all sense of honour, morality, or Christianity? (Cheers) We resort to all the meanness, and chicanery, and treachery with which we accuse those Oriental people of practising upon us. We forget what De Tocqueville says in speaking of some proceedings of ours in India. He said, 'You ought not as Englishmen and Christians to lower yourselves to the level of that people. Remember, your sole title to be there at all is because you are supposed to be superior to them." (Hear, hear.) Do you suppose these things can be done by us Englishmen with impunity? Do you think there is no retributive justice that will mete out vengeance to us as a people if we continue to do these deeds, giving no redress, showing no compunction? There is a writer at the Oxford University, one who writes bold truths in the most effective language, and who is writing for the instruction of the next generation of statesmen—I mean the Professor of Modern History. Mr. Goldwin Smith, treating of this very subject, says, 'There is no example, I believe, in history, from Imperial Rome down to Imperial France, of a nation which has trampled out the rights of others without ultimately forfeiting its own.' (Cheers.) Do you think those maxims which we tolerate in the treatment of three, four, or five hundred millions of people in the East will not turn back to curse us in our own daily lives, and in our own political organisation?"

[Time and space will not permit us in this issue to demolish the one-sided ignorance displayed by Mr. Cobden in speaking of our relations, acts, and position in China and Japan. To our thinking, Admiral Kuper has agreeably surprised us, for we took him to be a bit of a Cobdenite until the "attack on Kagosima;" but we will vouch that time will show him to have conducted that attack with every possible humanity.—Ed. *L. & C. E.*]

CHINESE SMUGGLING IN AUSTRALIA.

The *Times'* correspondent at Melbourne writes:—

"The Custom-house seizures to which I have referred have excited no little sensation in the mercantile world, and have poured fresh light on the previously well-known ingenuity of the Chinese in evading or breaking a law. Although it is notorious that the consumption of opium by these people is large, our English merchants have of late found a very dull sale for this drug, on the importation of which there is a duty of 10s. a lb. At the same time, the Chinese dealers have been so regularly underselling their English competitors as to convince the Customs' authorities that smuggling must be going on. After careful consideration by some of the officers, it came at last to be suspected that the fraud was effected through consignments to Chinese houses in Melbourne, and by means of what are called 'sight entries.' A 'sight entry' may be shortly explained to the uninitiated as follows:—It authorises the landing and storing of goods (usually in packages, jars, or other concealing case or wrapper) in the Government warehouse, subject to subsequent inspection by the Customs' officers. On previous occasions of the examination of goods thus landed it had been observed that the Chinese themselves had always been curiously active and obliging in bringing forward cases, as if taken by chance from a larger bulk, in the ordinary official operation of examining and verifying contents. Some sixteen days back arrived from Hong Kong two vessels, named the *Jack Frost* and the *Kingfisher*, with general cargoes. The quantities of opium and other dubitable goods in the ships' manifest were insignificant, and in one of the vessels a considerable number of what purported to be Chinese crackers (fireworks) were stowed in a special cabin, and paid for at the rate of £1 a case extra freight, which was pretty nearly the value of the goods themselves, assuming them to be only crackers. So soon as a considerable portion of the packages were landed and in the Customs' warehouse, the examination began. The officers had secured the services of a Chinese interpreter from one of the goldfields, a step of which Mr. Kong Meng, the consignee, and his Chinese friends and servants had no suspicion. A careful examination of the outsides of the whole shipment enabled the private and confidential Chinese interpreter to point out that very many of the packages had a distinguishing mark on themin Chinese characters (not easily detectable by an 'outside barbarian' eye) signifying dirt.' With the usual alacrity, Mr. Kong Meng's servants and friends, evidently well advised of the private marks, were about to bring forward for examination of the officers the cases of crackers, or chow-chow, taken, apparently, without any sort of discrimination from the bulk; but, to the horror of Mr. Kong Meng, the officers proceeded sturdily to examine the contents of the whole of the cases and packages landed. The result was that a very large portion of the goods shipped as crackers, chow-chow, and other harmless, undutiable articles, turned out to be opium, cigars, tobacco, and Chinese spirituous liquors. The duty alone upon the quantities come to hand amounts to some £4,000, and the entire value of the seizure is upwards of £20,000. Of course, Mr. Kong Meng knew nothing of the intended deception; he was as much astonished and disgusted as anyone. He produced his bill of lading, offered to pay the duty, and demanded the goods. But the Customs stick to the whole, and are on the look-out for more 'to arrive.' It is supposed by those most competent to form a judgment that this system of smuggling must have been bringing in to the parties practising it some £30,000 a-year. It ought to be said, however, that on behalf of Mr. Kong Meng, that he has been long distinguished as a very munificent contributor to all religious and charitable objects, and that he lately received a most flattering address from a numerous body of his Christian fellow-colonists."

Chinese Enamels and Porcelain.—A collection of beautiful Chinese enamels and porcelain, formed by a gentleman during a long residence at Peking, including a pair of large and fine kylins in enamel, a pair of elephants in white enamel, and numerous cabinet specimens of this rare art, was sold by Mr. Phillips, at his great rooms in New Bond-street. Among the more valuable examples were the subjoined:—Lot 49. A beautiful globular vase and cover on four masked feet, with kylin handles, the whole richly inlaid in varied colours—£50. (Durlacher). 50. A very curious small globular candlestick, supported by a bird standing on a tortoise—£25. (Rothschild). 58 and 59. A pair of elegant, oblong jardinieres, turquoise ground, with flowers, and a similar pair of sexagonal form—£35. 10s. (Marks). 61-3. Two rock crystal balls of the greatest purity, and an oblong incense burner and cover, of ancient enamel, on four feet, with kylin top—£51. 10s. (ditto). 74. A large panel of ancient enamel, decorated with ancient vases, flowers, &c.; a splendid specimen—£70. (Durlacher). 81. A magnificent vase, with large trumpet mouth, rich flower and scroll ornaments, in which the "sacred eye" frequently occurs, 3 feet 3 inches in height; a unique and splendid specimen—£93. 10s. (Wareham). 87. A pair of elephants in the rare white enamel, the trappings richly gilt and ornamented, on metal-gilt and wood stands, inlaid with ivory—£66. (Marks). 88. A very beautiful vase and cover of ancient enamel, on turquoise ground, with rich pink lapis blue borders—£28. (Marks). 171. A splendid vase of ancient enamel, very rich in colour and design, with metal gilt handles, 21 inches in height—£50. (Page). 172. A magnificent incense burner and cover, on four feet, of a very rare pattern, with rich pink borders—£45. (Ensom). 173. A pair of extremely beautiful candlesticks, supported by swans, in the rare white enamel, standing on tortoises, with circular plinths; perfectly unique—£106. (Durlacher). 174 and 175. A pair of splendid porcelain fonts, very richly decorated in colours, 16 inches in diameter, and another equally fine, 15 inches—£61. 10s. (ditto). 182 and 183. An extraordinary bottle of ancient porcelain, with rare pink and yellow borders, richly enamelled over with flowers, the belt with a trellis work of porcelain, covering an interior bottle with gilt handles, a very rare specimen; and another equally fine and rare, on light blue ground, with raised flower ornaments and medallions of landscapes on both sides—£80. (ditto). 184 and 185. A ball of rock crystal of extraordinary size and beauty and another, equally fine but smaller—£48. (ditto). 186. A pilgrim's bottle, in ancient enamel, of matchless beauty and rarity, on black ground, ornamented with daisies in colours, the neck and foot bordered with white, green, and blue; metal-gilt handles—£115. (Durlacher). 188. A pair of extraordinary lamps, designed as double vases, supported and joined by fabulous birds and figures—£63. (Marks). 191. A magnificent pair of kylins, of extraordinary size and beauty of design, richly decorated in various colours, on square bases, enamelled and wood stands; from the Summer Palace at Peking; perfectly unique—235 guineas. (Wareham). The whole yielded upwards of £3,000.

American Oriental Society.—The following subjects were noticed at the last meeting:—A letter from Rev. Mr. Blodgett, of the Pekin mission, on the Mohammedans of Pekin, with lists of the Arabic works in their possession; presented with remarks by Professor Salisbury. Professor Syle endeavoured, by an examination of the literature possessed by this community, to derive the probable date of their settlement in Pekin. Mr. Syle spoke of other Mohammedan and Jewish communities in China. E. Abbott, of Cambridge—Dr. Legge's edition of the Chinese Classic and Sacred Books, with translations, notes, indexes, &c. Mr. Syle explained the mighty influence exercised by these books, through a system of competitive examination for civil office, on the whole mind of China.

Exploration in Eastern Asia.—Dr. D. J. Macgowan, who it will be remembered is an advocate for the appointment of an American Government commission, composed of scientific men and practical agriculturists, to visit and explore Eastern Asia, with a view to acquire information bearing upon arts and manufactures and the processes of agriculture there pursued; and to obtain and transmit seeds, plants, and animals, the cultivation and propagation of which would be likely to add to the valuable products of American and European farms, has recently joined the Army of the Potomac, with the view of serving it professionally, but he designs to return to China, at his own charge, at as early a day as his means will permit; and as he proposes to maintain himself while pursuing his labours in the mission field, he has resigned his connection with the Board of Foreign Missions.

The attack on Kagosima continues to be the subject of memorials to Lord Palmerston from the small towns. The following is a specimen:—"The honour of Britain has been tarnished by the abuse of her power, and a fearful calamity has been inflicted upon a helpless and unoffending

Digitized by Google

population. They pray that your Cabinet will withhold its adoption of this act of your officers until a closer investigation has shown whether it deserve your approval or reprobation."

A SALE of Japanese plants and seeds, comprising many rare varieties, took place on the 25th inst., at Mr. Stevens room', Covent-garden. The Japanese lily excited great interest and spirited competition. The bids, on the whole, were high, and indicative of the great interest and value attaching to the horticultural products of Japan.

Naval and Military.

Orders were received at Chatham directing Capt. T. H. A. Brenan, Second Lieutenant S. R. Lewis, two sergeants, two corporals, two drummers, and seventy-two privates, Marine Light Infantry, with a proportionate number of Royal Marine Artillery, to embark this day on board the screw-liner Conqueror, 78, Captain W. G. Luard, for service in Japan. It is believed that Government intend to despatch altogether about half a battery of the Royal Marine Artillery, and 500 rank and file of the Royal Marine Light Infantry.

The transport ship West Derby, with the left wing of the 31st Regiment, arrived at Portsmouth on the 18th of November from Shanghai. The West Derby, Captain Sergeant, sailed from Shanghai on the 1st of June. The military consist of Captains Pepper, Thompson, Mitchell, and Bayley; Lieutenants McIntyre, Haxham, and Maynard; Ensigns Lambert, Townsend, Hill, and Bateman; Assistant-Surgeon Girard; 19 sergeants, 5 drummers, and 282 rank and file. On the voyage to England four deaths occurred. This regiment will be garrisoned at Plymouth. The *Shanghai Recorder*, in recounting the exploits and sufferings of the regiment, says:—"The statements we are now about to make will, we are sure, astound our readers. The 31st Regiment, which left England in 1853, and returns to it in 1863, a period of ten years, has been three times utterly denuded in that time, or, in other words, has lost in battle, sickness, and other causes, over 3,000 men."

The sentences passed at courts-martial held in Japan on officers, &c. of the Pearl, Algerine, Centaur, and Kestrel, have been published.

Lieutenant Edward Barkley, an old officer of nearly fifteen years' standing, and who is now senior of the Cumberland guardship of steam-reserve at Sheerness, has been appointed to the command of the Havock gunboat, on the China station, vice George Poole, promoted to the rank of Commander.

Lieutenant George Stanley Bosanquet, commanding Her Majesty's gunboat Flamer, who was severely wounded in an engagement with Chinese pirates on the 28th of July last, has been promoted to the rank of Commander.

A large amount of war stores for China is now awaiting transport at Woolwich, including 8-inch 52 cwt. guns for Shanghai, 20 and 24-pounder howitzers, and 20-pounder naval guns, &c., for Hong Kong.

Hecate, 6, paddlewheel steam-sloop, Captain George H. Richards, was at Batavia on 27th September last, and sailed from thence on 1st ultimo for the Mauritius and the Cape of Good Hope. She may be expected to arrive in England in February.

The Admiralty have given notice that the prize money accruing from the booty taken in Pegu in 1852 will shortly be distributed. The vessels entitled are—Bittern, Cleopatra, Contest, Fox, Hastings, Hermes, Rattler, Salamander, Spartan, Sphinx, Styx, Serpent, and Winchester. The India Office have notified that payment of shares not issued in India will commence at the Military Department of this office on the 1st December.

The Pelorous has completed her repairs, and sailed again for China.

It is rumoured that Her Majesty, in order to mark her special satisfaction at the Naval Reserve, has appointed Prince Alfred to be the commander.

COURTS-MARTIAL IN JAPAN.

A private letter from Yokohama states that a court-martial was held on board the Pearl, on the 31st of August, for the trial of Henry Arthur Fagan, able seaman belonging to the gunboat Kestrel, on the charge of drunkenness and insubordination. The prisoner pleaded guilty, and was sentenced to receive forty-eight lashes, to be confined in Hong Kong gaol for twelvemonths, and to be dismissed from the Kestrel. On the 2nd September a court assembled on board the Encounter to try Mr. Arthur Chichester Coulson, midshipman of the Pearl, for neglect of duty. The prisoner pleaded guilty, and was sentenced to lose three months' seniority as a midshipman. On the same day the same court sat for the trial of Mr. W. M'Laurin, acting assistant-engineer of the first-class on board the Algerine, for drunkenness and for behaving in an indecent manner. The prisoner pleaded guilty, and was sentenced to be dismissed from Her Majesty's service. On the same day the same court sat for the trial of William Taylor, able seamen, of the Algerine, for drunkenness. The prisoner pleaded guilty, and was sentenced to receive forty-eight lashes, to be confined in Hong Kong gaol for twelve months, and then to be dismissed from Her Majesty's service with disgrace. On the 3rd of September a court assembled on board the Pearl, for the trial of Mr. Henry Edward Parsons, acting master of the Centaur, for drunkenness. The prisoner pleaded guilty, and was sentenced to be dismissed from Her Majesty's service with disgrace. On the 7th of September a court assembled on board the Encounter for the trial of Mr. Hartshorn, midshipman, Mr. Ryder, midshipman, Mr. Lewis F. Wells, supernumerary midshipman, and Mr. W. Barnes, clerk, all of the Pearl, for being absent without leave and disobedience of orders. The prisoners pleaded guilty, and were sentenced as follows:—Mr. Hartshorn not to have any promotion for twelve months and one month's leave stopped; Mr. Ryder and Mr. Barnes the same, and Mr. Wells to lose three months' seniority, and one month's leave stopped.

The Gorilla, Capt. P. Hill, arrived on the 16th inst. from Shanghai, with 500 rank and file of the 5th Bombay N.L.I., under the command of Major Taylor, and medical charge of Assistant-Surgeon Sexton; the troops were also accompanied Lieut. and Adjutant Hunt, and Lieuts. Chambers and Gleacock. The Gorilla left Shanghai on the 26th June, and passed between the Chew Islands on the 4th of July with light variable winds. She was becalmed off the Straits of Gilloto, and on the 20th August put into Coepang for water. The men here went on shore, and enjoyed cooked meats, which benefited them greatly, as scrofula had made its appearance in consequence of men of high caste not cooking on board the ship. Light westerly winds and calms till the Laccadives were sighted, the northernmost of which was passed on the 5th of October. The Gorilla anchored off Rajapore on the 13th October, short of water and provisions, the allowance of the former having been reduced since the 9th October. Including ten days' detention at Coepang, the passage was made in 112 days.

Monetary and Commercial.

The Glasgow and Asiatic Company have launched another vessel, the *Lochleven Castle*, 600 tons register. She will shortly load out for Singapore and Penang.

The Liverpool Chamber of Commerce have taken up the prohibition issued by the authorities at Singapore against the export of fire-arms, and have addressed Sir Charles Wood, asking for some explanation as to the grounds for such prohibition. The Chamber also point out that it will cause smuggling on the one side, and a loss of the business to Singapore, as shipments will be directed to the Portuguese port of Macao and the Spanish port of Manila.

The biddings for £500,000 in bills on India, which took place at the Bank of England, showed a very satisfactory diminution of the pressure for the means of remittance to that country. The proportions allotted were, to Calcutta £260,000, to Bombay £220,000, and to Madras £20,000. The *minimum* price declared was, as before, 1s. 11½d. per rupee on Calcutta and Madras, and 1s. 11¾d. on Bombay. The applications within the limits amounted to £1,700,000. Tenders on Calcutta at 1s. 11½d. will receive about 20 per cent, on Bombay at 2s. ⅛d. about 50 per cent., on Madras at 1s. 11¾d. about 75 per cent., and all above these rates in full.

The bar silver brought by the West India steamer has been disposed of (chiefly for Bombay, but partly for Hamburg) at 61⅛d. per oz. This establishes a decline of ½d. from the price obtained for the previous arrival, but silver has, in the interval, been very flat, and during the last week there have been hardly any transactions.

The transfer of the carrying trade from American to foreign bottoms is more rapid than most people are aware of. The latest returns of the foreign trade of New York show that the value of imports and exports in American vessels is not more than one-third of the entire amount, while in 1860, before the war commenced, fully two-thirds of these were carried in American bottoms. The current war risks which shippers have to pay on exports in ships covered by the Stars and Stripes are—2 per cent. to Great Britain, 3 per cent. to ports in the Mediterranean, and 5 per cent. to China, the East Indies, West Coast of Africa, and all ports in South America below Maranham. On homeward cargoes from China, we have heard of 10 to 12 per cent. having been paid.

The Commercial Bank of India have opened a branch at San Francisco.

The *Wild Deer*, belonging to Captain Dallas and others, will be launched this day by Messrs. Connell and Co., of Glasgow. She will be commanded, we understand, by Capt. Cobb, late of the *Robin Hood*.

Interesting statistics of our trade with Japan for the half year up to 30th June last will be found in another column. It will be seen that the value of the export trade in British vessels had increased during the period referred to from £253,337 of the corresponding period last year to £561,120 for the first six months of this year. In imports we have during the same time of the current year, £111,470 against £68,981 for the corresponding period. In this year's returns raw cotton also figures as an article of export for the first time. The quantity was £795,207 lbs.

The great and rapid increase that has taken place in our imports from China during the last four years will be apparent from the following figures. In 1859 the imports were valued at £7,073,509; in 1860, at £9,323,764; in 1861, at £9,070,445; in 1862, at £12,136,946. The chief increase has been in tea, owing to a large amount having been imported for reshipment to the United States. Our importations of raw silk have also been increasingly larger, and now raw cotton—of which next season will give a larger supply—enters into the returns.

The Labuan Coal Company are, we hear, about to purchase two vessels as colliers, to run as required with coals to Hong Kong or Singapore.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton, on the 20th inst. was :—In gold, to Alexandria : £213,000. To Madras : £1,000. In Silver, to Hong Kong : £3,520. To Shanghai : £30,832. To Calcutta : £50,000. To Penang : £3,700. Total in gold, 214,000. In silver, £88,052.

ARTICLES OF IMPORT.

TEA.—During the past fortnight there has been only a moderate business doing in our market, but prices generally show little alteration, but in some instances they have ruled in favour of buyers. Low and dusty kinds of congou have sold to a limited extent at former prices, there has been no change in fair to common congous. Flavoury kinds of old import from 1s. 2d. to 1s. 6d. remain difficult of sale. Common blackish leaf teas have been neglected, but prices much as before. Some sales of good ningchows and second class honams, monings, and wopaks of old import have been made at previous rates. Great difficulty has been experienced in obtaining offers for medium Kaisow kinds, the quality being very indifferent, and prices must be quoted fully 1d. per lb. lower. Fine to finest have been in steady demand at full rates. There has been much less doing in the new season's monings and wopak kinds, and prices have given way fully 1d. per lb. ; in the absence of export orders, the trade being unable to pay the high opening rates for any quantity. Tayshans remain much as last month. Common to fair Oolongs have sold rather higher, owing to a small demand for export. Good to fine have been difficult of sale at a decline of 1d. per lb. In Souchongs business has been very limited, and prices must be considered somewhat nominal. Flowery Pekoes show no improvement. Common to fair Scented Capers remain very dull of sale, and prices ½d. to 1d. per lb. lower. Good to fine have been in moderate demand, but the supply has been more than equal to the wants of the trade. Fair to good Foo-Chow Orange Pekoes have been in request, and prices have advanced ½d. to 1d. per lb. Fine to finest have commanded extreme rates—from 2s. 5d. to 3s. 2d. per lb. Canton make have been difficult of sale, the arrivals have been large, but holders generally are very firm. Uncoloured Japan kinds show a decline of 1d. to 1½d. per lb. Indian Teas continue to sell freely at advancing prices. In Green Teas there has been a large amount of business, the trade and exporters having been free buyers. Twankays and Hyson Skins have sold at former prices. Common Young Hysons have sold rather easier, but good and fine have commanded fully former rates. Japan kinds have ruled much as before. Hysons show no material change. Imperials sell steadily at full prices, there being very few on offer. Gunpowders of all kinds sold at one time very readily at an advance of 1d. to 2d. per lb., but latterly this has been lost, and they have become in less demand. Canton Young Hysons show no improvement ; Gunpowders of fair qualiiy have sold 1d. per lb. lower ; good to fine are wanted from 1s. 4d. to 1s. 9d. per lb. The public sales concluded on the 11th instant, 53,157 packages being offered, of which 30,033 packages were sold, 29,922 being printed "without reserve." 1,154 packages Indian Tea sold on the 13th instant at very full prices ; 2,000 packages also sold to-day at extreme rates.

SILK.—A notice of this staple will be found in our latest.

SUGAR.—Market continues active at a further advance of 1s. to 1s. 6d. Prices, with few exceptions, show 7s. to 10s. per cwt. recovery from the lowest prices in the autumn, or even more in some few cases. The stock being still decreasing, holders have unabated confidence. Of Manila, about 93,000 bags clayed have sold, the most recent sales, including good quality, at 39s. 6d. to 39s. 9d. per cwt. Of Bengal, 1,600 bags have changed hands ; Gurpatta date, 42s. to 42s. 6d. ; low brown date, 34s. per cwt.

COFFEE.—Market well supplied, with quotation ; prices irregular, the fall being 2s. per cwt., at which large clearances have been made. Native has declined only 1s. ; quotation for Mocha, long berry, 90s. to 102s.

RICE.—Market quiet, business limited ; quotation, 9s. to 14s. 6d. Of Java, a recent importation, 1,345 bags, brought to auction, one-third sold at 15s. per cwt. for middling broken.

SAGO.—Pearl, steady ; 184 cases at auction, sold at 23s. 6d. to 24s. per cwt. for very good small.

FLOUR.—15s. to 15s. 6d. per cwt.

SPICES.—Pepper : Nearly ¼d. lower ; market heavy ; black 3¼d. to 4d. ; white 5d. to 6½d. Cinnamon : 2 cases sold at 2s. 3d. to 2s 5d. per oz. for fair. Mace and Nutmegs : Nothing doing, white 1⅜d. to 2¼d. per oz. Ginger : Calicut and Cochin : Steady, and of 377 packages at auction half sold at 68s. to 78s. per cwt. for middling to good middling. Mace : Shows an average advance of 2d. per lb. 12 cases Singapore and 3 Dutch at auction, about three-fourths sold at 2s. 2d. per lb. for good palish, and 10d. to 1s. 5d. ordinary dull red to good bright reddish. Nutmegs : Bold, steady ; medium 3d. to 4d. per lb. dearer.

COTTON.—250 bales China have sold for 21d. to 21½d. for fully fair. The market is unsettled, and the prices irregular. Tinnevelly is ½d. per lb. lower. We quote Tinnivelly 1s. 7d. to 2s., Northern and Western, 1s. 9¼d. to 2s. There has been a good amount of business transacted in cotton, notwithstanding a fear of a further advance in the Bank rate of discount, and with the exception of Tinnevelly, which is not in request, prices have recovered about ½d. of their late decline. The heavy imports have contributed to produce caution on the part of buyers.

HEMP.—Manila quiet ; and 2,541 bales at auction were nearly all retired. Sunn auctions confined to 40 bales Kurrachee, sold at £34s. 5s. per ton.

TIN.—Prices have declined ; business mainly confined to Straits, in which fair sales have been effected ; the bulk at £113 cash to £115 full prompt ; Banca, £116 to £117.

JAPAN WAX.—58s. to 70s. per cwt. ; 174 cases at auction retired.

MISCELLANEOUS.—Camphor : 1,000 chests sold at £5 ; 128 tubs Japan retired. Cassia Buds : 20 boxes sold at auction at 270s. to 272s. 6d. per cwt. for good. Safflowers : £5. 17s. 6d. to £7 per cwt. for middling to good. Turmeric : quiet, 30s. to 33s. Cocoa-nut Oil : quiet ; 163 casks Cochin sold at £45 to £48. Gum Benjamin : Flat ; and of 377 packages at auction half sold at 68s. to 78s. per cwt. for middling to good middling.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8. ; nail rod, £8. 5s. to £8. 15s. ; hoops, £10. 10s. ; sheets, single, £11. 10s. ; Staffordshire bars, £9. 10s. ; rails, £7.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton ; yellow metal, 8¾d. to 9d. per lb.

TIN.—115s. for block ; 116s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD, &c.—English Pig, £20. 10s. ; W.B., £21. 10s. ; shot, patent, £23. to £23. 10s. ; sheet, £21 ; spelter, £18. to £18. 5s. ; zinc, English sheet, £24 ; quicksilver, £7 per bottle.

The following remarks are from the circular of Messrs. French and Smith :—The Iron market continues very lively, manufactured of all descriptions is in good demand. Scotch pig maintains its price, notwithstanding the high rate of money. Copper, owing to the short supply of ore, is firm. Tin : The quotations for English are but nominal, as sales are made from £2 to £4 lower, according to quantity. A large business has been done in Straits, principally at £113 cash, and £115 three months. The price appears now firm. Banca is quite neglected. Tin plates are in good demand, and the works are generally well supplied with orders. Lead : The price is well maintained. Spelter is steady at quotations.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

	Gold.	Silver.
Shanghai	—	£285,918

Hong Kong	—	414,718
Amoy	—	—
Singapore	£3,750	79,910
Penang	—	27,955

FROM MARSEILLES.

(BY THE P. AND O. COMPANY'S STEAMERS.)

	Gold.	Silver.
Shanghai	—	£85,998
Hong Kong	—	26,000
Singapore	—	—
Penang	—	—
Foo-Chow-Foo	—	—

PER FRENCH MAIL STEAMERS SINCE 30TH JUNE.

	Gold.	Silver.
To Singapore	—	£72,136
To Saigon	—	162,086*
To Hong Kong	—	231,178
To Shanghai	—	61,000

* 43,480 shipped by French Government.

GOLD AND SILVER.

Bar Gold (per ounce)	£3 17 9	
Spanish Doubloons	3 16 3	to 3 17
United States Gold Coin	3 16 2½	
Silver in Bars	0 5 1½	
Mexican Dollars	0 5 3	

MANCHESTER MARKETS.

Grey Shirtings, 7 lbs., 17s. 6d. to 18s. ; 8¼ lbs., 21s. 6d. ; 9¼ lbs., 26s. ; Cotton yarn, Nos. 16 to 24, 2s. 7d. to 2s. 9d. ; Nos. 28 to 32, 2s. 10d. to 3s. ; Madapollams, 7s. 9d. ; Long Cloths, 22s. ; T.-Cloths, 14s. 6d. ; White Spot Shirtings, 21s. 6d. ; Brocade, do., Damasks, do., nominal. The Circular of Sam Mendel says :—There is increased inquiry to-day, with more firmness in prices. Buyers hesitate to supply beyond actual requirements, and sales are somewhat limited. Stocks keep very moderate, with demand for yarns ; and shirtings above 39 inches in excess of the supply. Of the sorts adapted for the Eastern Markets, deliveries are only practicable with very long delay.

FREIGHTS AND CHARTERS.

The Admiralty have invited tenders for the conveyance from the River Thames to Shanghai of 5 tons heavy ordinance, 115 tons loose shells, and 10 tons shells in boxes; also for 39 tons light measurement stores, and 42 tons gunpowder and combustibles.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

CASUALTIES.

DOVER, Nov. 12.—The Petronella, Strootman, bound for Batavia, has arrived off here to-day with damage, having been in collision with a brig, which was sunk.

GUERNSEY, Nov. 12.—The Khanhai Paton, of Dundee, from the Tyne for Shanghai, has been towed in here to-day by the Viborg steamer, having lost foremast, maintopmast, and jibboom off the island on the 10th.

BRISTOL, Nov. 13.—The John Stanton, junior, Johns, from Cardiff to Shanghai, with coals, has been towed here, leaky, and will discharge and dock, having grounded on the bank outside Cardiff docks.

The Edith, British barque, Sydney, from Cardiff for Hong Kong, put into Rio Janeiro, Oct. 15, leaky. She had been surveyed and recommended to be thoroughly caulked from the copper upwards.

The Minister von Hall, de Haas, from Batavia, which arrived at the Texel, Nov. 13, had lost bulwarks and stanchions.

The Prophete (French ship), Mony, from Bordeaux for Singapore, had been in collision with another French ship, which put back to the Gironde, Nov. 15, dismasted.

SUNDERLAND, Nov. 14.—The Bride of the Seas, Donald, which sailed hence to-day for Shanghai, had put back on the 10th with chain plates of mizen rigging, main rail, bulwarks, covering board, upper streak, &c., carried away, having been in collision on the previous day off Hartlepool.

The Flora, Cobb, from Manila for Liverpool, which put into Bahia Oct. 11, leaky, was surveyed on the 22nd, and discharged her light cargo on the 26th. She was making 3 feet of water per hour, and would have to finish discharging.

The Europa, of Boston, Ayers, which arrived at New York Nov. 5, from Canton, reports that on the 28th Sept., in lat. 2 S., long. 26 W., she was chased by a full-rigged brig, but night coming on lost sight of her.

AMSTERDAM, Nov. 20.—The Julie Claire, Dutch barque, van Dosteroom, hence to Batavia, was abandoned in a disabled state, after having been in contact with the John Rhymas (American barque), from Callao to Antwerp; the crew and passengers were taken off by the latter vessel, assisted by the Exodin (?) (British barque), and landed at Rio Janeiro. The John Rhymas was much damaged.

At ST. HELENA.—Sept. 30, Caribbean, Winchester, from Manila, and sailed, Oct. 1, for London; Oct. 2, Governor-General Shelford, from Manila, and sailed, 3, for London; 5, Zephyr, Smith, from Foo-chow-Foo; 6, West Derby, Sergent, from Shanghai; 12, Hermann, Popken, from Batavia, and sailed, 13, for Amsterdam; 13, Eupatoria, Jacques, from Foo-chow-Foo, and sailed for Falmouth; Hermelin, Ouchterlong, from Manila, and sailed, 14, for Falmouth; 15, Panic, Bell, from Singapore, Fanny, Wulff, from Batavia, Maritana, M'Lean, from Manila, and sailed, 17, for Liverpool; 16, Baron Forstner van Damblenoy, Kruymel from Batavia, and sailed, 17, for Amsterdam; Philomela, Fisher, from Foo-chow-Foo, and sailed for London; D'Elmina, Horner, from Batavia, White Adder, Bowers, from Hankow; 8, Carausius, Milburn, from Japan, and sailed for London; 17, Rosella, Atkinson, from Foo-chow-Foo, and sailed, 19, for London; Elise Henriette, Deterding, from Tjilatjap, and sailed, 19, for Amsterdam; Carl and Auguste, Nielson, from Singapore, and sailed, 20, for Falmouth; 18, Kestrel, Fisher, from Shanghai, and sailed, 19, for London, Maravi, Anderson, from Japan, and sailed, 19, for Liverpool, Avalanche, Stott, from Penang, and sailed, 20, for London; Thrudvang, Lee, from Manila, and sailed, 19, for London; Java, Zellinger, from Manila, and sailed, 20, for Falmouth; 20, Noach Wierichy and Helena and Anna, Lupeke, both from Batavia, and sailed for Rotterdam; 22, Whinfell, Whereat, from Foo-chow-Foo, and sailed for London; 23, Nordster, Luteyn, from Batavia, and sailed, 24, for Middelburg; Rochester, Bruce, from Sarawak, and sailed, 24, for Liverpool; 24, Celestial, Jones, from Hankow, and sailed, 25, for London; James Paton, Allison, from Shanghai, and sailed for London; 25, Alfred Hawley, Almond, from Shanghai, and sailed, 26, for Falmouth; 28, Assyrian, Mearns, from Shanghai, and sailed for London; 29, Staatsraad v. Ewyck, Winter, from Batavia.

Off ST. HELENA, Oct. 15.—Q. D. H. G., from Japan for London; 17, Caroline Coventry, from Shanghai.

At TABLE BAY, Oct. 6.—Caroline Coventry, Overburg, from Shanghai; Sept. 30, Ann Adamson, Hutton, sailed for Shanghai; Oct. 1, Lady Ebrington Peel, sailed for Shanghai; 8, Morning Star, Grant, sailed for Shanghai; 16, Louisa, Tillman, from Cork, and sailed, 20, for Hong Kong; 21, Child of the Ocean, Morr, from Newport for Shanghai.

At SIMON'S BAY, Oct. 8.—Walf, Bohnms, from Cardiff for Batavia; 14, Pauline, Post, sailed for Batavia.

At ALGOA BAY, Oct. 10.—Record, Butcher, from Samarang for Rotterdam, for medical aid.

HOLLOWAY'S OINTMENT AND PILLS should receive a fair and impartial trial from all afflicted with sores, wounds, bad legs, varicose veins, membrances of the muscles, contracted sinews, and a host of other infirmities by which multitudes pass through a miserable existence to an early grave. Cases of ulceration which had been going on from year to year getting worse and worse, have been thoroughly cured by this cooling and healing unguent when all other applications had even failed to give ease. Holloway's Pills lend great assistance to the curative process. In all chronic and constitutional maladies the Ointment and Pills act together most harmoniously, both of them are admirably suited to different ages, habits of life, climate, and season

NOTICE.

Per P. and O. str., Jan. 20, from Southampton.—To Hong Kong: Mr. Houston, Mr. Harton, Mr. J H. Wilson.—To Shanghai: Mr. Dixon. From Marseilles, Jan. 28.—To, Hong Kong: Mr. Jas. Whittall, Mr. and Mrs. Odell.—To Shanghai: Mr. J. Palmer jun., Mr. Arthur C. Oliphant. To Penang: Mr. and Mrs. Friedrichs.

Summary of News from the Far East.

JAPAN.

By way of Paris we have received accounts which state that at an extraordinary meeting of Daimios it was decided, by sixty-five votes against forty-seven, that there was no ground for declaring war against foreigners. Our own advices from Yokohama direct make no mention of this fact; but reports were current at the former place that the Daimios were about to assemble in conference at Yedo.

The murder of a French officer by the Japanese is fully confirmed by our present advices. An Extra to the *Japan Herald*, dated "Wednesday, October 14th," gives the following account of an occurrence which is sure to induce important consequences. The Emperor of the French is sure to require the most complete amends, both for France and for the family of the murdered man, for such a wanton outrage. Our contemporary states:—

"Scarcely one year has elapsed since we recorded in the barbarous murder of C. L. Richardson one of the foulest crimes which has ever stained the annals of any country. The invitable consequences of this crime have not had time to be fulfilled when we are called upon to record another of a similar, or, if possible, yet more foul and dastardly a character.

"This afternoon, about four o'clock, information was received by all the various consuls that the body of a foreigner had been discovered at a village named Idongayah, about three miles and a half from this settlement.

"Mr. Von Brandt, the Prussian Consul, with Lieut. Applin and the Military Train escort, immediately proceeded to the spot indicated, which is on the Tokaido, and the French escort was sent to follow Mr. Von Brandt.

"Mr. Bleckman, of the French Legation, proceeded with two chasseurs by the country road and overtook Colonel Fisher, the U.S. Consul, and Dr. Jenkins, with some Japanese officers on horseback. They went on towards the same place, Hodongyah, when, coming on the turning to Kanasawa, about a mile and a half from this settlement, and about twenty yards beyond the bridge over the canal, they saw lying across the narrow pathway the horribly mutilated body of Mons. Camus, a sub-lieutenant of the 3rd Battalion of the Chasseurs d'Afrique. It is difficult to describe the condition of the body of the deceased, some twenty wounds having been inflicted, any one of which would have been sufficient to produce death. The arm (the bridle arm) was completely severed from the trunk and with a part of the reins yet in the hand, was found nearly ten paces from the body.

"The villagers profess the most profound ignorance on the

Digitized by Google

subject, but we have heard that they have said that they observed three strangers (two-sworded men) in the neighbourhood, and that one of them, an old woman, declares that, hearing cries, she looked out from her house, and saw two men passing quickly by, one of them with his garments covered with blood. The officials of course profess to have no clue to the dastardly murderer.

"Mr. Camus had gone out in the afternoon, as was his usual practice, for a ride. He was totally unarmed, not having with him even the small pocket pistol which he sometimes carried"

The Minister of France, Admiral Juarez, and the Commandant of the 3rd Battalion de Chasseurs d'Afrique, had issued a notification that the funeral of Mons. Camus, the French officer assassinated in the neighbourhood of Yokohama, would take place on the next day (Thursday), at four o'clock, assembling at the French Legation.

Our advices give a complete contradiction to a rumour that reached Europe through French channels reporting "the bombardment and capture of Osaca by the Daimios." The statement, it appears, was first set afloat by the *Japan Commercial News*, and was to the effect that "authentic information had been received of the bombardment and capture of the Imperial city of Osaca (and, some say of Kioko also), and that the Daimios were advancing with an army of 50,000 men for the capture of Yokohama." The only information really received at Yokohama was this:—

A plot was discovered to have been in actual existence amongst the retainers of Choshu to attack the castle at Osaca, and seize upon the person of the Mikado. Upon this discovery a conflict arose between the Mikado's soldiers and those of Choshu, which ended in the defeat of the latter, with some killed and wounded on both sides.

YOKOHAMA.

There was some slight promise of an amended state of affairs in respect to the supply of the silk market. By permission of Her Majesty's Charge d'Affaires, there had been published the annexed translation of a letter from the Gorogio in reply to a previous communication setting forth the great discouragement to which foreign commerce was subjected by the restrictions alleged to be imposed on the silk market of the settlement:—

We have received your despatch No. 38, dated 26th September. We have fully understood what you have communicated respecting the scarcity of silk.

An order has been given to the different departments regarding the export thereof; and thus there is no reason whatever that there should be any restriction, as you make mention of in your despatches, for any article at all.

But as the trade in silk is flourishing from day to day, we are of opinion that it is a ruse of some person (or persons), who, in order to make large profits, have bought up all the silk, and then, by spreading such reports as you mention, unsettle the foreigners, and thus expect to gain their object.

Whatever may be the cause, we have taken the above into mature consideration, and have given the necessary instructions to the proper authorities, and we therefore think that the sale of silk will shortly take place in a proper way, and that either yesterday or to-day there will have been some signs of it. We now trust that you will believe what we have stated is true.—With respect, &c.,

(Signed) Ministers for Foreign Affairs.

4th October, 1863.

True Copy,

(Signed) CHARLES A. WINCHESTER.

The editor of the *Japan Herald* comments, in severe terms, on the connexion of a British official with the *Japan Commercial News*, a paper on which, as before seen, is charged the concoction and diffusion of false intelligence of the most alarming kind:—

"We are not to be shuffled into even the appearance of saying in these columns what is not true. We were attacked in our private capacity in a manner too gross to characterise, in the columns of the paper published here, called the *Japan Commercial News*. We gave as a reason for not making any reply to this that we would not endanger the introduction of the nuisance of newspaper squabbles into the community, and for not taking any further notice of it, that the editor of that paper is Mr. P. B. Walsh, now a clerk in the British Consulate. Mr. Walsh publishes a letter stating that we said this on mere conjectural grounds. This is not so. We have the best possible authority for the statement which, when really necessary, we are quite prepared to give. Mr. Walsh's avowal that he has not authorised us to make the statement, and that he has not laid claim to the chair—does not alter the fact of his being contributor, writer, and editorial manager of that paper. This we re-assert for the information of his superiors; and we do not hesitate to declaim against the impropriety of one having access, not only to public, but many private documents, in virtue of his clerkship (for which he receives the pay of Her Britannic Majesty, and participates in the Itziboo exchange benefit), being allowed to interfere in so direct a manner in party and political matters. In this place, where under a past regime much unpleasant feeling existed between the British consulate and British residents, it is particularly objectionable, and we believe we are correct in stating that it is directly in contravention of the Queen's regulations for Her Majesty's servants abroad."

NAGASAKI.

According to our latest advices from Nagasaki, uneasy feelings still prevailed among the residents. The guard from the men-of-war continued to patrol the settlement at night, and a Japanese guard had been appointed to perform the same duty. A jetty has been constructed to enable a force to be landed at low water, in case of alarm. Proclamations have been affixed to the houses of the principal native merchants, threatening them with injury to both person and property in case they persist in dealing with foreigners. A midshipman from the *Rattler* had been assaulted by two Japanese two-sworded officials on a hill near the town. He was stooping to carve his name on the ground, when the men came up, knocked him down, struck him repeatedly, and took away his cutlass. A party was to land from the *Leopard* and *Rattler* to investigate the matter.

HAKODADI.

Advices from Hakodadi to the 11th October give the following items of shipping news:—Vessels in port: Laid for Shanghai, *Egmont* (since arrived), *Osborne*, *Kalamba*, *Trave*, *Egeria*, and *Eliza Mary*. Laid on for Nagasaki, *Ida* and *Josephine*. Also in port, the *Osaca*, *Dove*, and H.M.S. *Cormorant*. The Russian sloop of war, *Rhynda*, arrived there on the 4th and sailed, under sealed orders, on the 8th. A good deal of timber had been ordered for this port.

H. M's. ship *Cormorant* is expected here for protection of the British consul and residents.

CHINA.

PEKING.

In our last issue it was announced that General Brown, commanding our forces at Shanghai, had gone to Peking to confer with Sir F. Bruce and Prince Kung, accompanied by Captain Sherard Osborn, Mr. Lay being already there. The result of the conference is not known, but on the return of General Brown to Shanghai on the 19th October, by H.M.'s ship *Manila*, which left Tien tsin on the 9th, it was rumoured that he had been unsuccessful in the object of his mission. The General's return is not noticed in the Shanghai papers, which is a very extraordinary omission. From the Hong Kong *China Mail* we take the following on the subject, pointing out that Mr. Lay and Captain Osborn had not returned from Peking, nor had Sir F. Bruce, who was on a sporting tour:—

"In our last issue we stated that nothing had transpired as to the convention, at Peking, of Mr. Lay, General Brown, and Captain Osborn. The objects of that convention were generally, and we believe correctly, supposed to be, the recognition of Captain Osborn as Anglo-Chinese Admiral; Mr. Lay would naturally urge this step, as he was the prime mover in organizing the fleet and obtaining Captain Osborn's services on the terms now refused by the Chinese authorities; Captain Osborn's presence would be desirable to give a set-off to the petition; while General Brown would play the very important part of intimating the withdrawal or continuance of his moral support, according as the authorities negatived or acceded to Mr. Lay's demands. The authorities at Peking were placed in a difficult position; for the most popular, and perhaps the most sagacious mandarin in the empire was opposed to Lay's demands. To accede would be to elevate Lay and to degrade Tseng Kwo-fan. We cannot wonder at the choice which has been made. Tseng Kwo-fan is, in influence, more the master of China's future than Prince Kung, or any one of his cabinet. His opinion is deferred to by the latter, and the nominations for governorships actually as good as placed in his hands. The success of his protégés in discharging the duties of the appointment to which he has, during the last two years, recommended them, proves that his influence rests upon a firm basis; and the fact has long been acknowledged at Peking. To act directly in opposition to the wishes and dignity of this man (of whom Captain Osborn desires to be independent) would be to disturb the little harmony yet left in the empire, and to throw away the last hope of China being regenerated through her own rulers. Of course Lay's proposal could not be thought of, and the foreign clique are now 'putting on the screw.' To General Brown has been entrusted the performance of that operation, and he has given the instrument its first turn by re-calling all the troops from Quinsan and Taitsan, the former city being beyond the radius, and the latter just a few yards within it by the latest survey. The General himself will probably soon return to Hong Kong. By the withdrawal of the troops (to effect which movement boats went up to Taitsan on the 25th instant) Major Gordon's small force is exposed to attack from behind, should the rebels choose to make a movement in that direction. The likelihood is that our interference in China is coming to a culminating point, and is not desired by the mandarins on the terms we propose. The future is far from clear, but a month or two will begin to unfold it.—The only item of news from the Capital is that Shingpao, the high officer who ordered Captain Brabazon's execution, has been condemned to death, after having been found guilty of numerous malpractices."

The *Overland Trade Report* says:—

"The Footai is the subordinate of Tseng Kwo-fan, the Governor-General of the Two Kiang, and the most deservedly popular mandarin in the empire. He is one of the pillars of the party in state which advocate the adoption of foreign tactics, but entirely repudiate foreign interference

Digitized by Google

Doubtless General Brown has good cause to complain of the obstructiveness and impracticability of the Footai, and with equal probability the Footai is following out the instructions of his superior—but unless the General is content to inflict a deep injury on the imperial cause, he has simply to submit until wiser councils prevail, or until some reverse is sustained, and this it would appear that he is doing."

"Such is precisely the element which Captain Osborn has to contend against at Peking, and the probability is that he, too, will have to submit, as General Brown has apparently had to do. There are no further indications of the existence of the treaty of alliance conjectured to have been made in last report. Still there are no indications of the contrary, and as such treaty would render the suppression of the Taiping rebellion certain, Prince Kung could easily, upon its ratification, control this obstructive party."

SHANGHAI.

The English mail of the 26th of August arrived on October 15. The steamer with the present mail left at daylight on the 26th.

The following items are from the *Friend of China* :—

The French gurboat *L'Etoile* is partially no more. At Woosung her boiler burst, carrying with it to the bottom the whole of the afterpart of the vessel and five souls. The rest of the crew, 21 out of 26, happened to be busy weighing anchor at the time, and as the forepart of *L'Etoile* is built in compartments, she remains at her moorings like a bottle floating with the bottom gone. How unfortunate French men-of-war are in these waters!

Since our last issue the aggregate registered tonnage of ships which have arrived here with coals is 6,855—to which, adding a third for tons in bulk (a low estimate) we have, say 10,000 tons in two days, to pay a tael and three quarters per ton per month storage. Advance Shanghai and steam navigation!

The Br. steamer *Carthage* brings from Amoy Professor Risley, and his troupe of 12 equestrians (three of whom are of the fairer sex). The difficulty now in the way is a good site for a Circus; but that will not deprive us long, we hope, of the treats so long anticipated.

The movements of the Anglo-Chinese forces and the rebels are thus noticed in the *North China Herald* :—Public attention in Shanghai has been for the last fortnight concentrated on Soochow. Vague rumours of disaffection amongst the foreigners in the city had for some time been in circulation, but it was not until the 8th of October that arrangements were made by Major Gordon for the reception of those who should choose to come over. Various unavoidable delays took place, and it was not until the 15th of October that a successful attempt at escape was made. On that day eight officers and thirty-four men were brought off, and on the 18th Burgevine gave himself up to Gordon. The wounded will be sent down by way of Nan-zing as soon as a steamer can be obtained to tow them down. On the arrival of the officers in Shanghai, Jones, Morton, Porter, Barclay, and Whiting, who had formerly held positions in the Sungkong force, but had joined Burgevine in Soochow, made statements before the American Consul. The great length of these depositions prevents us from reproducing them in this report, but the following is a brief *resumé* of the evidence given by Jones, and contains every item of importance which was elicited at the investigation :—

"In July last, when in command of Messrs. Fletcher and Company's steamer, the *Yuen Fa*, I became aware of Burgevine's intention to join the rebels. On the 2nd of July, I took him and two others as far as San-li-jow, from which place they were to go on to Soochow. On the 2nd of August, I having left my situation, assisted in the capture of the *Kajow* at Sungkong, and went up in her to Soochow. A few days later we started for Nanking where we were well received. Burgevine's design in visiting Nanking was to have the force he trusted to raise placed upon a proper footing. Two thousand of the ordinary rebel soldiers had been set apart for drill, but a few only were provided with proper arms. Some time in September, Burgevine and I went to Nan-zing, where the engines of the *Kajow* were taken out. I then brought them down to Shanghai, and had them repaired. On the 22nd October, I saw Captain Davidson of the *Hyson*, and came down from the city to have a chat with him. Subsequently I saw many of my old acquaintances among the Sungkong garrison. On the 7th, 8th, and 9th of October, I saw Major Gordon, and made arrangements for our coming over. On the 10th, I received orders to advance towards Chang-zu. We had a brush with the Imperialists, and captured 15 gunboats. Our steamer, however, blew up, and two Europeans were severely injured. While this was going on, Burgevine was lying asleep in one of the gunboats. I heard some remarks made about this, and went to him to remonstrate. He asked me who had made remarks about him, and on my declining to tell him, he shot me in the face. I said 'You have shot your best friend.' He answered, 'Yes, and I wish I had killed you.' On the 15th October we saw Major Gordon's two steamers coming up the canal, and took advantage of the chance of escape. Our party with twenty-four men went down the bank and entered Gordon's lines where we were well received."

Since the above evidence was published, Burgevine has volunteered a statement which does not invalidate the assertions made by Jones, although it by no means agrees with the statements made by Porter and Morton. Burgevine is now in Shanghai, Jones will obtain command of a steamer under Gordon as soon as practicable, Morton joins the Quinsan force as major of the 2nd battalion, and some of the privates will be formed into a body-guard for Gordon.

The following are a few further particulars relative to the attack on Fo-yang :—"We left Shaoshing 900 strong, including artillery, taking with us two French 30 pounders and two 12-pounder howitzers. The town is on the bank of the river which runs to Hang-chow, and is strongly fortified. A newly-built battery runs along the river bank for nearly a mile—evidently, from its construction, built under the eye of a foreign engineer. We landed on the morning of the 19th, without opposition, according to the usual Chinese tactics, about a mile from the city wall. The rebels had built a strong fort on the top of a hill which commanded the town, and surrounded it with all the impediments which they are such adepts in preparing—stockaded trenches, palisaded and stuck full of *chevaux-de-frise*. But the very quantity of these aided us, when we had once got inside, as they confused their movements. The howitzers opened fire, and a company of Manilamen, supported by two companies of the English battalion, led by Major Tirley, advanced to the attack. They advanced up the side of the hill under a sharp fire from the rebels, but as the uneven nature of the ground gave them tolerable cover, only a few men were hit. The Manilaman who carried D'Aigabelle's flag was shot through the body, and a few Chinamen fell, but a lodgement was effected. Several companies were now sent out to take possession of the neighbouring heights, as a large body of rebels, some 10,000 strong, threatened our rear and flank, and skirmishing was kept up with them through the whole day. In the meantime General D'Aigabelle had been busily engaged, with the assistance of Mr. Goodall, late R E., in planting our guns in position to attack the city the next morning. At daylight the rebels made a sortie and tried to get in our rear, but were repulsed after half-an-hour's sharp fighting, hand to hand.

The German residents in Shanghai have enthusiastically celebrated the fiftieth anniversary of the battle of Leipsic. On the 17th Oct. a large subscription dinner was given at Messrs. Pustau and Co's, when the usual toasts were drunk, and national melodies sung. We understand that everthing went off most successfully.

The Shanghai Chamber of Commerce, has addressed a letter to Earl Russell. It replies to charges brought against merchants by Mr. H. N. Lay, of the China Customs. The following is an extract from it :—

In a Blue Book entitled "Further Papers relating to the Rebellion in China," recently received in this country, there is printed a memorandum by Mr. Lay, Chinese Inspector of Customs, in reference to the complaints of this and the Hong Kong Chambers of Commerce. Your Lordship has already replied to our memorials, and I should not again venture to trouble you on the same subjects, had not Mr. Lay, in order to support his own views, made statements regarding the merchants in China which cannot be allowed to pass uncontradicted. The acrimony with which this memorandum is written, and the furious way in which individuals, and the statements made by them are assailed, might of themselves raise suspicions of the weakness of the cause he defends, and certainly prove the impossibility of his giving fair and calm opinions on the matter treated of. I do not now propose to re-argue any of the points in dispute between this Chamber and the Customs, but only to show the incorrectness of some of Mr. Lay's statements, and the want of foundation for the charges so wantonly made against the merchants.

Mr. Lay states that the merchants complain "of outrages and injustice, but in no case that he is aware of have they brought forward a single fact in support of their allegation." Considering the despotic administration of the customs under his own inspection it is hard to say what he would admit to be an outrage or injustice, but if fining vessels very large sums for the most trifling and evident mistakes of a master or a merchant's clerk, seizing goods and confiscating them without trial or explanation, and frequently in opposition to the opinion of the consuls, who can have no possible interest in protecting a smuggler—be regarded as such, there are numberless cases, some few of which are in the list he himself cites, to prove that the China merchants are smugglers, viz. :—cases of Salacia, Paou shun, and Hellespont.

In order to show that the merchants are only restrained from smuggling by the customs, Mr. Lay mentions some instances of it, bringing for-

Digitized by Google

ward the names of some of the largest firms in China, and applying to them the opprobrious name of smugglers, when perfectly aware that in nearly every case it was a simple dispute on the mere infringement of technical regulations, and had nothing to do with defrauding the revenue.

1st.—*Case of the "Spec."*—From Mr. Lay's own account of the matter, it will be observed that there was no notification against the export of rice by foreigners till the Superintendent of Customs issued one on the 24th May, 1855, and up to a month before that time, when the dispute took place about the *Wynaad* loading rice, it always was so exported whenever it was desired to do so. Messrs. Russell and Co. applied to ship the rice, and when the Customs refused to permit it, they shipped it under the direct authority of the French Consul, who, like themselves, did not recognise the power of a small local official to make such a change in the existing practice. No duty, even, was at that time paid on the exportation of rice, that being arranged in the new tariff in the treaty of Tien-tsin.

2nd—*Case of the "Salacia."*—This was a simple mistake in the entry by a clerk of Messrs. Gilman and Co., who did not know the difference in the classification of cottons by the Customs. It is against reason to suppose that any one should knowingly risk property worth £6,000 to save £250 in duty, and the error was one that might readily be committed.

3rd: *Case of the "Paoushun."*—This vessel left Hong Kong in ballast, calling at Amoy, where some cases of vermilion were put on board by the Chinese, unknown to the consignees. She was entered in ballast, and fined, as Mr. Lay states, for giving a false manifest, although, as the goods belonged to a Chinese, the owners could have no possible interest in smuggling them. She was fined, also, for discharging without a permit; the goods so discharged being one addressed parcel of ribbons, which was received and forwarded, among other miscellaneous packages, without any charge for freight, as was and is still customary with addressed parcels.

These two ridiculous cases were brought on in the British Consular Court, and decided in favour of Messrs. Dent, Beale, and Co., and on Mr. Lay's refusing to abide by the decision, the matter was referred to the Home Government, who also decided against Mr. Lay's views.

4th.—*Case of the "Wynaad."*—This vessel was seized for loading rice in April, 1855, one month before any notice against it was given, as mentioned in the case of the *Spec.* "Permits to ship" were applied for, and being refused, it was done without them. as the refusal was regarded as an unauthorised stretch of power. No duty whatever was chargeable on rice at that time.

5th.*—*Case of the "Unicorn."*—This Chamber has no knowledge of the case in question.

6th.—*Cases of the "Emily Annina."*—These two were the only true cases of smuggling, in the usual acceptation of the term (unless No. 5 be one), in Mr. Lay's whole list, and as it would have been little to his purpose to bring them forward against unknown individuals, he points out Messrs. Lindsay and Co. as the parties in one case, and Messrs. Blenkin, Rawson and Co. in the other. The real individuals, two clerks in Messrs. Lindsay and Co.'s employ, who smuggled in the first case, went themselves to Mr. Lay and acknowledging that they had done so, exonerated Messrs. Lindsay and Co. The culpable individual in the second case was a Chinese in the employ of Messrs. Blenkin, Rawson and Co.

7th.—*Case of the "Hellespont."*—This vessel did what has hitherto been permitted, and was a frequent practice to save time, viz., discharged her cargo at Woosung into another vessel, which latter vessel brought it to Shanghai, the *Hellespont* proceeding to Japan. The cargo was reported at Shanghai by Messrs. Jardine, Matheson & Co. themselves, as ex *Hellespont*, and the duties tendered, thus showing that no concealment or fraud was thought of; but this did not save the cargo from seizure and threats of confiscation and eventually from a fine.

8th. *Case of the "Rose."*—The owners of this vessel having made several trading voyages to Sin-new-mew, a port between Shanghai and Chinkiang with the knowledge and sanction of the Chinese authorities, and having carried their despatches, had been notified by the foreign Customs hat the trade must be discontinued as being to a port in contravention of the Treaty. She then proceeded in ballast, to bring back treasure, the returns for cargo previously sold, and lay for three days at the entrance of the creek to Sin-new-mew without proceeding to that town. A Chinese servant of Messrs. Jardine, Matheson and Co., did put on board eight packages of tea, and two packages of silk goods. This gave a handle to the foreign Customs to accuse her of trading, but the case was considered by the British Consular Court, on the 8th August, 1861, as undeserving anything but the most mitigated penalty, and it was decided "that under the 47th Article of the Treaty, the defendants (Messrs. Jardine, Matheson, and Co.) were not punishable, as the visit of the *Rose* to Sin-new-mew for trading purposes was warranted by the encouragement given by the Chinese authorities, and by precedent established by themselves on other parts of the coast."

By these explanations, your lordship will perceive that Mr. Lay's accusations are utterly un rue. He does not state that the merchants at the commencement of the system of foreign inspection resisted what they considered illegal assumptions on his part, nor that, in several of the very cases he cites, the Consular Courts decided against the Customs, but calls them by the opprobrious term of smugglers, to damage their characters and thereby lessen the weight of their testimony against the Customs.

Mr. Lay points to the trade returns of Shanghai, which show a great increase on the past seven years, as a proof that the system of foreign Customs did not injure trade. A more specious and transparent argument could hardly be brought forward. Seven years ago, no port in Japan or on the Yang-tsze-kiang, or on the coast of China to the north of Shanghai was open, whereas all these nine new ports do more or less business with this place, and further, the opium trade was not then included in the returns, only being admitted since the conclusion of the treaty of Tien-tsin.

I do not speak of those charges brought more directly against the Hong Kong Chamber, and it is needless to refer to the tirade of abuse which Mr. Lay indulges in when giving his own explanations of the disfavour of the merchants. I merely rebut those statements he makes affecting their honesty and truth, and have to request that in any future Blue-book published on the affairs of China, this letter may be inserted in their justification.

Regretting that I should be obliged, in defending the members of this Chamber from gratuitous calumny, to trouble your lordship—I have the honour to be, my lord, your most humble and obedient servant,

EDWARD WEBB, Chairman.

* This case was decided in favour of the owners by the Consul.—ED.

A case of salvage claim, by Captain Day, of the *Argus*, has been tried in the Consular Court, with the following result:—That the plaintiffs were entitled to the sum of Tls. 1,500 for services rendered to the *William IV.*, in addition to the expenses incurred by them. Defendant to pay costs. The defendant, Mr. Manning, has announced his intention of appealing to the supreme Court at Hong Kong.

HANKOW.

A correspondent from this place says "Things are moving along here as usual. The only topic of note at Hankow just now is the project of the French Consul (Mr. Dabry) of doing a quiet bit of annexation (you know this is the name given to certain transactions when performed by Governments). Nothing *official* has as yet been announced, pending further negotiations at Peking, but various of the community are now and then informed of the game that is being played by the French, through one Jerome, a Corsican, who has lived five years with the rebels, and whose adventures are to be published by M.D., who, by the way, is author of a Chinese vocabulary (unknown to sinalogues here, published in Paris). He informs the English and Americans, who are not on the British concession, that their properties of real estate are now on the French concession, and that of course they come under French law. Now, since there are no French subjects here carrying on trade, (unless it be junk 'pidgeou' on Chinese account, or ship chandlery) this neat arrangement simply means that all nations are to pay taxes to the French Government, to the great benefit of the same, and the intense annoyance of those who are unaccustomed to be constantly spied upon by *Gendarmes*."

NINGPO.

We have no news from this port except an intimation that a strong detachment of the Anglo-Chinese contingent, under Colonel Cooke, was to leave Ningpo on the 18th Oct., to attack the island of Wantaquan in Hang-chow bay. Wantaquan is the piratical stronghold to which the *Rosina* was taken after her capture.

NEWCHAWNG.

Advices from Newchwang are to the 8th Oct. The following are the arrivals and departures:—

ARRIVALS.—Grosvater, Natal, Emma, Superb, Singapore, Ariadne, Camilla, Colina, Eagle, Anna Maria, Alida, Kin Hok Hein.

DEPARTURES.—George Ruxton, Carl Ritter, Argus, James Lawrence, George Heinrich, Sextant, Neuhoff, Celestial, Sophie, What Cheer, Confucius, Insulaneren, Bob Tail Nag, Grossvater, Wilhelmina, Emma, Finella. Captain Pulsipher had put a vessel called the *Clara* on shore, and it was hard to say if she would get off. The cargo had been all discharged, but there she still stuck.

KUI-KIANG.

The races appear to have been most successful, and to have been conducted on the old home principles. A Grand Stand was erected, Aunt Sallies and all the regulation paraphernalia were on the ground, the weather was propitious, and the day was, consequently, in every particular a success.

HONG KONG.

The mail from London of the 10th September, arrived out on the 21st October. The French mail of the 17th September arrived on the 28th. The dates by the present mail are up to the 31st October. The steamer leaving early on the 1st November. We gather the following items of news from the *China Mail* and *Evening Mail*:—

The *Government Gazette* published an application from the Shakespeare Memorial Fund in London, which has not been responded to by the community. The following appears to have been its reception:—

"Let every wise man button up his pockets and say 'No' to the proposal of Nicholson and MacDonnell. Let not William Shakespeare undergo the humiliation of a monument. It is too much, this new indignity, altogether. The ludicrous attempt of a clique of literary fogies, acting under the stimulus of a two-guinea-a-head dinner to make a stir in the world by the use of Shakespeare's name is certainly not entitled to any success; we venture to say that it will meet with none. And if nobody can be got to subscribe for this monument to Shakespeare, will any one tell us that the bard is not appreciated? We rather think that he would be somewhat rash who said so.

Digitized by Google

Shakespeare's monument must be of no such perishable material as stone and lime; it is already raised in the heart and mind of every educated Englishman. We sincerely trust that the scheme of Nicholson and MacDonnell will meet with no support in this colony."

The Praya is about to be rebuilt at the expense of proprietors. The Cloonial Secretary says, very truly, that the work was done piecemeal, by each proprietor in his own way, but it is a mistake to accept this as a reason for its turning out so confessedly ineffective. Some parts done by particular people are giving way, and some parts done by other people remaining firm, though the slight and the strong are side by side.

The steamer *Undine* (Captain ROBERT BAKER) furnished a more interesting report than usual, from which it appeared that the Customs steamer *Mercury*, with the Baron de MERITENS on board, had had a brush with pirates, and had driven them off; her ammuniton ran short, else one or more of the piratical junks would have been captured.

A daring attempt at robbery in the Artillery barracks has taken place. It appears that there were three Chinamen engaged in it, two of whom are in custody. Sergeant Mackie, in effecting the capture of one of these men, received nine wounds altogether from the scoundrel's knife. None of the wounds are likely to prove at all serious

The Legislative Council have passed a Bankruptcy Act through a first reading.

MACAO.

The Hong Kong *Daily Press* says:—Touching the comparison which we propose to institute between the Hong Kong and Macao Revenue and Expenditure, we must first assimilate them to an analogy. The revenue of course will stand in both cases as given; the expenditure requiring a little alteration, ior the purpose of assimilation. The Macao annual expenditure is $116,300—which includes $60,000 for military and naval expenses, which Hong Kong pays not—that sum deducted the expenditure is reduced to $56,000. On the other hand, the police in Macao live on their wits, which is absure. The expenditure of the force is $15,000. Tbe figures therefore, based on theiprinciples under which the Hong Kong accounts are kept will show an annual expenditure for Macao of $71,000.

The comparison will stand thus—taking the Hong Kong returns of 1862 as a guide.

Revenue—Macao	.. ..	$223.364
„ Hong Kong	.. .. ..	$631,259
Expenditure—Macao	.. .. ..	$71.000
„ Hong Kong	.. .. ..	$587,633

The Portuguese newspaper just started in Macao thus announces its advent:—"Nowadays that periodical literature is so widely employed as a medium of thought, and that foreign colonies, including some of our own in Africa and Asia, are represented by it, Macao could not remain any longer a mere spectator of the great mode by which the pioneers of modern civilisation defend the interests of the people they represent. It was therefore necessary, nay indispensable, that Macao should also have its journalistic organ. It is this imperative necessity that has suggested to us the idea of establishing a journal in this city; and well aware uf the difficulty of such a mission, as well as of the dignity demanded by the tribunal thus erected, we enter on our high duties and start the *Ta-ssi-yang-kuo*."

SIAM.

From a private letter placed at our disposal (*tSraits Times*), we find that His Majesty the Major King of Siam attained his 59th year on the 19th of October. On the following day a sumptuous banquet was laid out in the palace, to which the European community dip ample justice.

JAVA.

BATAVIA.

The tobacco crops are said to be a complete failure, and sugar planters all over the island have been obliged to stop working on account of the inclemency of the weather. They have petitioned the Government to lengthen the time of delivery of their sugars prescribed by contract, as their lateness is not to be attributed to neglect on their part.

Since the departure of the British in 1816, no other paper or periodical but Dutch ones and occasionally a French one has been published here; but the 30th of October will give to onr community a small bi-monthly journal, which is to glory in the name of *Java Times*.

MALACCA STRAITS.

SINGAPORE.

The English mail of the 26th of September arrived on the 3rd of November, per P. and O. steamer *Columbian*. This vessel's boilers gave way between Galle and this, so that it has been thought advisable not to send her on to China against the monsoon, but to keep her here until the arrival of the *Emeu* with homeward mails, and transfer both mails, cargo, and passengers, sending the *Emeu* back to China, and the *Columbian* on to Galle.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANDREWS—On the 3rd Dec., at No. 1, Portland-place, Southampton, the wife of Mr. W. B. Andrews, Chief Officer P. and O. Company's Service, of a daughter.
BERTRAND—On the 1st Oct., at Hong Kong, the wife of Camille Bertrand, Esq., of a daughter.
BUCHANAN—On the 27th Nov., at 5, Hope Villas, Canonbury-park, N., the wife of George Buchanan, of a son.
CAMPBELL—On the 14th Oct., at Bangkok, Siam, the wife of James Campbell, Esq., R.N., of a daughter.
CLARKE—On the 25th Oct., at Singapore, the wife of Capt. J. T. Clarke, 34th Regiment N.I., of a daughter.
CARGILL—On the 27th Nov., the wife of Mr. R. Cargill, Marine-parade, Brighton, of a son.
DO ROZARIO—On the 28th Oct., at Hong Kong, the wife of M. C. do Rozario, of a son.
GIBB—On the 2nd Dec., at 18 Westbourne park, the wife of George Gibb, Esq., of a son.
KOFOD—On the 20th Oct., at Hong-que, the wife of Mr. Charles E. Kofod, of a son and daughter, the former stillborn.
MCLEAN—On the 17th Sept., at Nagasaki, Japan, the wife of Capt. H. A. McLean, of a son.
PERCEVAL—On the 30th Sept., at East Point, Hong Kong, the wife of A. Perceval, Esq., of a daughter.
PLUMRIDGE On the 2nd Dec., at Hopton Hall, Lady Plumridge, widow of Admiral Sir James H. Plumridge, K.C.B., of a son.
THORBURN—On the 24th Sept., at Shanghai, China, the wife of William Thorburn, Esq., of a daughter.

MARRIAGES.

ELLIOT—BLACKETT—On Tuesday, the 8th Dec., at Matfen Church, by the Rev. Chas. Ruck Keene, Rear-Admiral the Hon. Charles G. F. B. Elliott, C.B., to Louise, eldest daughter of Sir Edward Blackett, Bart., of Matfen, Northumberland.
LIND-DAVIS.—On the 1st Dec., at the British Embassy, Paris, by the Rev. H. J. Swale, Chaplain to Her Majesty's Embassy, Capt. James Burnie Lind Bengal Staff Corps, to Florence, youngest daughter of Sir John F. Davis, Bart., K.C.B.
NISSEN—WALBEEHM—On the 28th Oct., at Rhio, C. A. Nissen, Esq., to Juliet Alexandrina Walbeehm, youngest daughter of Johann Heinrich Walbeehm, Esq., of Rhio.
SUEIL—AKUN.—On the 24th Oct., at Hong Kong, Robert Sueil, Inspector of Police, to Lee Akun, of Canton.

DEATHS.

ARMITAGE—On the 2nd Dec., at East Close House, Hampshire, aged 19, Julie Marie only daughter of the late John Armitage, Esq., of Ceylon.
FERGUSON—On the 2nd Dec., at Grove-hill, Glebe, Camberwell, aged 18, Anna, eldest daughter of Mr. A. M. Ferguson, of Ceylon.
FRANKS—On the 5th inst., at Clapham, Elizabeth, only surviving daughter of the late William Franks, Esq., of Clapham, in her 85th year.
FISH—On the 12th Oct., at Shau-hsing, Mr. Fish, of the Ningpo Hotel.
GREEN—On the 20th Oct., at the residence of E. Byrne, Esq., Shanghai, Capt. Green, manager for Messrs. Jardine, Matheison, and Co., Ningpo.
HARVEY—On the 3rd Dec., at Parkfield-road, Princes-park, Liverpool, in his 34th year, William Gaskell Harvey, Esq., of Ceylon, second son of the late Thomas Harvey, Esq.
HUSSEY—On the 11th Oct., at Hong-que, Mr. Edward L. Hussey, of Brunswick, Maine, U.S, aged about 38 years.
LESSLER—On the 3rd Oct., at Bangkok, Siam, Amy Mary Maud, infant daughter of Paul Lessler, Esq.
LLEWELLYN—On the 24th Nov., at Liverpool, Mr. John Llewellyn, late of Shanghai, aged 25.
MAXTON—On the 25th Nov., suddenly, at Brighton, Arthur, only son of P. Maxton, Esq., 46, Highbury New-park, aged eight years.
MARSHALL—On the 18th Oct, at Hong Kong, John Marshall, Master of the British ship Celestial, aged 49 years.
NUTT—On the 28th Nov., at his residence, 270, Strand, Mr. David Nutt, aged 53, deeply lamented.
PASSMORE—On the 20th Sept., at Ningpo, of dysentery, Harry, youngest son of Michael Passmore, Esq., aged 19.
PORTER—On the 20th Sept., at Teendong, China, Albert George Porter, Esq., aged 23.
PLUMRIDGE—On the 29th Nov., at Hopton Hall, Suffolk, Admiral Sir James Plumridge, K.C.B., aged 76.
PLACE On the 20th Oct., at Shanghai, suddenly, Mr. P. Place, Master of the steamer Yuenfa.
PIPER—On the 29th Oct., at Hong Kong, on board H.M.S. Melville, Stephen Piper, gunner, R.M.A., of H.M.S. Scout.
SPENCE—On the 23rd Sept., on board the Granada, on his way from Shanghai to Yokohama, George Spence, Esq., of Shanghai, eldest son of Robert Spence, Esq., of Bickley, Kent, aged 38.
SOHS—On the 1st Nov., at Singapore, John Sohs, Esq., of Hamburgh, aged 21 years.
——— On the 12th Oct., drowned in the Woongpoo by slipping from a sampan, the captain of the British ship Renown.
WEBSTER—On the 4th Nov., at his residence, Thompsons-road, Josiah Webster, Esq., aged 44 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—There is very little of interest to advise respecting this market since the date of last report. Holders of Congous continue very firm, and although the settlements have been a trifle, the wonder is that there should have been any at all, considering the excessive export and the extreme figures paid. Three chops of Congou have arrived during the fortnight. The total supply of the season will not probably exceed 85 chops. In Scented Tea and Canton Greens a moderate business has been done at previous rates. Regarding Country Greens no further advices have been received. The settlements of the fortnight are thus reported:—Congou, 3 chops say blackish leaf to Pekoe flavour, 1 chop at 27¼ taels: black leaf Pekoe flavour, 2 chops, at 32 to 32½ taels. Tyshaan, improved country make, 200 chests and 1,000 half-chests, at 22 to 26 taels. Powchong, 1,000 half-chests, at 21 taels. Scented Teas, 8,000 boxes Orange Pekoe, at 18¼ to 22 taels for common to fair; 24 to

Digitized by Google

27 taels for medium to good; 29 to 33 taels for fine to finest: 6,000 boxes Caper, at 15½ to 18 taels for common to fair; 20 to 23 taels for middling to good; and 25 to 26 taels for fine. Canton Greens, 8,000 boxes Gunpowder, common to middling, at 14 to 22 taels; 1,000 half-chests Young Hyson, fair to good, at 17 to 18 taels; and 200 chests Hyson, for India, at 21 to 22½ taels.

SHANGHAI.—Black: Throughout the whole of the past fortnight there has been a steady demand for Black Teas, and settlements amount to 38 chops the bulk of which are Oopacks lit. on Pekoe flavour at prices from Tls. 29 to 32; these kinds are made rather firmer, but low Hohows and Oonahms, have been taken at a decline of about one tael on last quotations. The stock on offer is considerably reduced as shipments from Hankow on native account have fallen off in consequence of the recent heavy losse made on this market. Settlements on the market, 38 chops, 19,765 chests Oopacks, Oonahms, Ningchows and Hohows. Re-shipped on owners' account, 53 chops, 26,416 chests Oopacks, Oonahms, Ningchows, and Hohows, 91 chops, 46,181 chests, making total to date 310,849 chests. Stock, waiting shipment, 22 chops and for re-sale, 21 chops,—43 chops. We quote second and third crop Oopacks and Ningchows Tls. 28½ to 33: second and third crop Oohahms, Tls. 23 to 28; second and third crop Hohows, Tls. 18½ to 24. Green.—During the past few days small arrivals of contract country teas have come forward from Kewkiang, but no transactions have at present been reported. In Pingsueys a small business has been done at full rates, but Japans and Shanghai packed kinds have been quite neglected. Re-shipment and settlements, 8,851 half-chests Fynhows, making total to date 51,613 half-chests. Stock of Green Tea is estimated at 2 500 half-chests Fychow, &c.; 3.908 half-chests Shanghai packed Japan; 11,461 chests Pingsuey—17.869 half-chests.

FOO-CHOW.—A large business has been transacted during the fortnight in Congous. There has been a demand for shipment to Australia which has so excited competition as to cause an advance of 1½ tael on all kinds. During the past few days the unfavourable advices from England have produced their natural effect, and although no settlements at a reduction can be advised, yet the market is quieter and tends down.

AMOY.—There has not been much doing in Oolongs, and as stocks are accumulating, the teamen are anxious to sell. Congous at one time declined $1 to $2, but buyers entered the market (for Australia, it is believed), and sales are fully as high as before. Settlements for the fortnight have been:—Oolongs, 2,600 half-chests at $18 to 19¾ for common, and $20 to 22 for fair cargo; Congou, 8.800 half-chests at $18 to 21 for good ordinary to but mid. flavoury. The stocks are computed at 16,767 half-chests Oolongs, and 3,300 do. Congous.

KEWKIANG.—Green Teas: Supplies from the interior have been arriving freely during the past few days. The amount cannot be safely estimated, as further supplies are continually arriving. No settlements are reported. The ideas of the teamen are high—so much so that foreigners refrain from making offers, hoping that the accumulation of stock will operate to their advantage. Black Teas: The settlements of the fortnight only amount to a chop Hohow, rate not transpired, and 250 chests Souchong-flavoured Congou at 25½ taels. The unsold stock is only two chops Hohow. The total shipments for the present season to date amount to 6,443 half chests Green and 85,170 chests Black, against 65,694 half-chests Green, and 45,152 chests Black at corresponding period last season.

HANKOW.—There has been a good demand throughout the fortnight, settlements amounting to 54 chops congou, including 6 contract chops. The total settlements of the season exceed 580 chops, against 353 chops at corresponding period last season. The stock on the market amounts to only 12 chops. The state of the demand induced the teamen to demand higher rates, which shippers objected for a while to give, but exchange falling the terms of the teamen were partially acceded to, and an advance of one tael all round established. The following are the current quotations—short price.

YOKOHAMA.—The settlements of the fortnight amount to 2.500 piculs. Rates are rather easier, having fallen one dollar. The stock is under 1,000 piculs, but supplies come steadily in. The quotations are - ordinary, $1 to 3; good ordinary, 4 to 6; common, 8 to 12, good common, 14 to 17; fair to good, 18 to 23; fine, 24 to 28; finest, none.

RAW SILK.— HANGHAI—During the fortnight has been in active demand, and up to the close of the mail continues so, notwithstanding that prices have advanced Taels 10 to 20 per picul. Settlements are 2,250 bales, and the arrivals from the interior are estimated at 1,100 bales. It is reported by the dealers that they find considerable difficulty in obtaining silk up country, the stock being very limited, and higher prices ruling. From Japan 550 bales have been received, and by the last advices the supply they were receiving there had increased to 150 bales per diem. The greater portion of the unsold stock consists of common Tsatlees and low Taysaams, good qualities of both kinds being scarce. The settlements of the fortnight last season amounted to 2,000 bales, and 5,000 bales the corresponding fortnight of season before. The present stock is computed at 11,0 0 bales, against a similar quantity corresponding period last season, and 26,000 bales the season before. The following are the current quotations:—Tsatlees, No. 2 chops, 450 to 460 taels per picul; No. 3, 430 to 440; Market, No. 3, 415 to 425; No. 4, 400 to 410; No. 5 and common, 385 to 395; Taysaams, No. 1, 400 to 410; No. 2, 380 to 390; No. 3, 360 to 370; No. 4, 5, and common, 330 to 350.

YOKOHAMA.—It would appear from a notification issued by the British Consul, that the obstructions alleged to be placed upon the article by the authorities was a ruse of the dealers to extort better rates from exporters. Arrivals continued to take place at the rate of 150 bales per diem, which found eager purchasers as placed on the market at $560 to 570 for best Mabash. Medium $520 to 540; inferior $500 to 510. Ida, best $550 to 5 0; medium $510 to 525; inferior $450 to 480. Oshio, best $500 to 525; medium $475 to 485; inferior $450 to 460.

DRUGS, &c.—CANTON.—Cassia Lignea, 300 pls., has been purchased during the fortnight at $16.50; 100 piculs being in stock. Cassia Oil and Buds, still no supplies. Aniseed Star and Oil, the same remark applies to. Also to Rhubard and Gamboge. China Root, no settlements; stock 400 pls. Galangal, nominal, $3.75 to 4.25; stock 500 pls. Vermilion has advanced to $42½ to 43 per box. Galls, 560 pls., have been shipped to Bombay; there are 250 pls. on the market, which are being offered at $15. CAMPHOR.—HONG KONG.—The balance of the stock some 550 piculs sold at $22 to 23 per picul unpacked, and no further supply has arrived.

CHINA IMPORTS.

COTTON YARN has improved materially in value in this colony since the date of last circular, and sales of 380 bales to Chinese, and 216 bales to foreign purchasers are reported. 97 bales of sea-damaged Yarn have also been moved off by public auction.

GREY SHIRTINGS—Since the arrival of the mail steamer a brisk speculative demand for these goods has existed, and about 24,000 pieces have been purchased by foreigners at prices which show an advance of from 20 to 40 cents per piece upon the rates previously quoted. The wants of the Chinese have been principally supplied by public sales of damaged goods, consisting of nearly 9,000 pieces.

WHITE SHIRTINGS have not advanced in an equal ratio with unbleached goods, but are fully dearer than on the departure of the last mail steamer, and the sales of the fortnight amount to 5,280 pieces.

T-CLOTHS have not been in particular request, and the sales of the fortnight are limited to 1,950 pieces, at an improvement in price of from 5 to 15 cents per piece. With the exception of a small sale of 25 bales of Cotton Yarn, all the above-mentioned imports have been without inquiry in the Canton market.

AMERICAN DRILLS.—1,274 pieces have found buyers in Hong Kong, and in Foo chow 200 pieces have been recently sold.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES, WHITE AND COLOURED.—Of these goods the sales in Hong Kong during the past fortnight are put at 1,250 pieces of Dyed Shirtings, and 1,000 pieces of Coloured Brocades, while from Foo-chow settlements of 1,500 pieces of all kinds are reported.

DAMASKS have been purchased in this colony to the extent of 750 pieces.

CHINTZES AND HANDKERCHIEFS.—500 pieces of the former, and 500 dozens of the latter, constitute the fortnights transactions.

RAW COTTON has met with very brisk inquiry in this colony during the last ten days, and the value of the staple shows a material advance upon the quotations given in last report. The settlements effected of all descriptions of Chinese and of Japan cotton amounts to 22.000 bales, of which some 15.000 have been bought by foreign speculators, and the balance by the Chinese dealers. Supplies continue to arrive freely from the north, and the contracts entered into in Shanghai have been upon a large scale.

WOOLLENS, SPANISH STRIPES, MEDIUM CLOTHS, LADIES' AND HABIT CLOTHS—Continue to meet with a moderate demand in this market, and show a slight improvement in value; the sales of the fortnight are put at 1,380 pieces of Spanish Stripes, and 242 pieces of other cloths. Long Ells, which have again advanced a few cents. have been in good demand, and sales of 4,020 pieces are reported. Camlets have likewise met with moderate inquiry at the quotations given in last circular, and the sales of the fortnight are put at 1,500 pieces of English manufacture. Lastin s are somewhat higher in price, and the sales effected amount to 610 pieces. Blankets have been purchased to the extent of 840 pairs.

METALS.—IRON, FLAT, &c.—In Hong Kong the prices of the various descriptions of iron annexed do not show any material change, but in Canton rates for all kinds, with the exception of nail rod, which has remained stationary, have declined considerably from the advance established at the date of last circular. The sales reported are 1,974 piculs of nai rod in Hong Kong; and in Canton 840 piculs of nail rod, and 350 piculs of hoop have changed hands. Lead in Hong Kong remains as before quoted, with sales of 1,000 piculs; but in Canton, where 4,500 piculs have changed hands, its value has declined 10 cents. Tin remains in this colony as at the date of last report, with sales of 420 slabs; in Canton a decline of abo it $3 has been submitted to, and sales are put at 280 piculs. Tin plates are in no demand. Steel: 20 tubs sold in Hong Kong.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6	months sight.	6s. 1d. to 6s. 1½d.	6s. 1½d. to 6s. 2d.

The Exchange on India at Shanghai was 299 to 300 rupees per 100 taels, and at Hong Kong 232 per 100. Bar silver at Shanghai 111.25 per 100 tls., and Hong Kong 3½ per cent. prem. The current quotations at Shanghai for Mexican dollars was 78 tls. per $100, and the rate of exchange on Hong Kong was 23 to 23½ per cent. discount.

ARRIVALS.

AT JAPAN.—None.

AT SHANGHAI.—From London: Oct. 9, Cymberline; 11, Angle Saxon; 13th, Speedy, Princess of Wales, Chryseis; 18th, Crest of the Wave. From Liverpool: 13, Zingari. From Sunderland: 8, Hawthorne; 12, Mary; 13, Sir Harry Parkes, Forerunner, Cordelia. From Hartlepool: 13, Blanche. From Cardiff: 13. Nelly. From Newcastle: 13, H. E. Sutman, Adeline, Daisy; 23, Thetis (via Swatow). From Glasgow: 8, Sappho. From New York: 13, Fearless. From Boston: 12, Star; 13, J. W. Seaver.

AT FOO-CHOW.—Oct. 18, from England: H.I. Chi. M.S. Kwantung.

AT AMOY and SWATOW no report.

AT HONG KONG.—From London: None. From Liverpool, Oct. 27, Junapore.

Digitized by Google

At MANILA.—No report.

At SINGAPORE.—From London: Nov. 3, Ann Maria. From Liverpool: Oct. 29, Advance; Nov. 1, Hyacinth. From Sunderland: Oct. 23, J. Martinus (Dutch). From Newcastle: Nov. 3, Pekin (Dutch). From Glasgow: Oct. 29, E. Castle. From Rotterdam: Oct. 31, Constance (Dutch).

At PENANG.—From London: Oct. 4, Teesdale. From Glasgow: Nov. 3, Nipisiquit.

DEPARTURES.

From JAPAN.—Oct. 9, Broadwater, for London; 8, for New York, Sarah (*via* Shanghai).

From SHANGHAI.—For London: Oct. 8, Julia; 23, Fairlight, Ironside. For Liverpool: 20, Chalmers; 21, Lady Elizabeth. For New York: 10, Anna.

From FOO-CHOW.—For London: Oct. 8, Janet Mitchell, Bucton Castle; 9, Beemah; 13, Langdale; 21, Alfred the Great; 22, Wm. Melhuish.

From HONG KONG and CANTON.—Oct. 23, Abdul Medjid and Alliance for Liverpool.

From MACOA.—For Hamburgh: Oct. 21, Siwa.

From MANILA.—For London: Pelicano, Minden, Der Preusse. For Liverpool: Belvidere. For New York: Winged Racer, Bavaria.

From SINGAPORE.—For London: Oct. 31, Peter Symons.

From PENANG.—For London: Oct. 13, Daylight; Nov. 9, Teesdale.

LOADING.

At JAPAN.—For London: Ravensbourne, J. C. Munro, Esperanza. For Liverpool: Marion, M. Theresa, William Eggerts. For New York: Contest.

At SHANGHAI.—For London: Anglo Saxon, Hawthorne, J. H. Ransom, Star of the North, Star Queen, Sarah, Jas. Vinnicombe, Lord Macaulay, Mirage, Ospray, Philip I., Spirit of the Deep. For Liverpool: Jas. Gibson, Our Queen, Sarah, Emma, Thos. S. Stowe, Childe Harold, Glenhunsley, Macduff, Victoria, Rheine.

At FOO-CHOW.—For London: Standard, Mimosa, Maiden Queen, Portland, Bosworth.

At HONG KONG and CANTON.—For London: Laurel, Mary Ann Wilson, Agra. For Liverpool: Melbreek, Lord Lyndhurst, Tamerlane.

At MACAO.—For Hamburg: Ophelia (Ham.); Selina Jane (Br.)

At MANILA.—No report.

At SINGAPORE.—For London: Avalanche, Maori. For Liverpool: Oasis. For New York: Caroline (Brem). For Boston, Pearl.

At PENANG.—For Bordeaux, Frahel (Fr.)

FREIGHTS AND CHARTERS.

Yokohama to London, cotton, £4; tea, £5; and silk, £6. 10s. To Shanghai, 3 to 5$ per ton.

Hankow to Shanghai, 2½ taels per ton.

Shanghai: More activity is shown, and a general improvement has taken place in shipping, which is expected to continue for some time. The rates to England for tea and cotton are £3 to £3. 15s. to Hong Kong with cotton, 80 cts. per bag.

Foo-Chow to London £4.

Hong Kong: Tonnage is in better demand. The rates are £3. 10s. to £4. The following are some of the settlements: Gemini (Ham.), 216 tons; to London at £3. 10s. to £4. Itsamboul, 1,310 tons, for Liverpool at £3. 10. Magnus (Swed.) 192 tons, to Bremen at £3. 10s. Orient (Brem.), 386 tons, to New York, £4. 2s. 6d. per ton, 50 cubic feet. Tamerlane, 764 tons, to Liverpool, £3. 10.

Singapore: The rates for England are as follows:—Tin, £3; sago in boxes. £3. 15s.; sago flour, £3. 15s.; gambier in bales, £2. 15s.; sugar, £3. 10s.; black pepper, £3. 15s. per ton of 16 cwt.; coffee, £3. 15s per ton of 18 cwt.; hides and horns, £3. 15s. per ton of 16 cwt.; gutta percha, £3. 15s. per ton of 20 cwt.; and meast. goods £3. 15s. per 50 cubic feet.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Oct. 21, Turoas, from London for Hong Kong; Madras, from Greenock for Hong Kong; Adrian Petronella (Dutch), from Cardiff for Hong Kong; Johann Lange (Brem.), from Bremen, for orders.

From UNITED STATES to CHINA, &c.—Oct. 22, Madge, from Boston for Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT.—Oct. 13, Esther (Ham.), from Macao for Hamburg; John Nicholson, from Hong Kong for Liverpool; 17, Queen of the Ocean, from Whampoa for London; 18, Mexicana, from Amoy for London; Sunbeam, from Shanghai for London; 19, Solent, from Shanghai for London; John Lidgett, from Hong Kong for London; 20, Hanover, from Shanghai for London; 21, Grenadier, from Shanghai for London; 22, Humphrey Nelson, from Shanghai for London; 25, Beautiful Star, from Hong Kong for Liverpool; Sovereign of India, from Shanghai for London; 26, Jubilee, from Shanghai for London; Halton Castle, from Singapore for Liverpool.

CASUALTIES.

SHANGHAI.

The Kensington brings news of the loss of the British barque Flora Mc'Donald (Singapore vessel) about 3 miles W. by S. of Gutzlaff—having sprung a leak during a heavy gale to the Nd., but succeeded in reaching the Pilot-ground when she foundered, crew saved. She was from Newchwang, bound to Hong Kong with a cargo of peas.

H.I.M. Gunboat Ecoile, while in the act of weighing anchor to proceed to Shanghai, was blown up with a terrific explosion by the bursting of a boiler, blowing away just one half the vessel, which was fortunately built in compartments, leaving only the fore part afloat; had the men been aft at the time of the explosion, nothing could have saved them, and we regret to state that five men standing aft out of the crew of twenty-six were killed by the explosion.

The American barque I. W. Seavor, from Boston, has put into Shanghai for repairs.

AMOY.

The British ship Wagoola from Swatow, bound to Shanghai, has put into Amoy to repair damages.

H. M. steam-transport Hesper has put into Amoy in a frightfully damaged state, having encountered heavy weather for four days off the Loochoose—her decks are thrust upwards, and her foremast is found to be rotten. She left Hong Kong for Japan some time ago, laden with supplies for the fleet, and a mainmast on board for the Argus.

COMMERCIAL POSTSCRIPT.

At the half-yearly general court of the proprietors of the East India Company, held at the offices of the company, 3, Lothbury, Colonel Sykes, M.P., in the chair, the accounts were passed, and the chairman announced that the dividend would be ready for delivery at the Bank of England on the 6th January.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 5, at Bremen, from Akyab, Rochester; from Bassein, Fides; 6, at Brouwershaven, from Batavia, Bezoekie; 7, off Plymouth, from Batavia, Mentor; 8, at Brouwershaven, from Batavia, Helena and Anna; Nov. 25, at New York, from Shanghai, Imina Brons; 26, from Manila, Horatio.

DEPARTURES.—Dec. 7, from Cardiff for Singapore, Batavia; 10, from Liverpool for Shanghai, Southern Cross; 9, from Sunderland for Shanghai, Northern Queen; Nov. 27, from Madeira for Singapore, Tichison; Dec. 12, from London for Singapore, Vadivia; 14, from Liverpool for Hong Kong and Canton, Young Lochinvar; for Shanghai, Jane E. Williams; from Glasgow for Singapore, Bacchante.

LAID ON.—At London, for Singapore, James Paton.

SPOKEN.—Louisa (ship), Cork to Hongkong, Oct. 11, 34 S., 12 E.; Thrudvang, Manila to Falmouth, Nov. 17, 31 N., 31 W.; Abel Tasman, Batavia to Rotterdam, Oct. 13, 26 S., 6 E.; Baron van Pallandt von Rosendaal, Rotterdam to Batavia, Nov. 6, 12 N., 25 W.; Acmeto, Amsterdam to Singapore, Oct. 28, 7 S., 32 W; Joan Melchior, Kemper, Amsterdam to Batavia, Nov. 7, 13 N., 26 W.

GALWAY, Dec. 8.—Portions of the hull and spars of the barque Liriope, Capt. Ritchie, of and from Liverpool for Singapore, were found at Ballyconelly, near this place, on the 6th December.

The Admiralty have invited tenders for the conveyance of 26 tons ball cartridges, 20 tons combustibles, and 13 tons ordinary Government stores, from the River Thames to Hong Kong.

The Admiral Napier (ship) has taken on board the cargo of the Pomona, Giraud, from Bangkok for Cherbourg, which vessel has been condemned at Mauritius.

The American ships Winged Racer and Amanda, from Manila to New York, have been burnt by the Confederate Alabama, in the Java Sea, about the 10th ult.

THE SURVEY OF CAPTAIN SPRYE'S ROUTE.—All who are interested in the extension of geological discovery and the opening out of new commercial routes will regret that Lord Elgin has seen fit to negative Colonel Phraye's proposal to allow Captain Fitzroy to survey the route proposed by Captain Sprye for a line of telegraph, 1,100 miles long, from Bhwey Ghyeen, on the frontier of British Burmah, where the Indian wires end, to Hong Kong, by Kianghung, Esmok, and Canton. This is the route for telegraphic communication with China, and it must, sooner or later, be surveyed. Meanwhile, there are four little expeditions about to be made in that direction. Dr. F. Marfels, a German, left a month ago by the most northerly road from Rangoon, up the Irrawaddy, to the town of Magive, in 20 deg. 10 min. north latitude. Having gained the table land of the Shan country by a gradual ascent beyond the influence of the heavy rains, he will cross the Cambodia before returning. Lieutenants Sconce and Watson, appointed to survey the Salween river, will proceed by land to as high a point as possible, and then drop down to the rapids which bar the navigation only eighty miles above Moulmein. The Rev. Mr. Bixby, an American Baptist missionary, will leave Tonghoo a month hence for Kianghung, in latitude 22 deg. north, on the right bank of the Cambodia, at the mouth of which the French have planted themselves. His movements after reaching that will be guided by circumstances. His knowledge of the Shan language is perfect for a foreigner. Finally, the Roman Catholic Bishop Bigandet is about to go to Mandalay, the capital of Burmah, and thence to Bhamo. His object is to reopen the route from that mart to Penang, and he will probably be accompanied by Dr. Williams, our Consular agent in Mandalay under the late treaty. The French priests in Yunan will then be able to hold regular communication with Europe through Burmah.

GENERAL BROWN AGAIN.—From Calcutta, we have news dated 8th November, from which it appears that in consequence of the incompetency and folly of Major-General Brown, commanding the troops in China, in having sent home the 31st Regiment at the very time that Colonel Neale and Admiral Kuper were sending pressing applications to him for troops, the Government sent out orders to Sir Hugh Rose, the commander-in-Chief in India, to send on to China the 2nd battalion of the 20th Regiment immediately on its arrival at Calcutta from England, so as to be available for service in Japan if required. One portion of the regiment has already arrived in the *Contest* and the men have been landed and sent to Dum-Dum in the neighbourhood of Calcutta, where it is waiting the arrival of the headquarters daily expected. The regiment will be equipped for field service and will go on to China in the P. and O. Company's ship *Nubia*, which has been charted to take on the whole regiment. The cost of sending this regiment from Calcutta to China, is stated to be three lacs of rupees, or thirty thousand pounds sterling—a nice little sum for unfortunate John Bull to be let in for under circumstances of the unnecessary nature—due entirely to the misfortune of having an utterly incompetent person in the position of a commander of the forces in one of our most important military positions at the present time; the interests of Japan as well as China being alike involved.

THE "FAR EAST."—An engraving of the double-screw *Far East* for the China trade appears in the *Illustrated News* of the 12th inst. We may add that it does not do justice to the vessel; we are very much mistaken if she does not look far better on her trial trip, which is to come off in a few days.

Digitized by Google

REVOLT AND MUTINY ON BOARD THE "AEROLITE."—Capt. R. E. Alleyne, master of the ship *Aerolite*, appeared at the Thames Police-office, before Mr. Woolrych, to answer a summons taken out by F. Eston, who, claimed a balance of £27 for service as an able seaman on a voyage from England to Shanghai and back. Mr. Smith appeared for the complainant, Mr. Young for the defendant. Mr. Smith called the magistrate's attention to three items in the account rendered—namely, £8. 8s. 4d. for absence from duty for 101 days, soap 6s., and cash £4. 18s. 9d. The complainant and others were given in charge by the defendant at Shanghai for piracy, mutiny, and making a revolt in the ship, and they were committed by the British Consul to take their trial for the serious offences mentioned before the Supreme Court at Hong Kong. The trial resulted in a verdict of acquittal, and the complainant returned to his ship and to his duty, and came home with the vessel. The complainant was absent 101 days, not of his own free will. He was not unlawfully absent, but was taken out of the ship on the action and at the request of the captain, and committed by the Consul to take his trial. The absence was not such a one as was contemplated by the 186th section of the Merchant Shipping Act. Mr. Young said there had been a serious revolt and mutiny in the ship, and the lawful orders of Mr. Williams, the second officer, disobeyed, and he had been beaten, his skull fractured by one or more blows, and, while in a state of insanity, caused by the serious injuries he received, he committed suicide. The highest offence known to the law had been committed, and the life of an officer of the mercantile marine sacrificed. — Mr. Woolrych: You allege a wrongful absence That is not so. The complainant was taken out of the ship by order of the Consul, who thought a *prima facie* case was made out, and committed him for trial, but did not say he was guilty. It is like one of my own committals. If I send a man before a jury to take his trial, I give no opinion of his guilt or innocence. I merely say there is sufficient to put him on his trial. Here is a positive law making an express provision. The 186th section uses the words, "lawfully imprisoned for any offence committed by him.' The complainant has been tried by a competent tribunal, and declared to be innocent of the crime stated in the indictment. The other points in dispute were then settled by the two solicitors, and Mr. Woolrych said that he could not allow 101 days' deduction of wages for the reason stated, and he made an order for the payment of £21. 14s., and one guinea costs.

THE ADMINISTRATION OF JUSTICE IN PEKING.—The following is an extract from a letter written by Dr. Lockhart at Peking on Sept. 7; it is a curious illustration of the mode in which law and justice are still administered in the Chinese capital:—"I have mentioned to you the case of General Shing-paou. He was the man who ordered the execution of Major Brabazon and Abbé Luc at Pa-le-chaou. He was one of Sooshun's (the executed regent's) clique in 1861, has been with part of the army in command, but accused of all sorts of crimes, which crimes are, however, part of a Chinese general's common nature, his chief crime being that he was of the regency clique. He was brought to Peking a prisoner, and been kept many months in the Board of Punishment Prison. Sometimes it was said he was to be executed, and at others that he would be allowed to purchase his life. The Empress Dowager wished him killed, because the regency clique accused her of adultery. Prince Kung wanted to save him; so on August 31st a high officer was sent to him from the court to say he was permitted to hang himself, and he at once did so, and is dead. After death long needles or narrow daggers were thrust into his body to make sure that he was dead. The Government dare not send him to the cabbage market or public execution ground, lest he should be rescued by his friends and adherents, and so they let him make his own exit, and it is less disgraceful to die thus than by beheading. The body is placed in a litter, hoisted over the wall of the prison, and given to his friends, who can bury him with all pomp. No corpse is allowed to go through the doors of the Board of Punishment. Low criminals are shoved through a hole in the wall; high men are hoisted over the wall."

THE BURNING OF KAGOSIMA. The Peace Society have presented to the Queen by the Home Secretary, a memorial of the dreadful character of the late operations in Japan, and particularly the burning of Kagosima, containing from 150,000 to 180,000 inhabitants. After representing the facts, too well known to our readers, the memorialists say:—"The committee respectfully submit to your Majesty that this tremendous act of vengeance, inflicted by British arms, cannot be justified on any ground, they will not say of justice and humanity, but of international law, or even of the laws of war. However heinous may have been the criminality of those concerned in the act for which redress was sought, the people of Kagosima, situated at a considerable distance from the scene of the outrage, were in no respect implicated in the guilt. Your Majesty's memorialists are profoundly convinced that acts like these, unhappily of too frequent occurrence in those remote regions, are inflicting a deep and lasting injury on the character of this country. Far from helping, they create an insurmountable barrier in the way of our progress as the professed apostles of civilisation and Christianity in the East. They afford matter of just reproach against us to other nations, and take from us the power of remonstrance or rebuke with them, whatever acts of injustice or oppression they may commit. They dishonour our Christian profession before the face of the world; and may we not justly apprehend that they may expose us to the righteous displeasure of Him by whose signal favour our country has been raised to such unexampled power and prosperity? The committee of the Peace Society, therefore, most humbly, but most earnestly, entreat your Majesty to withhold your royal sanction from this great outrage, perpetrated, in your Majesty's name, on the unoffending people of Kagosima! And your Majesty's memorialists, as in duty bound, will ever pray, &c.—JOSEPH PEASE (President), SAMUEL GURNEY (Treasurer), HENRY RICHARD (Secretary)."

APPOINTMENTS AND TITLES GAZETTED.—The Queen has also been pleased to give orders for the appointment of Edward St. John Neale, Esq., Acting Charge d'Affaires in Japan during the absence of Her Majesty's Minister, to be an Ordinary Member of the Civil Division of the Third Class or Companions of the Most Hon. Order of the Bath.

FAILURE OF THE ARMSTRONG GUN AT KAGOSIMA.—The following is an extract from a letter dated Yokohama, September 23:—"This Japan business is a very awkward one. Russia has a very large navy out here, cruising about, and should the war with Poland cease, she would do England a great deal of harm in Japan. It may seem a very improbable thing for me to know, but about 250 miles north of Hakodadi, the most northerly port we have open in Japan, the Russians have an arsenal, dockyard, hospital, and rendezvous, situated round a bay with an entrance to it, about half a mile wide, and commanded by batteries which would sink any ship. This is no yarn; it will come out, no doubt, in time, and more than likely when we have been hit hard first. The civil war in Japan is in a fair way of commencing. The Prince of Soso has taken one of the Tycoon's steamers, and fired his batteries where she was lying. If he appeals to us for protection we must join, as Soso and Satsuma are cousins. There is no doubt a hard campaign will ensue, and there is a rumour going about, founded upon a sound basis, that every available man-of-war on the China and East India stations are to muster at Yokohama on Christmas-day. The late action at Kagosima has been productive of nothing. It has proved the uselessness of Armstrong guns at 400 yards, or rather a short distance; and established the fact that 8-gun steamers and gunboats are the best class of vessel for attacking sea-walled batteries. The Armstrongs were a failure, and many of them burst from a very peculiar cause. On board the flag-ship, or any ship, the cannon balls are scrubbed and cleaned every Saturday. Well, the Armstrong shot are covered with a lead coating all lined, in order to fit into the grooves with which the interior of the gun is fitted. Jack is told to clean Armstrong shot and shell, and seeing these lines, scrapes them down level. When they are rammed home the grooves don't fit the ball, and the consequence is, on account of windage, the ball drops out at the muzzle into the water, or else sends the vent piece flying in a hundred bits."

NEW COIN AND A MINT FOR HONG KONG.

So far back as the 27th March we were enabled, in the number of the *London and China Telegraph* of that date, to furnish our readers with full and detailed information as to the value and denominations of the new coinage it was intended to send out to Hong Kong. The statement we then made has been carried out nearly to the letter, and the first consignment has been sent, through the medium of Messrs. WINKLEY and Co., of Birchin-lane, the brokers to the Agents for the Crown Colonies, on board the *Robin Hood*, which sailed on the 27th ultimo. As we stated would be the case in the number referred to, the coins first despatched are the mil, one cent, and ten cent pieces; and they will at once be recognised as exceedingly elegant specimens of the moneyer's art. Her MAJESTY'S bust will be soon as well known in the interior of China as in any part of our own islands. Her servants at the Mint have but acted as loyal subjects in stamping a *vera effigies* on the die that will carry the features of the Queen of ENGLAND to many a spot where no living European face has ever been beheld. The shipment by the *Robin Hood* consists of:—

$10 000	worth of	Ten Cent.	Pieces (Silver).
$10,000	„	One Cent.	„ (Bronze).
$20,000	„	Mil.	„ „

It will be recollected, from our former announcement, that 1,000 mils are to be the equivalent of a dollar, while the one cent is to be the hundredth part, and the ten cent the tenth part of a dollar. The dollar itself is to pass current as a legal tender at 4s. 2d.

On one point alone have we to vary our previous statement. We apprehended there would be some difficulty in carrying out the suggestion of Sir HERCULES ROBINSON, that the mil should have a hole drilled through it, to enable the usual process of "stringing" to be adopted. This, however, has been done; and the new little bronze mil will find no impediment to its circulation from the fact of its wanting the hole, so indispensable to John Chinaman for "handling and carrying cash." Trifling as the process may seem, we believe the piercing this hole through so thin a piece of bronze was found to be a task that required much care, and a skilfully devised apparatus.

But, in addition to this new coinage, we are now in a position to state that Hong Kong will almost immediately have a still more important shipment made to it, in the shape of all the machinery and establishment necessary for minting its own coinage on the spot. The elevation of the building for the Hong Kong Royal Mint, and the plan of the plant, have been drawn by the Master of the Mint, and are approved of. A site for the building has been recommended at Cow-loong, and it is looked for that the entire department will be there located and in working order within twelve months. In adding that no further shipment of coinage will be made from England, the reason will be at once seen. All future demands will be supplied by the Mint at Hong Kong, and from thence will be issued the new dollar, the preparations for which are now in an advanced state, and everything necessary will, when completed, be sent out with the rest of the plant. We congratulate the authorities on securing the able and experienced services of Captain KINDER as the Mint Master. This gentleman is now engaged in superintending the plant to be shipped off, and when completed he will proceed to Hong Kong.

Naval and Military.

The battalion of Royal Marines, ordered to proceed to Japan in the *Conqueror*, 78, Captain Luard, are expected to embark on the 17th. They comprise six companies, numbering, in the aggregate, 36 officers and 512 non-commissioned officers and men; the whole under the command of Lieutenant-Colonel W. G. Suther. He will have for flag-officers Lieutenant-Colonel Penrose, of the Plymouth division, and Lieutenant-Colonel Charles William Adair, of the Chatham division. The following is the proportion of officers, non-commissioned officers, and men selected from the Chatham division :— Lieutenant Colonel C. W. Adair in command; Captain J A. Stewart, paymaster; Lieut. W. J. Barker, quartermaster; Captain J. H. Parry, First-Lieut. R H. Dwyer, Second-Lieut. W. W. Spalding, eight non-commissioned officers, and 76 men. The entire quota from Plymouth will consist of a detachment of one lieutenant-colonel, two captains, four lieutenants, eight sergeants, eight corporals, two drummers, and 150 men. The marines for service on board the *Conqueror* comprise Captain T. H. A. Brenan, Second-Lieut. S. R. Lewis, two sergeants, two corporals, two drummers, and 72 privates, with a proportionate number of Royal Marine Artillery.

The transport Caroline Coventry, Overberry, which sailed from Shanghai July 12, arrived at Plymouth on the 28th November. She brings the head-quarters of the 31st Regiment of infantry. 3 6 non commissioned officers and men, under command of Lieut.-Colonel Eager, Captains Cassidy and Hamilton, Lieutenants Deane, Dayall, Wood, Jebb, Gow, and Butler, and Ensigns Stannier, Majendie, and Deverell, and in medical charge of Assist.-Surgeon Grant and Staff-Assist.-Surgeon Ginaud. Nine soldiers died on the passage before reaching the Cape.

The Scylla, screw steam-corvette, Capt. R. W. Courtenay, arrived at Maderia from Plymouth on the 13th November, and left for China on the following day.

The following items are from the *Army and Navy Gazette*:—"Lord Clarence Paget, at a meeting of his constituents at Sandwich, confined himself to the announcement that Vice-Admiral Kuper should not be condemned because, owing to his ships rolling, the shot and shell which were intended for the forts of the Daimio unfortunately destroyed the city inhabited by some 150,000 harmless creatures. His lordship did not tell his hearers that Admiral Kuper was not forced to fight on the day he chose to fix; he did not tell them that, having seized the steamers of the Prince, there was no positive necessity, because a shot was fired at our ships, for our being compelled to engage at a disadvantage, and thus have prevented our shoulders from being burdened with the scandal under which we now labour, of having taken the lives of a number of innocent people. Lord Clarence did not either tell his listeners that our victory was far from complete, and that on our squadron leaving the bay in which it had so much distinguished itself the Japanese flag was still flying, and that the forts were still capable of firing. Neither did his lordship allude to the fact that we were about to send out a large force of marines to assist in bringing the Japanese to their senses—*id est*, to do as we would wish them to behave. All this was not convenient."

"We know not what steps the Admiralty have officially taken respecting the failure of the Armstrong guns at Kagosima, but we cannot think that they have neglected to call for a special report of the performance of these breech-loading weapons when exposed to the enemy's fire. There are such unpleasant reports of casualties, and so many actual failures, that anything short of a full and detailed account from the Admiral and from each captain would fail to satisfy the public."

"A young officer in the mercantile marine left England some time since as mate on board a ship bound to China, and on arriving there obtained an appointment as 'captain of the band' in his Imperial Majesty's forces. During one of the engagements he was unfortunately taken prisoner by the rebels, and was started off to their city. In his progress thither he was mutilated in a most barbarous manner, and on reaching his destination, nearly exhausted, his head was severed from his body, stuck upon a pole, and placed on the gates at the entrance of their capital."

"We are informed, on reliable authority, that the Lords of the Admiralty have granted the widow of the late Captain Josling, of H.M.S. *Euryalus*, a very handsome gratuity, independent of the pension she would, as a matter of course, be entitled to; and we also believe the same liberality will be exhibited towards Commander Wilmot's family."

"As some derangement of the Indian relieis has taken place in consequence of the pressure for troops in New Zealand and China, it may be well to account for the present state of the roster in this respect. As originally intended, the 92nd, 1st batt. 13th, 74th, 69th, 68th, and 43rd were to come home from India, the first-named regiment not being relieved, and the five others being replaced by the 86th, and the 2nd battalions of the 19th, 20th, and 21st from home, and the 50th from Ceylon, the 50th being succeeded in Ceylon by the 2nd battalion 25th from England. This original programme has been so far adhered to that the 92nd has come home, that the 19th and 21st have been sent to replace the 68th and 74th in Madras, and the 36th to relieve the 43rd at Calcutta; but the destination of the 20th has been changed from Bengal to China, and that of the 50th from Madras to New Zealand. To fill the gap, the 55th and 76th have been since sent out, and one of these regiments will release the 13th at Calcutta, and another the 69th at Madras."

Capt. George Giffard, C.B., is promoted to the rank of rear-admiral, by the demise of Admiral of the Red John Ayscough. The next vacancy among the active list of flag-officers will lead to the promotion of Capt. Sir Frederick W. E. Nicolson, C.B., senior officer and Captain-Superintendent of Woolwich dockyard.

SALAMANDER, 6, paddle sloop, is ordered to be immediately commissioned by Commander the Hon. John Carnegie, with a complement of 135 officers and men, and it is reported she is to be employed on surveying service in Torres Straits.

The *Army and Navy Gazette* furnishes the following, in its usual monthly list, as the names of vessels of the Royal Navy on the China and Japan station:—

Algerine, 3, sc. gunboat, Lieut.-Com. A. R. Blane.
Argus, 6, st.-v., Com. J. Moresby.
Barrosa, 21, sc., Capt. W. M. Dowell.
Buzzard, 2, sc. gunboat, Lieut.-Com. Hy. Holder.
Bustard, 2, sc. gunboat, Lieut.-Com. John C. Tucker.
Centaur, 6, paddle st.-v., Com. John Z. Creasy (acting) ordered home.
Clown, 1, sc. gunboat, Lieut. Com. J. S. Tonkin.
Cockchafer, 2, sc. gunboat, Lieut.-Com. H. L. Holder.
Coquette, 4, sc. gun-v, Com. A. G R. Roe.
Cormorant, 4, sc., Com. C. M. Buckle.
Coromandel, 5, st.-ves., Lt D. G. Davidson.
Encounter, 14, sc. Capt. R. Dew, C.B., ord. home.
Euryalus, 35, sc., Capt. J. H. L. Alexander, flag-ship of Rear-Admiral Kuper, C.B.
Flamer, sc. gunb., Lieut.-Com. T. S. Gooch.
Grasshopper, 2, sc. gunboat, Lieut.-Com. J C. Tucker.
Hardy, 2, sc. gunb., Lt.-Com. A. G Bogle.
Haughty, 2, sc. gunb., Lieut. J. C. Wells.
Havock, 2, sc. gunb., Lt.-Com. E. Barkley.
Hesper, 4, sc. st.-ship, Master-Com. A. F. Boxer.
Hornet, 17, sc., Capt. J. Dayman.
Insolent, 2, sc. gunb., Lt.-Com. G. Parsons.
Janus, 1, sc. gunb., Lieut.-Com. R. Adams.
Kestrel, 1, sc. gunb., Lt.-Com. H. Dunlop.
Leopard, 18, st.-v., Capt. C. T. Lecky.
Leven, 1, sc., gunv., Lt.-Com. H. P. Kneritt.
Manilla, sc. st.-v., 70 h.p., Mast Com. H. W. Burnett.
Osprey, 4, sc., Com. A. J. Innes.
Pantaloon, 11, sc., Com. F. R. Purvis.
Pearl, 21, sc., J. Borlase, C.B., ord. home.
Pelorus, 21, sc., Capt. H. Boys.
Perseus, 17, sc., Com. A. J. Kingston.
Racehorse, 4, sc., Com C. R. F. Boxer.
Rattler, 17, sc., Com. E. H. Howard.
Rifleman, 5, sc. st.-sloop, Mast. Com. J. W. Reed.
Ringdove, 4, sc., Com. H. Huxham, ord. home.
Saracen, 4, brig, tender to Rifleman.
Scout, 21, sc., Capt. J. Corbett, ord. home.
Scylla, 21, sc., Capt. R. W. Courtenay.
Severn, 51, sc. frig., Commodore F. B. Montresor.
Slaney, 1, sc. gunboat, Lt.-Com. W. F. Lee.
Staunch, 2, sc. gunb., Com. G. M. Temple.
Swallow, 9, sc. st.-sloop, Mast. Com. E. Wilds.
Tartar, 20, sc., Capt. J. M. Hayes.
Vigilant, 4, sc., Com. N. R. Hobson.
Vulcan, 6, sc. tr.-ship, Capt. A. C. Strode, ord. home.
Weazel, 2, sc. gunb., Lt.-Com. W. Howorth

DETAIL OF ROYAL MARINES FOR JAPAN.

Staff: Lieut.-Colonel Commanding, Lieutenant-Colonel W.G. Luther; as Majors, Lieutenant P. C. Penrose and Lieutenant C. W. Adair; Captain J. A Stewart, First-Lieutenant W. J. Ponte, of Woolwcih Division, Adjutant; Lieutenant W. J. Barker, of the Chatham Division, Quartermaster; Dr Christopher K. Orel, Surgeon; Angus Robertson, and Gabriel McEgles, Assistant-surgeons. The non-commissioned officers are as follows:—Orderly-sergeant Edward Martin, Sergeant-major; Orderly-sergeant J. Bockham, Quartermaster-general; Sergeant Thomas Hornby, Provost-sergeant; Sergeant William Facey, Armourer-sergeant; Corporal Joseph Jones, Paymaster's clerk; Sergeant Henry Fowler, Adjutant; Private John Robert Cox, Quartermaster

The following is the list of the Captains:—J. H. Parry, Chatham; J. B. Calwell, Portsmouth; M. De Courcy and W. Taylor, Plymouth; J. B. Seymour and F. Lean, Woolwich; First Lieutenants, R. H. Dwyer, Chatham; J. M. M. Silver, Portsmouth; J. A. Hezeltime and A W. Johnstone, Plymouth; A. Donellan and J. C. Hore, Woolwich. Second Lieutenants, W. W. Spalding, Chatham; J. C. Peters Portsmouth; H. J. L. Norcook and T. Lakin, Plymouth; E. T. Richards and C. A. Kennedy, Woolwich.

The numerical composition of four divisions of this battalion, namely, Chatham Portsmouth, Plymouth, Woolwich, is as follows:—Chatham: 1 captain, 1 lieutenant, 1 second lieutenant, 4 sergeants, 4 corporals, 1 bugler, 75 privates—total, 87. Portsmouth: 1 captain, 1 first lieutenant, 1 second lieutenant, 4 sergeants, 4 corporals, 1 bugler, 75 privates—total, 87. Plymouth: 2 captains, 2 first lieutenants, 2 second lieutenants, 8 sergeants, 8 corporals, 2 buglers, 150 privates - total, 174. Woolwich: 2 captains, 2 first lieutenants, 2 second lieutenants, 8 sergeants, 8 corporals, 2 buglers, 150 privates—total, 174. And for the four divisions: 6 captains, 6 first lieutenants, 6 second lieutenants, 24 sergeants, 24 corporals, 6 buglers, 450 privates—in all, with a staff of 16 total 538.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 8.

In the preliminary examination of the Bill for disposing of the East India surplus for the year 1861 in the committee of the Second Chamber of the States-General, several other subjects connected with the welfare of the colonies came under discussion. In the first place complaints were made of the falling off in the cultivation of indigo in Java, and, moreover, just at the time when the quality was so much improved as to be considered superior to the produce of Bengal. Apprehensions were entertained that the Government, having in view the importance of the cultivation of sugar, had not paid sufficient attention, nor acted with the needful impartiality with regard to indigo, and some members even accused the Colonial Minister of inconsistency and having altered his opinions on the subject. Then the late sales in Java and Sumatra, the system of the company's coffee sales in this country and the question of the brokers' monopoly and commission, as well as the means to be employed in improving and facilitating the manufacture of salt in Netherlands India, came under review. Also with respect to the much desired acceleration of the mails between this country and her East India possessions, ministers were asked for explanations of the intentions of the Government. In the meantime it gave them great satisfaction to learn that negotiations had been opened with other European powers for the suppression of piracy in the Indian Archipelago,

Digitized by Google

wish was expressed to hear the result. Great stress was
n a well-regulated steam communication with India, and
olonial Minister was asked if he was still opposed to taking
easures to carry the projected line into effect by granting
sidy or otherwise.
e Second Chamber is now occupied with the Budget for
, and after passing the several heads of Catholic Church,
stant Church, and Navy, have just concluded the im-
ant one of Home Affairs, in which the question of educa-
took up several days.
is stated in the documents before the committee that the Govern-
t were credited with the sum of 1,177,231 florins for losses and damage
oods and produce received from Netherlands India in 1861. In pro-
ion as the Government increases the amount of their risks of marine
rance, this sum must annually increase rather than decline. The
stion was therefore asked whether no remedy for this serious loss could
devised by adopting some other principle, such as reducing the rates
freight, and imposing on the Netherlands Trading Company the neces-
ty of observing greater restrictions in the selection of the vessels they
hartered, many of which, though no doubt originally fine ships, were
getting old and liable to leak, thus materially increasing the risk of their
not being in a condition to deliver their cargoes sound and dry. It was
further suggested that the company should pay greater attention to the
vessels being properly manned in proportion to their size, as great danger
was incurred in heavy weather by their being short-handed.

The Second Chamber last week passed several Bills for the naturalisa-
tion of foreigners (amongst whom were those gentlemen residing in
Netherlands India, mentioned by name in my letter of the 22nd of Octo-
ber). During the debate a question of some importance was mooted.
Several members objected to the admission of a certain Mr. A. de Bour-
bon, residing at Breda, to the rights and privileges of naturalisation on the
ground of his being an Englishman, as appeared from an examination of
the papers produced in support of his petition. Among others, M. Heems-
kerk observed that if that was the case he could not become a naturalised
subject, according to the principles of Dutch legislation. Heer Von Golt-
stein was of opinion that M. de Bourbon must be considered as an
Englishman; for according to British law it was not a question whether
his parents were French or English, but whether he was born on English
soil. The Minister of Justice could not admit that the gentleman in
question was to be considered as an Englishman. He had made inquiry
of the British ambassador, who informed him that according to the English
law a child was reputed to be born where his parents were domiciled, and
this was confirmed by the opinion of the law-officers of the Crown in
England, which had been obtained, and which stated clearly that M de
Bourbon could not claim the right of being an English born subject.
The Minister added that it was his full conviction that as the Dutch law
now stands, no Englishman can become a Dutch naturalised subject. The
Bill eventually passed for the naturalisation of the above-named gentle-
man.

During the month of November the number of vessels that arrived from the East was thirty-two, of which sixteen brought cargoes for the company, and sixteen for the private trade. Fourteen discharged at Amsterdam, sixteen at Rotterdam, one at Dordrecht, and one at Schiedam. Fourteen came from Batavia, five from Sourabaya, four from Samarang, four from Tjilatjap, three from Passaroeang, one from Cheribon and Tagal, and one from Padang. Among the above was the fast sailing clipper *Noach*, of Kinderdyk, Captain P. Wierx, that made her passage from Batavia to Brouwershaven in the short space of seventy-two days. Last year she made the voyage out in seventy-three, and home, with full cargo, in eighty-four days.

In conformity with previous announcement in the papers, the Indian Association held a meeting of their members at the Hague last week, which was numerously attended. Although there were many important subjects on the list for discussion, all the others were postponed to another day, and the business of the meeting confined exclusively to the government regulations for the cultivation of sugar in Java, which had also formed the subject of debate at the previous meeting. The subdivisions of the regulations brought under consideration were, firstly, the limitation that the plantations of sugar cane must be made in Dessas, and that exceptions may be allowed by special permission of the Governor-General; secondly, the undertaking on the part of the contractors to deliver fixed and specified quantities of sugar; and, thirdly—and on this part of the subject there was scarcely a single dissentient voice—the restriction contained in the eighteenth article of the new sugar culture regulations, that the contractors are bound not to receive and boil down any sugar cane but that produced on the Government plantations. The meeting considered this incompatible with the liberty of action belonging to the subject, and it was looked on as a clog and hindrance to further free development and improvement; in consequence of which the following resolution was put and triumphantly passed:—"That the Indian Association, in fully admitting that there is much that is valuable contained in the new regulations for the cultivation of the sugar cane in the island of Java, regrets to observe the absence of any germ of further development of the principle of free cultivation."

Previous to the adjournment of the meeting, one of the members read a letter from a commercial house relative to the result of the last tea sale, from which it appears that Java tea is every day becoming more popular and in favour in this country, so that a brilliant prospect is held out for the future cultivation of the tea plant in Java.

Mr. Stieltjes, lately arrived in this country from Java, has sent to the Second Chamber a statement in which he enters very fully into the subject of the railways in that island, and defends himself against the charges laid to his door.

PASSENGERS ARRIVED.

Per *Orange Nassau*, Capt. Strang van Hees, at Rotterdam, from Batavia: Messrs. D. Badar, W. Hessing, A. Hekmeyer, J. Van der Quast, J. De Bade, and C. Van Enter.

Per *Vuf Vrienden*, Capt. Johan, at Rotterdam, from Samarang: Lieut. E. Van Gersel, E.I. army, lady, four children, and two native servants.

Per *Sliedrecht*, Capt. Feenstra, at Amsterdam, from Batavia: Lieut. S. Kynypenga, Mrs. Kerrebyn and family, and Mr. J. C. Wiggers.

Per *Ocean*, Capt. Doeksen, at Amsterdam, from Batavia: Mr. H. Weiz and family, Mr. Stap, and Mr. E. Lasonder, naval medical officer.

Per *Petronella Catharina*, Capt. Van der Veen, at Amsterdam, from Sourabaya: Mr. and Mrs. Van der Ham and child, Mrs. F. L. Van Lom and daughter, three Misses Itzig Ubeine.

Per *Aegidia and Pauline*, Capt. Hoogland, at Rotterdam, from Batavia: Capt. W. J. Voss, twenty passported soldiers.

Per *Louise, Crown Princess of Sweden*, Capt. Van der Linden, at Dordrecht, from Java: Mr. Peters.

PASSENGERS OUTWARD.

Per *Dordrecht*, Capt. Loos, from Rotterdam to Batavia and Sourabaya: Mr. and Mrs. E. Rudolph, four children and servants, Mr. and Mrs. C. J. Meyer, Mr. and Mrs. W. Steinmetz, Mr. M. Ontrop and daughter, Mr. Th. Keyzer and two daughters, Miss Van Streefkerk, Messrs. J. Block, W. P. Van den Heuvel, W. Berghuis van Woortman, F. J. Cornelissen, C. Van Mensch, and P. Van den Broek, two Javanese servants.

Per *Anne and Sophia*, Capt. Hoekstra, from Amsterdam to Batavia: Messrs. Ermeling, H. Soeters, H. Holsboer, Van Schindel and family, Haringcarspel, Ter Mytelen, Van der Mazen, and a detachment of fifty-six soldiers.

THE SWISS AMBASSADOR IN JAPAN.

M. Humbert, Ambassador at Japan of the Federal Council of Switzerland, has forwarded to his Government an account of an official visit made to him by a minister of the Tycoon. On the 9th Sept. some Japanese officers called on M. Humbert to ask him when he would be disposed to receive the Minister of Foreign Affairs sent by the Sovereign. The reception was fixed for the same day at four in the afternoon. At that hour MM. Brennwald and Metman, interpreters to the Swiss Mission, introduced the Minister Tamura-Higono-Kanic and his suite into the great saloon of the legation. After the first exchange of salutations, Tamura gave orders to his servants, who deposited under the verandah the customary presents, consisting of about thirty live ducks, geese, and fowls, a large bamboo basket filled with fruits of the season and four lacquer boxes of tea and sweetmeats were brought into the saloon. Another functionary accompanied Tamura, who was likewise assisted by the interpreter Morgana, noted for his hostility to foreigners. Tamura carefully avoided touching on political subjects, alleging that his mission was confined to a purely official visit. M. Humbert presented Tamura with some champagne and a photograph of the town of Berne, with which the Japanese seemed much gratified.

COCHIN-CHINA.

(FROM OUR PARIS CORRESPONDENT.)

The Annamite Ambassadors reached Alexandria in the Spanish steam frigate *Lepanto*, from Valencia, and were politely received by the Grand Chamberlain of the Viceroy of Egypt, who had just left for the upper country, and conducted to the Viceroy's palace, which was placed at their disposition during their stay in the country. It is curious that not a word has reached us here of their reception, except the mere fact, by the Queen and Court of Spain. But Spain has no interest in Cochin-China or Annam; she has not obtained any settlements there; she had a slice of the glory, a very small slice, in the original operations, but she said that she had no intention of acquiring territory, and she has kept her word. France has kindly taken all the onus off her hands in that matter, and is carrying on the business, it must be admitted, as far as military colonisation is concerned, with vigour enough for both nations, although the result will hardly profit more than one. It is quite evident that Cochin-China is to be in Asia what Algeria is in Africa—at once a nursery for the French army, a place for the occupation of military spirits of a restless constitution, and a fulcrum from which the Imperial lever may be worked on China, Japan, and all the Far East. The idea is a good one, from a Governmental and military point of view, and it is evident that it is not to be allowed to lie fallow. On the contrary, we have evidence on all sides that it is to be worked on high pressure principles, and we only hope that the commercial results, and especially the civilising effect on the native populations, may be equal to the expenditure, the trouble, and the expectations put forth.

The Emperor, as we have before pointed out, made a point of it in his speech on the occasion of the opening of the present session, and ever since the ministerial press has been occupied with the past, present, and future of "Our young Colony in the East." The *Constitutionnel* says truly: "Its political import-
"ance cannot be questioned; it is self-evident; one has only to
"cast one's eye over the map to be convinced of the fact;" and after giving, for the twentieth time, the particulars of the geographical position of Cochin-China, we are told that France, in planting her flag at Saigon, has "not only created a station on
"the road from Suez to Peking or Jeddo, she has not only estab-
"lished, as it were, a kind of neighbour to her possessions on the

Digitized by Google

"coast of India (a rather distant neighbour, by the way), but she "has, moreover, separated the English colonies of India from the "English colonies of China." This is plain speaking, and, without taking offence, or feeling any irritation, there is no reason why we English should not record and consider the facts thus strikingly brought to our notice. It would be uncivil to disregard so clear a notice from an official source. The admirable position of Saigon is dwelt upon with much force. We are told that five great rivers irrigate the colony and fall into one of the largest estuaries in the world, and that the Saigon river has, to a distance of sixty miles from the sea almost everywhere, even at low water, sufficient depth for three-deckers; and that Saigon, on the route to Hue, the capital of the Annamite empire, and Mytho, another town in possession of the French, situated at the point where all the rivers and canals of the region meet, command not only the provinces ceded to France, but also the possessions yet remaining to the empire of Annam. And an old reminiscence is called up in the following sentence from the *Constitutionnel* of the 3rd instant:—"The Annamites know the importance of "the former place, Saigon, for in 1819 there were to be seen "there a vast Imperial Palace, a naval arsenal, docks containing "two frigates of European form, and a hundred galleys and for-"tifications constructed in 1791 by Colonel Ollivier, the sole "product of an expedition consisting of seven regiments sent by "France to Cochin-China, in twenty vessels, but arrested on the "road by the English." The commercial advantages of the position are again set forth in attractive colours. Mytho is stated to have been for centuries the principal depôt for the supply not only of the Annamite empire, but of Siam also; all the trade of Lower Cochin-China is carried on we are told by the Arroyo, or Chinese Canal, which unites Mytho with Saigon. The commerce of the latter port in 1860, after the French possession, is said to have employed 246 vessels, which took away 54,000 tons of rice, valued at more than five million francs, or £200,000; and the importations are stated at a million and a-half of francs, or £60,000. The whole of this trade is carried on by Chinese, who have long been the only foreigners permitted to penetrate into the Empire of Annam. The number of ships reported as having anchored at Saigon during the first three months of 1861 is given at thirty-six, a great falling off, unless January, February, and March are dull months in that quarter of the world.

The cotton of Cochin-China is spoken of in the highest terms; it is, we are told, of "that kind called *upland green seed*, and "even, under the most careless native cultivation, rivals "the product of New Orleans." In the course of the year 1861 the export of cotton from Lower Cochin-China amounted, it is said, to about 2,200,000 lbs. If the French possession of the provinces of Annam should lead to an increase in the productions and commerce of that country, the late expedition will have done the world, and the Cochin-Chinese in particular, a great service. If, on the contrary, Saigon is to become only another Algeria, we cannot congratulate the Cochin-Chinese on the events that have occurred. The hints thrown out about the treachery of TU DUC are ominous, and the accounts from that quarter of the world speak of military operations in terms quite out of keeping with the force of 1,800 French troops, which is the number reported to be in Cochin-China in the official accounts of the Minister of War just published.

Since the above was written, the *Opinion Nationale* publishes some extracts from a letter dated Saigon, Oct. 20, in which it will be seen that the importance of the suspected treachery of the Emperor Tu-Duc has not been over-estimated. It also accounts for the singular neglect of the Ambassadors, which I have more than once described. Of course it is needless for me to say that the elaborate proposals for the re-purchase of the rights acquired by the French were very summarily snubbed. The writer says:—

"That we enjoy perfect tranquillity in consequence of the treaty concluded with the Emperor Tu-Duc, and its solemn ratification. There was a general insurrection between the signature and the ratification, which broke out during the night of the 17th of December last, and of which the centre was Go-Kong. This insurrection, of which Quan-Dinn was the promoter, failed in every direction, which failure, together with the ratification signed shortly afterwards, placed us in a position of relative peace—of armed peace, in fact, which only waited an opportunity to be changed into active war, contrary to the anticipations of M. de la Grandiere, our Governor, who cannot believe in a rupture. We shall see which of these two opinions shall be realised in a month when the rice crop shall be saved. I believe that war is inevitable; every symptom forces me to fear it. The two mandarins who signed the treaty with France have been condemned by a secret council, held at the Court o Huè, to be tortured and then put to death as traitors to their country by having led their Sovereign, Tu-Duc, into error when they induced him to sign a peace oppressive for the State and dishonourable for the Annamite nation. One of the mandarins died of cholera shortly after he was sentenced to death. His remains were tortured and the head cut off and thrown to the dogs. The other mandarin, Sousthan-Gian, is one of those sent on a mission to Paris to repurchase the provinces we hold by conquest. If, as everybody supposes, he shall fail in his mission, his doom is inevitable. All his property has been confiscated, and in anticipation of his not surrendering to the executioner to be tortured and decapitated, his entire family are held as hostages. Quan Dinn, the hero of Go-Kong, has arrived at the mountains on the borders of the province of Bien-Hoa to excite and lead the inhabitants to an insurrection. It is said, further, that he has intrenched himself there, and that he is well supplied with provisions. There is no doubt but that Tu-Duc has conferred additional honours on him, and that if he fails the Emperor will disavow him. It is thus the Oriental Sovereigns fulfil their engagements. I must add another unfavourable symptom. The population being oppressed by their ancient masters, against whom we cannot efficaciously defend them, dare not approach the ground we occupy—they are constantly between the hammer and the anvil. They are punished for the smallest mark of sympathy they show us by bands who pillage and burn their property before we can assist them. When we arrive it is too late, and we can only punish that part of the population which, according to the others, assisted the pillagers. It is a lamentable fact that a country which formerly supplied all Cochin-China and a part of China with rice, has not since the war grown sufficient to feed the planters themselves, who sow without being certain to reap. In the centre of the country occupied by the French, the inhabitants in place of exporting rice are forced to import it. The country, nevertheless, is capable of producing an immense variety of valuable crops, such as rice, sugar, cotton, tobacco, and silk. Its forests of valuable timber only require to be thinned. Its cattle, which might become a vast branch of commerce, consist of tame and wild oxen, deer, elephants, and rhinoceros, together with pheasants and various other game. Labour is cheap, and canals for the conveyance of timber and other produce are all made. I have just seen a piece of timber, perfectly straight, 120 feet long, six feet in diameter at its base, and four feet in diameter at its smallest end."

Literature.

The Pines and Firs of Japan, by ANDREW MURRAY, F.L.S., Bradbury and Evans, London. The author has collected from the proceedings of the Royal Horticultural Society all that appertains to these plants, adding his own illustrations. The notices extend up to the present time, while those already extant (three) are of the periods of 1712, 1784, and 1842. The new importations of conifers are by Mr. Fortune and Mr. Veitch. The work contains upwards of 200 engravings, or *fac similes* of the plants. Our readers will gladly avail of the author's known taste and ability to familiarise us to these species from the Far East. The lover of botany will find here a charming feast at a small cost. The *British Army Review*, by SAUNDERS, OTLEY, and MORGAN, is a monthly record of military proceedings, written without fear or favour. The December number contains a notice of the Crawley Court-martial, Armstrong Artillery, Our Soldiers' Wives, Ordnance Reports, Weapons of War, &c. Appended is a very clear and useful sheet of the stations of the army, corrected up to the latest intelligence.

The sixth number of the *Chinese and Japanese Repository* contains "Our Policy and Prospects in Japan," "Extracts from Histories and Fables to which allusions are frequently made in Chinese Literature," "Notices of Annam or Cochin-China." From the article on "Our Policy and Prospects in Japan" we extract the following in confirmation of our own views as to the attack on Kagosima:—

"A great deal has been written and said on the subject; one writer to *The Times* draws a fearful picture of 180,000 people being driven penniless and without food from their flaming habitations; while another compares it to the burning of a city like Bristol to ashes—all because an individual had been murdered in the highway. It is easy to see that such expressions are mere adornments of the argument, if such it may be called, which it is sought to enforce. Others put the matter upon commercial ground alone, and say it is manifestly unjust to bombard a city for the sake of trade. So it is, and if that were the cause of this bombardment of Kagosima, we should say let our merchants seek their treasure elsewhere. But Britain has a duty to perform to these barbaric princes—the people must suffer for the wickedness of their rulers—that aphorism is as old as Solomon. They have to be taught by the stern law of truth and justice, that they cannot with impunity deny to-morrow what they promise by treaty to-day to give, and that murder is murder, and must be atoned for, to prevent its recurrence. Then as for the 180,000 inhabitants—the probability is that as soon as the first symptoms of a collision made their appearance, the entire population had taken refuge beyond the range of our guns and mortars, leaving their wretched dwellings to the flames. We must not conceive Japanese houses to be anything like our own. Of those abodes of the 180,000, but few would be substantially built. Mats and laths and paper screens enter largely into the materials of the Japanese builder, and these can therefore be readily replaced. But this is not the question. The question is, Shall we give up Japan, and refrain from punishing the Daimios for their misdeeds? or shall we now subside, content with what has been accomplished, and hope on for the future, for a better state of things? Either course would be most impolitic."

A NEW ISSUE FOR THE FRENCH MAIL.

The *London and China Telegraph* will, from January next, be published on the arrival of the Mails per French steamer, about the 4th of each month.

The London & China Telegraph.

LONDON, MONDAY, DEC. 14, 1863.

TRADE AND PEACE TRIUMPHANT.

THE accounts from Japan, if not as decided as could be wished, and partaking too much of the character of rumour to justify complete satisfaction, are at least of a nature to create the impression that the assembled Daimios are converts to peace and commerce. That the punishment inflicted on SATSUMA by Admiral KUPER is altogether a stranger to this change is far from probable. The whole mass of that body of powerful feudatories were taught by the fate of Kagosima that none of the customary subterfuges of Eastern policy would be tolerated; that the penalty exacted for wrongs would be enforced on the perpetrator direct if the general executive showed symptoms of being unwilling or unable to do its duty. All the fire and fury said to be kindling at the time of the departure of the last mail has quietly evaporated, or, if smouldering, betrays little sign of heat or vehemence. The attitude of the TYCOON'S Government towards foreigners appeared to have received a decidedly hostile impulse immediately after the TYCOON'S visit to Miako; the benefits of extended commercial intercourse have made themselves felt, and the futility of attempting to cope in hostile array against Europeans arms has been sufficiently manifested.

At a recent council of Daimios held at the Imperial Palace it is understoood that it was decided to suspend any hostile movement against foreigners. The very members of the Daimios who voted on either side of the question are given us in accounts received at Paris, and though the Yokohama papers have no mention of it, our own private letters fully confirm the general statement that peace was in the ascendant at that important meeting. That such was the feeling is further shown by the circumstance that the restrictions on the silk trade have really been removed. The promise made by the Government to that effect has been carried out. The arrival of increased quantities in the Yokohama market is the best and most convincing corroboration of that fact. Indeed, the murder of the French officer is likely to confirm the feeling that it will be exceedingly unsafe to allow the warlike ardour of a few leading Daimios to hurry the whole nation into hostilities, sure to produce incalculable losses. The outrage in question appears to be the act of two or three lawless individuals, and is not, as far as we can learn, in any way defended or palliated by the Government.

THE TELEGRAPH TO INDIA.

THE *Cospatrick*, the last of the vessels comprising the expedition for laying the Persian Gulf cable—which we have already fully noticed—has been despatched with the shore end of the cable, and a variety of machinery necessary for laying the cable. Colonel Stewart, Sir Charles Bright (the electrician in charge), Captain Stewart, Mr. J. C. Laws, and Mr. F. C. Webb left by last mail to make the needful arrangements and superintend the operations which, if successful, will place us in telegraphic communication with Calcutta next March. When that is done, we believe Government intend to give attention to the best mode of continuing the wires to China.

SIR HARRY PARKES.

THE rumour alluded to in the last number of the *London and China Telegraph*, as we anticipated, is not correct. Sir HARRY returns to his post as Consul at Shanghai next month. From the important movements now going forward in the North of China it is very necessary that the Consular chair at Shanghai should be occupied by a person having experience consideration, and last, not least, a knowledge of the Chinese language. We are convinced that most of our troubles with the local authorities hitherto have been caused by misunderstanding. The Chinese interpreters employed in our Consular establishments to transmit our views and representations, do not understand English well enough to make them reliable mediums, is not correct, in so as for the appointment of Sir HARRY PARKES to relieve temporarily Sir F. BRUCE. Sir HARRY returns to his post as Consul at Shanghai next month. With regard to the leave of absence which we inferred Sir F. BRUCE had applied for, we may expect that the melancholy death of his brother, Lord ELGIN, will now render Sir FREDERICK'S presence in England necessary.

AN ANGLO-INDIAN VIEW OF THE CHINESE SITUATION.

SINCE our last issue the question of our future relations with China has received a remarkable and unexpected development at the hands of one of the ablest public writers of the day; and though we demur to most of his conclusions, yet we should be unfaithful to our duty of keeping our constituents duly informed of the views entertained on this momentous topic, did we abstain from canvassing the opinions entertained by so respectable an authority as Mr. MEREDITH TOWNSEND. Proprietor of perhaps the leading paper published in India, and the well-known conductor of one of the ablest, as it is the most moderate and philosophical metropolitan weekly, the opinions of such a man are well entitled to respectful consideration. We must not judge the pearl by the casket. The article in question, which is entitled "Shall we Conquer China?" appears in the December number of the *Victoria Magazine*, a periodical hitherto better known for its contributions on social science than for its solutions of great political problems. The medium employed has not been without its effect upon the author of the paper. Unlike his usual thoughtful style, the tone of the article betrays that happy mixture of racy description and dogmatic assertion which is the characteristic of the philanthropic school, whose organ the *Victoria* aspires to be. What little reasoning there is is based almost exclusively upon analogy, than which there can hardly be a more fallacious guide, especially where it is attempted to be applied to foreshadowing our own future relations with China. No one acquainted with the two peoples will agree that there can be any similarity between the Hindoo and the Chinaman, and if possible, yet less is the resemblance between the Sikh and the Sinensian. Moreover, Mr. TOWNSEND entirely overlooks the fact that the Chinese are a homologous race, ruled over, as he truly states, by some two hundred or so Tartars, aided by a Tartar army. India, from which he derives his illustrations, has for centuries past been a congeries of different races, all representing different conquests, and, by consequence, different modes of thought and life perpetuated among each successive tribe, and forming a barrier to commixture far more formidable than difference of speech. There are, according to some philologists, no fewer than twenty-seven different languages, *not dialects*, in India. In China there are but two languages, though one of these, the Chinese, has some eighteen known dialects. Hence, however, the recognition of caste and the difficulty of teaching are, and must continue to be, entirely unknown in China; and consequently even were there no other points of difference the power of imposing civilisation from above, which Mr. TOWNSEND'S long Indian experience has led him to believe to be impossible, must be vastly facilitated in the case of any really capable Government being established in China.

It is quite true that much will have to be done ere that day arrives. Wars, and rumours of war—perhaps even secret societies, which Mr. TOWNSEND justly denounces as the curse of all foreign Chinese communities—may spring up and flourish during the period of transition. But it is an old and well-founded reproach levelled at *doctrinaires* that they expect immediate results from their panacea, and that, unless such be clearly in prospect, and capable of being grasped by themselves, they are apt to forego their plain duty, and to fold their hands calmly with a sigh of "*non possumus*." Another serious drawback is that they are for the most part emphatically *doctrinaires*. They have no idea of natural causes being left to work out a problem. They must have first principles and a constitution as a basis to start from, and to this Procrustean bed they seek to adapt every argument and fact as it arises. We venture to say that the first bale of goods, which some enterprising member of one of the many chambers of commerce that have been re-

Digitized by Google

cently memorialising Government on the subject, shall import into Western China *via* Rangoon. will do more to impose our civilisation upon the Chinese than protocols, or cannon, or even the English common law, as administered in Hong Kong or elsewhere, where the Chinese can admire its efficiency. Mr. TOWNSEND is contemptuously cognisant of "the coarse materialism of the Chinese." Be it so. Let us accept that fact, and let it henceforth be borne in mind in all our future relations with the people. If they are such materialists, and we at least have never denied it, let us endeavour to gain their goodwill by supplying them with such merchandise as will minister to their actual wants, and not to their vicious luxuries.

Hitherto our chief articles of import have been silver and opium, representing the difference in value between our manufactures and their exports of tea and silk. Mr. TOWNSEND furnishes us with matter for profound thought on this head, for he points out that, assuming a wise protectorate, or let us call it at once government, the trade of China in proportion to population would amount to about £175,000,000 per annum, supposing it did not develop itself faster than that of India—and this, independent of the immense number of openings which would present themselves for the energetic middle and lower classes in so vast a population, requiring control and guidance at every turn. Viewing the homogeneity of the race, and its "coarse materialism," the probability is it would be vastly greater. Are we to forego these almost certain advantages, because they are materialistic? What does a philosophic mind like Mr. TOWNSEND's deem the best mode of proselytising among the heathen? Do not all men of sense know that the best of all modes of christianising is the example of self-respect and honest industry, and their accompaniment of smiling comfort, which makes the home of the missionary an oasis of plenty and an example to be followed by the ignorant heathen? Are we to forego this notion of comfort as a primary—perhaps the most important of civilising agencies, which we have ready-made to hand, as it were, in the case of the Chinese? Even Mr. TOWNSEND has to confess that other and higher things might follow. He admits that "if "the Chinaman thought certain mental improvements useful he "would probably grasp them;" and though Mr. TOWNSEND "limits "these to the employment of the Roman alphabet, the adoption "of useful political ideas, and a conception of the sacredness of "human life," yet let every well-wisher to the spread of the Gospel take courage, and believe a yet higher result is sure to follow from our protectorate or conquest or annexation of China —call it by what name we will. Without any of the vehemence that Mr. TOWNSEND seems to dread (though he allows that a Chinaman's religion is no burden to him), if we promote his physical well-being, and introduce the arts and civilisation of the west among these teeming millions, there is little fear but that Christianity will boast of a wider acceptance there than in any other portion of the world. It is a significant fact that Chinese converts, though as yet difficult to make, are by far the most unswerving. We should be sorry to rank Mr. TOWNSEND among the disciples of Professor GOLDWIN SMITH, whose political theories may all be summed up in five words, "Am I my "brother's keeper?"

But in fact Mr. TOWNSEND acknowledges that he is fighting a losing battle, for he devotes eight pages to a candid analysis of the benefits to be derived both by the Chinese and ourselves from our imposing our rule upon China, and two most inconclusive pages of analogies, which he advances as reasons why we should not accept the destiny which he half fears, and every person who knows China perceives to be on the eve of being thrust upon this country, unless we adopt the other alternative of accepting it. He points out with great clearness that we have in India alone the *cadres*, so to speak, for a well-drilled native army close at hand, all sighing for adventure. He states—but limited as is our space, he shall on the next point speak for himself:—"If Great Britain only wills it, the Anglo-Chinese will "impart a new vitality to every department of political life; "the revenue will be honestly collected; the fleet will clear "all coasts and dominate in all internal waters, the new "army will extirpate all rebels, the Anglo-Chinese will demand "and receive great satrapies, and then, weary of efficiency at "the extremities crippled by corruption at the centre, they will "strive for a Mayoralty of the Palace. The reigning class—"the high Tartar Mandarins—awake at last, will make one "desperate effort to retrace their steps, and *the British Govern-* "*ment* (the italics are our own) *must either step forward with irre-* "*sistible aid for the 'adventurers,' or submit to see China thrown* "*back into the anarchy they have striven to prevent, and their in-* "*fluence irretrievably ruined by a massacre such as expelled Chris-* "*tianity from Japan.* There is no chance of Englishmen puttin "up with the latter alternative, and the choice before them "therefore is really this—*to conquer China*, or, by refusing "permission to Englishmen to enter Chinese service, to stop "short in their war policy."

We must confess that we do not recollect reading so lame and impotent a conclusion as the second alternative, which, in his turn, Mr. TOWNSEND propounds to the British Government. He must know that such a policy would be entirely inoperative. It needs, as recent events both in this country and America have shown us, all the vigilance of the most Argus-eyed espionage on the part of a belligerent power, to prevent the Power with which it is at war from illegally recruiting in a neutral country. There is nothing in our municipal law, as it at present stands, to prevent any man from expatriating himself, even though it be with the avowed object of throwing off his allegiance, as we too well know in the case of Ireland for the past sixteen years. No such enactment could possibly be passed which should inflict punishment upon a person for entering the service of a foreign Power, so long as he did not bear arms against his own countrymen in the event of war. In fact, so curious is the law upon the subject that, provided we were at peace with China, one of Mr. TOWNSEND'S satraps might precipitate the final solution by getting up a misunderstanding with the BROTHER of the SUN, and invoking that protection from his own Government which he has not forfeited, so long as he has not actively renounced his allegiance. And considering that Mr. TOWNSEND himself recognises these men as "adven-"turers," they are just the class of men to adopt this policy. If he means that we ought not to suffer officers holding Her Majesty's commission, or that of any duly constituted authority representing her, to enter the Chinese service, we must point out, without arguing the question of how far such a proceeding is dignified in the individual or fair to those whose promotion he is stopping while pushing his own private fortune in another service, that it would be unjust that military law or custom should be strained to preclude the right of any British subject to employ his time and talent in whatever way he may deem most advisable, so long as he is not engaged in hostilities against the land of his birth. But, in truth, these dangers are chiefly hypothetical. The employment of Anglo-Chinese proconsuls and officials would afford the surest guarantee against the outbreak of war with this country. So great a prize might embroil us with envious Powers *without*, but *within* Mr. TOWNSEND allows that all would be tranquillity and prosperity. Whether is it better that such a reorganisation should be effected by ourselves or by Russia?

Curiously enough, though one would think there could be but one answer to this, Mr. TOWNSEND contrives to involve himself in a dilemma. He states what is very true as regards all Asiatic races, that there is a something in us which makes them "regard us with a sort of respectful loathing." We distinctly repudiate this observation so far as regards the Chinese, while acknowledging it to be a fair statement of the case as concerning all other Orientals from the Bosphorus to the Gulf of Tonquin. The reason is not very difficult to find. Mr. TOWNSEND himself states it, when he says that—we again extract—"Conquest being the "easier course, it is by no means clear that it would not be to "China the more beneficial one. The vast population of that "empire are not breaking with their past life in pursuit of a "new idea. They are not in the throes of a war birth, either "in religion or politics, or social organisation. For all that "appears they are quite content as a people with the form of "civilisation which they have elaborated, and only ask that it "should be suffered to remain intact. They require only an order "amidst which their life could always go on as it has always gone "on,"—a theory of Government, which, as we have seen, is all that is bargained for by those who are anxious that the great problem of a Chinese Protectorate, under whatever form, should be accepted at once. In short, we propose that the Chinese be admitted to be the "coarse materialists" they are here represented. They have, in fact, no sentiment, and in so far they have no quarrel with the matter-of-fact side of JOHN BULL'S character, which is confessedly all they have to do with. In fact, in proportion as only this side of our national character is brought into view, we shall succeed with the Chinese as we failed with other orientals. These have each its own history of grand deeds, a literature, a religion more or less ascetic—in a word, they can look back and must be depressed in the retrospect. They

Digitized by Google

have been conquerors, they have been poets, they have been founders of grand religious ideas, which have exercised an important influence upon history. What can China show? She has obtained a footing in Central Asia by that same mode of forcing commercial enterprise which has signalised our own relations with herself. With such a people similarity of policy will produce the same results. It is because JOHN BULL has another side to his character, which the prouder, more sentimental races of Asia never have a chance of beholding, that we ought to wish to see China reorganised under English auspices. And as though to fortify this our own line of argument, Mr. TOWNSEND thereupon favours us with a sketch of China re organised upon the Russian model, for the insertion of which we are at a loss to account, if he really is in earnest in his advice that we should pause in time before committing ourselves to such a work. He has virtually admitted that reorganisation is necessary; he has studied the question so thoroughly that while on the one hand he conjures up what he conceives to be the dangers, on the other he points out the benefits that would accrue both to ourselves and the people who are soliciting our aid, and depicts in no exaggerated colours the unpleasant position of our merchants in China, exposed to Muscovite corruption and peddling mismanagement, and then—he turns round and recommends that we should prevent Anglo-Chinese from reorganising China, while admitting that, if *we* do not reorganise it, Russia will and must, in which case our merchants would be subjected to such restrictions that we should have a war with Russia in China (if not on the Bosphorus as well) so soon as her restrictive policy began to make itself felt!

We have but one more point to notice, being the only other remedy, Mr. TOWNSEND suggests, for events which he believes we are powerless to prevent. He concludes a most readable article by suggesting what we ought to do:—"We may" (he says) "guard the treaty ports till order has been restored, *out-*" *law every Englishman* who takes service in China *without the* "*permission of the Embassy* (!), and negotiate with the Govern-" ment for the only bit of soil which would enable us to influ-" ence China without being dragged into incessant extensions " of territory—the island of Chusan." (! ! !)

We have already vindicated the right of any Englishman to take service where he pleases; and protest with all the vehemence in our power against such unheard-of powers being entrusted to an Embassy as is here advocated. As to guarding the treaty ports till order is restored, it is simply begging the question, for the whole drift of Mr. TOWNSEND'S article goes to show that whichever side can engage Western discipline must win; and as there are plenty of adventurers to supply this *desideratum*, whether outlawed by the Embassy or not, it becomes simply a question of re-organisation, and also whether this re-organisation is to be effected by authority, as we recommend, or to be left to "adventurers" to carry out (which Mr. TOWNSHEND does *not* recommend any more than ourselves), or, lastly, whether we are to fold our hands to the song of "Am I my brother's keeper?" As to the notion of occupying Chusan, we are sorry that so accomplished a writer does not pause before committing himself to recommending a question of detail. State general principles, but if once the attempt is made to specify what to do, and how to do it, cavillers must of necessity start up, and the question we need hardly say is in far too embryonic a condition at present to admit of any such off-hand solution. In the present instance it is no exaggeration to say that a more singularly inappropriate spot for occupation as a point of observation, in the excise of moral influence, could hardly have been named. It would require great expenditure even to enable a garrison to live there, and it would fail utterly in impressing the Chinese, who will not see beyond their noses. Remonstrances from Chusan would certainly command no more respect than from Hong Kong, and of course Mr. TOWNSEND means that our AMBASSADOR should remove from Peking to Chusan.

We quit the consideration of this in many respects able paper with the profoundest respect for the great talent of its accomplished author. But it was absolutely necessary that we should refute the many glaring incongruities into which he has been led by a too strict deduction of analogies, unmindful of the immense gulf which separates the Chinese from every other known race. To say that we cannot manage the Chinese is to ignore every day experience. None can know better than Mr. TOWNSEND the difference between managing a people and managing their rulers. If such an axiom hold true in a semi-feudal, highly-sensitive race like the Hindoos, it must hold doubly true in such a corrupt system as that of Chinese Mandarinism. We most of us have seen the well-known caricature of the social edifice of China, in which EMPEROR, Tartar, and grades of Mandarins are all piled one above the other, the inverted apex of the crushing pyramid being the patient, industrious, good-humoured, ingenious Chinaman, who only wants to be treated to bread instead of stones, to such facts as Manchester bales instead of *doctrinaire* ideas, and to become acquainted with the better and higher side of the English character, to become a hearty, happy *collaborateur* in the great work of humanity; to embrace Christianity more or less gradually; to be self-supporting and self-defending; and to add one more, and the most illustrious, testimony to the vivifying and renovating powers of commercial enterprise advancing hand in hand with free institutions wisely adapted, and cautiously modified as circumstances may require.

THE DEATH OF LORD ELGIN.

The intelligence of the death of Lord ELGIN was received on the 11th inst., in the following telegram, at the India Office:—"Lord Elgin died at Dhurumsalla at 2 A.M. on the 20th Nov, and was buried privately upon the following day, in accordance with his own express desire." His successor, Sir JOHN LAWRENCE, left by the last mail for Calcutta. The eldest son, VICTOR BRUCE, now at Eton College, who succeeds to the earldom, is, we believe, in his 15th year. The following is from *The Times*:—

Lord Elgin dead! The news comes with frightful speed in the wake of losses fresh in memory. Three Governors-General in succession—first Lord Dalhousie, then Lord Canning, last, Lord Elgin, fall sacrifices to our Indian empire. In the same connection we think of Lord Clyde, of Mr. Wilson, of Havelock, and many more. Still in this connection we are painfully reminded of another illustrious victim to the toils of office, Sir George Lewis, who belonged to the same college, Christ Church, as the last three Governors-General of India; and Sir George Lewis reminds us of his predecessor in the War-office, Lord Herbert. Although the suddenness of the disaster would lead to the supposition that Lord Elgin was struck down by one of those rapid diseases which are incidental to the Indian climate, there is ground to believe that this was not the case, but that we must attribute his loss more directly to his public cares. He is known to have been suffering from heart complaint; he had gone to the hills at that period of the year when Indians generally seek for relaxation; he had just been over a pass 13,000 feet high; and he had complained of the effect of the mountain air on his breathing. It was soon after this exploit that his ailment manifested itself; and the inference is that it is in these circumstances we are to look for an explanation of the unexpected calamity which we now record.

Lord Elgin traced his descent to the Bruce whose name he bore, and he was son of that Earl who brought the Elgin marbles to England. The son of Scottish parents, he was born in London on the 20th of July, 1811. He was educated at Eton, and from Eton he went to Christ Church, where, as lately we have too often had to repeat, he was one of the distinguished band of scholars and statesmen, including Sir George Lewis, Lord Dalhousie, Lord Canning, and Mr. Gladstone, who were reared in that celebrated seat of learning. He was of the first class in classics in 1832, and subsequently he became a Fellow of Merton College, being then known in his father's lifetime as Lord Bruce. We hear little more of him till 1841. In that year he married; he entered Parliament as member for Southampton, and as a supporter of Sir Robert Peel; and he succeeded to the earldom, which being a Scotch peerage did not interfere with his seat in the Lower House. The general election of 1841, which sent Lord Bruce to Parliament, raised Sir Robert Peel to power, with Lord Stanley as Secretary for the Colonies. Sir Robert Peel and Lord Stanley were both scholars and statesmen, trained in Christ Church, were both prepossessed in favour of the new comer, and in 1842 offered him the Governor-Generalship of Jamaica. In noting this fact, we are reminded of a scene which many years afterwards took place in the House of Lords. It was the first night of the session of 1859, and the first appearance of Lord Elgin in the Upper House after his return from his successful mission to China. In the debate which then occurred, Lord Derby and Lord Grey contended with generous rivalry for the honour of having first introduced Lord Elgin to official life. "My Lords," said Lord Derby,—

"I cannot pass over the subject of the treaties that have been concluded with China and Japan without expressing what has also been so well expressed by my noble friend behind me, approval of the course which has been pursued by her Majesty's plenipotentiary. It is a peculiar satisfaction to me to have seen Lord Elgin, who was appointed by my predecessors in office, discharge his functions with so much zeal, skill, and ability, because it so happens that I was the first person who had the satisfaction to introduce Lord Elgin into public life.

"Earl Grey: I beg your pardon, my Lord—I made the appointment.

"Earl of Derby: I beg my noble friend's pardon. I recollect giving him his instructions before he went out.

"Earl Grey said that it was not so. On his coming into office he thought the state of Canada was such as to require a person of civil experience to administer its affairs, and accordingly Sir George Cathcart was recalled and Lord Elgin appointed Governor.

"Earl of Derby: Whether I am in error or not does not in the slightest degree alter my feeling of satisfaction at the manner in which he has discharged his duties or my personal friendship for him."

It must have been not a little gratifying to Lord Elgin to be the object

Digitized by Google

of this pleasant rivalry. Lord Grey was quite right in claiming the honour of having sent him to Canada; but Lord Derby had sent him previously to Jamaica, and therefore was the first to introduce him to public life. In Jamaica Lord Elgin had no easy task, but he acquitted himself so well that when, in 1846, the Whigs had to seek out the ablest man they could find to be Governor-General of Canada, they pitched upon Lord Elgin, notwithstanding his Tory connections. The truth is that the Tory party was now for a season broken up, and that the Whigs might without fear turn to some of the Conservatives for assistance. Lord Elgin fulfilled its duties with consummate tact. He carried out in Canada the conciliatory policy of his father-in-law, Lord Durham, and by preserving a neutrality between parties, by developing the resources of the country, agricultural and commercial, and by seeking in every possible way to study the wishes of the colonists, he, in a reign that extended over eight years, did more than any man to quell discontent and to knit the Canadian provinces closely to the mother country. He was so successful that in 1849 he was honoured with a British peerage.

The next office which he was called upon to fill was that of ambassador to China. It was on his way thither that he heard of the Indian mutinies; at once on very slender information he divined the importance of the crisis, and took upon himself to divert to Calcutta the troops which had been ordered to China in support of his mission there. This is one of those acts of rapid decision, of official courage, and of unselfish thought, which historians will ever delight to remember. He passed on to China, and though, by this act of unselfishness, his progress was delayed, yet in the end, as we all know, he succeeded in his aims; he saw Canton taken, and he negotiated the important treaty of Tien-tsin with the Celestials, which forms the basis of our present relations with them. It was a great triumph, and though there had been much bitter contention as to the policy of Lord Palmerston in prosecuting the Chinese war, yet its successful issue seemed to gratify all parties alike; and that scene which we have described as taking place in the House of Lords in February, 1859, will show that the opponents of Lord Palmerston, not less than his supporters, were anxious to do honour to the British Plenipotentiary. Not to repose, however, did Lord Elgin return to this country. In the summer of 1859 Lord Palmerston entered upon office once more, and Lord Elgin became a member of his Cabinet, with the duties of Postmaster-General. What followed it is almost needless to recount. The brother of Lord Elgin, Mr. Bruce, had been appointed our envoy in China, and in accordance with the treaty he ought to have been received in Pekin. Access to the capital, however, was refused to him, save on conditions which were considered derogatory to the British representative, and when we insisted on the rights secured to us by treaty, there ensued the disaster of the Peiho. Forthwith, in 1860, Lord Elgin was despatched once more to sustain the English authority, and he thoroughly fulfilled his mission by entering Pekin in state, and compelling the submission of the Celestial chiefs. Scarcely had he gained this triumph than he was appointed to succeed Lord Canning as Governor-General of India. When he accepted the post his friends remembered how the two previous Governors, his college friends, had suffered from the severity of their labours in an oppressive climate. It was felt, at the same time, that so much misfortune must have its interval of brightness, and it was hoped that Lord Elgin might escape. If, as we fear, he has fallen, he has fallen in harness; but he has had the satisfaction of seeing India grow in prosperity under his rule, and hold out expectations which for years past we have not dared to entertain. All through his life he was successful in his undertakings, and he was successful at the last. He owed that success not so much to great genius as to good sense, to social act, and to a love of hard steady work.

COURT FOR DIVORCE AND MATRIMONIAL CAUSES, DEC. 10.

(Before the JUDGE-ORDINARY *and Special Juries.)*

KING V. KING AND DENT.

This was a petition by Charles John King for a dissolution of his marriage with Fanny Rosina King, on the ground of her adultery with Wm. Dent. The respondent and the co-respondent pleaded a denial of the charge of adultery contained in the petition, and the respondent further alleged that the petitioner had been guilty of connivance and of conduct conducing to the adultery if it had been committed.

The Queen's Advocate and Dr. Swabey appeared for the petitioner, Dr. Spinks for the respondent, and Mr. Coleridge, Q.C., and Dr. Tristram for the co-respondent.

Dr. Swabey (in the absence of the Queen's Advocate at the Privy Council) opened the case. He said that the petitioner was the son of the Rev. W. Moss King, rector of Long Critchill, near Salisbury. The petitioner was a merchant, and for some time previous to 1856 he was living in China, where his business was carried on. In that year he married the respondent, who was the daughter of Mrs. Sullivan, a widow. Mrs. Sullivan had since remarried, and was now Mrs. Gingell. The co-respondent was an old family friend of the Sullivans, and, as it afterwards appeared, he had obtained a hold over the affections of Miss Sullivan, which had led to unfortunate results after her marriage. The feelings with which she had married the petitioner would probably be explained in the course of the evidence. At the time of the marriage Mr. King was not acquainted with Mr. Dent, and he first met him at Macao in 1857, when they were on their way to England. There was reason to believe that even then, a year and a half after the marriage, Mr. Dent had availed himself of his knowledge of Mrs. King's affection to induce her to be unfaithful to her husband. She was not more than eighteen when she married, and Mr. Dent was considerably older. In 1856 they had had a child, which did not live above a week. After their arrival in England Mr. King, whose affairs were not in a very flourishing condition, passed a good deal of time with his wife at the residence of his father at Long Critchill. They occasionally visited London, Bath, and other places. In April, 1858, a second son was born, which died in the following September. Their first meeting with Mr. Dent in England was at Bath in November, 1858. Mr. King was aware that Mr. Dent was an old friend of the family, and entertained no suspicion that there was any danger in the intimacy between Mr. Dent and his wife. In October, 1859, when they were staying at Long Critchill, a third child was born, and a girl named Smith was engaged as its wet nurse. In the early part of 1860 Mrs. King went to stay for a short time at Weymouth, as her health required change of air, with the nurse and the child. Mr. King was not able to accompany her, and evidence would be given that Mr. Dent had met her at Weymouth, and that they were on terms of guilty intimacy and familiarity. In March, 1860, Mr. King went to Shanghai to resume his business in partnership with another gentleman, and it was arranged, for various reasons, that Mrs. King should not accompany him, but should join him in the course of a few months. Several letters had been written by her, from which it appeared that her husband was most anxious that she should go out to him as soon as possible, and that she gave various reasons, such as the state of her own health and the youth of the child, for delaying her departure. After Mr. King had left, Mrs. King passed several weeks at Long Critchill, and also stayed occasionally at Bath and in London. As early as December, 1859, something had occurred which had induced her husband and his family to attempt to put some check on her intimacy with Mr. Dent, for on the 24th of December, 1859, she wrote a letter to her mother-in-law, in which she used the following expressions:—

"I think it but right to tell you, as I gather from Charles's letter which he read to me this morning, that you are all labouring under a mistake in thinking or appearing to think that my correspondence with Mr. Dent ceases with either my consent, wish, or approval; and therefore knowing this it remains with you whether you under such circumstances, still desire my return to Long Critchill even on a visit for as short a time as possible. . . That apart from the interference with my friends and friendships I have ever considered yourself and Mr. King most kind and affectionate, I beg you to believe and at least give me credit for; but no kindness or obligation would induce me to submit to my private affairs being meddled in as they lately have by my husband's family, who, if they disapprove of my conduct, are at liberty to show their displeasure by putting an end to my intercourse with him; but, on the other hand, if still disapproving, they still are on terms of friendship and affection, they must be content to allow my husband to alone take any part in ruling my actions. . . . I entreat you to believe that I have, and ever shall, appreciate to the fullest extent your kindness, care, and affection, which, saving one action, has been unbounded."

In 1861 she made a confession to her mother-in-law that she had loved Mr. Dent from her earliest years. Her mother-in-law remonstrated with her, and in September, 1861, in consequence of th se remonstrances, she left Long Critchill for the last time. She afterwards lodged at different places in London, and in March, 1862, she was staying with Mr. and Mrs. Guerin, who lived near Hayward's-heath. She there heard that Mr. Dent was living with another woman; her jealousy was aroused, and she immediately went to town in a state of great agitation. So great was her distress and anguish at the news of Mr. Dent's conduct that on two occasions soon after this occurrence she took poison. Mr Guerin came to town and had an interview with her, and at her earnest desire he communicated to her husband's family that she had confessed her adultery with Mr. Dent. When the Rev. Mr. King, the petitioner's father, was informed of what had occurred, he came to town and instituted proceedings in the Court of Chancery, for the purpose of making the child a ward of that court, and it had since remained under his care. For some time Mrs. King was in such a state that, under medical advice, nurses were engaged and she was placed under some restraint in order to prevent her from attempting to poison herself. The learned counsel then read passages from several letters written by Mrs. King to her husband after his departure for China, in which, in answer to his urgent requests that she would come out to him, she spoke of her ill-health and the tender age of her child, and the unsettled state of affairs in China, as reasons for remaining in England. One of the latest of these letters, dated Feb. 17, 1862, contained the following passages:—

"My dearest Charlie,—Yesterday I received your long letter of 22nd and 25th December, and am sorely grieved to think how dreadfully my next mail's letters will have disappointed your hopes. All last night I was awake crying, so bitter is my sorrow for you, poor Charlie. You have never understood me, and never will, I fear; and if I may make use of such a word, without intending it to convey to your mind the least glimmer of reproach, you have mismanaged me, and have been sadly misadvised as regards me. That, however, is done, and now cannot be undone, for it has made impressions that now cannot be rooted out, and has sown sorrows that must ever be fruitful; but for all this I never complained but to my own heart, or to anyone but your own mother and sisters, who, I cannot help feeling, have greatly helped to embitter my life by interference. You have been most kind and indulgent, and until you came within reach of your family most loving and affectionate, as well as attentive and considerate, for all of which I shall ever feel grateful and love you in my own odd way. There is not a creature living who knows one hundredth part of my sorrows, the conflicting struggles of my heart and its misery, which often bows me to the ground; perhaps if there were I might meet with some sympathy and less blame, but I covet neither, and am content to live enveloped in my own dark cloud until it shall please God to disperse it. You seem to think that I groan under the weight of poverty or faded fortune. How wrongly! for I believe that before God, with the sincerest truth, I may say that it has never for a moment even brought a regret of an hour's duration, and has rather made me feel how doubly I should love you to mitigate the loss of fortune which must be more deeply felt by you than myself; so rest assured that loss of money has no part in my heart's sadness, and you must not think any more that in my heart I have ever accused you of an unloving action emanating from yourself. That you have done many unwise things, and even unkind, I will admit to you; but they were not the dictations of your own heart I know too well, and so forgive them from the bottom of mine. You cannot think how I regret having promised to come out in March, seeing my utter inability to perform it; but I was so persecuted by your family that I felt any sacrifice would be slight to get away from them. My illness shortly after writing that letter, and my continued delicacy ever since, render me utterly unfit to dream of leaving England next month, nor, to at once tell you the sad

Digitized by Google

truth, do I entertain the least hope of my ever being fit to undertake the voyage . . . . . .
But now let me try and pour a little comfort into that poor wounded heart, for I think you perhaps grieve unnecessarily. If you love me as devotedly as you say you do, it must be some comfort to know that I am your wife, by law your property 'till death us do part,' and, although my wretched health will not admit of my going out to you, I am here for you whenever you can leave China to join me; and, although, dearest Charlie, I dare not deceive you so wilfully by telling you that I love you with the passionate love my heart is capable of loving, I do love you quite as much as hundreds and thousands of wives love their husbands, and more, perhaps, for I grieve that I cannot love you better, and this is why I never try to add to your sorrow by encouraging the growth of your affections, for it only adds to the bitterness of my soul; and I feel sure that even you, dear Charlie, from whom I withheld the great powers of love that God has given me, will forgive me for my candour, and bear with me, and even love me still, for, whatever are my faults, my sins, my sorrows, I am yours and the mother of your poor little children. Let us both, then, try to bear the present trials with patience, resting on the promise of mercy and deliverance from on high in His own good time.

"F. ROSINA KING."

The following letter was the first in which she confessed her guilt to her husband:—

"2, Langham-place, Portland-place,
"May 25. 1862, Sunday.

"Charlie,—Dare I ask your forgiveness, having so cruelly wronged you by giving to another all that gentle love and devotion which should, and could, have been your own for ever? But I did not wrong you willingly, or without bitter tears and deep remorse long felt; but I will spare him, even though he has ruined and forsaken me, and forgive as I hope to be forgiven. You will hear much, both true and untrue, of me, and in the first blow of your grief you will forget mine; but when you think more patiently and calmly over your own deep sorrows, then think of me and pity me. Think of me, young and almost friendless, bowed down with a double sorrow, remorse and shame, and broken-hearted to go through life henceforth unloving and unloved and shunned by all mankind. Oh, God! my sin is great, but surely my punishment is greater. Yet I now must live to reap what I did not wholly sow, and bid adieu to hope and happiness for ever. You will hear what I was driven to attempt in the agony of despair, and also what steps your father has taken since. True, his conscience may justify him as having done his duty before God and man, but how harshly has he performed his duty, and had it not been for Mr. V—— would have had me sent to a lunatic asylum. The wrong I have done you, my gentle husband, whether you forgive me or not, I shall mourn over for the remainder of my life, and would, God knows how fervently, on my knees implore your dear pardon, and promise in all things to obey you henceforth, except in submitting to the control of your family, for, wrong as I have been, cruel as my conduct to you has been, Christian pity, a clergyman's duty, should have led him to have comforted the afflicted and erring, as well as sent two keepers to watch over a broken-hearted, but not insane woman. For you, dearest Charlie, I feel the tenderest pity and deepest sorrow, and to wash away my sin and restore your happiness would, how gladly, devote my whole life, but love at present I have none left to offer All seems torn from my heart with his cruel cruelty, and I will not deceive you by saying I have a heart to love. No; all feeling has left it. Sorrow or joy can enter it no more. Pitiable, indeed, is both your and my fate; but you are a man, and the world will smile on you just the same. I am a woman, shunned and forsaken by all but dear Mr. and Mrs. V——, and the Guerins, and perhaps may, ere long, be destitute, as I am desolate. O my poor father, could you look down on your only child and see her bleeding and broken heart, and blighted life, you would indeed say it were better she had never been born! . . . I will not prolong this painful letter; it is more than either can bear; but, in conclusion, will only ask you to let your own heart judge me, and condemn or forgive as it dictates; but by the memory of our dear little boys and all I have suffered and am suffering to be guided in this matter by none other's will and opinion but your own: for, Charlie, though I feel nothing but love and gratitude to you for all your patience and indulgence you might have spared me this; but I forgive you, for it was over-indulgence that has been my ruin. I fear from what I hear your father imagines a great deal to have been said and done which is quite false, but as I hear nothing from him I am quite ignorant of all that he is doing. On Tuesday the keepers are to be sent away, and I set at liberty, immediately after which it is my intention to let the house, and with baby, and Smith, and a companion go abroad and live in some quiet little place until I hear what you determine about me. Meanwhile, rest quite sure Mr. Dent and I shall not meet, and that I shall behave as becomes a lady and your wife. My sole reason for leaving England is that I feel change of scene to be essential to divert my over-burdened mind, and there, among strangers, I may not be quite shut out from all intercourse with my fellow-creatures; but were I to remain in England I should have to live shut up in four walls, and, perhaps, really become what many have tried to make me a maniac. God grant you strength and patience in your heavy affliction, and put into your heart His will and pleasure concerning

"Your truly penitent and miserable wife,
"FANNY ROSINA KING."

"I shall write you by every mail till hearing how you determine upon acting. You took me for your wife without consulting your father or any other person; act now in the same way, and whatever is your determination I feel will be just and right. "ROSINA."

There were one or two other letters of the same kind. In conclusion the learned counsel said that after writing such letters as these it was to be regretted that Mrs. King had been advised to plead that her husband had been guilty of connivance and misconduct. The correspondence showed that she had no complaint to make against him, and that the only complaint she had to make against his family was that they had endeavoured to check her intimacy with Mr. Dent.

Mr. Hancock, a clerk in the foreign department of the General Register Office, was called, and produced a duplicate register book of the marriages celebrated at Foo-chow-Foo, in China, containing an entry dated the 1st. of April, 1856, of the marriage between the petitioner and the respondent.

Mrs. Elizabeth Margaret King said,—I am the wife of the Rev. William Moss King, rector of Long Critchill, and the mother of the petitioner. On the 3rd of December, 1857, Mr. and Mrs. King came to Long Critchill, and stayed till February, 1858. They came again in October and stayed for a few weeks, and then they joined Mrs. Gingell at Bath. They came again at Christmas, 1858, and in April, 1859. In October, 1859, the child was born. In November, 1859, my son had business to transact, and they went to London, and lived in Upper Baker-street. In January, 1860, Mrs. King went, for change of air, to Weymouth, with her nurse and the baby. In March, 1860, my son went to Shanghai. They lived on very good terms indeed during all the time I have seen them together. My son has remained in China ever since 1860, and is there now. Mrs. King did not accompany him, because he was embarking in a fresh business, and had very little means, and the tender age of the child would have made it necessary to take a wet nurse. It was therefore arranged that she should join him in the autumn of 1860. He left her with us, and she stayed with us for some weeks and then went to Bath. She came back to us in July and stayed till October, with the exception of a short visit to Swanage in August for change of air. I have never seen Mr. Dent. He has written to me once. In October, 1860, she went to Bath, and stayed till May, 1861. She stayed with us for a fortnight at Christmas, 1860. I wished her to join her husband in October, and she sent a letter from a medical man saying that she was not equal to the journey. I talked to her about going on several occasions. I wrote to the medical man she had named, and he told me in reply that she was quite equal to going if she took care of herself. She was very angry when she heard of it. In May, 1861, I saw her at Oxford-terrace, Notting-hill. She then went to Somerset-street, Portman-square. In July she came to Long Critchill, and stayed till October. I urged her to go at once to her husband. She then confessed to me her early attachment to Mr. Dent. She told me that he was the only person she had ever loved; that she had attached herself to him ever since she was thirteen, without the slightest return on his part; that he had said he should never marry, but if she ever thought of marrying she was to write to him, and he would inquire about the character of her intended husband; that some one had proposed to her whom she did not care about, but in order to test Mr. Dent she had written to him; that he replied he knew something of the gentleman, and he strongly advised her to marry him; and that she was very angry, and consented to marry Mr. King, with whom she had unfortunately become acquainted in the meantime. I never for a moment supposed that there had been any criminality between her and Mr. Dent, and I urged her as strongly as I could to join her husband. She often told me that Mr. Dent was the oldest friend of her and her mother, and she looked upon him as a sort of guardian, and all her property was lodged in his firm, and he arranged all her affairs. On one occasion she acknowledged she had seen Mr. Dent. When my son went away there had been an understanding with her that she should never write to Mr. Dent or see him. I wrote to Mr. Dent in consequence of what she had said to me, and received an answer from him. (In this letter, which was read, Mr. Dent merely acknowledged the receipt of the letter from Mrs. Moss King, and expressed his readiness to have an interview with her.) In October, 1861, Mrs. King went to Cornwall, and I never saw her again. Her only living child has been with me since October, 1862. Mrs. Moss King also proved the respondent's handwriting in which the letters had been read.

Cross-examined by Dr. Spinks.—I saw her twice when she was lodging at 16, Somerset-street.

Cross-examined by Mr. Coleridge.—I did appoint a time to see Mr. Dent. I had no answer to the letter making the appointment.

Elizabeth Malcolm was called, and objected to take the usual oath on the ground that she was a Scotch Covenanter. A special form of oath was accordingly ministered, which she took, holding up her right hand. She said—I went into the service of Mr. and Mrs. King as nurse on the 24th of April, 1858. Their child was a fortnight old. They lived in Chapel-street, Grosvenor-square. In November, 1858, I went with them to Bath. At the railway-station Mrs. King exclaimed, "There is William Dent." Mr. Dent joined them in the carriage at Bath. They lived at 4, Oxford-road, the house of Mrs. Gingell, her mother. Mr. Dent came there constantly to see Mrs. King. She was mostly out with him. He left Bath a few days before them. They stayed a fortnight. We came to London. Mr. Dent met us at the station. We stayed at Radnor-place for a fortnight. Mr. King was away all day at his business. I have seen Mr. Dent at the house. In January, 1859, we went to Cadogan-place, Chelsea. A week or two after I told Mrs. King it was not proper for her to go out of the house so much. She was always out. She gave me no particular answer. We went to lodgings in Sloane-street in February, 1859, and stayed about ten days. Mr. Dent was there all day mostly. Mr. King used to go to the city, and did not come home to dinner till about six o'clock. Mr. Dent generally stayed till Mr. King came home, but I have known him go away half an hour before and come back to dinner afterwards. I remember once going to the back drawing-room door and pushing it with my foot to open it, as I had some things in my hand. It partly opened, as if an empty chair had been put against it. I then heard a noise as of some one sitting down in the chair. I again pushed the door, and it opened, and I went into the room. Mrs. King was sitting in the chair very near the door, and Mr. Dent was standing close to her, looking down at the carpet. She afterwards came upstairs into my room. I have known her come upstairs and change some of her clothes when Mr. Dent has been there. When any one else called to see her, Mr. Dent would not show himself to them, but would go into a water-closet half-way down the stairs. Mrs. King gave me orders that no one was to be allowed to come in when Mr. Dent was in the house. We next went to lodgings at Hans-place, and stayed about six weeks. I then left their service on the 10th of April, 1859. Mr. Dent came to Hans-place daily, as he had done to the former lodgings. I have heard the doors locked and unlocked when Mrs. King and Mr. Dent were together in the room. In April, 1861, I took lodgings for her in George-street. A little girl and a servant were with her. In less than a week they removed to Oxford-terrace, and

Digitized by Google

about a week after they went to 16, Somerset-street, and stayed there till June or July. I saw her every week, sometimes oftener. She complained of being so large in size. I said, "If Mr. King were in England I should think you were in the family way, but it will not do to say so now." She laughed, and made no answer. In December, 1861, I saw her in Manchester-street. One evening she and Mr. Dent were together for a long time in the front drawing-room with the doors locked.

Cross examined by Dr. Spinks.—In Hans-place I was employed as her maid. The baby was dead. She told me to tell the servants not to admit people when Mr. Dent was there. He went into the water closet once in Sloan street and once in Hans-place. He came frequently to dinner when Mr. King was there.

Cross-examined by Mr. Coleridge.—It was three or four days after we went to Sloane-street that I found the chair against the door. That was the first day she walked upstairs without assistance. She had been ill, and Mr. King had carried her up and down before that. She came upstairs three times on that day, and went into her own room. She merely "looked condemned," and said nothing. I was with her for eleven months and a fortnight. Mr. King had gone to China when she was in Somerset-street.

Jane Smith—I am the nurse of Mrs. King's child. I went into the service of Mrs. King on the 12th of October, 1859, at Long Critchill, as wet nurse. In January, 1860, I met Mrs. King at the Wimborne station, and went with her to Weymouth. We went to the Royal Hotel, and engaged two bedrooms close to each other. Soon after our arrival a gentleman came, who gave the name of Captain Denman. She called him "Willy," and told me his real name was Dent She said he was her friend, and came to see her, and there had been some dispute about him. When he arrived he went into her bedroom. The next day they went out together to look for lodgings for her, and they took a dining-room floor at 4, Royal crescent, three rooms opening one into the other. The back room was the bedroom. Mr. Dent came there in the evening. She sent me to bed a little earlier than usual, and said I need not wait to undress her She called me early the next morning, and told me to put on my bonnet and shawl and to go out, because then Mr. Dent could get out. She also said she was so nervous and timid that she did not like to sleep by herself in the dining-room floor, and that Mr. Dent had stayed in the house during the night. She did not say where he had slept. By the time I had got down stairs Mr. Dent had gone away. She had said I was to go out first, in order to unfasten the doors for him. She also told me I had better tell the servant of the house not to say anything to her mistress about it. We were at Weymouth a fortnight, and Mr. Dent came daily, but did not again sleep in the house. I heard a noise of kissing one day when they were in the dining-room. and I also heard Mr. Dent say, "Good morning, ducky." From Weymouth we went back to Long Critchill, and in March Mr. King went to China. Mrs. King told me to direct envelopes to myself, so that Mr. Dent might enclose letters to me for her in them, because Mr. King had forbidden her to write to him. In April we went to 4, Oxford street, Bath, and occupied the drawing room floor and two bedrooms. Mr. Dent came there and slept in a room adjoining Mrs. King's. In June, 1860, we went to Weston-super-Mare for about a month, and then to Duke-street, Manchester-square, for a fortnight. Mr. Dent called frequently. Once or twice he stayed until after I had gone to bed. We then went to Long Critchill. Mrs. King told me I was not to say I knew such a person as Mr. Dent. In January, 1861, we went to Bath. Mr. Dent visited her there as before. In May we went to George-street, Portman-square, and thence to Oxford-terrace, and thence to 16, Somerset-street. Mr. Dent used to come to dinner at all those places, and to stay till a late hour. She said Mr. Dent was to be admitted whenever he came, but no one else was to be admitted without asking her. She sometimes changed her clothing when Mr. Dent was coming. In December, 1861, we were at Manchester-street, and we went from there to Brooklands. She was then much larger in size than usual. She has said to me that she was very sorry to grieve Mr. King, for he was a very good husband.

Cross examined by Mr. Coleridge.—She made herself ill at Bath, and then went to see a doctor to ask if she was fit to go to China. He persuaded her to go. She said she would not go, and that she would take some medicine to make herself ill. Then the doctor came to see her, and said she was not fit to go. I do not know that any operation was performed on her by a surgeon. I never thought her very ill, Mr. King was in London while she was at Weymouth I never saw Mr. King and Mr. Dent together. I don't remember whether any of Mr. King's family ever came to spend the day with her in London. They were urging and pressing her to go to China, and her husband was expecting her by every mail. She has said she would never go out. I left her service last year, when the little girl was taken from her. I went with the child to Mrs. King's In Langham-place she was very ill indeed, and took chloroform. There were two nurses with her. She seemed unhappy, but only for a very short time. That was before she took the poison. She was not unhappy after she got better. She was distressed when she went to Somerset-street. I always thought she had a good constitution.

Re-examined.—She was unhappy because she had heard something about Mr. Dent keeping a mistress.

Mr. Guerin.—In 1853 I was in China, and I became intimately acquainted with Mrs. Sullivan and her daughter, the respondent. In May or June, 1861, I and my wife dined with Mrs. King at her lodgings in Somerset-street, and we afterwards saw her frequently. She introduced us to Mr. Dent. In 1862 I was living at Brooklands, and in January she came to stay there. She frequently spoke of Mr. Dent as "Willie." She said he was a sort of guardian to her, and looked after her mother's property. She was with us about three months. One day a gentleman came to see us from London, and in looking over her book of photographs he saw the likeness of Mr. Dent. He said, "This is Dent." Mrs. King said "Yes, what do you know about him?' He said, "Not much, but he lived for some time in Wellington square, Chelsea, and a lady lived with him, and drove about with him in his carriage, who passed as Mrs. Dent." Mrs. King went up to London with that gentleman that same evening. In April I went to reside in London. I then saw her in Manchester-street. She said Mr. Dent had deserted her and given her up, and asked me to write a letter to her husband's friends. I refused. She wished them to make inquiries at certain places where she had been with Mr. Dent. She wished to bring matters to a crisis, because she thought that if her husband's friends interfered, and a divorce was obtained, Mr. Dent would marry her, and that seemed to be her object. I afterwards acceded to her request, and wrote to the Rev. Mr. King. In May, 1862 I went to Langham-place, where Mrs. King was lodging, and found her lying on the sofa, almost insensible. She said she had taken poison, and the room smelt of chloroform. She has told me that she met Mr. Dent at Macao soon after her marriage, and used frequently to drive out with him; that she has frequently seen him at different places in England, and that he had come to her at Weymouth. I went and saw Mr. Dent at the Oriental Club, and I asked him to go and see Mrs. King, as she thought she was dying. He said he was very busy and could not come then, but he would call by and by. The next morning I saw him again and I told him she had told me everything, and that she was dangerously ill. He said he would come to her directly. I said I thought he was a great blackguard to seduce another man's wife, of whom he had had charge since she was a child. "I am a great blackguard," he said, "a d— blackguard." I asked whether he intended to marry her or to do anything for her. He said he most decidedly intended to do something for her, but he would not marry her—he would as soon be in hell itself. We talked in the same strain for half or three-quarters of an hour. About five o'clock on that evening I saw him at her lodgings. He brought her some flowers.

The Judge-Ordinary.—What can you say to this evidence, Mr. Coleridge?

Mr. Coleridge.—I shall not waste the time of the Court by saying anything.

The Judge-Ordinary.—Gentlemen of the jury, no damages are prayed, and you will have no difficulty in deciding the only question for you.

A Juror.—We are very sorry, my Lord, that the petitioner has not asked for damages.

Verdict for the petitioner.

The Court pronounced the decree *nisi*, and condemned the co-respondent in costs.

MR. LAYARD, M.P., UNDER-SECRETARY OF STATE FOR FOREIGN AFFAIRS, ON JAPAN.

At a meeting of the constituents for Southwark, held at the Bridge-house Hotel on the 10th inst., Mr. Layard, in his speech, made the following allusions to China and Japan, which will be received with satisfaction by our readers, excepting, of course, the minority who hold rebel sympathies:—

Coming to China and Japan, he read with astonishment Mr. Cobden's statement that we had gone to those regions in the spirit of Cortes and Pizarro, our only object being "loot," and the inevitable result of our policy being to make us masters of China. The truth was that our policy now consisted in avoiding quarrels with the provincial Governors of China, and in having recourse to the Central Government, with the view to a right understanding with it, treating it as we should any civilised nation, admitting our own obligations towards it, and expecting from it, in turn, respect for our treaty rights. In regard to British officers entering the service of the Chinese Government, they were to all intents and purposes Chinese officers while they continued in that employment. The same practice had been followed from time immemorial. Peter the Great, whose empire was very much in the same state as China now was, organised his fleet, his army, and his civil administrations with the assistance of Englishmen, Frenchmen, and Germans. An Englishman at present held the post of admiral in the Turkish navy. We had an enormous trade with China, and the Taipings, a ruthless horde of marauders, threatened its destruction by seizing the treaty ports. We had interposed to protect our trade, and that was the entire extent of our interference. Our exports to China had risen from £1,027,000 to £5,451,000 in six years. Here was a statement of the trade with Hankow since that place had been taken from the Taipings and opened to our commerce:—

"Hankow, 1862.—Total value of trsde, 1862, £6,189,951, showing an increase of £3,401,482. 10s. over previous year. Of tonnage—Aggregate, 290,536, of which British 128,478, showing increase of 1,061 vessels and 196,103 tons over previous year. At Shanghai, again, the duties collected in December, 1860, were £122,000; in December, 1861, £281,500." That increase to our commerce had been most valuable at a time when our cotton trade was paralysed.

He now turned to Japan a subject which no doubt would give rise to many important discussions. Some 200 years ago, the Japanese admitted Europeans, chiefly Roman Catholic missionaries, into their territory. Religious dissension afterwards springing up, the Government thought the Christians were opposing their authority, and a massacre took place, when many of the missionaries were slain and the rest expelled the country. From that period until very recently there was scarcely any intercourse between Japan and the outside world. He did not know whether in these days any nation could completely isolate itself from the rest of mankind, but that was not the question. But it was the Russians and Americans who first broke through the isolation of Japan by obtaining treaties from its rulers on behalf of their traders; and he maintained that our Government, under those circumstances, had no alternative but to establish similar relations with that country. Had they refused to do that they would have been told that whenever there was a fight they were sure to put their noses into it (a laugh), but that when trade only was concerned they would do nothing to secure for our merchants the privileges enjoyed by Russians and Americans. Well, Lord Elgin had negotiated a treaty with the Tycoon, placing us on the same footing as those other nations. We commenced no aggressions on the Japanese, but simply established ourselves where we had a right to be. Sir R. Alcock had scarcely taken up his residence in Japan before the British Legation was attacked, one interpreter and two foreigners murdered, and several other persons dangerously wounded. We, however, made allowance for the difficulties of the Japanese Government. That Government asked us to defer going to certain ports to which we were admitted by treaty, and they sent a mission to the British Go

Digitized by Google

vernment to make that request. We received their embassy with every mark of friendship, and not only granted their request, but prevailed on other Powers to do the same, The treaty gave foreigners the right of taking exercise on the high road to Jeddo. One day three Englishmen and a lady were riding there, when they fell in with one of the Daimios, who appeared to have hated foreigners, and who, consequently, gave orders to his followers to attack these innocent strangers, who had drawn up on the side of the road to avoid his party. The lady and the other gentlemen escaped with their lives, but Mr. Richardson was most barbarously murdered. For these outrages we demanded reparation from the Japanese Government, together with the punishment of the chief by whose orders they were committed. The Japanese Government made an apology, and paid over a large sum of money, but said they could not punish that independent Daimio, who did not recognise their authority, but must leave us to deal with him ourselves. Our only course then was to tell them that if they could not control him we would punish him ourselves. If we had not done that, and any further outrages occurred, the Japanese Government could easily have again urged that they were powerless to coerce the wrongdoer, and British subjects might have been murdered with impunity. Admiral Kuper was accordingly ordered to go to Kagosima and punish the Prince of Satsuma. Redress having been refused, our squadron took possession of three steamers belonging to that prince. Much misapprehension existed as to the conduct of the Admiral on that occasion. It had been said that having seized these three steamers he flaunted them before the Japanese, that they naturally fired on him, and that he had no right to put himself in the way of making them fire upon him. Now, the bay or harbour of Kagosima was very narrow, or not more than 4,000 yards wide at its broadest part. It was blowing a gale, and the Admiral went into the bay to get out of the gale. He seized the vessels, and could not get out again without passing the batteries, which fired upon him as he came out. What could he do under those circumstances? If he had allowed the Japanese to injure his vessels and kill his men without resenting it, everybody would have said he had acted a part unworthy of a British officer. Moreover, the Japanese would immediately have said that the English fleet had been beaten, and there probably would have been a general massacre throughout Japan. He was therefore bound to return the fire. The castle of the Prince was immediately in the middle of the town. A Japanese town, it should be remembered, was built of lath and plaster. A conflagration ensued—a great calamity, which no one deplored more than Her Majesty's Government. He was not there to defend it for a moment; but it was impossible to return the fire of the batteries without running the risk of setting fire to the town, built of such highly inflammable materials. It was most lamentable that a large number of innocent people should have been exposed to that misfortune, and it was most unfortunate that an English fleet should have been the cause of it; but the thing was inevitable, and they ought to give some credit to our naval officers, and wait till they had had an opportunity of giving an explanation of their acts. Honourable men at a distance from England, discharging difficult and responsible duties, ought not to be condemned hastily, or accused of cruelty and barbarity, until they had had a fair hearing. (Hear.) The Government were not responsible for these things, but there were other persons really responsible. He would speak with tenderness and respect of British merchants, but the greatest difficulties of the Government in these matters originated with our merchants. Great houses like the Jardines, the Dents, the Lindsays, and others would not do anything calculated to involve us in war; but the moment the Japanese ports were opened there rushed thither a swarm of adventurers who thought the only use of a British minister or a British fleet was to enable them to secure their dishonest gains. (Hear, hear.) These adventurers went there, looking upon the people as their lawful prey, and did things some of which might make men's blood run cold. The blue-books showed how they put forward fictitious and monstrous claims in unreal and even in indecent names. When these men, who were a disgrace to the English name, got into trouble, the first thing they did was to call on their own Government to defend them. If they were not listened to, they raised a loud outcry, and wrote home complaints against our official representatives. The British merchant was entitled to protection for his lawful, but not for his unlawful trade. (Cheers.) Our countrymen were bound to respect the native population among whom they lived, to act like honest traders, and abstain from injustice and fraud.—[The discredit of these transactions has been generally put on the shoulders of Englishmen, but we would remind Mr. Layard that the Americans and Germans were also conspicuous in this affair.—ED.]

Monetary and Commercial.

The bar silver by the Mexican packet sold for India at 5s. 1⅜d. per ounce, being ¼d. above the price obtained for the previous remittance. The receipt on the 28th ult. of much higher quotations of exchange from Bombay caused a strong demand for this metal, and a considerable amount was purchased for transmission thither via Marseilles. The inquiry has since been greatly checked, however, by the increasead value of money, combined with the announcement in the last advices that the Bombay mint was unable to keep pace with the large arrivals of silver from Europe. There is no demand for Mexican dollars, and, to effect sales, lower prices would have to be submitted to.

A Bombay merchant calls attention to the fact that the export of bullion from this country to India could soon be stoppod by laying on a similar duty in India to that which already bears heavily on cotton goods. It would have the twofold benefit of stopping the drain from this country and of stimulating the export of cotton manufactures.

An elaborate description of the Whampoa Docks, lately purchased by the "Hong Kong and Whampoa Dock Company" from Mr. J. C. Couper, has been advertised in *The Times* by the London agents, Messrs. James Morrison and Co.

The report of the Ceylon Company, to be presented on the 15th inst, recommends an interim dividend of 5s. per share, or at the rate of 10 per cent. per annum.

The directors of the Peninsular and Oriental Company have recommended the following payments to the shareholders in their annual report:—Dividend, 3½ per cent.; additional payment, 2 per cent.; underwriting account, 1½ per cent. The report and proceedings of the meeting, with a list of the company's vessels is omitted for want of space, but will appear in our next.

From the Board of Trade returns we gather the—

IMPORTS FROM CHINA.

The total value of merchandise imported into this country direct from China in each of the last four years was:—In 1859, £7,073,509; in 1860, £9,323,764; in 1861, £9,070,445; and in 1862, £12,136,946. This great and rapid increase results principally from extensive importations of tea, effected to British ports for ultimate re-shipment to the United States. Raw silk has also been shipped to a much greater value, while raw cotton—a novel importation from China—has contributed a considerable sum towards the large augmentation of 1862. After tea and silk, the most prominent articles of commerce brought into this country from China are cassia lignea, China ware, ginger (preserved), matting, chemical oil, rhubarb, and sugar. In 1861, all the items, with three exceptions, exhibit diminished returns in comparison with the statistics for 1860.

The *Economist* has the following comments on the cotton trade, and its effects on the money market:—

For the next year, 1864, it would be easy, from sanguine anticipations of quantities, and a still more sanguine expectation that the present price of cotton will continue, to make out a very startling account. But we wish to be within the mark rather than beyond it, and we think that if the average prices of the year 1864 should be the same as the average prices of the year 1863, the imports from the several countries cannot be less than the following, though they may be more:—

Estimated Value of Cotton to be Imported in 1864. Prices same as the Average of 1863.

America	£5,625,000
Brazil	3,450,000
Egypt	11,100,000
India and China	42,000,000
Miscellaneous, chiefly Asia Minor	5,833,000
	£68,008,000

Now, these sums are much greater in themselves than we used to pay The value of raw cotton in the following years respectively was:—

1857	£29,288,827
1858	30,106,968
1859	34,559,636
1860	35,756,889

And, what is of much more importance, we are now buying in Brazil, in Asia Minor, in Egypt, in China and India, where the precious metals are excessively prized, and where our manufactures will not be consumed in an equal proportion for many years. We are spending much more month by month on cotton than we used to do, and we shall have to pay a much larger proportion of it in bullion than we ever did before. Taking these facts in their due combination—considering that we are suffering from a cotton-drain of bullion now—that we are likely to suffer from a greater one for some time to come—that the operation of a cotton-drain may have a greater effect on the rate of interest than a corn-drain, because it may be, and now will be, contemporaneous with an active and stimulating industry—we do not doubt that there must be a very high value of money for a very considerable period to come.

The Board of Trade Returns for the month of October have made their appearance. The following were the exportations to the Far East in that period:—

TO CHINA.—Cotton Yarn: The quantity exported in October last amounted to 218,020 lbs., against 2,224 lbs. in October, 1862, and 60,014 lbs. in 1861, and for the first ten months of this year 1,624,710 lbs., against 3,214,059 lbs. in 1862, and 5,963,264 lbs. in 1861. The value of the cotton yarn exported in October last amounted to £25,260, and in the first ten months of this year to £170,075, against £183,963 in 1862, and £269,642 in 1861. Cotton Goods: The export in October last reached 5,624,602 lbs., against 1,203,746 lbs. in October, 1862, and 15,699,462 lbs. in October, 1861, and in the first ten months of this year 39,849,042 lbs., against 76,687,444 lbs. in 1862, and 226,272,811 lbs. in 1861. The value of the export for October last reached £138,482, and for the first ten months of this year £969,071, against £1,182,762 in

Digitized by Google

1862, and £2,934,725 in 1861. Woollen and Worsted Manufactures: Export for October last 61,570 yards, against 65.624 yards in October, 1862, and 140,040 yards in October, 1861; export for the first ten months of this year 1,428,325 yards, against 1,669,048 yards in 1862, and 2,707,176 yards in 1861. The value of the export for Oct. last was £16.568, and in the first ten months of this year £268.350, against £208,631 in 1862, and £338,397 in 1861. Worsted Stuffs: Export in Oct. last 1,003,000 yards, against 930,060 yards in 1862, and 447,216 yards in 1861, and in the first ten months of this year 3,743,136 yards, against 2,577,186 in 1862, and 5,144,496 yards in 1861. The value of the export for Oct. last reached £61,688, and for the first ten months of this year £523,613, against £327,517 in 1862, and £304,939 in 1861. Lead: Exported in October last 651 tons, against 681 tons in October, 1862, and 406 tons in October, 1861; the export for the first ten months of this year amounted to 12,007 tons against 7,441 tons in 1862, and 4,822 tons in 1861. Value of the export for October last £13,805, and for the first ten months of this year £256.933.

TO PHILIPPINE ISLANDS.—Cotton Manufactures: Export in October last 1,959,891, and in the first ten months of this year 13,070,454 yards, against 12,625,882 in 1862, and 34,421,490 in 1862; value of the export for October last was £44.194, and for the first ten months of this year £317,204, against £252,329 in 1862, and £526.219 in 1861.

TO JAVA.—Cotton Manufactures: Export in October last 1,873,415 yards, against 1,064,415 in Oct. 1862; and in the first ten months of this year 12,246,711 yards, against 24,729,160 in 1862, and 42.663,517 in 1861. The value of the export in October last reached £48.016, and in the first ten months of this year £299,790, against £455,061 in 1862, and £661,583 in 1861.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 4th inst., was:—In gold, to Alexandria, £345,955; to Ceylon, £500; to Madras, £2,435. In silver, to Penang, £1,150; to Singapore, £230; to Shanghai, £1.775; to Foo-chow-Foo, £1,300. Total in gold, £348,890; in silver, £4,455.

ARTICLES OF IMPORT.

TEA.—The announcement of the largest Public Sales of the year, amounting to 76,000 Packages, no less than 47,500 Packages of which were printed without reserve, caused a decided flatness, and during the progress of these sales there has been a very serious decline in most descriptions, which has been partially aggravated by the rapid rise in the value of money, the minimum rate now being 8 per cent. A large portion without reserve still remains to be sold. Low and dusty kinds of Congou have given way fully ¼d. per lb. Fair common also sold ½d. per lb. lower, and good common is now quoted 1s. 0½d. per lb. Flavoury kinds, of old import, from 1s. 2d. to 1s. 6d. per lb. are difficult of sale at ½d. per lb. reduction; some speculative purchases of common black-leaf were made at 1s. 1d. to 1s. 2d. per lb., being full prices, but such kinds have since sold 1d. per lb lower at auction. Second-class Honams, Monings, and Wopaks, also good Ning-Chow Congous show a decline of fully 1d. per lb. Medium Kaisow kinds of new import have been very difficult of of sale, and prices at the public sales have given way 1d. to 2d. per lb. Fine to finest show no material change. Business in new season's Monings and Wopaks has been much more limited, in the absence of orders for Russia, and prices rule fully 2d. per lb. lower. Tayshans are heavy of sale at former prices. Common to fair Oolongs have sold to a moderate extent for export; good qualities have been difficult of sale at 1d. to 1½d. per lb decline; fine to finest have been in moderate request. Good to fine Souchongs have been only saleable in very small quantities; the supply is large, and there is no demand for export, and prices are in a great degree nominal. Fair to good have been better supported. Flowery Pekoes remain without improvement. Common to fair Scented Capers have been neglected, and the sales made at public auction went at 1d. per lb. decline. Good to fine have been saleable to a fair extent, but the supply has been more than the trade could take off. Fair to good Foo-Chow Orange Pekoes have been saleable at full prices; fine to finest have realised from 2s. 5d. to 3s. 2d. per lb. Canton-make have been quite neglected, and latterly the sales made show a decline upon previous nominal rates of 1½d. per lb. Fine to finest have been rather more saleable than other qualities. Uncoloured Japans show a decline of 1½d. to 2d. per lb. Indian Teas continue to sell freely at advancing prices. In Green Teas there has been a large amount of business, both for export and home consumption, although the deliveries this month show a decline, owing to the smaller quantity on offer. Twankays and Hyson Skins have sold at former prices. Common Young Hysons have sold rather lower, but fair to good and fine have commanded full rates. Japan sorts have been inquired for at former prices Hysons show no material change. Imperials command a ready sale at full prices, being wanted for export, suitable qualities being very scarce. Gunpowders, after having sold readily at 1d. to 2d. per lb. advance close much as last month. Canton Young Hysons are saleable at the low rates current—8d. to 8½d. per lb. for good qualities. Gunpowders of fair to good qualities latterly have sold fully 2d. per lb. lower, especially at the public sales. Fine show no alteration. The stock in the United Kingdom on the 30th ultimo was estimated at 93.000,000 lbs. against 69,899,000 lbs. last year, and the quantity afloat at 40.850,330 lbs. against 41,567,000 lbs. According to the Circular of Messrs. Mitchell and Aspinall the quantity afloat is 33,326,479 lbs. in 47 vessels.

SILK.—We have had a month of very limited business in Silk, the movements in the money market having apparently exercised considerable influence upon the demand. At one moment a drop of 1s. per lb. upon Tsatlee and Japan Silk, backed as it was by repeated accounts of short supply from China, and possible difficulties in Japan, induced some speculative action, and for a week all looked buoyant, and a partial recovery was established, foreign buyers, and to some extent home buyers also coming forward to replenish their exhausted stocks. This, however, was short lived—even during the best moments European Silk was continually quoted, and in some cases sold, in competition—and now with the increased price of money we are again at a stand. Importers generally are fairly firm, but the deliveries are miserably small, and stocks show an increase.

SUGAR.—The market has been dull, and in the limited transactions that have taken place a decline of 1s. to 2s per cwt. has been established, and to effect sales a further decline would have to be submitted to. By private contract only small parcels of colonial have changed hands, viz., 4,000 bags good and fine grainy Mauritius, at 47s. 9d. and 50s.; 1,700 bags grainy Madras Jaggery, at 37s. Foreign: No public sales have been attempted, and the transactions by private contract are of unimportant amount, relatively with the large business we have recently had to report, viz., 2,000 bags clayed Manila, at 41s. 6d. and 860 tons to arrive, at 27s. 6d., landing weights; also a floating cargo of 240 cases 210 bags brown Maroim, at 27s., for an outport.

COFFEE.—A fair demand has continued to prevail for colonial sorts, and previous prices have been obtained. Ceylon: The public sales of Plantation have comprised 1,300 casks, 694 barrels and bags, which were chiefly realised, as follows:—Fine fine ordinary to low middling, 72s. to 75s. 6d. 32 casks 548 bags Native were held firmly, and withdrawn. East India: 297 bags Mysore, at auction, were taken in at 71s., and 677 bags Malabar at 72s.

RICE.—Not any business of consequence doing. Java, 9s. 6d. to 19s.

SAGO.—Small steady; large has attracted some attention, and fair business has been done at advancing prices. 880 boxes at auction sold at 23s. to 24s. per cwt. for fair to good small, and 18s. to 21s. 6d. large and medium. Flour: Moderate business done privately at very full prices. Quotations, 15s. to 15s. 9d. per cwt.

SPICES.—Pepper (black): Steady, but quiet; of 3,472 bags Singapore at auction, two-thirds sold at 3½d. to 3¾d. per lb., and 837 bags Penang at 3⅝d. to 3¾d., with Trang at 3⅝d. White: Quiet; 227 bags Penang sold at 5d. per lb. Mace: 48 cases Singapore sold at auction at 11d. to 1s. 3d. per lb. Nutmegs: Very firm, 53 cases Singapore and 6 casks Dutch sold at auction at 3s. 1d. per lb. for fair bold; 1s. to 1s. 9d. ordinary small to good medium, and 10d. to 11d. low shrivelled. Cloves: Penang quiet, but held firmly; 53 cases at auction all retired. Cinnamon: We quote 1st sort at 1s. 3d. to 2s. 2d. per lb.; 2nd. 1s. 1d. to 1s. 6d.; 3rd, 1s. to 1s. 3d.; 4th and Jungle, 10d. to 1s. 1d. Business unimportant,

COTTON.—For Surat prices have again fluctuated very heavily, but are now about ½d per lb. under the currency ruling at the date of our last; quotations, 1s. 5½d. to 2s. 1d. For Madras the market has again been very unsettled, prices fluctuating as much as 2d. per lb., and now about ½d. lower than at the date of our last; quotations, 1s. 7d. to 2s. Sales of China at 22d. to 22½d.

HEMP.—The market for Manila has remained dull, with very little trade on the spot, and for arrival; prices, £28 to £31 per ton.

Digitized by Google

TIN.—Banca, £115 to £116 per ton; Straits, £113 to £115. Markets tolerably steady, and business to a fair extent has been accomplished.

JAPAN WAX.—No sales reported since last mail; market therefore without alteration.

MISCELLANEOUS.—Galls: Much inquiry for China, and buyers at improved prices. We quote Japan and China at 50s. to 70s. per cwt. Camphor: China and Japan, £5 to £5. 5s. per cwt. Of 860 chests China at auction about one-sixth sold at our lower quotation. Gum Benjamin: Siam is scarce and commands high prices. Eight cases sold at auction at £25. 5s. to £33 per cwt. for 2nd to 1st quality, and £15. 5s. to £20. 10s., lower qualities. Sumatra abundant and dull; and of 40 cases at auction one-fourth only found buyers at £12. 15s. for 2nd. Gutta Percha: steady, of 13 tons at auction, one-fifth sold at 1s. 10d. to 2s. per lb. for good natural. India Rubber: quiet, and without any business of importance; auctions confined to 12 baskets damaged Penang, and 13 cases Assam, which were disposed of at about the previous relative value; prices, 1s. 3d. to 1s. 6½d. per lb. Rattans: have been in less request; and of 6,176 bundles Batavia. 4,369 bundles Penang, and 284 bundles Mauritius at auction, about half sold at 3s. 3d. to 8s. per 100. Sapanwood: Manila dearer, and all descriptions firm; of 50 tons half sold at £10. 2s. 6d. to £10. 10s. per ton. Mother-o' Pearl Shells: A recent importation, 116 boxes, offered at auction, and partially sold at 80s. to 82s. 6d. per cwt. Elephants' Teeth: Sound Siam ivory is in demand, and very scarce. Tortoise Shell: Auctions have included 19 cases Manila; one-third sold at 10s. to 15s. per lb. for low to middling in sorts; and 5 cases Singapore, 3 sold at 13s. 6d. to 14s. 6d. for ordinary; and 9s. 6d. small pickings, prices being without any material alteration. Oil of Aniseed: Again lower. A few cases have been sold at 6s. 2d. per lb., but there is very little demand at the price. Terra Japonica: Cutch and Pegu, 24s. to 26s. 6d. Gambier: 22s. to 23s. 6d.; all offered at auction retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 5s. to £8. 15s., hoops, £10. 10s.; sheets, single, £11. 10s.; Staffordshire bars, £9. 10s.; rails, £7.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £105 per ton; yellow metal, 8¾d. to 9d. per lb.

TIN.—112s. for block; 116s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD, &c.—English Pig, £20. 15s.; W.B., £21. 10s.; shot, patent, £23 to £23. 10s.; sheet, £21; spelter, £18. 10s. to £18. 15s.; zinc, English sheet, £24. 10s. to £26; quicksilver, £7 per bottle.

The following remarks are from the circular of Messrs. French and Smith:—Business in this market generally during the past month was good. The advancing rate of money has not had much depressing effect on any metals, some descriptions, on the contrary, have advanced. Iron: The fluctuations in Scotch pig iron have been considerable, having risen, or mixed numbers, as high as 68s. cash. The price to-day is easier, and the quotation is 64s. cash. The demand for Welsh continues strong, and prices very firm. Staffordshire, also, is much inquired for, and all good makers have full order books. There is every reason to expect that for some time to come this state of things will continue. Copper: This metal is very firm, and although orders are not above the average, the scarcity of ores offering will no doubt keep the price strong. We quote Burra, £100; Chili, £91 to £92; Spanish Rio Tinto, £93. Tin: With a very fair amount of orders, prices have still continued very flat. A fall in English of £3 per ton was officially announced by the smelters on the 23rd ult., but as sales had been previously made at as low a rate, this had no effect on demand. In foreign, transactions are reported at 113s. Straits, cash; these transactions, in the aggregate, amount to some hundreds of tons during the month. Holders for the most part are looking for higher rates. Tin Plates continue to be inquired for, and makers are well supplied with orders. The shipments last month were about 75·000 boxes; in November, 1862, they were about 51,000 boxes. Lead is improving in value, and smelters generally ask an advance of from 5s. to 10s. per ton. Spelter is advanced. Sales have been made at £18 15s. on the spot, and £19 to arrive. The stock in London is 1,803 tons, against 5,861 tons last year. Quicksilver very scarce.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

	Gold.	Silver.
Shanghai	—	£287,723
Foo-chow-Foo	—	9,440
Hong Kong	—	414,718
Amoy	—	—

MANCHESTER MARKETS.

Grey Shirtings, 7 lbs., 18s. to 18s. 6d.; 8½ lb., 22s. 6d.; 9½, 26s. 6d. Cotton Yarn. Nos. 16 to 24, 2s. 9d. to 2s. 10d.; Nos. 28 to 32, 3s. to 3s. 1d; Madopollams, 7s. 9d. to 8s.: Long Cloths, 23s.; T-Cloths, 14s. 6d.; White Spot Shirtings, 22s. 6d.; Brocade do., 22s. 6d.; Damasks, do. 40s. 6d. The Circular of Sam Mendel says:—With very few sales the market showed weakness for several days past, but there has not been any disposition to make other than very moderate concessions. To-day, with a rather better inquiry, there is again less depression, and sales have taken place at prices not very much under the full rates recently obtained. The absence of stocks, and the prospect of further curtailment of production, no doubt gives this market great strength.

FREIGHTS AND CHARTERS

Outward freights are quiet, and ships are obtained without difficulty, most of the berths being now fairly supplied; coal freights are lower; homeward chartering continues active, especially from the rice ports, for which 87s. 6d. has been paid for large vessels.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42. 10s. and £2. For Shanghai: £49 to £50, and 47s. 6d. to 50s. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26. and £1. 6s. 9d. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

According to advices from Monte Video, dated the 28th of October, the British barque Flowery Land, which cleared from London on the 25th of July with a general cargo for Singapore, was reported to have been purposely sunk by her crew, after having murdered the master, mate, and other persons. Fourteen of the crew had been arrested and detained there as prisoners, pending an investigation.

The Celestial, Jones, from Hankow, with tea, which arrived in the Thames on the 2nd of December, was unable to dock in consequence of the strong wind prevailing. She took the ground just below the St. Katharine's Dock entrance, and as the tide fell, careened over, and continued in that position for some time before she could be righted and taken into dock, where she has discharged her cargo, of which about 500 chests of tea are damaged. The ship has been found to be much strained.

The Friar Tuck ship Tierney, which arrived off Scilly on the 27th of November from Foo-chow-Foo for London with tea, parted her cables and drove on shore on Newford Island, where, after cutting away her masts, she remained, with the sea beating over her and filling rapidly, her hull at high tide being fully under water. Crew saved. Most of the cargo, it is expected, will be saved in a damaged condition, should the weather be moderate. According to the last accounts, a quantity of materials, ship's stores, and only 304 chests of tea in perfect order have been saved from the wreck. Ninety-three chests partially damaged, and 750 saturated with water, have also been landed. The rest of the cargo on board is believed to be in the same condition.

The St. Jan Lommerse, from Rotterdam for Samarang, got on shore, 2nd December, near Helvoet, but was assisted off by two tugs.

The Tritone for Singapore put back to Penarth Roads 5th December, with sails split and other damage.

The Guurtje Maria, Flens, from Shields for Batavia, arrived at Falmouth 6th December, leaky, and with loss of sails.

The Hoop, v. Duyn, from Ramsgate for Singapore, arrived at Plymouth 5th December, with loss of yards and sails split.

The Thomas W. Sears, from Padang to New York, which put into Mauritius 28th September, in distress, is stated to have been so badly damaged that she would possibly have to be sold.

The Baron F. v. Dambenoy, Kruymel, which arrived at Texel, 5th December, from Batavia, had lost boat, bulwarks, and poop, and sustained other damage.

The D'Elmina, Horner, which arrived at Brouwershaven, December 5th, from Batavia, had lost topmast, yards, sails, and bulwarks, and thrown part of her cargo overboard, having experienced very heavy weather.

The Elise Henriette, Deterding, from Tjilatjap, arrived in the Texel, 5th December, with loss of sails.

At St. Vincent, C.V., November 4, Hadassah, Dickson, from Sunderland, and sailed, 5, for Hong Kong.

At Mauritius, October 22, Gottingen, Lachwitz, sailed for Hong Kong.

VESSELS FOR THE CHINA TRADE.—The Delhi has been launched by Messrs. J. Wigham, Richardson, and Co., for Messrs. Holmes, Knevitt, and Holmes. She is 700 tons, N.U.M. From the yard of Mr. Robert Thomson, Southwick, a barque of 513 tons, 10 years, for Messrs. Hudson, Sons, and Partners named the Winlow, was launched. From the yard of Mr. G. Barstay, North Sand, Sunderland, a fine brig, of 230 tons register, and classed nine years, named the Pilotus. She is the property of S. W. Kelso, Esq., of Liverpool. From the yard of Messrs. Taylor and Scouler, South Dock, Sunderland, a barque, named Queen of Peace; length, 122 feet; breadth, 27 feet; depth, 16 feet 7 inches; registered 400 tons; is classed nine years, and is the property of Messrs. Bries Brothers, Newcastle. On the 10th inst., from the Messrs. Hall's building-yard at Arbroath, a clipper barque, named the Ousurl, of 363 tons N.N.M.; owners, Messrs. George Armistead and Co., of Dundee.

HOLLOWAY'S PILLS are admirably adapted for the removal of all diseases which have their origin in disordered digestion. They are well suited to all classes and conditions—as competent to give comfort to the wealthy as ease and strength to the poor. These Pills will be found an agreeable and efficient remedy by invalids whose minds and bodies are enervated and exhausted from excess, over anxiety, or foreign residence. Persons liable to bilious attacks should take these Pills; they cause each seizure to be less severe, the nausea and biliousness will gradually be removed, and good digestion, with complete health, be regained. To add to the merits of Holloway's medicine, no risk or danger attends its use, no weakness follows its employment.

For terms of Freight or Passage apply to MCDIARMID and GREENSHIELDS, Liverpool.

PASSENGERS by Steamer for HONG KONG and SHANGHAI.—The new twin screw steamer FAR EAST, A 1 12 years, 1,200 tons register, HENRY JONES (late of the Ballarat), Commander, to load in the East India Docks, and to leave early in January. This beautiful steamer has a full poop, with capacious cabin accommodation, and will carry an experienced surgeon. It is confidently expected, from the build of this steamship, and her powerful engines, that she will make a very fast passage. Vacancies for midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

To Sail positively on the 1st January full or not full.

FOR SHANGHAI, the magnificent River-built Clipper Ship WHITEADDER, A 1, 10 years (belonging to Messrs. JOHN WILLIS and SON), 915 tons register, A. BOWERS, Commander, loading in the East India Docks. This fine vessel has just completed her first voyage, having made the fastest passage home this season.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

STEAM to HONG KONG and SHANGHAI (taking goods for Hangkow and Japan), the splendid new, river-built, twin screw steam clipper ship, FAR EAST, A 1 twelve years, 1,200 tons register, 160 nominal horse power, working up to 600-horse power, HENRY JONES (late of the Ballarat), Commander; loading in the East India Docks. This magnificent new steamship (built by J. and W. Dudgeon, of Millwall), affords the best opportunity to shippers requiring despatch. Her cabin accommodation cannot be surpassed. Vacancies for Midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

PASSENGERS for SHANGHAI.—The powerful screw steamer ANNETTE now in Swansea Dock, will leave Swansea about the 30th inst., for Shanghai direct, and will steam or sail all the voyage. Has very fine accommodation for cabin passengers. Fare, 80 guineas.

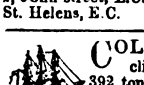
For particulars apply to ANDERSON, THOMPSON, and Co., 1, Billiter-court, E.C

FOR SHANGHAI direct, Messrs. DUNBAR and CO.'s new Aberdeen-built clipper ship FY-CHOW, A 1 14 years, 730 tons register, will receive goods in the East India Docks till Monday, the 28th December.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

MANILLA direct (sailing under the Spanish flag), the splendid new Spanish clipper bark ELISA, A 1 at Lloyd's for 10 years, 431 tons register, FRANCISCO RIVERO, Commander. This fine vessel has just been built at Sunderland expressly for the Manilla trade.

For Freight or Passage apply to CHARLES HINGSTON, 9, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helens, E.C.



COLOMBO direct.—The beautiful clipper AUGUSTA MAY, A 1 11 years, 392 tons register, loading in the West India Export Dock, has a large portion of her cargo engaged, and will be promptly despatched.

For Freight apply to STUART and SIMPSON, 9, Clement's-lane Lombard-street, E.C.

COLOMBO, CEYLON, Direct, will have very quick despatch, having a considerable part of her cargo positively engaged, the splendid new, British-built, clipper ship PALESTINE, classed the highest at Lloyd's, register 607 tons; THOMAS PARK (late of the Severn), Commander. This vessel is now in the West India Docks, ready to receive cargo, and shippers are requested to send their goods down as soon as possible, as it is intended that she shall be despatched at an early date. This magnificent new ship has a full poop, with unsurpassed accommodation for cabin passengers.

For Passage apply to W. H. TINDALL, No. 4, Clement's-lane: and for Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill. Will be followed by the regular trader Thames.

THE OVER-DUE MAIL.

By the *Sultan*, with the Bombay mail, arrived at Suez, we have intelligence of the China mail (due here this day) to the followi g effect :—

The *Rangoon*, with the Calcutta, China, and Japan mails, was stranded in the Red Sea (name of place not decipherable) on the 10th inst. Passengers, mails, cargo, and baggage saved without damage. The ship in a critical position, but the captain expected to get her off, as she made no water. The *Sultan* has brought the mails and passengers to Suez. The former may be expected in London on the 5th of January. The French mail, with a week's later news from China, may also be expected on that day.

SHANGHAI CHAMBER OF COMMERCE.

The Shanghai Chamber of Commerce, in their despatch to Earl Russell, having omitted to make use of a particular case which strikingly refutes the statements of Mr. Lay, we have been handed the following copy of a letter addressed to his Lordship on the subject. We have waited anxiously for this protest of the Chamber, and shall be obliged if the Chairman will, in future cases, cause a copy of such documents to be sent to us. The present one is dated in August :—

THE RIGHT HON. EARL RUSSELL, PRINCIPAL SECRETARY OF STATE FOR FOREIGN AFFAIRS.

MY LORD,—I beg to call your lordship's attention to the fact that the case of the steamer *Unicorn*, alluded to in the address of the Shanghai Chamber of Commerce as No. 5, lately forwarded to your lordship, was tried before Her Majesty's Consul at Shanghai, and given in favour of the owners against the Inspectors of Customs. Mr. Lay, in his report, says the *Unicorn* was fined for smuggling. I submit that this fact adds weight to the confutations put forth by the Chamber.

I have the honour to be,
Your lordship's most obedient humble servant,
F. J. ANGIER.

WARS AND RUMOURS OF WAR IN JAPAN.

Four days after the arrival of the last mail the *Manchester Examiner and Times*, followed by all the London papers, including *The Times*, started a paragraph in reference to the Extra to the *Japan Commercial News* of Oct. 10th, which our readers will remember announced the bombardment of Osaca. As the movements in Japan are now watched with great interest, we addressed the following letter to the daily papers :—

Sir,—In reference to the intelligence in your paper yesterday, under the head of "Japan," taken from the *Manchester Examiner and Times*, and backed up by the *Japan Commercial News*, I beg to enclose you the following, which appeared in the *London and China Telegraph* of the 14th inst :—

"Our advices give a complete contradiction to a rumour that reached Europe through French channels reporting 'the bombardment and capture of Osaca by the Daimios.' The statement, it appears, was first set afloat by the *Japan Commercial News*, and was to the effect that 'authentic information had been received of the bombardment and capture of the Imperial city of Osaca (and, some say, of Kioko also), and that the Daimios were advancing with an army of 50,000 men for the capture of Yokohama.' The only information really received at Yokohama was this :—A plot was discovered to have been in actual existence amongst the retainers of Choshu to attack the castle at Osaca, and seize upon the person of the Mikado. Upon this discovery a conflict arose between the Mikado's soldiers and those of Choshu, which ended in the defeat of the latter with some killed and wounded on both sides."

Permit me further to point out that our advices from Kanagawa (Yokohoma is the strip of land on the shore of Kanagawa Bay, on which the English settlement is located) are to the 15th of October, five days later than the marvellous Extra to the *Japan Commercial News*, and they do but confirm the impression that the Daimios prefer peace to war and conflagration.

Further, the so-called "news" furnished by the *Manchester Examiner and Times* as "not previously published in this country," was telegraphed

Digitized by Google

from Marseilles, and published in Paris and London ten days ago. Since then—on the 12th that is—there was received from Paris, from the same sources of information, the announcement that "at an extraordinary meeting of Daimios it was decided, by 66 votes against 47, that there was no ground for declaring war against foreigners."—I am, &c.;

THE EDITOR OF "THE LONDON AND CHINA TELEGRAPH."

The *Japan Herald* of the 10th of October says that the reported bombardment and capture of of Osaca by the Daimios is a pure invention.

On the 21st inst. the following item was published:—

"NEW YORK, Dec. 8.—Advices received here from Kanagawa *via* San Francisco, to the 1st of November, state that great excitement prevailed there. Another European had been murdered. An armed force from the fleet was guarding the city permanently."

We quite expect that this European will turn out to be the French officer, Lieut. Camus, particulars of whose death reached us by the French mail received here on the 4th inst. The name of the vessel that brought the news from Kanagawa to San Francisco is not given. We remember an amusing instance of the manner in which our transatlantic cousins always push for the very latest dates and news, and contrive to gratify the demands of their readers in that respect. Their secret is, that if the intelligence is not as "all fire quick" as could be wished, the date at least can be shoved forward to the extent the editor's conscience will stretch to. Some years back, at the period of Soulouque's being ejected from his Imperial throne of Hayti, an American and a West Indian mail arrived in London on the same day. The dates from Port-au-Prince, in the New York papers, were up to the 16th of the month, and left the struggle between Soulouque and his discontented subjects still going forward. On looking to the amaica files, we found that His Imperial Darkness had acually arrived at Kingston on the 14th, having been expelled from his dominions two or three days before. Prior to that eriod, a watchful eye had created in us a distrust for New York dates from places with which there was no regular mail communication. Since then, we have settled down to the conviction that the New York papers "annihilate time and space," whenever it is their fancy so to do, by the simple expedient of shoving the clock forward a little, which we have a firm faith will turn out to be the case in the present instance.

SHIPS AND STEAMERS FOR THE CHINA TRADE, &c.

The P. and O. Company's new steamer *Golconda*, now at Southampton, will, we understand, take out the next mails for Alexandria. The *Syria* will also shortly be ready to take up her station. The *Pera*, Captain Jamieson, will shortly be laid up for a thorough overhaul.

The following are the particulars of the *Wild Deer*, belonging to Mr. John Dallas and built by Messrs. Charles Connell and Co., on Clyde—Register tonnage 1,000; length of keel and fore rake, 210 feet; breadth of beam, exireme, 33 3-12 feet; depth of hold, 20 9-12 feet. When fitted out she will proceed to Liverpool to load for China, for which trade she has been expressly built. She is the first wood and iron composite ship built on Mr. Connell's principle, her entire framework being of iron, with teakwood and iron floors planked with elm and teak, fastened in the bottom with treenails and yellow metal, and in the topsides with yellow metal screw-bolts; and is classed 14 years A 1 in Lloyd's Register.

A splendid vessel, named the *Busheer*, the property of the British India Steam Navigation Company, was successfully launched from the shipbuilding yard of Messrs. Aitkin and Mansel, Whiteinch, on the 12th inst. The *Busheer* is a handsome screw steam-vessel of 860 tons builders' measurement, having a full poop and forecastle, the former elegantly fitted up with berths and state-rooms for the accommodation of about thirty first-class passengers.

From the building yard of Mr. John Reed, South Dock, Sunderland, a handsome modelled (wood) barque, named the *Comus*, of 366 tons new measure, and 410 tons old. She is owned by Messrs. Thompson and Harper, of Newcastle, and is intended for the China trade.

The paddle-wheel, *Tun-Sing*, built by Messrs. Samuda, on Thames, for Messrs. George Barnet and Co., Shanghai, and Messrs. Elias and Co., London, will in a few days proceed to her destination, under the command of Captain Rowe, late of the *Philippine*. Her register tonnage is 610 tons, horse power 150, length 241 feet, beam 26, and depth 12. She is schooner rigged.

MEETING OF THE P. AND O. COMPANY.

(Omitted in our last for want of space).

At the annual meeting of this company, held on the 4th instant, the CHAIRMAN, in moving the adoption of the report, said they would observe by the statement of accounts the improvement in their financial position as compared with the last annual statement of accounts. Their revenue had increased by about £70,000, and their expenditure had somewhat diminished. He thought this result had been caused by circumstances which he considered temporary. The war in America had caused a great increase in the production of cotton in Egypt and India. It was requisite to pay for this produce in gold and silver, which had occasioned a very large shipment of specie to India for some time past, and that had, course, increased their revenue. The demand for shipping in India to cotton thence had enabled them to send coals to their Indian station at less cost than formerly. They could not regard those circumstances as being permanent. When the inhuman war in America was brought to a close they could scarcely expect to benefit so largely by the trade to India as they had done lately. He then adverted to an offer the company had made six months ago to Government to give a double line of communication to Australia. The offer was made at the request of the Government, and the directors had every reason to believe the Government would have considered it a very moderate one, and desirable to accept it. Recent advices from Australia informed them that it was so considered there, and that Sydney itself, which had always looked to the Panama route, was also desirous of accepting the offer. But although three mails had arrived at Australia since the offer had been made by the company no communication had been received from the Government by the local authorities there on the subject. The directors had not pressed the matter at all, because the company was quite as well off with a single line, and rather better, than they would be with a double line. There was a prospect of increased trade with the East, which was likely to arise out of the new connection with Japan. They had occasionally despatched a vessel to ports there, their agent had been to Japan, and he thought it advisable to establish a regular line twice a month in connection with their China line. This would be done provided the Government would give them a moderate subsidy for carrying the mails. The admiral on the station was anxious they should do so in order to save him the trouble of employing ships-of-war on that service. They were now in a good condition, and would endeavour to keep so. He concluded by moving the adoption of the report, which was seconded.

Mr. GLIDDON said he was glad that they had not felt anything from the competition of the French steamers. He hoped they would continue to receive a large amount of cotton from India, and that the receipts for the conveyance of specie would not be a temporary matter, but become a permanent advantage to them. He considered the net receipts for the past year highly satisfactory. They were £132,000 more than for 1860, with about the same amount of business; they were £73,000 more than for 1861, and £76,000 over those of 1862. Those figures showed the progress they had made, and he thought they might fairly congratulate themselves upon the result of the year's operations.

Mr. J. JONES said he was not so satisfied with the result of their operations, because the passenger traffic had shown a decrease of £50,000 in the year. He thought the passenger traffic should have increased with increase of specie. He believed that the French line of steamers affected their receipts for passengers, and he had heard they were carrying passengers at a lower rate, something like 30 per cent. below the company's prices. He understood from the Postmaster-General's report that the offer of the Belgian Government to perform the British portion of the mail service between Dover and Ostend was lower than that of their company, and had been accepted; and also that they were negotiating with the French Government to carry a portion of the English mails. He thought that was an anti-national policy, that ought not to be carried out.

The CHAIRMAN explained that a large portion of the increase in the revenue was from the conveyance of specie. He believed that Mr. Jones had examined the accounts in detail respecting the passenger traffic. It was true the French ships had carried some proportion of the passengers, but, independent of that, there had been a year of peace in India, and consequently there were nothing like the number of passengers carried to and fro that had been in former years. Another reason for the reduction in the number carried was that their French competitors had relieved them of carrying a small number of passengers at a particular period of the year when it was usual with the company to despatch one or two extra ships to bring them home and to go back empty. They had relieved them of that service, and saved them the expense. As to the French packets carrying the mails, he believed they had afforded an opportunity to take some of them. A convention had been entered into, and it appeared subsequently that a proposition had been entertained to the effect that they should take out some part of the mails to China, but a representation was made from this company, and the matter dropped. The French ships only went monthly, while the Peninsular and Oriental Company's ships started weekly. The Government could not break up the present arrangement with the company without seriously affecting the commercial arrangements of the country. As to removing the packet station from Marseilles to other ports, the company were quite ready for any change that might be necessary. With regard to the French ships reducing the fares, they had done so in a few instances, but it was a mistake, and had been rectified. They had no reason to suppose there was anything like bad faith, and they were still working on amicable terms with the French company.

Admiral COFFIN said he believed their people did not gain any advantage by going in the French ships. A number of French people, no doubt, went by them; but he believed the English people preferred their own steamers.

The CHAIRMAN would say nothing to the prejudice of their competitors, but would leave travellers to form their judgment from their own experience.

A SHAREHOLDER mentioned that a passenger from India a short time back had told him that at Galle he met several passengers who had determined to go home by the French steamers, but who had left them there because they were so extremely uncomfortable. In reply to one remark that fell from Mr. Jones, he observed that there was no necessity of sending any one in charge of specie.

Admiral HALL, with reference to the bowsprit of the *Golconda*, remarked that he should be sorry to follow any Yankee in the shape of their vessels. The bowsprit was invaluable if the steam power broke down, and he thought there was quite nautical knowledge enough on this side of the water to build ships properly.

After some further observations, the report was unanimously adopted; a dividend at the rate of 3½ per cent., an additional payment of 2 per cent., and a payment of 1½ per cent. on the underwriting account, making, together, 7 per cent. for the half-year ending the 30th of September, were unanimously agreed to, payable on the 28th inst. in a single warrant, free of income-tax.

The retiring directors, Mr. W. F. De Salis and Mr. J. George, M.P., were unanimously re-elected; and also the Earl of Leven and Melville, and Mr. A. Mackenzie, the retiring auditors.

Digitized by Google

On the motion of Admiral COFFIN, seconded by Mr. GLIDDON, thanks were unanimously voted to the chairman and directors for their able management, and the proceedings terminated.

Abstract of the Accounts laid on the table relating to the financial year terminating on the 30th September:—

THE CAPITAL ACCOUNT

Shows that the company stood possessed, on the 30th September last, of stock in ships, less the amount deducted for depreciation			£2,371,929 2 6
Also, of freehold and leasehold property in England, and docks and premises at Calcutta, Bombay, Singapore, and other stations			134,201 12 1
And stock of coals, naval and victualling stores, amounting to...			239,611 2 11
Also cash at bankers', investments, bills receivable, balances in agents' hands, and debts due to the company			785,804 14 8
Making the total assets			£3,531,546 12 2
That the capital received from the proprietors at that date amounted to	£2,100,000 0 0		
And that there had been received on debentures	500,000 0 0		
Total capital	£2,600,000 0 0		
That the liabilities of the company, in bills payable and otherwise, amounted to	£552,319 19 2		
Making the total capital and liabilities			3,152,319 19 2
And showing a surplus of			£379,226 13 0

This surplus is represented by the balance at the credit of the general reserve fund:—

THE REVENUE ACCOUNT

Shows that the gross revenue or income of the company, from freight, passage money, postal-service contracts, charter money, and other sources, amounted for the twelve months ending 30th September last to...			£2,296,305 4 3
That the expenditure and charges on revenue, including interest on debentures; with the reserves made for insurance, wear and tear, and depreciation, for the same period, amounted to			2,060,849 14 0
Leaving a net profit of			£235,455 10 3
Deduct dividend of 3½ per cent., and additional payment of 1½ per cent., for the half-year ending 31st March	£105,000 0 0		
And the half-year's dividend of 3½ per cent., now about to be recommended, with an additional payment of 2 per cent.... ...	115,500 0 0		
			220,500 0 0
Leaving a balance of			£14,955 10 3

THE PROPRIETORS' UNDERWRITING ACCOUNT.

The annual premium of 5 per cent. on the estimated value of the floating property of the company, covering ordinary sea-risks, and credited to this account, for the year ending 30th September, 1863, is			£105,000 0 0
Deduct net value of steamship *Colombo*, lost on the island of Minicoy, in November, 1862			72,000 0 0
			£33,000 0 0
Payment proposed to be made to the proprietors at the rate of 1½ per cent.	£31,500 0 0		
Balance carried to the general reserve fund	1,500 0 0		
			33,000 0 0

THE GENERAL RESERVE FUND.

In the last annual account this fund amounted to ...			£377,726 13 0
Add balance of underwriting account			1,500 0 0
And it amounts to			£379,226 13 0

THE COMPANY'S FLEET.

Since the date of the half-yearly report, the *Carnatic* has been placed on the Calcutta and Suez line. The voyage made by this vessel round the Cape of Good Hope was remarkably quick; the run from Southampton to Point de Galle having been completed in forty-nine days, and to Calcutta in fifty-five days. The *Rangoon* has also been finished, and was despatched to Calcutta on the 1st of September. The *Syria* was launched on the 15th of August, the *Golconda* and the *Baroda* on the 29th, and the *Delhi* on the 16th Sept.; these vessels will be ready for sea in about six weeks. The *Nyanza* (called in the last report the *Rhoda*), is now the only vessel on the stocks, and she will be launched in February next. The *Simla*, belonging to the Calcutta and Suez station, has been sent to Bombay to receive new boilers and undergo a thorough overhaul and refit. This vessel had been nine years in active service. The directors are able to state that the fleet was never in a more efficient condition than at present; and to congratulate the shareholders that no accident of consequence has occurred during the last half-year.

THE POSTAL SERVICE.

The proprietors were informed, in the last report, that at the request of the Postmaster-General they had stated the terms upon which they would be willing to double the existing mail service between Sydney, Melbourne, and Point de Galle, but that the tender would have to be submitted to the approval of the colonial authorities before an arrangement could be concluded. The directors have nothing new to report on this subject, as it appears, by the latest advices from the colony, that no official communication of the company's offer had then been received from the home Government.

THE PROPRIETORS' UNDERWRITING ACCOUNT.

The loss of the *Colombo* in November, 1862, falls upon this account for the financial year included in the present report. After charging it with this loss (£72,000), there remains a balance of £33,000; and as no other accident has occurred during the year, the directors recommend a payment of 1½ per cent. on this account. The balance of £1,500 has been carried to the general reserve fund.

CAPITAL, REVENUE ACCOUNT, AND DIVIDEND.

The paid-up capital of the company stands at the same amount as at the close of the financial year of 1861-62, namely,—£2,100,000; but £66,000 has been borrowed on debentures during the last year, making the debenture debt £500,000. The bonds for about £200,000 of this amount fall due in January next; a portion issued five years ago bearing interest at 4 per cent., and the remainder, issued three years ago, at 5 per cent. The holders of these debentures have been informed that the directors will be prepared to renew them at 4½ per cent., and if these terms are not accepted, they will be paid off pending a more favourable condition of the money market.

The revenue account exhibits a satisfactory result of the year's operations, and the directors are consequently able to recommend the usual dividend of 3½ per cent., and an additional payment of 2 per cent., leaving a balance of £14,955. 10s. 3d. to be deducted from the capital account for depreciation. In explanation of this proposed addition to the ordinary reserve of 5 per cent. for depreciation, it may be stated that some of the older vessels on the China station are not very well suited to the present requirements of the trade, and are not of a class to command a sale in the local market; they consequently stand at a higher figure in the books than they would probably realise, and this amount will reduce their nominal to about their actual value.

The amounts payable will therefore stand as follows:—Dividend, 3½ per cent.; additional payment, 2 do.; underwriting account, 1½ do.: in all, 7 per cent. And these payments will be made free of income-tax, in one warrant, on the 28th inst.

Foreign Intelligence

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, DEC. 28.

The Second Chamber of the States-General has been indefatigably employed in getting through the important business of the session previous to its adjournment for the holidays. The Colonial Budget was successfully passed as made up by the Minister for the Colonies, by forty-one to twenty-four votes, but only after some sharp debates, in which the Opposition tried very hard to alter a good deal of it, though in vain. On the other hand, the Bill for the disposal of the colonial surplus was

Digitized by Google

passed unanimously. The finances of this country are in such a prosperous condition that on the debate for appropriating five millions and a half of florins towards the reduction of the National Debt—as proposed by the Government—the Second Chamber thought proper to increase the amount to eleven millions and a half of florins, very nearly a million sterling. Previous to the adjournment two other Bills of great importance were passed; the repeal of the import duties of coals, coke, firewood, turf, and all other articles of fuel, which was agreed to by fifty-five to six votes, and the increase of the excise duty on home-distilled spirits to thirty-five florins per *vat* or hectolitre, which, after a slight alteration in the wording of the Bill, was passed by forty-nine to eleven votes. It is understood that unless anything pressing should happen to require the earlier meeting of the Second Chamber, they will not reassemble before the 15th or 16th of February next.

The First Chamber has been convened since last mail for the despatch of business. A number of Bills were sent up from the Lower House and placed in the hands of the different standing committees to examine and report on. On the proposal of Mr. Philipse, the President of the Chamber, the whole body waited on the King to offer their congratulations on the fifty years' existence of the independence of the kingdom under the dynasty of the House of Orange-Nassau. They have now adjourned for the usual Christmas recess.

Considerable apprehensions had been entertained here for the safety of the chartered transport *Anna Sophia*, Captain Beckering, which sailed from Nieuwe Deep on the 28th Nov. with a detachment of supplementary troops for Java, as mentioned in my letter of the 22nd of that month, as she was exposed to the fearful storm of the 4th inst. in the North Sea. A despatch, however, has been received from Capt. Ermeling, of the E.I. Engineers—the officer in command of the detachment—stating that the vessel happily weathered the gale without encountering any serious damage, and arrived safely off Dover on the 12th inst., where she took on board a Channel pilot, and was proceeding down the Channel by the latest advices. Her losses consisted in sundry boats stove in, some hencoops washed overboard, a few sails torn to ribbons, some spars broken, and —a dead cow.

H.N.M.'s steam corvettes *Metalen Kruis*, Captain-Lieut. J. E. de Man, and *Princess Amalia*, Captain-Lieut. J. J. Wichers, which vessels have been fitting out for the reinforcement of the naval squadron in Japan, sailed in company on the 18th inst. from the Texel for their destination.

The new first-class steam corvette *Curazao*, of 16 guns, was successfully launched on the 10th inst. at the Royal Dockyard at Vlissingen. It is stated in naval circles that she is to be immediately fitted out for foreign service, and rumour adds that her destination is the East India station.

The following first-class vessels have been chartered by the Netherlands Trading Company to load cargoes of produce in Java for the undermentioned ports:—*Doesborgh*, Captain Spanderman, *Sperwer*, Captain Opperman, *Hollandia*, Captain Ruige, *Jacqueline and Elise*, Captain Krukkenberg, *Willem Hendrik*, Captain Beckering, *Vriendschap*, Captain Jansen, and *Madura*, Captain van Bruggen, for Amsterdam; *Cornelia*, Captain de Vries, *Fop Smit*, Captain Leverstein, and *Nederland*, Captain van Eb, for Rotterdam; and *Graaff Dirk III.*, Captain Rotgans, for Dordrecht.

The *Dagblad*, of the Hague, contains the following:—"The French Government has lately received a present that promises to be of the greatest importance for Algeria in particular and the production of cotton generally. Mr. van der Gruiten, Roman Catholic missionary and Pastor at Batavia, discovered some time ago, in the country of the Dayaks, a new species of the cotton tree, some seeds of which he planted in his garden with the most perfect success. In less than four months they bore an astonishing number of pods, the quality of the cotton being distinguished by the pure whiteness of its colour and the soft and silky texture of the staple. He made a present of part of the seeds he obtained to M. de Codrika, the French Consul-General at Batavia, who immediately forwarded them to his Government, by whom the present was greatly appreciated, and the seeds have been sent off to Algeria to be cultivated in the Imperial model farm there."

Accounts have been received here that the Governor-General of Netherlands India has made an alteration in the system of obtaining the edible birds' nests in the district of Malang in the Residency of Passaroean, where, from the 1st of January the cliffs will no longer be farmed out as a Government monopoly, but thrown open to the industry of the native inhabitants, subject to the payment of a trifling tax on the quantity collected. In the meantime the last annual sale of this commodity for Government account was held at Batavia on the 6th of October, when 1,218½ kilogr. of the first quality sold for 20,287 fl, 1,436¾ kilogr. of the third quality realised 7,623 fl., and 187½ kilogr. of inferior brought in 94 fl., making a total of 27,944 fl. Of the second quality 1,228 kilogr. were offered for sale but bought in, though afterwards disposed of by private contract to the titular Major of the Chinese for shipment by him to China.

The resolution of the Governor-General of Netherlands India to permit the formation of Chambers of Commerce at Batavia, Samarang, Sourabaya, Padang, and Macassar—intelligence of which was brought to this country by the last overland mail—has given great satisfaction in commercial circles here, as the want of them has long been severely felt by the merchants, shipowners, and manufacturers.

The following officers of the East Indian Army now in this country on leave of absence have received orders from headquarters to hold themselves in readiness to embark for Java:—Lieut. E. von Ende, Lieut. A. van Delden, Medical Officer A. de Graag, Lieut. J. van Dentsch (Engineers), Medical Officer J. Adriani, Medical Officer H. van den Broeck, Lieut. W. van der Schalk, Medical Officer J. Berghuis, Medical Officer van Woertman, Medical Officer F. J. Cornelissen, Lieut. van Nouhuys (Cavalry), Lieut. Roukens (Cavalry), Lieut. de Bank-Langenhorst, Medical Officer G. Sinia, Lieut. L. C. van Vleuten, Lieut. A. J. Kalff, Lieut. J. de Lannoy, and the Military Apothecaries Enderle and J. Vogelpoot.

Lieut. Perk, attached to the E.I. Army for temporary service, has received orders from the Minister of War to return to this country and rejoin his regiment (the 4th Infantry).

APPOINTMENTS CONFIRMED.—Mr. J. van der Pant, to be Member of the Court of Justice at Batavia; Mr. W. de Booy, to be Member of the Court of Justice at Samarang; Mr. B. G. Straeter, to be Member of the Court of Justice at Sourabaya; Mr. L. Prins, to be Member of the Court of Justice at Padang; Mr. A. J. Cornets de Groot, to be Member of the Court of Justice at Batavia; Mr. C. N. van Lawick van Pabst, to be Assistant-Resident of the Western Quarter of the Home District of Batavia; Mr. A. Muller, to be Secretary of the Residency of Passaroean; and Mr. K. W. Tiedke, to be Secretary of the Residency of the Southern and Eastern District of Borneo.

Capt. P. van der Leeuw, commander of the Government steamer *Bronbeck* in Netherlands India, has received the Royal permission to accept and wear the gold medal of the second-class presented to him by the Emperor of the French.

Mr. E. Jacobson has been recognised as Consul to the King of Italy at Samarang for Central Java; and Mr. J. D. Ruys in the same capacity at Sourabaya for Eastern Java and Bali.

The ship *Record*, Butcher master, from Samarang to Rotterdam, has put into Algoa Bay for medical assistance.

Accounts have been received at the Naval Department announcing the safe arrival in Table Bay of H.N.M. steam frigate *Ardjoeno*, Captain-Lieutenant Baak, from Helvoetsluys to Batavia.

PASSENGERS ARRIVED.

Per *Bezoekie*, Capt. Reckers, at Rotterdam from Batavia: Mr. and Mrs. Jacobsen, Mr. P. J. van Druym, naval officer, and Mr. J. Jacobsen.

Per *Mentor*, Capt. Duinker, at Amsterdam from Batavia: Mr. G. Otto.

Per *Helena and Anna*, Capt. Lupke, at Rotterdam from Batavia: Mr. and Mrs. Schreuder and family.

PASSENGERS OUTWARDS.

Per *Maria*, Capt. Briesthorst to Batavia: Messrs. Hoffman, Havelaar, Brugman, Moller, Linck, and Hudig.

Per *Sourabaya Packet*, Capt. Olivier, from Amsterdam to Sourabaya: Younker M. C. de Rotte, Mr. K. L. Verschuur, and Mr. H. E. Levert.

Per *Allegonda Jacoba*, Capt. Swart, from Amsterdam to Batavia: Mrs. de Rochemont-Mayor, four children and two Javanese native servants, Mr. D. H. Lomberg, and Mr. F. Mayor.

Per *Bernard and Agnes*, Capt. Ordeman from Amsterdam to Singapore (sailed Dec. 18): Mr. and Mrs. J. Heust and servant, Mr. and Mrs. A. Meyer, Mr. F. Ritger.

COMMERCIAL.

COFFEE.—Since the departure of the last English overland mail this market was for the first week quiet and steady, and at the beginning of last week showed even an appearance of weakness, but then began to improve; so that 1,700 bags of Java, ex *Orange Nassau*, were sold at 42½ cents, then 1,200 bags of Sumatra, ex *Julie*, were taken at 43½, and finally 160 bags, ex same ship, at 44 cents. In the meantime several parcels out of the company's last sale changed hands—No. 25 and 26 at 42½, and No. 28 at 43 cents. Then came the official announcement

Digitized by Google

that the company's spring sale will be held on the 15th of March, and contain only 80,000 bags, against 412,662 bags last March. Holders immediately withdrew their samples from the market, and demand higher prices, so that nothing can be had now under an advance of 1 to 2 cents. This is chiefly the case with ordinary and middling qualities, whilst the finer descriptions are scarce and difficult to buy at any price. As it is utterly impossible that so insignificant a quantity as 80,000 bags can suffice for the requirements of commerce for six months, many people are led to believe that it is the beginning of a change in the system of the company's sales, and that instead of only two large sales in the year there will be, in future, six or eight smaller ones.

SUGAR.—Owing to the improvement in the raw article in France and England, this market has been in a state of great excitement, and the sales of the fortnight have amounted to nearly 20,000 kranjangs at successively rising prices, from 1 fl. below to 1½ fl. above the company's November sale. The market, however, closes in a calmer mood, and prices are not quite so firm. Refined goods are rather better, but the improvement did not keep pace with the raw article. The last sales reported are of B and H and H R at 40½ fl. for delivery in February.

RICE.—A sale of 22,750 bags of rough Bassein, ex *George West*, is reported at 6⅜ fl., as well as 1,985 bags of Java cargo rice, ex *Ocean*, at 8 fl. Fine qualities of cleaned grain command an easy sale in small parcels at full prices, but the only transaction of any importance was 1,760 bags of Batavia ex *Anthony van Hoboken*, for export.

SPICES are generally quiet, with but trifling demand. Prices have a drooping tendency.

METALS.—Banca tin is rather improving, though but little business has been done. The price is nominally 69 fl. In company's copper there has been a lively market at successively rising prices. Thus 40,000 kil. sold at 54 fl., 10,000 kil. at 54¼ fl., 5,000 kil. at 54½ fl.; then 15,000 kil. at 55 fl., 20,000 kil. at 55½ fl., and finally 20,000 kil. at 56 fl.

HIDES have a rising tendency, but the sales have not been considerable. Among the sales by importers were 810 Java ox, ex *Provinces Drenthe*, and 280 do. ex *Fanny*.

INDIGO.—Prices are well supported, with a fair amount of business.

RATTANS move off slowly at full rates. During the fortnight were sold 1,543 bundles, ex *Sliedrecht*, 268 do., ex *Sud*, 3,030 do., ex *Christian Rankin*, 225 do., ex *Catharina*, 429 do., ex *Herman*, and 1,086 do., ex *Anthony van Hoboken*.

CAMPHOR is in brisk demand, and rather better prices are obtained.

TOBACCO.—The sales by auction of Java have been considerable, and were well attended. All sold; the better qualities fetching full prices, inferior a shade lower. Subjoined are the particulars. More sales are advertised for 2,543 bales. The present stock of Java is 9,543 bales.

CONSUL SWINHOE ON FORMOSA.

At the meeting of the Royal Geographical Society held on the 14th inst., the paper on Formosa, by Mr. Swinhoe, was read. A full notice of this paper appeared in our issue of the 27th Nov. At the conclusion of the reading,

Lord STRANGFORD expressed a hope that a little pressure might be put upon the Hydrographic Office to complete the necessary surveys, so as to facilitate navigation.

Admiral COLLINSON said he had surveyed the coast on either side about eighteen years since, and found the east coast tolerably populous, and with terraced cultivation along its very bold outline. But he doubted whether much commercial intercourse could possibly take place, not merely because this was the side where the aborigines were chiefly found, but also because there was not one single harbourage that could be pronounced safe, while the current of the Pacific Gulf stream was so strong that on one occasion it carried him 200 miles against the wind in two days. He saw no Chinese boats even till he got near the coal and sulphur region at Keling, on the north-east side of the island. The aborigines were a remarkably good-looking, manly race.

Sir HARRY PARKES suggested a survey of the island of Hainan as well as Formosa. After glancing at the early history of the latter island, which was only finally colonised by the Chinese in 1682, he stated that he could corroborate most of Mr. Swinhoe's remarks and suggestions as to Tam-suy being the best port; and it was much to the credit of the Chinese that they had put the most liberal construction upon Lord Elgin's treaty, which threw Formosa open, without designating the ports, and under which they permitted trade at any one we might select. He mentioned that at least five races might be said to converge in this small archipelago, the Pescadores Islands (to the west), consisting exclusively of Chinese; Botel-Tobaga (to the south-east) of Malays; Sumasana of Japanese, who, he said, had once been a sort of roving mercenaries before the present exclusive policy was adopted; while in Formosa itself all these were found, to a certain extent, mingled with the aboriginal Chinese tribe of the Miaou-tze, and some (present) examples of the Negritos of Polynesia, the two latter never approaching the coast.

MORE ABOUT KAGOSIMA.

The following is an extract from a private letter dated Yokohama, Oct. 14, 1863:—

"The action of Kagosima is still under criticism, as regards itself and its consequences. The peculiar features of that affair are:—1. The total disuse or forgetfulness of the proper use of the Armstrong guns, which would at long range have effected just as much damage without the loss of so many valuable lives as was done at close quarters. 2. An attack in a gale of wind and rough sea. 3. *Euryalus* taking position close to a target, about 400 yards from the forts, at which the Japanese had been practising for months. 4. There was no anticipation of a fight, and it was regarded by all as a pleasant diplomatic cruise, which was to end in the payment by Satsuma of some thousands of dollars. We are also told that no action was apprehended after the capture of the material guarantee, *i.e.*, the three steamers. And it is admitted that as the fleet went to sea the firing was resumed by the forts along the coast as the ships passed. There has been no negotiating since the fight, nor any attempt to prevent the repairs of the damaged forts, which are probably as strong as at first. The report of the fight rendered by Satsuma appears to be believed by the Tycoon's Government, for a few days ago a member of the Grand Council renewed his request that all foreigners should leave the country, and it is rumoured that all the hostile Daimios are mustering in arms to carry out this policy should the Tycoon nor succeed in it.

"The French have taken the most commanding part of the South Yokohama bluffs and hoisted the tricolour; the British portion is outside the French, and commands the sea and some part of the settlement. These heights are the key of the position, from which the town could be easily destroyed; they will, therefore, undoubtedly be occupied in the event of hostilities. The French have also landed stores and coals, &c. Our Admiral does nothing without home orders, and the present protection of the place is dependent on the Frenchmen on shore, and in case of an attack the English residents would remove to the ships, and thus virtually do what the Japanese want—go away.

"The following item of news is significant. A French officer of Zouaves (and cousin of the Admiral Juarez) was cut to pieces in the country about two miles from Yokohama on the Yedo side, as he was going out in that direction. The body was brought in fearfully gashed. The cause of this is unknown, and will probably remain in obscurity, but it gives the French a famous excuse for military occupation, and it is more than probable that they will use it as a *casus belli*, into which we shall doubtless be drawn. It is already rumoured that the burning of a town near the scene of the murder has been determined on, if the murderers are not given up by ten o'clock this evening; so the Belle Court does not regard money as a compensation for wanton blood as your Foreign Secretary seems to do. A doubt exists as to the origin of the murder, and whether the officer infringed in any way the customs of the country. His horse was also badly cut up."

THE RUTHLESS BURGEVINE.

(THE TIMES.)

The Taipings are very bad; they slaughter men, women, and children, and they torture the Tartars; sometimes, also, they burn cities when forced to leave them; and they are like locusts on the land, devouring everything upon it. But there was one atrocity they did not commit, and it remained to be taught them by a civilised soldier. They did not wontonly destroy the mulberry trees when they scattered themselves over the silk districts. Perhaps they had their reasons for this. Perhaps they dreaded the despair of the inhabitants, and even a Taiping might be supposed capable of an unwillingness to undertake a devastation which would be at the same time laborious and unprofitable. Burgevine, however, publicly announces that this was the plan of his operations. He has published a long statement in the China papers as a defence to charges of drunkenness and violence brought against him by his own comrades, and in answer to imputations of treachery cast upon him both by Imperialists and rebels. In this paper he vows, and even insists, that it was because the Taipings refused to lend themselves to this diabolical design of destroying the industry of millions for twenty years that he planned the enterprise of stealing the steamship that had been intrusted to his charge and going back to the Imperialists, from whom he had deserted.

Digitized by Google

Yet this Burgevine, when in the Imperial service, was reported to be a well-mannered, quiet, determined man. If he had been placed in independent command with a given object assigned him, he might possibly have done great service to the cause of order in China, and might have run an honourable career. Unfortunately for him, he was but the mercenary soldier of a provincial Governor, who left his forces without pay or sustenance, and exercised a jurisdiction over him which thwarted all his plans. But no man is fit for such work as Burgevine undertook unless he can endure as well as achieve, and he has made, perhaps, the worst that could have been made of an originally false position. What he will now do, whether he will go back to the Imperial service, and serve again under some provincial Mandarin, is not of much importance. The only interest we take in his fortunes is the interest which attaches to him as an example of what must happen to every soldier of fortune who submits to take the position which, in Chinese estimation, is attached to a mere partisan chief. He must become either a pirate or a victim.

It was to avoid such rocks as these that public opinion in England sanctioned the expedition which went forth some months since, under the command of Commodore Sherard Osborn. It was felt that our relations with China had reached such a stage of importance that we had, perhaps, a greater national interest in the security of the country than even the Mandarins of Peking themselves. The sudden flood of trade which occurred upon the opening of the Yang-tze-Kiang astonished and almost bewildered even those who were borne on by it to fortune. Our merchant looked on in apprehension while such masses of treasure were afloat upon unknown and unguarded rivers, and upon pirate-haunted coasts. In former days we should have made a dash at territory, and should have followed our commerce and protected it by dominion. But modern England has renounced the inconveniences and immoralities of conquest. To undertake the responsibility of keeping order in a kingdom where we had no authority to do justice was plainly inadmissible. But when Mr. Lay, the European Controller of Chinese Customs, reported that he was collecting for import duties alone more than three millions sterling, and that this was an increasing sum—when, moreover, it was made clear that with ordinary management of the salt monopoly and of the other established sources of revenue the Government of China must be one of the richest in the world,—it was felt that China could afford to pay for a respectable force to secure the trade from which she, as well as ourselves, was deriving such large profits. It was for this purpose that we were ready to lend the Imperialists our best naval skill and our European appliances of war. Not that we desired to uphold a Tartar dynasty, or any other particular dynasty, but that we looked for security from the only Government that appears possible. We fear that the Court of Peking has somewhat misunderstood the motives of the English Government, and of those Englishmen who have already done so much to infuse new life into the decrepit Chinese body politic. When Mr. Lay and Captain Osborn arrived at the Chinese capital, they found that the statesmen of Peking were willing, indeed, to give sufficient guarantees for the payment of the English squadron, and content to allow these payments to be made out of the ample Customs' revenue clolected by Mr. Lay; but they insisted that our naval officers should act under the orders of, and as subordinates to, the Chinese Governors of provinces. Until this point is thoroughly settled, Captain Osborn declines to put his force in action. If the Peking authorities should prove obstinate in this matter, he will ask instructions from his own Government as to his future course; but he, of course, will not place himself in the position of such adventurers as Burgevine, nor accept a responsibility to any Chinese superior except the Supreme Council of the Empire. This, as we understand it, is the only difficulty at present existing at Peking. It has probably arisen in a great measure from the unfortunate accident of the absence of the British Minister in Tartary. Upon his return to his diplomatic duties at Peking, we trust that the energy and tact of Sir Frederick Bruce will set this straight. It is hardly to be supposed that even Chinamen can be so obtuse as not to see that the aid which is at hand is not a mere proffer of hands and ships to be hired at a price, but a great and decisive alliance with the representatives in China of the moral and physical force of the Western nations. We expect that the next mail will give us decisive news of the position. Meanwhile the squadron is safely arrived, well in hand, and ready for service.

DEPARTURE OF THE ANNAMITE AMBASSADORS FROM SUEZ.

The steam transport *Japon* arrived at Suez on the 12th inst., from Saigon. This is the vessel appointed to carry home the Annamite ambassadors at the end of the present month. If the news which we published in the last number of the *London and China Telegraph* is to be relied upon, the feelings of one of the ambassadors, poor Sousthan-Gian, cannot be very agreeable at the present moment; but we trust that the French authorities will be able to save him from the judicial, or, rather, imperial murder which is said to hang over his head. Unfortunately, however, the chances seem to be that this new irruption of Western civilisation into the East will produce the usual fruits, and that the fate of the unfortunate Sousthan-Gian will be swamped in a sea of carnage. But Eastern ministers are as acute and as cunning as Italian priests, and it is just upon the cards that the ambassador under sentence of death may become a very important auxiliary to the French, who, we feel sure, will not abandon to certain destruction one of the men who signed the treaty conferring upon France three splendid provinces.

One of the ambassadors accompanied by a secretary has visited Rome and been received by the Pope, whom he informed, by order of his master Tu-Duc, that the prosecution of Christians had ceased in the Annamite empire, and that the stipulations in favour of the Christians contained in the treaty with the French would be scrupulously adhered to. Of course every one will estimate the value of these assurances, under present circumstances, according to his own special opinion. We should be sorry to have the life of any friend depending on their being made good.

The Ministerial press is working hard to make a new Annamite war popular in France. Able pens are employed to supply columns of matter to the ministerial journals on the subject of the new French colony in the Far East, and we have to read over and over again the political and commercial geography of Cochin-China and Cambogia, and the list of their wealth of production. Some of the notices are written with great skill and no doubt with some truth—and contain matter for all classes of readers, but especially the commercial and the military, which rank equally in all French schemes of so-called colonisation.

The habits and peculiarities of the Annamites detailed in these narrations would make an amusing article, but we must confine ourselves to those portions which have a direct bearing on the material interests of the world at large, and on the probable fate of the new settlement. In the first place, then, all the statements of French writers at the present moment tend to place the Cochin-Chinese in a much higher position than their cousins the Chinese in a military point of view; but the facts are not given with sufficient distinctness to enable us to judge whether this is merely the result of a wise determination not to undervalue an opponent, or whether it arises from the feeling that, the greater the apparent danger to be faced the greater may be the amount of glory claimed hereafter. On the whole, however, we are inclined to think that other accounts and actual events warrant the inference sought to be established. One circumstance upon which a good deal of stress is laid in the accounts alluded to deserves attention for itself; we allude to the large number of Chinese proper said to be found in Lower Cochin-China. They are declared to have amounted to thirty thousand families when the French arrived, and it is taken for granted that they have increased since that time. These Chinese are said to possess all kinds of privileges, and to have complete command both of the trade and commerce of the country. The Chinese penetrate everywhere, we are told, in spite of war, piracy and risks of every kind, and frequently force the Annamite peasant to sell his small crop of rice to them whether he desire to do so or not, thus making up cargoes from the aggregation of small lots, which are afterwards carried to My-tho or to Cho-Leun. There is one thing that throws some doubt over the French accounts relative to Saigon, namely, that constant reference is made to Singapore trade, in which errors are as plentiful as blackberries. The inference drawn from these statements is that no jealousy will be created in the minds of these Chinese colonists in Cochin China, as their mode of action is far superior, in a commercial point of view, be it understood, than any the Europeans could adopt; and, while it is admitted that during the time that hostilities existed between the French and the Annamites the Chinese leaned towards the native Mandarins, it is argued, and apparently with good reason, that this simply arose from the fact that the officials of the country could command the market of My-tho and the southern provinces of the empire. The principal centre of the Chinese colonisation is said to be Cho-Leun, about two leagues only from Saigon; the population being divided into seven groups, each having a chief called *Hong-phoo*, who, either by tolerance or usurpation, wears the Imperial yellow button. This colony naturally includes a considerable number of sailors, who arrive in the great junks from *Fo-Kien*, *Konang-Fon*, and *Hainan* (?), but after the conquests by the French, Saigon is said to have been inundated by a motley crowd, including men utterly broken down through gambling and opium, artizans of all classes, a sprinkling of men who carried with them the means of engaging in important ventures, and a considerable number of pirates, who soon found occupation.

One of the first difficulties which met the French was the want of a language through which to communicate with the natives. Schools were, therefore, established for teaching the Annamites French—beginning as usual, from a commercial or any practical point of view for colonists, at the wrong end—instead of setting the French to learn Annamite. However, we

Digitized by Google

are told that the progress has been highly satisfactory, and that the natives who had never before studied anything but English and *Latin*, the former at the Singapore school, and the latter of the Catholic missionaries, are getting on rapidly with their French, and that the native merchants of Saigon every night, as soon as business is done, set to work to repeat a string of words which they call their French lesson! But the education which we are told advances most rapidly is that derived from the French soldiers, from whom the Annamites learn to "chat, laugh, and salute in true military style," in which we trust they may find something to their advantage hereafter. "Thus," says the writer, in the *Moniteur*, in concluding one of his articles, "a common language is growing up which, in spite of English "influence, heretofore all powerful, marks the passage in China of "twenty thousand Frenchmen, and their establishment in "Annam."

Few people will see in these articles much more than an anxious desire to render the subject of the establishment of the French in Cochin-China a popular matter, but I have mixed with all classes of society here, and have taken some trouble to trace out the existence of any feeling upon the subject, and I am bound to say that with the exception of a very small class of commercial men and enlightened political economists, I have failed to find a single man in all Paris who seems to care a dump about China, Cochin-China, Japan, or any other part of the Far East. The military exhibit not the slightest interest in the prospect of another struggle with semi-barbarians, in a military sense at all events; and as to the public at large, Cochin China has no more attraction for them than New Caledonia, to which one will go to, or Cayenne, from which everyone wants to get away.

THE CAPE OF GOOD HOPE.

Our advices form the Cape of Good Hope are to the 21st of November. The whole community there were in a state of great excitement on account of the seizure of a British barque by the commander of the Federal man-of-war, *Vanderbilt*. We extract the following particulars from the *Cape and Natal News* of the 23rd:—

Some excitement was occasioned in Capetown on Thursday morning, Oct. 24, by the entrance into Table Bay of the well known Federal-American steam man-of-war *Vanderbilt*, of whose arrival at Mauritius we had then recently heard It appears that Captain Baldwin, who, after leaving Simon's Bay, ran up to Mauritius in the expectation of finding the Confederate cruizer *Georgia* on the patent slip there, on learning that he had been misled by false information, resolved to return to the Cape. He accordingly left Mauritius on the 10th of October, looked into Algoa and Simon's Bays on his way down the coast, and then came on to Table Bay, only to receive full confirmation of the intelligence obtained at the ports of call, that the *Alabama* and her sister "pirates," as it is his pleasure to miscall them, had apparently taken their final departure from our shores, and were gone, no one knew whither. Capt. Baldwin obtained permission to remain here some days, for the purpose of overhauling his machinery, refitting, and repairing. He applied to the Governor for permission to take in coal, but that was refused, upon the ground that three months had not elapsed since the *Vanderbilt* had obtained coal at an English port. She had, in fact, within that time, coaled at St. Helena, at Simon's Bay, and at Mauritius. Captain Baldwin and the American Consul waited upon the Governor to remonstrate against the decision, but are reported to have had the wind taken out of their sails by a reference on the part of his Excellency to one of the letters written by the Consul to himself when the *Alabama* was here, in which the Consul very arbitrarily laid down the utmost limit of the privileges to which she would be entitled. This being the first visit of the *Vanderbilt* to Table Bay, there was naturally a strong desire on the part of the denizens of the city and suburbs of Capetown to inspect the mammoth war-ship of which so much had been heard and read, and during her stay here large numbers of persons visited the vessel, and were most courteously received and entertained by the officers. Naturally enough, many persons endeavoured to institute a comparison between the fighting qualities of the *Vanderbilt* and those of the more celebrated *Alabama*. The balance of opinion was decidedly in favour of the latter; the *Vanderbilt*, notwithstanding her heavier armament and superior speed, being comparatively slightly built, having all her machinery on deck, and presenting an immense "mark" to an enemy, while the deck of the *Alabama* is only eight feet above the water. But, as we remarked at the time, we are content to accept as conclusive upon that point the opinion of the commander of the Confederate, who is much better acquainted than we can possibly be with the capabilities of his own vessel, and, probably, also with those of the enemy. He informed us from his own lips that if compelled to fight he should do so under great disadvantages. He believed the *Vanderbilt* to be much faster, to carry a far superior armament, and to be in all respects a much more powerful vessel than his own.

While the *Vanderbilt* was in port, the Custom-house officers seized on board the *Flower of Yarrow*, a vessel employed regularly in the coasting trade, which had arrived from Ichaboe a few days previously, three bales of hops and two boxes of tobacco, which were believed to have formed part of the cargo of the *Sea Bride*, the Federal barque, captured by the *Alabama* at the entrance to Table Bay, and sold by Captain Semmes to Captain Elmstone, who has since left the Cape. On the following day, the 27th ult., the *Vanderbilt* weighed anchor and left Table Bay, it being given out that Captain Baldwin had determined to return direct to the American coast, believing that the *Alabama* and her consorts had gone in that direction for the purpose of preying upon Federal merchant vessels. On the 4th November the schooner *Atlas* arrived from Penguin Island, and the captain reported that he had been boarded by an officer and boat's crew of the *Vanderbilt*, who, besides overhauling his papers, opened the hatches of his vessel and examined her cargo. After this, the *Vanderbilt* made a straight course for Angra Pequina, the too-well-known rendezvous of the Confederate cruizers.

Upon learning this, the Government at once ordered up the *Valorous* from Simon's Bay, for the protection of any British interest that might chance to be imperilled. The *Valorous* left Simon's Bay on Saturday evening, the 7th inst., and returned on Sunday.

On the following day various exciting rumours were circulated in Capetown. It was asserted that the officers of the *Valorous* had reported that the *Vanderbilt* had visited Angra Pequina, captured there the barque *Saxon* (formerly the American barque *Lucy Johnson*), the property of Messrs. Wm. Anderson, Saxon, and Co., laden with part of the cargo of the *Alabama's* prize, the *Tuscaloosa;* placed a prize crew on board of her, and sent her to New York, transferred the crew of the *Saxon* (with the exception of the chief officer, who was said to have been killed) to either the *Good Hope* or the *Isabelle*, and subsequently destroyed or taken away a depôt of coal established upon Penguin Island. Upon inquiry, we ascertained that Mr. W. J. Anderson, of the firm of Wm. Anderson, Saxon, and Co., had received from his agent at Simon's Bay a communication informing him that on Sunday morning H. M. S. *Valorous* returned to Simon's Bay from her cruise along the West Coast on the track of the *Vanderbilt*, and that her officers reported the seizure of the *Saxon* by the *Vanderbilt*, the transfer of her crew to the *Isabelle*, the reported death of the mate, who was said to have been shot by one of the officers of the *Vanderbilt*, and other circumstances. There did not, however, appear to be very good authority for any of these statements, the only information the officers of the *Valorous* obtained having been received from some labourers at Ichaboe. There were no vessels at Angra Pequina when the *Valorous* entered the harbour, and some men observed upon Penguin Island disappeared when a boat from the vessel approached the shore to communicate with them. Capt. Forsyth, however, subsequently managed to communicate with some labourers, who informed him that the *Vanderbilt* had been there several days previously, after having examined Penguin Island, shipped the greater portion of 250 tons of coal which she found there, and destroyed the remainder; that while she was lying off Penguin Island, the *Saxon* came from the inner harbour, was overhauled close to the land, seized, placed in charge of a prize crew, and despatched to New York. The men further stated that Captain Sheppard (the commander of the *Saxon*) and the crew were afterwards placed on board a coasting vessel, in order to be taken to the Cape. Rumours were current in town that the vessel which received the crew of the *Saxon* was the *Good Hope* and not the *Isabelle*, the latter also having been seized by the *Vanderbilt*; but we were not able to trace them to any reliable source. The *Good Hope* was bound to Sandwich Harbour and Walwich Bay, and may be hourly expected to return to the Cape.

A TRIP TO JAPAN.—The following is an extract from a private letter dated Hong Kong, November 1:—"I had a most delightful trip to Japan, with which and its people I was truly delighted. Exclusives! they are the most cosmopolitan people I ever met. The Government and its officials of all degrees, who have all they want and oppress the masses, are, no doubt, extremely anxious to prevent friendly intercourse with us (and more so the Daimios), which would lead to the creation of an enlightened middle class, when their arbitrary and unjust rule would be ended; but, I repeat, the people themselves, as far as we have yet become acquainted with them, long for foreign intercourse and the sweets of commerce. Wherever I went, and walked and rode for miles around Yokohama, the country people begged me to stop and chat, offering tea and pipes and 'sake,' and anything they had. This is when no officials are looking on. I am afraid we shall not be allowed to carry on trade much longer, unless serious notice is taken of our failure to enforce our demands on Satsuma, and his successful resistance to a powerful British squadron. We have every reason to believe that the Tycoon is with us (he profits very largely by foreign trade at Yokohama), and is only waiting to see whether we are both willing and able to force ourselves upon the country, if necessary, and maintain our treaty rights; but we cannot expect him to openly declare himself on our side as long as he sees a possibility of being left in the lurch, and at the mercy of the powerful Daimios who have sworn that the hated foreigner shall never have free access to their territories, &c. Everything will depend upon the instructions which may be sent out in reply to the despatches announcing the Kagosima action. Well may the Japanese take our conduct at present for anything but forbearance seeing, lying at anchor at Yokohama, sixteen British vessels of all sizes, two French frigates, a Prussian frigate, an American and Dutch corvette. They lump all Europeans together, and not understanding the idea of awaiting instructions, after the Kagosima rough handling and the firing upon any vessel of any European nation (even Dutch) that attempt to pass through the Inland Sea, they must, indeed, feel proud, and declare, as they do, that we must get greater force from England before attempting anything against them. No doubt there is a strong party unfavourable to foreigners, and these will grow emboldened if they see that Satsuma escapes with impunity. Indeed, my firm belief is that we shall have to evacuate Yokohama very soon after it becomes known that we do not intend vigorously to assault Satsuma.

CHINESE MARRIAGES IN AUSTRALIA.—A correspondent to the *Christian World* represents ministers as administering the rite of Christian baptism to persons, Chinese, whom they know to be idolaters, and that this is done to facilitate the marriage of the Chinaman with some pretty girl who does not like to marry a heathen. A few Irish girls have married Chinamen in Australia; but that any minister of any of the denominations would lend himself to be the base individual to baptise a heathen that he might marry, there is no one here willing to believe. Some one in the "bush" must have been writing to friends at home, and was resolved upon a sensation paragraph.

A NEW ISSUE FOR THE FRENCH MAIL.

The *London and China Telegraph* will, from January next, be published on the arrival of the Mails per French steamer, about the 4th of each month.

The London & China Telegraph.

LONDON, MONDAY, DEC. 28, 1863.

DESERTION OF BURGEVINE.—THE BEGINNING OF THE END.

THE very unexpected intelligence brought by the last China Mail, of the return—shall we call it to duty?—of BURGEVINE and his subordinate mercenaries, has elicited from the community at home every possible shade of opinion. By some it has been hailed as foreshadowing the approaching termination of a struggle which, though less heroic in incident, has been ten times more deadly in effect than the Civil war of America. Others, not a few, deplore what they are pleased to call a defection, because they continue to be infatuated with the notion that the Taiping Rebellion is to become more or less gradually an introduction to the spread of Christianity, with which we need hardly remind our readers it has absolutely not a single precept or dogma in common. Others look forward to a vast start in commerce, such as will completely distance the already marvellous expansion of our trade. A very few regard it as important only as evidencing the weakness and exhaustion of both parties. We confess we are rather disposed to agree with the latter section, though we must point out that where two combatants are about equally exhausted there is no immediate guarantee for the cessation of hostilities. It is only when one party has unmistakeably proved its superiority by thorough conquest that a permanent peace has any chance of being established. There is nothing to prevent the two great parties from resting on their arms, glaring mutual but impotent defiance for a series of years. We have elsewhere in the present issue glanced at the position of affairs at Peking. Suppose the Imperial Cabinet have overruled Prince KUNG, and with genuine Chinese cunning, having learned the disaster the enemy has sustained in the departure of BURGEVINE, and all the Europeans who had taken suit and service, should prefer to try how the Imperialists too could hope to fare without the dangerous proffer of the aid of Western civilisation? The proverbial acuteness of the Celestials might teach them that as half a loaf is better than no bread, so it might be better to put up with chronic rebellion in the heart of the empire rather than forego empire itself by permitting the foreign barbarian to assist them upon his own terms. We confess we think this by no means an improbable policy to be adopted by the astute Tartars, who are by no means so fast asleep as Mr. TOWNSEND seems to imagine. The return of BURGEVINE they will be amply justified in ascribing to the true cause—the low state of the Taiping finances, the sole point in which the Imperialists have anything like strength. Unless Captain OSBORN takes his fleet right up the Pei-ho, near the very walls of the capital, we do not see how the Tartar Cabinet are to be "taught to hear reason," as a contemporary insists we must do with those very deaf and extremely stupid, and undoubtedly obstinate, and, withal, remarkably sagacious statesmen, who direct the councils of the Brother of the Sun.

There is, however, one element which has hitherto been entirely overlooked. Who are the Imperialists and the rebels? We answer, advisedly, not one-third of the population. Whole provinces of the North and the remote West, and even South, know nothing of the rebels, though they do take an occasional turn at land-piracy on their own account. That man will have the fate of China in his hands who will enter it from the south-west drill and discipline the hardy mountain tribes along the West and south-west frontier, open communication with Rangoon, so as to make all British Burmah his basis of operations, and renew, on a large scale, the Mahratta invasion of India. GORDON is free now to take Soo-Chow, we may suppose. But what would such a success as that be compared with the grand scheme of regenerating China through her own children?

THE ANGLO-CHINESE FLEET.

THE plot is evidently thickening at Peking. It now appears there is a Circumlocution-office of the best kind in that fortunate capital, which, instead of trying how not to do it, aims at having its own way in a very potential mood, yet with the happy knack of always seeming to be on the point of surrendering what is demanded of it. The present aspect of affairs seems to us to be singularly discouraging for the prospects of the Anglo-Chinese fleet. Its paymaster is at loggerheads with his official superior; its admiral has, with true sailor-like impetuosity, trod rather heavily on the toes of the mandarin of the province which was to have been the scene of the-dashing sea-king's first exploits, who is accordingly condemned to dance attendance in Prince KUNG'S anti-chamber; and General BROWN has started in a huff to call in the troops and guns he had lent the Imperialists. Where it will all end nobody seems to be able to conjecture. Mr. HORATIO NELSON LAY has all the pluck and decision of his great namesake; but the energy and gallantry which might help SHERARD OSBORN in the field are thrown away in the long-drawn debates and subtle negotiations of an Eastern Court intrigue. Moreover, he and the gallant captain are painfully remote from their supports. Colonel GORDON is before Soo-Chow; those gunboats are at a long distance. What are two diplomatists to do without either moral or material force to back them? Why do they not place their fleet at the disposal of Prince KUNG, and appeal to his ambition to become the proprietor of a fleet with which he can play the part of the Protector SOMERSET or King JOHN, as observance of the laws of CONFUCIUS or the lust of power mayldictate. We presume, as Mr. LAY and Captain OSBORN assure us they are only desirous for the sake of British commerce of seeing a stable Government established, it will be matter of indifference to them which set of Chinese they victimise in the hostilities which we plainly perceive are looming in a not very remote future. Imperialist, Tai-Ping, or Kungite, the ARMSTRONG projectiles are no respecter of persons or politics, and will be found in the long run to be the representatives of the most stable form of government China has known for many a long day.

THE CHINESE SLAVE TRADE IN PERU.

ON a barren and unsightly group of islands lying off the mainland of Peru, valuable from having been for ages the undisturbed resort of sea-fowl, may be witnessed sufferings more dreadful and misery more extreme than in any other portion of the habitable globe. The withered, loathsome, and diseased forms of Chinamen to whom these islands have been made a prison, and who, through every hour of daylight from year to year undergo penalties only due to unutterable crimes, constitute the lingering records of a slave trade dating later than the British Act of Emancipation—the victims of one long continuous crime. The business of these Chinamen, who work in the company of Peruvian criminals and batches of Polynesians lately added—is to unearth the guano and stow it in the holds of vessels. Not only do they work under the lash of black taskmasters, but possess no means of recuperating wasted energies. Every movement conjures up a cloud of dust which the lungs inhale; their wretched cane-built huts admit the life-destroying exhalations; their miserable pittances of rice, served out to them as if to dogs, is not free from the contamination; phthisis, accompanied by nervous irritation, never fails to attack them; their rest is measured by the short nights of a southern latitude, and even the Sabbath brings no respite to their exhausting toil. Of all the sails that come in view, not one ever brings them a message from the Celestial land—to them henceforth a land of silence. The culpability of those who consigned them to this doom—and among these are names ranking high in the mercantile world—does not simply consist in having inveigled them aboard ship under pretence of compensated emigration and a return to their own country in a given period, but involves responsibility for every human life thus destroyed, for every painful breath drawn in the suffocating dust and heat of those deposits, and the long agony of chronic complaints of the worst character induced by the subtle and permeating exhalations. They are like men taken from their deathbeds and made to work whilst a muscle in the frame shows life; and would make a phantom-like and ghostly company if gathered together for transhipment. Placed under an inferior and cruel race, who delight in lashing them up to working point whilst in a state of disease and exhaustion, a true portrayal of their condition would make a companion picture to any scene in DANTE'S *Inferno.*

Digitized by Google

These, then, are the imported labourers of English and American brokers; the product of English and American convictions of the extreme sinfulness of the slave trade. These men are met in the streets of London, Boston, and New York, retired from their establishments at Canton, Macao, and Cumsingmoon. Yankee cuteness was not wanting to pious deacons and substantial churchwardens of the Puritan capital of Massachusetts to discern the large pecuniary returns derivable from these novel ventures, which risked nothing and gave quick returns. With a little of SAM SLICK'S "soft sawder," and any amount of lying, the thing worked to a charm. The Baltimore shipbuilders found a sudden and unprecedented demand for their tidy and swift sailing clippers, for profits were calculated by the number of passages rather than the capacity of the vessels. The market might soon be glutted, and the work must be quickly done. The poor wretches stowed away in the hold, as soon as a gleam of their intended destiny shot across them, often rose and murdered the guiltless captain and crew. Americans, undoubtedly, had the largest share in this inhuman traffic—this bartering of flesh and blood on false pretences to a nominally Christian Government, but which, unfortunately, as events have shown, has no conscience to reach, and puts no value on individual life. Of course it is now the business of those who gained their wealth from this traffic to silence inquiry and pretend forgetfulness; solid and respectable people who make their acquaintance on the "grand tour," or at home, would be astonished if they only knew the origin of the wealth they are at such pains to display, or, in plain words, how they made their money. But with all this display, the conscious guilt attaching to such a career of infamy—

"Cannot be washed or worn away."

Shortly after the establishment of this journal, when the trade was in full activity, we laid before Earl RUSSELL facts which fully exposed its character, together with all necessary details, and urged upon his lordship the necessity of the Government so far intervening as to interdict the employment of British vessels in the business; and on this suggestion a Bill to that effect was introduced into, and carried through Parliament. Owing to representations subsequently made to the American Government, a Bill similar in its provisions, and applying to American vessels, passed through Congress and received the assent of the PRESIDENT. The slave interest was at the time in the ascendancy both in the Washington Senate and Cabinet, but this coolie business could not be tolerated even by the owners of the rice and cotton fields of the South; and so strongly was public opinion in the United States expressed on the subject that no attempt was made to evade the law, and the trade came to an end. Not so its consequences. The Southern slave has happiness compared to this inhuman and barbarous serfdom. The question now is, cannot these consequences be mitigated? Out of the enormous gains which the trade provided to the agents and brokers in China, conscience-money should be forthcoming to restore to their native land these helpless victims of oppression, with no appeal from their merciless task-masters but to a common humanity, and the monotony of whose painful existence is only broken in upon by an unearthly scream heard now and then from some high cliff—a leap—a plunge into the deep blue waters of the Pacific.

Since the above was written we have seen the following item in the *Panama Star*:—

"Our readers will remember that the Peruvian Government, after the kidnapping of natives from the Kanaka Islands had led to troubles with the French, intended to send back those of the unfortunate creatures that had survived the change of climate and other hardships. Two vessels were chartered to convey back the rest, about 500. One of these vessels (Spanish) had scarcely embarked her share when the small-pox broke out fearfully on board, and after many had died, the remainder were disembarked again and put on board the other vessel, the *Adelante*, Capt. Grassau, in addition to the 250 that were in her already. Capt. Grassau, accompanied by a Peruvian officer, put to sea with 429 men, with the intention to carry his load of miserable human beings back to their native islands. But on the third day out the small-pox made its appearance, and caused such a sad havoc, that the captain, fearing that all would have died before he should be able to reach his destination, made first for the Galapagos Islands, and seeing there was not fresh water nor victuals enough, went to the Cocos Islands, where he landed those that survived—about 230—on an uninhabited island with plenty of water, fruits, and wild hogs. That there was sufficient of those things which make life pleasant is shown by the fact that the steward and one of the sailors ran away in order to share with the Kanakas their fruits, hogs, and wives. Captain Grassau thence sailed for Puntarenas, where his vessel is lying now, whilst he is going back to Peru to receive orders from the Peruvian Government as to the Kanakas left behind."

OVERLAND COMMUNICATION WITH WESTERN CHINA.

(LIVERPOOL ALBION.)

More than twelve months ago we directed the attention of our readers to this important subject, and since that time numerous applications have been make to Government, by the various commercial chambers of the country, requesting that an official survey might be made of that part of Burmah which intervenes between our own possessions and the western provinces of China. It is with great satisfaction that we are now able to report that, thanks to these representations, and the unwearying efforts of Captain Sprye, the long-desired survey is about to be made; and though the scale on which the operation is to be conducted is so moderate as almost to provoke a smile, we anticipate from it results the magnitude of which it is not easy to limit.

Having already endeavoured to lay before the public a trustworthy account of the products of the vast regions of Western China, and pointed out the reasons why a large trade may be expected to spring up when the means of communication with those populous districts is established, we do not purpose to say more on this point at present, but shall confine ourselves to a few words in explanation of why this short and apparently easy means of access to China has not been adopted in modern times; for, as we have already shown, there is good reason to believe that the route which is now attracting the attention of our leading merchants is the identical one by which the ancient Egyptians received those products of China the presence of which in some of the oldest Egyptian tombs has puzzled the conjectures of archæologists.

Let us consider what the state of trans-Gangetic India was only a few years ago. What was really known of China? A jealously-restricted trade with a few seaports, a few narratives of travels by adventurous explorers, and doubtful assertions of the Chinese authorities, and we have all the sources of information which were available to us as to the products and resources of this gigantic empire. Of Burmah our knowledge was even more limited; that country was literally a *terra incognita*, and its rulers, practising the same methods as the Chinese for excluding foreigners, left it to the imaginations of European writers to describe these secluded regions as fancy might suggest.

Confined to the limits of their own country by the wildernesses of Siberia and the mountain ranges of Thibet on the one side, and finding no outlets for their products among the thinly-peopled provinces of Burmah, the energies of the Western Chinese were directed to the cultivation of an inland trade with their fellow-subjects, for which the huge rivers of China afforded considerable facilities; and if an occasional adventurer from Yun Nan penetrated as far as Canton, and took home with him marvellous accounts of the outer barbarians, no idea was likely to occur to those among whom he lived that there was any better means of communication with these strange men in fireships than by the great watery highways with which a kind Providence had intersected their country. Hence it has happened that what we know of the products of Western China has been gathered from such of them as have filtered through to the Eastern ports by the toilsome and protracted route of the rivers, and any endeavours on our part to open a direct communication with Yun Nan and the adjoining provinces has been hitherto frustrated by the jealousy of the Burmese rulers.

Now, however, that the clouds of ignorance and prejudice are clearing away in the East, and the people and their rulers are beginning to appreciate the blessings which a free and unrestricted commerce gives, we look with confidence to the development of new sources of industry and new channels for commerce, bringing with them happiness and prosperity to millions of our fellow-creatures; and among the prospects which rise before the contemplative eye there is not one so simple, and yet so grand, or so worthy of our best attention, as the opening of a highway through our territory in Burmah to the populous states of Western China. The first step has been taken; a survey is to be made. Of the consequences that will follow we have no doubt. A new epoch is about to begin in the history of the East—another gem is about to be added to the diadem of British enterprise.

NAVIGATION OF THE YANG-TZE-KIANG.

(To the Editor of the *London and China Telegrayh.*)

SIR,—Referring to Captain Bowers' interesting letter on the navigation of the Yang-tze, &c., which appeared in your issue of the *London and China Telegraph*, Nov. 27 (extracted from the *Times*), I beg to hand you the following remarks for insertion in your paper, if worth your consideration.

The statements made by Captain Bowers I am fully able to corroborate, having lately been to Hankow in a ship of 1,400 tons register, returning in the same vessel loaded, drawing over 19 feet. The fact of the return voyage having been performed without the vessel grounding must tend, in a measure, to remove a little of that prejudice which is felt by merchants here against risks on the Upper Yang-tze.

The navigation certainly requires an experienced pilot, and these being known to our merchants in China, and their number not being scarce, no difficulty is experienced on this point. The principal difficulty, as Captain Bowers observes, is the Lang Shang crossing, but as this has lately been well buoyed, this danger is considerably lessened. This passed, the rapidity of the current is the chief drawback, from Silver Island upwards (about 450 miles), excepting when the river is at its highest (which in some parts rises 30 feet), the banks of the river are then overflowed, causing the paddy-fields to be covered, consequently the land marks are lost, this necessitates, of course, great care and accurate knowledge of the water. The lead is, on such occasions, constantly kept going, as quickly as can be hove, in order to keep in the proper channel. At this stage of the river it is not prudent for sailing vessels to be towed up or down. It is not, however, necessary, as far as concerns tea ships proceeding from Shanghai to Hankow for the season's teas. If quick despatch be given, a powerful steamer or two tugs to tow a vessel up (which would take twelve to fourteen days), the loading and return voyage to Woosung could be accomplished in about twenty-five days, and the vessel at sea before the water is at its height. The second crop could be shipped when the river is falling, which is the best time, provided the vessel does not get on

Digitized by Google

shore, in which case, the water constantly falling (sometimes a foot a day), the vessel, in all probability, would remain where she struck.

The plan adopted in the return of the vessel above alluded to, was towing the ship stern foremost, so that in case of requiring to bring the ship to an anchor suddenly (which often occurs), she can do so without turning to meet the current.

Vessels loading teas at Hankow for England should anchor a little below the city of Woo Chang, immediately opposite the foreign hongs on the other shore, where there is no current, good anchorage, and where the loading could be effected as easily as in the finest harbour. By doing this many fatal accidents would be prevented, goods could be taken on board safely, and without danger to either shippers or the master of the vessel. Holding ground is good, and no difficulty is experienced in getting the anchors, whereas on the shore near to Hankow steamers have constantly to keep up steam in order to be in readiness should any accident occur. Collisions, however, are constantly taking place, boats with valuable goods often capsized, as also passenger boats, sometimes all on board perishing, the Chow Chow water being very dangerous. An instance came under my notice of two boats, containing each five or six persons, being bodily taken down in crossing the Han, about 100 yards wide; another of the tide sweeping a passenger boat containing twenty-five persons across a ship's bows, causing her immediately to break up, five men who clung to the chains being all that were saved. Large wood rafts are also constantly coming across the bows of vessels if lying well out in the stream. This could be all obviated by anchoring on the opposite shore.

Yours obediently,

London, 10th December, 1863. YANG-TZE-KIANG.

Naval and Military.

H.M.S. Conqueror, with the Royal Marines for service in China and Japan, as detailed in our issue of the 10th inst., sailed from Plymouth on Saturday, the 19th inst. It is stated that on arrival these reinforcements will be solely used in the subjection of the refractory Daimios. We do not hear of any further ships or troops about to be despatched.

The *Army and Navy Gazette* has the following on the Anglo-Chinese squadron:—"By the latest advices from the Anglo-Chinese squadron we are glad to learn that the whole of the foreign ministers at Pekin strongly advocate the views of Commodore Osborn, and the duty detailed for the fleet. H.I.M. ships Pekin, Amoy, and China are in Chefoo Bay, and Kwangtung at Shanghai. The Tien-tsin and Keangsoo had not arrived. The weather was very healthy, and the men of the squadron in a better state of discipline, and ready for any emergency. H.I.M.S. China, Commander Noel Osborn, had recently returned from Peiho River, where she had conveyed Commodore Osborn and staff *en route* to Peking. It was thought probable that Commodore Osborn would have arranged all diplomatic matters by the early part of last month, and by that time the whole of the fleet would be ready for operations, previous to which the whole of the squadron will assemble in Chefoo Bay.

The screw steam frigate Topaze, 39, Commodore the Hon. John W. S. Spencer, from the Pacific station, arrived in Plymouth Sound yesterday morning. She left Vancouver's Island on the 27th of June, arrived at Valparaiso the 26th of August, left the 21st of September, arrived at Rio Janeiro the 27th of October, sailed thence the 2nd of November, and had a fine passage home. The frigate brings as passengers two assistant engineers, Mr. Cresswell, of the screw steam gunboat Forward, Lieut. and Commander the Hon. Horace D. Lascelles, and Mr. Singer, of the screw steam corvette Satellite, 21, Capt. Stephen S. L. Crofton, 33 naval and military invalids, including Lieut. Murray, of the screw steam sloop Cameleon, 17, Commander Edward Hardinge, and Mr. Boys, assistant paymaster; also 43 supernumeraries and 18 prisoners. No deaths have occurred on the passage home. The Topaze was put in commission by her present Commodore on the 11th of June, 1859.

By the latest advices from the Pacific station we learn that Her Majesty's ship Tartar left for Yokohama on the 2nd of September.

Since last we wrote upon the condition of the army (*Spectator*) the lash has again been used, and the troops at Woolwich have once more witnessed the infliction of a punishment which is revolting to every feeling of humanity. It is the proudest boast of an English soldier that he has never turned his back upon an enemy; but what amount of military virtue is to be expected from a man who has had to show his back, bare and bleeding, to his own comrades? Essentially brutal and degrading in its character, it was hoped that the days of flogging were over, and that it was only retained in our military code as a punishment to be held *in terrorem* over the heads of confirmed and habitual offenders. The division of our army into three classes, one of which was absolutely exempt from corporal punishment under any circumstances whatsoever, encouraged the public belief that a wiser and a kindlier system had at length been definitively adopted. The recent occurrences at Woolwich give the lie to all these hopes and expectations. They prove that manhood may still be outraged and degraded; that, for comparatively venial offences, a fellow-creature may still be scourged until he sinks upon the ground, fainting and sick, or until, in the extreme agony of his bodily suffering, his brain gives way. One of the more recent victims had scarcely been removed from the scene of his torture before he rushed upon a man with whom he had no personal quarrel, and tried, in the madness of his pain, in the frenzy of his indignation, to strangle him. The act was one of almost brutal ferocity; but what else could be expected from a man who had just endured the lash?

The Duke of Cambridge presided at the distribution of prizes at the Royal Military Academy, Woolwich. The duke and staff having taken up a position at the head of a table on which the valuable prizes were placed, Major-General Hamilton, vice-president of the Council of Military Education, read the report of the council, from which it appeared that of sixty-eight gentlemen cadets who were examined for commissions on this occasion sixty-five have passed, a result which the council cannot but regard as eminently satisfactory.

The *Lyra*, 9, screw sloop, has been commissioned for service on the East India station.

The *Mutine*, 17 guns, corvette, Commander Wm. Graham, has arrived from the Pacific, and will pay off at Woolwich.

THE distribution of the naval portion of the booty captured in Pegu in 1852 and 1853, and in which the officers and crews of Her Majesty's ships *Bittern*, *Cleopatra*, *Contest*, *Fox*, *Hastings*, *Hermes*, *Rattler*, *Salamander*, *Spartan*, *Sphynx*, *Styx*, *Serpent*, and *Winchester*, are entitled to share, will commence on the 5th proximo.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ARKRIGHT—On the 23rd Dec., at 12, Portman-square, the Hon. Mrs. Arkright, of a son.
GREENSHIELDS—On the 12th Dec., at Liverpool, the wife of Mr. John J. Greenshields, of Singapore, of a daughter.
LE MESURIER—On the 19th Dec., at East Down House, near Barnstaple, the wife of Lieut.-Colonel Le Mesurier, C.B., Royal Artillery, of a daughter, stillborn.
LYALL—On the 20th Dec., at 14, Gloucester-square, Mrs. George Lyall, of a daughter.
MACLEAN—On the 29th Oct., at Hong Kong, the wife of G. F. Maclean, Esq., of a son.
WALKINSHAW—On the 15th Dec., at Walkinshaw House, Renfrewshire, the wife of Jas. Walkinshaw, Esq., of a son, stillborn.

DEATHS.

GREENSHIELDS—On the 24th Dec., at 15, Canning-street, Liverpool, Margaret Lyall, wife of Mr. John J. Greenshields, of Singapore
BARNETT—On the 1st Oct., during his passage home from Shanghai, Charles Ralli Barnett, third son of B. L. Barnett, of Plaistow, Essex, aged 17.
THOMPSON—On the 16th Dec., at 7, Montague-street, Edinburgh, Mr. J. Thompson, late of Singapore.

COMMERCIAL POSTSCRIPT.

The directors of the Société Générale de Commerce et d'Industrie at Amsterdam have announced that a payment of 3fl. 90c., or 8f. 35c., will be made to the shareholders as a portion of the profits of the year 1863, payable at the offices at Amstersdam and Paris. It is understood that the business of the company is making satisfactory progress.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 21: At Cuxhaven, from Singapore, Carl and Auguste; 26, at London, from Nagasaki, Jacoba and Hannah. At Deal, from Shanghai, Strathmore; at London, from Singapore, Prince Alfred. Off ASCENSION, Nov. 26: From Shanghai, Carpentaria. Dec. 25, at Liverpool, from Canton, Patna; 26, at Liverpool, from Rangoon, R. M. Mills; 28, at Deal, from Foo-chow-Foo, Mary Mildred; at Queenstown, from Akyab, Limerick Lass; at Liverpool, from Borneo, Rochester; from China, Jura; off Falmouth, from Penang, John Land.

DEPARTURES.—Dec. 24, from Sunderland, for Hong Kong, Kelso.

LAID ON.—At London, for Shanghai, Assyrian; at Glasgow, for Shanghai, Wild Deer; for Singapore and Penang, Dunnikier; at Greenock, for Shanghai, Taiping.

SPOKEN.—Isabella, Penang to London, Oct. 29, 31 S., 34 E.; Mandarin, Norw. barq., Newcastle to Shanghai, Nov. 13, 6 S., 31 W.; Helena, Dutch barq., Batavia to Rotterdam, Dec. 5, 34 N., 40 W.

Monetary and Commercial.

The Chartered Mercantile Bank of India, London and China declared a dividend of 5 per cent. and a bonus of £1. 5s. per share (free of Income tax), for the current half-year, payable to the shareholders on the London register, on and after the 1st of January next; and to the shareholders on the Bombay register, fifteen days after receipt of the outward mail of the 18th instant.

According to advices from Labuan, a stock of about 5,000 tons of coal was on hand, the daily production being about 100 tons. The current sale price was $5 per ton. The comparative value of this coal for steam purposes, it is stated, is as 5 to 4 of Welsh steam coal.

The second trial of Messrs. W. S. Lindsay and Co. against the underwriters on the steamer *Harbinger* for the loss of that vessel at Algoa Bay has ended in the following verdict and compromise:—

The jury retired to consider their verdict, and after an absence of two hours and three quarters returned into court, and answered the separate questions left to them, the result of which was a verdict for the defendant, on the ground that a prudent owner uninsured would not have abandoned the vessel. The jury were then sent back to assess the amount of damages for a partial loss, to enable the plaintiff to move the court above to enter the verdict for him for that amount. In the meantime the parties agreed to the following terms, the jury having been occupied eight days in the investigation of the case:—The jury to be discharged. Each party to pay his own costs. The underwriters, represented by their solicitors, to pay the plaintiff £4,500, over the sum paid into court, out of the fund deposited with them in their joint names, and the residue to be paid back to the underwriters.

The Times publishes some remarkable statements on the coming and much needed increase in the supply of silver. The yield in California is increasing; a new silver region of a hundred miles by forty has been discovered in the Argentine Republic, at the foot of the Andes, and St. Arnaud, in Victoria, is described by miners working there as "a silver Cornwall." The depreciation in the value of silver is, therefore, likely to keep pace with that in gold, though it will be more quickly checked, as the margin of profit to the miner is considerably less.

The bar silver by the last steamer was sold for Bombay at 5s. 1½d. per ounce, showing a rise of ½d. compared with the

Digitized by Google

price obtained for the supply by the previous packet. In the interval, however, transactions have occurred at the present rate. The rest of the Mexican dollars by the *Tasmanian* were also disposed of for China at 5s. 1d. per ounce.

The Messageries Imperiales Company makes known that the directors have resolved to propose, in the next general meeting, a resolution to the effect that the "30,000 provisional shares created for the establishment of the Indo-China lines shall be assimilated to the 80,000 old shares, and shall from the 1st Jan. next participate like them in the advantages and charges of the enterprise." In consequence of this the holders of the said provisional shares are required to pay, between the 1st and 15th Jan., the 125 francs remaining due on them.

Mr. James Low's circular states the total amount of specie shipped to the East from Great Britain during the last thirteen years. It will be seen that the shipments of gold in 1863 have been the largest on record, but that those of silver have been greatly exceeded in previous years. During the thirteen years fully one hundred millions sterling of silver shipped from Great Britain have been absorbed in the East. The following will show the exports in each year:—

From Great Britain for Thirteen Years.			From the Mediterranean Ports for Eleven Years.		
	Gold.	Silver.		Gold.	Silver.
1851	102,280	1,716,100	1853	93,528	848,362
1852	921,739	2,630,238	1854	48,456	1,451,014
1853	880,202	4,710,665	1855	243,239	1,524,240
1854	1,174,299	3,132,003	1856	74,039	1,989,916
1855	948,272	6,409,889	1857	259,986	3,350,689
1856	404,749	12,118,985	1858	165,230	911,043
1857	269,275	16,795,232	1859	142,144	1,521,970
1858	168,305	4,781,923	1860	765,138	2,764,054

20	British Indian Tea (1)	2	⅜ to 1 pm.	...

ARTICLES OF IMPORT.

TEA.—The public sales then in progress terminated on the 11th inst. with rather more spirit at the decline established during the earlier part of the sale, since when there has been only a very moderate business doing, although in some cases prices show a slight improvement on the very low rates current at the auctions. Low and dusty kinds of Congou have sold at the public sales' prices. Good Common is quoted 1s. per lb., but without enquiry. Flavory kinds of old import show no alteration. Common to fair Blackish leaf kinds have been saleable to a fair extent. Medium Kaisows of new season remain difficult of sale. Second class Monings and Wopaks have been sold from 1s. 9d. to 2s. per lb., being about previous prices. Fine to finest Kaisows, also Monings and Wopaks, have shown no material change either in demand or price. Tayshans remain as before. Commons Oolongs have been steady. Good to fine are still very difficult of sale. Finest in moderate demand. Souchongs show no improvement, the demand being very limited. Flowery Pekoes continue neglected. In Scented Teas business has been generally limited, prices tending in favour of buyers except for fine to finest. Foochow kinds of Orange Pekoe, which are saleable at former rates. Uncoloured Japans have been in request at the decline last quoted. Indian Teas have sold rather lower. In Green Teas business has been limited, owing to the small supply on offer, and prices have a hardening tendency for all kinds suitable for America, especially Young Hysons, which are now reduced to a moderate compass. Gunpowders continue very scarce, and prices show an improvement of 1d. per lb. Canton-made Young Hysons are saleable at previous prices—8d. to 8½d. per lb. Gunpowders remain as last advised. The public sales concluded on the 11th inst., 48,049 packages being sold out of 75,751 packages offered, nearly the whole being without reserve. 2,700 packages Indian tea were sold on the 15th and 16th inst., out of 3,120 packages offered.

SILK.—The circular of Messrs. Waithman gives the following memo. on the market:—"There has been some business done during the past fortnight, more perhaps in China than Japan silk. Prices have ruled extraordinarily firm, and several of the leading importers still withhold their stocks from the market, being indisposed to sell at present rates. The deliveries have been very limited, say of China, 1,886 bales; Japan, 1010; total, 2,906 bales.

SUGAR.—The improvement perceptible on the 18th has been maintained, although without activity, and as the supply has been very scanty, the business done has been mostly at rather firmer prices. 400 bags grainy grocery Madras have been sold at 40s. 6d. Foreign: Nothing has been offered in public sale, but by private contract 23,000 bags clayed Manila have been sold at 40s. to 41s.

COFFEE.—Colonial sorts continue to meet a good demand, and supplies being lighter, a further advance has been established. Plantation, more particularly, has been in active request, and besides about 150 casks privately, 570 casks, 650 barrels and bags, in auction, have been cleared off, the latter at an improvement of 1s. per cwt., viz., fine ordinary to low middling 74s. 6d. to 78s. 6d. 130 casks, 1,460 bags native, at public sale found buyers at steady prices; good ordinary to superior, 67s. to 76s. The following quantities in auction sold steadily—viz., 143 cases Neilgherry, small to bold, 74s. 6d. to 80s. 6d., and 86 cases, 840 bags Malabar and Mysore, good ordinary, even yellow, 71s. 6d.; bold, 75s. to 77s.

COTTON.—The market has remained dull, but the limited transactions effected have been without material change in value, viz., middling to good fair Tinnivelli Madras, 20d. to 22½d., fair to fully fair Western, 22½d. to 23d., and middling fair to good fair Bengal 16¾d. to 17¾d.: also for arrival, 4,000 bales, greater part Western Madras at 22d. to 22¼d., and China 18½d. per lb.

RICE.—Not any business of consequence doing in Java; quotations, 9s. 6d. to 19s.

SAGO has commanded about former terms, and of 2,079 boxes at auction, half sold at 20s. 6d. to 24s. per cwt. for middling pinky to good small, and 18s. 9d. to 19s. large. Moderate business done privately.

FLOUR.—Rather dearer, 1,243 bags at auction having realised 15s. to 16s. per cwt. for middling to good.

MACE: Continues firm; and 24 cases Penang, and 7 Singapore at auction, were mostly sold at 9d. to 1s. 5d. per lb. for low dull wormy to very good reddish. Nutmegs: The medium qualities are 1d. to 2d. per lb. dearer; and 39 caser Penang, and 7 cases Singapore at auction mostly sold at 2s. 11d. to 3s. 11d. for middling to fine bold, and 1s. to 1s. 7d. ordinary small to middling medium. Pepper (black): Steady, with rather improved demand; and of 2,529 bags of Singapore at auction, two thirds sold at 3⅝d. to 3¼d. per lb.; and of 700 bags Penang, two-thirds sold at 3⅝d. to 3½d. White: Steady, and of 206 bags Singapore at auction, a few sold at 5⅝d. per lb. for middling.

HEMP.—Manilla: This market has been tolerably firm and active, and good business has been done, the atest price being £31. 5s. per ton for Sorsogon, and £30 15s. good rop ng. Of 3,123 bales at auction, nearly two-thirds sold; Quilot at £44 to £44. 10s.; Lupez, £46. 5s. to £46. 15s.; and fair roping to fair Sorsogon, £29 to £30. 10s.

TIN.—Has been steady, at a ight reduction in prices; business in both descriptions very limited, and chiefly in Straits at £112. 10s. to £113 per ton cash.

JAPAN WAX.—Recent importations, to the extent of 971 cases, brought to auction, and all sold at very irregular prices, being generally lower; 62s. 6d. to 70s. per cwt. for fair to very good saucers, 53s. 6d. to 61s. 6d. discoloured, and 55s. to 56s. middling block.

MISCELLANEOUS.—Camphor: Business to some extent done in China at £5 per cwt. and subsequently at rather more money for both Japan and China. As much as £5. 10s. attained for a few chests, at which figure there remain sellers, but no buyers. Only 50 boxes at auction, retired.

CASSIA LIGNEA.—Quiet, but without alteration in value; and of 1,320 cases at auction, a few only sold at 92s. to 93s. per cwt. for first quality. Gum Benjamin: Sumatra continues of slow sale for the lower qualities; of 142 cases at auction, one-fourth found buyers at £12. 15s. per cwt. for second quality, and £6. 10s. fair glassy 3rd.

SPICES.—Cloves: Have not suffered any further decline, and appear for the present very firm: of 1,761 bags at auction one-third sold at 2⅞d. to 3⅛d. per lb. for ordinary to fair. Not any Penang brought forward. Gutta Percha: Of 25 tons at auction, one-third quitted at 2s. 2¼d. to 2s. 3d. per lb. for good natural, and 1s. 6d. to 1s. 7d. fine reboiled; no

Digitized by Google

material private transactions. India Rubber: Particularly quiet; and 159 baskets Penang and 31 baskets Singapore at auction were all retired; private trade as small as possible. Musk: A recent importation, 36 caddies, sold at auction with admirable spirit at 30s. 6d. to 36s. per oz. for good to fine Tonquin, and 25s. to 26s. 6d. pickings, being 2s. to 3s. higher. Oil of Aniseed: Very flat, and prices again the turn lower. 5 cases at auction retired. Private business very limited; there are sellers at 6s. 1d. to 6s. 2d., but no buyers for quantity above 6s. Rattans: Firm, and in revived demand, and 9,061 bundles Penang, and 2,147 bundles Singapore, sold at auction at 4s. to 8s. 2d. per 100. Sapanwood: Rather cheaper; and of 47 tons Siam, at auction, two-thirds sold at £12 to £12. 2s. 6d. per ton for good, and 12 tons Manila sold at £7. 10s. to £8. 2s. 6d. for middling. Sticklac (Siam): Remains very flat, and is cheaper; of 1,329 cases offered at auction, only about one-third placed at 52s. 6d. to 57s. 6d. per cwt. for fair to good. Ivory: Sound Siam is in demand, and very scarce. Terra Japonica: Cutch and Pegue continue very quiet, with very little business doing; only 50 bags at auction sold at 25s. to 26s. per cwt. for fair. Gambier: Has given way in value slightly, and of 1,916 bales at auction, half sold at 22s. to 22s. 9d. per cwt. for middling to fair block, 21s. 6d. heated, and 25s. 6d. cubes. Tortoise-shell: 2 cases Manila, and 2 cases Singapore, at auction, all retired. Turmeric: No China in the market; Java quiet, and of 230 bags at auction half sold at 16s. 6d. to 17s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 5s. to £8. 15s.; hoops, £10. 10s. to £11; sheets, single, £11. 10s. to £12; Staffordshire bars, £9. 10s. to £10; rails, £7.

STEEL.—Swedish keg, £16 to £17.

COPPER.—Sheet and Sheathing, £110 per ton; yellow metal, 9¾d. per lb.

TIN.—112s. for block; 113s. for bar. Tin plates, best charcoal, I.C., 29s. to 30s. per box.

LEAD, &c.—English Pig, £20. 15s.; W.B., £21. 10s.; shot, patent, £23 to £23. 10s.; sheet, £21 to £21. 5s.; spelter, £18. 15s.; zinc, English sheet, £24. 10s. to £26; quicksilver, £7 per bottle.

The following is from the Circular of Messrs. French and Smith:—Iron:—Scotch Pig Iron, with some fluctations, still maintains its price. All descriptions of manufactured iron are very firm, with an upward tendency. Copper:—The demand is very good, and higher rates may be looked for as Ores come forward very slowly. Tin:—English continues in fair demand. In Foreign there is no alteration in price, with a moderate business. Tin Plates are very firm. For Coke Plates a higher rate is asked. Lead is very firm, and several transactions have taken place at improved prices. Spelter:—In this article large speculative purchases have been made for forward delivery at £19 and £19. 5s. Quicksilver continues very scarce, for immediate delivery £7. 5s. has been paid.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 30th June by the P. and O. Company's mail steamers.

	Gold.	Silver.
Shanghai	—	£230,583

United States Gold Coin	3 16 2½	
Silver in Bars	0 5 1½	
Mexican Dollars	0 5 1	

MANCHESTER MARKETS.

Grey Shirtings, 7 lbs., 17s. 3d. to 17s. 6d.; 8¼ lbs., 22s.; 9¼ lbs., 26s Cotton Yarn, Nos. 16 to 24, 2s. 7d. to 2s. 8d.; Nos. 28 to 32, 2s. 11d. to 3s.; Madopollams, 7s. 6d. to 7s. 7d.; Long-Cloths, 22s.; T-Cloths, 13s. 6d.; White Spot Shirtings, 22s.; Brocade, do., 22s.; Damasks, do., 40s. The Circular of Sam Mendel says:—Since the last few days there is rather more inquiry, but the extent of sales is within narrow compass; prices do not show quotable alteration, but there is some irregularity. The prospect of reduced production has, no doubt, some influence in supporting prices; in the meantime stocks are small, and there is an absence of pressure to make sales.

FREIGHTS AND CHARTERS.

Outward freights, both for general cargoes and coals, are without animation, there being a large amount of tonnage on the different berths. Homeward freights from China continue firm, especially for vessels actually on their way out.

Current Rates of Freight for Vessels on the Berth:—To Kanagawa: 55s. weight, 50s. meast. To Nagasaki: 65s. To Hankow: 65s. weight, 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 42s. 6d. meast. To Shanghai: 50s. weight, 27s. 6d. to 30s. meast. To Hong Kong: 40s. weight, 25s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. to 35s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £42 and £2. For Shanghai: £50 and 50s. For Manila: £1. 10s. For the Philippine Islands, Penay, or Zebu: £2 (nominal). For Singapore: £26 and £1. 6s. For Penang: £24. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

CASUALTIES.

SCILLY, DEC. 14.—About 800 chests of saturated tea have been landed during the last two days from the wreck of the Friar Tuck, stranded on Newford Island.

RAMSGATE, DEC. 20.—The Hjalmar, Selstedt, from Sundswall to Manila, put in here to-day with loss of boats, topsail yard, jibboom, bulwarks, and deck load. She has since taken the ground in the middle of the harbour, and heels heavily over on her starboard side.

The Therese, Denicke, from Hamburg to Singapore, with a general cargo, has had to put into Mandal, and is discharging there.

The Living Age (American ship), Emery, from Akyab, which arrived at Falmouth Nov. 17, reports having been captured Sept. 13, in lat. 25, lon. 2 E., by the Tuscaloosa, Confederate vessel, and bonded for $160.000.

The Triton, Neilson, from Cardiff for Singapore, put back Dec. 18 in distress.

ROTTERDAM, DEC. 23.—The Vier Gezusters, Bik, from Batavia, arrived here; slipped her anchors, and has got aground on a bank near Brouwershaven.

VESSELS EXPECTED.

Orders can be sent direct or through any of the Agents of this Paper.

HOLLOWAY'S PILLS.—SATISFACTORY RESULTS.—Whenever the blood is foul, the stomach disordered, or the bowels irregular, these Pills prove infallible curatives. A gentleman who had been a sufferer for years, though he had sought the best professional aid, writes:—"I cannot describe the effect your medicine had upon me; it carried off more bile and made me feel lighter and more cheerful than all the medicine I had taken previously." Holloway's Pills strengthen the stomach, prevent biliousness, purify the blood, raise the spirits, and give energy to both body and mind. In diseases of the head, heart, and kidneys, these Pills are invaluable, not only removing dangerous symptoms, but in warding off the dire effects often resulting from injudicious treatment.

AMOY DOCK COMPANY.

SERVICES MARITIMES DES MESSAGERIES IMPERIALES.

On the 19th of every month a FRENCH MAIL STEAMER will be despatched from Marseilles, at 2 P.M., for ALEXANDRIA, corresponding with another steamer from Suez to India and China. Passengers will be booked and cargo received for conveyance to the following ports:—Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Saigon, and Hong Kong. In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to B. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bacalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.

STEAM to HONG KONG and SHANGHAI (taking goods for Hangkow and Japan), the splendid new, river-built, twin screw steam clipper ship, FAR EAST, A 1 twelve years, 1,200 tons register, 160 nominal horse power, working up to 600-horse power, HENRY JONES (late of the Ballarat), Commander; loading in the East India Docks. This magnificent new steamship (built by J. and W. Dudgeon, of Millwall), affords the best opportunity to shippers requiring despatch. Her cabin accommodation cannot be surpassed. Vacancies for Midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

PASSENGERS by Steamer for HONG KONG and SHANGHAI.—The new twin screw steamer FAR EAST, A 1 12 years, 1,200 tons register, HENRY JONES (late of the Ballarat), Commander, to load in the East India Docks, and to leave early in January. This beautiful steamer has a full poop, with capacious cabin accommodation, and will carry an experienced surgeon. It is confidently expected, from the build of this steamship, and her powerful engines, that she will make a very fast passage. Vacancies for midshipmen.

Apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

TO HONG KONG direct, from Cardiff.—The first-class French clipper-ship MALABAR, 1,700 tons, DE CASTILLON, Commander, will have immediate despatch for the above port. This fine vessel, which will not take coal, in her spacious 'tween decks presents an eligible opportunity to shippers of measurement goods. She has superior accommodation for passengers, including a ladies' saloon, and carries a surgeon and a French cook.

For Freight and Passage apply to STRINGER, PEMBROKE, and Co., 8, Austinfriars, or 54½, Old Broad-street.

To Sail positively on the 1st January full or not full.

FOR SHANGHAI, the magnificent River-built Clipper Ship WHITEADDER, A 1, 10 years (belonging to Messrs. JOHN WILLIS and SON), 915 tons register, A. BOWERS, Commander, loading in the East India Docks. This fine vessel has just completed her first voyage, having made the fastest passage home this season.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

COLOMBO direct.—The beautiful clipper AUGUSTA MAY, A 1 11 years, 392 tons register, loading in the West India Export Dock, has a large portion of her cargo engaged, and will be promptly despatched.

For Freight apply to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, E.C.

Regular Line of Packet Ship. To sail on the 5th Jan.

FOR HONG KONG and WHAMPOA, the well-known clipper ship COREA, A 1 fourteen years, 581 tons register, J. GARRY, Commander, lying in the West India Docks. This ship has good accommodation for passengers, and has just made the passage from Foo chow-Foo in 111 days.

For Freight or Passage apply to PHILLIPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

FOR SHANGHAI direct, Messrs. DUNBAR and CO.'s new Aberdeen-built clipper ship FY-CHOW, A 1 14 years, 730 tons register, will receive goods in the East India Docks till Monday, the 28th December.

For Freight or Passage apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.

MANILLA direct (sailing under the Spanish flag), the splendid new Spanish clipper bark ELISA, A 1 at Lloyd's for 10 years, 431 tons register, FRANCISCO RIVERO, Commander. This fine vessel has just been built at Sunderland expressly for the Manilla trade.

For Freight or Passage apply to CHARLES HINGSTON, 2, John-street, E.C.; or to BREMNER and Co., 20½, Great St. Helens, E.C.

COLOMBO, CEYLON, Direct, will have very quick despatch, having a considerable part of her cargo positively engaged, the splendid new, British-built, clipper ship PALESTINE, classed the highest at Lloyd's, register 607 tons; THOMAS PARK (late of the Severn), Commander. This vessel is now in the West India Docks, ready to receive cargo, and shippers are requested to send their goods down as soon as possible, as it is intended that she shall be despatched at an early date. This magnificent new ship has a full poop, with unsurpassed accommodation for cabin passengers.

For Passage apply to W. H. TINDALL, No. 4, Clement's-lane: and for Freight or Passage apply to W. A. WINKLEY, 23, Birchin-lane, Cornhill. Will be followed by the regular trader Thames.

HONG KONG and WHAMPOA, the magnificent Aberdeen-built clipper ship CITY OF ABERDEEN, A 1 fourteen years, 551 tons register; A. H. TAYLOR, Commander; loading in the East India Docks. This splendid vessel, built last year by Messrs. John Duthie Sons, and Co., especially for the China trade, is confidently recommended to shippers. Has magnificent cabin accommodation.

Apply to CRUICKSHANK and RING, 26, Leadenhall-street; or to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall-street, E.C.
